Opinions of the Supreme Court of Texas

Fiscal Year 2011

(September 1, 2010 – August 31, 2011)

Assembled by

The Supreme Court of Texas Clerk's Office

Blake A. Hawthorne, Clerk of the Court

Monica Zamarripa, Deputy Clerk

FISCAL YEAR 2011 OPINIONS

(SEPTEMBER 1, 2010 – AUGUST 31, 2011)

IN THE SUPREME COURT OF TEXAS

NO. 05-0729

EXXON CORPORATION AND EXXON TEXAS, INC., PETITIONERS,

v.

EMERALD OIL & GAS COMPANY, L.C., RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRTEENTH DISTRICT OF TEXAS

Argued February 13, 2007

Rehearing Granted November 20, 2009

JUSTICE WAINWRIGHT delivered the opinion of the Court.

JUSTICE GUZMAN and JUSTICE LEHRMANN did not participate in the decision.

After issuing our opinion, we granted respondent's motion for rehearing on November 20, 2009 and obtained further briefing from the parties. Without further oral argument, we withdraw our opinion of March 27, 2009 and substitute the following opinion. Our judgment remains unchanged.[1]

[1] The Texas Comptroller of Public Accounts; Jerry Patterson, Commissioner of the Texas General Land Office and Chairman of the School Land Board; and Texas Oil & Gas Association filed amicus briefs on rehearing in this case.

In this oil and gas dispute, we determine whether section 85.321 of the Texas Natural Resources Code allows a subsequent mineral lessee to maintain a cause of action against a prior lessee for damages to the mineral interest that occurred prior to the time the subsequent lessee obtained its interest. We hold that section 85.321 creates a private cause of action that does not extend to subsequent lessees. Because the plaintiff in this case owned no interest in the mineral leases when the prior lessee allegedly damaged the interest, the plaintiff lacks standing to assert a cause of action under section 85.321.[2] Accordingly, we reverse the court of appeals' judgment. Today, we also issue our opinion in the rehearing of *Exxon Corp. v. Miesch*, the companion to this case. ___ S.W.3d ___ (Tex. 2010) (reh'g op.).

I. FACTUAL AND PROCEDURAL BACKGROUND

In the 1950s, Humble Oil & Refining Company (Humble) held mineral leases with Mary Ellen and Thomas James O'Connor on several thousand acres in Refugio County, Texas (O'Connor Field or Field). Exxon Texas, Inc. succeeded Humble's interest in the leases. Under the leases, Exxon paid a fifty percent royalty, which was higher than the royalty Exxon paid on an adjoining tract. In the 1970s and 1980s, Exxon unsuccessfully sought to renegotiate the royalty percentage with the royalty owners. Deciding that it was no longer sufficiently profitable to continue operating the O'Connor Field, Exxon systematically plugged and abandoned the wells, completing its abandonment of the Field in 1991.

[2] The original lessee did not assign its claim for damages to the property to the subsequent lessee.

In 1993, Emerald Oil & Gas Company, L.C. (Emerald) obtained leases for a portion of the O'Connor Field and attempted to re-enter the wells. Emerald encountered unexpected difficulties when it tried to re-enter the wells. Emerald alleges that Exxon caused these difficulties by improperly plugging and intentionally sabotaging the wells by putting considerable quantities of metal, unidentifiable refuse, and environmental contaminants into the wells, placing nondrillable material in the wells, and leaving cut casing in the plugged wells. In 1996, Emerald, on behalf of its working-interest owner, Saglio Partnership Ltd., sued Exxon on six claims: (1) breach of a statutory duty to properly plug a well, (2) breach of a statutory duty not to commit waste, (3) negligence per se, (4) tortious interference with economic opportunity, (5) fraud, and (6) negligent misrepresentation. The royalty owners[3] intervened, alleging similar claims.

Exxon moved for partial summary judgment against Emerald and the royalty owners on grounds that: (1) Exxon has no obligation to potential future lessees; (2) there is no private cause of action for breach of a statutory duty to plug a well in a particular way; (3) there is no private cause of action for breach of any statutory duty not to commit waste; and (4) the facts alleged do not give rise to a claim for tortious interference with economic opportunity; but (5) in the alternative, if the royalty owners have a claim against Exxon for failure to plug the wells properly, it sounds in contract only, not in tort.

[3] The current royalty owners who are petitioners in this case are: Morgan Dunn O'Connor, T. Michael O'Connor, Brien O'Connor, Kelly Patricia Dunn Schaar, Nancy O'Connor, Bridey Dunn Greeson, individually and on behalf of the Dunn-O'Connor Family Trust, Laurie T. Miesch, Jack Miesch, Michael L. Miesch, Molly Miesch Allen, and Janie Miesch Robertson.

The trial court granted portions of Exxon's motion for partial summary judgment, concluding that under sections 85.045, 85.046, 85.321, and 89.011 of the Texas Natural Resources Code and Title 16 section 3.14(c)(1) of the Texas Administrative Code, Exxon owed no statutory duty to potential future lessees, including Emerald. Accordingly, the trial court granted partial summary judgment in Exxon's favor on Emerald's three statutory claims of (1) negligence per se, (2) breach of a statutory duty to plug a well properly, and (3) breach of a statutory duty not to commit waste. The trial court then severed those claims and proceeded to trial on Emerald's three remaining claims against Exxon: fraud, negligent misrepresentation, and tortious interference. The court also denied Exxon's motion for summary judgment on the royalty owners' claims and tried those claims. This appeal arises from Emerald's challenge to the trial court's summary judgment on the statutory claims.

The court of appeals reversed and remanded Emerald's three statutory claims to the trial court, holding that section 85.321 imposes a duty on current lessees to future lessees and thus provides a basis for a cause of action against Exxon. Exxon petitioned this Court for review. We now review the trial court's summary judgment de novo. *Provident Life & Accident Ins. Co. v. Knott*, 128 S.W.3d 211, 215 (Tex. 2003). Our opinion on rehearing in *Exxon v. Miesch*, also issued today, decides the appeal of claims that were tried. ___ S.W.3d ___ (Tex. 2010) (reh'g op.).

II. DISCUSSION

A. Private Cause of Action

Two of Emerald's claims against Exxon invoke statutory duties—breach of statutory duty to plug a well properly and breach of statutory duty not to commit waste. Emerald's pleadings cite

section 85.321 of the Texas Natural Resources Code as the basis for its standing to bring the first claim and refers to other related provisions of the Code in support of standing to bring the second claim. Section 85.321, titled "Suit for Damages," reads:

> A party who owns an interest in property or production that may be damaged by another party violating the provisions of this chapter that were formerly a part of Chapter 26, Acts of the 42nd Legislature, 1st Called Session, 1931, as amended, or another law of this state prohibiting waste or a valid rule or order of the commission may sue for and recover damages and have any other relief to which he may be entitled at law or in equity. Provided, however, that in any action brought under this section or otherwise, alleging waste to have been caused by an act or omission of a lease owner or operator, it shall be a defense that the lease owner or operator was acting as a reasonably prudent operator would act under the same or similar facts and circumstances.

TEX. NAT. RES. CODE § 85.321. The court of appeals held that section 85.321 creates a private cause of action for damages resulting from statutory violations. We agree.

In construing statutes, this Court starts with the plain language of the statute. *McIntyre v. Ramirez*, 109 S.W.3d 741, 745 (Tex. 2003). The language of section 85.321 clearly creates a private cause of action. A party whose interest in property is damaged by another party violating provisions of a conservation law of this state or a Texas Railroad Commission rule or order "may sue for and recover damages" and other relief to which the party may be entitled. TEX. NAT. RES. CODE § 85.321. Section 85.321 also expressly provides a defense to civil actions for lease owners and operators acting as a reasonably prudent operator would act under the same or similar circumstances, adding more credence to the conclusion that section 85.321 creates a private cause of action. *Id.*

This Court previously reached the same conclusion. In *HECI Exploration Co. v. Neel*, royalty owners sued their lessee for failing to notify them that the lessee sued the operator on an

adjoining tract whose overproduction of oil, in violation of Railroad Commission rules, damaged the common reservoir. 982 S.W.2d 881, 884 (Tex. 1998). The court of appeals held that the lessee violated an implied covenant to notify the royalty owners of an intent to sue the offending operator. *Id.* at 884–85. This Court held no such implied covenant exists because the lessee's suit against the adjoining operator does not collaterally estop the royalty owners from suing separately under section 85.321. *Id.* at 890–91. "When a mineral or royalty interest owner is damaged by a violation of the conservation law of this state or a Railroad Commission rule or order, section 85.321 of the Texas Natural Resources Code also expressly provides for a damage suit against the offending operator." *Id.*

Relying on *Magnolia Petroleum Co. v. Blankenship*, 85 F.2d 553, 556 (5th Cir. 1936) as persuasive authority, Exxon urges the Court to disregard *HECI Exploration* and hold that section 85.321's predecessor, article 6049c, did not create a private cause of action. *Magnolia* involved a dispute between two lessees producing from a common reservoir. *Id.* at 554. Magnolia produced oil from several wells on a tract of eighty-one acres while Blankenship had one well on half an acre. Blankenship had sunk his well without a permit. The Railroad Commission sued him, seeking a $1,000 penalty. Blankenship countered for a certificate authorizing him to operate the well. The trial court authorized the penalty and also ordered the certificate of operation. Magnolia appealed the decision, contending that the trial court did not have authority to order the certificate of operation and moved for an injunction against Blankenship under section 13 of article 6049c. *Id.* at 554, 556. Interpreting the statute, the Fifth Circuit held that while the first sentence of section 13 "purports to give no new cause of action," the second sentence gives a producer the right to sue for damages and

appropriate equitable remedies, including an injunction. *Id.* at 556. However, the court determined that an injunction would have been inequitable in that case because Blankenship's single well did not produce as much oil as Magnolia's many wells. *Id.* at 554. Instead, Magnolia should have requested that the Railroad Commission regulate the distribution of oil to each operator. *Id.* at 556. Exxon argues that *Magnolia* stands for the proposition that the Railroad Commission has primary jurisdiction to regulate the allocation of oil between producers from a common reservoir and prohibits a private cause of action under what is now section 85.321. We agree *Magnolia* explains that, at the time, statutes gave the Railroad Commission primary jurisdiction to adjust correlative rights of oil and gas owners in a common reservoir, but we disagree on the latter assertion. Exxon's reading overstates *Magnolia*'s holding. *Magnolia* reasons that, compared to the Commission's proration of production, allowing such allocation to be performed by the random institution and adjudication of private lawsuits would be problematic. Surely that is correct. But *Magnolia* does not hold that section 85.321's predecessor bars private lawsuits for a mineral owner's recovery of damages. *Magnolia* does not answer that question except to say that if section 85.321's predecessor created such a private cause of action, it did not provide a right to an injunction when the evidence fails to establish an equitable basis for doing so. *Id.* at 556.

Furthermore, the Fifth Circuit has held on more than one occasion, not inconsistent with *Magnolia*, that the language in section 85.321's predecessor (section 13 of article 6049c) does, in fact, create a private cause of action. *Turnbow v. Lamb*, 95 F.2d 29, 31 (5th Cir. 1938) ("Article 6049c, section 13, Vernon's Civil Stat. Texas, expressly recognizes and preserves to an injured party his cause of action for damages 'or other relief' against a violator of the oil production laws."); *see*

Sun Oil Co. v. Martin, 330 F.2d 5, 5 (5th Cir. 1964) (adopting the lower court's reasoning in *Sun Oil Co. v. Martin*, 218 F. Supp. 618, 621–22 (S.D. Tex. 1963) (explaining that a violation under section 13 of article 6049c "may give rise to an action for damages")); *see also Ivey v. Phillips Petroleum Co.*, 36 F. Supp. 811, 816 (S.D. Tex. 1941) (holding, in accord with Fifth Circuit law, that a plaintiff does not have standing to sue pursuant to section 13 of article 6049c if no Railroad Commission regulation or state law violation occurred). Although section 85.321 and section 13 of article 6049c are not identical, the pertinent parts of the two laws are the same. Act effective August 12, 1931, 42nd Leg., 1st C.S., ch. 26, § 13, 1931 Tex. Gen. Laws 46, 53, *repealed by* Act effective September 1, 1977, 65th Leg., R.S., ch. 871, § 1, 1977 Tex. Gen. Laws 2345, 2527. Thus, we do not agree that *Magnolia* interprets section 13 of article 6049c to prohibit a private cause of action.

B. Standing of Subsequent Lessees

Having concluded that section 85.321 creates a private cause of action, we examine whether Emerald's status as a subsequent lessee impacts its standing to bring a cause of action under section 85.321. The Legislature gave the right to a private cause of action to a person who "owns an interest . . . that may be damaged by another party violating the provisions of this chapter . . . ." TEX. NAT. RES. CODE § 85.321. Exxon argues that "violating" is a present tense term that indicates an injury concurrent with ownership, whereas Emerald maintains that "violating" would include any party that had violated the statute at some point in time. The plain language is unclear as to whether concurrent ownership is required or whether subsequent interest owners could also maintain a cause of action. The participle phrase "violating the provisions of this chapter" could indicate a continuous action—a party who has violated, continues to violate, or is violating the provision, which would

open the cause of action to a wider range of interest owners. *Id.* The statute could also be interpreted as another party *who is* violating the provisions of this chapter, which suggests a temporal limitation on the private cause of action. Because the text itself is unclear, we look to section 85.321's statutory predecessor and the surrounding context for guidance. *See Alex Sheshunoff Mgmt. Servs., L.P. v. Johnson*, 209 S.W.3d 644, 651–52 (Tex. 2006).

Section 85.321's statutory predecessor, section 13 of article 6049c, preserved common law standards:

> Nothing herein contained or authorized and no suit by or against the [Railroad] Commission shall impair or abridge or delay any cause of action for damages, or other relief, any owner of any land or any producer of crude petroleum oil or natural gas, or any other party at interest, may have . . . .

Act effective August 12, 1931, 42nd Leg., 1st C.S., ch. 26, § 13, 1931 Tex. Gen. Laws 46, 53, *repealed by* Act effective September 1, 1977, 65th Leg., R.S., ch. 871, § 1, 1977 Tex. Gen. Laws 2345, 2527. Thus, part of the stated purpose of Chapter 26 was to prevent the Railroad Commission from infringing on existing causes of action under the common law. The language in sections 85.321 and 85.322 comes directly from section 13 of article 6049c.

For more than 100 years, this Court has recognized that a cause of action for injury to real property accrues when the injury is committed. *See Houston Water-Works Co. v. Kennedy*, 8 S.W. 36, 37 (Tex. 1888). The right to sue is a personal right that belongs to the person who owns the property at the time of the injury, and the right to sue does not pass to a subsequent purchaser of the property unless there is an express assignment of the cause of action. *Abbott v. City of Princeton*, 721 S.W.2d 872, 875 (Tex. App.—Dallas 1986, writ ref'd n.r.e.). "Accordingly, a mere subsequent purchaser [of the property] cannot recover for an injury committed before his purchase." *Lay v.*

Aetna Ins. Co., 599 S.W.2d 684, 686 (Tex. Civ. App.—Austin 1980, writ ref'd n.r.e.); *see also Vann v. Bowie Sewerage Co.*, 90 S.W.2d 561, 562–63 (Tex. 1936) (holding that a cause of action for damages to property resulting from a permanent nuisance accrues to the owner of the land at the time the injury begins to affect the land, and mere transfer of the land by deed does not transfer the claim for damages). Therefore, under Texas common law, absent a conveyance of the cause of action, a subsequent owner cannot sue a prior owner for injury to realty before the subsequent owner acquired his interest. *See Vann*, 90 S.W.2d at 562–63; *see also Haire v. Nathan Watson Co.*, 221 S.W.3d 293, 298 (Tex. App.—Fort Worth 2007, no pet.); *Cook v. Exxon Corp.*, 145 S.W.3d 776, 781 (Tex. App.—Texarkana 2004, no pet.); *Exxon Corp. v. Pluff*, 94 S.W.3d 22, 27 (Tex. App.—Tyler 2002, pet. denied); *Senn v. Texaco, Inc.*, 55 S.W.3d 222, 225 (Tex. App.—Eastland 2001, pet. denied). Similarly, a subsequent lessee, like Emerald, can stand in no better shoes than a subsequent owner. If the Legislature intended to change this common law principle, it could have done so in the statute.

Were we to interpret section 85.321 to allow Emerald to sue Exxon as a prior lessee, we would expand the class of potential claimants beyond that allowed by common law and subsumed in the statute. Without explicit direction from the Legislature, we hesitate to adopt an interpretation of section 85.321 that would make any party who holds a mineral interest indefinitely liable to all subsequent interest holders for prior alleged damage to the land. The consequences of such an interpretation run contrary to the legislative intent to protect and encourage the development of Texas natural resources. *See* TEX. CONST. art. XVI, § 59. We are mindful of the consequences of a particular construction. *See* TEX. GOV'T CODE § 311.023(5); *McIntyre*, 109 S.W.3d at 745. Absent a legislative enactment clearly abrogating the common law, we conclude that Emerald does

not have standing as a subsequent lessee to pursue a claim under section 85.321 for Exxon's alleged wrongful actions as a prior lessee.[4] *See, e.g.*, *Tooke v. City of Mexia*, 197 S.W.3d 325, 342–43 (Tex. 2006) (holding that TEX. LOC. GOV'T CODE § 51.075 abrogated *City of Texarkana v. City of New Boston*, 141 S.W.3d 778 (Tex. 2004)).

C. Negligence Per Se

Because our holding that a subsequent lessee has no standing to bring a claim under section 85.321 stems from common law principles, Emerald lacks standing to bring a negligence per se claim for the same reasons.

III. CONCLUSION

Accordingly, we reverse the court of appeals' judgment and render judgment that Emerald take nothing.

_____
Dale Wainwright
Justice

OPINION DELIVERED: December 17, 2010

[4] Emerald and the Commissioner of the Texas General Land Office contend on rehearing that the opinion "effectively says that Exxon is the only party that can sue Exxon for damage resulting from violations of the Natural Resource Code and Railroad Commission regulations." On the contrary, the opinion and the opinion on rehearing explain that persons who had an interest in the realty at the time of the damage to the interest have standing to sue under section 85.321 for the violations listed. Thus, the royalty owners in this case have standing to sue, and they did sue, but too late for at least some of the causes of action. *See Exxon v. Miesch*, __ S.W.3d ___ (Tex. 2010) (reh'g op.). Also, an assignee of the realty interest (at the time of the alleged damages) would have standing to sue.

IN THE SUPREME COURT OF TEXAS

NO. 05-1076

EXXON CORPORATION AND EXXON TEXAS, INC., PETITIONERS,

v.

EMERALD OIL & GAS COMPANY, L.C. AND LAURIE T. MIESCH, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRTEENTH DISTRICT OF TEXAS

Argued February 13, 2007

Rehearing Granted November 20, 2009

JUSTICE WAINWRIGHT delivered the opinion of the Court.

JUSTICE GUZMAN and JUSTICE LEHRMANN did not participate in the decision.

After issuing our opinion, we granted the parties' motions for rehearing on November 20, 2009 and obtained further briefing from the parties. On December 17, 2010, we issued an opinion on rehearing and modified our judgment. Thereafter, the parties filed second motions for rehearing. Today, we deny the parties' motions, but withdraw our opinion of December 17, 2010 and substitute the following opinion. Our judgment remains unchanged from the one issued December 17, 2010.

In this oil and gas dispute, royalty owners and an oil and gas lessee allege that the previous lessee failed to fully develop oil and gas tracts near Refugio, Texas and sabotaged the wells before

abandoning the lease. The lessee's claims at issue in this appeal are for negligent misrepresentation, fraud, and tortious interference with business opportunity. The royalty owners' claims are for statutory and common law waste, breach of alleged regulatory duty to plug wells properly, negligence, negligence per se, negligent misrepresentation, tortious interference with economic opportunity, breach of lease, and fraud. The trial court granted summary judgment on lessee's claims not subject to this appeal and directed a verdict against the lessee on its remaining claims and against the royalty owners on their claims for statutory waste, negligence, negligence per se, tortious interference, fraud, and negligent misrepresentation. The remaining royalty owner claims for statutory and common law waste and breach of contract went to verdict. The jury found in favor of the royalty owners. The court of appeals reversed the directed verdict and affirmed the jury verdict. 180 S.W.3d 299. We reverse and remand to the court of appeals. On December 17, 2010, we also issued our opinion on rehearing in the companion case of *Exxon Corp. v. Emerald Oil & Gas Co.*, ___ S.W.3d ___ (Tex. 2010) (reh'g op.).[1]

[1] We received amicus briefs from Texas Oil & Gas Association, the Texas Alliance of Energy Producers, the Texas Land and Mineral Owners' Association, Texas and Southwestern Cattle Raisers Association, and Jerry Patterson, Commissioner of the Texas General Land Office and Chairman of the School Land Board. On first rehearing, we received amicus briefs from Susan Combs, Texas Comptroller of Public Accounts, Jerry Patterson, Commissioner of the Texas General Land Office and Chairman of the School Land Board, Texas Oil & Gas Association, and Jacqueline L. Weaver, A.A. White Professor, University of Houston Law Center.

I. FACTUAL AND PROCEDURAL BACKGROUND

The royalty owners consist of three families—the Miesches, the O'Connors, and the Dunns (collectively the Miesches).[2] They owned mineral interests on several thousand acres of land (the O'Connor Field or Field) in Refugio, Texas. In the 1950s, Humble Oil and Refining Company, a predecessor of Exxon Corporation and Exxon Texas, Inc. (collectively Exxon), began acquiring mineral leases from the royalty owners. Exxon derived its interests from four separate but similar mineral leases with the Miesches. The leases (collectively the Lease or the O'Connor Lease) included an atypical fifty percent royalty obligation and a stringent disclosure clause. During the term of the Lease, Exxon drilled 121 wells and produced at least 15 million barrels of oil and more than 65 billion cubic feet of gas, resulting in the payment of more than $43 million in royalties to the Miesches. In the early 1970s and later in the next decade, Exxon attempted to renegotiate a lower royalty because profitability of the operations was declining. As early as 1987, the royalty owners requested that Exxon provide them information and documentation to support Exxon's position that the field was being depleted and was no longer profitable at the fifty percent royalty. By 1989, Exxon had begun plugging some of the thirty-four wells remaining in operation. The Miesches sent a letter, dated August 30, 1990, advising Exxon "that in the event you [Exxon] plug and abandon any wells [in the O'Connor Field] which are producing or capable of producing

[2] The current royalty owners who are petitioners in this case are: Morgan Dunn O'Connor, T. Michael O'Connor, Brien O'Connor, Kelly Patricia Dunn Schaar, Nancy O'Connor, Bridey Dunn Greeson, individually and on behalf of the Dunn-O'Connor Family Trust, Laurie T. Miesch, Jack Miesch, Michael L. Miesch, Molly Miesch Allen, and Janie Miesch Robertson.

minerals in paying quantities to [the royalty owners], Exxon will be sued under the terms of the lease and the common law, both for present breach of contract and anticipatory damages . . . ."

Walker and McBroom, Inc., a potential operator for the Miesches whom they engaged to evaluate the amount of reserves remaining in the O'Connor Field, advised them by letter of September 4, 1990, that "Exxon has exhausted any value of the field to them, and created substantial environmental hazards" and suggested that the royalty owners pursue Exxon's geologic information of the Field to aid in its future development, "particularly if oil and gas prices substantially rise in the future."

On September 12, 1990, the royalty owners demanded by letter that Exxon deliver all data and documents pertaining to the subject wells, "includ[ing] drilling, production, completion and re[-]completion data, well bore production or completion schematics or diagrams and flow line maps and surface facility diagrams or schematics." In the same letter, the royalty owners warned that "plugging and abandonment of the [six] referenced wells would commit waste and would be contrary to public policy and laws" and that the letter "shall also be considered as formal demand not to plug the above referenced six wells, as such would cause us irreparable harm and commit waste." The royalty owners further informed Exxon that they had "located a group of oil and gas companies that are willing to accept the plugging obligation" and assignment of the O'Connor Lease.

Initially, the royalty owners asserted that Exxon refused to provide any information, claiming that the information was proprietary. Later, Exxon claimed the information was too difficult to locate and retrieve. Then, Exxon agreed to provide the royalty owners a data room containing the requested information subject to a confidentiality agreement. The data room included a large

quantity of information, but apparently did not contain the well logs for the plugged wells and did not contain Exxon's opinions and analysis interpreting the data.

Exxon ultimately concluded that it could no longer profitably afford the O'Connor Lease unless the royalty owners agreed to reduce the royalty obligation or assign the leases to third parties. When negotiations to lower the royalty obligation failed, Exxon continued plugging and abandoning the wells. As required by law, after Exxon plugged each of the wells, it filed a plugging report with the Texas Railroad Commission, the department that regulates oil and gas production. 16 TEX. ADMIN. CODE § 3.14(b)(1) (R.R. Comm'n of Tex., Plugging).[3] By letter dated August 16, 1991, Exxon notified the royalty owners that it had completed its plugging operations.

In 1993, after the Lease terminated, the royalty owners entered into a lease agreement with Pace West Production, Ltd. (Pace or Pace West), later known as Emerald Oil & Gas Company, L.C. (Emerald)[4], for approximately one-third of the acreage in the O'Connor Lease. In deciding whether to lease the land, Emerald reviewed Exxon's public filings for the Field, including the oil well plugging reports (W-3 forms) that Exxon filed with the Texas Railroad Commission. The W-3 filings seemed to indicate that Exxon properly plugged the wells. However, Emerald encountered problems from the beginning of its attempts to re-enter the plugged wells, including wellbores

[3] Title 16 section 3.14 of the Texas Administrative Code requires well operators to file plugging reports, or W-3 forms, with the Railroad Commission within thirty days after each well is plugged. 16 TEX. ADMIN. CODE § 3.14 (R.R. Comm'n of Tex., Plugging). Section 3.14 mandates that an operator disclose the specific methods used to plug the wells and sign an oath verifying that the statements in the report are true. *Id.*

[4] Exxon argues that because Pace West was not formed until 1993, Emerald's fraud claim is foreclosed. The evidence of the identity of Emerald Oil's predecessor raises a fact question on the issue and is discussed further in II.C., *infra*.

plugged with improperly cut casing[5] and other "junk" in the wells, and plugs in locations other than those listed on the reports. The term "junk" is a term of art used in the oil and gas industry to refer to non-drillable material such as steel or iron in a wellbore. *Tarrant County Control & Imp. Dist. No. One v. Fullwood*, 963 S.W.2d 60, 66 (Tex. 1998) (per curiam); *see* 16 TEX. ADMIN. CODE § 3.14(d)(10) (R.R. Comm'n of Tex., Plugging) (prohibiting, with exceptions, the placement of non-drillable material or junk in the wellbore during plugging operations). Rock Thomas, principal in Re-Entry People, the company hired by Emerald Oil & Gas to re-enter some of the plugged wells on the Lease, explained that "junk" is "something in [the wellbore] that you don't know what it is." Testimony at trial indicated that nuts, bolts, fiberglass pipe, tubing, packers, environmental contaminants and other items were placed in plugged wells in the O'Connor Field.

Emerald sent the royalty owners a written status report on June 8, 1994, explaining that it "encountered junk in [the] hole" in one well, that Exxon had cut the casing in several wells, and that cut and shifted casing had halted re-entry in at least one well. Royalty owners alleged the cut casing in wells in the O'Connor Field caused problems, including increasing costs to re-enter wells, making it impossible to re-enter some wells, and substantially damaging their interests. In January 1995, Emerald obtained Exxon's internal well records on the O'Connor Lease from Quintana, Exxon's partner on the adjoining tract, also leased by Exxon. Exxon's internal records allegedly differed substantially from the Railroad Commission filings regarding its plugging of the wells in the O'Connor Lease. On January 24, 1995, Emerald met with the royalty owners and explained the

[5] Exxon does not dispute that it plugged at least some of the wells using non-standard plugging procedures and acknowledges that it cut the casing and cemented it in some of the wellbores.

extent of the alleged Field-wide damage to the wells due to Exxon's plugging techniques.

Concluding that Exxon intentionally sabotaged the field, Emerald sued Exxon in July 1996, and amended the pleading in 1998, claiming breach of regulatory duty to plug wells properly, breach of duty to avoid committing waste of natural resources, negligence per se in violating several sections of the Natural Resources Code and Railroad Commission Regulations, tortious interference with economic opportunity, negligent misrepresentation, and fraud. The fraud claim was predicated on false representations in public filings with the Railroad Commission that the wells were properly plugged.

The royalty owners intervened in the lawsuit in two separate groups in August and September of 1996, and alleged statutory and common law waste, tortious interference with economic opportunity, breach of regulatory duty to plug wells properly, fraud, and environmental claims, and sought various measures of actual damages, exemplary damages, and attorney's fees. In October 1999, the royalty owners amended their petitions, adding claims for breach of contract for Exxon's alleged failure to develop the leasehold, negligence, negligence per se, and negligent misrepresentation.

Reasoning that Exxon owed no duty to future lessees such as Emerald, the trial court granted in part Exxon's motion for summary judgment on Emerald's claims for breach of regulatory duty to plug wells properly, breach of common law and regulatory duties to avoid committing waste, and negligence per se. The court severed the partial summary judgment, and Emerald appealed. The court of appeals reversed and remanded the claims to the trial court. *See Emerald Oil & Gas, L.C. v. Exxon Corp.*, 228 S.W.3d 166 (Tex. App.—Corpus Christi-Edinburg 2005, pet. granted). Exxon

appealed that judgment to this Court in cause number 05-0729, and we issued the opinion on rehearing in the companion case on December 17, 2010. *Exxon Corp. v. Emerald Oil & Gas Co.*, ___ S.W.3d ___ (Tex. 2010) (reh'g op.).

The case proceeded to jury trial on Emerald's three common law claims (fraud, negligent misrepresentation and tortious interference with economic opportunity) and on all of the Miesches' claims, but the royalty owners abandoned their environmental claims before verdict. The trial court granted a directed verdict in Exxon's favor on Emerald's three remaining claims and on all of the royalty owners' claims except common law and statutory waste and breach of lease. The jury found in favor of the royalty owners on the claims against Exxon for waste and breach of lease, awarding $5 million in actual damages for waste, $10 million in punitive damages for acting with malice in conduct causing injury to the royalty owners, and $3.6 million in damages for breach of lease. The trial court rendered judgment in accordance with the verdict. All parties appealed. The court of appeals affirmed the judgment in favor of the royalty owners and did not address the Miesches' claims that were dismissed on directed verdict. 180 S.W.3d at 335, 339. It also reversed the directed verdict against Emerald on its claims against Exxon for fraud, negligent misrepresentation, and tortious interference, ruled against Exxon on its affirmative defense of limitations and remanded the claims for a new trial. *Id.* at 339. We granted Exxon's petition for review and issued our opinion. The parties sought rehearing, which we granted, modifying our original judgment and clarifying our opinion.

II. LAW AND ANALYSIS

A. Statute of Limitations: The Royalty Owners' Claims for Statutory and Common Law Waste, and Emerald's Claims for Negligent Misrepresentation and Tortious Interference

The royalty owners' claims against Exxon decided in this appeal are statutory and common law waste, breach of lease, and fraud.[6] Emerald's claims against Exxon in this appeal are for fraud, negligent misrepresentation, and tortious interference. Exxon asserts that the claims are barred by limitations.[7] The parties do not dispute that a two-year statute of limitations applies to the waste, negligent misrepresentation, and tortious interference claims against Exxon. TEX. CIV. PRAC. & REM. CODE § 16.003(a). Emerald's claim for fraud and the Miesches's claim for breach of lease are subject to four-year limitations periods and are addressed later in the opinion. *See id.* §§ 16.004, .051.

Causes of action accrue and statutes of limitations begin to run when facts come into existence that authorize a claimant to seek a judicial remedy. *Provident Life & Accident Ins. Co. v. Knott*, 128 S.W.3d 211, 221 (Tex. 2003); *Johnson & Higgins of Tex. v. Kenneco Energy, Inc.,* 962

[6] Emerald's claims for statutory and common law waste, breach of regulatory duty to plug wells properly, and negligence per se were dismissed by the trial court in a partial summary judgment ruling, were severed at the trial court, and are the subject of the opinion on rehearing issued in the companion case, *Exxon v. Emerald Oil & Gas Co.*, ___ S.W.3d ___ (Tex. 2010) (reh'g. op.). The Miesches' claims for negligence, negligent misrepresentation, negligence per se, tortious interference and breach of regulatory duty to plug wells properly were dismissed by the trial court on directed verdict, and the Miesches conditionally challenged that ruling at the court of appeals.

[7] Emerald argues that "Exxon moved for directed verdict based on limitations on only one of Emerald's three common-laws claims, i.e., negligent misrepresentation," and thus failed to preserve its argument that the tortious interference and fraud claims are time-barred. In its motion for directed verdict at trial, Exxon argued that all of the claims "are barred by the applicable statutes of limitations." Exxon made the same argument before the court of appeals and raises the issue in this Court. Exxon preserved this issue for our review.

S.W.2d 507, 514 (Tex. 1998). When a cause of action accrues is normally a question of law. *Knott*, 128 S.W.3d at 221; *Moreno v. Sterling Drug, Inc*., 787 S.W.2d 348, 351 (Tex. 1990).

In this case, more than two years elapsed between the time that Exxon's asserted tortious conduct damaged the O'Connor Field and the date that Emerald and the Miesches sued Exxon. Emerald and the royalty owners assert that Exxon's plugging operations caused them injury. Exxon advised the royalty owners by letter in August 1991 that it had completed plugging all wells in the O'Connor Field. Thus, the alleged tortious conduct occurred by August 1991. Emerald filed suit in June 1996, and the Miesches intervened in the lawsuit in August and September 1996 to assert claims against Exxon. Both Emerald and the Miesches filed suit more than two years after the injuries occurred for these claims. However, Emerald and the royalty owners argue that the law recognizes exceptions to limitations that apply in this case.

Emerald and the royalty owners contend that they filed suit timely because Exxon fraudulently concealed its wrongful conduct, tolling the statute of limitations, and that the nature of their injuries was difficult to discover, thus delaying accrual of their claims. *See Wagner & Brown, Ltd. v. Horwood*, 58 S.W.3d 732, 736 (Tex. 2001) (distinguishing fraudulent concealment from the discovery rule); *Computer Assocs. Int'l, Inc. v. Altai, Inc.*, 918 S.W.2d 453, 455–56 (Tex. 1996). At trial, the jury found that the royalty owners discovered, or in the exercise of due diligence should have discovered, on January 24, 1995, the waste committed by Exxon. On that date Emerald's representatives met with the royalty owners and informed them, in the words of the court of appeals, "about the full extent of damage to the wells and the numerous discrepancies" in Exxon's plugging reports. 180 S.W.3d at 316. The court of appeals concluded that the statute of limitations was tolled

until that date, that the lawsuit filed in the summer of 1996 was therefore timely, and affirmed the trial court's judgment. *Id.* at 316–17. The court of appeals reasoned that "the discovery rule tolls limitations until the [royalty owners] knew of enough damage to know that the problems regarding the wells were not isolated." *Id.* at 317. Emerald and the royalty owners do not dispute that, unless accrual of the cause of action is deferred or the statute of limitations tolled, the two-year statute of limitations bars all of their claims addressed by the court of appeals except fraud and breach of contract, which have four-year statutes of limitations. *See* TEX. CIV. PRAC. & REM. CODE §§ 16.004, .051.

1. Conclusive Evidence of Emerald's and the Miesches' Knowledge of Problems in the Field

We do not reach the question of the impact of the discovery rule or fraudulent concealment on the limitations period for the pending claims because Emerald and the royalty owners had actual knowledge more than two years before they filed suit of Exxon's alleged wrongful actions and that those actions caused problems or injuries to their interests. The evidence of their actual knowledge is in documents written by or on behalf of Emerald and the Miesches, and it is conclusive. We review the relevant, undisputed facts.

Exxon completed 121 wells in the O'Connor Field and produced both oil and gas over the nearly forty years the parties did business together. By the mid 1980s mineral prices dropped, and production in the Lease declined. Exxon believed the Field was becoming unprofitable at the fifty percent royalty and attempted to negotiate a lower royalty with the Miesches. The effort was unavailing, and in the late 1980s Exxon plugged wells in anticipation of terminating the Lease. The

royalty owners were not obligated to accept a lower royalty, and they were not convinced that the Field was uneconomic. The Miesches advised Exxon by letter dated September 12, 1990 that they had received notice that it intended to plug and abandon six wells referenced in the letter. The letter was a "formal demand not to plug the above referenced six wells, as such would cause us irreparable harm and commit waste," and "would be contrary to public policy and laws." Two weeks earlier, counsel for the Miesches had also warned Exxon in writing that it would "be sued under the terms of the lease and the common law, both for present breach of contract and anticipatory damages" if it plugged and abandoned wells in the Field capable of producing in paying quantities. In their Fourth Amended Petition in Intervention (the live pleading at trial), the royalty owners alleged, separate from their claim for breach of an implied covenant under the Lease to reasonably develop the Field, that they "lost royalties due to [Exxon's] holding the lease but plugging wells instead of producing them." Therefore, by September 1990, the royalty owners had actual knowledge of facts underlying their claim of waste by Exxon for failure to produce available reserves of oil and gas from existing wells on the O'Connor Lease.

Notwithstanding this evidence, even if we assume that the royalty owners were not aware of problems allegedly impacting their lease interests by Exxon's plugging the wells by the time of the September 1990 letter, they assuredly were aware by August 16, 1991. That is the date of Exxon's letter advising them that it had completed plugging and abandoning the remaining wells in the O'Connor Field. Accordingly, limitations forecloses the royalty owners' waste claim.

On first rehearing, the royalty owners argued that their claim for waste actually focused on intentional damage or sabotage to wells in the Lease.[8] The first claim, discussed above, was waste occasioned by abandoning wells that were alleged to still be capable of producing in paying quantities. The second claim was for waste allegedly caused by sabotaging the wells as they were plugged. The royalty owners alleged that Exxon intentionally damaged the wells to hinder or preclude subsequent re-entry of the wells, causing increased re-entry costs, loss of some wells necessitating drilling new wells in some instances, and reduction in revenues they could recover from the O'Connor Field. The wrongful conduct alleged included improperly cutting production casing in the wells, placing junk in the wells, placing plugs in the wells below the surface at undisclosed locations, and pumping contaminants into the wells. They pled that Exxon's conduct damaged the leasehold and interfered with the business opportunity of the royalty owners to further develop the Field with another operator.

Assuming these allegations are true, which we must for limitations analysis, Emerald and the royalty owners were aware of or suspected problems resulting from Exxon's conduct well before

[8] Exxon asserts that the Miesches did not raise the second waste claim in the trial court. In this Court, the royalty owners seem to raise this second waste claim involving improper plugging methods used by Exxon to allegedly prevent future re-entry of production from the wells. It is arguable whether the Miesches raised this issue in the trial court as part of their claim for waste (Count 2). In Count 3 (Negligence Per Se) of the Miesches' Fourth Amended Petition in Intervention, they alleged negligence and state that lost royalties from the additional cost of re-drilling improperly plugged wells was the basis of that claim. In Count 2 (Breach of Regulatory Law—Duty Not to Commit Waste) of this Petition, the Miesches complain of "underground waste or loss" resulting from "drilling, equipping, locating, spacing or operating a well or wells in a manner that reduces or tends to reduce the total ultimate recovery of oil or gas from any pool" (quoting TEX. NAT. RES. CODE § 85.046). The Miesches only mention pumping contaminants into the wells in Count 2 (Waste), and specifically mention sabotaging, junking and pumping contaminants into the wells in Count 4 (Tortious Interference), Count 5 (Fraud), and Count 6 (Cost to Re-Enter). So it is arguable whether the Miesches raised the issue of sabotage in their claim for waste in Count 2, while they specifically complained of sabotage or intentional damage to wells in other counts of their pleading. For purposes of our analysis, we will assume the issue was raised in the trial court.

they filed suit. In a June 8, 1994 report, Emerald advised the royalty owners that it discovered that Exxon improperly cut casing in a number of wells and there was "junk" in at least one well Exxon had plugged. The Miesches also acknowledge that Emerald had discovered junk in at least one other well. The royalty owners argue that Emerald's report to them in June 1994 discussing cut casing and junk in a wellbore did not raise suspicion and does not constitute knowledge of damage to the wells. They also claim that the June 1994 letter does not say that Exxon put junk in the wells. The royalty owners' arguments contradict conclusive evidence from the trial, which we set forth in some detail below.

The royalty owners hired Emerald to redevelop a portion of the O'Connor Field after the Lease was terminated. Emerald prepared the June 1994 report for the royalty owners on the status of its efforts to reopen part of the Field. It states, in relevant part:

- "casing had been cut by Exxon at 1400'" for the M.E. O'Connor A-8 well,
- "[c]asing had been cut by Exxon" for the M.E. O'Connor B-11 well,
- "[c]asing had been cut by Exxon" for the M.E. O'Connor E-3 well,
- "[c]asing was cut by Exxon when plugged" for the M.E. O'Connor A-5 well,
- "[c]asing was cut when plugged. . . Could not drill past cuts at 1350'" for M.E. O'Connor B-1 well,
- "[c]asing cut by Exxon when plugged" for M.E. O'Connor E-6 well,
- "[c]asing cut by Exxon when plugged. . . . Casing shifted and collapsed" for M.E. O'Connor A-3 well, and

• Emerald "encountered junk in hole" for the M.E. O'Connor A-10 well.[9]

In addition to junk in well A-10, the report points out that Emerald discovered cut casing in seven wells prior to June 8, 1994. Emerald's principal, Glenn Lynch, testified at length at trial that leaving cut casing in oil wells before sealing them with cement is an improper plugging technique that creates costly and time-consuming problems to re-entering the well for further mineral production, rendered some plugged wells impossible to re-enter and, he believed, was prohibited by Railroad Commission rules.[10] Lynch testified that if casing is cut in the wellbore, it should be pulled. Emerald found cut casing in "the first couple of wells" it attempted to re-enter when it began re-entry of the Field in May 1993.

The alleged junking of the wells and cutting of production casing in the wellbores prior to capping the wells is the conduct that Emerald and the royalty owners characterize as deliberate sabotage of the wells, as violations of Texas laws and Railroad Commission regulations, and as constituting "illegal steps to intentionally and systematically damage the wells to prevent re-entry." There is no dispute that Exxon was responsible for plugging the wells in the Field, and the June 1994 report identifies Exxon throughout the report as the party that had cut well casing in plugging the wells in the O'Connor Field. That was no surprise to Emerald or the royalty owners because Exxon had been the operator in the O'Connor Field for nearly four decades.

---

[9] The June 1994 report lists two other wells (B-4 and B-5), not included in this list, in which casing had been cut and pulled out of the hole, which Emerald and the Miesches state is the proper procedure.

[10] Exxon argues, citing administrative regulations, that cutting casing before plugging wells is not blanketly prohibited by the Railroad Commission's rules. *See* 16 TEX. ADMIN. CODE § 3.14 (d)(8) (R.R. Comm'n of Tex., Plugging). For purposes of this analysis, we assume the validity of Emerald's and the royalty owners' complaints that leaving cut casing in abandoned wellbores is improper.

The royalty owners argue that they did not appreciate the significance of the statements in the report Emerald sent to them in June 1994. Neither the Miesches nor Emerald contest that the damages Exxon allegedly caused to the leasehold occurred before 1992 or that Emerald and the Miesches knew of improper plugging, cut casing, and junk placed in capped wells in the Field before August 1994, at least to the extent documented in the June 1994 report. The Miesches contend that the evidence of cut casing is not notice that the wells were damaged or the Field was impaired. However, their live pleadings alleged that junk was left in the wellbores, casing was cut in multiple places in the well holes, and these acts of Exxon were the proximate cause of damages to the royalty owners. By June 1994, the royalty owners had actual knowledge of this alleged injury-causing conduct. The September 1990 letter (from the Miesches to Exxon threatening to sue for waste if wells were plugged) and the June 1994 report (the Emerald report to the Miesches alleging damage to the wells) by their terms conclusively establish that the royalty owners knew or suspected there were problems or damages allegedly caused by Exxon to their interests in the O'Connor Lease. The limitations period began to run no later than September 1990 on the first waste claim and no later than June 1994 on the second waste claim. Having actual notice of such problems, the royalty owners had two years under the applicable statutes of limitations to investigate the problems and file suit, or not.

Emerald contracted with the royalty owners in May 1993 to re-enter wells and further develop a portion of the Field. It admits to encountering problems in its initial re-entry attempts in 1993. The June 1994 report, which lists the re-entry date for some of the wells, expressly notes that re-entry was commenced in the prior year (1993) for several wells (A-5, B-1, and E-6) and that

Exxon had cut the casing in these wells. Emerald also acknowledges that it performed "due diligence in accord with industry practice by reviewing Exxon's sworn Railroad Commission filings" before entering the lease with the Miesches in May 1993. And, Glenn Lynch, a principal in Emerald, testified that eighty to ninety percent of the Commission filings, on which Emerald relied, were inaccurate and that cut casing caused significant problems to re-entry. Thus, Emerald's 1994 report indicates its belief that Exxon's actions allegedly caused further development in the Field to be more difficult, more costly, or impossible and that many problems in the wells were not listed in Railroad Commission reports, at least some of which Emerald had admittedly reviewed prior to entering the lease in 1993.

Emerald filed suit in July 1996, more than two years after the accrual of its causes of action for tortious interference with business opportunity and for negligent misrepresentation arising from allegedly false Railroad Commission filings. The Miesches claimed damages for waste when they intervened in August 1996, more than two years after the September 1990 letter and the June 1994 report. These claims were untimely.

The court of appeals concluded that the royalty owners were not on notice of the damage to the Lease until January 1995 when the "[royalty owners] knew of enough damage to know that the problems regarding the wells were not isolated." 180 S.W.3d at 317 (citation omitted). The applicable legal standard is the statute of limitations begins to run when a party has actual knowledge of a wrongful injury. *Knott*, 128 S.W.3d at 221. Once a claimant learns of a wrongful injury, the statute of limitations begins to run even if the claimant does not yet know "the specific cause of the injury; the party responsible for it; the full extent of it; or the chances of avoiding it." *PPG Indus.,*

Inc. v. JMB/Houston Ctrs. Partners Ltd. P'ship, 146 S.W.3d 79, 93-94 (Tex. 2004) (internal citations omitted); *Velsicol Chem. Corp. v. Winograd*, 956 S.W.2d 529, 531 (Tex 1997) (holding that the statute of limitations on claim for damage to real property ran as soon as property owner knew of presence of a hazardous chemical on the property, not when the residue exceeded regulatory contamination levels). Emerald and the Miesches had actual knowledge by June 1994 that there were problems re-entering a number of wells in the O'Connor Field due to cut casing or junk. After being put on notice of the alleged harm or injury-causing actions, the claimant must exercise reasonable diligence to investigate the suspected harm and file suit, if at all, within the limitations period. *HECI Exploration Co. v. Neel*, 982 S.W.2d 881, 886 (Tex. 1998) (holding that "[r]oyalty owners cannot be oblivious" to potentially injurious activity taking place in the field); *KPMG Peat Marwick v. Harrison Cnty. Housing Fin. Corp.*, 988 S.W.2d 746, 750 (Tex. 1999) (noting that a plaintiff's known loss from a wrongful premature sale of assets should have caused the plaintiff to investigate the mismanagement of the assets as well as a different defendant's involvement in the mismanagement); *Mooney v. Harlin*, 622 S.W.2d 83, 85 (Tex. 1981) (holding that the statute of limitations runs from the time fraud could have been discovered). Knowing that there were problems with re-entering wells in 1993 and documenting them in the June 1994 report, put Emerald and the Miesches on notice of actual or potential injury-causing conduct. Therefore, for limitations purposes, they had a duty to diligently investigate the suspected similar harm by the same operator in the O'Connor Field and file suit on these claims within two years of such notice.

The logic of the court of appeals' holding would create serious issues with application of legislated deadlines for filing actions where injury-causing conduct is known but the full extent of

the damages may not be known. In this case, the law accorded both Emerald and the Miesches the statutory two-year period to investigate the problems raised by Emerald and to file claims for damages arising from Exxon's alleged conduct in the Field. The limitations period began when facts came into existence that authorized them to seek a judicial remedy. *See Knott*, 128 S.W.3d at 221. A different rule that delays accrual of the cause of action until the putative claimant knew of enough damage to know the problems regarding the wells were not isolated would cause inconsistent and illogical results. Such a rule would extend the limitations period for a suit arising from the eight wells, known from the June 1994 report to be damaged, beyond the two-year period because, even though those wells were known to be damaged, limitations would not run until many more wells were known to be damaged. Alternatively, application of such a rule would mean that limitations may begin to run on the wells with known damage but not on other wells in the Field, setting up multiple limitations periods to be applied to different wells in the same Field for the same types of damage caused by the same operator during the same period of time, and undermining or eviscerating the legal duty of an injured party to be diligent in protecting his interests. This is not to mention the difficult and litigious problem of determining when there are enough problems that they are not considered to be isolated. Here, unlike *PPG Industries*, Emerald alleged consistent problems with a high percentage of wells from the beginning of its re-entry efforts. *See* 146 S.W.3d at 93–94. For these and other reasons, we have held that when a person is on notice of injury-causing conduct, the claimant has a duty to use reasonable diligence to discover if he has a claim and, if so, to file it within the limitations period to preserve his right to recover**.** *HECI Exploration Co.*, 982 S.W.2d at 886.

2. Royalty Owners' Testimony Concerning Emerald's June 1994 Report of Problems in the Field

The June 1994 report establishes that Emerald and the royalty owners were made aware of problems caused by Exxon. Emerald prepared the report and sent it to the royalty owners. The trial testimony of the royalty owners concerning this document confirms their knowledge by June 1994 of problems in Exxon's capping of the wells. Three royalty owners testified at trial—T. Michael O'Connor, Morgan Dunn O'Connor, and Laurie T. Miesch. T. Michael O'Connor and Morgan Dunn O'Connor discussed the June 1994 report. Laurie Miesch did not.

Royalty owner T. Michael O'Connor was a key representative for the royalty owners. At trial he testified:

> Question: So, would you agree with me now, Mr. O'Connor, that at least for chronology['s] sake, that in June of '94, you were advised by Mr. Taylor [of Emerald] of *problems they were having reentering the wells because of cut casing and junk in the hole*?
>
> O'Connor: Right here from what I saw from this [June 1994] report that I've seen—I don't remember it, of course, but—yes, they reported that *they had some problems with some wells*.
>
> Question: You don't—you're not suggesting that you didn't receive this letter, are you?
>
> O'Connor: No, I apparently did if it was in my deposition in my file.

(Emphasis added.) O'Connor explained that Emerald advised in the June 1994 report that it encountered problems re-entering the wellbores due to cut casing and "junk in the hole." Emerald contends in its post-submission brief that "T. Michael O'Connor [quoted above] did not understand the [June 1994] letter to mean that Exxon had done anything to deviate from industry standards or

had damaged the wells." O'Connor did not state that the report was insignificant or that it did not make him aware of any problems with plugging in the Field. He testified, as cited above, that the report advised of problems with re-entering the wells. He also testified that he was aware of "problems" in Exxon's abandonment of the field, "but I figured it was not necessarily showing some kind of trend of a problem until they came to us in January '95," referring to the date of Emerald's meeting with the royalty owners to explain the extent of damage to wells in the Field. Knowledge of damage to interests need not rise to the level of a "trend" before claimants are charged under the law with notice of its occurrence. As *PPG Industries* states, knowledge of "actual causes and possible cures" or "the full extent of the injury" is not necessary to preclude application of the discovery rule. 146 S.W.3d at 93–94. Knowledge of injury initiates the accrual of the cause of action and triggers the putative claimant's duty to exercise reasonable diligence to investigate the problem, even if the claimant does not know the specific cause of the injury or the full extent of it. *Id.*

Not having oil and gas expertise, Morgan Dunn O'Connor, a "spokesperson [and] organizational person" for the royalty owners, explained that she "had no idea what the significance of shifting casing was," in reference to a November 1994 letter from Emerald employee Johnny Yocham mentioning the term. Lynch had testified that cutting production casing without pulling it from the well in capping operations may allow the casing to shift such that re-entering a well with offset casing in the well would be difficult if not impossible. Notwithstanding the limits of her technical knowledge, Morgan Dunn O'Connor affirmed that she knew from the June 1994 report that

Exxon had cut casing, which had shifted and collapsed in wells it capped in the Field, and also knew of junk left in a well Exxon had capped.

The Miesches claim that these actions by Exxon were intentional acts of sabotage, violated the law, and caused them substantial damages. Although it is not within the scope of our review to determine whether these assertions are true or not, we cannot escape the significance of the documents in the record or these statements by and to the Miesches in light of the question we answer—whether the royalty owners were on notice more than two years before filing suit of Exxon's alleged conduct that they claim caused the damages. The inescapable conclusion is that the royalty owners were aware no later than June 1994 from undisputed facts of conduct they suspected or knew allegedly injured their property interests. *See City of Keller v. Wilson*, 168 S.W.3d 802, 814–17 (Tex. 2005) (explaining that courts conducting a no-evidence review cannot ignore evidence that has one logical conclusion).

We therefore conclude that the assertion of fraudulent concealment to toll limitations and of the discovery rule to postpone accrual of the limitations period is unavailing here. Irrespective of the potential effect of fraudulent concealment or the discovery rule on limitations, actual knowledge of alleged injury-causing conduct starts the clock on the limitations period. *See KPMG*, 988 S.W.2d at 750. Emerald's claims for negligent misrepresentation and tortious interference with business opportunity are barred by limitations. The royalty owners' claims for statutory and common law waste are barred by limitations.

B. Breach of Lease

The royalty owners claim that Exxon failed to "fully develop" two productive zones in the O'Connor Field, H12 and FS75, in violation of the Lease's development clause. Exxon counters that the royalty owners misread the term "fully develop" in the development clause, Article 3, and instead incorporate a provision from Article 4 that is a separate covenant that does not define Exxon's obligation to develop the Field. The court of appeals affirmed the trial court's judgment, holding that the testimony of the royalty owners' expert, George Hite, was some evidence that the Field was capable of further production in paying quantities until 1999 and that Exxon did not drill and complete wells in two productive zones, H12 and FS75.[11] 180 S.W.3d at 334–35. Exxon contends no evidence supports the jury's finding that Exxon failed to fulfill its obligations under the development clause of the oil and gas Lease.[12]

There are four oil and gas lease agreements, and the development clauses in them have somewhat different terminology. At trial, the parties used the Lease as the source of the terms and conditions of the parties' obligations, and Exxon acknowledged that the terms of the leases were similar.[13] The development clause is Article 3 of the Lease. Article 4 also contains relevant provisions.

> **Article 3(a)**. [L]essee covenants and agrees to prosecute diligently a continuous drilling and development program until said tract is *fully developed* for oil or gas.

---

[11] The royalty owners and Hite used "horizon," "stratum," and "zone" interchangeably.

[12] The jury also found that Exxon fraudulently concealed its breach and that the royalty owners did not know, and could not have known with due diligence, that Exxon fraudulently concealed its failure to fully develop until February 1999 when Exxon produced previously requested documents during discovery. For the reasons that follow, we need not reach the royalty owners' fraudulent concealment claim.

[13] The specific terms at issue are from the Lease, Plaintiffs' Exhibit 1 at trial.

. . .

First Tract shall be deemed fully developed within the preceding paragraph of this Article if found to be productive of oil or gas or sulphur when there has been drilled to each horizon or stratum capable of producing oil or sulphur one (1) well for the number of acres fixed by the Railroad Commission . . . in determining the spacing pattern applicable to said First Tract; in the absence of such determination of a spacing pattern by said Railroad Commission . . . said First Tract shall be deemed *fully developed* when at least one (1) well has been drilled and completed in each horizon or stratum capable of producing oil or sulphur in paying quantities for each twenty (20) acres of said tract. First Tract shall be deemed *fully developed* within the intent of the preceding paragraph if found to be productive of gas only when one (1) well has been drilled and completed to each horizon or stratum capable of producing gas in paying quantities for the number of acres fixed by the Railroad Commission . . . in determining the spacing pattern applicable to said tract for the production of gas, or, in the absence of such determination, one (1) well for each one hundred sixty (160) acres of said tract so capable of producing gas in paying quantities.

Article 4. By the words "with diligence," "*diligence*," or "diligently," as used in this instrument, is meant, in each instance, that degree of action, conduct and effort which is consistent with that which would characterize the action and conduct and effort of a prudent and skillful oil operator possessed of ample equipment, material and money, and unhampered by obligations to third parties, and actuated by an honest desire to carry out and fulfill in good faith each and every obligation imposed upon the lessee by this lease. Lessee shall always develop and operate the leased premises for the production of oil and gas in accordance with the best practices of the industry at the applicable time, to the end that the full value of the leased premises for oil and gas shall be ascertained, conserved, and realized.

(Emphasis added).

Before we address the legal sufficiency of the evidence, we must first determine the scope of Exxon's development obligations under the Lease. "An oil and gas lease is a contract, and its terms are interpreted as such." *Tittizer v. Union Gas Corp.*, 171 S.W.3d 857, 860 (Tex. 2005); *accord Valence Operating Co. v. Dorsett*, 164 S.W.3d 656, 662 (Tex. 2005) (interpreting an oil and

gas lease using contract principles). "In construing an unambiguous oil and gas lease, . . . we seek to enforce the intention of the parties as it is expressed in the lease." *Tittizer*, 171 S.W.3d at 860.

1. General Development Obligation—Article 3

The Lease contains a development clause, Article 3. The general development obligation in Article 3(a) relied on by the Miesches requires Exxon to "prosecute diligently a continuous drilling and development program until said tract is *fully developed* for oil and gas." (Emphasis added). The next paragraph of Article 3(a) then provides definitions of "fully developed" for oil and gas.

2. The Obligation to "Fully Develop"—Article 3

The Field "shall be deemed fully developed within the intent of the preceding paragraph of this Article" when at least one well has been drilled and completed in each horizon capable of producing oil or gas in paying quantities for each twenty acres of land for oil production and for each 160 of land for gas production.[14] This is a common definition in an oil and gas lease development clause. 4 HOWARD R. WILLIAMS & CHARLES J. MEYERS, OIL AND GAS LAW § 671.4, at 136.1 (3d ed. 2008).

To understand the obligation to "fully develop," one must know the meaning of "drill" and "complete" in the development clause. The Lease does not define "drill" or "complete." It is a well recognized canon of construction that technical words are to be interpreted as usually understood by

[14] Article 3(b) provides the same general obligation for the Second Tract and includes the same definition of "fully developed" for both oil and gas production, but in the Second Tract the duty requires "one (1) well," rather than "at least one (1) well" be completed for oil as in the First Tract. The trial judge inquired whether the Lease language was ambiguous and was advised by the parties that it was unambiguous. They raise no distinctions in the obligations between the First and Second Tract in this Lease, or obligations regarding other tracts in the three remaining leases.

persons in the business to which they relate, unless there is evidence that the words were used in a different sense. *Barrett v. Ferrell*, 550 S.W.2d 138, 142 (Tex. Civ. App.—Tyler 1977, writ ref'd n.r.e.). In oil and gas parlance, "drilling" refers to the "[a]ct of boring a hole through which oil and/or gas may be produced if encountered in commercial quantities." 8 HOWARD R. WILLIAMS & CHARLES J. MEYERS, OIL AND GAS LAW: MANUAL OF OIL AND GAS TERMS at 281–82 (3d ed. 2008). A "completed well" refers to "a well *capable* of producing oil or gas." *Id.* at 172 (emphasis added). The "completion of a well" can also refer to "those processes necessary before production occurs [such as] perforating the casing and washing out the drilling mud." *Id.* at 174.

Certainly, the parties can define the operator's duty to drill and complete a well differently under a contract. For example,

> [c]ompensation for drilling an oil or gas well may be made contingent upon the discovery of oil or gas in paying quantities, but a contract will not be so construed in the absence of a clear expression or implication of such intent by the contract . . . . The courts in construing contracts for the drilling of wells are not disposed to imply warranties as to production.

Barrett, 550 S.W.2d at 142 (holding that a well was completed even though it was a dry hole) (citing W.L. SUMMERS, THE LAW OF OIL AND GAS § 687 (perm. ed. 1938)). These definitions in the Lease show that for a well to be considered "drilled and completed" as required by the development clause, a hole must be bored in the ground, and if oil or gas in paying quantities is encountered, the casing must be perforated or otherwise prepared for production. The Article 3(a) development clause does not obligate the operator to produce all oil and gas that can be produced in paying quantities. The duty is to drill and complete at least one well "capable" of producing in paying quantities. The term "in paying quantities" specifies a characteristic of the well to be drilled, not the volume of production

required. The royalty owners' statement of the duty omits the "in paying quantities" term, but all four definitions in the Lease of "fully develop" in Article 3(a) for oil and for gas in each tract include this language.[15]

This definition of a completed well in the treatises, where the term is not defined in an oil and gas lease, is also the one recognized by Texas courts. *See id.* at 142 (citing *Cannon v. Wingard*, 355 S.W.2d 776, 780 (Tex. Civ. App.—Dallas 1962, writ ref'd n.r.e.)). A "well need not be a producing well to be completed"; it only needs to be capable of producing oil or gas. *Id.*; *Seale v. Major Oil Co.*, 428 S.W.2d 867, 869 (Tex. Civ. App.—Eastland 1968, no writ) (noting that completion of a well does not mean it is an oil or gas producer, but "refers to completion of the required work on the well whether it becomes a producer or not").

3. Diligence—Article 4

Article 4 of the Lease contains two sentences. The first sentence defines "diligence," a term used in the general development clause in Article 3(a). It is defined as the conduct of a prudent and skillful oil operator actuated by an honest desire to fulfill in good faith each obligation in the Lease. Although not argued to the court of appeals or mentioned in the court of appeals' opinion, the Miesches argue in this Court that the second sentence of Article 4 sets out the determinative language for defining Exxon's duty to develop the Field:

> Lessee shall always develop and operate the leased premises for the production of oil and gas in accordance with the best practices of the industry at the applicable

[15] The royalty owners set out the duty as: "The leases are fully developed only when 'at least one (1) well has been drilled and completed in each horizon or stratum capable of producing oil or sulphur for each twenty (20) acres of said tract.'" In the Lease, the phrase "in paying quantities" occurs after the word "sulphur."

> time, to the end that the full value of the leased premises for oil and gas shall be ascertained, conserved, and realized.

Royalty owners argue, in effect, that this term is a warranty of a level of production—to produce all oil and gas in each zone per the specified acreage for each well that can be produced in paying quantities. While not an unreasonable agreement to strike, the question is whether the Lease contained that obligation given its somewhat less burdensome definition of the development obligation in Article 3(a), discussed above.

Articles 3 and 4 are the determinative provisions in the dispute over the development obligation.[16] The Miesches contend that under the Lease, Exxon was required to develop the tract fully by not only drilling and completing in each zone an oil well for every twenty acres and a gas well for every 160 acres, but also developing the oil and gas to realize the full value from each well in each horizon. They acknowledge that under Article 36, Exxon had a right to abandon the Lease, but contend it could do so only after producing the "full value" of oil and gas available in the O'Connor Field.[17]

At trial, the Miesches' expert, Hite, opined that Exxon should have drilled or reworked an additional fifteen wells in the FS75 zone and additional wells in the H12 zone to fully develop those

---

[16] On initial rehearing, an amicus curiae brief by Professor Jacqueline Weaver of the University of Houston Law Center argued that we should determine Exxon's obligations by searching the entire oil and gas Lease. Certainly, the parties' obligations to each other concerning oil and gas operations in the O'Connor Field are determined by all 43 articles in the 26 pages of the Lease. However, on appeal, we address only those issues properly brought before us. The Miesches have not mentioned, much less argued, in this Court any articles in the Lease other than 3, 4 and 36 prior to rehearing. They argue Articles 3 and 4 in a few sentences in their brief and mention Article 36 in a footnote. Rather than attempt to predict which issues in a contract the parties should pursue, our analysis is limited to the issues they raise.

[17] We need not address this contention under Article 36 as surrendering the Lease does not relieve Exxon of its obligations under Article 3.

zones. Although he acknowledged that Exxon would have had to commit an additional $2 million to continue producing from the Field, he opined that wells in those two zones would have produced oil and gas in paying quantities for an additional eight years after the Field was abandoned in 1991. However, in this Court, the royalty owners acknowledge that Exxon complied with the spacing requirements of Article 3 of the Lease—to complete at least one well in every zone for each twenty acres for oil and one well completed in every zone for each 160 acres for gas—and do not argue that Exxon had a duty to drill additional wells in the Field. Likewise, the Miesches do not argue that Exxon had a duty to drill additional wells in the H12 or FS75 zones.

They take the position in this Court that Exxon breached the Lease by failing to produce all the oil and gas in horizons H12 and FS75 that was available in paying quantities from existing wells. Hite's charts of the production from the wells in the O'Connor Lease were admitted at trial. The charts show that Exxon drilled at least one well in each zone and produced 3,651,850 cubic feet of gas and 78,746 barrels of oil in zone FS75 and 1,728,728 cubic feet of gas and 3,933 barrels of oil in zone H12. Hite agreed that Exxon drilled at least one well in FS75 and at least one well in H12 and both wells produced in paying quantities in each zone.[18]

The Miesches argue that Exxon "did not complete every well in the H12 and FS75 zones." They also contend that the Article 3 duty to "complete" the wells required Exxon to produce all oil and gas in zones H12 and FS75 available in paying quantities. The Miesches equate "complete"

[18] Notwithstanding this testimony from their expert, the royalty owners argue that the "records reflected that Exxon had not produced from the only two wells completed in the H12 zone."

with the Article 3(a) duty to "fully develop" and define "fully develop" as fully realizing all oil and gas available in paying quantities in each zone per the specified acreage.

The royalty owners' analysis of Articles 3 and 4 of the Lease contradict its express terms and do not harmonize the terms in those Articles. As we noted, Article 3(a) of the Lease expressly provides that the duty to fully develop is satisfied by only drilling one well in each zone per the designated acreage and preparing it for production, even in the unlikely event that no production occurs. That obligation is less onerous than producing all oil and gas available in paying quantities from the wells in the two zones. As a matter of law, Exxon completed wells in zones H12 and FS75 by not only drilling them and preparing them for production, but producing significant quantities of hydrocarbons from those zones, according to Hite's numbers.

There is a difference between Article 3's obligation to fully develop the tracts and Article 4's obligation to realize the full value of the tracts. Fulfilling the duty in Article 3 to complete a well in each horizon would not satisfy Article 4. The former duty arises from the development clauses in Article 3. The royalty owners do not contend that Exxon had a duty to drill more wells, and likewise do not contend in this Court that the wells completed should have pierced additional zones in the Field. They concede that zones H12 and FS75 were pierced by wells Exxon drilled but contend that the zones were not sufficiently worked to realize their full value. They contend that Article 4's requirement to realize the "full value" of operations is incorporated into the general development obligation of Article 3, even though "fully developed" is the development duty specifically defined later in Article 3. Article 4 does not include this sentence in the definition of "diligence"; it defines "diligence" in the first sentence. The Miesches position would mean that

"fully developed" means one thing in the general development obligation of Article 3(a) and something different in a latter paragraph of Article 3(a), which defines "fully develop" as drilling and completing at least one well in each zone on specified acreage for oil or gas production. There is no reference in Article 3 to an obligation to realize the full value of available hydrocarbons. To bridge that gap, the Miesches argue that "completing" a well, a term in the specific development obligation in Article 3(a), means realizing its full value per Article 4. But the Lease does not define completion of a well, and nothing in Articles 3 or 4 indicates that completion means to realize the full value, or all hydrocarbons available in paying quantities of each zone for the specified acreage. And the second sentence of Article 4 does not state that it is part of the definition of "diligently" or that it defines "completed" wells.[19]

Hence, under one interpretation of the Lease, we are confronted with two different duties, both expressly set forth in the Lease and one contradictory to the other.[20] Where an ambiguity has not been raised by the parties, the interpretation of a contract is a question of law. *Seagull Energy E&P, Inc. v. Eland Energy, Inc*., 207 S.W.3d 342, 345 (Tex. 2006). The duty to fully develop in Article 3(a) is less onerous and is inconsistent with a duty to fully develop as defined by the Miesches in Article 4. We attempt to harmonize these provisions while giving effect to both. If the second sentence of Article 4 is the preeminent duty, it would vitiate the definition of "fully develop"

[19] Amicus Professor Weaver also concludes that Article 4 is an express covenant that "is separate and apart from any development obligations in Article 3."

[20] No party argues that the Lease is ambiguous. The trial judge inquired of the parties on more than one occasion whether the Lease terms are ambiguous. The parties maintained that they are not. However, at least one amicus brief acknowledges that the provisions of Articles 3 and 4 are not entirely consistent. Notwithstanding this, royalty owners contend the Court should give effect to the "full value" language in Article 4 but should not enforce the definition of "fully develop" in Article 3.

in Article 3(a). *See Valence Operating Co. v. Dorsett*, 164 S.W.3d 656, 662 (Tex. 2005) (holding that courts should harmonize the provisions of a contract such that none are rendered meaningless). Article 3 provides the definition of this duty. It expressly defines "fully develop" and states that the tracts of land "shall be deemed fully developed *within the intent of the preceding paragraph*." (Emphasis added). The preceding paragraph is the general development obligation that introduced the term "fully develop" in the Lease; the second paragraph in Article 3(a) defines "fully develop." Article 3(a) is more specific than Article 4 in addressing the development obligations in the Lease. *See Forbau v. Aetna Life Ins. Co.*, 876 S.W.2d 132, 133–34 (Tex. 1994) (noting that a specific contractual provision controls over the general provision concerning the same issue); *Southland Royalty Co. v. Pan Am. Petroleum Corp*., 378 S.W.2d 50, 57–58 (Tex. 1964) (holding specific provision for payment of gas royalty controls over a less specific provision).

The second sentence of Article 4 includes aspirational terminology that Exxon operate in accordance with the best practices of the industry "to the end" and that the full value of the Lease be "ascertained, conserved and realized." Article 3(a)'s development language is mandatory.

Clearly the extent of the duty to develop was defined by the parties in Article 3. Holding that Article 4 trumps this defined duty would render meaningless Article 3(a)'s specifically defined obligation to "fully develop" and potentially eliminate the spacing requirements for wells drilled in the Lease and require more wells (subject to applicable Railroad Commission regulations) to fully realize the mineral horizons. Where the Lease expressly defines the duty, we will not impose a more stringent obligation unless it is clear that the parties intended to warrant production beyond that defined obligation. *See Barrett*, 550 S.W.2d at 142. This reading of the Lease harmonizes and gives

effect to both articles. We conclude that the parties' expressed intent was to define in Article 3(a) the duty of the operator to develop the O'Connor Field. The aspirational language in Article 4 informs the duties in Article 3 such that they should be performed in accordance with the best practices of the industry with the goal of fully developing the tracts.

4. Evidence of Fulfillment of Development Duty

Having ascertained the scope of Exxon's development obligations, we now turn to Exxon's argument that the evidence is legally insufficient to support the breach of lease claim. Because Exxon is attacking the legal sufficiency of the evidence supporting an adverse finding on an issue for which it did not have the burden of proof, Exxon must show that no evidence supports the jury's adverse finding. *See Croucher v. Croucher*, 660 S.W.2d 55, 58 (Tex. 1983). Evidence is legally sufficient if it "would enable reasonable and fair-minded people to reach the verdict under review." *City of Keller*, 168 S.W.3d at 827. We "credit favorable evidence if reasonable jurors could, and disregard contrary evidence unless reasonable jurors could not." *Id.*

Hite testified that "fully developed" means there are a "sufficient number of wells in it to get the reserves." And when asked whether Exxon completed "in the FS75 and the H12, in every well, that Exxon had good probability of producing oil and gas in those two zones," he answered "[n]o, they didn't." However, when asked whether "drilling the H12 and completing it in two wells complete[d] that zone in the wells on this tract that would penetrate that zone in paying quantities," he answered "[i]f your question is, did the two wells fully develop the lease, the answer is no." Asked whether the wells Emerald completed in FS75 were "completed in a fully-developed manner," he answered "[n]o, it was not." Hite opined that Exxon violated the Lease by not producing more

extensively, or exhausting the production, from the wells in zones H12 and FS75. He testified that zones H12 and FS75 had remaining reserve potential and that Exxon had information indicating they "could have been developed further."

Hite's stated assumption for his opinions is that "fully develop" meant to fully exploit the reserves in zones H12 and FS75. As we explained, the duty undertaken under the language of the development clause is to fully develop, not fully exploit the zones. Under the contractual standard in the Lease, the evidence does not support Hite's conclusions. Hite's charts of the production from the wells in the O'Connor Lease, admitted at trial, show that Exxon drilled at least one well in each zone and produced 3,651,850 cubic feet of gas and 78,746 barrels of oil in zone FS75 and 1,728,728 cubic feet of gas and 3,933 barrels of oil in zone H12. The royalty owners submitted evidence establishing that Exxon drilled at least one well in both zones FS75 and H12 and both wells produced in paying quantities. They also conceded that the well spacing requirements were met. Evidence that further development potential existed when Exxon abandoned the leasehold in 1991 is no evidence that Exxon failed to comply with the parties' obligations embodied in the development clause. And evidence that Exxon did not fully exploit the reserves in FS75 and H12 is no evidence that Exxon did not "drill and complete" the requisite number of wells for zones FS75 and H12. The evidence establishes that Exxon completed at least one well capable of producing in paying quantities in each zone for every twenty acres for oil and every 160 acres for gas. Therefore,

we reverse the court of appeals' judgment and render judgment in favor of Exxon on the royalty owners' breach of lease claim.[21]

C. Fraud

Unlike most of Emerald's and the royalty owners' other claims, which have a two-year statute of limitations, the statute of limitations for fraud is four years. TEX. CIV. PRAC. & REM. CODE § 16.004(a)(4). The statute of limitations for fraud begins to run from the time the party knew of the misrepresentation. *Little v. Smith*, 943 S.W.2d 414, 420 (Tex. 1997) ("[T]he statute does not begin to run until the claimant knew or should have known of facts that in the exercise of reasonable diligence would have led to the discovery of the wrongful act.).

Emerald claims that Exxon committed fraud by filing plugging reports (W-3s) with the Railroad Commission that deliberately misrepresented that it properly plugged the wells when it did not. That conduct allegedly caused Emerald increased costs to re-enter wells and made re-entry of some wells impossible resulting in loss of revenues. At trial, the royalty owners asserted fraud both for filing false W-3s and misrepresenting the remaining reserves in the O'Connor Field. At the court of appeals, having recovered on other claims, the Miesches conditionally appealed the trial court's fraud judgment but only on the issue of the remaining reserves.

The trial court granted Exxon's motion for directed verdict on both Emerald's and the Miesches' fraud claims, therefore, there was no fact finding identifying the dates that Emerald

[21] Because we conclude no evidence supports the royalty owners' breach of lease claim, we need not reach the issue of whether the claim is time-barred or whether the doctrine of fraudulent concealment tolls the statute of limitations. *See Moreno v. Sterling Drug, Inc.*, 787 S.W.2d 348, 352 n.1 (Tex. 1990) (noting that the doctrine of fraudulent concealment estops a defendant who conceals the existence of a cause of action from asserting the statute of limitations as an affirmative defense).

learned of alleged false plugging reports or that Exxon allegedly misrepresented the reserves to the royalty owners. However, Emerald notes that "the first place subsequent operators turn is to those very filings at the Railroad Commission when deciding whether redevelopment can be economically undertaken." Lynch testified that Emerald reviewed the W-3s for the Field. The June 1994 letter states that Emerald encountered cut casing in the wells on the O'Connor Lease in 1993 and junk in the well prior to June 1994. Thus, Emerald may have learned about the asserted misrepresentations on or around that date. Based on either of these dates, the fraud claim filed by Emerald would be timely, and therefore, we reach the merits of Emerald's fraud claim.[22]

1. Emerald's Fraud Claim

The court of appeals reversed the trial court's directed verdict on Emerald's fraud claim, holding that the jury should have been allowed to consider whether the evidence was sufficient to establish fraud. It asserted that the evidence did not conclusively disprove the intent-to-induce reliance element of the fraud claim. In reviewing a trial court's directed verdict, we examine the evidence in the light most favorable to the person suffering an adverse judgment and decide whether there is any evidence of probative value to raise an issue of material fact on the question presented. *Henderson v. Travelers Ins. Co.*, 544 S.W.2d 649, 650 (Tex. 1976). We do not hold that public filings, such as Railroad Commission reports, alone satisfy the intent-to-induce reliance element of fraud. We conclude there was some evidence presented at trial tending to show that Exxon knew, at the time it filed the plugging reports, of an especial likelihood that the identified future operators

[22] This opinion does not preclude the parties on remand from seeking to establish the date on which Emerald learned of the alleged misrepresentations.

would rely on the inaccurate plugging reports. We, therefore, agree with the court of appeals on this issue.

A plaintiff seeking to prevail on a fraud claim must prove that (1) the defendant made a material misrepresentation; (2) the defendant knew the representation was false or made the representation recklessly without any knowledge of its truth; (3) the defendant made the representation with the intent that the other party would act on that representation or intended to induce the party's reliance on the representation; and (4) the plaintiff suffered an injury by actively and justifiably relying on that representation. *See DeSantis v. Wackenhut Corp.*, 793 S.W.2d 670, 688 (Tex. 1990); *Trenholm v. Ratcliff*, 646 S.W.2d 927, 930 (Tex. 1983).

Emerald claims that Exxon committed fraud by misrepresenting material information in its plugging reports to the Railroad Commission with the intent that known lessees and lessors of such mineral interests would rely on the information in the future. Emerald claims, as a result of its reliance, that it is entitled to damages measured by "the value of lost wells and minerals, the additional costs of reentering those wells that were improperly plugged, [and] the increased risk of loss of producing zones and wells due to improper plugging." The court of appeals held that evidence that Exxon knew that unidentified, subsequent lessees and operators might rely on Railroad Commission filings to make business decisions was sufficient to satisfy the intent-to-induce reliance element of fraud. 180 S.W.3d at 337. Exxon argues that the court of appeals' decision is erroneous for two reasons. First, Exxon argues there is no evidence that future operators would rely on the plugging reports because the reports' only purpose is to allow the state to protect against pollution. Second, Exxon argues that Emerald's approach reduces the intent-to-induce reliance element of

fraud to mere foreseeability, counter to the Court's analysis in *Ernst & Young, L.L.P. v. Pacific Mutual Life Insurance Co.*, 51 S.W.3d 573, 580 (Tex. 2001).

We begin with the duty to plug wells. "Proper plugging is the responsibility of the operator of the well." 7 Tex. Reg. 3991 (1982) (16 TEX. ADMIN. CODE § 3.14(c)(1)), *amended by* 23 Tex. Reg. 9304 (1998) (current version at 16 TEX. ADMIN. CODE § 3.14(c)(1) (R.R. Comm'n of Tex., Plugging)). The Railroad Commission mandates:

> Non-drillable material that would hamper or prevent re-entry of a well shall not be placed in any wellbore during plugging operations . . . . Pipe and unretrievable junk shall not be cemented in the hole during plugging operations without prior approval by the district director or the director's delegate.

16 TEX. ADMIN. CODE § 3.14(d)(10) (R.R. Comm'n of Tex., Plugging). Exxon argues that this section and similar plugging requirements are not intended to benefit future operators, but only to protect the environment. Thus, Exxon argues, no evidence supports Emerald's argument that there was an especial likelihood that Exxon knew future operators would rely on the reports because that is not the reports' purpose.

Although the Railroad Commission explained that it revised section 3.14 "to protect fresh water in the state from pollution," the plugging reports are not limited to this purpose. 7 Tex. Reg. at 3989. One of the objectives of the plugging regulations is to prevent plugging of wells that hinder or prevent re-entering wells, which could be desired by the same or subsequent owners or operators. *Id.* To police this regulation, the Commission requires that the W-3 plugging reports be verified under oath, be filed within thirty days after the plugging is completed, and disclose the methods used to plug a well. *Id.* at 3991. Thus, the purpose of requiring operators to file plugging reports with

the Commission is to ensure that operators follow a plugging procedure that not only prevents pollution, but also allows re-entry into the wells for commercial purposes.

However, the mere fact that subsequent lessees might or should rely on statements in Exxon's plugging reports alone is not sufficient to establish an intent to induce reliance, as the court of appeals held and as Emerald argues. *Ernst & Young*, 51 S.W.3d at 580. In *Ernst & Young*, we considered the proof necessary to establish the intent-to-induce reliance element of a fraud claim. Although we declined to decide whether to adopt the reason-to-expect standard outlined in section 531 of the Restatement (Second) of Torts, we concluded that this standard is consistent with Texas fraud jurisprudence. *Id.* Section 531 provides:

> One who makes a fraudulent misrepresentation is subject to liability to the persons or class of persons whom he intends or has reason to expect to act or to refrain from action in reliance upon the misrepresentation, for pecuniary loss suffered by them through their justifiable reliance in the type of transaction in which he intends or has reason to expect their conduct to be influenced.

RESTATEMENT (SECOND) OF TORTS § 531 (1977). Like the defendants in *Ernst & Young*, Exxon argues that this approach reduces the intent-to-induce element to a foreseeability standard. We rejected that argument in *Ernst & Young*, holding that section 531's "reason-to-expect standard requires more than mere foreseeability; the claimant's reliance must be 'especially likely' and justifiable, and the transaction sued upon must be the type the defendant contemplated." *Ernst & Young*, 51 S.W.3d at 580; *see also Grant Thornton LLP v. Prospect High Income Fund*, 314 S.W.3d 913, 922 (Tex. 2010) (quoting *Ernst & Young*, 51 S.W.3d at 575). Evidence that reliance on false public information as part of a general industry practice is insufficient, as a matter of law, to prove an intent to induce reliance. *See Ernst & Young* at 581–82. Even an obvious risk that a

misrepresentation might be repeated to a third party is not sufficient to satisfy the reason-to-expect standard. A plaintiff must show that "[t]he maker of the misrepresentation [has] information that would lead a reasonable man to conclude that there is an especial likelihood that it will reach those persons and will influence their conduct." RESTATEMENT (SECOND) OF TORTS § 531 cmt. d (1977), *quoted in Ernst & Young*, 51 S.W.3d at 581. The standard is not met if a defendant merely foresees that some party may rely on statements made in a public filing.

Therefore, if the evidence shows only that Exxon made material misrepresentations in its plugging reports to the Railroad Commission and knew that lessors and operators in the future may rely on the filings, such evidence would fail as a matter of law under the *Ernst & Young* standard. *See Ernst & Young*, 51 S.W.3d at 581–82. Such a holding would open the cause of action to any person who subsequently relied on any public filings—including stocks and bonds, security interests, real property deeds, and tax filings—with few limits in sight. The intent-to-induce reliance element of fraud is a focused inquiry, more akin to a rifle shot than a shotgun blast. Intent-to-induce reliance is not satisfied by evidence that a misrepresentation may be read in the future by some unknown member of the public or of a specific industry.

Here, however, there is some evidence that Exxon knew of an especial likelihood that Emerald specifically would rely on the plugging reports in a transaction being considered at the time it filed the plugging reports. In 1990, Exxon concluded that it could no longer profitably operate the leases unless Exxon's royalty obligation could be renegotiated. The negotiations failed, and Exxon abandoned the field, plugging the last well in the O'Connor Lease in 1991. In their letter of September 12, 1990 to Exxon, the royalty owners stated, "[W]e have located a group of oil and gas

companies that are willing to accept the plugging obligations and an Assignment of the above referenced [six] wells [and certain acreage around each well]." They also offered their consent to assign all of Exxon's right, title, and interest in the leases to several companies and indicated their interest in future oil and gas operations in the Lease.

In 1989, "Pace Production Company" expressed that it was "most anxious to proceed" with production in the O'Connor Lease and offered to purchase Exxon's interest. It renewed its offer in January 1990. By letter of July 23, 1990, Exxon advised each of the royalty owners that "Pace Production Company" had expressed an interest in the Lease. On May 25, 1993, Pace West Production acquired the interests to develop the Lease from the royalty owners.

Exxon knew the royalty owners had a continuing interest in further developing the O'Connor Lease, received offers from the putative subsequent lessee to purchase Exxon's interest in the Lease, and knew the transaction proposed by the Miesches and Emerald's predecessors was the continued production of oil and gas in a portion of the Lease. Exxon argues that the company that made an offer on the Miesches' oil and gas interests was "Pace Production Company," which is a different company from Emerald's alleged predecessor "Pace West Production." Therefore, it contends the trial court properly granted its motion for directed verdict. In reviewing a directed verdict, we decide whether there is any evidence of probative value to raise an issue of material fact on the question presented, and we review the evidence in the light most favorable to the person suffering the adverse judgment. *Bostrom Seating, Inc. v. Crane Carrier Co.*, 140 S.W.3d 681, 684 (Tex. 2004) (citation omitted); *Henderson v. Travelers Ins. Co.*, 544 S.W.2d 649, 650 (Tex. 1976) (citations omitted). In this case, the presence of some evidence of any entity other than "Pace West Production" as the

predecessor to Emerald will defeat the directed verdict. We searched the record to answer this question.

Exxon's correspondence in 1989 and 1990 concerning the sale of its lease in the O'Connor Field called the entity that expressed interest in purchasing the Lease "Pace Oil & Gas Company," "Pace Petroleum Company," and "Pace Production Company." T. Michael O'Connor, one of the royalty owners, testified that he could not distinguish between "Pace and Pace West." At the relevant time concerning the fraud claim, there is evidence that the parties involved—Exxon and the royalty owners—used at least five names, at times interchangeably, for the entity that was interested in purchasing the O'Connor lease from Exxon. A May 25, 1993 "Agreement for Waivers" between Emerald and the royalty owners states that Emerald was the successor to two different Pace West entities as it was "formerly known as Pace West Production, L.C., and also formerly known as Pace West Production, Ltd." An undated "Memorandum of Amended Oil and Gas Lease and Security Agreement" states that Emerald was formerly known as "Pace West Production, L.C." and also as "Pace West Production, Ltd." Exxon contends that "Pace West" is a different entity from "Pace Production Company," but, as noted, T. Michael O'Connor testified that he could not distinguish between "Pace and Pace West." Although Exxon points out, in its second motion for rehearing, that there is evidence that "Pace West Production, L.C." was not created until 1993, after the time the alleged misrepresentations were made, that does not address the evidence that Emerald was also

formerly known as the different entity, "Pace West Production, Ltd." In sum, the evidence raises a fact issue and precludes granting a directed verdict on the issue.[23]

Thus, legally sufficient evidence in the record supports the claim that Exxon had information that would lead a reasonable person to conclude there was an especial likelihood Emerald would rely on Exxon's allegedly inaccurate filings with the Railroad Commission. The question of whether the W-3s are inaccurate is not before us and we do not decide it. We hold that the trial court erred in granting a directed verdict on Emerald's fraud claim on the ground that there was no evidence of the intent-to-induce element of the claim. Accordingly, the trial court's grant of directed verdict on the fraud claim on this basis was in error.[24]

2. Royalty Owners' Remaining Claims

At the court of appeals, the royalty owners defended the trial court's judgment in their favor on the waste and breach of lease claims and conditionally challenged the trial court's directed verdict on their claims for negligence, negligence per se, negligent misrepresentation, tortious interference with economic opportunity, breach of regulatory duty to plug wells properly, and fraud in allegedly making misrepresentations of the remaining reserves in the O'Connor Field. They asserted that their fraud claims are not precluded by the Lease and are supported by the evidence. The court of appeals

[23] We decide that there is legally sufficient evidence contrary to Exxon's factual position; therefore, it was error for the trial court to grant the directed verdict. We do not suggest that the parties cannot clarify this factual question before the trial court in future proceedings.

[24] Emerald claims that it is entitled to damages that include profit on lost mineral production due to the alleged fraud. Because this issue was not presented to this Court, we need not address it. However, we note that the "measure of damages in a fraud case is the actual amount of the plaintiff's loss that directly and proximately results from the defendant's fraudulent conduct." *Tilton v. Marshall*, 925 S.W.2d 672, 680 (Tex. 1996).

upheld the trial court's judgment in their favor and did not address the claims the royalty owners conditionally challenged. The royalty owners briefed the claims conditionally appealed to the court of appeals, but did not address those claims before this Court. They did, however, identify the unbriefed issues. We therefore remand those issues to the court of appeals.

III. CONCLUSION

We hold the royalty owners' statutory and common law waste claims, and Emerald's negligent misrepresentation and tortious interference claims are time-barred and reverse and render judgment for Exxon with respect to those claims. We also hold that the evidence conclusively establishes that Exxon satisfied its duty to develop the Field and reverse and render judgment for Exxon with respect to the breach of Lease claim. We affirm the court of appeals' judgment, for different reasons, reversing the trial court's directed verdict in favor of Exxon on Emerald's fraud claim. Finally, we remand the case to the court of appeals (1) to consider the royalty owners' claims for fraud, negligence, negligent misrepresentation, negligence per se, tortious interference with economic opportunity, and breach of regulatory duty to plug wells properly, and (2) to remand Emerald's fraud claim to the trial court for further proceedings.

OPINION DELIVERED: April 1, 2011

IN THE SUPREME COURT OF TEXAS

No. 06-0243

SOLAR APPLICATIONS ENGINEERING, INC., PETITIONER,

v.

T.A. OPERATING CORPORATION, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTH DISTRICT OF TEXAS

Argued October 16, 2007

JUSTICE WAINWRIGHT delivered the opinion of the Court.

JUSTICE GREEN did not participate in the decision.

In this case, a general contractor and an owner dispute performance and final payment under a construction contract.[1] Solar Applications Engineering, Inc. d/b/a Wade Construction (Solar), the general contractor, and T.A. Operating Corporation d/b/a TravelCenters of America (TA), the owner, entered a contract to build a truck stop in San Antonio, Texas. After Solar substantially completed the project, disputes arose regarding the completion of certain remaining work and the attachment of liens on the property by subcontractors and Solar. TA eventually terminated the contract and refused to make final payment to Solar. Solar sued TA for breach of contract to recover the contract balance, and TA counterclaimed for delay and defective work. At trial, the court's jury charge

[1] We also received an amicus brief from the American Subcontractors Association, Inc.

focused primarily on damages. The verdict substantially favored Solar, with the jury awarding actual damages of $400,000 offset by $8,000 in defects and omissions.

On appeal, TA argued that because Solar did not provide a lien-release affidavit, which TA argues was a condition precedent to final payment under the contract, Solar cannot recover for breach of contract. On rehearing, the court of appeals reversed the trial court's judgment, holding that the lien release provision was a condition precedent and that Solar failed to prove it complied with the lien-release provision. It rendered a take-nothing judgment in favor of TA.[2]

The issue before this Court is whether the lien-release provision is a condition precedent to Solar's recovery for breach of contract and whether failure to provide it is a bar to recovery. TA reasonably argues that an owner who has paid the contract amount to the general contractor is entitled to a building free of subcontractor's liens. Solar contends, also reasonably, that it is entitled to the balance remaining under the contract for completing the project offset by the cost to remedy defects and omissions. Under normal circumstances, Solar might have provided a conditional lien-release affidavit to allow Solar to fulfill its obligation under the contract, to allow TA to be assured that it will not be double-billed for work on the project, and to allow the parties to resolve their dispute regarding the scope of the work. But the standard operating procedure broke down here, and the court of appeals ultimately ruled that TA was entitled to a windfall, even though the issue of breach or satisfaction of conditions precedent was not tried to the jury.

---

[2] At the trial court and the court of appeals, TA also argued that Solar owed it $431,415.91, from damages due to delay, experts, other costs, subcontractor liens, and attorney's fees and that the trial court should have submitted a fraud instruction to the jury. The court of appeals affirmed the trial court's judgment on the damage calculation of the defects, whether the delay was excused by TA, and whether the trial court erred in refusing to submit a fraud instruction. These issues were not appealed by TA and are not before us.

We hold that the lien-release provision is a covenant, not a condition precedent to Solar's recovery on the contract. We reverse the judgment of the court of appeals, reinstate the trial court's judgment, and remand to the trial court for further proceedings consistent with this opinion.

I. BACKGROUND

TA entered into a contract with Solar to construct, for approximately $4 million, a retail building for use as a truck stop, restaurant, and convenience store. The contract between Solar and TA contemplates a specific sequence of events leading up to completion and final payment that is common in construction contracts. This procedure is consistent with a statutory scheme that provides contractors and builders with lien rights to secure payment for labor, but also gives owners the right to retain a percentage of the contract balance to satisfy any outstanding liens on the project if necessary.

The contractual sequence for the truck stop project is as follows: The parties agree on a construction schedule and then Solar begins work according to the schedule. On application for payment by Solar, TA is required to provide monthly progress payments. When Solar believes the construction project ready for its intended use, that it is "substantially complete," it so notifies TA. After an inspection, if TA agrees that the project is substantially complete, TA issues a "certificate of Substantial Completion" and attaches a list of items, referred to as the "punch list," to be completed or corrected before final payment.[3] Next, upon written notice from Solar that the punch

[3] Section 14.04(A) of the contract entitled "*Substantial Completion*" provides:

> When [Solar] considers the entire Work ready for its intended use [Solar] shall notify [TA] in writing that the entire Work is substantially complete . . . . [TA] [sic] will prepare and deliver to [TA] a tentative certificate of Substantial Completion which shall set the date of

list is done and the project is complete, TA conducts a final inspection with Solar to identify any deficiencies, and Solar remedies those deficiencies.[4] After Solar corrects the identified deficiencies, it may submit a "final Application for Payment" that is accompanied by complete and legally effective releases or waivers of all lien rights ("lien-release affidavit").[5]

In this case, the parties agree that the project was substantially complete in August 2000. A few weeks later, TA presented Solar with a punch list, but disputes arose over the remaining items that needed to be completed before final payment. Solar then filed a lien against the project for $472,393, and subcontractors also filed liens against the property. TA terminated Solar pursuant to the contract's "for cause" termination provision contending that, among other things, Solar had failed to keep the project lien-free and failed to complete the punch list.[6] The termination letter also

---

> Substantial Completion. There shall be attached to the certificate a tentative list of items to be completed or corrected before final payment.

[4] Section 14.06 of the contract entitled "*Final Inspection*" provides:

> Upon written notice from [Solar] that the entire Work . . . is complete, [TA] will promptly make a final inspection with [Solar] and will notify [Solar] in writing of all particulars in which this inspection reveals that the Work is incomplete or defective. [Solar] shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

[5] Section 14.07(A)(2) of the contract entitled "*Application for Payment*" provides:

> The final Application for Payment shall be accompanied (except as previously delivered) by: (i) all documentation called for in the Contract Documents, including but not limited to the evidence of insurance; (ii) consent of the surety, if any, to final payment; and (iii) complete and legally effective releases or waivers (satisfactory to [TA]) of all Lien rights arising out of or Liens filed in connection with the Work.

[6] Section 15.02 of the contract entitled "*OWNER May Terminate for Cause*" provides:

> A. The occurrence of any one or more of the following events will justify termination for cause . . . 4. [SOLAR's] violation in any substantial way of any provisions of the Contract Documents.

notified Solar that TA was asserting claims for $736,800.15 against Solar for its failure to complete the construction project on time. The day after TA terminated the contract, Solar provided TA with an "Application and Certificate for Payment" for $472,149, the amount Solar believed to be the remaining contract balance. TA refused to make payment, contending Solar had not complied with the lien-release provision by failing to submit a lien-release affidavit. TA contended it had no obligation to make final payment on a building with outstanding construction liens. Solar then sued TA for breach of contract under the theory of substantial performance for the unpaid balance of the contract, and TA counterclaimed for alleged delays and defective work.

By the time of trial, subcontractors filed $246,627 in liens against the project. The trial court severed the subcontractors' claims and ordered that any sums recovered by Solar, other than attorney's fees, would be held in trust for the benefit of the subcontractors' claims. The jury found in favor of Solar, and the trial court entered a judgment on the verdict in favor of Solar, awarding $392,000 in damages, which represented the balance due under the contract less an $8,000 offset to remedy all remaining "punch list" defects and omissions found by the jury.

TA appealed, and the court of appeals initially affirmed the trial court's judgment. On rehearing, however, the court of appeals reversed and rendered judgment that Solar take nothing. The court of appeals assumed that the lien-release provision was a condition precedent and held that the doctrine of substantial performance did not excuse Solar's failure to provide a lien-release affidavit, and thus Solar forfeited final payment under the contract. 191 S.W.3d 173, 180–81 (Tex. App.–San Antonio 2005, pet. granted). Solar petitioned this Court, complaining that the court of appeals erred because: (1) the lien-release provision was not triggered; (2) the lien-release provision

is not a condition precedent; and (3) even if the lien-release provision is a condition precedent and was triggered, the court of appeals' decision results in a forfeiture of Solar's right to recover under the contract instead of delaying payment until the liens are released, which is inconsistent with the doctrine of substantial performance and the purpose of statutory lien rights. We granted Solar's petition.

II. LAW AND ANALYSIS

Whether Solar is barred from receiving the contract balance depends on whether the lien-release provision is a condition precedent to Solar's recovery for breach of contract. "A condition precedent is an event that must happen or be performed before a right can accrue to enforce an obligation." *Centex Corp. v. Dalton*, 840 S.W.2d 952, 956 (Tex. 1992) (citations omitted); *see also* RESTATEMENT (SECOND) OF CONTRACTS § 224 (1981) ("A condition is an event, not certain to occur, which must occur, unless its non-occurrence is excused, before performance under a contract becomes due."); *id.* § 225 (noting the effects of the non-occurrence of a condition). A covenant, as distinguished from a condition precedent, is an agreement to act or refrain from acting in a certain way. *Reinert v. Lawson*, 113 S.W.2d 293, 294 (Tex. Civ. App.—Waco 1938, no writ). Breach of a covenant may give rise to a cause of action for damages, but does not affect the enforceability of the remaining provisions of the contract unless the breach is a material or total breach. *E.g.*, *Hernandez v. Gulf Group Lloyds*, 875 S.W.2d 691, 692–94 (Tex. 1994); RESTATEMENT (SECOND) OF CONTRACTS §§ 236 cmt. a, 241, 242 cmt. a. Conversely, if an express condition is not satisfied, then the party whose performance is conditioned is excused from any obligation to perform. *See Dalton*, 840 S.W.2d at 956; RESTATEMENT (SECOND) OF CONTRACTS § 225.

Solar claims that the court of appeals erred in concluding that the lien-release provision is a condition precedent because it lacks conditional language normally associated with express conditions. *See Criswell v. European Crossroads Shopping Ctr., Ltd.*, 792 S.W.2d 945, 948 (Tex. 1990). When the lien-release provision is read in context, Solar contends it constitutes a "hoop" or step that the general contractor must follow in order to collect final payment, not a condition precedent to sue and recover under the contract. Because a different and reasonable interpretation of the contract is possible, Solar argues the Court should construe the provision to prevent a forfeiture. *See id.* Further, the lien-release provision should not be applied as a condition precedent because its purpose—to protect TA from the possibility of having to pay twice—was accomplished by the trial court's severance of the subcontractors' claims against the project and order that the sums awarded to Solar be held in trust to pay outstanding sub-contractor liens.

TA responds that the court of appeals correctly held Solar was not entitled to the contract balance because it did not show that it complied with an express condition precedent to final payment. Section 53.085 of the Texas Property Code specifically authorizes an owner to require a lien-release affidavit as a condition of final payment. *See* TEX. PROP. CODE § 53.085(a), (c)(1).[7]

---

[7] Section 53.085 provides:

> Any person who furnishes labor or materials for the construction of improvements on real property shall, if requested and as a condition of payment for such labor or materials, provide to the requesting party, or the party's agent, an affidavit stating that the person has paid each of the person's subcontractors, laborers, or materialmen in full for all labor and materials provided to the person for the construction. . . . The affidavit may include . . . a waiver or release of lien rights by the affiant that is conditioned on the receipt of actual payment or collection of funds when payment is made by check or draft.

TEX. PROP. CODE § 53.085(a), (c)(1).

Consistent with section 53.085, section 14.07(A) of the contract requires that an application for final payment include a lien-release affidavit, and section 14.07(B) provides that TA's obligation to pay the final amount is conditioned on its review of the final application. Contending that the language of the contract is "unmistakable," TA concludes that forfeiture does not excuse Solar's failure to comply with this express condition. *See* RESTATEMENT (SECOND) OF CONTRACTS § 229 cmt. a (1981) ("[I]f the term that requires the occurrence of the event as a condition is expressed in unmistakable language, the possibility of forfeiture will not affect the interpretation of that language."). Being quite candid, TA offered at oral argument that the Legislature may well have intended such a windfall for owners.

"In order to determine whether a condition precedent exists, the intention of the parties must be ascertained; and that can be done only by looking at the entire contract." *Criswell*, 792 S.W.2d at 948 (citing references omitted); *see also* RESTATEMENT (SECOND) OF CONTRACTS § 226. "In order to make performance specifically conditional, a term such as 'if', 'provided that', 'on condition that', or some similar phrase of conditional language must normally be included." *Criswell*, 792 S.W.2d at 948 (citing *Landscape Design v. Harold Thomas Excavating*, 604 S.W.2d 374, 377 (Tex. Civ. App.–Dallas 1980, writ ref'd n.r.e.)). "While there is no requirement that such phrases be utilized, their absence is probative of the parties intention that a promise be made, rather than a condition imposed." *Id.* (citing *Hohenberg Bros. Co. v. George E. Gibbons & Co.*, 537 S.W.2d 1, 3 (Tex. 1976)). When no conditional language is used and another reasonable interpretation of the contract is possible, "the terms will be construed as a covenant in order to prevent a forfeiture." *Id.*

Section14.07(A) of the contract states:

> 1. After [Solar] has, satisfactorily completed all corrections identified during the final inspection and has delivered . . . [pertinent] documents, [Solar] may make application for final payment following the procedure for progress payments.
>
> . . .
>
> 2. The final Application for Payment shall be accompanied (except as previously delivered) by: (i) all documentation called for in the Contract Documents, including but not limited to the evidence of insurance; (ii) consent of the surety, if any, to final payment; and (iii) complete and legally effective releases or waivers (satisfactory to [TA]) of all Lien rights arising out of or Liens filed in connection with the Work.

The operative language, that Solar will provide "complete and legally effective releases or waivers . . . of all Lien rights" does not contain language that is traditionally associated with a condition precedent. The language preceding the lien-release provision does not make performance conditional. In the absence of any conditional language, a reasonable reading of the lien-release provision is that it is a promise or covenant by Solar to provide a lien-release affidavit in exchange for receiving final payment. This interpretation avoids forfeiture and completes the contract: Solar is paid for the work it completed, and TA receives an unencumbered building. TA correctly noted in its motion for rehearing at the court of appeals that Solar's breach results in "a delay in payment to Solar until the liens are released." The court of appeals' contrary interpretation results in a forfeiture to Solar and a windfall to TA. *Cf. Criswell*, 792 S.W.2d at 948; RESTATEMENT (SECOND) OF CONTRACTS § 227, cmt. d (1981) (Section 227(2) favors "an interpretation that . . . avoids the harsh results that might otherwise result from the non-occurrence of a condition and still gives adequate protection to the obligor.").

TA alleges that key language in section 14.07(B) creates the condition precedent. That section states:

> If, on the basis of [TA's] observation of the Work during construction and final inspection, and [TA's] review of the final Application for Payment and accompanying documentation as required by the Contract Documents, [TA] is satisfied that the Work has been completed and [SOLAR's] other obligations under the Contract Documents have been fulfilled, [TA] will, within ten days after receipt of the final Application for Payment, indicate in writing [TA's] recommendation of payment and present the Application for Payment for payment. At the same time [TA] will also given written notice to [SOLAR] that the Work is acceptable . . . . Otherwise [TA] will return the Application for Payment to [SOLAR], indicating in writing the reasons for refusing to recommend final payment, in which case [SOLAR] shall make the necessary corrections and resubmit the Application for Payment.

While TA is correct that section 14.07(B) contains the conditional language "if," the section does not create a condition of payment to the lien-release affidavit. Rather, the condition is *if* TA is satisfied with the Work and the Contractual Documents, *then* it will recommend that Solar be paid the retainage. If TA is not satisfied with the work, then Solar "shall make the necessary corrections and resubmit the Application for Payment." Solar's obligation to provide a lien-relase affidavit, and TA's obligation to pay, lie separate and apart from TA's approval of the project. If this condition were allowed to prevent Solar from suing on the contract when a building was substantially complete, then Solar would be beholden to TA to be "satisfied." In other words, if either Solar or TA disagreed with the other party's performance under the document, TA could likely sue Solar, but Solar could not sue to be paid, because TA was not satisfied under the contract.

While the Legislature's statutory scheme for contractor's lien rights provides that the parties may have chosen an alternative path, the overall scheme of the Property Code suggests interpreting

the provision to avoid a forfeiture. The process for final payment common to construction contracts is complemented by statutes that protect contractors and owners in case the contractual process breaks down. First, the Texas Constitution and the Texas Property Code grant a lien in favor of contractors and builders extending to the building on which they have labored. TEX. CONST. art. XVI, § 37;[8] TEX. PROP. CODE §§ 53.001–.260. Thus, if the owner becomes insolvent or refuses to pay, the contractor has recourse to recover the sums owed by foreclosing on the liens on the property. However, the contractor's lien gives contractors unequal leverage over owners and leaves owners vulnerable to insolvent contractors. For instance, if disagreements arise over the quality of the work and the owner threatens to withhold payment to the general contractor absent remedial measures, the general contractor can simply refuse to pay a subcontractor who can then place a lien on the property. Owners do not have similar self-help remedies and must resort to litigation. Similarly, if the owner pays the general contractor the full contractual sum, but the general contractor does not pay a subcontractor, the subcontractor can place a lien on the property. The owner, after already paying the general contractor in full, is forced to pay the subcontractor in order to receive the property lien-free and must again resort to litigation to recover the money already paid to the general contractor, who at this point may be insolvent.

---

[8] Article XVI, section 37 of the Texas Constitution provides:

> Mechanics, artisans and material men, of every class, shall have a lien upon the buildings and articles made or repaired by them for the value of their labor done thereon, or material furnished therefor; and the Legislature shall provide by law for the speedy and efficient enforcement of said liens.

TEX. CONST. art. XVI, § 37.

The unequal bargaining positions created by the contractor's lien rights is addressed through the mechanism of "retainage." The Property Code requires that, during the progress of work under a contract for which a contractor's lien may be claimed, the owner shall retain ten percent of the contract price. TEX. PROP. CODE § 53.101. This retainage secures the payment of any contractor or subcontractor who may assert a lien on the property in the event that the general fails to pay them. *Id*. § 53.102. In turn, retainage gives the owner offsetting leverage against the general contractor, whose receipt of the final ten percent of the contract balance is subject to its payment of the subcontractors in full. Thus, the contractor receives leverage over the owner in the form of the contractor's lien, and the owner receives equal leverage over the contractor in the form of the retainage. Both then have the incentive to complete the terms of the deal and the enforcement mechanisms to help ensure payment.[9]

Finally, the Property Code allows the parties to contract for payment of the retainage to the contractor upon the owner's receipt of a lien-release affidavit. *Id*. § 53.085. This contractual mechanism preserves the rights of the parties but avoids the more cumbersome statutory process for retainage release. *See*, *e.g.*, *id*. § 53.106. Essentially, the owner trades the retainage for the contractor's sworn assurance that property is lien-free. An all-bills-paid is different from a lien release, and is generally not enforceable as a condition precedent to final payment. *See Lesikar Consr. Co. v. Acoustex, Inc.*, 509 S.W.2d 877, 880–81 (Tex. Civ. App.—Fort Worth 1974, writ ref'd

[9] Likewise, chapter 56 of the Business and Commerce Code, formerly section 35.521 of the Business and Commerce Code, neither of which is applicable to this case, protects subcontractors by setting circumstances in which contingent payment, or "pay-when-paid" clauses are enforceable. Act of June 16, 2007, 80th Leg. R.S., ch. 498 § 1, 2007 Tex. Gen. Laws 879, *repealed by* Acts 2007, 80th Leg., ch. 885, § 2.47(a)(1), 2007 Tex. Gen. Laws 2086 (current version at TEX. BUS. & COMM. CODE ch. 56).

n.r.e.). However, the parties may agree that, as part of the affidavit, the contractor swears that lien rights are released "conditioned on the receipt of actual payment or collection of funds . . . ." TEX PROP. CODE § 53.085(c)(1). Under peaceful circumstances, the all-bills-paid affidavit accomplishes the statutory goals of the contractor's lien and retainage in a voluntary and efficient manner. The general contractor provides an affidavit and conditional release of lien, stating that when the contractor receives payment, all liens on the property will be released. *Id.*; *see also* THE CONSTRUCTION PROJECT: PHASES, PEOPLE, TERMS, PAPERWORK, PROCESSES § 4.VII.B.5 (Marilyn Klinger & Marianne Susong, eds., 2006) (defining a conditional lien release for subcontractor work). The standoff is resolved; the contractor gets paid (to be distributed to the subcontractors, with whom they have a conditional lien release), and the owner gets its building free of encumbrances.

Nonetheless, TA argues we should hold that the lien release is not only a condition to receive the retainage, but also a condition to fulfillment of Solar's contractual duties and thus entitlement to the contractual balance. Under this reading, Solar effectively waived its statutory and constitutional contractor's lien rights in the contract because it would not be entitled to the contractual balance until it released those rights. That view would have a contractor bargain away any leverage it had under the default rules, as an owner could simply accept the lien release and then refuse to pay, forcing the contractor to sue for the retainage. Holding that these lien-release provisions, common to construction contracts for the reasons outlined above, are conditions precedent to suit on the contract without express conditional language contravenes the lien statutes' goal of allowing the contractor or owner to avoid litigation by foreclosing on their lien or withholding the retainage. Parties are free, of course, to contract out of statutory default rules such

as those established by the lien statutes and may even contractually waive constitutional rights. *See Fort Worth Indep. School Dist. v. City of Fort Worth*, 22 S.W.3d 831, 844 (Tex. 2000) ("A party contractually waives its constitutional or statutory rights by intelligently, voluntarily, and knowingly relinquishing a known right or acting inconsistent with claiming that right.") But there would be little need for TA to bargain *ex ante* for a forfeiture clause in the contract in case Solar refused to provide a lien release. If the situation were to arise in which Solar was unable to assure TA that no liens would be placed on the property, the default rules already give TA the ability to withhold the retainage. A forfeiture clause would be overkill and expensive.

In this case, because both owner and contractor had a dispute over the scope of the work and subcontractors had placed liens on the property, the trial court severed the subcontractors claims. Alternatively, and ideally, Solar could have provided a conditional lien-release affidavit, which, when the trial court determined the amount owed to Solar, would have been effective once TA paid. But even under our interpretation of section 14.07 of the contract, TA will not be saddled with concerns about double-payment. The trial court will determine whether any subcontractor liens are still pending and, if so, TA may seek to discharge the liens, sue Solar for breach of the lien-release provision, or seek indemnification (either through common law or express terms of the parties contracts) from Solar for Solar's failure to pay the subcontractors.

For all of these reasons, absent clear language that a lien release is a condition precedent to a general contractor performing under the contract and receiving the contract balanced owed to it, we interpret the lien-release provision to be a covenant. We recognize that parties are free to contract as they choose, and TA should not be denied the benefit it specifically bargained for in the

lien-release provision. *Cf. Citizens Nat'l Bank in Abilene v. Texas & P. Ry. Co.*, 150 S.W.2d 1003, 1006-07 (Tex. 1941) (declining to apply the lien-release provision because no liens had been filed). The lien-release provision here gives TA the right to sworn assurances that it will receive a lien-free property prior to making final payment. The contract specifies that "complete and legally effect releases or waivers of all Lien rights" will satisfy as such assurance, but also that Solar "may furnish a Bond or other collateral satisfactory to [TA] to indemnify [TA] against any lien." Accordingly, on remand the trial court must determine whether the subcontractors' liens have been satisfied and TA is adequately assured of a lien-free property before reinstating the judgment in favor of Solar for the balance owed under the contract.[10]

III. CONCLUSION

For the foregoing reasons, we reverse the court of appeals' judgment and remand to the trial court for proceedings consistent with this opinion.

_____
Dale Wainwright
Justice

OPINION DELIVERED: December 3, 2010

[10] Evidently, the trial court attempted to protect TA from double liability by severing the subcontractors' liens and ordering that any recovery Solar obtained would be held in trust for the benefit of the subcontractors. However, it is unclear whether by adjudicating Solar's and TA's cross-claims first the trial resulted in a judgment for Solar against TA for the final payment amount with the liens remaining against TA's property. The judgment did not bind the subcontractors and did not necessarily guarantee that TA would receive a lien-free property prior to making final payment. At oral argument, TA conceded that the liens have all been satisfied, but this fact is not in the record.

IN THE SUPREME COURT OF TEXAS

NO. 06-0714

BARBARA ROBINSON, INDIVIDUALLY AND AS REPRESENTATIVE OF THE ESTATE OF JOHN ROBINSON, DECEASED, PETITIONER,

v.

CROWN CORK & SEAL CO., INC., INDIVIDUALLY AND AS SUCCESSOR TO MUNDET CORK CORPORATION, RESPONDENT

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued February 7, 2008

JUSTICE HECHT delivered the opinion of the Court, in which CHIEF JUSTICE JEFFERSON, JUSTICE MEDINA, JUSTICE GREEN, JUSTICE WILLETT, and JUSTICE LEHRMANN joined.

JUSTICE MEDINA filed a concurring opinion.

JUSTICE WILLETT filed a concurring opinion, in which JUSTICE LEHRMANN joined.

JUSTICE WAINWRIGHT filed a dissenting opinion, in which JUSTICE JOHNSON joined.

JUSTICE GUZMAN did not participate in the decision.

The issue we address in this case is whether a statute that limits certain corporations' successor liability for personal injury claims of asbestos exposure violates the prohibition against

retroactive laws contained in article I, section 16 of the Texas Constitution[1] as applied to a pending action. We hold that it does, and therefore reverse the judgment of the court of appeals[2] and remand the case to the trial court.

I

In 2002, petitioner Barbara Robinson ("Robinson") and her husband, John, Texas residents, filed suit alleging that John, age 63, had contracted mesothelioma from workplace exposure to asbestos products. As often happens, John had used several such products over the course of his life, and the Robinsons sued twenty-one defendants, including respondent Crown Cork & Seal Co., alleging that they were all jointly and severally liable. With respect to Crown, the Robinsons claimed that during John's service in the United States Navy from 1956 to 1976, he worked with asbestos insulation manufactured by the Mundet Cork Corporation, and that when Crown and Mundet merged, Crown succeeded to Mundet's liabilities.

Crown has never itself engaged in the manufacture or sale of asbestos products.[3] It manufactures metal bottle-caps, known in the industry as "crowns", and other packaging for consumer goods. Crown and its affiliates have over 20,000 employees around the world, about

---

[1] TEX. CONST. art. I, § 16 ("No . . . retroactive law . . . shall be made.").

[2] 251 S.W.3d 520 (Tex. App.–Houston [14th Dist.] 2006).

[3] Robinson argued in the lower courts that Mundet's asbestos business was still in operation when Crown became Mundet's majority shareholder, and that Crown should be held to have operated the business for several weeks before it was sold, 251 S.W.3d at 539, but she does not make that argument here.

1,000 of whom work in Texas at facilities in Conroe, Sugar Land, and Abilene. In 2009, the parent company reported $1.193 billion gross profit on $7.938 billion net sales.[4]

In November 1963, Crown's predecessor, a New York corporation with the same name, which was then the nation's largest manufacturer of crowns, acquired a majority of the stock in Mundet, another New York corporation, which besides insulation, also manufactured crowns. Within ninety days, in February 1964, Mundet sold all its assets related to its insulation business. Two years later, in February 1966, the companies merged. In 1989, Crown's predecessor was reincorporated as Crown, a Pennsylvania corporation.

Crown acknowledges that under New York and Pennsylvania law, it succeeded to Mundet's liabilities, which, as pertaining to Mundet's asbestos business, have been hefty. Over the years, Crown has been named in thousands of lawsuits claiming damages from exposure to asbestos manufactured by Mundet. While Crown acquired Mundet for only about $7 million, by May 2003 Crown had paid over $413 million in settlements, and Crown's parent company estimated in its 2003 Annual Report that payments could reach $239 million more.[5] Mundet's aggregate insurance coverage totaled $3.683 million.[6]

---

[4] CROWN HOLDINGS, INC., 2009 ANNUAL REPORT (FORM 10-K) iii, 51, 88, 96, 104 (Mar. 1, 2010) (annual reports are available online at http://investors.crowncork.com/phoenix.zhtml?c=85121&p=irol-reports, and Form 10-K filings are available at http://www.sec.gov/cgi-bin/browse-edgar?CIK=0001219601&action=getcompany).

[5] CROWN HOLDINGS, INC., 2003 ANNUAL REPORT (FORM 10-K) 9, 39 (Mar. 12, 2004) (the Company estimated that its probable and estimable liability for pending and future claims would range between $239 and $406 million). Crown's parent's 2009 Annual Report estimates future payments through 2019 of $230 million. CROWN HOLDINGS, INC., 2009 ANNUAL REPORT 13, 23, 64.

[6] Prior to 1998, amounts paid to claimants were covered by a fund of $80 million resulting from a 1985 settlement with carriers insuring Crown Cork through 1976, when Crown Cork became self-insured. CROWN HOLDINGS, INC., 2002 ANNUAL REPORT 15, 34 (Mar. 19, 2003).

At first, Crown did not contest its successor liability to the Robinsons for any compensatory damages; consequently, the trial court granted the Robinsons' motion for partial summary judgment on that issue. But about the same time, the Texas Legislature enacted Chapter 149 of the Texas Civil Practice and Remedies Code, which limits certain corporations' successor liability for asbestos claims.[7] Chapter 149 applies (with exceptions not relevant here) to "a domestic corporation or a foreign corporation that has . . . done business in this state and that is a successor which became a successor prior to May 13, 1968"[8] — a date by which, the Legislature appears to have thought, the dangers of asbestos should have been commonly known.[9] For a covered corporation (again with some exceptions not relevant here), "the cumulative successor asbestos-related liabilities . . . are limited to the fair market value of the total gross assets of the transferor determined as of the time of the merger or consolidation",[10] including "the aggregate coverage under any applicable liability

---

[7] Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 17.01, 2003 Tex. Gen. Laws 847, 892-896.

[8] TEX. CIV. PRAC. & REM. CODE § 149.002(a). "Successor" is defined as "a corporation that assumes or incurs, or has assumed or incurred, successor asbestos-related liabilities", *id*. § 149.001(4), defined broadly as "any liabilities, whether known or unknown, asserted or unasserted, absolute or contingent, accrued or unaccrued, liquidated or unliquidated, or due or to become due, that are related in any way to asbestos claims that were assumed or incurred by a corporation as a result of or in connection with a merger or consolidation", *id*. § 149.001(3). Asbestos claims include any claim for property damage or personal injury "wherever or whenever made, for damages, losses, indemnification, contribution, or other relief arising out of, based on, or in any way related to asbestos". *Id*. § 149.001(1).

[9] Although there was growing awareness of the dangers of exposure to asbestos before the mid-1960s, Dr. Irving J. Selikoff is widely credited with publicizing those dangers in his 1965 article, *The Occurrence of Pleural Calcification Among Asbestos Insulation Workers*, 132 ANN. N.Y. ACAD. OF SCI. 351 (1965). On May 13, 1968, the American Conference of Governmental Industrial Hygienists reduced the recommended workplace limit for asbestos in the air. This was, according to the legislative record, "[t]he earliest date after Selikoff's warnings when even a quasi-governmental organization in the United States suggested a tighter standard for asbestos in the workplace". H.J. of Tex., 78th Leg., R.S. 6044 (June 1, 2003) (statement of legislative intent by Rep. Nixon on amendments concerning successor asbestos-related civil liabilities arising from certain mergers) (Journal available at http://www.journals.house.state.tx.us/hjrnl/78r/html/home.htm).

[10] TEX. CIV. PRAC. & REM. CODE § 149.003(a).

insurance that was issued to the transferor . . . collectable to cover successor asbestos-related liabilities".[11] This cap does not apply to a successor that continued in the asbestos business after the consolidation or merger.[12] By restricting application of the cap to a corporation that had never engaged in selling asbestos products itself and had succeeded to another's liability for asbestos claims at a time when the extent of that liability was not fully appreciated, the supporters of Chapter 149 intended to protect only what they called the "innocent successor".

Chapter 149 contains a choice-of-law provision, making it applicable, "to the fullest extent permissible under the United States Constitution, . . . to the issue of successor asbestos-related liabilities" in Texas courts.[13] Furthermore, the Legislature made Chapter 149 applicable to all actions:

> (1) commenced on or after the effective date of this Act; or
>
> (2) pending on that effective date and in which the trial, or any new trial or retrial following motion, appeal, or otherwise, begins on or after that effective date.[14]

[12] *Id*. § 149.002(b)(5) ("The limitations in Section 149.003 shall not apply to . . . a successor that, after a merger or consolidation, continued in the business of mining asbestos or in the business of selling or distributing asbestos fibers or in the business of manufacturing, distributing, removing, or installing asbestos-containing products which were the same or substantially the same as those products previously manufactured, distributed, removed, or installed by the transferor . . . .").

[13] *Id*. § 149.006.

[14] Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 17.02, 2003 Tex. Gen. Laws 847, 895.

Because the Act of which Chapter 149 was part, House Bill 4, passed by more than a two-thirds vote in both the House and Senate,[15] it took effect immediately on approval by the Governor,[16] which occurred on June 11, 2003.

House Bill 4 was massive tort reform legislation, of which Chapter 149 was a very small piece — two pages of a 52-page bill.[17] Chapter 149 was not included in the bill as filed but was added when the bill came to the House floor by an amendment offered by the bill's sponsor. When asked which manufacturers "in particular" would be protected, the sponsor replied that he was "advised that there's one in Texas, Crown Cork and Seal".[18] Although House debate on the whole

[15] The vote in each chamber was well over two-thirds, 114 yeas to 32 nays in the House, H.J. of Tex., 78th Leg., R.S. 6041-6042 (June 1, 2003), and 27 yeas to 4 nays in the Senate, S.J. of Tex., 78th Leg., R.S. 5008 (June 1, 2003).

[16] TEX. CONST. art. III, § 39 ("No law passed by the Legislature, except the general appropriation act, shall take effect or go into force until ninety days after the adjournment of the session at which it was enacted, unless the Legislature shall, by a vote of two-thirds of all the members elected to each House, otherwise direct; said vote to be taken by yeas and nays, and entered upon the journals."). *See Mann v. Gulf States Utils. Co.*, 167 S.W.2d 557, 560 (Tex. Civ. App.–Austin 1942, writ ref'd) ("[W]here a statute is passed with the emergency clause by the required vote when approved by the Governor, it becomes effective and immediately operative.").

[17] Among other things, House Bill 4 limited attorney fees in class actions (§ 1.01), provided for an offer-of-judgment procedure that could result in the shifting of attorney fees and expenses (§ 2.01), created a multidistrict litigation panel and provided for the transfer of cases for consolidated and coordinated pretrial proceedings (§ 3.02), tightened venue statutes (§§ 3.03-.04), provided for joinder of responsible third parties (§ 4.04), revamped proportionate responsibility among joint tortfeasors (§§ 4.06-.07), restricted recovery in product liability cases (§§ 5.01-.02), limited the amounts required for supersedeas bonds (§ 7.02), rewrote statutes limiting health care liability claims (§ 10.01), limited the liability of volunteer fire fighters, teachers, and other government employees (§§ 11.01, 11.05, 15.02-.05, 19.01-.02), and further limited recovery of exemplary and noneconomic damages (§§ 13.02-.09). Act of June 2, 2003, 78th Leg., R.S., ch. 204, 2003 Tex. Gen. Laws 847.

[18] Debate on Tex. H.B. 4 on the Floor of the House, 78th Leg., R.S. (Mar. 25, 2003) (statement of Rep. Joe Nixon) (archived video available at http://www.house.state.tx.us/media/chamber/78.htm) (video time 5:04:24-40).

bill took days, debate on Chapter 149 lasted just over an hour.[19] Four unfriendly amendments,[20] one of which would have made Chapter 149 inapplicable to "successor asbestos-related liabilities that were assumed or incurred before [its] effective date",[21] all failed by wide margins. In the Senate, Chapter 149 was significantly revised but drew only one brief comment in that chamber, this observation by the committee chair as hearings commenced: "This, members, is the Crown Cork and Seal asbestos issue. What we have put in this bill is what I understand to be an agreed arrangement between all of the parties in this matter."[22]

No legislative findings or statement of purpose accompanied Chapter 149. But after the conference committee report on House Bill 4 was adopted in the House, the sponsor inserted a "statement of legislative intent" in the House Journal, which did not mention Crown and explained the policy basis for Chapter 149 as follows:

> A corporation is currently liable up to its total value for all injuries it causes. If that corporation merges with a much larger corporation, however, the successor corporation is liable for the injuries caused by its predecessor (even though not caused in any way by the successor) up to the successor's much higher value. In the case of long-tailed and unknown asbestos-related liabilities, a much larger successor

Comm. on State Affairs) (archived video available at http://www.senate.state.tx.us/avarchive/ and http://www.senate.state.tx.us/75r/Senate/commit/c570/c570_78.htm) (video time 19:00- 19:23)).

> can easily be bankrupted by the asbestos-related liabilities it innocently received from a much smaller predecessor with which it merged [many] decades ago.
>
> To eliminate that unfairness — and even to save successor corporations from bankruptcy — some have proposed a new rule limiting liability especially for asbestos-related successor liabilities acquired solely through a merger. The successor would be liable only up to the entire gross asset value of the predecessor from whom it received the asbestos-related liabilities.[23]

The statement described Chapter 149 as a "new concept" that was being tested "by taking one step at a time and providing realistic relief to those innocent successor corporations most at peril financially without limiting every type of asbestos liability."[24] According to the statement, Chapter 149's restrictions had been crafted to ensure that "the benefits of this legislation should be limited . . . to those successor corporations who were the most innocent about the potential hazards of asbestos" and "were also at the greatest financial peril, especially those threatened with bankruptcy".[25]

Crown promptly moved for summary judgment under the new law, requesting that the prior order establishing its successor liability to the Robinsons be vacated and that their claims for asbestos exposure be dismissed. Crown asserted that the summary judgment evidence established that its merger with Mundet occurred before May 13, 1968, that it had never engaged in Mundet's insulation business, and that its successor asbestos-related liabilities, already more than $413 million, greatly exceeded the fair market value of Mundet's total gross assets determined as required by the

[24] *Id*. at 6043.

[25] *Id*.

statute[26] — about $15 million in 1966 (some $57 million in 2003 dollars). Thus, Crown contended, Chapter 149 barred the Robinsons from recovering on their claims. In response, the Robinsons argued that the record did not establish the applicability of Chapter 149,[27] or if it did, the statute violated several provisions of the Texas Constitution.[28]

The trial court granted Crown's motion. Days later, John Robinson died.[29] Barbara Robinson amended her petition to assert statutory wrongful death[30] and survival actions[31] against Crown and the other defendants still remaining in the case. (Several defendants had settled for amounts totaling $859,067 and been dismissed.) Without addressing these statutory actions, Crown moved to sever the summary judgment to make it final and appealable,[32] and the trial court granted the motion. The court also stayed proceedings in Robinson's case against the other defendants.

---

[26] *See* TEX. CIV. PRAC. & REM. CODE § 149.004.

[27] The Robinsons disputed Crown's valuation of Mundet's total gross assets and, as noted above, Crown's assertion that Mundet had ceased its insulation business before Crown acquired its stock, so that Crown never engaged in that business, even as Mundet's majority stockholder. Robinson raised the latter argument in the court of appeals. 251 S.W.3d at 539-540. Robinson does not make either argument in this Court.

[28] The Robinsons argued that Chapter 149 as applied violates Texas Constitution art. I, § 13 ("All courts shall be open, and every person for an injury done him . . . shall have remedy by due course of law."); art. I, § 16 ("No . . . retroactive law, or any law impairing the obligation of contracts, shall be made."); art. I, § 17 ("No person's property shall be taken . . . without adequate compensation . . . ."); art. I, § 19 ("No citizen of this State shall be deprived of . . . property . . . except by the due course of the law . . . ."); and art. III, § 56 ("The Legislature shall not . . . pass any . . . special law . . . .").

[29] After John died, Robinson asserted the additional argument on motion for new trial that Chapter 149 violated art. XVI, § 26 of the Texas Constitution ("Every . . . corporation . . . that may commit a homicide, through wilful act, or omission, or gross neglect, shall be responsible, in exemplary damages, to the surviving . . . widow . . . .").

[30] *See* TEX. CIV. PRAC. & REM. CODE §§ 71.002, 71.009.

[31] *See id*. § 71.021.

[32] The Robinsons had asserted claims against Crown that were not disposed of by the summary judgment, but they were later nonsuited and dismissed.

On appeal, Robinson contends that Chapter 149 is a retroactive law prohibited by article I, section 16 of the Texas Constitution. The law is well-settled, she asserts, that the Legislature has no authority to extinguish vested rights, and that her accrued cause of action against Crown is a vested right. A majority of the court of appeals did not "find the law on vested rights to be as consistent and lucid as Mrs. Robinson claims"[33] and concluded that it provides "no clear answer" to whether Chapter 149 is an invalid retroactive law.[34] Relying on this Court's decision in *Barshop v. Medina County Underground Water Conservation District*,[35] the court decided that whether a law is unconstitutionally retroactive depends not on whether it infringes upon a vested right but on whether it is a "'valid exercise of the police power by the Legislature to safeguard the public safety and welfare'".[36] Whether an exercise of the police power is valid, the court of appeals determined, depends on

> (1) whether the act is appropriate and reasonably necessary to accomplish a purpose within the scope of the police power, and (2) whether the ordinance is reasonable by not being arbitrary and unjust or whether the effect on individuals is unduly harsh so that it is out of proportion to the end sought to be accomplished.[37]

The court found that "the purpose for which [Chapter 149] was enacted — the financial viability of the State and businesses in the State — is a valid exercise of police power."[38] The court

[35] 925 S.W.2d 618 (Tex. 1996).

[36] 251 S.W.3d at 523 (quoting *Barshop*, 925 S.W.2d at 633-634).

[37] *Id*. at 532.

[38] *Id*.

further found that the restrictions in the statute left "the pool of potential defendants as large as possible for claimants having valid claims for damages resulting from asbestos products",[39] thereby limiting the "detrimental impact on plaintiffs such as the Robinson so that [it] was not out of proportion to the end sought".[40] Concluding that deference must be given to the Legislature in the exercise of its police power, the court held that Chapter 149 is not unconstitutionally retroactive because it is "(1) within the Legislature's police power and (2) narrowly tailored (a) to protect the most innocent corporations hard hit by asbestos litigation but (b) to leave the potential pool of asbestos defendants as large as possible."[41] Accordingly, the court affirmed the summary judgment.[42]

The dissent disagreed with the majority's approach to assessing unconstitutionality. It argued that "the Legislature has no police power to enact retroactive laws in violation of section 16", even if reasonably exercised.[43] *Barshop* notwithstanding, the dissent insisted, "the weight of precedent . . . requires the use of the vested-rights analysis."[44] The dissent contended that "an accrued cause

---

[39] *Id*. at 532-533.

[40] *Id*. at 532.

[41] *Id*. at 533.

[42] 251 S.W.3d at 541. The court rejected Robinson's other two arguments, that Chapter 149 is a special law prohibited by article III, section 56 of the Texas Constitution, and that Crown has not established the factual predicate for applying Chapter 149 in this case. *Id*. at 535-540. Robinson makes the former argument in this Court, but we do not reach it.

[43] *Id*. at 541.

[44] *Id*.

of action is a vested right",[45] rejecting some caselaw that "an accrued claim is not vested until it is reduced to a judgment final by appeal".[46] Thus, the dissent reasoned, "[b]ecause Mrs. Robinson's claims accrued and were pending in the trial court when [Chapter 149] took effect, Mrs. Robinson held vested rights in these claims that could not be destroyed",[47] irrespective of the fact that Chapter 149 "does not bar all of Mrs. Robinson's remedy for the claimed injuries because she can sue other companies not protected".[48] Without assessing the reasonableness of the Legislature's action, the dissent concluded that Chapter 149 is unconstitutionally retroactive because the "Legislature created a new substantive defense to successor liability and made it immediately effective in all pending cases, destroying Mrs. Robinson's vested rights in her accrued tort claims against Crown".[49]

We granted Robinson's petition for review.[50] Another court of appeals, also divided, has since reached the opposite result from the court of appeals in this case.[51]

II

As a threshold matter, it is important to note the precise issue before us. The Robinsons' pleading on which Crown moved for summary judgment asserted common-law causes of action for

---

[45] *Id*. at 549.

[46] *Id*. at 550.

[47] *Id*.

[48] 251 S.W.3d at 550.

[49] *Id*. at 551.

[50] 51 Tex. Sup. Ct. J. 292 (Jan. 11, 2008).

[51] *Satterfield v. Crown Cork & Seal Co.*, 268 S.W.3d 190 (Tex. App.–Austin 2008, no pet.).

negligence and strict liability, and claimed compensatory and punitive damages.[52] For herself, Barbara claimed damages for John's medical expenses that she had incurred, as well as her loss of consortium and mental anguish, and punitive damages. Had John lived, the summary judgment would have disposed of all the Robinsons' claims against Crown.

But John died a few days after summary judgment was granted, and Robinson amended her petition to add statutory wrongful death and survival actions. The record does not reflect that Crown moved for summary judgment on Robinson's statutory claims, or that the trial court ever disposed of them specifically. The trial court and parties appear to have assumed, correctly, that the summary judgment was nevertheless final because Robinson's statutory claims are wholly derivative of John's common-law claims, and the adjudication of the latter effectively disposed of the former.[53]

But even though the summary judgment was final, an analysis of the retroactive effect of Chapter 149 on common-law claims and statutory claims presents different considerations. As we discuss more fully below, Crown argues that in determining whether the constitutional prohibition against retroactive laws applies in this case, it is significant that successor liability is a creature of statute. The same argument could be made to Robinson's wrongful death and survival claims,

---

[52] The Robinsons also asserted a claim for conspiracy, but it was later nonsuited.

[53] *Russell v. Ingersoll-Rand Co.,* 841 S.W.2d 343, 345-346 (Tex. 1992) ("The survival action, as it is sometimes called, is wholly derivative of the decedent's rights. The actionable wrong is that which the decedent suffered before his death. The damages recoverable are those which he himself sustained while he was alive and not any damages claimed independently by the survival action plaintiffs (except that funeral expenses may also be recovered if they were not awarded in a wrongful death action). Any recovery obtained flows to those who would have received it had he obtained it immediately prior to his death — that is, his heirs, legal representatives and estate. Defenses that could have been raised against a claim by the injured person may also be raised against the same claim asserted by the person's heirs and estate. . . . Wrongful death actions are also derivative of the decedent's rights." (citing TEX. CIV. PRAC. & REM. CODE § 71.003(a) ("This subchapter [creating a wrongful death cause of action] applies only if the individual injured would have been entitled to bring an action for the injury if the individual had lived or had been born alive.") (other citations omitted)).

though not to the common-law claims the Robinsons previously asserted. Also, Robinson argues that it is important for our constitutional analysis that the common-law claims barred by Chapter 149 had both accrued and were the subject of a pending lawsuit before the statute was enacted. But neither is true of her statutory claims.

The parties have not briefed — or even mentioned — any of these issues but have confined their arguments regarding whether Chapter 149 is an unconstitutionality retroactive law as applied to the common-law claims the Robinsons asserted before John's death, which were adjudicated by summary judgment. These arguments are the only ones we address. We intimate no view on whether Chapter 149 limits Robinson's statutory wrongful death and survival claims except insofar as they are derivative of the claims specifically adjudicated by the trial court.

III

Before we can decide whether Chapter 149 is unconstitutionally retroactive, we must first resolve the parties' dispute over the proper standards to be applied in making that determination. Robinson, like the dissenting opinion in the court of appeals, argues that the test is simply whether vested rights have been impaired, period; if so, the law is prohibited, regardless of the Legislature's reasons for enacting it. Crown counters that the majority opinion in the court of appeals was correct in focusing instead on the reasonableness of the Legislature's exercise of its police power; the prohibition against retroactive laws does not invalidate a proper exercise of that power despite its impairment of private rights.[54] As each position finds support in our case law, we begin by returning

[54] The following have submitted amicus curiae briefs in support of Crown: the State of Texas, Texas Civil Justice League, American Tort Reform Association, National Federation of Independent Business Legal Foundation, Chamber of Commerce of the United States of America, National Association of Manufacturers, Property Casualty

to first principles. We conclude that the history and purpose of the constitutional provision require a fuller statement of its proper application than we have previously given.

A

There exists in this country, as the United States Supreme Court observed in *Landgraf v. USI Film Products*, a "presumption against retroactive legislation [that] is deeply rooted in our jurisprudence[] and embodies a legal doctrine centuries older than our Republic. . . . [T]he 'principle that the legal effect of conduct should ordinarily be assessed under the law that existed when the conduct took place has timeless and universal human appeal.'"[55] In a concurring opinion in an earlier case, Justice Scalia noted that this principle

> was recognized by the Greeks, by the Romans, by English common law, and by the Code Napoleon. It has long been a solid foundation of American law. . . . Justice Story said that "retrospective laws are . . . generally unjust; and . . . neither accord with sound legislation nor with the fundamental principles of the social compact."[56]

The United States Constitution does not expressly prohibit retroactive laws, but "the antiretroactivity principle finds expression" in its prohibitions of bills of attainder, ex post facto laws, and state laws impairing the obligation of contracts.[57] The thrust of each is easily stated:

Insurers Association of America, American Chemistry Council, National Association of Mutual Insurance Companies, 3M Company, Texans for Lawsuit Reform, and Product Liability Advisory Council, Inc.

[55] 511 U.S. 244, 265 (1994) (quoting *Kaiser Aluminum & Chem. Corp. v. Bonjorno*, 494 U.S. 827, 855 (1990) (Scalia, J., concurring)).

[56] *Kaiser*, 494 U.S. at 855-856 (Scalia, J., concurring) (citations omitted).

[57] *Landgraf*, 511 U.S. at 266; *see also* U.S. CONST. art. I, § 9, cl. 3 ("No Bill of Attainder or ex post facto Law shall be passed."); *id*. art. I, § 10, cl. 1 ("No State shall . . . pass any Bill of Attainder, ex post facto Law, or Law impairing the Obligation of Contracts . . . ."); *U.S. Trust Co. of N.Y. v. N.J.*, 431 U.S. 1, 17 n.13 (1977) ("The Due Process Clause of the Fourteenth Amendment generally does not prohibit retrospective civil legislation, unless the consequences are particularly harsh and oppressive." (internal quotation marks omitted)).

> The *Ex Post Facto* Clause flatly prohibits retroactive application of penal legislation. . . . States [are prohibited] from passing another type of retroactive legislation, laws "impairing the Obligation of Contracts." . . . The prohibitions on "Bills of Attainder" in Art. 1 §§ 9-10, prohibit legislatures from singling out disfavored persons and meting out summary punishment for past conduct.[58]

But the application of each prohibition must be measured by the object to be obtained. Thus, while the bill of attainder originated as an English parliamentary act sentencing to death someone who had attempted to overthrow the government,[59]

> the proper scope of the Bill of Attainder Clause, and its relevance to contemporary problems, must ultimately be sought by attempting to discern the reasons for its inclusion in the Constitution, and the evils it was designed to eliminate. The . . . Bill of Attainder Clause was intended not as a narrow, technical (and therefore soon to be outmoded) prohibition, but rather as an implementation of the separation of powers, a general safeguard against legislative exercise of the judicial function, or more simply — trial by legislature.[60]

With respect to ex post facto laws:

> The prohibition, in the letter, is not to pass any law concerning, and after the fact; but the plain and obvious meaning and intention of the prohibition is this; that the Legislatures of the several states, shall not pass laws, after a fact done by a subject, or citizen, which shall have relation to such fact, and shall punish him for having done it.[61]

And as for the prohibition against laws impairing contract obligations, Chief Justice Marshall observed:

> Taken in its broad, unlimited sense, the clause would be an unprofitable and vexatious interference with the internal concerns of a State, would unnecessarily and

> unwisely embarrass its legislation, and render immutable those civil institutions, which are established for purposes of internal government, and which, to subserve those purposes, ought to vary with varying circumstances. That as the framers of the constitution could never have intended to insert in that instrument, a provision so unnecessary, so mischievous, and so repugnant to its general spirit, the term "*contract*" must be understood in a more limited sense. That it must be understood as intended to guard against a power of at least doubtful utility, the abuse of which had been extensively felt; and to restrain the legislature in future from violating the right to property. That anterior to the formation of the constitution, a course of legislation had prevailed in many, if not in all, of the States, which weakened the confidence of man in man, and embarrassed all transactions between individuals, by dispensing with a faithful performance of engagements. To correct this mischief, by restraining the power which produced it, the State legislatures were forbidden "to pass any law impairing the obligation of contracts," that is, of contracts respecting property, under which some individual could claim a right to something beneficial to himself; and that, since the clause in the constitution must in construction receive some limitation, it may be confined, and ought to be confined, to cases of this description; to cases within the mischief it was intended to remedy.[62]

Texas Constitutions have contained these provisions as well as a general prohibition against retroactive or retrospective laws.[63] This prohibition against retroactive laws, like other constitutional bars, must be governed by its purpose, for "retroactive" simply means "[e]xtending in scope or effect

---

[62] *Trs. of Dartmouth Coll. v. Woodward*, 17 U.S. (4 Wheat.) 518, 628-629 (1819); *see U.S. Trust Co. of N.Y. v. N.J.*, 431 U.S. 1, 21 (1977) ("Although the Contract Clause appears literally to proscribe 'any' impairment, . . . 'the prohibition is not an absolute one and is not to be read with literal exactness like a mathematical formula.'" (quoting *Home Bldg. & Loan Ass'n v. Blaisdell*, 290 U.S. 398, 428 (1934))).

[63] TEX. CONST. art. I, § 16 ("No bill of attainder, ex post facto law, retroactive law, or any law impairing the obligation of contracts shall be made."); TEX. CONST. OF 1869, art. I, § 14 ("No bill of attainder, ex post facto law, retroactive law, or any law impairing the obligation of contracts, shall be made; . . . nor shall any law be passed depriving a party of any remedy for the enforcement of a contract, which existed when the contract was made."); TEX. CONST. OF 1866, art. I, § 14 ("No bill of attainder, ex post facto law, retroactive law, or any law impairing the obligation of contracts, shall be made . . . ."); TEX. CONST. OF 1861, art. I, § 14 (same); TEX. CONST. OF 1845, art. I, § 14 (same); REPUB. TEX. CONST. OF 1836, DEC. OF RIGHTS § 16 ("No retrospective or ex post facto law, or laws impairing the obligations of contracts shall be made."). In the 1845 Constitutional Convention, the prohibition against retrospective laws was omitted from the first draft of the Bill of Rights, JOURNAL OF THE CONSTITUTIONAL CONVENTION OF TEXAS 34 (1845), but one against retroactive laws was inserted just before final passage by floor amendment by Thomas Jefferson Rusk, formerly Chief Justice of the Supreme Court of Texas, *id*. at 264.

to matters which have occurred in the past; retrospective",[64] and "retrospective", even more simply, means "[d]irected to, contemplative of, past time".[65] In our first case construing the retroactivity clause, *DeCordova v. City of Galveston*, Chief Justice Hemphill cautioned that applying this prohibition without regard to the objects to be achieved would have

> a latitude of signification, which would embarrass legislation on existing or past rights and matters, to such an extent as to create inextricable difficulties, and, in fact, to demonstrate that it was incapable of practical application. A retrospective law literally means a law which looks backwards, or on things that are past; or if it be taken to be the same as retroactive, it means to act on things that are past. If it be understood in its literal meaning, without regard to the intent, then all laws, having an effect on past transactions or matters, or by which the slightest modification may be made of the remedy for the recovery of rights accrued, or the redress of wrongs done, are prohibited equally with those which divest rights, impair the obligation of a contract, or make an act, innocent at the time it was done, subsequently punishable as an offence.[66]

The constitutional prohibition was not intended to operate so indiscriminately. "Mere retroactivity is not sufficient to invalidate a statute. . . . Most statutes operate to change existing conditions, and it is not every retroactive law that is unconstitutional."[67]

The presumption against retroactivity has two fundamental objectives identified by the Supreme Court in *Landgraf*. First, it protects the people's reasonable, settled expectations.

> Elementary considerations of fairness dictate that individuals should have an opportunity to know what the law is and to conform their conduct accordingly;

> settled expectations should not be lightly disrupted. . . . In a free, dynamic society, creativity in both commercial and artistic endeavors is fostered by a rule of law that gives people confidence about the legal consequences of their actions.[68]

In other words, the rules should not change after the game has been played. Second, the presumption against retroactivity protects against abuses of legislative power.

> The Legislature's unmatched powers allow it to sweep away settled expectations suddenly and without individualized consideration. Its responsivity to political pressures poses a risk that it may be tempted to use retroactive legislation as a means of retribution against unpopular groups or individuals.[69]

As James Madison argued, "retroactive legislation also offer[s] special opportunities for the powerful to obtain special and improper legislative benefits."[70]

Still, not all retroactive legislation is bad. *Landgraf* also notes:

> Retroactivity provisions often serve entirely benign and legitimate purposes, whether to respond to emergencies, to correct mistakes, to prevent circumvention of a new statute in the interval immediately preceding its passage, or simply to give comprehensive effect to a new law Congress considers salutary.[71]

Constitutional provisions limiting retroactive legislation must therefore be applied to achieve their intended objectives — protecting settled expectations and preventing abuse of legislative power.

B

In *DeCordova*, Chief Justice Hemphill wrote that "[l]aws are deemed retrospective and within the constitutional prohibition, which by retrospective operation, destroy or impair, vested

rights".[72] For this formulation of the prohibition, he, like many judges since, cited Justice Story's statement in *Society for the Propagation of the Gospel v. Wheeler*, applying the New Hampshire constitution's prohibition against retroactive laws:

> [E]very statute, which takes away or impairs vested rights acquired under existing laws, or creates a new obligation, imposes a new duty, or attaches a new disability, in respect to transactions or considerations already past, must be deemed retrospective . . . .[73]

But as both cases explained, "impairs vested rights" has special meaning. "[A] statute merely regulating a remedy," Justice Story added, "and prescribing the mode and time of proceeding" does not impair vested rights.[74] Chief Justice Hemphill agreed,

> unless the remedy be taken away altogether, or encumbered with conditions that would render it useless or impracticable to pursue it. Or, if the provisions regulating the remedy, be so unreasonable as to amount to a denial of right, as, for instance, if a statute of limitations, applied to existing causes, barred all remedy or did not afford a reasonable period for their prosecution; or if an attempt were made by law, either by implication or expressly, to revive causes of action already barred; such legislation would be retrospective within the intent of the prohibition, and would therefore be wholly inoperative.[75]

In other words, in applying the prohibition against retroactivity, a law that impairs a remedy does not impair a right, except sometimes. On further reflection, this Court conceded more than a century

later: "Remedies are the life of rights. While our precedents recognize and apply the distinction [between a remedy and a right], they also recognize that the two terms are often inseparable."[76]

The obscurity in the right/remedy distinction typifies the problems in using "impairs vested rights" as a test for unconstitutional retroactivity, as our cases illustrate. In *DeCordova*, we held that a statute of limitations on suits for debt enacted after the defendant executed notes payable to the plaintiff but before they matured merely limited the plaintiff's collection remedy and therefore was not unconstitutionally retroactive.[77] The idea that the debt had not been extinguished, only the means of collection, might be viewed by most creditors as a distinction without a difference. But the Court reasoned that the absence of a statute of limitations when the notes were executed did not give the plaintiff a vested right to sue forever. In *Texas Water Rights Commission v. Wright*, we upheld a statute authorizing forfeiture of a water permit after ten years of non-use, concluding that permit holders could reasonably expect enforcement of the "conditions inherently attached" to their permit, and that a permit included no right to be forever free of a remedy to enforce those conditions.[78] Moreover, a retroactive use requirement was valid for the State "to assert and protect its own rights and interests in the water."[79] In *City of Tyler v. Likes*, we held that a statute reclassifying a city's proprietary functions as governmental, thereby limiting liability, affected only a remedy, not a right,

[79] *Id*.

even though a claimant would recover less or perhaps not at all.[80] And in *In re A.D.*, we held that a statute removing the limitations period for enforcing child support decrees by ordering withholding of wages affected only a remedy, even though it expanded enforcement of the debt.[81]

In each of these cases, significant interests were adversely impacted by changes in the law, yet the Court held that vested rights were not impaired. The results of the cases seem entirely reasonable in a very general sense, although the claimants in the cases doubtless had a different view, but it is not clear how they were driven by a concern for protecting vested rights. In a recent case, *Owens Corning v. Carter*, we did not mention the right/remedy distinction in upholding a law that required application of the statute of limitations of the plaintiff's state of residence, even though doing so barred pending actions in Texas courts.[82] We simply held that for a plaintiff who has not sued within the time permitted by the state in which he resides and in which the cause of action arose, barring suit in Texas "is not inequitable".[83] Nevertheless, the plaintiff in a pending case had a viable claim that the change in the law extinguished.

In three of these five cases, *DeCordova*, *Wright*, and *Likes*, it was important that, as it happened, the people involved had ample opportunity after the change in the law to protect their

interests: four years to sue in *DeCordova*,[84] seven years to resume pumping water in *Wright*,[85] and two months to sue in *Likes*.[86] But in the other two cases, *A.D.* and *Owens Corning*, the persons affected by changes in the law had no time to respond. We have since held that a change in the law need not provide a grace period to prevent an impairment of vested rights.[87]

"Statutes of limitations are procedural",[88] but sometimes a change may impair vested rights. In 1887, we stated in *Mellinger v. City of Houston* that when a law "shall operate in favor of a defendant as a defense against a claim made against him, then it must be said that a right exists, has become fixed or vested, and is beyond the reach of retroactive legislation".[89] Thus, we said, a law extending a limitations period so as to resurrect barred claims would be unconstitutionally retroactive. But only two years earlier the United States Supreme Court had held in *Campbell v. Holt* that just such a law reviving claims did not offend due process under the United States Constitution because "no right is destroyed when the law restores a remedy which had been lost."[90] *Campbell*

---

[84] The plaintiff sued on three promissory notes, all executed in 1840, and maturing in 1842, 1843, and 1844, respectively. The statute of limitations was passed in 1841, and the plaintiff did not sue until 1849. *DeCordova*, 4 Tex. at 470-471.

[85] The plaintiffs held permits issued in 1918 and 1928, but they stopped pumping water in 1954. The forfeiture statute was enacted in 1957, and forfeiture was not sought until 1967. *Wright*, 464 S.W.2d at 644.

[86] The plaintiff had seventeen months to sue before the statute was enacted and two months to sue after it was enacted and before it took effect. *Likes*, 962 S.W.2d at 502.

arose out of Texas, and the Supreme Court cited this Court's 1870 decision in *Bender v. Crawford*,[91] which held that a retroactive suspension of limitations statutes during the aftermath of the Civil War was not a prohibited retroactive law, even though claims that would have been barred were not.[92] *Mellinger* cited *Campbell*, and "not wish[ing] to be understood as questioning its correctness", distinguished the due process guarantees in the state and federal constitutions from the prohibition of retroactive laws.[93] But while due process and antiretroactivity may protect vested rights differently, *Mellinger* did not explain why a limitations bar is a vested right in one context but not in the other. In other words, a law that is prohibitively retroactive might not also offend due process, but not because a vested right for one is not a vested right for the other. Nor did *Mellinger* cite *Bender*.

A generation later, we held in *Wilson v. Work* that "it is the settled law that, after a cause has become barred by the statute of limitation, the defendant has a vested right to rely on such statute as a defense."[94] We repeated that view more recently in *Baker Hughes, Inc. v. Keco R. & D., Inc.*[95] The earlier confusion may be attributable to the time in which the issues arose. *Bender* offered this insight:

> [T]hey who talk about vested rights in the bar of limitations should at least remember the times in which we have been living; and those who think our constitution is not

> republican, nor in accordance with the great republican conception of our institutions, should remember that from the second of March, 1861, to the twenty-ninth of March, 1870, we had no republican government in Texas. Four years of that period were one of bloody and unrelenting war. From 1865 to 1870 we were a military government; he who gained a vested right in the statute of limitations during at least a portion of that period, gained it only because *inter arma leges silent.* Vultures and wolves gain vested rights when armies are slaughtered, if these *be* vested rights.[96]

Bender dared to speak plainly: there are vested rights and then there are vested rights, and not all laws which may fairly be said to retroactively impair vested rights are constitutionally prohibited. The problem is not confined to the aftermath of the Civil War. Many years ago, one commentator lamented:

> One's first impulse on undertaking to discuss retroactive laws and vested rights is to define a vested right. But when it appears, as soon happens, that this is impossible, one decides to fix the attention upon retroactive laws and leave the matter of definition to follow rather than precede the discussion, assuming for the purpose that a right is vested when it is immune to destruction, and that it is not vested when it is liable to destruction, by retroactive legislation. The simplification of the task which this plan seems to involve, turns out to be something of an illusion, however, when it appears, as also soon happens, that one's preconceived notions of retroactive laws are irreconcilable with the data with which one has to deal.[97]

What constitutes an impairment of vested rights is too much in the eye of the beholder to serve as a test for unconstitutional retroactivity.

This can hardly be more vividly demonstrated than in today's opinions by JUSTICE WAINWRIGHT and JUSTICE MEDINA. The arguments and authorities ably marshaled in each show a deep division over whether a retroactive restriction on a cause of action impairs vested rights. Of course it does, if a claim, no matter how flimsy, is a vested right; or not, if a claim, even a strong one,

---

[96] *Bender*, 33 Tex. at 759.

[97] Bryant Smith, *Retroactive Laws and Vested Rights,* 5 TEX. L. REV. 231, 231 (1927) (footnote omitted).

must be reduced to judgment before it becomes a vested right. The dispute over whether to call something a vested right appears driven not so much by what the words mean as by the consequence of applying the label — that its impairment is prohibited. Or as one commentator has put it: "it has long been recognized that the term 'vested right' is conclusory — a right is vested when it has been so far perfected that it cannot be taken away by statute."[98] The "impairs vested rights" test thus comes down to this: a law is unconstitutionally retroactive if it takes away what should not be taken away.

C

In two cases this Court has held that retroactive laws were not constitutionally prohibited, despite their impairment of vested rights, because they were each a valid exercise of the Legislature's police power. The first, *Barshop v. Medina County Underground Water Conservation District*,[99] involved a facial challenge to the Edwards Aquifer Act.[100] Before the Act, withdrawal of groundwater from the Aquifer was unrestricted. The Act created an Authority to regulate groundwater withdrawals, capped annual withdrawals, required that wells be operated under permits, gave preference to existing users, and restricted withdrawals under a permit based on the owner's historic use.[101] The Act operated retroactively in basing the right to groundwater on historic use and gave landowners no opportunity to preserve their prior right to unlimited water, but we stated that

[101] *Barshop*, 925 S.W.2d at 624.

"article I, section 16 does not absolutely bar the Legislature from enacting such statutes."[102] Acknowledging that "retroactive laws affecting vested rights that are legally recognized or secured are invalid",[103] we nevertheless held that "[a] valid exercise of the police power by the Legislature to safeguard the public safety and welfare can prevail over a finding that a law is unconstitutionally retroactive."[104] The Legislature had included in the Act findings that the Authority was necessary "'to protect terrestrial and aquatic life, domestic and municipal water supplies, the operation of existing industries, and the economic development of the state'"[105] and that "the aquifer was 'vital to the general economy and welfare of this state.'"[106] "Based on these legislative findings," we concluded that the Act was "necessary to safeguard the public welfare of the citizens of this state" and therefore the Act's retroactive effect did not "render it unconstitutional" on its face.[107]

The second case, *In re A.V.*,[108] involved section 161.001 of the Texas Family Code, which lists several grounds for terminating parental rights. An amendment had added subsection (1)(Q) to the list, thus providing for termination when a parent "has knowingly engaged in criminal conduct for which the parent is incarcerated and unable to care for the child 'for not less than two years from

the date of filing the petition'".[109] The issue was whether the amendment was unconstitutionally retroactive as applied to a parent convicted before it was enacted. The amendment, we noted, was primarily prospective, focusing on "the parent's future imprisonment and inability to care for the child, not the criminal conduct that the parent committed in the past."[110] But to the extent the amendment had a retroactive effect, we held it was not unconstitutional. Recognizing that "a parent's constitutionally-protected relationship with his or her children [is] a right that presumably cannot be altered through retroactive application of law",[111] we stated, quoting *Barshop*, that a "'valid exercise of the police power by the Legislature to safeguard the public safety and welfare' is a recognized exception to the unconstitutionality of retroactive laws."[112] Given the Legislature's declaration that "'[t]he public policy of this state [is to] provide a safe, stable, and nonviolent environment for the child'", we concluded that public policy justified the statute's retroactive effect.[113] Furthermore, we said, "[a] law that does not upset a person's settled expectations in reasonable reliance upon the law is not unconstitutionally retroactive."[114] In our view, a person "could not reasonably expect that the State would not act to provide a safe environment for his children while he was imprisoned."[115]

Robinson does not argue that *Barshop* and *A.V.* were wrongly decided but nevertheless insists that the test for unconstitutional retroactivity is not whether a law is a reasonable exercise of the Legislature's police power but whether it impairs vested rights. In her view, rights may be "vested for different purposes depending on the context",[116] thereby affecting the constitutional provision's operation, and thus prohibiting retroactive laws limiting liability for asbestos claims but not laws preserving groundwater and protecting children. Stated differently: the right to sue is protected from retroactive impairment while the rights to groundwater or one's children are not. One might view this as backwards, that a parent's right to a child, which is "fundamental",[117] "'one of constitutional dimensions'",[118] and "'far more precious than any property right'",[119] would be more deserving of protection from impairment by retroactive laws than a claim of injury that might not even result in recovery. But regardless of the three rights' relative importance, Robinson's argument that they are somehow vested differently for purposes of determining unconstitutional retroactivity establishes the fundamental failure of the "impairs vested rights" test.

We agree with Robinson, however, that *Barshop* and *A.V.* do not except a retroactive law from the constitutional prohibition merely because there was a rational basis for its enactment, or even because, on balance, it is likely to do more good than harm. The Legislature found the water-

[116] Petitioner's Reply Brief at 15.

[117] *In re Chambless*, 257 S.W.3d 698, 700 (Tex. 2008) (citing *Troxel v. Granville*, 530 U.S. 57, 65 (2000) (plurality opinion)).

[118] *Sw. Bell Tel. Co. v. Garza*, 164 S.W.3d 607, 622 (Tex. 2004) (quoting *Wiley v. Spratlan*, 543 S.W.2d 349, 352 (Tex. 1976)).

[119] *In re M.S.*, 115 S.W.3d 534, 547 (Tex. 2003) (quoting *Santosky v. Kramer*, 455 U.S. 745, 758-759 (1982)).

permitting scheme established in the Edwards Aquifer Act to be necessary to discharge its constitutional duty to conserve groundwater,[120] and the necessity of providing for the welfare of children of incarcerated convicts is too obvious to require justification. But necessity alone cannot justify a retroactive law. The retroactive laws in *Barshop* and *A.V.* were not unconstitutional because they did not defeat the objectives of the constitutional prohibition. There can be no settled expectation that a limited resource like groundwater, affected by public and private interests, will not require allocation, or that a person unable to care for his children has greater rights if his inability is due to prolonged incarceration than for other reasons. And in both cases, the Legislature acted for the general public good.

D

We think our cases establish that the constitutional prohibition against retroactive laws does not insulate every vested right from impairment, nor does it give way to every reasonable exercise of the Legislature's police power; it protects settled expectations that rules are to govern the play and not simply the score, and prevents the abuses of legislative power that arise when individuals or groups are singled out for special reward or punishment. No bright-line test for unconstitutional retroactivity is possible. Rather, in determining whether a statute violates the prohibition against retroactive laws in article I, section 16 of the Texas Constitution, courts must consider three factors in light of the prohibition's dual objectives: the nature and strength of the public interest served by

[120] TEX. CONST. art. XVI, § 59 ("The conservation and development of all of the natural resources of this State . . . [is] hereby declared [a] public right[] and dut[y]; and the Legislature shall pass all such laws as may be appropriate thereto.").

the statute as evidenced by the Legislature's factual findings; the nature of the prior right impaired by the statute; and the extent of the impairment.[121] The perceived public advantage of a retroactive law is not simply to be balanced against its relatively small impact on private interests, or the prohibition would be deprived of most of its force. There must be a compelling public interest to overcome the heavy presumption against retroactive laws. To be sure, courts must be mindful that statutes are not to be set aside lightly. This Court has invalidated statutes as prohibitively retroactive in only three cases, all involving extensions of statutes of limitations.[122] But courts must also be careful to enforce the constitutional prohibition to safeguard its objectives.

Under this test, changes in the law that merely affect remedies or procedure, or that otherwise have little impact on prior rights, are usually not unconstitutionally retroactive. But these consequences of the proper application of the prohibition cannot substitute for the test itself. The results in all of our cases applying the constitutional provision would be the same under this test. The cases that considered only whether the challenged statute impaired vested rights implicitly concluded that any impairment did not upend settled expectations and was overcome by the public interest served by the enactment of the statute. And the cases that focused on the propriety of the

---

[121] *See* Charles B. Hochman, *The Supreme Court and the Constitutionality of Retroactive Legislation*, 73 HARV. L. REV. 692, 697 (1960) ("[T]he constitutionality of [a retroactive] statute is determined by three major factors, each of which must be weighed in any particular case. These factors are: the nature and strength of the public interest served by the statute, the extent to which the statute modifies or abrogates the asserted preenactment right, and the nature of the right which the statute alters."); *see also Owen Lumber Co. v. Chartrand*, 73 P.3d 753, 755 (Kan. 2003); *Peterson v. City of Minneapolis*, 173 N.W.2d 353, 357 (Minn. 1969).

[122] *Baker Hughes, Inc. v. Keco R. & D., Inc.*, 12 S.W.3d 1, 5 (Tex. 1999); *Wilson v. Work*, 62 S.W.2d 490 (Tex. 1933) (per curiam) (original proceeding); *Mellinger v. City of Houston*, 3 S.W. 249, 254-255 (Tex. 1887).

Legislature's exercise of its police power implicitly concluded that the exercise was not merely reasonable but was compelling, notwithstanding the statute's effect on prior rights.

The test the court of appeals distilled from the cases focuses too much on the reasonableness of legislative action and does not give full voice to the concerns addressed by the prohibition against retroactive laws. The court believed that one consideration in applying the prohibition is whether a statute is "appropriate and reasonably necessary to accomplish a purpose within the scope of the police power".[123] But the necessity and appropriateness of legislation are generally not matters the judiciary is able to assess. In *Barshop*, for example, we did not undertake to determine whether the regulation scheme fashioned by the Legislature in the Edwards Aquifer Act was the only, the best, or even a good way to conserve and allocate groundwater among those claiming a right to it. The important considerations were that the Act discharged the Legislature's constitutionally mandated duty to conserve public resources, that some regulation was entirely to be expected, and that the burden of its retroactive effect in basing future withdrawals on historic use was shared by all those claiming a right to groundwater.

The second factor in the court of appeals' test was whether a statute is unreasonable, arbitrary, unjust, unduly harsh, or disproportionate to the end sought to be accomplished.[124] But the intent of the prohibition against retroactive laws is to foreclose these kinds of considerations to the Legislature in enacting laws and to the judiciary in reviewing them. A retroactive law is not permissible merely because the end seems to justify the means. The presumption is that a retroactive

[124] *Id*.

law is unconstitutional without a compelling justification that does not greatly upset settled expectations.

Robinson would go further. She argues that because the prohibition against retroactive laws is part of the Texas Constitution's Bill of Rights, it is absolute, and any weighing of the government's interest in enacting a retroactive law is precluded by article I, section 29 of the Texas Constitution, which states:

> To guard against transgressions of the high powers herein delegated, we declare that everything in this "Bill of Rights" is excepted out of the general powers of government, and shall forever remain inviolate, and all laws contrary thereto, or to the following provisions, shall be void.

But Robinson's argument begs the question. We do not disagree that the constitutional prohibition is absolute when it applies, as are the right to worship, the right to free speech, the freedom from unreasonable search and seizure, the guaranty of due course of law, and the other protections of the Bill of Rights. But section 29 does not determine whether and how the Bill of Rights' provisions apply. What Justice Oliver Wendell Holmes observed about all rights applies to the right to be free from retroactive laws:

> All rights tend to declare themselves absolute to their logical extreme. Yet all in fact are limited by the neighborhood of principles of policy which are other than those on which the particular right is founded, and which become strong enough to hold their own when a certain point is reached. The limits set to property by other public interests present themselves as a branch of what is called the police power of the State. The boundary at which the conflicting interests balance cannot be determined by any general formula in advance, but points in the line . . . are fixed by decisions that this or that concrete case falls on the nearer or farther side.[125]

[125] *Hudson Cnty. Water Co. v. McCarter*, 209 U.S. 349, 355 (1908).

IV

Using the standards we have set out, we must now determine whether chapter 149 is unconstitutionally retroactive as applied to Robinson.

A

We first consider the nature of the rights claimed by the Robinsons and Chapter 149's impact on them. Chapter 149 does not directly restrict the Robinsons' common law action for personal injuries due to exposure to asbestos in the workplace. Rather, it supplants the usual choice-of-law rules for determining what state's successor liability law should apply in asbestos cases in Texas by mandating Texas courts to apply Texas law, then for the first time prescribes limits on that liability, even if, as here, successor liability arose under the law of another state. Crown argues that by allowing for an expansion of liability beyond the tortfeasor to include a successor by merger, successor liability is largely remedial in nature, and in any event, is a creature of statute in which there can be neither right nor expectation. Crown cites *Dickson v. Navarro County Levee Improvement District*, where we gave immediate effect to a statute that repealed a special, statutory cause of action.[126] Crown analogizes this case to *Owens Corning*, which upheld the change in Texas law to allow a plaintiff no more time to sue here than he would have had in his state of residence.[127]

But the successor liability in this case is not a creature of Texas law; the parties agree that without Chapter 149, New York or Pennsylvania law would apply, and that under the law of those states, Crown's successor liability is unquestionable. So this is not a case like *Dickson*, in which the

---

[126] 139 S.W.2d 257 (Tex. 1940).

[127] *Owens Corning v. Carter*, 997 S.W.2d 560, 573 (Tex. 1999).

Legislature abolished a cause of action it had itself created; Chapter 149 limits liability created under other states' laws. Nor is this a case like *Owens Corning*, in which the Legislature changed the statute of limitations so that a nonresident plaintiff would gain no advantage by suing in Texas rather than in his home state; Chapter 149 disadvantages Texas residents, as well as nonresidents, who sue Crown in Texas rather than New York or Pennsylvania. Nevertheless, Crown has a point that choice-of-law rules are purely procedural and subject to change, often by courts, but certainly by the Legislature if it chooses to do so.

However, Chapter 149 extinguishes the Robinsons' claim and all other such claims against Crown in Texas, and while it does so indirectly, extinction was the Legislature's specific intent. An interest in maintaining an established common-law cause of action is greater than an interest in choice-of-law rules. We have held that an unliquidated personal-injury claim was not a property interest under the common law,[128] but it is now assignable as other property interests.[129] The rights protected by the constitutional prohibition against retroactive laws are no more limited to those recognized at the time the prohibition was adopted than are the rights protected by due course of law. An unliquidated claim may have little or no value, as for example when the cause of action has not been recognized or the elements of recovery cannot be proved. But here, claims like the Robinsons' have become a mature tort, and recovery is more predictable, especially when the injury is mesothelioma, a uniquely asbestos-related disease. Discovery taken in the case shows that the

[128] *Graham v. Franco*, 488 S.W.2d 390, 395 (Tex. 1972).

[129] TEX. PROP. CODE § 12.014.

Robinsons' claims had a substantial basis in fact. Their right to assert them was real and important, and it was firmly vested in the Robinsons.

Crown argues that when Mundet was still selling the asbestos insulation to which John Robinson was exposed in ship boiler rooms, the Robinsons could not reasonably have expected Mundet to be able to pay all the claims that would eventually arise, or that the company would merge with a deeper pocket like Crown. But those are not the expectations the prohibition against retroactive laws protects. The Robinsons could well have expected, then as now, that a rule of law that permitted their recovery, and many others' before them, would not be changed after they had filed suit to abrogate their claim.

Crown argues that the Robinsons have alleged that all the defendants they have sued are jointly and severally liable and that they are likely to recover all their damages from those who have already settled and the others than remain. We refuse to speculate about what might happen. If Crown would otherwise be responsible for the Robinsons' injury, then by insulating Crown, Chapter 149 either reduces the recovery to which the Robinsons are entitled or requires the other defendants to pay Crown's share. Either way, the statute disturbs settled expectations.

We therefore conclude that Chapter 149 significantly impacts a substantial interest the Robinsons have in a well-recognized common-law cause of action.

B

We next consider whether Chapter 149 serves the public interest. Crown argues that the statute helps alleviate the asbestos litigation crisis that has already bankrupted many companies, resulting in lost jobs and a burden on the State's economy. The Legislature has recognized the

severity of that crisis in another context,[130] but it did not do so in enacting House Bill 4 and Chapter 149. On the contrary, the legislative record is fairly clear that chapter 149 was enacted to help only Crown and no one else. Crown itself has been unable to identify to us any other company affected by Chapter 149. There is evidence that Crown has about 1,000 employees in Texas and about the same number of former employees on retirement, and that it operates three facilities here. Crown asserts that it continues to be sued on asbestos claims in Texas, but the record is silent concerning the number of those claims or the amount of Crown's probable exposure.

The Legislature made no findings to justify Chapter 149. Even the statement by its principal House sponsor fails to show how the legislation serves a substantial public interest. No doubt Texas will benefit from reducing the liability of an employer and investor in the State, but the extent of that benefit is unclear on this record. And in any event, there is nothing to indicate that it rises to the level of the public interest involved in *Bastrop* and *A.V.*

Crown argues that the public interest has been recognized by other states' legislatures in enacting similar legislation. We are aware of ten other state legislatures that have enacted laws similar to chapter 149. In one state, Pennsylvania, the legislation was fully retroactive,[131] just as chapter 149 is, but the Supreme Court of Pennsylvania has held the statute to violate the Open Courts provision of the Pennsylvania Constitution.[132] Statutes adopted in three states — Florida, Indiana,

---

[130] Act of May 16, 2005, 79th Leg., R.S., ch. 97, § 1, 2005 Tex. Gen. Laws 169 (finding an "asbestos litigation crisis" in Texas and throughout the country).

[131] 15 PA. CONS. STAT. ANN. § 1929.1 (West 2010).

[132] *Ieropoli v. AC&S Corp.*, 842 A.2d 919 (Pa. 2004).

and Wisconsin — apply to pending actions if trial has not commenced.[133] Statutes adopted in three other states — North Dakota, Ohio, and Oklahoma — have the same application *unless it is found to be unconstitutional*.[134] South Carolina's statute applies only to actions filed after the statute's effective date,[135] and Georgia's applies only to actions that accrue after the statute's effective date.[136] The effect of Mississippi's statute on accrued or pending claims is unclear from the text.[137] Other states' perception of the public interest served by retroactive legislation is at best ambiguous.

It is tempting to think that the real burden of Chapter 149 on the Robinsons and other plaintiffs in their shoes will be light compared to the benefit to Crown, its current and former employees, and the State. The Robinsons' case, and most others like it, involves many defendants and large settlements funded from many pockets. The impact of Chapter 149 on individual cases may be slight, relative to the cumulative impact on Crown without Chapter 149. But we think that an important reason for the constitutional prohibition against retroactive laws is to preempt this weighing of interests absent compelling reasons. Indeed, it is precisely because retroactive rectification of perceived injustice seems so reasonable and even necessary, especially when there are few to complain, that the constitution prohibits it.

---

[136] O.C.G.A. § 51-15-1 to -8 (2010) (see § 51-15-3, Chapter Note, Editor's Notes, on effective date and non-codified provisions); Ga. L. 2007, p. 4, §§ 2, 4 (text of SB 182, as passed, is available at http://www.legis.state.ga.us/legis/2007_08/fulltext/sb182.htm).

[137] MISS. CODE ANN. § 79-33-1 to -11 (2010).

Accepting the legislative record as indicating the reasons for its actions, we conclude that the public interest served by Chapter 149 is slight.

* * *

For these reasons, we hold that Chapter 149, as applied to the Robinsons' common-law claims, violated article I, section 16 of the Texas Constitution. The court of appeals' judgment is reversed and the case is remanded to the trial court for further proceedings.

Nathan L. Hecht
Justice

Opinion delivered: October 22, 2010

IN THE SUPREME COURT OF TEXAS

NO. 06-0714

BARBARA ROBINSON, INDIVIDUALLY AND AS REPRESENTATIVE OF THE ESTATE OF JOHN ROBINSON, DECEASED, PETITIONER,

v.

CROWN CORK & SEAL COMPANY, INC., INDIVIDUALLY AND AS SUCCESSOR TO MUNDET CORK CORPORATION, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued February 7, 2008

JUSTICE WAINWRIGHT, joined by JUSTICE JOHNSON, dissenting.

The Legislature enacted Chapter 149 of the Civil Practice and Remedies Code to protect businesses, which acquired other entities, from financial disaster based solely upon the acquired entities' past, discontinued manufacture of asbestos products. The statute limits the liability of the acquiring business, which had not engaged in the asbestos business, to the fair market value of the acquired entity at the time of the acquisition. Through Chapter 149, the Legislature balances limitations on asbestos-related recoveries against protecting the assets and employees of businesses who did not cause the illness, while leaving intact the entirety of potential liability and damages proven against companies that were involved in the asbestos business and are, perhaps, more

culpable. The Court's holding that the legislation is unconstitutional prevents the Legislature from addressing an injustice arising from a crisis that caused dozens of bankruptcies and the loss of thousands of jobs in this state and throughout the country due to asbestos-related litigation. *See, e.g.*, Jonathan Orszag, The Impact of Asbestos Liabilities on Workers in Bankrupt Firms, Remarks at the Asbestos Litigation Symposium at the South Texas College of Law in Houston, Tex. (Mar. 7, 2003), *in* 44 S. TEX. L. REV. 1077, 1078–80 (2003) (describing results of a study indicating that sixty-one companies entered into bankruptcy and that 52,000 to 60,000 people lost their jobs due to asbestos litigation).

The Court's new balancing test reaches the wrong result. By holding that an unliquidated claim with "substantial basis in fact" is entitled to constitutional protection, it ignores an important principle. ___ S.W.3d ___. The constitutional retroactivity doctrine does not protect an asserted entitlement to property one does not own, and until a final judgment in a case, we do not know whether the claim will be vindicated or refuted. The Court's reasoning that the right to file a claim is protected by the retroactivity doctrine because, at least in part, the claim is well founded with a "substantial basis in fact" springing from a "mature tort" with " more predictable" recovery, is a troubling proposition. ___ S.W.3d ___. It is unclear what that means, but it suggests that the constitutional retroactivity protection is dependent on the perceived strength of a claim. The likelihood of success in litigation is dependent on a myriad of factors that make such predictions difficult at best. We have held that an unliquidated personal injury claim is not a protected property interest, and the contingent recovery from one should not be either.

While JUSTICE MEDINA, who writes separately, and I disagree on the result, we agree that the Court should not abandon vested rights jurisprudence in favor of a new and uncertain approach. The analysis in the Court's opinion is contrary to both the clear rule among the federal courts of appeals that have addressed the issue and the majority rule among our courts of appeals. The Court could rely on traditional police power jurisprudence in which, even if the Robinsons had a vested right in their unliquidated cause of action, courts consider whether the Legislature's action was justified by its constitutionally recognized police power to act in the interest of the health and welfare of Texas. Indeed, the Court's new balancing test for retroactivity analysis is similar to the police power balancing test I expound under existing law, but is newly incorporated into the retroactivity doctrine. For all these reasons, I respectfully dissent.

I. BACKGROUND

John Robinson served in the Navy for twenty years, and during that time he was exposed to steam pipes and boiler doors coated with insulation containing asbestos. Some of the insulation and other products were marked with a "big M," the trademark used by Mundet Cork Corporation. In August 2002, Robinson was diagnosed with mesothelioma. He claims the disease occurred as a result of his exposure to asbestos in, among others, insulation products produced by Mundet.

Crown Cork itself has never been in the business of mining, manufacturing, installing, selling, distributing, removing, or otherwise making asbestos or any asbestos-containing product. However, on November 7, 1963, Crown Cork's predecessor entered into an agreement to purchase the majority of Mundet's stock after the majority shareholder died and offered the shares for sale. Crown Cork paid approximately $7 million for the stock, a majority interest in the company.

Mundet ceased manufacturing insulation products prior to Crown Cork's acquisition of Mundet, but continued to hold insulation products in stock until early 1964, when a third-party entity purchased the assets of Mundet's insulation division, including its inventory, contracts, raw materials, and accounts receivables. On January 4, 1966, Mundet statutorily merged with Crown Cork's predecessor, and in 1989 Crown Cork was reincorporated in Pennsylvania.[1]

After he had been diagnosed with mesothelioma, Mr. Robinson and his wife filed suit in 2002 against Crown Cork and twenty other defendants for damages caused by Mr. Robinson's exposure to asbestos-containing products. The Robinsons sought to hold each defendant jointly and severally liable. On November 25, 2002, the Robinsons filed a motion for partial summary judgment to establish Crown Cork's liability for actual damages as Mundet's successor. Crown Cork did not contest its successor liability for compensatory damages, and on July 16, 2003 the trial court granted the Robinsons' motion, holding that Crown Cork "is liable and bears responsibility for the compensatory damages, if any, awarded to Plaintiffs that are attributable to the conduct, products, or torts of its predecessor Mundet Cork Corporation."

House Bill 4, a bill drafted to comprehensively address perceived crises in medical malpractice, asbestos, and other litigation issues in Texas, was introduced in the Texas House of Representatives on February 17, 2003, without any provision regarding successor asbestos liability. Tex. H.B. 4, 78th Leg., R.S. (2003). Its purpose was to operate as a "comprehensive civil justice

---

[1] The term "statutory merger" is used to distinguish business mergers made pursuant to the statutory scheme of the state of incorporation from other, nonstatutory forms of combinations, for example asset-purchase and stock-purchase transactions. 20A ROBERT W. HAMILTON, ELIZABETH S. MILLER, & ROBERT A. RAGAZZO, TEXAS PRACTICE SERIES: BUSINESS ORGANIZATIONS § 43.2 (2d ed. 2004).

reform bill intended to address and correct problems that currently impair the fairness and efficiency of our court system." House Comm. on Civil Practices, Bill Analysis, Tex. H.B. 4, 78th Leg., R.S. at 1 (2003).

In late March 2003, more than 100 amendments were submitted to the Bill, including Article 17, the asbestos successor-liability article. The article was debated on the floor of the House on March 25, 2003 and passed the House three days later. Both the House and Senate held hearings on the bill as a whole. In an April 30, 2003 meeting of the Senate State Affairs Committee, Senator Ratliff, the committee chair, introduced hearings on the Senate Substitute to House Bill 4. He described Article 17 as follows:

> Article 17, limitations in civil actions of liabilities relating to certain mergers or consolidations. This, members, is the Crown Cork and Seal asbestos issue. What we have put in this bill is what I understand to be an agreed arrangement between all of the parties in this—in this matter.

Hearings on the Proposed Senate Substitute for H.B. 4 Before the S. Comm. on State Affairs, 78th Leg., R.S. (Apr. 30, 2003) (Statement of Sen. Bill Ratliff, Chairman, S. Comm. on State Affairs). The act passed the Senate on May 16, 2003; the House accepted the Conference Committee compromise bill on June 1, 2003; both adopted corrections on June 2, 2003; and the bill was signed into law by the Governor on June 11, 2003. Act of June 2, 2003, 78th Leg., R.S., ch. 204, 2003 Tex. Gen. Laws 847, 899 (codified at TEX. CIV. PRAC. & REM. CODE §§ 149.001–.006). With a two-thirds vote in both chambers, the bill took effect immediately and was made retroactive to all cases "pending on that effective date and in which the trial, or any new trial or retrial following motion,

appeal, or otherwise, begins on or after that effective date."[2] *Id.* § 17.02(2), 2003 Tex. Gen. Laws at 895; *see also* TEX. CONST. art. III, § 39 ("No law passed by the Legislature, except the general appropriation act, shall take effect or go into force until ninety days after the adjournment of the session at which it was enacted, unless the Legislature shall, by a vote of two-thirds of all the members elected to each House, otherwise direct; said vote to be taken by yeas and nays, and entered upon the journals.").

The act limits the "cumulative successor asbestos-related liabilities" "incurred by a corporation as a result of or in connection with a merger or consolidation . . . with or into another corporation or that are related in any way to asbestos claims based on the exercise of control or the ownership of stock of the corporation before the merger or consolidation that occurred" prior to May 13, 1968. TEX. CIV. PRAC. & REM. CODE §§ 149.001–.003.[3] The asbestos liabilities of successor corporations "are limited to the fair market value of the total gross assets of the transferor determined as of the time of the merger or consolidation," *id.* § 149.003(a), and adjusted for inflation at a simple interest rate of the prime rate plus one percent, *id.* § 149.005(a). An "asbestos claim" is "any claim, wherever or whenever made, for damages, losses, indemnification, contribution, or other relief arising out of, based on, or in any way related to asbestos, including" property damage caused by

[2] The House also defeated an amendment making the bill applicable only to successor liabilities assumed or incurred after the effective date of the act. H.J. of Tex., 78th Leg., R.S. 818–19 (2003).

[3] The act also provides a number of exceptions, excluding, among other things, workers' compensation claims, an insurance corporation, a claim made in a bankruptcy proceeding begun prior to April 1, 2003, claims for premises liability, or claims against a "successor that, after merger or consolidation, continued in the business of mining asbestos or in the business of selling or distributing asbestos fibers or in the business of manufacturing, distributing, removing, or installing asbestos-containing products which were the same or substantially the same as those products previously manufactured . . . by the transferor." *Id.* § 149.002(b).

asbestos, the health effects of asbestos exposure, or any claim made by or on behalf of any person exposed to asbestos. *Id.* § 149.001(1). The Legislature clearly intended to limit recoveries only against so-called "innocent" successor companies.

According to Crown Cork's experts, by May 2003, Crown Cork had paid or agreed to pay asbestos related claims, not covered by insurance, totaling more than seven times the present value of Mundet according to the statutory formula. On July 3, 2003, Crown Cork filed a Motion for Summary Judgment raising the affirmative defense of Chapter 149, introducing evidence of the value of Mundet and total asbestos-related payments made by Crown Cork to date. The Robinsons asserted that the statute was a "special law" in violation of article III, section 56 of the Texas Constitution, that it deprived the Robinsons of a vested property right in violation of article I, section 16 of the Texas Constitution, that the statute was an unconstitutional taking, violating article I, section 17 of the Texas Constitution and the Fifth and Fourteenth Amendments to the United States Constitution, that it constituted a deprivation of substantive due process rights under the Texas and United States Constitutions, that it deprived John Robinson of a contractual right, contrary to article I, section 16 of the Texas Constitution, and deprived John Robinson of his common law causes of action in violation of the Open Courts guarantee in article I, section 13 of the Texas Constitution. The Robinsons raise only the retroactivity and special law challenges before this Court. Implicitly finding that Crown Cork had established that the statute applied to it as a matter of law, and that Crown Cork had already paid liabilities in excess of Mundet's adjusted value, the trial court granted Crown Cork's motion for summary judgment on October 2, 2003. It issued an amended order

nineteen days later, dismissing claims against Crown Cork brought by the Robinsons.[4] The Robinsons nonsuited their remaining claims against Crown Cork and then appealed the summary judgment.[5] The court of appeals affirmed. Characterizing the jurisprudence on vested rights as "inconsistent and difficult to use as a guide," the court instead balanced the Legislature's police power against the private rights impacted by the statute, and held that the statute was constitutional. 251 S.W.3d 520, 532–35 (Tex. App.—Houston [14th Dist.] 2006, pet. granted). One justice dissented, arguing that the court should have applied a vested rights analysis and concluded that the statute violated article I, section 16. *Id.* at 551–52 (Frost, J., dissenting).

II. ANALYSIS

In this Court, the Robinsons raise only two issues, and both are grounded exclusively in Texas law. They argue that Chapter 149 of the Texas Civil Practice and Remedies Code is an unconstitutional "special law" and that it is unconstitutionally retroactive when applied to the Robinsons' claims to effectively bar recovery.[6] As the party challenging the constitutionality of the statute, the Robinsons must overcome the presumptions that "the Legislature intended for the law

[4] The Robinsons' remedies against the other defendants pending at the time of the enactment of the statute was not limited by Chapter 149, but their remedy against Crown Cork was. The Robinsons eventually recovered at least $850,000 from other defendants sued in addition to Crown Cork.

[5] On November 16, 2003, after the trial court entered its amended order granting summary judgment, John Robinson died. Mrs. Robinson continued to prosecute her claims individually and as representative of the estate of John Robinson. Because the claims still live independently, one for Mrs. Robinson and one for the estate of John Robinson, this opinion will refer to petitioners as the Robinsons.

[6] The Court astutely notes that, due to the odd procedural posture of the case, as well as Mr. Robinson's untimely passing, it is unclear which legal claims are being allegedly retroactively extinguished. Because the parties raise only whether Chapter 149 is unconstitutionally retroactive as applied to Mr. Robinson's common law claims (kept alive through the survival statute and pursued derivatively through the wrongful death statue) I, as the Court, address only those arguments. However, as more fully discussed below, the fact that the Robinsons' claims are statute-based reinforces the conclusions of this vested rights analysis.

to comply with the United States and Texas Constitutions, to achieve a just and reasonable result, and to advance a public rather than a private interest." *Tex. Mun. League Intergovernmental Risk Pool v. Tex. Workers' Comp. Comm'n*, 74 S.W.3d 377, 381 (Tex. 2002) (citing TEX. GOV'T CODE § 311.021; *Spence v. Fenchler*, 180 S.W. 597, 605 (Tex. 1915)). The Robinsons also bear the burden of showing that the law is contrary to a provision of the state constitution. *See, e.g.*, *Walker v. Guiterrez*, 111 S.W.3d 56, 66 (Tex. 2003). The Robinsons' retroactivity claim is an as-applied challenge, which means that they must demonstrate that the statute is unconstitutional as it operates in practice against them. *Tex Mun. League*, 74 S.W.3d at 381 (citing *Tex. Workers' Comp. Comm'n v. Garcia*, 893 S.W.2d 504, 518 n.16 (Tex. 1995)). Their special law challenge is a facial challenge, which means that the Robinsons must demonstrate there is no conceivable set of facts that could exist under which the statute would be constitutional. *Garcia*, 893 S.W.2d at 520.

In this case the Court determines that the law is unconstitutionally retroactive and thus does not reach the special law challenge. However, for the reasons that follow, I would hold that the law survives both challenges, but for reasons different from those articulated by the court of appeals.

A. Retroactive Law

Article I, section 16 of the Texas Constitution, part of the Texas Bill of Rights, declares that "[n]o bill of attainder, ex post facto law, retroactive law, or any law impairing the obligation of contracts, shall be made." TEX. CONST. art. I, § 16. A retroactive law "takes away or impairs vested rights acquired under existing laws . . . ." *Paschal v. Perez*, 7 Tex. 348, 365 (1851). A retroactive law means a law applying to things that are past. *DeCordova v. City of Galveston*, 4 Tex. 470, 475 (1849).

Of course, not every law that affects relationships among parties based upon events occurring in the past is automatically unconstitutional, just as not every law that may affect a person's right to speak, that may affect a contractual obligation, or that may allow a search of a person's dwelling without a warrant, is unconstitutional. *See Subaru of Am. v. David McDavid Nissan, Inc.*, 84 S.W.3d 212, 219 (Tex. 2002). This Court has articulated three doctrines that further define the scope of the retroactivity prohibition. First, a law is not unconstitutionally retroactive unless it impairs a person's "vested rights." *E.g.*, *id.* at 219. Second, a law is not unconstitutionally retroactive if it only modifies or reduces the person's remedy. *E.g.*, *City of Tyler v. Likes*, 962 S.W.2d 489, 502 (Tex. 1997); *Holder v. Wood*, 714 S.W.2d 318, 319 (Tex. 1986). And finally, even if the law affects a person's vested rights, and not a remedy, a law may not violate the retroactivity prohibition if the government's interest in protecting society, based upon its police power, outweighs the individual's interest in his or her particular right. *E.g.*, *Barshop v. Medina Cnty. Underground Water Conservation Dist.*, 925 S.W.2d 618, 633–34 (Tex. 1996). The first two tests are definitional—this Court has determined that a retroactive law does not implicate article I, section 16 of the Constitution unless the law both affects a vested right and impairs an actual right, not merely a remedy or a procedure. The third test may operate as an exception to the rule. Although related, the review of each doctrine is separate. *E.g.*, *In re A.V. & J.V.*, 113 S.W.3d 355, 361 (Tex. 2003) (describing "exceptions" to retroactivity); *David McDavid Nissan*, 84 S.W.3d at 219 (analyzing the procedural/remedial test as part of the vested rights exception because "procedural and remedial statutes typically do not affect a vested right"). Although the Court has not had occasion recently

to address the specific meaning of article I, section 16's prohibition of retroactive laws, our precedents provide a useful roadmap.

1. Vested Rights

Vested rights derive from "[c]onsiderations of fair notice, reasonable reliance, and settled expectations." *Owens-Corning v. Carter*, 997 S.W.2d 560, 572–73 (Tex. 1999). "A retroactive statute only violates our Constitution if, when applied, it takes away or impairs vested rights acquired under existing law." *David McDavid Nissan*, 84 S.W.3d at 219 (citing *Ex parte Abell*, 613 S.W.2d 255, 260 (Tex. 1981)); *McCain v. Yost*, 284 S.W.2d 898, 900 (Tex. 1955).

We explained "vested rights" in *Ex parte Abell*:

> *[A] right, in a legal sense, exists, when, in consequence of the existence of given facts, the law declares that one person is entitled to enforce against another a given claim,* or to resist the enforcement of a claim urged by another. Facts may exist out of which, in the course of time or under given circumstances, a right would become fixed or vested by operation of existing law, but until the state of facts which the law declares shall give a right comes into existence there cannot be in law a right; and for this reason it has been constantly held that, *until the right becomes fixed or vested, it is lawful for the lawmaking power to declare that the given state of facts shall not fix it*, *and such laws have been constantly held not to be retroactive* in the sense in which that term is used.

613 S.W.2d at 261 (quoting *Mellinger v. City of Houston*, 3 S.W. 249, 253 (Tex. 1887)) (emphasis added). "A right cannot be considered a vested right unless it is something more than "a *mere expectation* as may be based upon an anticipated continuance of the present general laws; it must have become a title, legal or equitable . . . ." *Id.* (citation omitted) (emphasis added). This Court has clearly articulated that "no one has a vested right in the continuance of present laws in relation to a

particular subject . . . . There cannot be a vested right, or a property right, in a mere rule of law." *Middleton v. Tex. Power & Light Co.*, 185 S.W. 556, 560 (Tex. 1916).

The court of appeals called the vested rights analysis "inconsistent and difficult to use as a guide." 251 S.W.3d at 526. Other courts of appeals have called the vested rights analysis "amorphous." *Sims v. Adoption Alliance*, 922 S.W.2d 213, 216 (Tex. App.—San Antonio 1996, writ denied); *Ex parte Kubas*, 83 S.W.3d 366, 369 (Tex. App.—Corpus Christi 2002, pet. ref'd). Courts from other states and commentators have also criticized vested rights analyses, preferring an analysis requiring a balancing of the nature and strength of the public interest served by the statute, the extent to which the statute modifies or abrogates the pre-enactment right, and the nature of the right the statute alters. *See, e.g.*, *Owen Lumber Co. v. Chartrand*, 73 P.3d 753, 755–56 (Kan. 2003); *Peterson v. City of Minneapolis*, 173 N.W.2d 353, 356–57 (Minn. 1969); *see also* Charles B. Hochman, *The Supreme Court and the Constitutionality of Retroactive Legislation*, 73 HARV. L. REV. 692, 697 (1960). And the Court's opinion, in rejecting a "bright-line test for unconstitutional activity," and in recognizing that the Texas Constitution "does not insulate every vested right from impairment," seems to abandon the vested rights analysis altogether, or, at a minimum, detaches the concept of vested rights from its traditional significance in a retroactivity analysis. ___ S.W.3d ___. However, the doctrine's difficulty is not a justification to abandon it wholesale. For, at the core of the vested rights doctrine lies an extremely important principle—the constitutional retroactivity doctrine does not protect an asserted entitlement to property one does not own, and until a final judgment in a case, we do not know whether the lawsuit will prove or refute a claim to recover.

Applying our century-old jurisprudence, I would hold that an accrued, but unliquidated cause of action is not a vested right because: (1) the framers of the Texas Constitution would not have considered an unliquidated cause of action to be a vested property right entitled to protection under the Retroactivity Clause; (2) a lawsuit is not a right to recover anything but a contingent and unliquidated pursuit of a claimed injury that may or may not be successful; and (3) until and unless a final judgment is rendered in favor of the claimant, there is no right to recover damages on the claim against another. *See Mellinger*, 3 S.W. at 252; *Graham v. Franco*, 488 S.W.2d 390, 393 (Tex. 1972); *Ex parte Abell*, 613 S.W.2d at 260.

In interpreting the Texas Constitution, our duty is "to ascertain and give effect to the plain intent and language of the framers of [the constitution] and of the people who adopted it." *Wilson v. Galveston Cnty. Cent. Appraisal Dist.*, 713 S.W.2d 98, 101 (Tex. 1986) (quoting *Gragg v. Cayuga Indep. Sch. Dist.*, 539 S.W.2d 861, 866 (Tex. 1976)). We look

> to such things as the language of the constitutional provision itself, its purpose, the historical context in which it was written, the intentions of the framers [and ratifiers], the application in prior judicial decisions, the relation of the provision to [other parts of the constitution and] the law as a whole, the understanding of other branches of government, the law in other jurisdictions, state and federal, constitutional and legal theory, and fundamental values including justice and social policy.

Davenport v. Garcia, 834 S.W.2d 4, 30 (Tex. 1992) (Hecht, J., concurring) (citations omitted).

Examining the state of "vested rights" and what constitutes a vested property right at the time of the framing of the 1876 Constitution provides important insight into what the Framers considered protected by the Retroactivity Clause. Prior to and at the time of the adoption of the Texas Constitution in 1876, it was well established that the doctrine of vested rights created an exception

to the prohibition on retroactive legislation. *See, e.g.*, *DeCordova*, 4 Tex. at 475; *Paschal*, 7 Tex. at 365 ("Mr. Justice Story defines a retrospective law to be, one which takes away or impairs vested rights acquired under existing law, or creates a new obligation, or imposes a new duty, or attaches a new disability in relation to transactions already past." (citing *Soc'y for the Propagation of the Gospel v. Wheeler*, 2 Gall. 105, 138, 22 F. Cas. 756, 767 (No. 13,156) (C.C.D.N.H. 1814))).[7] A vested right is now, and was then, considered some form of "property right." *Middleton*, 185 S.W. at 560. However, at the time of the framing of the cCnstitution of 1876, an accrued, but unliquidated, cause of action for personal injury, was not "property" in any sense. *See G. H. & S. A. R.R. v. Freeman*, 57 Tex. 156 (1882); *Stewart v. H. & T. C. Ry. Co.*, 62 Tex. 246 (1884). Common law tort causes of action for personal injury could not be assigned and did not survive the death of the victim. As described by Chief Justice Greenhill:

> By the clear weight of common law authority, *a cause of action for personal injury is not property in any sense, nor for any purpose till it has been reduced to judgment*; and the judgment, as property, takes its character as separate or common from the right violated in committing the wrong—the personal injury.

Graham, 488 S.W.2d at 393 (emphasis added) (quotation omitted); *see also State Farm Fire & Cas. Co. v. Gandy*, 925 S.W.2d 696, 706–07 (Tex. 1996) (discussing the role at common law regarding the assignability and survivability of personal injury tort causes of action). Legislation was required to amend both of those common law rules. *E.g.*, Act of May 4, 1895, 24th Leg., R.S., ch. 89, § 1,

---

[7] *See also Milam Cnty. v. Bateman*, 54 Tex. 153, 163 (1880); *Moore v. Letchford*, 35 Tex. 185, 222 (1871) (Ogden, J., dissenting) (noting that the Legislature may pass retrospective legislation that "would *regulate" and neither "create nor destroy* vested rights" (emphasis added)); *Hamilton v. Avery*, 20 Tex. 612 (1857); *Nichols v. Pilgrim*, 20 Tex. 426, 428–29 (1857) (discussing whether an executed contract for the sale of land was a "vested right" allowing suit for partition of land, notwithstanding the enactment of the statute of frauds).

1895 Tex. Gen. Laws 143 (current version at TEX. CIV. PRAC. & REM.CODE § 71.021) (allowing survival of personal injury claims); TEX PROP. CODE § 12.014(a) (allowing "an interest in a cause of action on which suit has been filed" to be "sold, regardless of whether the . . . cause of action is assignable in law or equity"); *Gandy*, 925 S.W.2d at 707 (noting that personal injury claims only became assignable after they could survive the owner's death).

As in other circumstances, property is treated differently. In 1876, choses in action for injury to property were considered property, and they were alienable, assignable, and devisable.

> [W]hen the injury affects the estate rather than the person, when the action is brought for damage to the estate and not for injury to the person . . . the right of action could be bought and sold. Such right of action, upon the death, bankruptcy or insolvency of the party injured, passes to the executor or assignee as a part of his assets . . . .

Graham, 488 S.W.2d at 393 (quoting *Freeman*, 57 Tex. at 158); *see also Gandy*, 925 S.W.2d at 706 (noting that "[t]he pressures against the rule of inalienability were commercial and thus affected only debts and other contract rights that were not personal to the owner and could survive to his estate upon his death"). The common law in Texas did not consider tort causes of action for personal injury to be "property," and "vested rights"— a concept recognized in common law at the time of the framing of the 1876 Constitution—are a species of property. Therefore, under the Texas Constitution, ratified in 1876, an accrued, but unliquidated personal injury cause of action was not considered to be a "vested right" for purposes of the Retroactivity Clause. *Gandy*, 925 S.W.2d at 706. This reasoning applies with special force to the Robinsons' as-applied challenge, because at common law Mr. Robinson's claims would not have survived his death. His claims exist today only by virtue of statutes. The framers of the Texas Constitution would have not believed that there

would be a settled expectation in allowing Mrs. Robinson to continue to prosecute these uncertain claims, either as Mr. Robinsons's personal representative or derivatively through a statutorily created wrongful death action.

The Court recognizes this historical disconnect, yet dismisses it in a single sentence, stating simply that "[t]he rights protected by the constitutional prohibition against retroactive laws are no more limited to those recognized at the time the prohibition was adopted than are the rights protected by due course of law." ___ S.W.3d ___. A court should be cautious in providing new protections for rights that were not part of the sphere of rights contemplated by the democratic institutions that enacted the constitution. *See McDonald v. City of Chicago*, ___ U.S. ___, 130 S. Ct. 3020, 3051–53 (2010) (Scalia, J., concurring) (criticizing the dissent's conceptual framework to "'do justice to [the Due Process Clause's] urgent call and its open texture' by exercising the 'interpretive discretion the latter embodies" and to hold that the Clause encompasses "new freedoms the Framers were too narrow-minded to imagine" (quoting *Id.*, ___ U.S. ___, 130 S. Ct. at 3099–100 (Stevens, J., dissenting))).

The right to file a cause of action is not an entitlement to enforce the alleged claim, but a "mere expectation" subject to numerous contingencies. *Ex parte Abell*, 613 S.W.2d at 261–62; *Mellinger*, 3 S.W. at 252–53. A plaintiff's ultimate recovery is contingent upon more than just success at trial. For example, it is contingent upon finding—and serving with process— the right defendant, who may be an inaccessible foreign defendant, or, as in this case, may be a corporation long since out of business. *See, e.g.*, TEX. R. CIV. P. 103–109a (discussing methods of service); *GFTA Trendanalysen B.G.A. Herrdum GMBH & Co., K.G. v. Varme*, 991 S.W.2d 785, 785 (Tex.

1999) (per curiam) (holding special appearance by foreign corporation did not waive challenge to jurisdiction). A plaintiff's recovery may be contingent upon following particular pretrial procedures, such as the filing of an expert report or providing discovery. *See* TEX. CIV. PRAC. & REM. CODE § 74.351 (requiring the service of an expert report by the plaintiff in a health care liability claim and demanding dismissal of the claim if the report is not timely served); *Cire v. Cummings*, 134 S.W.3d 835, 841–42 (Tex. 2004) (holding that "death penalty" sanctions of dismissing plaintiff's claim was warranted because of plaintiff's failure to produce audiotapes that would have proved or disproved plaintiff's legal malpractice claims). Any informed client knows that winning a lawsuit, even a seemingly "open and shut" case, is never certain, particularly when multiple defendants and multiple products may have caused the same injury, and no reasonable person has a "settled expectation" of achieving monetary recovery once she discovers a harm inflicted upon her.

Rather, I would hold, consistent with the jurisprudence of the United States Supreme Court[8] a majority of the federal courts of appeals,[9] a number of other states,[10]

---

[8] *See, e.g.*, *Landgraf v. USI Film Prods.*, 511 U.S. 244, 272 (1994) (recognizing that the "*constitutional* impediments to retroactive civil legislation are now modest"); *see also* Hochman, 73 HARV. L. REV. at 717 & n.135 ("[T]he Court has many times sustained the application of a retroactive statute to an accrued cause of action." (citing *Louisville & Nashville R.R. v. Mottley*, 219 U.S. 467 (1911))).

[9] *Hammond v. United States,* 786 F.2d 8, 12 (1st Cir. 1986) ("The question whether the rights asserted in plaintiff's state-law causes of action are 'vested' cannot be answered by looking to see whether suit had already been filed . . . . No person has a vested interest in any rule of law [and] this is true after suit has been filed and continues to be true until a final, unreviewable judgment is obtained." (citations and quotations omitted)); *In re TMI*, 89 F.3d 1106, 1115 n.9 (3d Cir. 1996) (distinguishing cases holding accrued causes of action to be vested rights, calling them "contrary to current federal constitutional precedent that finds no vested right in a tort cause of action before final judgment); *Zeran v. Am. Online, Inc.*, 129 F.3d 327, 335 (4th Cir. 1997) ("No person has a vested right in a nonfinal tort judgment . . . ."); *Arbour v. Jenkins*, 903 F.2d 416, 420 (6th Cir. 1990) (quoting *Sowell*); *Konizeski v. Livermore Labs, (In re Consol. U.S. Atomospheric Testing Litig.)*, 820 F.2d 982, 989 (9th Cir. 1987) (quoting *Hammond*); *Grimesy v. Huff*, 876 F.2d 738, 743–44 (9th Cir. 1989) (reviewing vested rights cases under a Fifth Amendment takings analysis); *Taxpayers for the Animas-La Plata Referendum v. Animas-La Plata Water Conservancy Dist.*, 739 F.2d 1472, 1477–78 (10th Cir. 1984) (holding that "inchoate" rights, such as the right to pursue legal remedies are not "vested" for purposes of the Colorado

and a majority of the courts of appeals to address the issue in this state,[11] that a cause of action

---

state and federal constitutions); *Salmon v. Schwartz,* 948 F.2d 1131, 1143 (10th Cir. 1991) (quoting *Arbour* and *Sowell*); *Sowell v. Am. Cyanid Co.*, 888 F.2d 802, 805 (11th Cir. 1989) ("The fact that the statute is retroactive does not make it unconstitutional [because] a legal claim affords no definite or [enforceable] property right until reduced to a final judgment."); *see also Lunsford v. Price*, 885 F.2d 236, 240–41(5th Cir. 1989) (holding the applicability of a statute to pending claims was not manifestly unjust); *Garcia v. Wyeth-Ayerst Labs.*, 385 F.3d 961, 968 (6th Cir. 2004) (noting that Michigan statute of repose, which "prevent[s] causes of action from accruing" did not violate retroactivity provisions of the federal constitution); *Symens v. SmithKline Beecham Corp.*, 152 F.3d 1050, 1056 n.3 (8th Cir. 1998) (noting that federal regulations, which may preempt state law claims would apply to plaintiffs' tort and implied warranty claims "because plaintiffs had no vested rights in these unasserted claims at the time [the] preemption was modified" (citing *Landgraf*, 511 U.S. at 269, 273)). *But see Davis v. Blige*, 505 F.3d 90, 103 (2d Cir. 2007) (recognizing, in a copyright case applying patent law, that a retroactive assignment destroys an owner's "valuable and *vested* right to enforce her claim"); *Hoyt Metal Co. v. Atwood*, 289 F. 453, 454–55 (7th Cir. 1923) (deciding whether a *judgment* is to be accorded the status of a vested right and stating "[t]hat an accrued cause of action is a vested property right is well settled . . . . Certainly a judgment is a vested property right."); *De Rodulfa v. United States*, 461 F.2d 1240, 1257 (D.C. Cir. 1972) (indicating that "a vested cause of action, whether emanating from contract or common law principles, *may* constitute property beyond the power of the legislature to take away," but not so holding because no cause of action—interference with contract—existed in the case (emphasis added)).

[10] I concede that a majority of other states to directly address the issue have held that an accrued, yet unliquidated cause of action is a "vested right" under either retroactivity or due process analyses. However, a number of other states provide a more nuanced view. For example, Colorado, one of the jurisdictions whose constitution also includes a prohibition on retroactive legislation, has held that a "vested right" is "one that is not dependent on the common law or statute but instead has an independent existence." *In re Estate of DeWitt*, 54 P.3d 849, 853 (Colo. 2002). The Colorado Supreme Court would determine this "independent existence" by balancing: "(1) whether the public interest is advanced or retarded; (2) whether the statute gives effects to or defeats the bona fide intentions or reasonable expectations of the affected individuals; and (3) whether the statute surprises individuals who have relied on a contrary law." *Id.* Nonetheless, the court, and the state's lower courts, do not recognize that an accrued cause of action is a vested right per se. *City of Greenwood Vill. v. Pets. for the Proposed City of Centennial*, 3 P.3d 427, 445–46 (Colo. 2000) ("[C]ontemporary precedent also demonstrates that expectations of parties to litigation are not equivalent to vested rights."); *see also Miller v. Brannon*, 207 P.3d 923 (Colo. App. 2009) ("A vested right must be a contract right, a property right, or a right arising from the transaction in the nature of a contract which has become perfected to the degree that it is not dependent *on the continued existence of the statute or common law*." (emphasis added) (quotations omitted)).

[11] *See Houston Indep. Sch. Dist. v. Houston Chronicle Publ'g Co.*, 798 S.W.2d 580, 589 (Tex. App.—Houston [1st Dist.] 1990, writ denied); *see also Walls v. First State Bank of Miami*, 900 S.W.2d 117, 122 (Tex. App.—Amarillo 1995, writ denied) (holding that retroactive application of federal law shielding employees of a financial institution for reporting suspected wrongdoing was properly applied to lawsuit for malicious prosecution and defamation that had been filed prior to the enactment of the law and stating that "only final, nonreviewable judgments will be accorded the dignity of vested, constitutionally guarded rights, and a law will be deemed to have a prohibited retroactive effect only when it impairs those rights"); *Tex. Gas Exploration Corp. v. Fluor Corp.*, 828 S.W.2d 28, 32 (Tex. App.—Texarkana 1991, writ denied) ("A party has no vested right to a cause of action; neither the Constitution of the United States nor this state forbids the abolition of common-law rights to attain a permissible legislative objective."); *Aetna Ins. Co. v. Richardelle*, 528 S.W.2d 280, 285 (Tex. Civ. App.—Corpus Christi 1975, writ ref'd n.r.e.) (noting that even though a plaintiff's cause of action had accrued against a minor child, the plaintiff could not proceed because the Legislature amended the statute to foreclose recovery against children the defendant's age and the plaintiff "had not acquired a 'title . . . to the present

becomes a "vested right" for the constitutional retroactivity analysis when it has reached a final determination—that is, where it has been reduced to an enforceable judgment in the plaintiff's favor.[12] As aptly put in an opinion of the Court of Appeals for the First District:

> A "vested right" implies an immediate right or entitlement—it is not an expectation or a contingency. . . . Engrained in the concept of vested rights is the idea of certainty. . . . The filing of a lawsuit in order to obtain relief or pursue a remedy is generally held not to create or destroy vested rights; the triggering event for the vesting of a right is the resolution of the controversy and the final determination—not the filing of the suit.

Houston Indep. Sch. Dist. v. Houston Chronicle Publ'g Co., 798 S.W.2d 580, 589 (Tex. App.—Houston [1st Dist.] 1990, writ denied).

This rule is most consistent with the understanding of vested property rights at the time of the ratification of the 1876 Constitution. It is consistent with our subsequent interpretation of the words of the Retroactivity Clause.[13] It is consistent with our case law and the great weight of court

---

or future enforcement of a demand'" (quotations omitted)); *Satterfield v. Crown Cork & Seal Co.*, 268 S.W.3d 190, 221–41 (Tex. App.—Austin 2008, no pet.) (Law, C.J., dissenting) (noting that the plaintiffs had no vested right in the successor liability remedy against Crown because vested rights are "certain and immediately enforceable," the successor liability theory does not create a cause of action, and economic interests could be considered in police power balancing). *But see Satterfield*, 268 S.W.3d at 206–09 (holding that plaintiff in asbestos suit had vested rights in accrued cause of action).

[12] The Open Courts Clause of the Texas Constitution, not at issue in this case, may impose limitations on the extent to which unliquidated claims may be barred. TEX. CONST. art. I, § 13; *Sax v. Votteler*, 648 S.W.2d 661, 665–66 (Tex. 1983) (holding that the "right to bring a well-established common law cause of action cannot be effectively abrogated by the legislature absent a showing that the legislative basis for the statute outweighs the denial of the constitutionally-guaranteed right of redress"); *see also Walters v. Cleveland Reg'l Med. Ctr.*, 307 S.W.3d 292, 295 (Tex. 2010).

[13] JUSTICE MEDINA, citing *Ex parte Abell* and quoting *Mellinger*, alleges that the Retroactivity Clause "goes beyond federal guarantees of property and due process." ___ S.W.3d ___ (Medina, J., concurring). While *Abell* recognized that proposition, it did so while simultaneously recognizing that "[i]n practice . . . retroactive lawmaking has not been viewed as the gross abuse of power once assumed." *Ex parte Abell*, 613 S.W.2d at 259–60. Further, commentators and jurists from other states have more recently recognized that specific retroactivity clauses should not be read overly broadly. *See, e.g.*, 1 GEORGE D. BRADEN, THE CONSTITUTION OF THE STATE OF TEXAS: AN ANNOTATED AND COMPARATIVE ANALYSIS 58 (1977) ("The other prohibition concerning 'retroactive laws' seems to spring from a

of appeals opinions. And it is more predictable and avoids confusion and ambiguity when the Legislature attempts to constitutionally craft a law affecting past conduct.

This Court's first significant discussion of retroactivity occurs in *Mellinger v. City of Houston*, 3 S.W. 249 (Tex. 1887). The City of Houston sued to recover taxes on property that would otherwise have been barred by a subsequently repealed statute of limitations. The Court ruled that the statute was not to be applied retroactively and thus *did not* specifically decide whether Mellinger had a vested right that would be violated by retroactive application of the law. *Id.* at 251–52. It then stated that "an action barred by the statute of limitations was forever barred" and explained that a law may be unconstitutionally retroactive "if a statute of limitations applied to existing causes barred all remedy, or did not afford a reasonable period for their prosecution; or if an attempt were made by law, either by implication or expressly, to revive causes of action already barred . . . ." *Id.* at 253–55. *Mellinger* did not hold that an unaccrued cause of action was a vested right subject to protection, but it did indicate that a shortening of the statute of limitations would require a grace

---

general suspicion regarding all retroactive laws of which the three mentioned [ex post facto, bills of attainder, and laws impairing the obligation of contracts] were notorious examples. Early judicial restriction of the scope of ex post facto laws to retroactive criminal laws may have prompted a desire to re-establish the broader sweep, which the prohibition had in the minds of some people, by general condemnation of retroactive laws."); *see also id.* at 59 (discussing the *Mellinger* dicta also quoted by JUSTICE MEDINA and commenting that the authoring justice's argument "excluded not only the specific guarantees of section 16 but the due course of law limitation as well. Although he perceived the growing scope of due process of law at the time of his opinion, Justice Straton could not have foreseen its remarkable subsequent development . . . . Thus, it has been said that laws are retroactive in the sense of section 16 only when they contravene another specific prohibition of the Constitution."); Bryant Smith, *Retroactive Laws and Vested Rights*, 5 TEX. L. REV. 231 (1926) (noting that, in most states at the time, the explicit retroactive law provisions in other states' constitutions were coterminous with due process). Regardless of whether the Retroactivity Clause in section 16 deserves a broader read than just due process, there is nothing in the text of the Constitution to suggest that it should apply to contingent expectancies such as exist in this case.

period to allow those who had not filed their cause of action to do so before the new limitations period would come into effect. *Id.*

Subsequent cases from this Court recognize that the Legislature cannot resurrect causes of action that have already been extinguished by retroactively lengthening the statute of limitations. *E.g.*, *Baker Hughes, Inc. v. Keco R. & D., Inc.*, 12 S.W.3d 1, 4 & n.12 (Tex. 1999); *Wilson v. Work*, 62 S.W.2d 490, 490–91 (Tex. 1933) (per curiam). This rule makes sense because "[t]o permit barred claims to be revived years later would undermine society's interest in repose, which is one of the principal justifications for statutes of limitations." *Baker Hughes*, 12 S.W.3d at 4. In other words, when the statute extinguished a cause of action, a defendant received a vested right of repose barring the extinguished claim.

In *City of Tyler v. Likes*, 962 S.W.2d 489 (Tex. 1997), a case upon which the Robinsons principally rely, this Court held that a modification of the Tort Claims Act to provide the city with sovereign immunity from the plaintiff's common law tort claims was not constitutionally retroactive. It recognized that the statute "affect[ed] a remedy" for the plaintiff, which usually does not implicate the Retroactivity Clause unless the "remedy is entirely taken away." *Id.* at 502 (citation omitted). We noted that "[t]he Legislature can affect a remedy by providing a shorter limitations period for an accrued cause of action without violating the retroactivity provision of the Constitution if it affords a reasonable time or fair opportunity to preserve a claimant's rights under the former law, or if the amendment does not bar all remedy." *Id.* (citing *Tex. Water Rights Comm'n v. Wright*, 464 S.W.2d 642, 649 (Tex. 1971); *Mellinger*, 3 S.W. at 254–55). Because the statute became effective seventeen months after her action accrued, the Court held that the plaintiff had a reasonable time to

preserve her rights, and thus the statute was not unconstitutional as applied. *Id.* *Likes* emphasizes (as discussed further below) that where the legislation affects the plaintiff's remedy without entirely taking it away, the legislation is not unconstitutionally retroactive. *Id.*

Finally, this Court has specifically held that the *Mellinger* retroactivity exception, requiring that a party receive reasonable time to preserve its rights, which was relied on in *Likes*, has an exception itself. In *Owens Corning v. Carter*, 997 S.W.2d 560 (Tex. 1999), the Court upheld a retroactive application of an amended borrowing statute against a constitutional challenge. At the time the lawsuit underlying the case was filed, Texas's borrowing statute provided that a non-Texan who was injured in a foreign state could bring an action in Texas, even if the limitations period in the plaintiff's home state had run, so long as the action was begun within the time provided by Texas law. *Id.* at 565; *cf. Igal v. Brightstar Info. Tech. Grp., Inc.*, 250 S.W.3d 78, 90–91 (Tex. 2008) (holding that res judicata bars relitigation of administratively determined facts and distinguishing a rule where "a claimant whose action is precluded by limitations in one state court may still be able to pursue the same action in a different state with a longer limitations period"). In early 1997, while the plaintiffs' lawsuits were pending, the Legislature amended the statute to require, among other things, that the action is begun in Texas within the time provided both by Texas law and the law of the foreign state in which the wrongful act, neglect, or default took place. *Carter*, 997 S.W.2d. at 572 (citing TEX. CIV. PRAC. & REM. CODE § 71.031(a)(3)). The plaintiffs challenged the law as unconstitutionally retroactive, and we rejected that challenge. First, we recognized that the plaintiffs did not have any settled expectations in the continuance of the current law—the limitations period. Second, we noted that "requiring a grace period for otherwise time-barred claims would defeat the

very purpose of the borrowing statute: a plaintiff should not be able to gain greater rights than he would have in the state where the cause of action arose and where he lives simply by bringing suit in Texas." *Id.* at 573. In other words, even if the statute of limitations "grace period" rule articulated in *Mellinger* were to apply, because Alabama plaintiffs applying Alabama law had no expectation in the continuation of the borrowing statute, "such concerns play a minimal role and do not justify the application of a grace period." *Id.* (citing *In re TMI*, 89 F.3d 1106, 1116 (3d Cir. 1996)).

This Court has recognized that contingencies, future expectations, and mere rules of law do not constitute vested rights. We have upheld retroactivity challenges only when it interferes with a final judgment, involved the vested parent-child relationship, or when the statute attempts to revive a cause of action previously barred by the statute of limitations. *E.g.*, *Milam County*, 54 Tex. at 168; *In re A.V.*, 113 S.W.3d 355, 361 (Tex. 2003); *Baker Hughes*, 12 S.W.3d at 5. Otherwise, we have held on many occasions that laws, even those that explicitly apply retroactively, do not violate the Retroactivity Clause in article 1, section 16. *See, e.g.*, *David McDavid Nissan*, 84 S.W.3d at 219–20; *Carter*, 997 S.W.2d at 573; *Likes*, 962 S.W.2d at 502; *Barshop*, 925 S.W.2d at 634; *Ex parte Abell*, 613 S.W.2d at 262; *Exxon Corp. v. Brecheen*, 526 S.W.2d 519, 525 (Tex. 1975); *McCain*, 284 S.W.2d at 900; *City of Dallas v. Trammell*, 101 S.W.2d 1009, 1012–13 (Tex. 1937).

The Robinsons' expectation that they could recover damages against Crown Cork as one of the numerous defendants in their lawsuit was low at the time Mr. Robinson's common law causes action accrued. Numerous contingencies surrounded their litigation, not the least of which were the identity of the potential tortfeasors and proving causation against Mundet from among nine other

defendants.[14] If they knew that Mundet was one of the parties responsible for producing asbestos that Mr. Robinson was exposed to, it is unlikely that they knew that Mundet had been bought by Crown Cork decades prior. This is not a situation where the obligations of two parties are identified by contract, where the government seeks to interfere with the parent-child relationship, or a party seeks to resurrect a claim long extinguished by a statute of limitations. Our case law is consistently hesitant to void statutes outside those categories as retroactive, and this is not an area into which our jurisprudence should expand.[15]

Finally, a "brighter-line" view provides more certainty and predictability and avoids confusion and ambiguity. Causes of action accrue when claimants are on notice of their injury and have the opportunity to seek a judicial remedy, when the injury occurs, or at the death of a promisor. *Quigley v. Bennett*, 227 S.W.3d 51, 58 (Tex. 2007); *Provident Life & Accident Ins. Co. v. Knott*, 128 S.W.3d 211, 221 (Tex. 2003). Certainly, these accruals almost always occur prior to the filing of a lawsuit (otherwise the claim would not be ripe). Therefore, accepting the Court's position that a right to file a lawsuit is a vested right would, in effect, preclude the Legislature from taking any action to modify or restrict a cause of action for some lawsuits that had not even been filed yet. It would further lead to unnecessary uncertainty and confusion.

---

[14] The causation question to the jury may have listed ten potential defendants, the number remaining at the time Crown Cork's partial summary judgment motion was granted.

[15] JUSTICE MEDINA argues that the final judgment rule is inappropriate because "it is the right to sue itself—the lawsuit—that is being taken away, not the final outcome." ___ S.W.3d ___ (Medina, J., concurring). On the contrary, the Robinsons sued Crown Cork. There were pleadings, discovery, and motion practice. Crown Cork had to prove that it was entitled to the Chapter 149 defense, which it did through summary judgment. In fact, if Crown Cork's prior payout had been below Mundet's fair value, the Robinsons could recover against Crown Cork, but that question must be established in the lawsuit. To the extent there is an expectation to file and prosecute a cause of action (and not to recover on a claim), that expectation was satisfied in this case.

The Robinsons did not have a vested right in their accrued causes of action when Mr. Robinson was diagnosed with mesothelioma. At most, they had contingent belief that they might be able to recover against Crown Cork or the other defendants. At the time Mr. Robinson's cause of action accrued, the Robinsons had not taken any action in reliance on the law at the time, and they had no entitlement to the law as it existed. Even after they filed their action and received a partial summary judgment that Crown Cork was liable as a successor corporation, they had an unliquidated interest in a personal injury tort claim that was not recognized as a property right—vested or otherwise—at common law. The expectation further deteriorated when Mr. Robinson passed away, and Mrs. Robinson asserted new statutory survival and wrongful death claims. I would hold that, when the Legislature limited recovery for asbestos claims only against innocent successor corporations that had caused no injury to claimants, the Legislature did not deprive the Robinsons of a vested right of action against Crown Cork, and thus Chapter 149 is not unconstitutionally retroactive as applied to the Robinsons. The Robinsons are not foreclosed, however, from going forward with their claims against other entities, consistent with the Act's limitations on recovery.

2. Police Power Balancing

The Robinsons argue that there is no room for a balancing of interests in the retroactivity analysis. They contend that if a right is vested, it cannot be affected by retroactive legislation.[16]

[16] The Robinsons also argue that article I, section 29 of the Texas Bill of Rights, compels that result. I agree with the Court that section 29 does not determine whether and how the substantive portions of the Bill of Rights apply. ___ S.W.3d ___. Furthermore, section 29 is generally cited only for the proposition that courts have the power to declare laws unconstitutional. 1 BRADEN at 86–87, *cited in Oakley v. State*, 830 S.W.2d 107, 110–11 (Tex. Crim. App. 1992); *cf. Travelers Ins. Co. v. Marshall*, 76 S.W.2d 1007, 1011 (Tex. 1934) (citing to section 29, among other things, to depart from the U.S. Supreme Court's view and declare unconstitutional a law impairing the obligation of contracts); *see also City of Beaumont v. Bouillion*, 896 S.W.2d 143, 148–49 (Tex. 1995) ("Section 29 has been interpreted as follows: any provision of the Bill of Rights is self-executing to the extent that anything done in violation of it is void."); *Republican*

Regardless of whether the "vested rights" threshold exists, a balancing of interests and expectations is an integral part of retroactivity analysis in Texas jurisprudence, the jurisprudence of other states, and commentators and scholars in this area. Although the Court also balances interests, much in the same way I believe our jurisprudence demands that we balance interests pursuant to the state's police power, the Court's analysis overlooks a few critical points.

Courts carefully recognized that a retroactive law affecting vested rights may nonetheless be constitutional if the overriding public purpose of the act and the Legislature's legitimate exercise of its police power outweigh the interests or expectations of the affected party. *E.g.*, *Barshop*, 925 S.W.2d at 633–34. As Justice Oliver Wendell Holmes, Jr. recognized in the context of a takings suit based on a statute retroactively preventing a mining company exercising its contractual rights to mine coal under a house:

> Government hardly could go on if to some extent values incident to property could not be diminished without paying for every such change in the general law. As long recognized, some values are enjoyed under an implied limitation and must yield to the police power. But obviously the implied limitation must have its limits, or the contract and due process clauses are gone.

Pa. Coal Co. v. Mahon, 260 U.S. 393, 413 (1920); *see also In re Marriage of Bouquet*, 546 P.2d 1371, 1376 (Cal. 1976) (noting that vested rights may be impaired when "reasonably necessary to the protection of the health, safety, morals, and general well being of the people"); *Phillips v. Curiale*, 608 A.2d 895, 902 (N.J. 1992); Hochman, 73 HARV. L. REV. at 697 (advocating the abrogation of the "vested rights" concept and instead analyzing U.S. Supreme Court jurisprudence

---

Party of Tex. v. Dietz, 940 S.W.2d 86, 89–91 (Tex. 1997) (analyzing section 29 and holding that the Texas Bill of Rights protects against government, not private, conduct).

on retroactivity balancing the nature of the public interest served, the extent to which the statute modifies the asserted pre-enactment right, and the nature of the right which the statute alters).

In considering the balancing test to be applied this case, the court of appeals balanced the proper exercise of the police power (weighing presumably not only the validity of the exercise, but the importance as well) against the "detrimental impact on plaintiffs such as the Robinsons," noting that the statute was narrowly tailored to protect the most innocent corporations but still "leaving the pool of potential [asbestos] defendants as large as possible . . . ." 251 S.W.3d at 532–33. The Court, on the other hand, balances: (1) the nature and strength of the public interest served by the statute as evidenced by the Legislature's factual findings; (2) the nature of the prior right impaired by the statute; and (3) the extent of the impairment. ___ S.W.3d ___. Using this test, the Court determines that Chapter 149 is unconstitutionally retroactive as applied to the Robinsons.

The Court asserts that what "constitutes an impairment of vested rights is too much in the eye of the beholder to serve as a test for unconstitutional retroactivity. . . [and there is] a deep division over whether a retroactive restriction on a cause of action impairs vested rights. " __ S.W.3d ___. So the Court vanquishes the vested rights jurisprudence because it is too hard to decide and it believes some cases applying it in the past were inconsistent. What areas of jurisprudence that span two centuries are not subject to the same criticisms? No one who has raised children doubts the statement that bathing a baby is challenging and risky and can be a tough chore, but it must be done. The Court throws out the baby it once embraced along with the bath water. It will come as no surprise that the new balancing test the Court establishes for evaluating retroactive legislation will be fraught with at least as many similar challenges, but have no precedents for guidance. The

balancing test in Texas retroactivity jurisprudence is, candidly, a new baby in new bath water. Certainly, there are limits imposed by the Constitution on legislative power (as well as executive and judicial authority), but as Justice Scalia insightfully explained about a balancing test under the Commerce Clause of the U.S. Constitution:

> The problem is that courts are less well suited than Congress to perform this kind of balancing in every case. The burdens and the benefits are always incommensurate, and cannot be placed on the opposite balances of a scale without assigning a policy-based weight to each of them. It is a matter not of weighing apples against apples, but of deciding whether three apples are better than six tangerines. Here, on one end of the scale (the burden side) there rests a certain degree of suppression of interstate competition in borrowing; and on the other (the benefits side) a certain degree of facilitation of municipal borrowing. Of course you cannot decide which interest "outweighs" the other without deciding which interest is more important to you. And that will always be the case. I would abandon the . . . balancing enterprise [used in dormant commerce clause cases] altogether. . . .

Dep't of Revenue of Ky. v. Davis, 553 U.S. 328, 359 (2008) (Scalia, J., concurring in part) (emphasis added).

Assuming that the Robinsons' accrued but unliquidated cause of action for personal injury is a vested right under the Retroactivity Clause, I consider whether the Legislature's exercise of its general police power outweighs the private interests at issue.

a. The Balancing Test to be Applied

We have not had the opportunity to fully discuss the contours of the police power exception vis-a-vis a retroactivity challenge. In *Barshop v. Medina Underground Water Conservation District*, we upheld the Edwards Aquifer Act against a retroactivity challenge where landowners above the Edwards Aquifer argued that the Act affected their vested right to withdraw unlimited amounts of water from the Aquifer. 925 S.W.2d 618, 634 (Tex. 1996). Without deciding whether rights to

groundwater were vested rights, we stated that because the authority was "required for the effective control of the [aquifer] to protect . . . life, . . . water supplies, the operation of existing industries, and the economic development of the state" and the aquifer itself was "vital to the general economy and welfare of this state," that the Retroactivity Clause in the Texas Constitution does not "absolutely bar the Legislature from enacting such statutes." *Id.* (quoting Act of May 30, 1993, 73d Leg., R.S., ch. 626 §§ 1.01, 1.06(a), 1993 Tex. Gen. Laws 2355, *amended by* Act of May 29, 1995, 74th Leg., R.S., ch. 261, 1995 Tex. Sess. Law Serv. 2505). In *In re A.V.,* we upheld retroactive application of a statute allowing the termination of parental rights for those who are incarcerated for an extended period of time because the state has a duty to protect the safety and welfare of its children, and "[t]his 'valid exercise of the police power by the Legislature to safeguard the public safety and welfare' is a recognized exception to the unconstitutionality of retroactive laws." 113 S.W.3d 355, 361 (Tex. 2003) (quoting *Barshop*, 925 S.W.2d at 633–34). In *Lebohm v. City of Galveston*, we struck down a statute providing the City of Galveston a complete defense for injury caused by defective roads, streets, sidewalks, or other public places within the city limits, noting that "[n]o broad public policy or general welfare considerations are advanced to justify the charter provision as a reasonable exercise of police power [and w]e can think of none that could be advanced inasmuch as the operational effect of the provision extends only to the city limits . . . ." 275 S.W.2d 951, 955 (Tex. 1955).

Other states, however, have created a fuller rubric for examining the balance between the police power and the prohibition against retroactive laws. Each formulation seems to balance the nature of the public interest articulated by the Legislature, the extent to which the statute modifies

or abrogates the vested right, the nature of the right the statute alters, and the fairness of the application of the new statute.[17] The Robinsons' retroactivity challenge is an as-applied challenge, and thus the Robinsons must demonstrate that the statute is unconstitutional as it operates in practice against them. *See Tex. Mun. League*, 74 S.W.3d at 381. Therefore, it is appropriate to balance the expectations the Robinsons lost with the enactment of Chapter 149 against the degree of harm sought to be protected by the legislative enactment.

When considering the application of the police power, this case is a close one. It does not involve the potential shortage of water for millions of people, *Barshop*, 925 S.W.2d at 634, and it does not involve the state's duty as *parens patriae* to children, *In re A.V.*, 113 S.W.3d at 361. But there are five reasons that Chapter 149 was a legitimate exercise of the police power, as applied to the Robinsons. The first three demonstrate that the Robinsons' expectations in the continued state

[17] *E.g.*, *Phillips*, 608 A.2d at 902 (articulating a similar test balancing: "(1) the nature and strength of the public interest served by the statute, (2) the extent to which the statute modifies or abrogates the asserted right, and (3) the nature of the right that the statute alters" and discussing whether the application of the statute would result in "manifest injustice"); *Estate of DeWitt*, 54 P.3d at 855 (balancing the vested right against public health and safety concerns, the state's police powers to regulate certain practices, and other public policy concerns, so long as there is a rational relationship between the government interest that is asserted and the retroactive legislation); *Marriage of Bouquet*, 546 P.2d at 1376 (examining "the significance of the state interest served by the law, the importance of the retroactive application of the law to the effectuation of that interest, the extent of reliance upon the former law, the legitimacy of that reliance, the extent of actions taken on the basis of that reliance, and the extent to which the retroactive application of the new law would disrupt those actions"); *Reed v. Brunson*, 527 So. 2d 102, 115–16 (Ala. 1988) (eliminating co-employee lawsuits, while noting that "[i]t is certainly within the police power of the legislature to act to enhance the economic welfare of the citizens of this state [by eliminating the common law cause of action]. . . in an attempt to eradicate or ameliorate what it perceives to be a social evil"); *Mergenthaler v. Asbestos Corp. of Am.*, 534 A.2d 272, 276–77 (Del. Super. Ct. 1987) (noting that the determination of retroactivity "rests on subtle judgments concerning the fairness of applying the new statute" and noting that the considerations of vested rights "may be moderated or overcome if the statute is in furtherance of the general police power for concerns of public, health, morals, safety, or general welfare" and holding retroactive application of workers' compensation benefits to asbestos claimants who were exposed prior to coverage was not unconstitutionally retroactive).

of the law, as-applied, are low. The second two demonstrate that the Legislature's exercise of the police power was rational, justifiable, and reasonably limited.

First, at common law, Mr. Robinson's claims were not "property," were not assignable, and were extinguished when he passed away. It is only by statute that wrongful death claims continue to exist. The Legislature has broad authority to modify rights it creates by statute. "When a right or remedy is dependent on a statute, the unqualified repeal of that statue operates to deprive the party of all such rights that have not become vested or reduced to final judgment," and "all suits filed in reliance on the statute must cease . . . ." *Quick v. City of Austin*, 7 S.W.3d 109, 128 (Tex. 1998). This Court has further held that "[i]t is generally conceded that a right of action given by a statute may be taken away at any time, even after it has accrued and proceedings have been commenced to enforce it." *Nat'l Carloading Corp. v. Phoenix-El Paso Exp.*, 176 S.W.2d 564, 568 (Tex. 1944). Even assuming the Robinsons' acts of filing a lawsuit and receiving partial summary judgment resulted in some vested expectation, the Robinsons' claims, based in common law negligence and products liability, may continue only because of the statutory rights of survival, wrongful death, and successor liability through corporate merger. Accordingly, the Legislature retained discretion to modify the nature of their rights through Chapter 149's restriction on the amount of total damages recoverable against Crown Cork.

Second, Chapter 149 does not interfere with a claim sounding in contract or a claim for an injury to real or personal property, which was protected much more stringently at common law. *E.g.*, *Landgraf*, 511 U.S. at 271 (noting that the "largest category of cases in which [the Supreme Court of the United States has] applied the presumption against statutory retroactivity has involved new

provisions affecting contractual or property rights, matters in which predictability and stability are of prime importance"). The Robinsons did not have an established relationship with Crown Cork (or even Mundet) with predetermined expectations that may have vested upon the occurrence of a contractual condition. Until this litigation, it is unlikely that the Robinsons even knew that Crown Cork was a successor to Mundet, or that Mundet manufactured asbestos products used in the ships on which Mr. Robinson was stationed. This weakens the expectancy the Robinsons may have had in their cause of action.

Third, Chapter 149, as applied, does not deprive the Robinsons of their cause of action against Crown Cork, and it does not deprive the Robinsons of real and substantial remedies for their alleged wrongs. The Robinsons sued twenty other defendants in this case and recovered approximately $850,000 from a number of the defendants for their injuries. They alleged that "[e]ach exposure to [asbestos-containing products] cause and/or contributed to Plaintiffs' injuries . . ." and "[t]he actions of each and every Defendant are a producing and proximate cause of Plaintiffs' injuries and damages." Thus, the Robinsons lost only the right to recover against Mundet/Crown Cork, which had reached its maximum payout under Chapter 149. But the statute did not impair their right to seek substantial recoveries against other defendants, which were involved in the business of asbestos insulation for the same injuries to Mr. Robinson. There is no vested right in a remedy, and the Legislature may retroactively modify remedial laws, affect a court's jurisdiction, or provide alternative procedures or remedies. *See Tex. Mun. Power Agency v. Pub. Utils. Comm'n*, 253 S.W.3d 184, 198 (Tex. 2007); *David McDavid Nissan*, 84 S.W.3d at 219; *Ex*

parte Abell, 613 S.W.2d at 260; *Mellinger*, 3 S.W. at 254.[18] This case is a multi-defendant lawsuit where it is difficult to determine which asbestos products were the cause of Mr. Robinson's injuries.

Chapter 149 does not deprive the Robinsons of any cause of action or prohibit their right to sue any party. It simply cuts off recovery against innocent defendants at the point that the defendants have paid out for asbestos-related liabilities the fair market value of the assets of the company acquired. Importantly, Chapter 149 does not make any defendants immune from suit. Chapter 149 limits the remedy under prescribed circumstances. It is not disputed that if, for instance, Mundet's assets, acquired by Crown Cork, had a fair market value of $1 billion, Crown Cork could still be liable for damages in this suit. But because Crown Cork's asbestos-related liability payments exceeded the asset value of Mundet, it had reached the statutory limit for its liabilities as successor to Mundet. Even assuming for the sake of argument that the removal of recovery against one defendant in such a suit is not merely a change in remedy but a deprivation of a right, in this case the infringement was not a complete bar to all recovery for the wrongs alleged. Accordingly, the Robinsons were able to proceed against other defendants for the same claims based on admittedly the same injury.

Fourth, the Legislature rationally drew Chapter 149 to address a problem it perceived as very important—the effects on the Texas economy and employment because of the bankruptcy of

---

[18] Courts have repeatedly recognized that a statute depriving a court of jurisdiction to hear a dispute does not implicate a vested right. *David McDavid Nissan*, 84 S.W.3d at 220; *In re A.D.*, 73 S.W.3d 244, 249 (Tex. 2002); *see also Landgraf*, 511 U.S. at 274 (recognizing that statutes that confer or oust jurisdiction are regularly applied retroactively). If the mere right to sue were the constitutionally protected interest, then the Robinsons would have it, and those whose claims were no longer justiciable in a court of competent jurisdiction would not. Therefore, the right protected by the Retroactivity Clause must truly be focused on the substance of the claim—the actual recovery—rather than the right to get to a recovery.

companies that never manufactured, sold, or distributed asbestos-containing products. The asbestos litigation "crisis" had been well recognized in academic journals and even court decisions at the time the Legislature debated and enacted House Bill 4. *E.g.*, Orszag, 44 S. TEX. L. REV. at 1078–81; *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591, 598 (1997) ("'The most objectionable aspects of asbestos litigation can be briefly summarized: dockets in both federal and state courts continue to grow; long delays are routine; trials are too long; the same issues are litigated over and over; transaction costs exceed the victims' recovery by nearly two to one; exhaustion of assets threatens and distorts the process; and future claimants may lose altogether.'" (quoting Judicial Conference Ad Hoc Committee on Asbestos Litigation, *Report to the Chief Justice of the United States and Members of the Judicial Conference of the United States*, at 2–3 (Mar. 1991))); *Humble Sand & Gravel, Inc. v. Gomez*, 146 S.W.3d 170, 203–04 (O'Neill, J., dissenting) (recognizing the crisis and noting that "the solution to these problems is legislative, not judicial"); Paul F. Rothstein, *What Courts Can Do in the Face of the Never-Ending Asbestos Crisis*, 71 MISS. L.J. 1, 1, 4–9 (2001) (describing the "ever-expanding" crisis, and the filing of claims "[o]ver $20 billion and thirty bankruptcies later"). Others examined the potential for unfairness when a larger corporation's assets became susceptible to the stress of asbestos liability from a long-since acquired subsidiary. As stated by one commentator:

> [I]n asbestos litigation, courts have cast aside the theory behind the [successor liability] doctrine. Instead of limiting the successor corporation's liability to the market value of the acquired corporation, or even to that value plus any profits generated by the acquisition, courts have allowed successors to be subjected to limitless liability[, which is a] runaway application of the successor liability doctrine.

Mark H. Reeves, Note, *Makes Sense to Me: How Moderate, Targeted Federal Tort Reform Legislation Could Solve the Nation's Asbestos Litigation Crisis*, 56 VAND. L. REV. 1949, 1972–73 (2003); *see also, e.g.,* Lester Brickman, *The Asbestos Litigation Crisis: Is there a Need for an Administrative Alternative?*, 13 CARDOZO L. REV. 1819, 1831–33 (1992) (recognizing that the asbestos litigators invoked successor liability laws "so as to reach into the deeper pockets of the companies that bought far smaller entities that manufactured asbestos-containing materials regardless of the culpability of the purchasing companies").

The Statement of Legislative Intent filed by Representative Nixon recognized an "unfairness" existing in corporate merger law where a "larger successor can easily be bankrupted by the asbestos-related liabilities it innocently received from a much smaller predecessor with which it merged may [sic] decades ago." H.J. of Tex., 78th Leg., R.S. 6042, 6043 (2003) (HB 4 Statement of Legislative Intent). The Statement also recognized that "Corporations actually in the asbestos business and their successors through merger have been financially drained by decades of litigation. As a result, nearly 70 such corporations have sought protection through bankruptcy. The cost in jobs and pension benefits, to cite just two examples, has been substantial." *Id.* at 6044. These findings were recognized in the House floor during debate, and were codified into the omnibus statute two years later that reformulated the method in which asbestos claims are litigated in Texas. *See* Act of May 19, 2005, 79th Leg., R.S., ch. 97, § 1 (b)–(h), 2005 Tex. Gen. Laws 169, 169–70 (codified at TEX. CIV. PRAC. & REM. CODE §§ 90.001–.012). Protection of Texas's economy and jobs is certainly a rational basis for enacting legislation, and here there is a sufficient reason for the Legislature to enact the statute that it did.

Finally, the class of persons protected by the legislation has a rational relation to the legislative purpose of the legislation. The Legislature chose to relieve liability on "innocent successors," companies that did not manufacture or sell asbestos, but rather acquired a company that did. And the Legislature mediated the perceived unfairness not by foreclosing a remedy altogether, but merely limiting the remedy to the fair value of the acquired company's assets. TEX. CIV. PRAC. & REM. CODE §§ 149.001, .003. In this case, that is exactly what happened. Crown Cork's total liabilities for the asbestos sold and manufactured by Mundet far exceeded Mundet's present-day fair value. Had Mundet never been acquired by Crown Cork, its payouts for asbestos liability would have exceeded its value as a going concern, it likely would have been bankrupt, and, almost certainly, no money would have remained to pay the Robinsons' claims if they obtained a judgment against it. *See In re Joint E. & S. Dists. Asbestos Litig.*, 237 F. Supp. 2d 297, 302–06 (E.D.N.Y. 2002) (discussing the factual and procedural background of the bankruptcy of the Manville Corporation, the establishment of the Manville Trust following its bankruptcy to pay asbestos claims, and its reformation once it was discovered that the trust was "deeply insolvent" and that beneficiaries would not be able to be paid in full, or even paid at all). Crown Cork chose to acquire Mundet through a statutory merger and not through an asset purchase, but it remains the purview of the Legislature to modify the legal effect of continuing liability of such mergers in Texas to avoid the ruin of businesses possessing assets that had nothing to do with asbestos production or manufacture. Importantly, the legislation restricts neither the right nor the remedy of plaintiffs who prove that Crown Cork itself caused them injury; it only addresses imputed successor liability.

In short, for the reasons articulated above, the Robinsons' interest in their accrued, but unliquidated cause of action, is low. Their vested expectancy, if any, is minimal. Their right of recovery for the injuries complained of was not foreclosed. And their relation to Crown Cork was attenuated. The public interest in the legislation, and its retroactivity, is moderate. The Legislature acted in response to a known litigation crisis and acted with a reasonable and narrowly tailored response based on the current climate. Individuals may or may not personally believe in the wisdom of the particular legislation, but it is not our province to second-guess legislation because we do not agree with its policy. *See McIntyre v. Ramirez*, 109 S.W.3d 741, 748 (Tex. 2003).

b. A Critique of the Court's Test

Although I disagree with the Court's analytical framework in arriving at its three-factor balancing test and the unfoundedly rigorous legal standards it applies, I do not wholesale disagree with the categories it has set up to determine whether a retrospective law is unconstitutionally retroactive. However, the Court's application of the law to the facts in this case creates more difficulties for the Legislature and the courts of our state in reviewing retroactive laws, and creates significant and unnecessary impediments to the Legislature's ability to correct law and make beneficial legislative changes in the future.

First, I disagree with the "compelling reason" standard applied by the Court. Nothing in our precedent, or any case law, requires such a heightened review of retroactive legislation. The Court repeatedly mentions the heavy presumption against retroactive legislation, but the presumption falls away in this case. The presumption is removed when a legislature "itself has affirmatively considered the potential unfairness of retroactive application and determined that it is an acceptable

price to pay for the countervailing benefits." *Landgraf*, 511 U.S. at 272–73. Not only did the Legislature "consider the potential unfairness" in this case, it voted to apply Chapter 149 retroactively by a supermajority. The Court's point that we should view fully retroactive legislation with skepticism is well taken; however, the presumption against retroactivity is unnecessary when the Legislature expressly concludes that the statute is to be applied retroactively. *Id.*; *accord Lockheed Corp. v. Spink*, 517 U.S. 883, 896–97 (1996) ("[When] the temporal effect of a statute is manifest on its face, 'there is no need to resort to judicial default rules,' and inquiry is at an end." (quoting *Landgraf*, 511 U.S. at 280)); *Tello v. Dean Witter Reynolds, Inc.*, 410 F.3d 1275, 1281–82 (11th Cir. 2005) ("[The] presumption and analysis, however, are unwarranted when Congress states its unambiguous intention that the statute apply retroactively to pre-enactment conduct . . . ."). Because it is for the Legislature to initially determine whether the benefits of retroactive legislation outweigh the detriments (at least to the statute as a whole), we are not commanded to review that decision to determine whether their justification was "compelling."

Second, the Court's evaluation of the Robinsons' interest seems to be focused on its pretrial evaluation of not only the existence of the Robinsons' claims, but their strength. The Court argues that the Robinsons' claims have "a substantial basis in fact" and that their claims are "mature tort[s], [such that] recovery is more predictable." ___ S.W.3d ___. I would not require courts in this state to evaluate plaintiffs' claims or defendants' defenses, under the Retroactivity Clause on whether the parties are likely to win or their claims have a "substantial basis in fact." As any experienced lawyer will acknowledge, the strength of a claim and the likelihood of success in litigation may be separate and independent things. This consideration is unwieldy, suggesting that the Legislature can enact

retroactive legislation affecting substantive rights so long as there is a chance that it will not matter, at the end of the day.

Third, the statute does not affect settled expectations to the degree alleged by the Court. The Court alleges that the statute will affect the recovery "to which the Robinsons are entitled," once again presuming that the Robinsons' claims against Crown Cork will be successful. ___ S.W.3d ___. As discussed above, the Robinsons had no pre-tort contact with Crown Cork, and had no settled expectation that Mundet would be acquired by a richer company able to pay for Mundet's debts.

Fourth, the Court penalizes the Legislature because the legislation does not contain expressed "findings to justify Chapter 149." ___S.W.3d___. The Court does not consider the well-known facts about the asbestos crisis, Crown Cork's financial stake, subsequently codified legislative findings, or the possibility that other businesses may be subjected to financial ruin, as these facts were not included in the actual statutory language in House Bill 4. While I agree that such statutory findings are most helpful in determining legislative intent, *United States v. Lopez*, 514 U.S. 549, 562–63 (1995) (concerning the Commerce Clause), I am aware of no Texas case that requires them. And, in fact, if the Legislature were to be so required for every bill in which their police power may be challenged, certainly the legislative process would be significantly burdened. Rational basis review does not require the Legislature to provide any particular purpose; the law will be upheld "if there is any conceivable state of facts which would support it." *Carmichael v. S. Coal & Coke Co.*, 301 U.S. 495, 509 (1937). The law may be valid even if the Legislature did not consider the valid

purposes, but so long as the purpose "may have been considered to be true." *Nordlinger v. Hahn*, 505 U.S. 1, 11 (1992) (citations omitted).

Thus, I believe it is imprudent to abandon our vested rights jurisprudence, and as applied, the Robinsons' do not have vested rights in their causes of action against Crown Cork. Even if the Robinsons' claims are vested rights, I would hold that, on balance, the Legislature's exercise of police power outweighs the Robinsons' rights, and thus Chapter 149 does not violate article I, section 16 of the Texas Constitution.

B. Special Law

Because the Court determines that Chapter 149 is unconstitutionally retroactive as applied to the Robinsons, it does not address the Robinsons' second argument, that Chapter 149 is an unconstitutional "special law." I would hold that it is not.

Article III, section 56(b) of the Texas Constitution provides that "where a general law can be made applicable, no local or special law shall be enacted." TEX. CONST. art. III, § 56(b). A "special law" is a statute that "relates to *particular* persons or things of a class," rather than the class as a whole. *Clark v. Finley*, 54 S.W. 343, 345 (Tex. 1899) (emphasis added), *cited in Lucas v. United States*, 757 S.W.2d 687, 700 (Tex. 1988); *see also Ford Motor Co. v. Sheldon*, 22 S.W.3d 444, 456 (Tex. 2000) (defining a "special law" as one that "impermissibly distinguishes between groups on some basis other than geography" (citing *Tex. Boll Weevil Eradication Found. v. Lewellen*, 952 S.W.2d 454, 465 (Tex. 1997))). The prohibition on special laws was added to the Texas Constitution of 1876 as one of many practical answers to the prevalent abuse of legislative and executive power that occurred in Texas following the Reconstruction. A.J. Thomas, Jr. & Ann

Van Wynen Thomas, *The Texas Constitution of 1876*, 35 TEX. L. REV. 907, 915 (1957). In one session of the post-Reconstruction legislature five hundred special laws were passed. *Id.* Section 56 was thus seen to prevent "logrolling,"[19] to ensure against the granting of special privileges, and to prevent lawmakers from trading votes "for the advancement of personal rather than public interest." *Miller v. El Paso Cnty.*, 150 S.W.2d 1000, 1001 (1941); *Sheldon*, 22 S.W.3d at 456.

In the early twentieth century, the Court developed a test for reviewing whether a law providing a privilege to a particular class is in actuality a veiled attempt to provide a privilege to a particular member of the class. *See Sheldon*, 22 S.W.3d at 450–51; *Maple Run at Austin Mun. Util. Dist. v. Monaghan*, 931 S.W.2d 941, 945 (Tex. 1996); *Robinson v. Hill*, 507 S.W.2d 521, 525 (Tex. 1974); R.H.O, Recent Case, *Statutes—Special Laws—Reasonableness of Classification*, 11 TEX. L. REV. 134, 134–35 (1932) (collecting cases describing the legal standard for review of a special law). The Court first determines whether there is a reasonable basis for the classification made by the law, and then determines whether the law operates equally on all within the class. *Rodriguez v. Gonzales*, 227 S.W.2d 791, 793 (1950); *Sheldon*, 22 S.W.3d at 451. Only if the law fails both tests is it a special law and unconstitutional.

The determination of a "reasonable basis" for the classification is not an invitation for the Court to engage in weighing the relative pros and cons of a particular policy choice made by the Legislature. As stated by this Court over 100 years ago:

---

[19] "Logrolling" has been defined by our Courts of Appeals as "the inclusion in a bill of several subjects having no connection with each other in order to create a combination of various interests in support of the whole bill," *Skillern v. State*, 890 S.W.2d 849, 861 (Tex. App—Austin 1994, no writ) (citations omitted), and "trading votes to advance personal rather than public interests," *Diaz v. State*, 68 S.W.3d 680, 684 (Tex. App.—El Paso 2000, pet. denied).

> Now, we do not propose to be led off into any extended discussion as to what is a proper class for the application of a general law. The tendency of the recent decisions upon the subject, as it seems to us, is to drift into refinements that are rather more specious than profitable. . . . To what class or classes of persons or things a statute should apply is, as a general rule, a legislative question. When the intent of the legislature is clear, the policy of the law is a matter which does not concern the courts.

Clark, 54 S.W. at 345–46. We do not analyze the Legislature's classification to determine whether the classification is a good or bad idea. *See Smith v. Davis*, 426 S.W.2d 827, 831 (Tex. 1968). Rather we analyze to ensure that the classification is not made to "evade the prohibition of the constitution as to special laws by making a law applicable to a pretended class, which is, in fact no class . . . ." *Clark*, 54 S.W. at 345. We presume the statute is valid, and "a mere difference of opinion" between the Court and the Legislature will not be sufficient to overcome the presumption of validity. *Smith*, 426 S.W.2d at 831.

The *Rodriguez* test's two-part structure provides the framework to determine whether a class is a "pretended class." The first part of the test examines the delineated class vis-a-vis the purpose of the legislation. *Rodriguez*, 227 S.W.2d at 793. For example, if the purpose of the law is to provide tax relief to businesses in the sports entertainment industry, but the tax relief is given only to businesses belonging to or supporting teams in leagues or conferences with "National" in their name but not with leagues or conferences with "American" in their name, the classification would likely have no rational relation to the purpose of the statute.

The second part of the test examines whether similarly situated parties are treated similarly under the classification, or whether the classification makes an irrational category considering the intent of the statute. *See, e.g.*, *Rodriguez*, 227 S.W.2d at 794 (holding that statute setting out special

procedures for collecting delinquent taxes on parcels of land greater than 1,000 acres situated in counties bordering Mexico and whose title emanated from the King of Spain as an unconstitutional special law, as there was "no substantial difference in the situation or circumstance of border counties relating to suits for delinquent taxes"); *Miller*, 150 S.W.2d at 1002–03 (holding as unconstitutional a statute providing an economic development tax only in counties meeting population requirements, due to the fact that the statute's classification was not distinct in any substantial manner from other counties in the state). Back to the example, the tax relief statute above would likely be unconstitutional, as its effect is to provide relief to the Houston Astros and the Dallas Cowboys and the businesses that support them (as the Astros are a member of the National League, and the Cowboys are a member of the National Football Conference), but would not provide relief to supporters of the Houston Texans and the Texas Rangers (as the Texans are a member of the American Football Conference and the Rangers are a member of the American League). The classification is a "pretended class" because the classification has no relation to the purpose of the law and treats similarly situated teams differently. Although the Court does not defer to the Legislature to determine whether a law is general or special, it does defer to the Legislature's policy choices and presumes that law is constitutional. *See Smith*, 426 S.W.2d at 831; *McIntyre v. Ramirez*, 109 S.W.3d 741, 748 (Tex. 2003) ("Our role here, however, is not to second-guess the policy choices that inform our statutes or to weigh the effectiveness of their results; rather, our task is to interpret those statutes in a manner that effectuates the Legislature's intent.").

In this case, the purpose of the law has been clearly expressed by the Legislature—to eliminate the unfairness created when a corporation merged with a smaller corporation that had

previously been engaged in the manufacture or sale of asbestos is exposed to asbestos liability exceeding the value of the acquired corporation, and to save such a corporation from bankruptcy. H.J. of Tex., 78th Leg., R.S. 6042, 6043 (2003) (HB 4 Statement of Legislative Intent). To address concerns in the Legislature, the measure was restricted in three ways. First, the original transfer of liabilities had to occur prior to May 13, 1968. This was the date in which the American Conference of Governmental Industrial Hygienists first adopted a change in the recommended threshold limit for asbestos in the air of a workplace. Second, to get the benefit of the legislation, the acquiring corporation could not continue in the asbestos business. Third, if the successor continued to control a premises after the merger, the successor would continue to be liable for any asbestos-related premises liabilities it received from the predecessor for injuries caused on those premises. *Id.* at 6043–44.

The Robinsons attack these limitations as pretexts to limit relief just to Crown Cork. However, it is clear that, regardless of the wisdom of the classifications, the classifications are rationally related to the objective of the bill. The act sought to protect "innocent" successor corporations. To define the most "innocent," the Legislature chose to limit mergers occurring prior to May 13, 1968. The Robinsons claim that this date was chosen arbitrarily and that the dangers of asbestos in the workplace were known prior to the ACGIH's modification. However, this is the date decided upon by the Legislature, and it has a rational relationship to the legislation—the Legislature could have, no doubt, chosen any number of cutoff dates to decide which successor corporations are the most "innocent," and while others may disagree as to the appropriateness of the date, such would merely be a "difference of opinion," and insufficient basis for overturning the statute. *Smith*, 426

S.W.2d at 831; *see also Exxon Mobil Corp. v. Altimore*, 256 S.W.3d 415, 420–22 (Tex. App.—Houston [14th Dist.] 2008, no pet.) (discussing, in the context of the basis for a punitive damages award "scientists' knowledge of the risk to refinery workers" of asbestos, and noting studies originating in the 1940s, 1950s, 1960s, and 1970s). Similarly, the second and third limitations also seek to limit protection to those businesses that were not involved with the manufacture or distribution of asbestos, or those that actually had asbestos on the premises. This is also a rational distinction: The Legislature sought to protect those businesses that had nothing to do with asbestos prior to a merger, had nothing to do with asbestos after the merger, and had no asbestos on its premises. The classifications are rational.

The Robinsons also argue that the law is a "special law" because it created a class of one—evidenced by (a) the fact that Crown Cork did not identify any other businesses to which the law applied, (b) Crown Cork's lobbying for the law in Texas and other states, and (c) statements by members of the Legislature that they were addressing "the Crown Cork and Seal Issue."

The Robinsons cite to *Miller's* statement that classification "must be broad enough to include a substantial class . . ." to mean that it is the burden of the proponent of the law to prove that the law must apply to more than one person. *Miller*, 150 S.W.2d at 1001. On the contrary, the size of the class, itself, is not determinative. While courts must be more exacting in reviewing a law that appears only to apply to one party, a "substantial" class does not equate to a class with thousands, hundreds, or even dozens of members. There are no doubt many Texas laws that apply to a small subset of the population; rather, a "substantial" class is one that has substance—a real class of persons or entities, as opposed to a "pretended" class created as a pretext.

The Robinsons' evidence of pretext is no evidence at all. The Robinsons' bare argument that Crown Cork is a "class of one" is insufficient. First, it is not Crown Cork's, but the Robinsons' burden to demonstrate that the law is a special law. Second, even if the Robinsons could show that the law currently applied only to Crown Cork, that alone would not fulfill the burden that the law was special. As discussed above, the Robinsons must show that the classifications made by the Legislature were not rationally related to the objective of the law, and the Robinsons must show that the legislation has treated a similarly situated successor company differently from Crown. They have done neither.

The only other evidence the Robinsons provide is evidence of legislative history. The Robinsons argue that the law is special because Crown Cork lobbied for the act and that at least one legislator called the Act the "Crown Cork issue" in a committee hearing. This evidence is also unavailing. First, as a beneficiary of this law, Crown Cork would certainly lobby for its enactment. But then again, public interest groups, individuals, and businesses regularly lobby for legislation that affects them directly or as an industry, and lobbyists regularly draft legislation for legislators. *See, e.g.*, Victoria F. Nourse & Jane S. Schacter, *The Politics of Legislative Drafting: A Congressional Case Study*, 77 N.Y.U. L. REV. 575, 583, 587, 591 (2002) (noting a number of responses by legislative aides that lobbyists regularly draft the text of bills debated in the Senate Judiciary Committee and discussing an account by a legislative aide where a companion bill was "negotiated and drafted by lobbyists and introduced with only 'minor changes'"). Many involved in the "sausage

making"[20] task of developing law use lobbyists to draft the text of bills because lobbyists provide valuable information and perspective on the bills being introduced. *Id.* at 583. Cognizant as I am of the need to avoid the gifts given by the Legislature to favored individuals, the Robinsons must come up with more evidence than the mere fact that Crown Cork was involved in the passing, or even the drafting, of the act in question.

Likewise, the Robinsons' evidence of Senator Ratliff's statement is also not evidence of House Bill 4's "special law" status. The senator described Article 17 as "the Crown Cork and Seal asbestos issue." First, the statement is no evidence because, as this Court has repeatedly stated, a single statement by a single legislator does not evidence legislative intent and does not determine legislative intent. *E.g.*, *AT & T Commc'ns of Tex., L.P. v. Sw. Bell Tel. Co.*, 186 S.W.3d 517, 528–29 (Tex. 2006); *Gen. Chem. Corp. v. De La Lastra*, 852 S.W.2d 916, 923 (Tex. 1993). Second, to countenance this statement as even "persuasive authority as might be given the comments of any learned scholar of the subject," *De La Lastra*, 852 S.W.2d at 923, would be to do a disservice to the legislative process. Countless laws are either championed by a particular person or entity or arise out of the circumstances that will be or have been experienced by an individual or a business.[21]

---

[20] "Laws, like sausages, cease to inspire respect in proportion as we know how they are made." John Godfrey Saxe, *as quoted in* THE YALE BOOK OF QUOTATIONS 86 (2006). This quotation has previously been attributed to Otto von Bismarck. *See id.*; *In re Graham*, 104 So. 2d 16, 18 (Fla. 1958).

[21] No one could claim that the Brady Handgun Violence Prevention Act of 1993, 18 U.S.C. § 921–22, advanced by former White House Press Secretary James Brady and his wife Sarah, or the proliferation of Megan's Laws, *e.g.*, N.J. STAT. § 2C:7-1 to 11, dealing with sex offender registration throughout the country, named after Megan Kanka, a minor who was sexually assaulted in New Jersey, or even the Copyright Term Extension Act, which was sometimes known as the "Mickey Mouse Act," because Disney lobbied extensively for the act and because the act prevented the original Mickey Mouse cartoon "Steamboat Willy" from entering the public domain, *see* Ben Depoorter, *The Several Lives of Mickey Mouse: The Expanding Boundaries of Intellectual Property Law*, 9 VA. J.L. & TECH, no. 4, Spring 2004, at 3 n.2, would be special laws merely because an individual, or even Disney, lobbied for them so strenuously that the bill

In sum, the Robinsons meet neither of the factors in the *Rodriguez* test. The Robinsons have not shown that the Legislator's classifications are irrational or not related to the objective of the statute, nor have they shown that the Legislature has created a "pretended" class by excluding similarly situated entities.

III. CONCLUSION

I would hold that Chapter 149 is not an unconstitutional special law, and is not unconstitutionally retroactive as applied to the Robinsons because the law limited available remedies and did not destroy the Robinsons' vested rights. I therefore respectfully dissent.

Dale Wainwright
Justice

OPINION DELIVERED: October 22, 2010

---

was eventually named for them.

IN THE SUPREME COURT OF TEXAS

NO. 06-0714

BARBARA ROBINSON, INDIVIDUALLY AND AS REPRESENTATIVE OF THE ESTATE OF JOHN ROBINSON, DECEASED, PETITIONER,

v.

CROWN CORK & SEAL COMPANY, INC., INDIVIDUALLY AND AS SUCCESSOR TO MUNDET CORK CORPORATION, RESPONDENT

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued February 7, 2008

JUSTICE MEDINA filed a concurring opinion.

I join the Court's opinion because I agree that a retroactive law is presumptively "unconstitutional without a compelling justification that does not greatly upset settled expectations" and that no such justification exists here. ___ S.W.3d ___, ___. I further agree that the "constitutional prohibition against retroactive laws does not insulate every vested right from impairment, nor does it give way to every reasonable exercise of the Legislature's police power[.]" *Id*. at ___. And finally, I agree that Chapter 149 here violates article I, section 16 of the Texas Constitution because it operates to retroactively abolish the Robinsons' vested property rights, or in the words of the Court—"significantly impacts a substantial interest the Robinsons have in a well-

recognized common-law cause of action." ___ S.W.3d at ___. I write separately because I do not share the Court's disdain for traditional vested rights analysis nor the dissent's view of that analysis.

I

I begin, as the Court does, with the twin goals served by the Retroactivity Clause: (1) it protects individuals against legislative enactments that unfairly deprive them of legitimate expectations, *Owens Corning v. Carter*, 997 S.W.2d 560, 572 (Tex. 1999), and (2) it ensures that legislative enactments do not single out individuals for preferential or arbitrary treatment. *See In re A.V.*, 113 S.W.3d 355, 361 (Tex. 2003) (upholding law against retroactivity challenge because "the State [was] not pursuing a retributive or punitive aim"); *see also Landgraf v. USI Film Prods.*, 511 U.S. 244, 284–85 & n.20 (1994). As the United States Supreme Court has observed, retroactive lawmaking creates special opportunities for rewarding favored constituencies at the expense of disfavored ones. *Landgraf*, 511 U.S. at 266–67.

When determining whether a statute violates the Retroactivity Clause, vested rights analysis poses three related questions. First, does the claimant have a vested right affected by the statute? Second, does the retroactive statute impair that vested right? And finally, does a compelling public interest justify impairment through the state's police power? *See In re A.V.*, 113 S.W.3d at 361; *Barshop v. Medina Cnty. Underground Water Conserv. Dist.*, 925 S.W.2d 618, 633–34 (Tex. 1996).

Concluding that vested rights analysis was "difficult" and "inconsistent," the court of appeals declined to address whether the Robinsons had a vested right in their accrued tort claim or whether Chapter 149 intruded upon that right. 251 S.W.3d 520, 526. The court concluded instead that, regardless of whether Chapter 149 implicated vested rights, the law could be upheld as a reasonable

exercise of the police power. *Id*. at 534 (citing *Barshop*, 925 S.W.2d at 633–34). Taking much the same tack, the Court begins with the last question but correctly rejects the court of appeals' rational basis analysis as the appropriate constitutional standard. Along the way, the Court grapples with the nature of the underlying property interest and its impairment, ultimately concluding that the Robinsons possessed a substantial interest in a well-founded claim (dare I say a vested property right) that Chapter 149 retroactively impaired. Although the Court is reluctant to use the term "vested rights," preferring instead to speak of "settled expectations," I believe we are talking about the same thing.

II

Whether a right may be regarded as vested depends on considerations of "fair notice," "reasonable reliance," and "settled expectations." *Owens Corning*, 997 S.W.2d at 572– 73; *see also McCain v. Yost*, 284 S.W.2d 898, 900 (Tex. 1955). Because the parties agree that Robinson's claim has accrued, *see Pustejovsky v. Rapid-Am Corp.*, 35 S.W.3d 643, 653 (Tex. 2000), the first question is whether or not that accrued tort claim is a vested right. I conclude that it is.

While we have never invalidated a statute on the grounds that it retroactively abrogated an accrued cause of action, we have noted on several occasions that accrued causes of action enjoy constitutional protection under article I, section 16. To be sure, no one has a vested right in a "mere expectation . . . based upon an anticipated continuance of the present general laws." *Ex parte Abell*, 613 S.W.2d 255, 261 (Tex. 1981). At the same time, the Retroactivity Clause

> must be held to protect every right, even though not strictly a right of property, which may accrue under existing laws prior to the passage of any act which, if permitted a retroactive effect, would take away the right. A right has been well defined to be a

> well founded claim and a well founded claim means nothing more nor less than a claim recognized or secured by law. . . . [A] right, in a legal sense, exists when in consequence of given facts the law declares that one person is entitled to enforce against another a claim, or to resist the enforcement of a claim urged by another.

Mellinger v. City of Houston, 3 S.W. 249, 253 (Tex. 1887); *see also Owens Corning*, 997 S.W.2d at 572–73 (observing that "[c]onsiderations of fair notice, reasonable reliance, and settled expectations play a prominent role" when determining rights entitled to constitutional protection); *Middleton v. Tex. Power & Light Co.*, 185 S.W. 556, 560 (Tex. 1916) (observing that a vested common law right of action is a property right that the legislation at issue did not affect).

We have also held that the Legislature may affect remedies for accrued causes of action, so long as the remedy is not entirely taken away. *See, e.g., City of Tyler v. Likes*, 962 S.W.2d 489, 502–03 (Tex. 1997); *Phil H. Pierce Co. v. Watkins*, 263 S.W. 905, 907 (Tex. 1924) (orig. proceeding); *see also DeCordova v. City of Galveston*, 4 Tex. 470, 477–78 (1849) (explaining the remedial exception and endorsing a New Hampshire decision affording protection to accrued causes of action). If Texas law afforded no constitutional protection to accrued causes of action, there would be no need to permit the Legislature to modify attendant remedies, nor any need to bar the Legislature from stripping a plaintiff of all remedy.

Not all courts agree with this analysis, however. Several federal courts suggest that a plaintiff has no vested right in an accrued tort claim until the claim is pursued to final judgment.[1] The

[1] *Compare Hammond v. United States*, 786 F.2d 8, 12 (1st Cir. 1986) (holding that a plaintiff has no vested right in a tort claim until the claim is pursued to final judgment); *In re TMI*, 89 F.3d 1106, 1113 (3d Cir. 1996); *Zeran v. Am. Online, Inc.*, 129 F.3d 327, 335 (4th Cir. 1997); *Lunsford v. Price*, 885 F.2d 236, 240–41 (5th Cir. 1989); *Symens v. SmithKline Beecham Corp.*, 152 F.3d 1050, 1056 n.3 (8th Cir. 1998); *Grimesy v. Huff*, 876 F.2d 738, 744 (9th Cir. 1989); *Salmon v. Schwarz*, 948 F.2d 1131, 1143 (10th Cir. 1991); *Sowell v. Am. Cyanamid Co.*, 888 F.2d 802, 805 (11th Cir. 1989), *with Davis v. Blige*, 505 F.3d 90, 103 (2d Cir. 2007) (holding that a plaintiff has a vested right in an accrued

majority of jurisdictions, however, appear to afford constitutional protection to accrued tort claims without a final-judgment requirement.

For example, the Kansas Supreme Court has rejected the notion that a property right in an accrued tort claim should not vest before final judgment. *Resolution Trust Corp. v. Fleischer*, 892 P.2d 497, 500–06 (Kan. 1995). The court noted some disagreement about vested rights, particularly in the federal courts, but suggested that "the apparent conflicting holdings [were] not as divergent as they initially appear[ed]." *Id.* at 503. Instead, the court observed that the outcome in decisions espousing a final-judgment requirement could generally be explained by other factors, such as: "(1) the nature of the rights at stake (e.g., procedural, substantive, remedial), (2) how the rights were affected (e.g., were the rights partially or completely abolished by the legislation; was any substitute remedy provided), and (3) the nature and strength of the public interest furthered by the legislation." *Id.* The court then noted that most of the federal cases favoring a final-judgment requirement involved issues of federal preemption and the substitution of a federal remedy for the common law claim, while others involved either the clarification of defects in an existing ambiguous statute or retroactive legislation aimed at urgent problems of great public interest. *See Id.* (citing cases). In short, the cases generally turned on factors other than the existence of a final judgment.

The United States Supreme Court has hesitated to apply the due process clause in this area. *See, e.g., Daniels v. Williams*, 474 U.S. 327, 332 (1986) (rejecting reasoning that would superimpose the Fourteenth Amendment as a "font of tort law"); *Paul v. Davis*, 424 U.S. 693, 701 (1976) (same);

---

patent infringement claim); *Garcia v. Wyeth-Ayerst Labs.*, 385 F.3d 961, 968 (6th Cir. 2004); *Hoyt Metal Co. v. Atwood*, 289 F. 453, 454–55 (7th Cir. 1923);*De Rodulfa v. United States*, 461 F.2d 1240, 1257 (D.C. Cir. 1972).

but see Logan v. Zimmerman Brush Co., 455 U.S. 422, 428 (1982) (considering it "settled" that "a cause of action is a species of property"). Notions of comity and federalism may explain this hesitancy in part, particularly when state enactments are under review. David Richards & Chris Riley, *Symposium on the Texas Constitution: a Coherent Due-Course-of-Law Doctrine*, 68 TEX. L. REV. 1649, 1666 (1990). But these considerations do not similarly encumber state courts. Moreover, our state Constitution, unlike its federal counterpart, includes an independent anti-retroactivity provision, and Texas's Retroactivity Clause goes beyond federal guarantees of property and due process. *Ex parte Abell*, 613 S.W.2d at 260. As we explained in *Mellinger*:

> It can not be presumed that in adopting a Constitution which contained a declaration "that no retroactive law shall be made," that it was intended to protect thereby only such rights as were protected by other declarations of the Constitution which forbade the making of ex post facto laws, laws impairing the obligation of contracts, or laws which would deprive a citizen of life, liberty, property, privileges or immunities, otherwise than by due course of the law of the land. . . .

3 S.W. at 252; *see also* Richards & Riley, 68 TEX. L. REV. at 1650 (noting that drafters of our 1836 Constitution held "a distinctly Jacksonian" concept of democracy and a "wariness of governmental authority"). And finally, every state whose constitution includes an independent anti-retroactivity provision concludes that accrued causes of action are vested rights.[2]

Though a plaintiff's ultimate right to recover is contingent upon success at trial, a plaintiff may nonetheless have a "settled expectation" that, once wronged, he or she will be able to pursue

---

[2] *See DeCordova*, 4 Tex. 476–77 (looking to the decisions of other states whose constitutions contain anti-retroactivity provisions); *see also Denver, S.P. & P.R. Co. v. Woodward*, 4 Colo. 162, 164-65 (Colo. 1878); *Synalloy Corp. v. Newton,* 326 S.E.2d 470, 472 (Ga. 1985); *Bryant v. City of Blackfoot,* 48 P.3d 636, 642 (Idaho 2002); *Hess v. Chase Manhattan Bank*, 220 S.W.3d 758, 769–72 (Mo. 2007); *Shea v. North-Butte Mining Co.,* 179 P. 499, 503 (Mont. 1919); *Groch v. Gen. Motors Corp.*, 883 N.E.2d 377, 408 (Ohio 2008); *Mills v. Wong*, 155 S.W.3d 916, 921 (Tenn. 2005).

a claim against his wrongdoer under the substantive laws as they existed at the time his or her cause of action accrued. *Mellinger*, 3 S.W. at 253; *see also Likes*, 962 S.W.2d at 502 (indicating that retrospective law that entirely eliminates pending cause of action would be "unconstitutionally retroactive"). A plaintiff thus has a property interest in an accrued cause of action which the Texas Constitution protects like other property. *Subaru of Am. v. David McDavid Nissan, Inc.,* 84 S.W.3d 212, 219 (Tex. 2002).

III

The dissent, however, prefers the minority view that a property interest in an accrued cause of action not vest before final judgment is rendered. According to the dissent, no reasonable litigant has a "'settled expectation' of achieving monetary recovery" before judgment. ___ S.W.3d ____, ____ (Wainwright, J. dissenting). And as to this case, the dissent submits that the "Robinsons' expectation in the continued state of law [was] low" because of "numerous contingencies" and their failure to take "any action in reliance on the law at the time." ___ S.W.3d ____, ____, ___ (Wainwright, J. dissenting). In the dissent's view, the Robinsons' pending tort claims were nothing more than a valueless contingent interest in an uncertain future judgment. I disagree for several reasons.

First, I reject the notion that an accrued cause of action has no value apart from a judgment and is not itself a protected property interest. An accrued cause of action is clearly property under Texas law. *See* TEX. PROP. CODE § 12.014. It has value, even if that value is not always easy to measure. Ownership and control is vested in the holder of the claim, and those interests can generally be sold or assigned. *Int'l Proteins Corp. v. Ralston-Purina Co.,* 744 S.W.2d 932, 934

(Tex. 1988); *see PPG Indus., Inc. v. JMB/Houston Ctrs. Partners Ltd. P'ship*, 146 S.W.3d 79, 106 (Tex. 2004) (tracing development of modern law allowing transfer of choses in action); *State Farm Fire & Cas. Co. v. Gandy*, 925 S.W.2d 696, 707 (Tex. 1996) (noting that "[p]racticalities of the modern world have made free alienation of choses in action the general rule").

Further, an accrued cause of action is "constitutional" property, a vested property right, because the holder has a legitimate expectation that the claim will be recognized by state law. *See* Jack M. Beermann, *Government Official Torts and the Takings Clause: Federalism and State Sovereign Immunity*, 68 B.U.L. REV. 277, 302 (1988); *see also Logan,* 455 U.S. at 428 (considering it "settled" that "a cause of action is a species of property"). The dissent's preoccupation with final judgments is misguided because the relevant expectations here involve the cause of action, not some future judgment. It is the right to sue itself—the lawsuit—that is being taken away, not the final outcome.

Once a lawsuit is filed, subsequent action by the sovereign interferes not with possible or potential rights that might accrue in the future, but with existing expectations and rights that have accrued—that have "vested"—and that constitute a present property interest. As one legal scholar explains: "a cause of action might be thought of as an entitlement to employ the state's adjudicatory machinery which can only be denied for cause, cause being the failure to establish the elements of the cause of action or to comply with reasonable procedural requirements." Beermann, 68 B.U.L. REV. at 305 n.121 (citing *Logan*, 455 U.S. 422). Other authorities share the same view:

> Determining whether vested rights exist implicates whether the property owner has a "legitimate claim of entitlement." . . . Clearly, the plaintiff has no "entitlement" to the damages sought, or to any form of successful resolution of the lawsuit, as he

> might lose on the merits or because of procedural aspects of the case. But just as clearly, the plaintiff's interest in the lawsuit itself should qualify as an "entitlement that may be terminated only for cause" that should warrant constitutional protection.

Jeremy A. Blumenthal, *Legal Claims as Private Property: Implications for Eminent Domain*, 36 HASTINGS CONST. L.Q. 373, 401 (Spring 2009) (footnotes omitted); *see* also *Resolution Trust Corp.*, 892 P.2d at 502 (holding accrued tort claim to be vested property right and rejecting similar final-judgment argument because it "fails to recognize the distinction between a right of action and a right of recovery").

Finally, even if some manner of affirmative act is, as the dissent suggests, a necessary part of the "settled expectations" test, it is clearly established here. Contrary to the dissent's characterization, the Robinsons were not idle while Crown Cork labored to undo their accrued claim. The Robinsons filed suit, litigated their claim for several months, and obtained a partial summary judgment. Only after that did the Legislature enact Chapter 149, taking away the Robinsons' summary judgment and their underlying cause of action. Although the Robinsons had not yet obtained a final judgment (and thus had no vested property right in that non-existent judgment), they did possess a vested property right in their pending cause of action that included the right to prosecute the claim. *See Washington-Southern Navigation Co. v. Baltimore & Philadelphia S.B. Co.*, 263 U.S. 629, 635 (1924) ("The right of a citizen of the United States to sue in a court having jurisdiction of the parties and of the cause of action includes the right to prosecute his claim to judgment.").

Although I emphatically disagree with the dissent's view that an accrued cause of action is too indefinite, and its owner's expectations too insignificant, to warrant constitutional protection,

I readily concede that "no one has a vested right . . . or a property right, in a mere rule of law." ___ S.W.3d at ____ (Wainwright, J. dissenting) (quoting *Middleton*, 185 S.W. at 560). The continuation of a rule of law in the abstract, however, is very different from the preservation of a claim that has already accrued under that law. Although a "person has no property, no vested interest, in any rule of the common law," nevertheless, "[r]ights of property which have been created by the common law cannot be taken away without due process." *Munn v. Illinois,* 94 U.S. 113, 134 (1877).

The distinction is the difference between the prospective or retroactive application of a law. Prospective laws that diminish or eliminate future causes of action (or defenses) do not ordinarily implicate vested property rights. However, where "a law changes the legal consequences of past actions, it interferes with vested rights, and courts have found that property . . . is implicated." Olivia A. Radin, *Rights as Property*, 104 COLUM. L. REV. 1315, 1331 (2004). A cause of action vests upon the occurrence of an injury, and that "vested right of action is property in the same sense in which tangible things are property, and is equally protected against arbitrary interference." *Pritchard v. Norton,* 106 U.S. 124, 132 (1882).

Our opinion in *Ex parte Abell*, which the dissent quotes at length, is to the same effect. ___ S.W.3d at ___ (Wainwright, J. dissenting) (quoting *Ex parte Abell*, 613 S.W.2d at 261). *Abell* restates the rule from *Mellinger* that the Legislature can declare prospectively that the state of facts that once created a claim, no longer will; but once "the state of facts which the law declares shall give a right comes into existence," the right is "fixed" or "vested," and the Legislature cannot retroactively undo what has already accrued. *Abell*, 613 S.W.2d at 261 (quoting *Mellinger*, 3 S.W. at 253).

The dissent accepts the rule, but only to a point. It acknowledges that a defense of repose vests upon accrual and cannot thereafter be rescinded by the Legislature:

> . . . the Legislature cannot resurrect causes of action that have already been extinguished by retroactively lengthening the statute of limitations. *E.g. Baker Hughes, Inc. v. Keco R. & D., Inc.*, 12 S.W.3d 1, 4 & n.12 (Tex. 1999); *Wilson v. Work*, 62 S.W.2d 490, 490–91 (Tex. 1933) (per curiam). . . . In other words, when the statute extinguished a cause of action, a defendant received a vested right of repose barring the extinguished claim.

__ S.W.3d at ____ (Wainwright, J. dissenting). But the dissent refuses to extend similar protection to an accrued claim. I see no basis for limiting the Retroactivity Clause to defensive claims. *See* 1 GEORGE D. BRADEN, ET AL., THE CONSTITUTION OF THE STATE OF TEXAS: AN ANNOTATED AND COMPARATIVE ANALYSIS 58 (1977) (observing that the "prohibition concerning 'retroactive laws' seems to spring from a general suspicion regarding all retroactive laws").

Rights acquired under existing law, whether defensive or offensive, are treated similarly under the Texas Constitution. Thus, once a statute of limitations has run or a cause of action has accrued, retroactive legislation that either revives an extinguished claim, or bars an existing one, affects a vested property right. The Retroactivity Clause applies in either instance. *See Mellinger*, 3 S.W. at 253 (observing that Retroactivity Clause applies both to vested claims and defenses). I would therefore conclude that the Robinsons' accrued claims are vested rights to which the protection of article I, section 16 may apply.

IV

Crown Cork argues, however, that even if a plaintiff has a vested right in an accrued tort claim, Chapter 149 does not intrude upon the Robinsons' vested rights for several reasons. First,

Crown Cork argues that Chapter 149 does not infringe on this right because the statute merely works a change to procedure or remedy. It is well established that a party has no vested right in a remedy or rule of procedure. *Subaru,* 84 S.W.3d at 219. The lines that divide substance from procedure or remedy, however, are notoriously difficult to draw. *Tex. Water Rights Comm'n v. Wright*, 464 S.W.2d 642, 648–49 (Tex. 1971). But we need not parse these "superfine" distinctions here, *Langever v. Miller*, 76 S.W.2d 1025, 1029 (Tex. 1934), because, whether regarded as remedial or substantive, Chapter 149 entirely eliminates the Robinsons' remedy for Mundet's torts. *See Likes*, 962 S.W.2d at 502–03; *Phil H. Pierce Co.*, 263 S.W. at 907; *DeCordova*, 4 Tex. at 479–80. Though it is conceivable that Robinson may establish that one of the other defendants in the original action is jointly and severally liable for all of her damages, Robinson has a separate cause of action against each of these defendants that might properly be tried and determined as if it were the only claim in controversy. *See Morgan v. Compugraphic Corp.*, 675 S.W.2d 729, 733–34 (Tex. 1984). Chapter 149 extinguishes this separate action in its entirety, releasing Crown Cork from its obligation assumed under the merger agreement to pay for Mundet's torts. *See Sam Bassett Lumber Co. v. City of Houston*, 198 S.W.2d 879, 882 (Tex. 1947) (distinguishing permissible changes to statutes of limitations from enactments releasing or extinguishing a debt).

Crown Cork also argues that Chapter 149 does not intrude on the Robinsons' vested rights because it affects vicarious liability. In *Aetna Ins. Co. v. Richardelle*, 528 S.W.2d 280 (Tex. Civ. App.—Corpus Christi 1975, writ ref'd n.r.e.), the court of appeals upheld a law retroactively repealing the statutory vicarious liability of some parents for the torts of their minor children. Though *Aetna* described vicarious liability as "remedial," it did not hold that the Legislature might

alter vicarious liabilities at will without running afoul of the Retroactivity or Contract Clauses. *Aetna* merely held that statutory causes of action do not generally give rise to vested rights. *Id.* at 285 (citing *Dickson v. Navarro Levee Imp. Dist.*, 139 S.W.2d 257, 259 (Tex. 1940)). Unlike the parents' vicarious liability for the torts of their children, successor liability is not purely statutory. Successor liability, at least when it attends a formal merger, instead arises from the contractual merger agreement and from the plaintiff's underlying tort or contract claim, and was recognized at common law. *See Tex. & P. R. Co. v. Murphy*, 46 Tex. 356, 360 (1876); *Stephenson v. Tex. & P. R. Co.*, 42 Tex. 162, 167–68 (1874); *Turner v. Bituminous Cas. Co.*, 244 N.W.2d 873, 877–78 (Mich. 1976) ("Most of [the rules of successor liability] may fairly be said to have arisen from case law"). Though successor liability is now governed by statute, the corporations law is a shield to common law liability, not a legislatively created right within the meaning of *Dickson*.

Crown Cork next argues that Chapter 149 does not intrude on the Robinsons' vested rights because it is akin to a borrowing statute or choice of law rule mandating that Texas, rather than Pennsylvania or New York, law apply to determine corporate successor liability in asbestos cases. In *Owens Corning*, we held that a plaintiff had no vested right in a borrowing statute that permitted out-of-state plaintiffs to file stale out-of-state claims in Texas courts under Texas' more permissive statute of limitations. 997 S.W.2d at 571–73. But Chapter 149 represents not only a choice of law rule but also a change to Texas' substantive law of successor liability. *Cf. id.* at 573. Before the passage of Chapter 149, no matter which state's law applied, Crown Cork would have faced liability for Mundet's torts. TEX. BUS. ORG. CODE § 10.008(a)(3)–(4); TEX BUS. CORP. ACT § 5.06(3); N.Y. BUS. CORP. LAW § 906; 15 PA. CONS. STAT. § 1929. Indeed, Pennsylvania has already invalidated

a statute providing protections virtually identical to those found in Chapter 149. *See Ieropoli v. AC&S Corp.*, 842 A.2d 919, 921 (Pa. 2004).

Finally, Crown Cork cites *Owens Corning* to argue that Chapter 149 does not interfere with vested rights because Robinson had no legitimate expectation that Mundet would merge with a much larger corporation and because it is not inequitable to relieve Crown Cork of wholly unexpected and innocently acquired asbestos liabilities. 997 S.W.2d at 572–73. In approving the borrowing statute at issue in *Owens Corning*, we noted that it was not inequitable to require a plaintiff bringing an out-of-state claim to satisfy the statute of limitations provided by the law supplying the cause of action: "a plaintiff should not be able to gain greater rights than he would have in the state where the cause of action arose and where he lives simply by bringing suit in Texas." *Id.* at 573. But Chapter 149 goes much further and "creates an immunity where none existed before." *Id.* To be sure, Crown Cork probably did not expect the merger with Mundet to entail such extensive liability, and Robinson could hardly have a settled expectation that Mundet would be acquired by a much larger corporation. But it is not inequitable to require Crown Cork to pay for Mundet's torts because when two corporations formally merge, the law regards them as one. Though this rule may permit plaintiffs to recover where they otherwise would not, "[i]n substance, if not in form, the post-transfer entity distributed the defective products and should be held responsible for them." RESTATEMENT (THIRD) OF TORTS: PRODUCTS LIABILITY § 12 & cmt. b.

Thus, I conclude that the Robinsons' accrued tort claim here is a vested right that Chapter 149 has retroactively abrogated. But this is not the end of the analysis. As the Court observes, "the constitutional prohibition against retroactive laws does not insulate every vested right from

impairment" and a compelling public interest may justify impairment, although "the heavy presumption against retroactive laws" makes instances of this quite rare. ___ S.W.3d at ___.

In fact, we have only twice recognized legislative interests of sufficient import to override vested private rights: *Barshop,* 925 S.W.2d 618, and *In re A.V.,* 113 S.W.3d 355. At issue in *Barshop* was a statute regulating water use in the Edwards Aquifer basin. Before the enactment of the law, property owners were permitted, under the rule of capture, to extract as much water as they desired from the aquifer. Concerned that the rule of capture discouraged water conservation, the Legislature authorized local water districts to regulate water use through a permitting scheme that allocated use permits on the basis of historical use. Without conducting a vested rights analysis, we held that the Legislature's interest in water conservation trumped whatever interest landowners had in the continued existence of the rule of capture because "[c]onservation of water has always been a paramount concern in Texas, especially in times, like today, of devastating drought." *Barshop,* 925 S.W.2d at 626.

In *In re A.V.*, 113 S.W.3d 355, we held that the Legislature could permissibly enact a statute terminating parental rights on the basis of a parent's future imprisonment for prior criminal convictions. Though we found that the provision did not intrude upon vested rights, we explained that, even if it had, the Legislature's interest in protecting "the safety and welfare of its children" trumped any individual interest in retaining parental rights while unable to care for the child. *Id.* at 361.

In contrast to the public interest at issue in those cases, the interest protected here is essentially a private economic one. As the Court observes, "the legislative record is fairly clear that

chapter 149 was enacted to help only Crown and no one else." ___ S.W.3d at ___. The Legislature certainly has a valid interest in protecting Crown Cork's shareholders and pensioners, and in promoting business in the state. The Legislature also has a legitimate interest in protecting defendants from excessive liability. But the Legislature's interest in protecting the financial well-being of a favored defendant is not on par with the public interest in the avoidance of catastrophic drought or the protection of child welfare. *Cf. Barshop*, 925 S.W.2d at 626; *In re A.V.*, 113 S.W.3d at 361. Private economic interests will generally not justify intrusions into the vested private rights of others. *See, e.g., Travelers Ins. Co. v. Marshall*, 76 S.W.2d 1007, 1011 –12 (Tex. 1934) (holding that the interests of homeowners during the Great Depression did not justify interference with private mortgage contract rights); *Lucas v. United States*, 757 S.W.2d 687, 701 (Tex. 1988) (holding that it was "simply unfair and unreasonable to impose the burden of supporting the medical care industry solely upon those persons who are most severely injured and therefore most in need of compensation."). Moreover, the Legislature's interest in protecting "innocent" defendants does not justify its assumption here of the judiciary's role of adjusting private obligations incurred under existing law. *See Landgraf*, 511 U.S. at 267 n.20 (quoting *Richmond v. J.A. Croson Co.*, 488 U.S. 469, 513–14 (1989) (Stevens, J., concurring in part and concurring in the judgment)). As with the takings clause, one of the purposes of the prohibition on retroactive lawmaking is to ensure that the burdens of governance do not fall unfairly on a small number of citizens. *See id.* (citing THE FEDERALIST No. 44 (James Madison)). The legislative interest asserted here is simply insufficient to justify an intrusion into the Robinsons' vested rights, and thus I agree with the Court that the innocent successor provisions of Chapter 149 cannot be justified as a valid exercise of the police power and is, as applied here, prohibited under the Retroactivity Clause. TEX. CONST. art. I, § 16.

David M. Medina
Justice

Opinion Delivered: October 22, 2010

IN THE SUPREME COURT OF TEXAS

NO. 06-0714

BARBARA ROBINSON, INDIVIDUALLY AND AS REPRESENTATIVE OF THE ESTATE OF JOHN ROBINSON, DECEASED, PETITIONER,

v.

CROWN CORK & SEAL COMPANY, INC., INDIVIDUALLY AND AS SUCCESSOR TO MUNDET CORK CORPORATION, RESPONDENT

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued February 7, 2008

JUSTICE WILLETT, joined by JUSTICE LEHRMANN, concurring.

Litigants in our adversarial system are hard-wired for certitude, adept at insisting the law "clearly" or "plainly" favors their side or, as here, labeling the controlling analysis "straightforward and simple." If only. Today's case is both complex and consequential, and fiendishly so. The facts are compelling; the law is unclear; and the stakes are high, not just for these parties but also for our constitutional architecture that both confers and constrains governmental power. I concur that chapter 149 is an invalid exercise of legislative police power that cannot surmount our Constitution's ban on retroactive laws. But I write separately to stress that this case, at heart, implicates issues far beyond whether Barbara Robinson can sue Crown Cork & Seal.

Every case that reaches this Court concerns real people buffeted by real problems in the real world. *This* dispute, however, possesses a transcendent quality, touching not only these parties but also building-block constitutional principles that belong to all Texans. In that sense, it affords a whetstone on which to sharpen our thinking on some bedrock notions of government and how the Texas Constitution assigns democratic responsibilities. More to the point, it teaches a vital lesson about diminished liberty stemming from government overreaching: The Legislature's police power cannot go unpoliced.

The Texas Constitution looks unkindly on retroactive laws, but as a constitutional matter, retroactive is not always retrograde.

While it is axiomatic that the Legislature, through budgeting and lawmaking, has primacy in setting State policy, that power, though unrivaled, is not unlimited. One constraint is the Texas Constitution's Bill of Rights, including article I, section 16's prohibition against retroactive laws.[1]

Retroactive legislation is disfavored because, as the Father of the U.S. Constitution explains, citizens deserve protection from the "fluctuating policy" of the legislature.[2] Robinson's position takes James Madison one leap further: Disfavored actually means disallowed, and "the police power may not be used to deprive citizens of their property retroactively by eliminating their vested rights in accrued claims." Robinson insists our Bill of Rights, including the Retroactivity Clause, is impregnable in this regard given this mandate from article I, section 29:

---

[1] Tex. Const. art. I, § 16.

[2] THE FEDERALIST No. 44 (James Madison).

> To guard against transgressions of the high powers herein delegated, we declare that everything in this "Bill of Rights" is excepted out of the general powers of government . . . and all laws contrary thereto . . . shall be void.[3]

This admonition naturally commands judicial respect, but it cannot bear the weight Robinson places on it. We long ago crossed the Rubicon of declaring the Retroactivity Clause non-absolute (despite article I, section 29's seeming absolutism), recognizing that some retroactive laws "may be proper or necessary, as the case may be."[4] Specifically — and this is one facet of retroactive-law analysis where a controlling principle (if not its application) is uncomplicated — such laws are constitutionally permissible if they are a "valid exercise of the police power by the Legislature to safeguard the public safety and welfare."[5] Retroactivity in and of itself is not fatal,[6] and nothing in the Bill of Rights handcuffs the Legislature from confronting urgent state priorities.

The notion that article I, section 29 hermetically seals off the Bill of Rights from all legislative attention invites myriad absurdities.[7] The "all laws contrary . . . shall be void" language may be facially inviolable, similar to the federal Bill of Rights' "Congress shall make no law"

---

[7] Our Bill of Rights also says "no law shall ever be passed curtailing the liberty of speech or of the press," Tex. Const. art. I, § 8, but it is fundamental that such unequivocal language must yield to reasonable limits.

language, but it must accommodate legislation at the edges. The practical challenge for judges is to set that perimeter, and to do so in a principled, no-favorites fashion.

House Bill 4 was enacted against a backdrop of urgency, but with legislative police power, unfettered must never be unfretted.

As litigants often discover, in the Legislature a deal is sometimes a raw deal. But unfair does not always equal unconstitutional; even vested rights can be impinged if lawmakers have a good-enough reason.

Both the U.S. Supreme Court and this Court have lamented the "'elephantine mass of asbestos cases' lodged in state and federal courts,"[8] branding it a "crisis"[9] that "defies customary judicial administration."[10] In response, the bipartisan civil-justice reforms enacted in 2003's House Bill 4 effected a sea change in the Texas tort landscape;[11] likewise the omnibus asbestos-litigation reforms enacted in 2005's Senate Bill 15.[12] Both measures sought to address perceived flaws in

Fibreboard Corp.*, 527 U.S. 815, 821 (1999)); *see In re Ethyl Corp.*, 975 S.W.2d 606, 610 (Tex. 1998) ("Our state trial courts have gained considerable experience in managing the thousands of claims asserted in asbestos litigation.").

[9] *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591, 597 (1997); *In re GlobalSanteFe Corp.*, 275 S.W.3d 477, 482 (Tex. 2008).

[10] *Ayers*, 538 U.S. at 166; *see also CSR Ltd. v. Link*, 925 S.W.2d 591, 597 (Tex. 1996) ("[T]he state expends a large amount of its limited judicial resources resolving these massive [asbestos] controversies. Under these circumstances, a trial on the merits would further overtax the state's judicial resources."). At least recently, Texas led the nation in asbestos-related litigation. Act of May 16, 2005, 79th Leg., R.S., ch. 97, § 1(e), 2005 Tex. Gen. Laws 169. The 2005 Legislature that enacted SB 15's extensive reforms for handling asbestos and silica cases included findings in the statutory text describing in detail how the "crush of asbestos litigation has been costly to employers, employees, litigants, and the court system." *Id.* § 1(g).

[11] Act of June 2, 2003, 78th Leg., R.S., ch. 204, §§ 1.01-23.03, 2003 Tex. Gen. Laws 847.

[12] Act of May 16, 2005, 79th Leg., R.S., ch. 97, §§ 1-12, 2005 Tex. Gen. Laws 169.

asbestos-related litigation — HB 4 by limiting so-called "innocent successor" liability (immediately and retroactively),[13] and SB 15 via more sweeping reforms for asbestos and silica claims.[14]

In upholding a retroactive water regulation in *Barshop*, we expressly relied on formal and extensive findings that the Legislature made part of the statutory text itself: "Based on these legislative findings, we conclude that the Act is necessary to safeguard the public welfare of the citizens of this state. Accordingly, the retroactive effect of the statute does not render it unconstitutional."[15] Chapter 149's enacted text includes no such findings. Instead, Crown Cork relies on the legislative record, contending it amply underscores an urgent public need: protecting imperiled-but-nonculpable companies in order to safeguard the livelihoods of endangered-but-innocent employees, pensioners, and local economies.[16]

---

[13] Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 17.01, 2003 Tex. Gen. Laws 847, 892 (codified at TEX. CIV. PRAC. & REM. CODE § 149.003(a)).

[14] Act of May 16, 2005, 79th Leg., R.S., ch. 97, §§ 1-12, 2005 Tex. Gen. Laws 169. SB 15 was not immediately effective, unlike HB 4's successor-liability provision, but most of SB 15's provisions were quasi-retroactive, affecting pending claims that had not yet begun trial. *See id.* §§ 2, 9, 12.

[15] *Barshop*, 925 S.W.2d at 634.

[16] Though rummaging around in legislative minutiae for extratextual clues is an exercise prone to contrivance and manipulation, *Entergy Gulf States, Inc. v. Summers*, 282 S.W.3d 433, 469–75 (Tex. 2009) (Willett, J., concurring in part and in the judgment); *AIC Mgmt. v. Crews*, 246 S.W.3d 640, 649–50 (Tex. 2008) (Willett, J., concurring), I am mindful in today's narrow police-power context that the U.S. Supreme Court (including its most ardent legislative-history skeptics) has assessed a statute's constitutionality under the Commerce Clause by seeking "even congressional committee findings," *United States v. Lopez*, 514 U.S. 549, 562 (1995) (citing *Preseault v. ICC*, 494 U.S. 1, 17 (1990)). It merits mention, though, that chapter 149's legislative history illustrates the sort of cherry-picking that often taints such forays. As the Court notes, a comment in the Senate chamber describes the law as an "agreed arrangement" involving "Crown Cork and Seal," while a "statement of legislative intent" inserted by the House sponsor discusses the liabilities of "a corporation" without mentioning Crown Cork at all. ___ S.W.3d. ___.

Nobody disputes "the authority of the Legislature to make reasoned adjustments in the legal system."[17] But lawmakers aiming to statutorily prescribe what is constitutionally proscribed must make a convincing case. As the Court carefully explains, the sparse record underlying chapter 149 falls short of what must be shown before someone is made to surrender a constitutional right.

This case concerns high-stakes issues far beyond chapter 149, principally how the Texas Constitution allocates governing power.

Today's case is not merely about whether chapter 149 singled out Barbara Robinson and unconstitutionally snuffed out her pending action against a lone corporation. Distilled down, it is also a case about how Texans govern themselves.

Delimiting the outer edge of police-power constitutionality has bedeviled Texas courts for over a century. The broader issue of a citizen's relationship with the State has confounded for centuries longer.

- From 1651: "For in a way beset with those that contend on one side for too great Liberty, and on the other side for too much Authority, 'tis hard to passe between the points of both unwounded."[18]

- From 1851: "It is much easier to perceive and realize the existence and sources of [the police power] than to mark its boundaries, or prescribe limits to its exercise."[19]

- From 1907: The question whether a law can stand as a valid exercise of the police power "may be involved in mists as to what police power means, or where its boundaries may terminate. It has been said that police power is limited to enactments having reference to the comfort, safety, or the welfare

> of society, and usually it applies to the exigencies involving the public health, safety, or morals."[20]

Gauzy definitions such as these — and laments over such imprecision — offer scant comfort in this enterprise. The issue is elemental, but not elementary. Fortunately, we are not entirely without guidance.

Appropriately weighty principles guide our course. First, we recognize that police power draws from the credo that "the needs of the many outweigh the needs of the few." Second, while this maxim rings utilitarian and Dickensian (not to mention Vulcan[21]), it is cabined by something contrarian and Texan: distrust of intrusive government and a belief that police power is justified only by urgency, not expediency. That is, there must exist a societal peril that makes collective action imperative: "The police power is founded in public necessity, and only public necessity can justify its exercise."[22] Third, whether the surrender of constitutional guarantees is necessary is a legislative call in terms of desirability but a judicial one in terms of constitutionality. The political branches decide if laws pass; courts decide if laws pass muster. The Capitol is the center of policymaking gravity, but the Constitution exerts the strongest pull, and police power must bow to constitutional commands: "as broad as [police power] may be, and as comprehensive as some legislation has

[21] *See* STAR TREK II: THE WRATH OF KHAN (Paramount Pictures 1982). The film references several works of classic literature, none more prominently than *A Tale of Two Cities*. Spock gives Admiral Kirk an antique copy as a birthday present, and the film itself is bookended with the book's opening and closing passages. Most memorable, of course, is Spock's famous line from his moment of sacrifice: "Don't grieve, Admiral. It is logical. The needs of the many outweigh . . ." to which Kirk replies, "the needs of the few."

[22] *Spann v. City of Dallas*, 235 S.W. 513, 515 (Tex. 1921).

sought to make it, still it is subsidiary and subordinate to the Constitution."[23] Fourth, because the Constitution claims our highest allegiance, a police-power action that burdens a guarantee like the Retroactivity Clause must make a convincing case.[24] Finally, while police power naturally operates to abridge private rights, our Constitution, being inclined to freedom, requires that such encroachments be as slight as possible: "Private rights are never to be sacrificed to a greater extent than necessary."[25]

If judicial review means anything, it is that judicial restraint does not allow everything. Yes, courts must respect democratically enacted decisions; popular sovereignty matters. But the Texas Constitution's insistence on limited government also matters, and that vision of enumerated powers and personal liberty becomes quaint once courts (perhaps owing to an off-kilter grasp of "judicial activism") decide the Legislature has limitless power to declare its actions justified by police power. At that constitutional tipping point, adjudication more resembles abdication.

Whatever the police power's amorphous boundaries, we know these two things: (1) the Legislature may ask for private sacrifice, and receive it — provided the private rights sacrificed are outweighed in public good, burdened as little as possible, and amply justified on public-necessity grounds; and (2) the Legislature's police power is not infinitely elastic, able to extinguish constitutional liberties with nonchalance. Texans long ago and since have embraced constitutional,

[23] *Jordan*, 103 S.W. at 634.

[24] *See Methodist Healthcare Sys. of San Antonio, Ltd. v. Rankin*, 307 S.W.3d 283, 286 (Tex. 2010) (an exercise of legislative police power "is not sustained when it is arbitrary or unreasonable") (footnote, citation omitted).

[25] *Spann*, 253 S.W. at 515.

meaning limited, government. The judiciary thus has a superseding obligation to disapprove certain encroachments on liberty, no matter the legislative vote-count. Put another way, judicial review sometimes means thwarting today's majority from thwarting yesterday's supermajority — the one that ratified our solemn Constitution.[26]

Legislative police power is not constitutional carte blanche to regulate all spheres of everyday life; preeminence does not equal omnipotence.

The Texas Bill of Rights — enshrined to recognize and establish "the general, great and essential principles of liberty and free government"[27] — declares an emphatic "no" to myriad government undertakings: no religious test for office, no double jeopardy, no self-incrimination, no curtailment of free speech, etc. It is, like its federal counterpart, irrefutably framed in proscription. And, like its federal counterpart, its limitations are not exception-free; desperate times permit desperate measures (to a point). But we should steadfastly resist defining desperation down. Exceptions to constitutional guarantees are real but also rare, just like modern citations to *Marbury v. Madison*: "The powers of the legislature are defined, and limited; and that those limits may not be mistaken, or forgotten, the constitution is written."[28]

The "danger that liberty should be undervalued" necessarily implicates "the adjustment of the boundaries between it and social control."[29] There must remain judicially enforceable constraints

on legislative actions that are irreconcilable with constitutional commands. If legislators come to believe that police power is an ever-present constitutional trump card they can play whenever it suits them, overreaching is inexorable.

To be sure, constitutional analysis is nuanced and not prone to doctrinaire absolutes. It is easy to say the sovereign's shield must never become a sledgehammer, but it is more difficult — and every bit as important — to discern the moment at which it threatens to become a scalpel, carving quietly yet critically away at cherished rights.

It merits repeating that this Court and the U.S. Supreme Court have long permitted legislative bodies to burden constitutional freedoms upon a strong public-welfare showing. The reason chapter 149 offends the Retroactivity Clause is because it lacks that showing. Indeed, if chapter 149's meager record were sufficient, there would be scant defense against future police-power incursions — incursions that, while ostensibly well-meaning, shrink the sphere of protected liberty and erode bit by bit the notion of limited government. "Experience is the oracle of truth,"[30] wrote Madison, and history teaches this is a ratchet that clicks only one way.

Robinson's case provides a real and important reminder of the limits of legislative power and the scope of judicial review. But after her case has come and gone, I hope what Edmund Burke

[30] THE FEDERALIST No. 20 (James Madison).

called a "fierce spirit of liberty"[31] will help steer a course with senses heightened to constitutional guardrails.

Police power is an attribute of sovereignty, but sovereignty ultimately rests in "the people of the State of Texas."[32]

The Texas Constitution places limits on government encroachments, and does so on purpose. Our Bill of Rights is not mere hortatory fluff; it is a purposeful check on government power. Everyday Texans, and the courts that serve them, must remain vigilant, lest we permit boundless police power, often couched in soaring prose, to abridge our Constitution's enduring "principles of liberty and free government."[33] As Justice Brandeis warned in his now-celebrated *Olmstead* dissent: "Experience should teach us to be most on guard to protect liberty when the Government's purposes are beneficent."[34]

Shortly after the Federal Constitution was approved in September 1787, Thomas Jefferson wrote James Madison from Paris, advocating a Bill of Rights and also voicing confidence that the people would be the best sentries against overreaching government: "[I am] convinced that on their

Stanlis ed., 2009) ("In this character of the Americans a love of freedom is the predominating feature which marks and distinguishes the whole: and as an ardent is always a jealous affection, your colonies become suspicious, restive, and untractable, whenever they see the least attempt to wrest from them by force, or shuffle from them by chicane, what they think the only advantage worth living for. This fierce spirit of liberty is stronger in the English colonies, probably, than in any other people of the earth . . . .").

[32] Tex. Const. pmbl.

[33] Tex. Const. art. I.

[34] *Olmstead v. United States*, 277 U.S. 438, 479 (1928) (Brandeis, J., dissenting), *overruled by Katz v. United States*, 389 U.S. 347 (1967). Or, as 18th-century philosopher David Hume cautioned, "It is seldom that liberty of any kind is lost all at once." Rather, suppression "must steal in upon [people] by degrees, and must disguise itself in a thousand shapes in order to be received." David Hume, *Of the Liberty of the Press* 1, 262 n.4, *in* HUME: POLITICAL ESSAYS (Knud Haakonssen ed., Cambridge Univ. Press 1994) (1741).

good senses we may rely with the most security for the preservation of a due degree of liberty."[35] Jefferson was right. We are our own best lookouts against invasions, however well-intentioned, that siphon our "due degree of liberty" — siphoning that often occurs subtly, with such drop-by-drop gentleness as to be imperceptible.

To be sure, Members of the Texas Legislature have sworn to "preserve, protect, and defend the Constitution and laws of the United States and of this State,"[36] and they doubtless believe their enactments honor basic constitutional guarantees. I never second-guess the Legislature's motives and goodwill (and have never needed to); we are blessed with 181 lawmakers who serve Texas with full hearts.[37] But where the Constitution is concerned, the judiciary's role as referee — confined yet consequential — must leaven big-heartedness with tough-mindedness.

* * *

Summing up: Judges are properly deferential to legislative judgments in most matters, but at some epochal point, when police power becomes a convenient talisman waved to short-circuit our constitutional design, deference devolves into dereliction. The Legislature's policymaking power

---

[35] Letter from Thomas Jefferson to James Madison, Paris (1787), *in* THE JEFFERSON CYCLOPEDIA: A COMPREHENSIVE COLLECTION OF THE VIEWS OF THOMAS JEFFERSON 277 (John P. Foley ed., 1900).

[36] Tex. Const. art. XVI, § 1.

[37] My dissenting colleagues' meticulous analysis shows that today's difficult case has several moving pieces, each seemingly weightier and more perplexing than the one before. This is "a Supreme Court case" in every sense and one that has occupied our attention for a long time, arriving at the Court before our two newest Justices. So reasonable judicial minds can certainly differ (and on this Court they frequently do). But an important point must be made: There is a profound difference between an activist judge and an engaged judge. I am honored to serve with none of the former and eight of the latter. Nothing in this concurrence should be distorted into criticism of either lawmakers who passed chapter 149 or judges who passed upon it. My cautions today about unconstrained police power are entirely forward-looking, speaking to what *can* happen if judges, while not activist are also not properly active, instead preferring to leave police power unpoliced, thus inviting the other branches to flex ever-broader powers. My concerns are less centered on this case than on future ones.

may be vast, but absent a convincing public-welfare showing, its police power cannot be allowed to uproot liberties enshrined in our Constitution.

_____

Don R. Willett
Justice

OPINION DELIVERED: October 22, 2010

IN THE SUPREME COURT OF TEXAS

NO. 06-0752

WILLIAM H. NEALON, M.D., AND ERIC M. WALSER, M.D., PETITIONERS,

v.

HARRY WILLIAMS, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIRST DISTRICT OF TEXAS

PER CURIAM

Respondent Harry Williams sued petitioners Dr. William H. Nealon and Dr. Eric M. Walser, faculty members at the University of Texas Medical Branch at Galveston, on health care liability claims after his pancreas was injured during a diagnostic procedure of his bile ducts. Nealon and Walser moved to dismiss the suit under section 101.106(f) of the Texas Tort Claims Act, TEX. CIV. PRAC. & REM. CODE § 101.106(f), claiming that the suit was based on conduct within the general scope of their employment and that the cause of action could have been brought against UTMB. Williams responded and argued that the statute violates the Open Courts provision of the Texas Constitution, TEX. CONST. art. I, § 13.

The trial court dismissed the action and Williams appealed both issues. The court of appeals reversed the trial court's judgment on the first issue, without reaching the second, and remanded the case for further proceedings. 199 S.W.3d 462, 467 (Tex. App.–Houston [1st Dist.] 2006). The court

of appeals held that the doctors did not show that Williams' claim could have been brought against UTMB under the Act, a requirement of section 101.106(f). *Id.* at 466.

While this case has been pending on appeal, we have decided *Franka v. Velasquez*, ___ S.W.3d ___ (Tex. 2011), holding that, for purposes of section 101.106(f), a tort action is brought "under" the Texas Tort Claims Act, even if the government has not waived its immunity for such actions. ___ S.W.3d at ___. In light of *Franka*, we grant Nealon's and Walser's petition for review, and without hearing oral argument, reverse the court of appeals' judgment and remand the case to the court of appeals for further proceedings. TEX. R. APP. P. 59.1.

Opinion delivered: January 21, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0131

v.

STACEY VELASQUEZ AND SARAGOSA ALANIZ, INDIVIDUALLY AND AS NEXT FRIENDS OF THEIR MINOR CHILD, SARAGOSA MARIO ALANIZ, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTH DISTRICT OF TEXAS

Argued September 10, 2008

JUSTICE HECHT delivered the opinion of the Court, in which CHIEF JUSTICE JEFFERSON, JUSTICE WAINWRIGHT, JUSTICE GREEN, JUSTICE JOHNSON, and JUSTICE WILLETT joined.

JUSTICE MEDINA filed a dissent, in which JUSTICE LEHRMANN joined.

JUSTICE GUZMAN did not participate in the decision.

Section 101.106(f) of the Texas Tort Claims Act provides that a suit against a government employee acting within the general scope of his employment must be dismissed "if it could have been brought under this chapter [that is, under the Act] against the governmental unit".[1] The court of appeals construed the quoted clause to mean that, to be entitled to dismissal, the employee must

[1] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

establish that governmental immunity from suit has been waived by the Act.[2] But as we stated in *Mission Consolidated Independent School District v. Garcia*: "we have never interpreted 'under this chapter' to only encompass tort claims for which the Tort Claims Act waives immunity."[3] Rather, "all [common-law] tort theories alleged against a governmental unit . . . are assumed to be 'under [the Tort Claims Act]' for purposes of section 101.106."[4] Accordingly, we reverse the judgment of the court of appeals and remand the case to the trial court for further proceedings.

I

Dr. John Christopher Franka and Dr. Nagakrishna Reddy, petitioners here, delivered S.M.A, the son of Stacey Velasquez and Saragosa Alaniz, respondents, at University Hospital, a public teaching hospital owned and operated by the Bexar County Hospital District, doing business as the University Health System.[5] The Hospital is staffed with medical faculty, residents, and students of the University of Texas Health Science Center at San Antonio.[6] Franka was a faculty member employed by the Health Science Center, and Reddy was a resident in the Center's program.

---

[2] 216 S.W.3d 409, 413 (Tex. App.–San Antonio 2006) ("a trial court . . . is not permitted to dismiss employees from a lawsuit under section 101.106(f) if a fact issue exists with regard to whether the governmental unit's immunity is waived").

[3] 253 S.W.3d 653, 658 (Tex. 2008) (citing *Harris Cnty. v. Sykes*, 136 S.W.3d 635, 640 (Tex. 2004), *Dallas Cnty. Mental Health and Mental Retardation v. Bossley*, 968 S.W.2d 339, 344 (Tex. 1998), and *Newman v. Obersteller,* 960 S.W.2d 621, 622-623 (Tex. 1997)).

[4] *Mission*, 253 S.W.3d at 659 (citing *Newman,* 960 S.W.2d at 622).

[5] The District does business as the University Health System. Its history is summarized on the System's website at http://www.universityhealthsystem.com/about-university-health-system/our-history/.

[6] *See Murk v. Scheele*, 120 S.W.3d 865, 866 (Tex. 2003) (per curiam) ("University Hospital [is] a public teaching hospital for indigent patients that is owned and operated by the Bexar County Health District and staffed with medical faculty, residents, and students of the University of Texas Health Science Center . . . .").

S.M.A.'s fetal heart rate had slowed, and Franka and Reddy thought it best to attempt a vaginal delivery facilitated by a vacuum extractor, an instrument that attaches to the top of a baby's head, helping move it through the birth canal. The head appeared and the extractor was removed, but delivery of the baby's front shoulder was obstructed, a relatively infrequent but well-recognized obstetric emergency known as shoulder dystocia. Franka and Reddy tried to free the baby's shoulder with their hands, but just as it appeared, Reddy heard a snap that she knew meant a bone had broken. The baby's left clavicle was fractured, and he suffered injury to his brachial plexus, requiring surgery several months later.

Velasquez and Alaniz, individually and on behalf of S.M.A., sued Franka and Reddy but not the Center (or the District or Hospital). Franka moved to dismiss the action under section 101.106(f) of the Texas Tort Claims Act, which states:

> If a suit is filed against an employee of a governmental unit based on conduct within the general scope of that employee's employment and if it could have been brought under this chapter against the governmental unit, the suit is considered to be against the employee in the employee's official capacity only. On the employee's motion, the suit against the employee shall be dismissed unless the plaintiff files amended pleadings dismissing the employee and naming the governmental unit as defendant on or before the 30th day after the date the motion is filed.[7]

In their response, plaintiffs acknowledged that Franka was employed by a governmental unit, the Center, and that their suit was based on conduct within the general scope of his employment. But, they argued, to invoke section 101.106(f), Franka had the burden of proving that suit "could have been brought under" the Act, and to discharge that burden, he had to offer evidence that the Center's

[7] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

immunity was waived by the Act. The only basis for such a waiver, they continued, was that their injuries were "caused by a condition or use of tangible personal . . . property" under section 101.021 of the Act,[8] and "[n]othing appears in this record to implicate the use or misuse of tangible personal property in causing the orthopaedic and neurological injuries to baby [S.M.A.]." Plaintiffs suggested that the Center stipulate that its immunity from suit was waived. Failing that, they urged that Franka's motion be denied.

Apparently the trial court never ruled on Franka's motion. More than a year passed, and defendants each filed a motion for summary judgment based on section 101.106(f), differing only as to the circumstances of their employment. Each argued that "suit against [them] could have been brought against the [Center] because the conduct of [defendants] on which the allegations are based involved the use of tangible property, namely the vacuum extractor". Each attached an affidavit stating that S.M.A.'s "treatment included the use of tangible property, including a vacuum extractor." And each requested the court to order that "unless [plaintiffs] substitute [the Center] as the defendant, the case will be dismissed in thirty days." Plaintiffs responded that defendants had failed to establish that suit could have been brought against the Center because there was "no evidence that the condition or use of tangible property, the vacuum extractor, was the instrumentality of the harm, and therefore no waiver of immunity". Plaintiffs also argued that defendants had not established that they were government employees as defined by the Act.

---

[8] *Id*. § 101.021 ("A governmental unit in the state is liable for . . . personal injury . . . caused by the wrongful act or omission or the negligence of an employee acting within the scope of his employment . . . by a condition or use of tangible personal . . . property if the governmental unit would, were it a private person, be liable to the claimant according to Texas law.").

The trial court denied defendants' motions, and they appealed.[9] The court of appeals affirmed, holding that a government employee is not entitled to dismissal under section 101.106(f) until he has established that his employer's immunity from suit has been waived by the Act.[10] In its view, the argument that

> the raising of a fact issue as to whether the suit "could have been brought under this chapter against the governmental unit" should be sufficient to enable a trial court to dismiss employees under section 101.106(f) . . . is untenable in view of its potential result. If the employees were dismissed and immunity was ultimately held not to have been waived, the plaintiffs would be left without a remedy. Just as a plea to the jurisdiction cannot be granted, thereby resulting in the dismissal of a lawsuit, when a fact issue exists, a trial court also is not permitted to dismiss employees from a lawsuit under section 101.106(f) if a fact issue exists with regard to whether the

---

[9] Plaintiffs have not questioned the court of appeals' jurisdiction over this interlocutory appeal. "A person may appeal from an interlocutory order of a district court, county court at law, or county court that . . . denies a motion for summary judgment that is based on an assertion of immunity by an individual who is an officer or employee of the state or a political subdivision of the state . . . ." TEX. CIV. PRAC. & REM. CODE § 51.014(a). For two reasons, we think defendants' motions for summary judgment were based on an assertion of immunity.

First, in *Newman v. Obersteller*, we held that section 51.014(a) allowed a school district employee to appeal the denial of his motion for summary judgment seeking dismissal under former section 101.106 because "section 101.106 is an immunity statute." 960 S.W.2d 621, 623 (Tex. 1997). At that time, section 101.106 provided simply: "A judgment in an action or settlement of a claim under this chapter bars any action involving the same subject matter by the claimant against the employee of the governmental unit whose act or omission gave rise to the claim." Act of May 17, 1985, 69th Leg. R.S., ch. 959, § 1, 1985 Tex. Gen. Laws 3242, 3305, recodifying former TEX. REV. CIV. STAT. ANN. art. 6252-19, § 12(a), Act of May 14, 1969, 61st Leg., R.S., ch. 292, § 12(a), 1969 Tex. Gen. Laws 874, 877 ("The judgment or settlement in an action or claim under this Act shall constitute a complete bar to any action by the claimant, by reason of the same subject matter, against the employee of a unit of government whose act or omission gave rise to the claim."). We reasoned that the phrase, "bars any action", was "an unequivocal grant of immunity", and that allowing an interlocutory appeal from a refusal to enforce the bar "protects public officials asserting an immunity defense from the litigation process." *Newman*, 960 S.W.2d at 622. The phrase is not used in current section 101.106(f), but four other subsections speak of a bar from suit or recovery, and we think the character of the statute as one conferring immunity remains unchanged. *See* TEX. CIV. PRAC. & REM. CODE § 101.106(a)-(d).

Second, section 101.106(f) states that a suit to which it applies "is considered to be against the employee in the employee's official capacity only." *Id.* § 101.106(f). We have held that "[w]ith the limited *ultra vires* exception . . . , governmental immunity protects government officers sued in their official capacities to the extent that it protects their employers." *City of El Paso v. Heinrich*, 284 S.W.3d 366, 380 (Tex. 2009). By moving for summary judgment on section 101.106(f), defendants were asserting claims of governmental immunity.

[10] 216 S.W.3d 409, 413 (Tex. App.–San Antonio 2006).

> governmental unit's immunity is waived. When such a fact issue exists, the employees have failed to establish that the suit "could have been [brought] under this chapter against the governmental unit."[11]

We granted defendants' petition for review.[12]

II

A threshold issue is whether Franka and Reddy are "employee[s] of a governmental unit" to whom section 101.106(f) applies. In this Court, plaintiffs do not contest Franka's employee status[13] because section 101.001(2) of the Act defines an employee as "a person . . . in the paid service of a governmental unit . . . [but not] an independent contractor . . . or a person who performs tasks the

---

[11] *Id*. (internal citation omitted).

[12] 51 Tex. Sup. Ct. J. 771 (Apr. 18, 2008). We have jurisdiction of this interlocutory appeal because the court of appeals' decision conflicts with *Harris Cnty. v. Sykes*, 136 S.W.3d 635 (Tex. 2004), *Dallas Cnty. Mental Health and Mental Retardation v. Bossley*, 968 S.W.2d 339 (Tex. 1998), and *Newman v. Obersteller,* 960 S.W.2d 621, 622-623 (Tex. 1997), the cases that provided the basis for our decision in *Mission Consol. Indep. Sch. Dist. v. Garcia*, 253 S.W.3d 653 (Tex. 2008). *See* TEX. GOV'T CODE § 22.001(a)(2) ("The supreme court has appellate jurisdiction . . . extending to all questions of law arising in . . . a case in which one of the courts of appeals holds differently from a prior decision of . . . the supreme court on a question of law material to a decision of the case . . . ."); *id*. § 22.001(e) ("For purposes of Subsection (a)(2), one court holds differently from another when there is inconsistency in their respective decisions that should be clarified to remove unnecessary uncertainty in the law and unfairness to litigants."); *see also City of San Antonio v. Ytuarte*, 229 S.W.3d 318, 319 (Tex. 2007) (per curiam) ("In 2003, the Legislature redefined and broadened our conflicts jurisdiction to eliminate the previous requirement that the rulings in the two cases be 'so far upon the same state of facts that the decision of one case [was] necessarily conclusive of the decision in the other.' *Coastal Corp. v. Garza*, 979 S.W.2d 318, 319 (Tex. 1998).").

[13] Respondents' Brief on the Merits 8 ("Velasquez/Alaniz do not contest, for the purpose of this appeal, that UTHSC is a "Governmental Unit" . . . [or] that Dr. Franka was an employee of UTHSC but do contest Dr. Reddy's alleged employee status.").

details of which the governmental unit does not have the legal right to control."[14] The Center is a governmental unit,[15] and Franka was a paid member of its faculty.[16]

Reddy, however, was a resident under a three-party "Graduate Medical Education Agreement", in which she, the Center, and the District, also a governmental unit,[17] agreed that the District would compensate her but would have no legal right to control the details of her work.[18]

Sw. Med. Ctr. at Dallas v. Loutzenhiser*, 140 S.W.3d 351, 354 & n.5 (Tex. 2004) (holding that University of Texas Southwestern Medical Center at Dallas, part of University of Texas System, of which University of Texas Southwestern Medical Center at San Antonio is another part, TEX. EDUC. CODE § 65.02(a)(7), is a governmental unit under the Tort Claims Act).

[16] *See Murk v. Scheele*, 120 S.W.3d 865, 867 (Tex. 2003) (per curiam) (a UT Health Science Center faculty member, practicing at the District's hospital but paid by the Center and subject to its regimens and review, was the Center's "employee" for purposes of the Tort Claims Act, even though he was required to exercise some independent medical judgment and not every detail of his work was controlled by the Center).

[17] *See* TEX. CIV. PRAC. & REM. CODE § 101.001(3), *supra* note 15; *Harris Cnty. Hosp. Dist. v. Tomball Reg'l Hosp.*, 283 S.W.3d 838, 842 (Tex. 2009) (citing *Martinez v. Val Verde Cnty. Hosp. Dist.*, 140 S.W.3d 370, 371 (Tex. 2004)); *cf. Bexar Cnty. Hosp. Dist. v. Crosby*, 327 S.W.2d 445, 446 (1959) (describing the Bexar County Hospital District as "a political subdivision of the State" created under the constitutional and statutory provisions at issue in the District's declaratory judgment suit against other governmental entities (see TEX. CONST. art. IX, §4 and Act of May 26, 1953, 53rd Leg., R.S., ch. 266, 1953 Tex. Gen. Laws 691, codified formerly as TEX. REV. CIV. STAT. ANN. art. 4494n and now as TEX. HEALTH & SAFETY CODE §§ 281.001-124)); *see also, e.g.*, TEX. GOV'T CODE §§ 403.1041(5), 534.002(1)(A); TEX. HEALTH & SAFETY CODE §§ 241.003(6), 285.072 (a contractor managing or operating a hospital under contract with a hospital district is considered a governmental unit for purposes of Chapters 101 (the Tort Claims Act), 102, and 108 of the Civil Practices and Remedies Code); and TEX. LOC. GOV'T CODE §§ 271.003(4); 271.009(1); 271.091(1), 271.111(10), and 271.151 (contract claims against local governmental entities) (3)(C).

[18] Specifically, the agreement stated: "The parties [*i.e.*, the Center, Reddy, and the District] understand that the Resident [*i.e.*, Reddy] performs tasks, namely the practice of medicine, the details of which the [District] does not have legal right to control and no such control is assumed by this Agreement." *Cf. Murk v. Scheele,* 120 S.W.3d 865, 867 (Tex. 2003) (per curiam) ("The Act's definition of 'employee' does not require that a governmental unit control *every* detail of a person's work. . . . [A] physician [in the "paid service" of a governmental unit and] whose practice is controlled by [that] governmental unit is not precluded from being an 'employee' within the meaning of the Act simply because he or she must exercise some independent medical judgment.").

Because Reddy was not both paid by and subject to the legal control of the same governmental unit,[19] she states that she "does not claim to be a § 101.001(2) employee."[20]

Instead, Reddy argues that section 312.007(a) of the Texas Health & Safety Code makes her a government employee for purposes of section 101.106(f) of the Act. Section 312.007(a) states:

> **A** medical and dental unit, supported medical or dental school, or coordinating entity is a state agency, and a director, trustee, officer, intern, **resident**, fellow, faculty member, or other associated health care professional or employee **of a medical** and dental **unit**, supported medical or dental school, or coordinating entity **is an employee of a state agency for purposes of** . . . **determining the liability, if any, of the person for the person's acts or omissions while engaged in the coordinated or cooperative activities of the unit**, school, or entity.[21]

---

[19] Although Reddy does not assert that the Center had the legal right to control her work, the agreement provided that the Center would "establish and maintain an organized educational program, which provides guidance and supervision of the Resident, facilitating the Resident's professional and personal development while ensuring safe and appropriate care for the patients, in accordance with the institutional policies and procedures of the [Accreditation Council for Graduate Medical Education]." The agreement further provided that the Center would "evaluate the Resident on a regular basis to assess the Resident's level of advancement, practice privileges, duty hour schedule, and the nature of supervision necessary by attending teaching staff." *Cf. St. Joseph Hosp. v. Wolff*, 94 S.W.3d 513, 542-544 (Tex. 2003) (plurality op.); *id.* at 544 (O'Neill, J., joined by Phillips, C.J., concurring) (concluding that the evidence did not show that a resident was under the control of the sponsoring hospital).

[20] Petitioners' Reply to Respondents' Brief on the Merits 4; *id*. at 6 ("As a result of this unique three-party arrangement, residents could not be deemed an employee of either entity under the Tort Claims Act's general definition of 'employee' as a person who is both paid by and subject to the control of a governmental entity."). We express no opinion on the validity of Reddy's reasoning.

[21] TEX. HEALTH & SAFETY CODE § 312.007(a) (emphasis added); *see also* (b) ("A judgment in an action or settlement of a claim against a medical and dental unit, supported medical or dental school, or coordinating entity under Chapter 101, Civil Practice and Remedies Code, bars any action involving the same subject matter by the claimant against a director, trustee, officer, intern, resident, fellow, faculty member, or other associated health care professional or employee of the unit, school, or entity whose act or omission gave rise to the claim as if the person were an employee of a governmental unit against which the claim was asserted as provided under Section 101.106, Civil Practice and Remedies Code.").

Reddy was a resident of a "medical unit".[22] Recently, in *Klein v. Hernandez*, we held that a resident covered by this section is a government employee for purposes of determining liability under the Act.[23] Since a liability determination may depend on whether the defendant is immune, we agree with Reddy that section 312.007(a), if applicable, would make her a government employee under section 101.106(f).

But plaintiffs argue that Reddy has failed to show that section 312.007(a) applies in this case. Section 312.003 states:

> This chapter [including section 312.007] applies only if a medical and dental unit and a supported medical or dental school agree, either directly or through a coordinating entity, to provide or cause to be provided medical, dental, or other patient care or services or to perform or cause to be performed medical, dental, or clinical education, training, or research activities in a coordinated or cooperative manner in a public hospital.[24]

Reddy acknowledges that the applicability of section 312.007(a) is conditioned on the existence of an agreement prescribed by section 312.003, and she argues that the "Graduate Medical Education Agreement" is such an agreement on its face. But the agreement does not include a supported medical or dental school, and even if that is not required, as one court has held,[25] an issue we do not

---

[22] Section 312.002(4) of the Texas Health & Safety Code provides that "[i]n this chapter: . . . '[m]edical and dental unit' has the meaning assigned by Section 61.003, Education Code." Section 61.003(5) of the Texas Education Code, in turn, defines "medical and dental unit" to include the University of Texas Medical School at San Antonio, where Reddy had her residency, which is part of the Center, *id*. § 65.02(a)(10) ("The University of Texas System is composed of . . . The University of Texas Health Science Center at San Antonio, including . . . The University of Texas Medical School at San Antonio . . . .").

[23] 315 S.W.3d 1, 8 (Tex. 2010).

[24] TEX. HEALTH & SAFETY CODE § 312.003.

[25] *See Bustillos v. Jacobs*, 190 S.W.3d 728, 735 (Tex. App.–San Antonio 2005, no pet.) (holding that an agreement by "a medical or dental unit" to provide medical training and patient care in a public hospital is sufficient to satisfy section 312.003, without joinder of "a supported medical or dental school").

decide, there is nothing in the record to indicate whether or how the agreement furthers the purpose of chapter 312, which is

> to authorize coordination and cooperation between medical and dental units, supported medical or dental schools, and public hospitals and to remove impediments to that coordination and cooperation in order to:
>
> (1) enhance the education of students, interns, residents, and fellows attending a medical and dental unit or a supported medical or dental school;
>
> (2) enhance patient care; and
>
> (3) avoid any waste of public money.[26]

Further, section 312.004 authorizes medical and dental units, medical and dental schools, coordinating entities, and public hospitals to contract among themselves for, among other things, "the clinical education of . . . residents",[27] but section 312.005(a) provides that "[t]o be effective, a contract under Section 312.004 must be submitted to the [Texas Board of Health]."[28] Reddy argues that an agreement that satisfies section 312.003 need not be made under section 312.004, and therefore need not be approved by the Texas Board of Health, but she cites no authority, and nothing in the statutory text supports her argument. The record does not reflect whether the "Graduate

[26] TEX. HEALTH & SAFETY CODE § 312.001(b).

[27] *Id.* § 312.004(c) ("A medical and dental unit, a supported medical or dental school, and a coordinating entity may contract with the owner or operator of a public hospital for the clinical education of students, interns, residents, and fellows enrolled at the unit or school."); *see also id.* § 312.004(a) ("Medical and dental units, supported medical or dental schools, coordinating entities, and public hospitals may make and perform contracts among each other for the coordinated or cooperative clinical education of the students, interns, residents, and fellows enrolled at the units or schools.").

[28] *Id.* § 312.005(a).

Medical Education Agreement", or even the program it facilitated, was approved by the Board; for all we know, the program could have been disapproved by the Board.

In sum, we cannot determine from the summary judgment record that Reddy established as a matter of law that she was an employee of a governmental unit for purposes of section 101.l06(f).

III

Franka, to whom section 101.106(f) does apply, was entitled to dismissal only if the plaintiffs' suit "could have been brought under [the Act] against [the Center]".[29] The court of appeals held that the plaintiffs' suit could not have been brought under the Act unless, as a matter of law, the Act waived the Center's immunity from suit.[30] We disagree. We begin by reviewing our cases, which firmly establish the rule that any tort claim against the government is brought "under" the Act for purposes of section 101.106, even if the Act does not waive immunity. Next, we show that to except section 101.106(f) from this rule would be inconsistent with other provisions of the Act and would create disparities in its operation. We then consider the practical problems that would result from the court of appeals' construction. Finally, we consider the policies that underlie the statute as we construe it.

[29] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

[30] 216 S.W.3d 409, 412 (Tex. App.–San Antonio 2006).

A

We first considered whether a suit for which the Act has not waived immunity is nevertheless "under" the Act for purposes of section 101.106 in *Newman v. Obersteller*.[31] At that time, section 101.106 stated simply:

> A judgment in an action or a settlement of a claim under this chapter bars any action involving the same subject matter by the claimant against the employee of the governmental unit whose act or omission gave rise to the claim.[32]

A high school student and his parents sued his coach and the school district for intentional infliction of emotional distress,[33] alleging that the coach and other school employees had berated, harassed, and intimidated him, once locking him in a locker room by himself.[34] The trial court dismissed the case against the school district based on its assertion of immunity, presumably because the Act does not waive immunity for intentional torts,[35] but refused to dismiss the case against the coach.[36] The court of appeals dismissed the coach's interlocutory appeal for want of jurisdiction, holding that section 101.106 was not a grant of immunity to government employees, the denial of which was

[36] *Newman*, 960 S.W.2d at 622.

subject to interlocutory appeal, but merely a procedural limitation.[37] We reversed, holding that the statute's "bar" of an action against a government employee in effect conferred immunity on the employee.[38] We also rendered judgment against the plaintiffs, holding that the dismissal of their claim against the school district barred their action against the coach.[39] The rule of *Newman* is that a tort claim against the government is "under" the Act even though the Act does not waive immunity from suit.

We followed the rule in *Dallas County Mental Health and Mental Retardation v. Bossley*[40] and again in *Harris County v. Sykes*.[41] In *Bossley*, the plaintiffs sued a mental health treatment facility and its employees for allowing their son to escape, resulting in his death.[42] The trial court dismissed the case, holding that the facility was immune from suit and that suit against the employees was consequently barred by section 101.106, but the court of appeals reversed.[43] We held that the trial court was correct.[44] In *Sykes*, the plaintiff sued the county and its jailor, alleging that while incarcerated in the county jail, he had negligently been assigned a bed near an inmate with

tuberculosis.[45] The trial court dismissed the case as the trial court in *Bossley* had done, but the court of appeals reversed with respect to the jailor.[46] We held that the dismissal of the county barred suit against the jailor.[47]

We elaborated on the rule in *Mission Consolidated Independent School District v. Garcia*,[48] construing a new version of section 101.106, completely revised and greatly expanded in 2003 by House Bill 4, a comprehensive tort reform measure.[49] The revised provision—in which "under this chapter" is used in subsections, (a), (c), (e), and (f)—reads as follows:

> (a) The filing of a suit under this chapter against a governmental unit constitutes an irrevocable election by the plaintiff and immediately and forever bars any suit or recovery by the plaintiff against any individual employee of the governmental unit regarding the same subject matter.
>
> (b) The filing of a suit against any employee of a governmental unit constitutes an irrevocable election by the plaintiff and immediately and forever bars any suit or recovery by the plaintiff against the governmental unit regarding the same subject matter unless the governmental unit consents.
>
> (c) The settlement of a claim arising under this chapter shall immediately and forever bar the claimant from any suit against or recovery from any employee of the same governmental unit regarding the same subject matter.
>
> (d) A judgment against an employee of a governmental unit shall immediately and forever bar the party obtaining the judgment from any suit against or recovery from the governmental unit.

[49] Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 11.05, 2003 Tex. Gen. Laws 847, 886.

> (e) If a suit is filed under this chapter against both a governmental unit and any of its employees, the employees shall immediately be dismissed on the filing of a motion by the governmental unit.
>
> (f) If a suit is filed against an employee of a governmental unit based on conduct within the general scope of that employee's employment and if it could have been brought under this chapter against the governmental unit, the suit is considered to be against the employee in the employee's official capacity only. On the employee's motion, the suit against the employee shall be dismissed unless the plaintiff files amended pleadings dismissing the employee and naming the governmental unit as defendant on or before the 30th day after the date the motion is filed.[50]

In *Mission*, three former employees of the school district sued the district and its superintendent: the district for wrongful termination in violation of the Texas Commission on Human Rights Act,[51] both the district and superintendent for intentional infliction of emotional distress, and the superintendent for defamation, fraud, and negligent misrepresentation.[52] The district sought dismissal under section 101.106(b), asserting that the plaintiffs' suit against the superintendent barred suit against it on the same claims without its consent.[53] The trial court refused to dismiss the case against the district, and the court of appeals affirmed.[54]

The plaintiffs argued that because they had sued both the district and the superintendent, section 101.106(e) applied, rather than 101.106(b), and because the Act did not waive the district's immunity from suit on either of their claims against it, those claims were not "under" the Act, and

[52] 253 S.W.3d at 655.

[53] *Id*.

[54] *Id.*

therefore dismissal of the superintendent was not required.[55] We concluded that the plaintiffs' argument misconstrued subsection (e), and that correctly construed, the end result under either subsection (b) or (e) would be the same. We analyzed subsection (e) as follows:

> The court of appeals reasoned that none of Garcia's claims were brought "under this chapter" because they did not fit within the Tort Claims Act's waiver, and therefore section 101.106(e) did not apply. However, we have never interpreted "under this chapter" to only encompass tort claims for which the Tort Claims Act waives immunity. To the contrary, in *Newman v. Obersteller,* we held that former section 101.106's limiting phrase "under this chapter" operated to bar an intentional tort claim against an employee after a final judgment on a claim involving the same subject matter had been rendered against the governmental unit, even though the Act by its terms expressly excluded intentional torts from the scope of the Act's immunity waiver. *See also, e.g., Sykes,* 136 S.W.3d at 640 (applying section 101.106 to bar the plaintiff's claim against a governmental employee even though immunity was not waived under the Tort Claims Act for suit against the governmental unit); *Dallas County Mental Health & Mental Retardation v. Bossley,* 968 S.W.2d 339, 344 (Tex. 1998) (dismissing suit against employee when both the employee and the governmental unit were sued based on negligence theories that were not within the Act's limited waiver). Although these cases construed the prior version of section 101.106, there is nothing in the amended version that would indicate a narrower application of the phrase "under this chapter" was intended. Because the Tort Claims Act is the only, albeit limited, avenue for common-law recovery against the government, all tort theories alleged against a governmental unit, whether it is sued alone or together with its employees, are assumed to be "under [the Tort Claims Act]" for purposes of section 101.106. *See Newman,* 960 S.W.2d at 622.
>
> Having concluded that Garcia's tort claims are not excluded from section 101.106(e)'s application, we examine subsection (e)'s effect if it were applied to this case. Under subsection (e), Dyer would be entitled to dismissal of Garcia's suit against him upon the ISD's filing of a motion. The ISD has not sought Dyer's dismissal, however, and Dyer has not sought his own dismissal under subsection (f). But if the ISD had obtained Dyer's dismissal from the suit under subsection (e), all of Garcia's tort claims against the ISD would be barred because, as we have said, all tort theories of recovery alleged against a governmental unit are presumed to be "under the [Tort Claims Act]." Garcia's suit under the TCHRA, however, is not "a

[55] *Id.* at 658.

> suit filed under this chapter" and would not come within subsection (e)'s purview because the Tort Claims Act expressly provides that the remedies it authorizes "are in addition to any other legal remedies," and the TCHRA provides a statutory remedy for unlawful discrimination. *Id.* § 101.003. Claims against the government brought pursuant to waivers of sovereign immunity that exist apart from the Tort Claims Act are not brought "under [the Tort Claims Act]." In sum, if subsection (e) were applied to Garcia's suit and Dyer was dismissed, the only claim against the ISD that would survive would be Garcia's TCHRA claim.[56]

Likewise, only the TCHRA claim survived under section 101.106(b). Because subsection (b) does not contain the "under this chapter" limitation, any suit against a government employee bars suit "against the governmental unit regarding the same subject matter unless the governmental unit consents".[57] While the school district had not itself consented to be sued by the plaintiffs, the TCHRA provided consent for wrongful termination claims, because "the government conveys its consent to suit . . . through the Constitution and state laws."[58] "Thus," we concluded, "the Legislature, on behalf of the [school district], has consented to suits brought under the TCHRA, provided the procedures outlined in the statute have been met."[59]

The rule that a tort suit against the government, as distinct from a statutory claim, is brought "under" the Act for purposes of section 101.106, even though the Act does not waive immunity, is firmly grounded in our cases. More importantly, as *Mission* illustrates, with the 2003 revisions to

---

[56] *Id*. at 658-659 (footnote and some citations omitted).

[57] *Id*. at 659-660.

[58] *Id*. at 660.

[59] *Id*.

section 101.106, the rule has become necessary for harmonizing the several subsections of the statute.

B

Although we have not applied the same rule to section 101.106(f) before today, the statutory text suggests we should. The revised statute lifts the phrase "under this chapter" from the prior statute and repeats it four times. The prior statute referred to "an action or settlement of a claim under this chapter". The current version refers to "[t]he filing of a suit under this chapter" in subsection (a), "[t]he settlement of a claim arising under this chapter" in subsection (c), "a suit . . . filed under this chapter" in subsection (e), and "a suit [that] . . . could have been brought under this chapter" in subsection (f).[60] The text gives no hint that any these references has a different meaning; to the contrary, the repetition strongly suggests that the meaning throughout is the same.

Two other sections of the Act also make plain that suits brought "under" the Act include those for which immunity is not waived. Section 101.103(a) requires the attorney general to "defend each action brought under this chapter".[61] One would hardly suppose that the attorney general would be relieved of this responsibility whenever he thought, as he regularly does, his client's immunity remained intact despite the plaintiff's allegations. Section 101.102, entitled "Commencement of Suit", provides that "[a] suit under this chapter shall be brought in state court in the county in which the cause of action or a part of the cause of action arises."[62] If this applies only to suits for which

[61] *Id.* § 101.103(a).

[62] *Id.* § 101.102(a).

immunity is waived, can suits for which immunity is not waived, of which there are many, be brought anywhere? One would hardly think so. These examples serve to illustrate the obvious: that suit is brought under the Act when it is filed, not when waiver of immunity by the Act is established.

Construing subsection (f) as the court of appeals did in this case is not only inconsistent with *Mission* and the Act as a whole, it creates at least a disparity, if not an absurdity, in the statute's operation. If a plaintiff sues only a government employee and not the government, then under subsection (f), according to the court of appeals, the employee need not be dismissed unless a waiver of the government's immunity for the claim is established. But if a plaintiff sues both the government and its employee, then under subsection (e), according to *Mission*, the employee must be dismissed, even if the government's immunity is not waived. There is no reason why an employee should be entitled to dismissal if sued with the government but not if sued alone.

For consistency both within section 101.106 and throughout the Act, subsection (f) must be governed by the same rule *Mission* applied in construing subsection (e).

C

The court of appeals' construction of section 101.106(f) poses serious practical problems.

Requiring a government employee to prove that his employer's immunity from suit has been waived in order to obtain dismissal forces the parties to take unexpected positions with collateral risks. Ordinarily, one would expect a government employee to support his employer's assertion of immunity. Only a perverse statute would incentivize conflict between the two, and there is nothing to indicate that the Legislature had any such intent. The plaintiff, too, is forced into an awkward

position, arguing that immunity was not waived, and thereby cutting off that path to liability and recovery.

Moreover, the employee, the plaintiff, and the employer could all be whipsawed by the trial court's ruling that immunity was waived. Since the government was not a party to the case at the time, it would not be bound by the ruling and would be free to seek a redetermination and to appeal. Exhibit A in support of its arguments that immunity was not waived would be the plaintiff's own assertions. And in response, the plaintiff would cite the employee. The immunity issue would thus be encased in confusion and cynicism.

The predicament for the plaintiff would be even trickier. He would be required to decide within thirty days of the employee's motion to dismiss whether to acquiesce and sue the government instead. Nothing in section 101.106(f) requires the trial court to rule on whether immunity was waived, either before or after the thirty-day deadline. Even if the plaintiff obtained the trial court's ruling before having to decide whether to dismiss the employee, there would be no assurance that the ruling would be upheld on appeal, especially after the issue was relitigated with the government. If the plaintiff refuses to dismiss the employee, he risks being faced with the government's stipulation that immunity was waived, after the deadline for suing the government has run. If he dismisses the employee and sues the government, he has some advantage in being able to defend the government's assertion of immunity with its employee's contrary statements, but he may not be able to prove waiver, even with such statements. Thus, he will have traded a viable claim against the employee for a barred claim against the government.

Section 101.106(f) leaves the timing of a motion to dismiss to the employee. Delay poses an additional problem for the plaintiff. If he does not notify the government of his claim as required by section 101.101, believing that he has a stronger claim against the employee actor, the government may wait until after the six-month deadline for that notice and then stipulate that immunity was waived, leaving the plaintiff with no cause of action at all. To avoid this result, the plaintiff may notify the government of his claim, but his doing so may be taken as an indication of his position that immunity has been waived, undercutting any later argument that it was not.

These problems, though thorny, may not always occur and may not be insuperable when they do, but they arise at all only under the court of appeals' construction of section 101.106(f). They do not exist if subsection (f) is construed the same way *Mission* construed subsection (e). Properly construed, section 101.106(f)'s two conditions are met in almost every negligence suit against a government employee: he acted within the general scope of his employment,[63] and suit could have been brought under the Act — that is, his claim is in tort and not under another statute that independently waives immunity. In such cases, the suit "is considered to be against the employee in the employee's official capacity only",[64] and the plaintiff must promptly dismiss the employee and sue the government instead. No party is forced into awkward or conflicting positions. The immunity issue need not be determined until the governmental unit is in the suit and the issue can be fully addressed.

---

[63] Whether an employee's intentional tort is within the scope of employment is a more complex issue. *See generally* RESTATEMENT (THIRD) OF AGENCY § 7.07 (2006).

[64] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

This construction of section 101.106(f) does, however, foreclose suit against a government employee in his individual capacity if he was acting within the scope of employment. This changes, among other things, the rule in *Kassen v. Hatley*, which has allowed malpractice suits against physicians employed by the government, even though acting within the scope of employment.[65] Recovery for the negligence of a government physician acting in the course of employment would be limited to that afforded under the Act. At least one participant in the legislative process that resulted in the enactment of House Bill 4 has written that this change was precisely the intent of the revisions to section 101.106.[66] In any event, our construction of section 101.106 is compelled by its text and by the rule of *Mission*, *Sykes*, *Bossley*, and *Newman*.[67]

---

[65] 887 S.W.2d 4, 11 (Tex. 1994).

[66] "Under prior law, many plaintiffs avoided the TTCA's cap on damages, notice provision, and case law interpreting use and misuse of tangible personal property by suing government employees individually. Texas case law had generally held that individual employees were not afforded the defenses and protections contained in the TTCA. Accordingly, by filing suit against the employee under other statutes, a plaintiff could circumvent the TTCA.

"Section 11.05 of H.B. 4 created a new 'Election of Remedies' section under the TTCA. The section effectively requires plaintiffs to sue the governmental unit rather than an employee of the governmental unit.

* * *

"The net effect of the various new provisions of the TTCA is that a plaintiff will only be able to pursue the governmental entity and not its employees. The amendment also solves the problems Texas courts faced in trying to determine if employees of governmental units were entitled to the defense of official immunity. . . .

"In *Kassen*, the Texas Supreme Court held that health care providers are entitled to official immunity if their acts are governmental in nature and not purely medical. The court's 1994 holding has forced lower courts to conduct a complicated analysis of each fact pattern in each case. Consequently, *Kassen* did not remove the threat of potential lawsuits against employees of a governmental unit. . . . H.B. 4 addressed those concerns by requiring that lawsuits be brought against the governmental unit instead of its employees. As a result, the need for determining if official immunity applies is eliminated."

Michael S. Hull et al., *House Bill 4 and Proposition 12: An Analysis with Legislative History, Part Three*, 36 TEX. TECH L. REV. 169, 290-293 (2005) (footnotes omitted).

[67] Two courts of appeals appear to have recognized that *Mission* requires the construction of section 101.106(f) we adopt. *Castro v. McNabb*, 319 S.W.3d 721, 731-732 (Tex. Such a suit actually seeks to impose liability against the governmental unit rather than on the individual specifically named and 'is, in all respects other than name, . . . a suit against the entity.' *Id.; see also Tex. Natural Res. Conservation Comm'n v. IT-Davy,* 74 S.W.3d 849, 855-56 (Tex. 2002).").

[69] *City of El Paso v. Heinrich*, 284 S.W.3d 366, 372, 373 (Tex. 2009) ("[S]uits to require state officials to comply with statutory or constitutional provisions are not prohibited by sovereign immunity, even if a declaration to that effect compels the payment of money. To fall within this *ultra vires* exception, a suit must not complain of a government officer's exercise of discretion, but rather must allege, and ultimately prove, that the officer acted without legal authority or failed to perform a purely ministerial act. . . . But the *ultra vires* rule is subject to important qualifications. Even if such a claim may be brought, the remedy may implicate immunity.").

governmental immunity, derivatively, as his government employer.[70] But public employees (like agents generally[71]) have always been individually liable for their own torts, even when committed in the course of employment,[72] and suit may be brought against a government employee in his individual capacity.[73] Generally, however, public employees may assert official immunity[74] "from suit arising from the performance of their (1) discretionary duties in (2) good faith as long as they are (3) acting within the scope of their authority."[75] Of course, determining whether actions and decisions are discretionary "is admittedly problematic".[76] Importantly, for government employees with medical responsibilities, we held in *Kassen* that government discretion does not include medical

---

[70] *Id.* at 380 ("With the limited *ultra vires* exception . . . , governmental immunity protects government officers sued in their official capacities to the extent that it protects their employers."); *Koseoglu*, 233 S.W.3d at 844 ("When a state official files a plea to the jurisdiction, the official is invoking the sovereign immunity from suit held by the government itself.").

[71] *E.g. Miller v. Keyser*, 90 S.W.3d 712, 717 (Tex. 2002); *Leonard v. Abbott*, 366 S.W.2d 925, 928-929 (Tex. 1963).

[72] *House v. Houston Waterworks Co.*, 31 S.W. 179, 181 (Tex. 1895) ("It is well settled that a public officer or other person who takes upon himself a public employment is liable to third persons in an action on the case for any injury occasioned by his own personal negligence or default in the discharge of his duties." (internal quotation marks and citation omitted)).

[73] *Heinrich*, 284 S.W.3d at 373 n.7 ("State officials may, of course, be sued in both their official and individual capacities.").

[74] *Ballantyne v. Champion Builders, Inc.*, 144 S.W.3d 417, 422-424 (Tex. 2004) (discussing the history of official immunity in Texas law, noting that it has been accorded officials, law enforcement and emergency officers, and physicians, and holding that board of adjustment members can assert it). We have not held that every government employee may assert official immunity, but I am not aware of a case denying it.

[75] *City of Lancaster v. Chambers*, 883 S.W.2d 650, 653 (Tex. 1994).

[76] *Kassen v. Hatley*, 887 S.W.2d 4, 9 (Tex. 1994).

discretion.[77] Thus, official immunity does not protect a physician sued in his individual capacity from liability for medical decisions and actions.

Before the Tort Claims Act was passed in 1969, if suit against the government was barred by immunity, a plaintiff could sue and recover against a government employee-actor in his individual capacity even though, were he sued for the same conduct in his official capacity, he would be shielded by derived governmental immunity. The employee's official immunity would not bar suit or recovery if his conduct were non-discretionary, medical, or not done in good faith. Under the Act, a waiver of governmental immunity does not preclude an assertion of official immunity,[78] but a successful assertion of official immunity results in a waiver of governmental immunity.[79]

In waiving governmental immunity, the Legislature correspondingly sought to discourage or prevent recovery against an employee. As already discussed, the original enactment of the Act in 1969 contained a provision substantively identical to section 101.106 before its revision in 2003. That provision was strikingly similar to language in the 1949 Federal Tort Claims Act.[80] The federal provision was amended in 1961 to make the FTCA the exclusive remedy for motor vehicle accidents

[80] 28 U.S.C. § 2676 ("The judgment in an action under [the Federal Tort Claims Act] shall constitute a complete bar to any action by the claimant, by reason of the same subject matter, against the employee of the government whose act or omission gave rise to the claim."). We noted the similarity in *Thomas v. Oldham*, 895 S.W.2d 352, 356 (Tex. 1995).

involving federal employees acting within the scope of their employment,[81] but through the years, judicial application of official immunity was not entirely uniform.[82] In 1988, the United States Supreme Court held in *Westfall v. Erwin* that for a federal employee to be immune from suit on a common law tort, he must show not only that he was acting within the scope of employment but also that he was performing a discretionary function.[83] Congress viewed the second requirement as exposing employees to unwarranted liability[84] and quickly passed the Federal Employees Liability Reform and Tort Compensation Act, commonly known as the Westfall Act, which provided immunity to all employees acting within the scope of employment,[85] "'return[ing] [them] to the

---

[81] *Gutierrez de Martinez v. Lamagno*, 515 U.S. 417, 425 (U.S. 1995) (citing Pub. L. 87-258, § 1, 75 Stat. 539).

[82] *See, e.g.*, *Barr v. Matteo*, 360 U.S. 564, 574-575 (1959) (Justice Harlan, joined by Justices Frankfurter, Clark, and Whittaker, concluded that, under the circumstances in the record, the alleged libel could not be said to be an inappropriate exercise of discretion by an agency head; it would be unduly restrictive to hold a public statement of agency policy, on a matter of wide public interest, by a policy-making executive official, was not an action in the line of duty, and the "fact that the action was within outer perimeter of the petitioner's line of duty is enough to render the privilege applicable, despite the allegations of malice"), and *Poolman v. Nelson*, 802 F.2d 304, 308 & n.2 (8th Cir. 1986) (holding that a Farmers Home Administration county supervisor was immune from a would-be borrower's suit over alleged misrepresentations because those actions fell "within the outer perimeter" of the county supervisor's authority, citing, *inter alia*, *Barr*, 360 U.S. at 571).

[83] 484 U.S. 292, 296-297 (1988); *see also* H.R. REP. No. 100-700, at 2 (1988), *reprinted in* 1988 U.S.C.C.A.N. 5945, 5946 ("[I]n Westfall, the Supreme Court added an additional requirement for immunity when a Federal employee is sued in his personal capacity. Now, the Federal employee not only must have been acting within the scope of employment (the original standard), but also must have exercised governmental discretion in acting.").

[84] *See* H.R. REP. No. 100-700, at 2 (1988), *reprinted in* 1988 U.S.C.C.A.N. 5945, 5946 ("[N]early all actions against Federal employees in their personal capacity were unsuccessful because those employees were acting in the course and scope of employment, and therefore were immune from personal liability").

[85] 28 U.S.C. § 2679 ("(b)(1) The remedy against the United States provided by [the Federal Tort Claims Act] for injury or loss of property, or personal injury or death arising or resulting from the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment is exclusive of any other civil action or proceeding for money damages by reason of the same subject matter against the employee whose act or omission gave rise to the claim or against the estate of such employee. Any other civil action or proceeding for money damages arising out of or relating to the same subject matter against the employee or the employee's estate is precluded without regard to when the act or omission occurred. (2) Paragraph (1) does not extend or apply to a civil

status they held prior to the *Westfall* decision.'"[86] The Westfall Act made whatever remedy the FTCA provided against the United States a claimant's exclusive remedy for a government employee's conduct in the scope of employment.

House Bill 4's revision of section 101.106 achieves the same end under Texas law as the Westfall Act does under federal law. As it affects government-employed physicians, it is generally consistent with the Legislature's concerns regarding health care costs, also expressed in the bill.[87] We recognize that the Open Courts provision of the Texas Constitution "prohibits the Legislature from unreasonably abrogating well-established common-law claims",[88] but restrictions on government employee liability have always been part of the tradeoff for the Act's waiver of immunity, expanding the government's own liability for its employees' conduct,[89] and thus "a reasonable exercise of the police power in the interest of the general welfare."[90] In any event, no constitutional challenge is made in this case.

***

action against an employee of the Government — (A) which is brought for a violation of the Constitution of the United States, or (B) which is brought for a violation of a statute of the United States under which such action against an individual is otherwise authorized.").

[86] *Gutierrez de Martinez*, 515 U.S. at 426 (quoting H.R. REP. No. 100-700, at 4 (1988)).

[87] Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.11, 2003 Tex. Gen. Laws 847, 884.

[88] *Butnaru v. Ford Motor Co.*, 84 S.W.3d 198, 202 (Tex. 2002).

[89] *See Thomas v. Oldham*, 895 S.W.2d 352, 357-358 (Tex. 1995).

Opinion delivered: January 21, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0131

JOHN CHRISTOPHER FRANKA, M.D., AND NAGAKRISHNA REDDY, M.D., PETITIONERS,

v.

STACEY VELASQUEZ AND SARAGOSA ALANIZ, BOTH INDIVIDUALLY AND AS NEXT FRIENDS OF THEIR MINOR CHILD, SARAGOSA MARIO ALANIZ, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTH DISTRICT OF TEXAS

Argued September 10, 2008

JUSTICE MEDINA, joined by JUSTICE LEHRMANN, dissenting.

In *Kassen v. Hatley*, we held that government-employed medical personnel were not entitled to the defense of official immunity when sued individually for the negligent exercise of purely medical judgment. 887 S.W.2d 4, 11 (Tex. 1994). Recognizing that medical decisions were typically unrelated to governmental discretion, we concluded that public-sector patients should have the same rights as private-sector patients when only medical judgment was at issue. *Id.* 11–12. Today, the Court abandons that principle, not because *Kassen* was wrongly decided, but because the Legislature has amended section 101.106 of the Tort Claims Act. TEX. CIV. PRAC. & REM. CODE

§ 101.106. Because this amendment does not speak to the official immunity of physicians accused of malpractice and does not require that we abandon *Kassen*, I respectfully dissent.

I

The Texas Tort Claims Act[1], does not waive the state's immunity generally for the medical malpractice of its doctors. Instead, it waives the state's sovereign or governmental immunity for, among other things, personal injury "caused by a condition or use of tangible . . . property." TEX. CIV. PRAC. & REM. CODE § 101.021(2). Texas courts have struggled with the meaning and application of the quoted phrase since the Act's adoption over forty years ago. *See Texas Dep't of Criminal Justice v. Miller*, 51 S.W.3d 583, 590 (Tex. 2001) (Hecht, J. concurring) (lamenting that judicial decisions "have done so little to infuse the Act's use-of-property standard with meaning that the task now appears hopeless"). Although the standard lacks clarity, it is clear that medical negligence will sometimes not involve the use of property. Consider the facts in this case.

The asserted medical malpractice concerns a brachial plexus injury to an infant during delivery. The brachial plexus is a network of nerves that conducts signals from the spine to the shoulder, arm, and hand. These nerves were allegedly damaged when one of the infant's shoulders became stuck during delivery and was accidently broken.

The parents' theory was that the doctors ignored numerous warning signs indicating the need for a Caesarean delivery. The parents supported their theory with an expert report that listed the risk

[1] The Tort Claims Act waives the state's sovereign immunity "for certain tort claim involving automobiles, premises defects, or the condition or use of property." *Stephen F. Austin State Univ. v. Flynn*, 228 S.W.3d 653, 657 (Tex. 2007); *see also* TEX. CIV. PRAC. & REM. CODE §§ 101.001(3)(A)-(B), 101.021, 101.022, 101.025.

factors presented in the case. The report concluded that the doctors had "departed from the standard of care by failing to recognize that [the mother and fetus] demonstrated these six significant risk factors for the development of shoulder dystocia leading to an improper attempt at vaginal delivery rather than a Caesarean delivery that would have avoided the shoulder fracture and brachial plexus nerve injury sustained at birth."

The doctors moved to dismiss, contending that the parents should have sued their employer, UTHSC, rather than the doctors individually because a vacuum extractor was used during delivery. To invoke a waiver of governmental immunity conditioned upon a "use of property" there must be a causal link between the property's use and the patient's injury.[2] The court of appeals concluded that there was no such causal link here because neither the pleadings nor the evidence implicated the vacuum extractor as a cause of injury. 216 S.W.3d at 411-13. The court observed that the progress notes, the expert report, and the deposition testimony of the two doctors established that the vacuum extractor was used only to deliver the infant's head. *Id*. at 411. A number of additional maneuvers, involving only the doctors' hands, were used after that to deliver the infant's shoulders at which time the injury occurred. *Id*.

When a governmental employee causes injury, section 101.106 of the Tort Claims Act purports to give the injured person a choice of suing the government, or its employee, or both. TEX. CIV. PRAC.

---

[2] *See Tex. Natural Resource & Conservation Comm'n v. White*, 46 S.W.3d. 864, 868, 869 (Tex. 2001) (property's use "must have actually caused the injury"); *Dallas Cnty. Mental Health & Mental Retardation v. Bossley*, 968 S.W.2d 339, 344 (Tex. 1997) ("personal injury or death must be proximately caused by a condition or use of tangible personal or real property").

& REM. CODE § 101.106. I say purports because the Court holds that this provision is a sham; it does not actually provide the putative plaintiff any choice in the matter. The statute's title and text indicate, however, that the Court is wrong. The statute plainly puts the plaintiff to an election[3] at the time of filing suit with different consequences following the various choices.

Although not pertinent to this appeal, the statute also covers the consequences of a settlement or judgment. *Id.* § 101.106(c), (d). Before its amendment in 2003, section 101.106 applied exclusively to settlements and judgments and provided simply that a plaintiff could not sue the

---

[3] § 101.106. **Election of Remedies**

(a) The filing of a suit under this chapter against a governmental unit constitutes an irrevocable election by the plaintiff and immediately and forever bars any suit or recovery by the plaintiff against any individual employee of the governmental unit regarding the same subject matter.

(b) The filing of a suit against any employee of a governmental unit constitutes an irrevocable election by the plaintiff and immediately and forever bars any suit or recovery by the plaintiff against the governmental unit regarding the same subject matter unless the governmental unit consents.

(c) The settlement of a claim arising under this chapter shall immediately and forever bar the claimant from any suit against or recovery from any employee of the same governmental unit regarding the same subject matter.

(d) A judgment against an employee of a governmental unit shall immediately and forever bar the party obtaining the judgment from any suit against or recovery from the governmental unit.

(e) If a suit is filed under this chapter against both a governmental unit and any of its employees, the employees shall immediately be dismissed on the filing of a motion by the governmental unit.

(f) If a suit is filed against an employee of a governmental unit based on conduct within the general scope of that employee's employment and if it could have been brought under this chapter against the governmental unit, the suit is considered to be against the employee in the employee's official capacity only. On the employee's motion, the suit against the employee shall be dismissed unless the plaintiff files amended pleadings dismissing the employee and naming the governmental unit as defendant on or before the 30th day after the date the motion is filed.

TEX. CIV. PRAC. & REM. CODE § 101.106.

employee after a judgment or settlement with the government.[4] We characterized the employee's right under the former provision as an immunity from liability. *Dallas Cnty. Mental Health & Mental Retardation v. Bossley*, 968 S.W.2d 339, 344 (Tex. 1997); *see also Newman v. Obersteller*, 960 S.W.2d 621, 622 (Tex. 1997). The 2003 amendments have expanded the statute's scope but have not changed its character. The statute continues to create immunity from liability but now includes decisions made at the time of filing suit in addition to settlements and judgments.

Under the current statute, a plaintiff who sues only the government is barred from subsequently suing the government's employee "regarding the same subject matter." TEX. CIV. PRAC. & REM. CODE § 101.106(a). The plaintiff may elect to sue both the government and its employee, but the statute grants the government the unconditional right to have its employee dismissed from the suit if the plaintiff makes that election. *Id*. § 101.106(e). If the plaintiff does not want to sue the government, the plaintiff may sue the employee individually in which case the statute bars the plaintiff from subsequently suing the government "regarding the same subject matter unless the governmental unit consents." *Id*. § 101.106(b). Even when the plaintiff sues the employee individually, the employee may obtain his or her dismissal under the conditions set out in section 101.106(f).

Subpart (f) provides that the employee shall be dismissed when the suit "is based on conduct within the general scope of that employee's employment and . . . could have been brought under this

[4] The former provision, titled, "Employees Not Liable after Settlement or Judgment," provided that "[a] judgment in an action or a settlement of a claim under [the Tort Claims Act] bars any action involving the same subject matter by the claimant against the employee of the governmental unit whose action or omission gave rise to the claim." *See id*. § 101.106 (1997) (amended by Act of June 2, 2003, 78th Leg., RS, ch. 204, § 11.05, 2003 Tex. Gen. Laws 886).

chapter against the governmental unit." *Id.* § 101.106(f). There are therefore three conditions for the employee's dismissal under subpart (f): (1) the employee must have been employed by a governmental unit at the time of the incident; (2) the suit must be based on conduct within the scope of that employment; and (3) the plaintiff must have been able to bring the claim against the governmental employer under this chapter. "Under this chapter" refers to chapter 101 of the Civil Practice and Remedies Code, commonly known as the Texas Tort Claims Act. *Id.* § 101.002. Although there is some question about the employment of one of the doctors in this case, the question as to both doctors is whether the plaintiffs' medical malpractice action "could have been brought" against the governmental unit, UTHSC, under the Tort Claims Act.

II

The Court and I disagree about the meaning of the last condition—whether suit "could have been brought under this chapter against the governmental unit." I would hold that this condition refers to those tort claims for which the government has consented to suit under the Tort Claims Act. The Court attributes a broader meaning to the phrase, indicating that it includes all tort claims filed against a governmental employee individually without regard to whether the government has consented to be sued.

The Court reasons that because it is possible to sue the government for medical malpractice under the Tort Claims Act, albeit under limited circumstances, plaintiffs must sue the government, instead of their doctors individually, even when those limited circumstances do not exist. In the Court's view, the statute is not about giving the plaintiff the right to choose the appropriate defendant

but rather about making the government the defendant in all tort cases arising out of its employees' conduct. The Court finds it immaterial that the plaintiffs filed their tort claim against the doctors individually, did not seek to join the government, and presumably do not believe they have an actionable tort claim against the government because governmental immunity has not been waived as to their claim. By ignoring the plaintiffs' election and the reasons for it, the Court effectively reads the "could have been brought" condition out of the statute, holding instead that plaintiffs may sue only the government for the medical malpractice of its publicly-employed physicians. "Whatever merits this holding may have as a rule of law do not include fidelity to language and precedent." *Kerrville State Hosp. v. Fernandez*, 28 S.W.3d 1, 14 (Tex. 2000) (Hecht, J. dissenting.)

The Attorney General, as Amicus Curiae in this case, shares my concern about the Court's construction of the statute. He appropriately notes that the phrase "could have been brought" is unique to subpart (f). In contrast, references to the filing of suit are made repeatedly throughout section 101.106. *See, e.g.,* TEX. CIV. PRAC. & REM. CODE § 101.106 (a), (b), (e), (f). The Attorney General submits that the Legislature purposefully chose the term "brought" rather than "filed" to indicate a substantive distinction from the mere physical process reflected in the introductory clause of subpart (f) ("[i]f a suit is filed") and the similar use of the term "filing" or "filed" in subparts (a), (b), and (e). The Attorney General further submits that the Legislature intended for the phrase "could have been brought" to mean something different than could have been filed. To equate "brought" with "filed", argues the Amicus, is to render subpart (f)'s principle condition superfluous. Anyone can physically file a claim against the government, but not every claim filed against the government is actionable.

The Attorney General concludes that the "could have been brought" condition can only refer to actionable claims against the government, that is, tort claims for which the government has consented to be sued.

I agree that the phrase "could have been brought" refers to actionable claims against the government. Unlike the Court, I believe that the "Election of Remedies" provision puts the plaintiff to an election at the suit's outset as its title suggests. And although the statute seeks to shape that election, it does not prohibit plaintiffs from suing governmental employees in their individual capacity.

When a plaintiff elects to sue only the governmental employee as in this case, subparts (b) and (f) are implicated by the plaintiff's choice. TEX. CIV. PRAC. & REM. CODE §§ 101.106(b), (f). Subpart (b) binds the plaintiffs to their election and bars them from suing the government regarding the same subject matter. *Id*. §101.106(b). Subpart (b), however, excepts from its bar certain claims for which the government has given its consent, and subpart (f) explains the procedure to obtain this exception.

Under subpart (f), the plaintiff is given a limited time to reconsider its suit against the employee and decide anew whether the government should have been sued instead. If the government has consented to suit, the plaintiff is well-advised to substitute the government for two reasons. First, the plaintiff cannot prevail on its claim against the employee if the plaintiff's suit "could have been brought against" the government. *Id.* § 101.106(f). And second, the plaintiff cannot sue the

government under subpart (f)'s exception if the claim against the employee is not promptly dismissed.[5] *Id.*

Subpart (f)'s "could have been brought" condition refers back to subpart (b)'s requirement of government consent. A suit that "could have been brought" against the government then is one for which the government has consented to be sued. Together subparts (b) and (f) require proof of the government's consent to suit as a condition for the employee's dismissal.

The government consents to suit "through the Constitution and state laws." *Mission Consol. Indep. Sch. Dist. v. Garcia*, 253 S.W.3d 653, 660 (Tex. 2008). The Tort Claims Act is one such law, providing consent for certain tort claims involving the operation of automobiles, the condition or use of property, and premises liability. TEX. CIV. PRAC. & REM. CODE §§ 101.021, 101.022. The government, however, has not specifically consented to be financially responsible for the medical malpractice of its doctors.

A publicly-employed doctor, who is sued individually for malpractice but seeks to obtain his or her dismissal under subpart (f), must therefore establish the government's consent to be sued for the specific conduct at issue. If this cannot be established, then the government has not consented to suit, and the plaintiff's claim against the employee individually must proceed. Subpart (b) requires nothing less. *See* TEX. CIV. PRAC. & REM. CODE § 101.106(b) (describing the suit against the

[5] If the plaintiff does not dismiss the case against the employee within thirty days of the employee's motion under subpart (f), subpart (b) will bar any subsequent action against the government. TEX. CIV. PRAC. & REM. CODE § 101.106(b), (f).

employee as an "irrevocable election" that "immediately and forever bars" suit against the government unless it "consents").

The trial court therefore correctly denied the motion to dismiss because under the present record the doctors did not establish the government's consent.

III

The Court maintains, however, that requiring the doctors to prove the government's consent as a condition to dismissal under subpart (f) would be inconsistent with a recent case in which we applied another part of the statute. *See Mission Consol. Indep. Sch. Dist.*, 253 S.W.3d at 658-60 (applying § 101.106 (e)). I fail to see the inconsistency. *Mission* involved subpart (e), rather than (f), because the plaintiffs filed suit against the government and its employees. Because the respective subparts apply to distinctly different circumstances, there is no conflict.

In *Mission*, three terminated school district employees sued the district and its superintendent for wrongful termination and various common law claims that did not fit under the Tort Claims Act's limited waiver of immunity. *Id*. at 655. One issue in the case concerned the application of section 101.106(e). The court of appeals concluded that the section did not apply because none of the plaintiffs' claims fit within the Tort Claims Act's waiver of immunity. The court reasoned that none of the claims were, in the words of the statute,"under this chapter." *Id*. at 658.

We disagreed, observing that any tort claim against the government, even those for which immunity had not been waived, falls "under this chapter" because the Tort Claims Act is the only means to sue the government for a tort:

> Because the Tort Claims Act is the only, albeit limited, avenue for common-law recovery against the government, all tort theories alleged against a governmental unit, whether it is sued alone or together with its employees, are assumed to be "under [the Tort Claims Act]" for purposes of section 101.106.

Id. at 659. *Mission* then merely followed the rule that a tort claim against the government is "under" the Act even when the Act does not waive immunity.

This rule has never been extended to tort suits against government employees individually, but the Court submits that the circumstances are similar enough that it should be. I disagree. The circumstances are not similar, and the statute treats each situation differently.

Subpart (e) grants the government an unconditional right to have its employee dismissed from the suit when the plaintiff elects to sue both the government and its employee. Contrast that with the conditions attached to the employee's motion to dismiss under subpart (f). Clearly, the government's burden under (e) is much different.

When a plaintiff sues both the government and its employees under (e), the employees have been joined in their official capacity as a matter of law, and the government has the right to have them dismissed. When government employees are sued individually under subpart (f), however, their status is a question of fact. In this instance, the employees themselves must establish their official capacity by proving, among other things, that suit could have been brought against their employer. If the employees cannot carry this burden, the suit against them in their individual capacity must proceed. In contrast, subpart (e) imposes no burden on the government to demonstrate that suit could have been

brought against it under the Tort Claims Act for a simple reason: the plaintiff has already brought suit against the government.

The statute therefore treats employees sued individually differently than it does employees sued together with the government. The Tort Claims Act applies as a legal matter under subpart (e) because the government has been sued, but its application under subpart (f) depends on factual proof. The burden of that proof must fall on the employee, the party who must move to dismiss the case under subpart (f).

The statute carefully distinguishes between suits against the government and suits against government employees individually. When referring to suits filed or brought against the government the statute inserts the phrase "under this chapter" but when referring to suits against the employee individually the phrase is omitted. *Compare* TEX. CIV. PRAC. & REM. CODE §§ 101.106(a),[6] (c),[7] & (e)[8] *with id.* §§ 101.106(b),[9] (d),[10] & (f).[11] Although "under this chapter" appears in subpart (f) when referring to the possibility of a suit against the government, the phrase is not used to describe the suit actually filed against the employee individually. *See id.* § 101.106(f) ("If suit is filed against an

[6] "The filing of a suit under this chapter against a governmental unit constitutes an irrevocable election . . ."

[7] "The settlement of a claim arising under this chapter shall immediately and forever bar the claimant from any suit against or recovery from any employee . . ."

[8] "If a suit is filed under this chapter against both a governmental unit and any of its employees . . ."

[9] "The filing of a suit against any employee of a governmental unit constitutes an irrevocable election . . ."

[10] "A judgment against an employee of a governmental unit shall immediately and forever bar . . ."

[11] "If a suit is filed against an employee of a governmental unit based on conduct . . ."

employee of a governmental unit based on conduct . . . and if it could have been brought under this chapter against the governmental unit . . .”). Suits against government employees individually are not “under this chapter” because a plaintiff does not need the government’s consent to seek a personal liability judgment against an individual. Because subparts (e) and (f) apply under different circumstances, our decision in *Mission* is in my view not particularly relevant to the decision in this case.

IV

I further disagree with the Court’s principal assumption that the 2003 amendments were intended to overrule our decision in *Kassen v. Hatley*. The case has no apparent connection to these amendments. *Kassen* is not mentioned in any floor debate, bill analysis, or other piece of legislative history. Ordinarily when the Legislature intends for legislation to supercede one of our decisions, it will at least mention the object of its disagreement with us.

The only support the Court can muster for its unfounded assumption is a law review article, published two years after the amendment and authored by a private party, whom the Court generously describes as a “participant in the legislative process.” ___ S.W.3d at ___. We have repeatedly expressed “our consistent view that ‘[e]xplanations produced, after the fact, by individual legislators are not statutory history, and can provide little guidance as to what the legislature collectively intended.’” *Entergy Gulf States, Inc. v. Summers*, 282 S.W.3d 433, 444 (Tex. 2009) (quoting *In re Doe*, 19 S.W.3d 346, 352 (Tex. 2000) (citations and quotations omitted). In this particular case, the supposition of a private observer apparently carries more weight. If the Legislature intended for this

legislation to prohibit medical malpractice claims against publicly-employed physicians, it has done a masterful job of concealing that intent.

Because the law review article, on which the Court relies, is not particularly convincing, the Court offers another purpose for the legislation. The Court suggests that the 2003 amendment may have been intended to conform the Texas Tort Claims Act to the Federal Tort Claims Act. More specifically, the Court imagines that the 2003 amendment to section 101.106, commonly known as the "Election of Remedies" provision, is Texas' version of the Federal Employees Liability Reform and Tort Compensation Act, commonly known as the Westfall Act. Again, evidence to support its thesis is non-existent.

One need only compare the language of the respective bills to reveal the utter folly of this notion. The Westfall Act provides that the remedy provided by the Federal Tort Claims Act for injury, property loss, or death "resulting from the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment is *exclusive* of any other civil action" and expressly "*preclude[s]*" any other action "relating to the same subject matter against the employee or the employee's estate." *See* ___ S.W.3d at ___ n.69 (quoting the Westfall Act, 28 U.S.C. § 2679(b)(1) (emphasis added). In contrast to the exclusive and preclusive nature of the Westfall Act, section 101.106 ostensibly provides a choice of remedies.

In lieu of examining section 101.106's language, the Court assumes that the Texas Tort Claims Act should be like the federal act. There are, however, significant differences between the two. For instance, the Federal Tort Claims Act does not condition the waiver of governmental immunity on the

use of automobiles or the condition or use of real or personal property, as does Texas, but instead broadly permits persons to sue the United States in federal court for money damages

> for injury or loss of property, or personal injury or death caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred.

28 U.S.C. § 1346(b)(1). The federal act thus generally waives governmental immunity for the negligence of its employees, which would include medical malpractice. There is no possibility for the disconnect between the doctor's liability and that of the government employer as under Texas law. This difference reasonably explains why our Legislature chose, when amending our Act, to require proof of the government's consent as a condition for the dismissal of the plaintiff's otherwise actionable, common law claim against the doctor individually.

Enamored more with the federal act than our own, the Court has chosen to conform section 101.106 to the federal scheme. Instead of six subparts, dealing with different combinations of defendants and the possibilities of settlement or judgment, the Court concludes that the Legislature intended simply this: If suit is filed against an employee of a governmental unit based on conduct within the general scope of that employee's employment, the suit shall be dismissed on the employee's motion and the governmental unit substituted as the defendant. Because the Westfall Act precludes suit against government employees, the Court concludes our now misnamed election-of-remedies provision should do the same.

Section 101.106's language reveals, however, that our Legislature did not intend to mimic the Westfall Act. While the Legislature intended to encourage suits against the government in lieu of actions against government employees, section 101.106 does not compel it. Instead, it requires that plaintiffs choose their defendants wisely or suffer the consequences. Subpart (f) is the centerpiece of the scheme, creating a new immunity or "official capacity" defense for employees who can establish that the government should be, or should have been, the defendant.

This "official capacity" defense should not be confused with the common law doctrine of official immunity. Official capacity as used in this statute is shorthand for the conduct of a government employee meeting section 101.106(f)'s conditions: a suit "based on conduct within the general scope of that employee's employment [that] could have been brought . . . against the governmental unit[.]" TEX. CIV. PRAC. & REM. CODE § 101.106(f). Official immunity, on the other hand, "protects government officers from personal liability in performing discretionary duties in good faith within the scope of their authority." *Kassen*, 887 S.W.2d at 8. Government medical personnel, such as the doctors here, enjoy immunity from liability when exercising their governmental discretion, but this immunity does not extend to medical discretion. *Id.* at 11–12. The exercise of medical discretion, however, does not disqualify doctors from being employees of a governmental unit for purposes of the "official capacity" defense extended under section 101.106(f). *Murk v. Scheele,* 120 S.W.3d 865, 867 (Tex. 2003) (per curiam).

To establish this defense, the doctors had to prove that: (1) the suit against them was "based on conduct within the general scope of that employee's employment" and (2) the suit "could have been

brought under [the Tort Claims Act] against the governmental unit[.]" TEX. CIV. PRAC. & REM. CODE § 101.106(f). Substituting the federal scheme for our Legislature's, the Court reads the "could have been brought" condition out of the statute or, in the words of our Attorney General, renders the condition "superfluous."

Statutory language should not be read as pointless if it is reasonably susceptible of another construction. *City of LaPorte v. Barfield,* 898 S.W.2d 288, 292 (Tex. 1995). Moreover, when construing a statute, we are to consider the law's objective and the consequences of a particular construction. *Tex. Dep't of Transp. v. City of Sunset Valley*, 146 S.W.3d 637,642 (Tex. 2004) (citing TEX. GOV'T CODE § 311.023(1), (5)). Consider the consequences of the Court's interpretation—that "could have been brought" refers to nothing more than the physical act of filing suit.

Under that view, the statute nonsensically requires the plaintiff to bring a claim over which the court lacks subject matter jurisdiction. *See, e.g., Harris Cnty. v. Sykes*, 136 S.W.3d 635, 638 (Tex. 2004) (noting that sovereign immunity "defeats a trial court's subject matter jurisdiction unless the state expressly consents to suit"). That suit "could" actually be brought against the government implies a legal possibility, but it is not possible to sue the government without its consent. Worse yet, the claimant is compelled to dismiss an actionable medical malpractice claim against his or her doctor for the non-existent claim against the government. If this were to occur, one might reasonably question the constitutionality of subpart (f), as applied, under our Open Courts provision. TEX. CONST. art. I § 13. We presume, however, that the Legislature intended to comply with the state and federal constitutions, TEX. GOV'T CODE § 311.021(1), and "we are obligated to avoid constitutional problems

if possible." *Brooks v. Northglen Ass'n*, 141 S.W.3d 158, 169 (Tex. 2004). The Court's opinion ignores these rules of statutory construction.

V

Finally, the Court justifies its misconstruction of the statute by suggesting that it would create perverse incentives, conflicts of interest, or opportunities for gamesmanship if the employee were required to establish the government's consent to be sued as a condition for dismissal. As to its gamesmanship charge, the Court suggests that the government might be able to defeat the plaintiff's claim against its employee by merely stipulating to the waiver of governmental immunity after it is too late for the plaintiff to sue under the Tort Claims Act. This is hardly a legitimate concern. The state's immunity is waived "through the Constitution and state laws," not by the stipulations of its functionaries. *See Mission*, 253 S.W.3d at 660. Even if UTHSC were willing to stipulate that the doctor's use of the vacuum extractor caused the infant's brachial plexus injury, a court would not be required to accept its self-serving declaration as fact. That the Court would even consider this a possibility underscores its misunderstanding of the statute and its imagined "perverse" effects.

What could possibly be more perverse than the Court's application of this statute? Under the Court's view, the plaintiffs must give up their common law medical malpractice claim against the doctors for a new suit against the government, a suit which in all likelihood will be dismissed for want of jurisdiction. Since the plaintiffs have not pled a cognizable claim under the Tort Claims Act, why would the government not file a plea to the jurisdiction?

Contrary to the Court's concern, section 101.106 does not foster conflict between the government and its employee because it compels the plaintiff to choose the defendant at the beginning of the case. The plaintiff may sue the government, the government's employee, or both with different consequences attaching to the various elections. When the plaintiff chooses to sue only the employee, subpart (b) bars the plaintiff from suing the governmental unit "regarding the same subject matter unless the governmental unit consents." TEX. CIV. PRAC. & REM. CODE § 101.106(b). Although ostensibly barred under (b), subpart (f) reopens the issue of the government's consent, providing a new opportunity for the plaintiff to sue the government. *Id.* § 101.106(f). Subpart (f) therefore gives the plaintiff a second chance to sue the government, but it only gives the plaintiff thirty days to make that decision.[12] *Id.*

The plaintiffs here have elected to stand on their suit against the doctors and thus are now barred from suing the government. *Id.* § 101.106(b). If the doctors can prove that the Tort Claims Act would have waived the government's immunity but for the plaintiffs election to sue them individually (that suit "could have been brought . . . against the governmental unit"), the doctors will establish their right to be dismissed, but not their employer's liability. *Id.* § 101.106(f). The Court's imagined conflict of interest does not exist because subpart (b) "bars any suit or recovery by the plaintiff against the governmental unit[.]" *Id.* § 101.106(b). Under these circumstances, section 101.106(f) merely provides the employees with an immunity from liability under its "official capacity" defense.

[12] Under § 101.106(b), a plaintiff who sues an employee cannot thereafter sue the governmental employer without its consent. The government consents to its substitution as defendant under § 101.106(f) but that consent terminates 30 days after the filing of the employee's motion to dismiss.

The Court and I agree that the employee may establish a defense or immunity under section 101.106's terms, but we disagree on what those terms entail. In the Court's view, all that is required for the employee's dismissal under subpart (f) is proof of the doctors' employment status and conduct within the scope of that employment. One of the doctors has supplied this proof so I am somewhat puzzled by the Court's decision to remand the claim against him for further proceedings. The statute gives the plaintiff only thirty days to dismiss the employee and substitute the government. Since the time for suing the government has passed, and the plaintiff cannot, according to the Court, sue the employee, what remains to be done? All that occurs to me is that a remand affords the plaintiffs an opportunity to raise any constitutional questions regarding the application of this statute before dismissal. I agree they should have that opportunity, but they would not need it, if the Court merely applied section 101.106 according to its terms.

* * * * *

I recognize that it is our responsibility to accept the Legislature's intent even when that intent is to overrule one of our previous opinions. *Leos v. State Emp. Workers' Comp. Div.*, 734 S.W.2d 341, 343 (Tex. 1987). But we should not loosely ascribe such intent to legislation simply to avoid questions of *stare decisis*. If a majority of the Court now feels that the distinction drawn in *Kassen* between government and medical discretion was in error, we should address the matter directly rather than engage in a distortion of legislative intent.

When we construe a statute, our primary goal is to ascertain and give effect to the Legislature's intent. *Hernandez v. Ebrom*, 289 S.W.3d 316, 318 (Tex. 2009). When we can, we rely on the primary

source of that intent, the language of the statute. *Phillips v. Bramlett*, 288 S.W.3d 876, 880 (Tex. 2009). The statutory text, title and design of section 101.106 plainly put the plaintiff to an election of remedies. Because the Court's interpretation takes that election away, requiring the plaintiff to sue only the government, I respectfully dissent. I would affirm the court of appeals' judgment.

Justice

OPINION DELIVERED: January 21, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0284

CITY OF DALLAS, PETITIONER,

v.

KENNETH E. ALBERT ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued December 17, 2009

JUSTICE JOHNSON delivered the opinion of the Court, in which JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE GREEN, JUSTICE GUZMAN, and JUSTICE LEHRMANN joined, and in which CHIEF JUSTICE JEFFERSON and JUSTICE HECHT joined except to Part II-B.

JUSTICE HECHT filed an opinion concurring in part and dissenting in part, in which CHIEF JUSTICE JEFFERSON joined.

JUSTICE WILLETT filed a dissenting opinion.

This appeal involves a pay dispute between the City of Dallas and many of its police officers and firefighters. Pursuant to a referendum approved by the voters, the City adopted an ordinance addressing the pay of "each sworn police officer and fire fighter and rescue officer employed by the City of Dallas." Claiming the City did not properly pay them according to the ordinance, some firefighters and police officers (collectively, the Officers) sued the City. They sought both a declaratory judgment construing the ordinance and damages for breach of contract. The City counterclaimed, alleging that if the Officers had not been paid correctly, they had been overpaid instead of underpaid and the City was entitled to reimbursement for the overpayments. The City

eventually sought dismissal of the Officers' claims on the basis of governmental immunity, then later dismissed its counterclaim. The trial court denied the City's immunity claim and this interlocutory appeal followed. During the pendency of the appeal, the Legislature amended the Local Government Code to provide for a limited, retroactive waiver of certain local governmental entities' immunity from suit.

The main issues before us involve governmental immunity from suit. We will address the issues in the order that the court of appeals did: (1) what is the effect on the City's immunity of its filing, then non-suiting, the counterclaim; (2) what is the effect, if any, of the Legislature's retroactive waiver of immunity; (3) whether the City has immunity from the Officers' declaratory judgment action; and (4) whether the City lacks immunity from suit because the pay ordinance was adopted by referendum. We conclude that (1) by nonsuiting its counterclaim the City did not reinstate complete immunity from the Officers' pending claims; (2) the case must be remanded for the trial court to consider whether, by amending the Local Government Code, the Legislature waived the City's immunity; (3) the City has immunity from the declaratory judgment action; and (4) the ordinance having been adopted by referendum did not result in waiver or abrogation of the City's immunity.

I. Background

Pursuant to a referendum that voters passed, the City of Dallas adopted an ordinance in 1979 addressing pay for police officers, firefighters, and rescue workers. *See* TEX. LOC. GOV'T CODE

§ 9.005(a), (b). The ordinance provided for a 15% pay raise and that "the current percentage pay differential between grades in the sworn ranks of [the Officers] shall be maintained."[1]

A dispute arose between the City and the Officers over whether the ordinance provided for a one-time pay raise or whether it provided for a one-time pay raise and also required the percentage pay differential to be maintained indefinitely so that if higher-ranking Officers received raises, lower-ranking Officers also received raises in order to maintain the differential. In 1994, the Officers sued the City.

The Officers sought both a declaratory judgment interpreting the ordinance and damages for breach of contract. Regarding their damages claim, the Officers argued that (1) the ordinance amended their employment contracts and the City was contractually bound to maintain the percentage pay differential after its adoption; and (2) the City breached the Officers' contracts by raising the pay of higher-ranking Officers without also raising the pay of lower-ranking Officers to maintain the percentage pay differential required by the ordinance. The Officers sought money damages for back pay and benefits as well as interest.

---

[1] The ordinance, in relevant part, states:

> Be it ordained that: (1) From and after October 1, 1978, each sworn police officer and fire fighter and rescue officer employed by the City of Dallas, shall receive a raise in salary in an amount equal to not less than 15% of the base salary of a City of Dallas sworn police officer or fire fighter and rescue officer with three years service computed on the pay level in effect for sworn police Officers and fire fighters and rescue Officers of the City of Dallas with three years service in effect in the fiscal year beginning October, 1977; (2) The current percentage pay differential between grades in the sworn ranks of the Dallas Police Force and the Fire Fighter and Rescue Force shall be maintained; and (3) Employment benefits and assignment pay shall be maintained at levels of not less than those in effect for the fiscal year beginning October, 1977.

Dallas, Tex., Ordinance 16084 (Jan. 22, 1979).

The City responded to the Officers' suit, then some time later filed a counterclaim to recover alleged overpayments to the Officers. The City asserted that if the pay raises were improper, then any raises given because the City misconstrued the ordinance were void and the Officers who received the raises must repay them. Later, the City filed a plea to the jurisdiction based on governmental immunity from suit. The Officers countered that the City's immunity had been expressly waived by Local Government Code Section 51.075 (stating a municipality "may plead and be impleaded in any court") and Chapter II of the Dallas City Charter (stating the City may "sue and be sued" and "implead and be impleaded in all courts"). *See* TEX. LOC. GOV'T CODE § 51.075; DALLAS CITY CHARTER ch. II, § 1(2), (3) (Aug. 1999).

The trial court denied the City's plea to the jurisdiction, and the City filed an interlocutory appeal. *See* TEX. CIV. PRAC. & REM. CODE § 51.014(8). While the City's appeal was pending, Texas sovereign immunity[2] law was both clarified and modified.

On the judicial front, we issued our first opinion in *Reata Construction Corp. v. City of Dallas*, 47 TEX. SUP. CT. J. 408 (Tex. 2004) (*Reata I*). We held that the City waived immunity from suit by asserting claims for affirmative relief in a lawsuit. *Id.* at 410. After *Reata I* issued, the City nonsuited its counterclaim. Then, on rehearing, we withdrew the *Reata I* opinion and substituted a new opinion. *Reata Constr. Corp. v. City of Dallas*, 197 S.W.3d 371 (Tex. 2006). In the new opinion we held that a governmental entity does not have immunity from suit for monetary claims against it that are "germane to, connected with, and properly defensive to" affirmative claims made

[2] The State's immunity is referred to as sovereign immunity, while that of political subdivisions of the State is referred to as governmental immunity. *Reata Constr. Corp. v. City of Dallas*, 197 S.W.3d 371, 374 (Tex. 2006). For ease of reference we will generally use the term "governmental immunity."

by the entity, to the extent the claims against the entity offset the entity's claims. *Id.* at 378. The same day we decided *Reata*, we also decided *Tooke v. City of Mexia*, 197 S.W.3d 325 (Tex. 2006). In *Tooke*, we held that the phrases "sue and be sued" and "plead and be impleaded" do not constitute clear and unambiguous waivers of governmental immunity. *Id.* at 342.

Further, while the case was pending at the court of appeals, the Legislature enacted Texas Local Government Code Sections 271.151– .160. *See* Act of May 23, 2005, 79th Leg., R.S., ch. 604, § 1, 2005 Tex. Gen. Laws 1548, 1548. Those provisions waive some local government entities' immunity from suit for certain contract claims. *See* TEX. LOC. GOV'T CODE § 271.152. The waiver of immunity is retroactive—it applies to claims based on contracts executed before the statute's effective date, so long as governmental immunity has not been previously waived with respect to the claims. Act of May 23, 2005, 79th Leg., R.S., ch. 604, § 2, 2005 Tex. Gen. Laws 1548, 1549.

In light of the judicial and legislative proceedings that took place after the trial court made its rulings, the court of appeals affirmed in part, reversed in part, and remanded the case for reconsideration by the trial court. 214 S.W.3d 631, 638. Regarding immunity, the court of appeals held that under *Reata* the City did not have complete immunity once it filed a counterclaim for damages, but after it nonsuited the counterclaim it was immune from all the Officers' breach of contract claims. *Id.* at 635. The court reasoned that the City's nonsuit of its counterclaim reinstated the City's immunity from suit because the Officers' claims were no longer germane to, connected with, or properly defensive to anything the City was asserting, and the City was not making monetary claims against the Officers so the Officers' damages claims could not be offsets to claims of the City. *Id.* at 635-36. The court of appeals remanded the case for the trial court to consider

whether the Legislature retroactively waived the City's immunity through Local Government Code Sections 271.151–.160. *Id.* at 636-37. Regarding the declaratory judgment action, the court of appeals determined that the Officers' action could proceed, but cautioned that money damages could not be recovered under the guise of declaratory relief. *Id.* at 637. Finally, the court of appeals held that the adopting of the ordinance by means of referendum did not preclude the City's having immunity from the Officers' claims. *Id.* at 637-38.

The parties filed cross-petitions for review, which we granted.[3]

II. Discussion

A. Governmental Immunity

Governmental immunity is a common law doctrine. *City of Galveston v. State*, 217 S.W.3d 466, 471 (Tex. 2007). Its boundaries are established by the judiciary, but we have consistently held that waivers of it are the prerogative of the Legislature. *Id.* Governmental immunity is comprised of immunity from both suit and liability. *See Tex. Dep't of Transp. v. Jones*, 8 S.W.3d 636, 638 (Tex. 1999). Immunity from liability protects entities from judgments while immunity from suit deprives courts of jurisdiction over suits against entities unless the Legislature has expressly consented:

> [I]mmunity from suit bars an action against the state unless the state expressly consents to the suit. The party suing the governmental entity must establish the state's consent, which may be alleged either by reference to a statute or to express

[3] We consolidated four petitions, *City of Dallas v. Albert* (No. 07-0284), *City of Dallas v. Barber* (No. 07-0285), *City of Dallas v. Arredondo* (No. 07-0286), and *City of Dallas v. Willis* (No. 07-0287). We separately consolidated two other petitions, *City of Dallas v. Martin* (No. 07-0288), and *City of Dallas v. Parker* (No. 07-0289). The Court heard oral argument on all six petitions at the same time. The State of Texas submitted an amicus curiae brief.

> legislative permission. Since as early as 1847, the law in Texas has been that absent the state's consent to suit, a trial court lacks subject matter jurisdiction.

Id. at 638 (citations omitted); *see Hosner v. DeYoung*, 1 Tex. 764, 769 (Tex. 1847).[4] In *Reata*, we concluded that immunity from suit as to a money damages claim does not completely deprive a trial court of jurisdiction over a governmental entity such as the City when the entity asserts an affirmative claim for monetary relief in a lawsuit:

> where the governmental entity has joined into the litigation process by asserting its own affirmative claims for monetary relief, we see no ill befalling the governmental entity or hampering of its governmental functions by allowing adverse parties to assert, as an offset, claims germane to, connected with, and properly defensive to those asserted by the governmental entity. *And, our decisions that immunity from suit does not bar claims against the governmental entity if the claims are connected to, germane to, and defensive to the claims asserted by the entity, in effect, modified the common-law immunity doctrine and, to an extent, abrogated immunity of the entity that filed suit.*

Id. at 376-77 (emphasis added). Referencing prior decisions dealing with the subject, including *Catalina Dev., Inc. v. Cnty. of El Paso*, 121 S.W.3d 704, 705-06 (Tex. 2003), in which we discussed the possibility that a governmental entity might waive its immunity by conduct, we stated what may have been less than clearly articulated in those opinions: the common law doctrine of governmental immunity had been in a limited manner modified and abrogated for governmental entities that file affirmative litigation claims. *Id.* at 375-77.

Although litigation actions of governmental entities underlay our decisions in *Reata* and similar cases, we did not hold that those actions effected waivers of immunity; rather, they were factors we considered in defining the contours of immunity. In other words, we have not, in *Reata*

[4] When we refer to immunity, we will be referring to immunity from suit unless otherwise stated.

or other decisions, altered the principles that (1) the boundaries of sovereign immunity are determined by the judiciary, *City of Galveston*, 217 S.W.3d at 471, and (2) waivers of sovereign immunity or consent to sue governmental entities must generally be found in actions of the Legislature. *See id.* at 468 ("We take as our starting point the premise that in Texas a governmental unit is immune from tort liability unless the Legislature has waived immunity.") (quoting *Dallas Cnty. Mental Health & Mental Retardation v. Bossley*, 968 S.W.2d 339, 341 (Tex. 1998)); *Harris Cnty. v. Dillard*, 883 S.W.2d 166, 168 (Tex. 1994) ("We have repeatedly held that the extent of waiver of governmental immunity is a matter for the Legislature to determine.") (citations omitted).

Turning to the issues before us, we first address the City's counterclaim and nonsuit.[5]

B. The Counterclaim and Nonsuit

1. Effects

The City urges, and the court of appeals held, that the City's nonsuit of its counterclaim reinstated the City's immunity from suit. The Officers disagree, and so do we.

Pursuant to our opinion in *Reata*, the City's filing of a counterclaim for affirmative relief resulted in each officer having two possible categories of damages claims pending. The first category consisted of claims that would offset, in whole or in part, any recovery by the City and that were germane to, connected with, and properly defensive to the City's claims. The second category consisted of (1) claims for amounts over and above the amount that would offset the City's claim

[5] Without intending to indicate an opinion on the matter, we acknowledge that on remand the trial court may determine that amendments to the Local Government Code have waived the City's immunity from suit. If that occurs, some of our discussion may not be necessary to resolution of the issues. Nevertheless, because this case has been pending for so long we address the issues to give the courts below and the parties guidance.

but were nevertheless germane to, connected with, and properly defensive to the City's claims; and (2) claims that simply were not germane to, connected with, or properly defensive to the City's claim. The City had immunity from suit as to both types of claims in the second category, but it did not have immunity from suit as to claims in the first category. Because the City did not have immunity from suit as to claims in the first category once it filed its counterclaim, it could not either "reinstate" such immunity, or, put differently, in effect create it, by nonsuiting.

Once a governmental entity has asserted an affirmative claim for monetary relief, it must participate in the litigation process as an ordinary litigant as to that claim. *Reata*, 197 S.W.3d at 377. And when a governmental entity asserts affirmative claims for monetary recovery, whether by filing suit or by counterclaim, the trial court acquires jurisdiction over the entity's claims and certain offsetting, defensive claims asserted against the entity. *Id.* That is not because the entity effected a change in its immunity by filing a claim, but because the judiciary has abrogated the entity's common law immunity from suit as to certain offsetting claims. *Id.*

Under litigation rules applicable to ordinary litigants, and thus to the City once it filed its counterclaim, the City was entitled to nonsuit its counterclaims. *See* TEX. R. CIV. P. 162 (providing that a party may nonsuit a claim at any time before all its evidence is introduced at trial except for rebuttal evidence). If a claim is timely nonsuited, the controversy as to that claim is extinguished, the merits become moot, and jurisdiction as to the claim is lost. *See Travelers Ins. Co. v. Joachim*, 315 S.W.3d 860, 862 (Tex. 2010); *Univ. of Tex. Med. Branch at Galveston v. Estate of Blackmon ex rel. Shultz*, 195 S.W.3d 98, 100 (Tex. 2006) (per curiam). But a nonsuit is not allowed to prejudice the right of an adverse party to be heard on a pending claim for affirmative relief. TEX.

R. CIV. P. 162; *see Villafani v. Trejo*, 251 S.W.3d 466, 469 (Tex. 2008). Because the Officers had affirmative claims pending when the City nonsuited its counterclaim, the trial court retained jurisdiction over the Officers' claims to the extent it had acquired it. *See Villafani*, 251 S.W.3d at 469.

The money damage claim of each officer is based on allegations that under a proper interpretation of the pay ordinance the officer has been underpaid. The City's counterclaim alleged that under a proper interpretation of the ordinance if any officer had not been paid correctly then the officer had been overpaid and the City was entitled to recover the amount of overpayment. Both the City and the Officers cannot be correct, unless at some time an officer was underpaid and at another time the same officer was overpaid. And each of the officer's claims is independent. That is, if one officer was underpaid and another overpaid, the claims would not be combined so that the City would owe a net amount to the two officers together or so that the two officers together would owe the City a net amount.

The Officers' claims clearly were germane to—that is, relevant to[6]—and connected with the City's counterclaim: they were both based on the question of pay for the Officers' employment. Also, the Officers' claims were properly defensive to the City's counterclaim because a finding that an officer had been underpaid would at least inferentially rebut the City's claim that the officer had been paid correctly or overpaid for the particular period for which the underpayment was made. *See Dillard v. Tex. Elec. Co-op.*, 157 S.W.3d 429, 430 (Tex. 2005) ("An inferential rebuttal defense operates to rebut an essential element of the plaintiff's case by proof of other facts."); *Select Ins. Co.*

[6] *See* BLACK'S LAW DICTIONARY 756 (9th ed. 2009).

v. Boucher, 561 S.W.2d 474, 477 (Tex. 1978) ("The basic characteristic of an inferential rebuttal is that it presents a contrary or inconsistent theory from the claim relied upon for recovery."). On the other hand, once the City nonsuited its counterclaim the Officers' claims could not offset any recovery by the City. So although the trial court had jurisdiction over the Officers' claims that would have been offsets to the City's counterclaim, after its nonsuit the City would not have a recovery for the Officers' claims to offset. Nor could the Officers recover any judgment for damages against the City if the City was immune from suit as to the Officers' damages claims apart from the claims over which the trial court had jurisdiction because of their offsetting nature *vis-a-vis* the City's counterclaim. But even though the Officers could not recover judgment for damages against the City based on the trial court's limited jurisdiction resulting from the City's counterclaim, the City's nonsuit did not reinstate, or more aptly, create, immunity for the City. Rather, it put the Officers in the posture of other similarly situated claimants: they could not prevail on their breach of contract claims because they could not recover a judgment for damages and the City was not pursuing a claim for damages to which an offset would apply. *See Intercontinental Grp. P'ship v. KB Home Lone Star LLC*, 295 S.W.3d 650, 655 (Tex. 2009) (holding that a jury finding of "0" damages on a contract claim requires rendition of a take-nothing judgment when damages is the only relief sought).

2. Response to the Dissent

The dissent says that the character of the Officers' claims was changed because "the assertion of the [City's] counterclaim gives the plaintiff's claim a different character; it becomes defensive and offsetting, when it was not before." ___ S.W.3d ___, ___ (Hecht, J., dissenting). We

disagree. The nature of the Officers' claims did not change; the defensive, offsetting claims were the same as the claims that exceeded amounts that would offset the City's counterclaims. The dissent's approach would result in the City's action of nonsuiting its counterclaim effectively creating immunity for itself as to the Officers' claims that were defensive and offsetting, thus depriving the trial court of jurisdiction over those claims. For two primary reasons we decline to adopt that position.

First, to the extent the trial court had jurisdiction over the Officers' claims, the jurisdiction did not attach because the City's actions either changed the nature or character of the offsetting claims or somehow abrogated its immunity from suit. Jurisdiction attached because this Court has altered the boundaries of immunity from suit: governmental entities do not have immunity from offsetting claims germane to, connected to, and properly defensive to monetary claims by the entities. The City could not reinstate or create something it did not have. Allowing the City to create immunity for itself by saying that nonsuiting a counterclaim changes the character of the Officers' claims would substantively clothe the City with the power to deprive the trial court of jurisdiction by its actions. Just as the City generally cannot waive immunity from suit by its actions, it cannot create immunity by its actions.

Second, there is no need to alter established principles in this area of the law when applying established principles addresses the issue. Under established principles and rules, the end result of the City's nonsuit is the same regardless of whether the nonsuit results in the Officers' claims being disposed of by a plea to the jurisdiction or another proceeding such as by motion for summary judgment. Summary judgment might take a little longer to obtain and result in more attorney's fees

and effort by the City than would a plea to the jurisdiction, but the City made the choice to expend time and assets on litigation when it filed its counterclaim. And a governmental entity in the City's position will effectively continue to have the option of having its immunity from suit determined by interlocutory appeal. The entity still has immunity from suit as to claims in the second category outlined above. Once the entity asserts that it has such immunity, the trial court's ruling on the question will ordinarily remain subject to interlocutory appeal. The dissent's proposed course would create uncertainty and litigation over whether, and if so, when and how an entity's conduct in some manner resulted in a change in its immunity—regardless of whether the change is labeled as being the result of waiver or a change in the character of one of the claims against it.

The dissent says that failing to afford a governmental entity full immunity from suit after nonsuiting claims for relief will cause much confusion. We disagree. There will be no more confusion than before such a nonsuit. Assuming the entity had full immunity before making its affirmative claims, if it decides to forego its claims it can dismiss them, make both a motion for summary judgment and a motion to dismiss based on immunity from suit, and it should prevail on all the claims against it regardless of whether the claims against it were defensive, offsetting claims, or otherwise. Such a process comports with our prior decisions to the effect that after governmental entities decide to litigate, they are bound to participate in the litigation process as an ordinary litigant. *E.g.*, *Reata*, 197 S.W.3d at 377. The process also precludes entities from having the power to, by their actions, deprive a trial court of jurisdiction by nonsuiting if matters do not go well for them as to their affirmative claims.

Accordingly, we disagree with the court of appeals to the extent it held that the City reinstated full immunity from suit by nonsuiting its counterclaim.

C. Legislative Waiver of Immunity

Section 271.152 of the Local Government Code provides:

> A local governmental entity that is authorized by statute or the constitution to enter into a contract and that enters into a contract subject to this subchapter waives sovereign immunity to suit for the purpose of adjudicating a claim for breach of the contract, subject to the terms and conditions of this subchapter.

TEX. LOC. GOV'T CODE § 271.152. A "contract subject to this subchapter" is defined as "a written contract stating the essential terms of the agreement for providing goods or services to the local governmental entity that is properly executed on behalf of the local governmental entity." *Id.* § 212.151(2). The language is a clear and unambiguous waiver of governmental immunity for certain breach of contract suits. *City of Houston v. Williams*, ___ S.W.3d ___, ___ (Tex. 2011).

The court of appeals remanded the issue of whether the Local Government Code amendments waive the City's immunity for the Officers' breach of contract claims. Neither party appealed that ruling.

We have remanded cases that were on appeal when the Legislature enacted the waiver of immunity in order that trial courts could first consider the waiver issue. *See, e.g.*, *City of Houston v. Clear Channel Outdoor, Inc.*, 197 S.W.3d 386, 386-87 (Tex. 2006); *McMahon Contracting, L.P. v. City of Carrollton*, 197 S.W.3d 387, 387 (Tex. 2006). Albert has, by post-submission motion, sought leave for the parties to submit briefing on and have us consider the issue. We recognize that

this case has been pending for an extraordinarily long time because of various factors, many of which were out of the control of the parties. Nevertheless, we decline to address the merits of the issue in light of (1) the failure of the parties to challenge the court of appeals' remanding of it, and (2) our having remanded similarly situated cases so the trial court could first consider the statutory waiver issue.

We next address whether immunity precludes the Officers' action under the Declaratory Judgment Act (DJA) for construction of the pay ordinance. The court of appeals held that it did not.

D. The Declaratory Judgment Action

While the case was awaiting oral argument here, we decided *City of El Paso v. Heinrich*, 284 S.W.3d 366 (Tex. 2009). We affirmed the principle that the DJA does not enlarge a court's jurisdiction; it is a procedural device for deciding cases already within a court's jurisdiction. *Id.* at 370-71; *Tex. Natural Res. Conservation Comm'n v. IT-Davy*, 74 S.W.3d 849, 855 (Tex. 2002). The DJA waives a municipality's immunity in a suit that involves the validity of a municipal ordinance, TEX. CIV. PRAC. & REM. CODE § 37.006(b), but a party cannot circumvent governmental immunity by characterizing a suit for money damages as a claim for declaratory judgment. *City of Houston v. Williams*, 216 S.W.3d 827, 828-29 (Tex. 2007) (per curiam). For example, in *Williams*, we held that the City of Houston was immune from suit where a group of firefighters was seeking a declaratory judgment regarding statutory lump sum payments of accumulated vacation and sick leave. *Id.* at 828. We held that because the firefighters' only alleged injury had already occurred and their only plausible remedy was an award of money damages, they could not circumvent the City's governmental immunity by requesting declaratory relief. *Id.* at 829.

The Officers are not attempting to invalidate the pay ordinance. To the contrary, they are attempting to enforce the ordinance according to its terms as they read it. And like the firefighters in *Williams*, the Officers do not dispute that the City is immune from their declaratory judgment claims regarding past due payments. But they claim that the City's immunity is waived as to their declaratory judgment action seeking an interpretation of the ordinance and contract with regard to the salary to be paid in the future. Assuming without deciding that the City's immunity would be waived in such a situation, we disagree that the Officers sought a declaration governing their future relationship with the City. In their trial court pleadings, the Officers alleged that they sustained damages equal to the difference between the amount of their salaries already paid by the City and the amount the City should have paid. They also asserted that they were seeking no damages for any back pay accrued following May 27, 1998, when the City adopted another pay resolution. The Officers made no claim for injunctive relief, future payments, or any other future action from the City. Because the Officers' only potential relief was an award of money damages, the City is immune from their declaratory judgment claims. *See id.*

The Officers assert that if we determine their declaratory judgment claims are actually ultra vires claims that they should have brought against city officials, then we should remand the case so they can amend their pleadings. *See Heinrich*, 284 S.W.3d at 371-72 (holding that a suit seeking a declaratory judgment that a governmental official acted without legal or statutory authority, such as where a statute or the constitution requires that a contract be performed in a certain way, is an ultra vires claim that must be brought against the official). But *Heinrich* clarified that only prospective, not retrospective, relief is available in an ultra vires claim. *Id.* at 376. Because the

Officers sought only retrospective relief, their declaratory judgment claims must be dismissed. *See id.*

We turn next to the Officers' assertion that the City does not have immunity because the pay ordinance was adopted through the referendum process. The court of appeals disagreed with the Officers. So do we.

E. Effect of the Referendum

The Officers assert that because this is a suit to enforce a voter-approved referendum, governmental immunity does not, or should not, apply. Addressing their arguments in logical order, we first consider their contention that on a policy basis the City's immunity in suits such as this should be abrogated. Referencing *Reata*, the Officers posit that because governmental immunity is a common-law doctrine, the Court should hold that it does not exist here because the purposes for immunity are inapplicable. The Officers claim that because the City's citizens made a policy decision requiring expenditure of city money, the rationale behind immunity—to protect the public treasury—is missing. *See Heinrich*, 284 S.W.3d at 375-76 (noting that the modern justification for immunity is protecting the public fisc).

The Officers' suit is for pay they assert is due and unpaid. The City asserts it does not owe the money. If the City is correct, the voters did not approve expenditure of the funds in the referendum. And suit to determine whether the Officers or the City is correct constitutes a suit for money damages. We have long recognized that immunity protects a governmental entity from suits for money damages absent Legislative consent. *See Heinrich*, 284 S.W.3d at 377; *Fed. Sign v. Tex. S. Univ.*, 951 S.W.2d 401, 405 (Tex. 1997). In *Reata*, we concluded that immunity from suit was

abrogated to a limited degree for two primary reasons: first, it would have been fundamentally unfair to allow the City to assert affirmative claims against another party while claiming immunity from the other party's claims connected to, germane to, and defensive to the City's claims; and second, the City had little room to complain about litigation costs because it had decided to expend resources on litigation when it filed its affirmative claim. *Reata*,197 S.W.3d at 375-76. But here we do not see any fundamental unfairness or inequity occurring just because the ordinance was adopted through the referendum process. Nor do we see how the fact that the ordinance was adopted by referendum should cause it to be treated any differently for immunity purposes from one adopted by the Dallas City Council. No one urges that it is any more or less effective as an ordinance than any other validly adopted ordinance. Accordingly, we decline to abrogate the City's immunity from suit based on the ordinance because it was adopted by referendum.

We next consider the Officers' arguments that consent to their suit against the City exists. First, they assert that the ordinance must be considered consent for suit because the referendum is only effective if its results are enforceable, and allowing immunity to trump an action to enforce the ordinance defeats the true purpose of the referendum. Again we disagree. The purpose of the referendum was to adopt the ordinance, just as that is the intent of any legislative body that adopts an ordinance or law. When the citizens approved the ordinance by referendum they were acting as the legislative body of the City. *See Blum v. Lanier*, 977 S.W.2d 259, 262 (Tex. 1999) ("Citizens who exercise their rights under initiative provisions act as and 'become in fact the legislative branch of the municipal government.'" (quoting *Glass v. Smith*, 244 S.W.2d 645, 649 (Tex. 1951)). Their actions in that capacity had the same effect insofar as adoption of the ordinance as legislative actions

of the city council would have had if the council had adopted the ordinance absent the referendum. Moreover, the Officers do not argue that language in the ordinance purports to give consent for their damages suit against the City, even if a city ordinance could waive immunity.[7]

Next, the Officers argue that because the pay ordinance was adopted by referendum, that is, the citizens acting as a legislative body, immunity from suit must have been waived because the City would otherwise be asserting immunity against itself. The Officers reference *City of Canyon v. Fehr*, in which the court of appeals held that governmental immunity did not bar a suit by citizens to compel the City to *order* a referendum. 121 S.W.3d 899, 902-03 (Tex. App.—Amarillo 2003, no pet.). The argument misses the mark. In *Fehr*, citizens who opposed new zoning ordinance amendments sued the City, seeking to have the changes submitted as an issue in a referendum election. *Id.* at 901-02. The court of appeals reasoned that because the citizens were acting as the legislative branch of the city in the referendum process, allowing the city to invoke governmental immunity as to their suit would effectively result in the city using the immunity doctrine against itself. *Id.* at 902-03; *see also Blum*, 997 S.W.2d at 262. In *Blum*, the Court concluded that those who are qualified to vote and who sign a petition for initiative and referendum "have a justiciable interest in seeing that their legislation is submitted to the people for a vote." *Blum*, 997 S.W.2d at 262. The concepts underlying *Fehr* and *Blum* are not relevant here. The Officers are not acting as

[7] In *Tooke*, the argument was made that the city waived immunity by charter language providing the city "may sue and be sued, . . . implead and be impleaded in all courts and places and in all matters whatsoever." 197 S.W.3d at 344. We did not address the question of whether the city could waive its own immunity from suit because even if it could, the language in question did not clearly and unambiguously do so. *Id.*

the legislative branch of the City. They are acting as private citizens seeking to recover money damages.

Based on the foregoing, we conclude that adoption of the ordinance by referendum did not result in loss, removal, or waiver of the City's governmental immunity as to the Officers' claims. We further conclude, as did the court of appeals, that the ordinance itself does not serve as consent to the Officers' suit just because it was adopted by referendum.

III. Conclusion

The judgment of the court of appeals is reversed and the case is remanded to the trial court for further proceedings in accordance with this opinion.

Justice

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0284

CITY OF DALLAS, PETITIONER,

v.

KENNETH E. ALBERT ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

JUSTICE HECHT, joined by CHIEF JUSTICE JEFFERSON, concurring in part and dissenting in part.

I join in all but Part II-B of the Court's opinion.

In *Reata Construction Corp. v. City of Dallas*, we held that the government's immunity from suit on a claim for damages does not extend to a claim asserted as an offset to a claim on which the government itself has sued and that is "germane to, connected with and properly defensive to" the government's claim.[1] Thus, for example, when the government is sued for damages and asserts a counterclaim, it is not immune from the plaintiff's suit to the extent his claim is defensive and offsetting. The counterclaim does not waive immunity; that would contradict the rule that waiver of immunity is generally a legislative matter.[2] Rather, the assertion of the counterclaim gives the

[1] 197 S.W.3d 371, 377 (Tex. 2006).

[2] *Id.* at 375.

plaintiff's claim a different character; it becomes defensive and offsetting, when it was not before. In my view, when the counterclaim is nonsuited or lost, the plaintiff's claim is no longer defensive and offsetting and is therefore barred by immunity. Just as the assertion of the counterclaim gave the plaintiff's claim a different character, when the counterclaim is gone, the plaintiff's claim loses that character. Immunity is not "reinstated" — the word the Court uses. The government is simply not immune from suit on defensive, offsetting damage claims, but is immune from damage claims that are not defensive and offsetting.

The Court rejects this simple approach for two reasons. First, it argues, the government cannot create immunity by its own actions.[3] I agree. We have held, for example, that when the government is sued on a claim for which immunity is waived, it cannot gain immunity by settling and then refusing to perform its obligations under the settlement agreement.[4] But nonsuiting a counterclaim, thereby leaving the plaintiff with a claim that is non-defensive, does not create immunity. Suppose the plaintiff, too, nonsuits, then refiles the same claim. If his claim is not barred, then only the government's nonsuit has consequences. But if the plaintiff's claim is barred, as it surely is, it is not because he has re-created immunity by nonsuiting; it is because he does not have a defensive, offsetting claim.

The second reason the Court rejects my simple approach is that it offers "no benefit".[5] Even if the government is no longer immune from the plaintiff's suit after nonsuiting its counterclaim, the

---

[3] *Ante* at ___.

[4] *Tex. A&M Univ.-Kingsville v. Lawson*, 87 S.W.3d 518 (Tex. 2002).

[5] *Ante* at ___.

most the plaintiff can achieve is an offset against the government's recovery, and the government no longer has a claim. Of course, as the Court notes, the government can assert immunity by a plea to the jurisdiction and immediately appeal an adverse ruling, and to defeat the plaintiff's claim on the merits, it must move for summary judgment and wait to appeal an adverse ruling until the end of the case. This, the Court admits, "might take a little longer . . . and result in more attorney's fees", but the government should lie in the bed it has made. Perhaps so, but that seems to me to be a policy choice the Legislature should make. There is, in fact, *some* benefit to the government in being relieved of the additional burden, as the Court itself admits.

The Court holds instead that the result of the government's nonsuiting a counterclaim is extremely convoluted. In this case, when the City filed a counterclaim to the officers' damage claims,

> each officer had two possible categories of money damages claims pending. The first category consisted of claims that would offset, in whole or in part, any recovery by the City and that were germane to, connected with, and properly defensive to the City's claims. The second category consisted of (1) claims for amounts over and above the amount that would offset the City's claim but were nevertheless germane to, connected with, and properly defensive to the City's claims; and (2) claims that were not germane to, connected with, or properly defensive to the City's claim. The City had immunity from suit as to both types of claims in the second category, but it did not have immunity from suit as to claims in the first category. Because the City did not have immunity from suit as to claims in the first category once it filed its counterclaim, it could not "reinstate" such immunity by nonsuiting.[6]

Maybe a chart will help. This, I think, illustrates the passage just quoted:

[6] *Ante* at ___.

<table>
<tr><td></td><td></td><td colspan="2">germane to, connected with,
and properly defensive to counterclaim</td></tr>
<tr><td></td><td></td><td>YES</td><td>NO</td></tr>
<tr><td rowspan="2">OFFSETTING</td><td>YES</td><td>Category 1

no immunity</td><td rowspan="2">Category 2(2)

immunity</td></tr>
<tr><td>NO</td><td>Category 2(1)

immunity</td></tr>
</table>

In the Court's view, the City's dismissal of its counterclaim could not and did not alter these categories. So the City has lost its immunity from offsetting claims but retained it from non-offsetting claims. The problem is, with no counterclaim, there is no way to determine which of the plaintiffs' claims are offsetting and which are non-offsetting, because the counterclaim will never be adjudicated. The determination is important because the City can still assert immunity to non-offsetting claims by a plea to the jurisdiction and immediately appeal an adverse ruling. Since the determination is impossible to make, it is not clear whether the City can still assert immunity or is left to attack the officers' claims on the merits.

Immunity for Category 2(1) claims is critical to the Court's position. Its loss by nonsuiting the councerclaim would offend the rule that has driven the Court to this monstrosity in the first place: that the government cannot waive or create immunity by its litigation conduct. Yet the survival of such immunity makes the Court's position unworkable.

The Court seems intent on punishing the government for asserting and then nonsuiting a counterclaim, but this is a classic example of cutting off the nose to spite the face. There are now two different ways for the government to establish non-liability, one by assertion of immunity and the other by challenging the merits of the plaintiff's claim; two different vehicles for raising the issue; and two different kinds of appeals. Actually, there are probably now three different kinds of appellate review: immediate, interlocutory appeal, appeal from a final judgment, and mandamus, to substitute for the interlocutory appeal the Court has denied the government after the counterclaim is nonsuited. Let the litigation and confusion begin. Appellate courts running out of something to do will regard today's ruling as good news.

I repeat: when the government abandons or loses its claim, an opposing claim is no longer defensive and offsetting and should therefore be held to be barred by immunity, employing the usual procedures, just as if the counterclaim had not been asserted. From the Court's contrary view, I respectfully dissent.

Opinion delivered: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0284

CITY OF DALLAS, PETITIONER,

v.

KENNETH E. ALBERT, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

JUSTICE WILLETT, dissenting.

Does Local Government Code Section 271.152 apply to waive the City's immunity? The Court wisely concludes the trial court should first tackle this potentially dispositive issue. If Section 271.152 applies, then that's that—the City has no immunity—making the balance of today's decision purely advisory, something the Court readily admits: "some of our discussion may not be necessary."[1] To clarify, the Court is unwilling to decide what is possibly controlling but willing to pre-decide what is purely contingent. If bad facts make bad law, then old cases make odd law. This litigation began in 1994, and I well understand the Court's desire to prod it along. But we should not leapfrog lower-court review by pre-answering a host of subsidiary questions that will never be asked if Section 271.152 indeed applies. Finding the Court's advisory opinion inadvisable, I respectfully dissent.

[1] The Court acknowledges that if Section 271.152 applies, "some of our discussion may not be necessary to resolution of the issues." *Ante* at __ n.5.

* * *

The myriad governmental-immunity issues in this case provoke varied views. In their competing opinions, JUSTICE JOHNSON and JUSTICE HECHT debate a particularly vexing point: the existence (or not) of the City's immunity once it nonsuited its counterclaims. I think it unnecessary and improper for the Court to reach this and other satellite issues unless and until it determines that Section 271.152 is inapplicable—if it is. That "if" is mighty consequential, and mighty worthy of lower-court examination.

As the Court recognized earlier this year and reaffirms today, Section 271.152 effects a "clear and unambiguous" (and retroactive) waiver of governmental immunity in certain breach-of-contract suits.[2] Is this such a suit? If so, then the City lacks immunity.[3] What weight is then due the Court's lengthy discussion of various other issues, all interesting but all incidental (the effect of the counterclaim, the declaratory-judgment action, and the referendum)?[4] As my LSAT instructor used to (mis)state: "It's irrevelant."

Under article V, section 8 of the Texas Constitution, we decide concrete cases; we do not dispense contingent advice. The "judicial power does not embrace the giving of advisory

[4] *See ante* § II A–B, D–E.

opinions,"[5] those that decide an academic[6] or "abstract question of law without binding the parties."[7] Prudent development of the State's jurisprudence requires that courts refrain from giving "advice . . . upon speculative, hypothetical, or contingent situations."[8] To be sure, this long-running case poses important issues of Texas immunity law, issues we may need to decide one day. But today is not that day.

As the Court notes, Section 271.152 was enacted while this case was already at the court of appeals, meaning the trial court never had an opportunity to consider its applicability. Likewise, the court of appeals did not discuss it, and neither party challenged that court's decision not to discuss it. Today this Court wisely declines to short-circuit lower-court review of whether Section 271.152 waives the City's immunity, a path we have consistently followed in analogous Chapter 271 cases.[9] My quibble lies in the Court's eagerness to undertake a full-dress analysis of various subissues, all of which evaporate if Section 271.152 applies. The Court has enough to keep itself busy without premature predecisions and consultative guidance that presupposes—if not predestines—a certain lower-court path.

Don R. Willett
Justice

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0647

EVELYN CLARK, R.N., ROSEANNE RODRIGUEZ, MHS, AND ELIZABETH ORTIZ, MAS, PETITIONERS,

v.

CYNTHIA SELL, ON BEHALF OF MITCHELL RAY SELL, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE SEVENTH DISTRICT OF TEXAS

PER CURIAM

Mitchell Ray Sell, while hospitalized for psychosis and hallucinations, was allegedly heavily medicated and left lying in the same position for many hours; as a result, he developed "compartment syndrome" in one arm, required surgery, and remains permanently injured. On Mitchell's behalf, respondent Cynthia Sell sued, among others, petitioners Evelyn Clark, Roseanne Rodriguez, and Elizabeth Ortiz for negligently failing to ensure Mitchell was periodically turned or roused; an attached report further suggests that defendants should have reported Mitchell's over-medication to a physician. Petitioners, after answering, moved to dismiss the claims against them under section 101.106(f) of the Texas Tort Claims Act, TEX. CIV. PRAC. & REM. CODE §101.106(f), asserting that they were employees of a governmental entity, Sunrise Canyon Hospital. Petitioners argued that the

suit was based on conduct within the general scope of their employment, and that the claim could have been brought under the Tort Claims Act against the governmental unit. Sell responded.

After the trial court indicated that it would deny the motion to dismiss, and shortly before it signed its order, Clark and the other petitioners filed a notice of interlocutory appeal. The court of appeals, without addressing its jurisdiction over the interlocutory appeal, affirmed. 228 S.W.3d 873 (Tex. App.–Amarillo 2007).

While this case has been pending on appeal, we have decided *Franka v. Velasquez*, ___ S.W.3d ___ (Tex. 2011), holding among other things that, for purposes of section 101.106(f), a tort action is brought "under" the Texas Tort Claims Act, even if the government has not waived its immunity for such actions. ___ S.W.3d at ___. In light of *Franka*, we grant Clark, Rodriguez and Ortiz's petition for review, and without hearing oral argument, reverse the court of appeals' judgment and remand the case to the court of appeals for further proceedings. TEX. R. APP. P. 59.1.

Opinion delivered: January 21, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0945

TEXAS PARKS AND WILDLIFE DEPARTMENT, PETITIONER,

v.

THE SAWYER TRUST, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE SEVENTH DISTRICT OF TEXAS

Argued November 19, 2009

JUSTICE JOHNSON delivered the opinion of the Court, in which CHIEF JUSTICE JEFFERSON, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE GREEN, JUSTICE WILLETT, JUSTICE GUZMAN, and JUSTICE LEHRMANN joined.

CHIEF JUSTICE JEFFERSON filed a concurring opinion, in which JUSTICE MEDINA, JUSTICE WILLETT, and JUSTICE GUZMAN joined.

JUSTICE HECHT filed an opinon concurring in part and dissenting in part.

This appeal involves the issue of whether the trial court had jurisdiction over a claim against the Texas Parks and Wildlife Department to determine whether the Salt Fork of the Red River is navigable. The Sawyer Trust sued the Department for a declaratory judgment that the river is not navigable and that the Trust owns the riverbed where it crosses the Trust's property in Donley County. The Department filed a plea to the jurisdiction based on sovereign immunity. After the Department took the position that the river was navigable—and the State therefore owned the riverbed—the Trust added a constitutional takings claim. The trial court denied the Department's

plea and the court of appeals affirmed.

We hold that the Trust's claims for a declaratory judgment are barred by sovereign immunity and the Trust cannot assert a takings claim under these circumstances. We also hold, however, that the Trust is entitled to replead and attempt to assert an ultra vires claim against state officials if it chooses to do so. We reverse the court of appeals' judgment and remand the case to the trial court for further proceedings.

I. Background

The State of Texas owns the soil underlying navigable streams.[1] TEX. PARKS & WILD. CODE § 1.011(c); TEX. WATER CODE § 11.021; *see Maufrais v. State*, 180 S.W.2d 144, 148 (Tex. 1944); *State v. Bradford*, 50 S.W.2d 1065, 1069 (Tex. 1932). By statute, a "navigable stream" is "a stream which retains an average width of 30 feet from the mouth up." TEX. NAT. RES. CODE § 21.001(3). The taking of sand and gravel from state-owned waters and beds, including those of navigable streams, is regulated by the Department. TEX. PARKS & WILD. CODE § 1.011(d); TEX. NAT. RES. CODE § 51.291; 31 TEX. ADMIN. CODE § 69.101.

The Salt Fork of the Red River crosses property in Donley County owned by the Sawyer Trust. The Trust had an opportunity to sell sand and gravel from the streambed but was concerned that the Department would seek control of the property and interfere with the sale. *See* TEX. PARKS & WILD. CODE § 86.002(a); 31 TEX. ADMIN. CODE §§ 69.104, 69.114(a). The Trust sued the

[1] Subject to specified limitations, title to certain streambeds has been transferred by the State. *See* TEX. REV. CIV. STAT. art. 5414a-1. The State and the Trust contend their respective rights to the sand and gravel in the bed of the Salt Fork turn on the issue of navigability. We assume, without deciding, that their positions are correct.

Department[2] for a declaratory judgment that the Salt Fork was not navigable.[3] The Department filed a plea to the jurisdiction. It asserted that (1) the Trust had not pled a claim that fell within a waiver of sovereign immunity, and (2) the Trust's claims were not ripe because the Department had neither taken action contrary to the Trust's interests nor manifested any intent to do so.

Pursuant to agreement of the parties, and at the urging of the trial court, a surveyor from the General Land Office visited the streambed on the Trust property. He then filed a letter with the trial court setting out that his visit was "for the purpose of determining if the stream was statutorily navigable." He concluded that the Salt Fork was navigable at the point where he measured it on the Trust's property. The Trust then amended its pleadings and added an allegation that the State's claim of navigability constituted a taking of its property under the federal and Texas Constitutions. The trial court denied the Department's plea to the jurisdiction.

The court of appeals affirmed. It held that a declaratory judgment action seeking the determination of a disputed fact issue—the navigability of the stream—is not a suit against the State that implicates sovereign immunity. ___ S.W.3d ___. The court of appeals concluded that although the declaratory action "may have the collateral consequence of resolving a factual dispute that impacts a claim being made by the State, it is not an action that is in essence one for the recovery of money from the State or for determination of title; therefore, legislative permission to prosecute is unnecessary." *Id.* at ___.

The Department no longer urges its ripeness challenge to the Trust's claim: it maintains that

---

[2] The Trust also sued, but then non-suited, the Texas Commission on Environmental Quality.

[3] The Trust also sued for injunctive relief. The parties do not address that claim and neither do we.

the Salt Fork is navigable. Nevertheless, the Department asserts that sovereign immunity deprived the trial court of jurisdiction because (1) there is no general right to sue a State entity for a declaration of rights—such relief is available only in an ultra vires claim against a state official; (2) determination of whether a stream is navigable constitutes a determination of the State's title to property and sovereign immunity bars a suit that would have such an effect; and (3) the Trust's pleadings fail to state a constitutional takings claim. The Trust counters that the trial court had jurisdiction because the suit is (1) a permissible declaratory judgment action under the Texas Constitution; (2) an authorized declaratory judgment action to determine a boundary line as opposed to a trespass to try title suit to determine ownership rights; and (3) a constitutional takings claim because the State has destroyed value and use of the Trust's property. Alternatively, the Trust argues that if this suit involves an ultra vires claim that it should have brought against a governmental actor, we should remand the case with instructions to modify the parties.

II. Discussion

A. Standard of Review

Whether a trial court has jurisdiction is a question of law subject to de novo review. *See Tex. Natural Res. Conservation Comm'n v. IT-Davy*, 74 S.W.3d 849, 855 (Tex. 2002).

Generally, sovereign immunity deprives a trial court of jurisdiction over a lawsuit in which a party has sued the State or a state agency unless the Legislature has consented to suit. *See, e.g.*, *Tex. Dep't of Parks & Wildlife v. Miranda*, 133 S.W.3d 217, 224 (Tex. 2004). But when the State or a state agency has taken a person's property for public use, the State's consent to suit is not required; the Constitution grants the person consent to a suit for compensation. *See, e.g.*, *State v.*

Holland, 221 S.W.3d 639, 643 (Tex. 2007); *Steele v. City of Houston*, 603 S.W.2d 786, 791 (Tex. 1980).

B. Declaratory Relief

The Declaratory Judgments Act (DJA) generally permits a person who is interested in a deed, or whose rights, status, or other legal relations are affected by a statute, to obtain a declaration of rights, status, or other legal relations thereunder. TEX. CIV. PRAC. & REM. CODE § 37.004(a). The Department urges, however, that there is no general right to sue a state agency for a declaration of rights. We agree.

1. Actions Against State Entities

While the DJA waives sovereign immunity for certain claims, it is not a general waiver of sovereign immunity. *See id.* § 37.006(b); *City of El Paso v. Heinrich*, 284 S.W.3d 366, 373 n.6 (Tex. 2009) (noting that the DJA waives immunity for claims challenging the validity of ordinances or statutes); *IT-Davy*, 74 S.W.3d at 855-56. But generally, the DJA does not alter a trial court's jurisdiction. *IT-Davy*, 74 S.W.3d at 855. Rather, the DJA is "merely a procedural device for deciding cases already within a court's jurisdiction." *Tex. Ass'n of Bus. v. Tex. Air Control Bd.*, 852 S.W.2d 440, 444 (Tex. 1993). And a litigant's couching its requested relief in terms of declaratory relief does not alter the underlying nature of the suit. *Heinrich*, 284 S.W.3d at 370-71; *IT-Davy*, 74 S.W.3d at 855. Consequently, sovereign immunity will bar an otherwise proper DJA claim that has the effect of establishing a right to relief against the State for which the Legislature has not waived sovereign immunity. *See City of Houston v. Williams*, 216 S.W.3d 827, 828-29 (Tex. 2007) (per curiam).

The Trust argues that sovereign immunity does not apply because the Department acted outside its legal authority when it asserted the Salt Fork was navigable and the State owned the streambed. We disagree—the Department is immune from suit.

The rule remains as it was set out in *State v. Lain*:

> When in this state the sovereign is made a party defendant to a suit for land, without legislative consent, its plea to the jurisdiction of the court based on sovereign immunity should be sustained . . . .

349 S.W.2d 579, 582 (Tex. 1961). Neither *Heinrich* nor the DJA creates an exception to a state agency's immunity in suits for title to land. *See Heinrich*, 284 S.W.3d at 370-73. If the Trust's suit against the Department is in substance a trespass to try title action, it is barred by sovereign immunity absent the Legislature's having waived its immunity. *See Lain*, 349 S.W.2d at 582.

2. Contesting Title with the State

Generally, a trespass to try title claim is the exclusive method in Texas for adjudicating disputed claims of title to real property. *See* TEX. PROP. CODE § 22.001(a) ("A trespass to try title action is the method of determining title to lands, tenements, or other real property."); *Martin v. Amerman*, 133 S.W.3d 262, 267 (Tex. 2004). "Real property" generally includes the sand and gravel on a tract of land, *see, e.g.*, *Maser v. U.S. Steel Corp.*, 676 S.W.2d 99, 102 (Tex. 1984), and in this case the Department does not claim otherwise.

In 2007, the Texas Legislature added an exception to the rule that a trespass to try title claim is the exclusive method for adjudicating disputed claims of title to real property. Section 37.004(c) of the Texas Civil Practice and Remedies Code provides that, notwithstanding the trespass to try title statute, a person interested under a deed, will, written contract, or other writings constituting a

contract may obtain a determination of title based on a property boundary line "when the sole issue concerning title to real property is the determination of the proper boundary line between adjoining properties." TEX. CIV. PRAC. & REM. CODE § 37.004(c); *see* TEX. PROP. CODE § 22.001(a). The Trust argues that the claims in this case constitute a boundary dispute and that "new section 37.004(c) can easily and logically be construed as a legislative waiver of any sovereign immunity that has ever in the past impeded private titleholders' efforts to litigate their boundary disputes against the State." We disagree that the claims here constitute a boundary dispute.

The central test for determining jurisdiction is whether the "real substance" of the plaintiff's claims falls within the scope of a waiver of immunity from suit. *See, e.g., Dallas County Mental Health & Retardation v. Bossley*, 968 S.W.2d 339, 343-44 (Tex. 1998). The real substance of the Trust's pleadings, evidence, and arguments is that the Salt Fork is not navigable and the State has no ownership rights in its bed. Its allegations are summarized in its live pleading in the section entitled "Causes of Action Against Defendants":

> Defendants' claim of ownership and attempts to enter the property to limit or control Landowner's activities, and that of third parties, *by asserting rights of ownership and the right to control, regulate or prohibit the removal of sand and gravel* constitute an improper claim to and use of the property by Defendants and unreasonably interfere with the Landowner's rights to use and enjoy its property. (emphasis added)

Under the "Relief Sought" section of its pleadings, the Trust sought a declaratory judgment that no navigable stream is present on its property, despite the Department's contention to the contrary, and injunctive relief precluding the Department from entering the Trust's property in an attempt to limit, control, or interfere with the removal of sand and gravel from the Trust's property.

We need not decide whether section 37.004(c) effects a waiver of the State's immunity from suit for boundary disputes because this controversy is not over the boundary between State-owned land and Trust-owned land; rather it is over whether the State owns any land at all. The case involves rival claims to ownership of the entire streambed. Consequently, the Trust's suit in substance is one to determine title to land. Such a suit against the State is barred by sovereign immunity absent legislative consent. *See Dallas Area Rapid Transit v. Whitley*, 104 S.W.3d 540, 542 (Tex. 2003); *Lain*, 349 S.W.2d at 582.

The Trust also urges that it may maintain its suit against the Department because whether a stream is navigable is a judicial determination. It cites to *State v. Bradford*, in which this Court stated,

> The public policy of this state with respect to navigable streams long has been established and enforced, and it is not a question left to the discretion and judgment of ministerial officers. Under the law, those officers were and are not clothed with the power to settle questions of navigability of streams, but, in view of the very nature and importance of the matter, for obvious reasons, it is a question for judicial determination.

50 S.W.2d 1065, 1070 (Tex. 1932) (citations omitted). We agree with the Trust that the issue is one for judicial determination. But as we discuss later in greater detail, such a claim is an ultra vires one that must be brought against a governmental official and not the State.

Here the Department, as a defendant, has asserted its sovereign immunity and the Trust has not shown any exceptions to or waiver of it. While courts may determine questions of navigability when they have jurisdiction, a navigability dispute does not comprise an exception to or waiver of sovereign immunity and vest jurisdiction in the courts when the State or a state agency is sued.

In sum, notwithstanding the manner in which they are pleaded, the Trust's claims for declaratory relief are claims against the Department to determine title to the bed of the Salt Fork and are barred by sovereign immunity. *See Lain*, 349 S.W.2d at 582.

C. Takings Claim

1. Analysis

The Trust also asserts that a waiver of immunity is not required because this is a suit based on a constitutional taking. The Trust argues that a taking has occurred because the Department's claim of ownership unreasonably interferes with the Trust's rights to use and enjoy its property. The Department urges that the Trust's claim is not a valid takings claim because the Trust seeks only declaratory and injunctive relief based on the dispute over title to the bed of the Salt Fork—a dispute that will be determined by whether the Salt Fork is navigable—but which is nothing more than a title dispute nonetheless.

We agree with the Department. Although the Trust referenced the United States and Texas Constitutions, it did not assert a valid takings claim giving the trial court jurisdiction over its claim.

The Texas Constitution provides that "[n]o person's property shall be taken, damaged, or destroyed for or applied to public use without adequate compensation being made, unless by the consent of such person." TEX. CONST. art. I, § 17. Likewise, the United States Constitution provides "nor shall private property be taken for public use, without just compensation." U.S. CONST. amend. V. Sovereign immunity does not shield the State from claims based on unconstitutional takings of property. *See, e.g.*, *Holland*, 221 S.W.3d at 643; *Steele*, 603 S.W.2d at 791. Whether the government's actions are sufficient to constitute a taking is a question of law.

E.g., *Gen. Servs. Comm'n v. Little-Tex Insulation Co.*, 39 S.W.3d 591, 598 (Tex. 2001).

To establish a takings claim, the claimant must seek compensation because the defendant intentionally performed actions that resulted in taking, damaging, or destroying property for public use without the owner's consent. *See id.* Whether a taking has occurred depends largely on definitional and conceptual issues. *See* 2A JULIUS L. SACKMAN, NICHOLS ON EMINENT DOMAIN § 6.01[1] (3d ed. 2006).

The premise for a constitutional takings cause of action is that one person should not have to absorb the cost of his property being put to a public use unless he consents. *See Steele*, 603 S.W.2d at 789. In contrast to a trespass to try title claim, which quiets title and the right of possession to property, a successful takings claim entitles a claimant to compensation, not to possession of the property. *See* TEX. CONST. art. I, § 17 ("No person's property shall be taken . . . *without adequate compensation* being made . . . .") (emphasis added); *City of Beaumont v. Bouillion*, 896 S.W.2d 143, 149 (Tex. 1995) (stating that section 17 of the Texas Constitution waives immunity only when a claimant is seeking compensation); *cf. Martin*, 133 S.W.3d at 264-65 ("[a] trespass to try title action is the method of determining title to lands, tenements, or other real property." (quoting TEX. PROP. CODE § 22.001)).

In this case, the Trust asserted in its amended pleadings that through the Department's contention that a navigable stream exists on the Trust's property, the Department wrongfully claimed title to part of the Trust's property. The only relief sought by the Trust was declaratory and injunctive relief to effectively determine its ownership of and right to possess the bed of the Salt Fork. The Trust did not seek compensation—the only relief available in a takings claim—nor did

it seek a declaration that the Department had taken Trust property for public use. *See Bouillion*, 896 S.W.2d at 149. The difference between a takings claim and a trespass to try title claim was clearly articulated by the court of appeals in *Porretto v. Patterson*:

> In a trespass to try title or to quiet title action, an owner sues to recover immediate possession of land unlawfully withheld. A prevailing party's remedy is title to, and possession of, the real property interest at issue in the suit.
>
> On the other hand, a takings claim is one in which a landowner alleges that the government has taken his property for public use without permission, for which he seeks compensation. The available remedy is a key distinction between the two. While one suit quiets title and possession of the property, the other allows only for just compensation for the property taken or used—the prevailing party does not regain use of land lost to the public's use, or win possession of it.

251 S.W.3d 701, 708 (Tex. App.—Houston [1st Dist.] 2007, no pet.) (citations omitted).

Here, the Department has merely identified the streambed as belonging to the State because the State asserts the Salt Fork is navigable. *See* TEX. NAT. RES. CODE § 21.001(3); TEX. PARKS & WILD. CODE § 1.011(c); TEX. WATER CODE § 11.021; *Bradford*, 50 S.W.2d at 1068-69. The Trust stated in its amended pleadings that the State "wrongfully claim[ed] title" to the streambed, resting its assertion on the Department's contention that a navigable stream exists on the property. It is undisputed that the Department has not taken action to apply materials in the streambed to public use by actions such as selling them. *Cf. Porretto*, 251 S.W.3d 701 (takings claim was based on the State's leasing of property); *State v. BP Am. Prods.*, 290 S.W.3d 345 (Tex. App.—Austin 2009, pet. denied) (takings claim was based on the State's grant of an oil and gas lease); and *Koch v. Gen. Land Office*, 273 S.W.3d 451 (Tex. App.—Austin 2008, pet. denied) (takings claim was based on the General Land Office's removal and sale of limestone). It has not done anything that would require

it to compensate the Trust if the streambed is not navigable. Thus, the Trust cannot colorably claim that it seeks compensation by means of a suit in the nature of an inverse condemnation cause of action.

In a case such as the one before us, where the question of who owns the property is the only issue and title and possession are the only available remedies, the record and the briefs show conclusively that the Trust does not have a constitutional takings claim for compensation. *See Tex. A & M Univ. Sys. v. Koseoglu*, 233 S.W.3d 835, 840 (Tex. 2007) (holding that a remand to permit a claimant to replead would serve no legitimate purpose when the underlying claim was a breach of contract claim and immunity could not be overcome). If the Trust owns the property, it is not entitled to compensation for a taking. And if the State owns the property, the Trust is not entitled to compensation because nothing was taken from it. The Trust confirms the foregoing conclusions when it says in this Court that it "does not seek money damages" and "does not seek to establish liability."[4] While the Trust has requested that if the State is granted relief in any respect, the Trust be permitted to modify the parties to assert an ultra vires claim against state officials, it makes no similar request to replead to assert a claim for compensation. The reason why is clear, as we have set out above.

Generally, a party is not entitled to relief it does not request. *State v. Brown*, 262 S.W.3d 365, 370 (Tex. 2008). And just as the Trust's suit is not one to determine the boundary between land owned by the State and land owned by the Trust, it is not a takings claim. Allowing the Trust's

[4] The Trust also does not seek consequential damages. *See Omnia Comm. Co. v. U.S.*, 261 U.S. 502, 510 (1923) (stating that "for consequential loss or injury resulting from lawful government action the law affords no remedy").

claim of title to be adjudicated by means of a takings claim would allow claimants to circumvent the State's sovereign immunity by creatively pleading such claims. Creative pleading cannot be used to effect the loss or waiver of the State's sovereign immunity. *See IT-Davy*, 74 S.W.3d at 856.

2. Response to the Dissent

The dissent would allow the Trust to pursue a takings claim even though the Trust has no claim for compensation. It would do so because,

> [b]y imposing statutory damages and civil and criminal penalties for mining a streambed without a permit, the State has all but prohibited a claimant from acting on a right asserted in good faith and risking the consequences in an action brought by the State. Legislative consent to sue for title is thus made virtually absolute.

___ S.W.3d at ___ (Hecht, J., dissenting). But even recognizing the practical effects of statutory damages and civil and criminal penalties for taking state-owned property still does not mean that the government has taken property belonging to the Trust. Under the circumstances, we fail to see how the Trust's claim is or can be for compensation, which is the only constitutional remedy for a takings claim.

Further, it seems that the dissent has mingled takings claims and ordinary claims for which legislative consent is required by its statement that "[l]egislative consent to sue for title is thus made virtually absolute." Legislative consent is not required for a constitutional takings claim to be brought. And as to a statutory waiver of immunity, the Legislature has specified that it does not intend a statute to waive sovereign immunity "unless the waiver is effected by clear and unambiguous language." TEX. GOV'T CODE § 311.034. Whether Legislative consent to sue for title can be found in the statutory construct that protects materials in navigable streambeds by providing

penalties for selling them without the State's permission is relevant to the Trust's title determination claim for which legislative consent is required; it is not relevant as to a takings claim for which the Constitution provides consent. Finally, construing the imposition of statutory damages and civil and criminal penalties for taking public property as effecting a constitutional taking creates a structure in which title to public property is placed at risk of transfer to private persons by default. And the dissent's proposed construct would not necessarily be limited to determining who owned the bed of a stream. It might well apply to any title dispute involving the State. Such a situation would significantly affect the Legislature's power to manage the limited resources of the State in regard to litigating title claims. We do not believe such a departure from the existing framework of statutory law and our precedent is warranted.

D. Ultra Vires Claim

The Trust asserts that if the Court determines the suit cannot proceed against the Department, the Court should remand the case to permit it to add state actors as parties and pursue an ultra vires claim. The Department urges that the suit should be dismissed because there is no basis for arguing that a department official has acted ultra vires.

A suit against a state official for acting outside his authority is not barred by sovereign immunity. *See Heinrich,* 284 S.W.3d at 370-74. While suits to try the State's title are barred by immunity, in some instances a party may maintain a trespass to try title action against governmental officials acting in their official capacities. *See Lain*, 349 S.W.2d at 581. In *Heinrich*, the Court affirmed the rule that suits for declaratory or injunctive relief against a state official to compel compliance with statutory or constitutional provisions are not suits against the State. *See Heinrich,*

284 S.W.3d at 370-74. If a government official acting in his official capacity possesses property without authority, then possession is not legally that of the sovereign. Under such circumstances, a defendant official's claim that title or possession is on behalf of the State will not bar the suit. *See Lain*, 349 S.W.2d at 581-83. A suit to recover possession of property unlawfully claimed by a state official is essentially a suit to compel a state official to act within the officer's statutory or constitutional authority, and the remedy of compelling return of land illegally held is prospective in nature.

The State urges that evidence before the trial court showed a state surveyor had examined the river and determined it to be navigable and that "[g]iven the Department's express statutory authority to exercise the State's right of ownership over this sand and gravel, there is simply no basis for arguing that a department official has acted *ultra vires*." We disagree.

The Trust and the dissent point out that the Department is in a unique position. It has sovereign immunity from the Trust's suit to determine title to the streambed. Though the Trust strongly disagrees with the Department's claim of navigability, the Trust seemingly has little recourse if the Department's position that the stream is navigable cannot be challenged by an ultra vires suit. The Department suggests that the Trust could take materials from the streambed and if the State sought civil damages filed or criminal charges, then the State would have to prove it owned the materials in the streambed by proving the Salt Fork is navigable. A landowner should not be put in such an untenable position if it can be avoided. And while we disagree that the facts before us constitute a constitutional taking, we conclude that they constitute "possession" of the streambed by the State for purposes of *Lain*.

In *Lain*, we set out the manner in which trespass to try title claims against government officials should proceed and the manner of relief that should be granted when the officials file pleas to the jurisdiction:

> [W]hen officials of the state are the only defendants, or the only remaining defendants, and they file a plea to the jurisdiction based on sovereign immunity, it is the duty of the court to hear evidence on the issue of title and right of possession and to delay action on the plea until the evidence is in. If the plaintiff fails to establish his title and right of possession, a take nothing judgment should be entered against him as in other trespass to try title cases. If the evidence establishes superior title and right of possession in the sovereign, the officials are rightfully in possession of the sovereign's land as agents of the sovereign and their plea to the jurisdiction based on sovereign immunity should be sustained. If, on the other hand, the evidence establishes superior title and right of possession in the plaintiff, possession by officials of the sovereign is wrongful and the plaintiff is entitled to relief. In that event the plea to the jurisdiction based on sovereign immunity should be overruled and appropriate relief should be awarded against those in possession.

Lain, 349 S.W.2d at 582.

The Department has the authority to make determinations on behalf of the State as to navigability of streams and to exercise the State's rights over navigable streambeds. Nevertheless, its pronouncement that a stream is navigable is not conclusive of the question. This Court established long ago that the question of navigability is, at bottom, a judicial one. *Bradford*, 50 S.W.2d at 1070.

Here it is undisputed that the part of the streambed in question and claimed by the State to be navigable lies on land owned by the Trust. If the Salt Fork is not navigable, the Trust owns the bed. We see no good reason that the process and principles we set out long ago in *Lain* should not apply. The Trust should be given an opportunity to amend and cure the pleading and party defects, if it chooses to do so, and have the suit proceed against the governmental actors laying claim to the

streambed. *See Koseoglu*, 233 S.W.3d at 840; *Lain*, 349 S.W.2d at 582.

III. Conclusion

We reverse the judgment of the court of appeals. The case is remanded to the trial court for further proceedings in accordance with this opinion.

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 07-0945

TEXAS PARKS AND WILDLIFE DEPARTMENT, PETITIONER,

v.

THE SAWYER TRUST, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE SEVENTH DISTRICT OF TEXAS

CHIEF JUSTICE JEFFERSON, joined by JUSTICE MEDINA, JUSTICE WILLETT, and JUSTICE GUZMAN, concurring.

I join the Court's opinion but offer a few additional observations about the dissent. According to the dissent, our decision today is groundbreaking because it waives immunity for trespass to try title suits. But at least since *State v. Lain*,[1] and probably since *State v. Bradford*,[2] that has been the law in Texas. *See, e.g.*, *Coastal Indus. Water Auth. v. York*, 532 S.W.2d 949, 954 (Tex. 1976) (holding, in declaratory judgment action brought by private party, that title remained with that party and not with the water authority); *Lain*, 349 S.W.2d at 586 (affirming judgment that private parties had title and possession as against state officials who claimed title on behalf of the state); *Manry v. Robison*, 56 S.W.2d 438, 448–49 (Tex. 1932) (determining that State did not own riverbed

[1] 349 S.W.2d 579, 582 (Tex. 1961).

[2] 50 S.W.2d 1065, 1069 (Tex. 1932).

and that private parties had title thereto); *Tex. River Barges v. City of San Antonio*, 21 S.W.3d 347, 351–52 (Tex. App.—San Antonio 2000, pet. denied) (holding that trial court correctly concluded that river was navigable).[3]

The dissent accurately notes that *Heinrich*'s ultra vires rule does not apply if the government official's acts were discretionary. The dissent then laments that allowing an ultra vires claim to determine navigability goes beyond *Heinrich* and "abolish[es] immunity altogether." ___ S.W.3d at ___. This incorrectly presumes, however, that a state official's assertion of title is a discretionary act. But navigability (which, here, determines title) "is not a question left to the discretion and judgment of ministerial officers." *Bradford*, 50 S.W.2d at 1070. Rather, "[u]nder the law, *those officers were and are not clothed with the power to settle questions of navigability of streams, but in view of the very nature and importance of the matter, for obvious reasons, it is a question for judicial determination*." *Id.* (emphasis added).[4] Government officials cannot choose which properties the State owns; our constitution and statutes set those parameters, and our courts decide whether they have been satisfied. *See Lorino v. Crawford Packing Co.*, 175 S.W.2d 410, 413 (Tex. 1943) (observing that lands covered by navigable waters could not be sold by the land commissioner or other ministerial officer; such sale or grant may only be authorized by the Legislature); *see also*

---

[3] *See also, e.g.*, 17 WILLIAM V. DORSANEO, III, ET AL., TEXAS LITIGATION GUIDE § 251.04[4][b] (2011) ("A plaintiff . . . may effectively evade sovereign immunity concerns by bringing a trespass to try title action against an appropriate government officer in an official capacity, because legislative consent to suit against an officer is not required in the specific context of a trespass to try title action.") (citing *Lain*, 349 S.W.2d at 581).

[4] *Cf. Oklahoma v. Texas*, 258 U.S. 574, 585 (1922) (noting that government surveyors' determination created a "legal inference of navigability" that had little significance because "those officers were not clothed with power to settle questions of navigability"); *Barden v. N. Pac. R.R. Co.*, 154 U.S. 288, 320–21 (1894) (observing that government surveyor's determination was entitled to "[s]ome weight" but was not conclusive because he was not "authorized to determine finally the character of any lands granted or make any binding report thereon").

Manry, 56 S.W.2d at 449 (denying mandamus relief to party seeking mineral permit from the State, because evidence showed that State did not own riverbed).

In *Lain*, we made clear that a government actor is not immune from a trespass-to-try-title suit, and we described how to bring such a claim. *State v. Lain*, 349 S.W.2d 579, 581–82 (Tex. 1961) ("One who takes possession of another's land without legal right is no less a trespasser because he is a state official or employee, and the owner should not be required to obtain legislative consent to institute a suit to oust him simply because he asserts a good faith but overzealous claim that title or right of possession is in the state and that he is acting for an on behalf of the state."). We had earlier held that ultra vires actions remained viable, expressly rejecting the federal courts' approach (which so restricted officer suits and expanded immunity that Congress eventually passed the Quiet Title Act of 1972). *See W. D. Haden Co. v. Dodgen*, 308 S.W.2d 838, 843 (Tex. 1958)[5]; *see also* 28 U.S.C.§§ 2409a, 1346(f), 1402(d).

The dissent has conjured an unorthodox takings claim based on the civil and criminal penalties associated with appropriating the State's sand and gravel. There are several problems with

---

[5] We stated:

> Our quotation of portions of the opinion in [*Larson v. Domestic & Foreign Commerce Corp.*, 337 U.S. 682 (1949)] dealing with the contract phase of the case is not to be considered as an approval of the limitation imposed on the rule of *United States v. Lee* as that rule has been adopted and applied by the courts of this state in *Imperial Sugar Co. v. Cabell* and *State v. Epperson*, a limitation vigorously questioned in the dissenting opinion of Mr. Justice Frankfurter. *We have no disposition to extend or broaden the rule of immunity in this state.*

W. D. Haden Co. v. Dodgen, 308 S.W.2d 838, 843 (Tex. 1958) (emphasis added) (citations omitted).

this approach. First, if all the government has done is claim title,[6] a takings claim is premature. *Cf. Hous. N. Shore Ry. Co. v. Tyrrell*, 98 S.W.2d 786, 793 (Tex. 1936) (noting that "[i]f the petitioner in condemnation claims the fee title to the property, his petition should be dismissed" because "[u]nless title in the condemnee is admitted the county court is without jurisdiction" (quoting *McInnis v. Brown Cnty. Water Improvement Dist. No. 1*, 41 S.W.2d 741, 744 (Tex. Civ. App.—Austin 1931, writ ref'd))); *see also Wisc. Valley Improvement Co. v. FERC*, 236 F.3d 738, 743–44 (D.C. Cir. 2001) (observing that plaintiff could try its title claims in either state court or a federal district court and, if successful, could then pursue a takings claim in the Court of Federal Claims); 2 NICHOLS ON EMINENT DOMAIN § 5.02 [2][b] (3d ed. 2010) ("If petitioners claim title to the land they wish to occupy, a petition for condemnation is not the proper proceeding to institute for the purpose of trying the question."). We have long recognized that "there is irreconcilable inconsistency between an allegation by the condemnor of the entire title, or a paramount title, in himself, and the taking of the property of another by the proceeding; that condemnation rests upon necessity, and there can be no necessity to acquire what one already owns." *Tyrrell*, 98 S.W.2d at 794.

Second, authorizing a takings claim to determine title, when the Department has merely asserted ownership, evades statutory trespass-to-try-title requirements. A trespass-to-try-title suit is generally the only way to resolve contested title claims, even when its requirements have sometimes produced harsh results. TEX. PROP. CODE § 22.001(a); *Martin v. Amerman*, 133 S.W.3d

[6] *See* ___ S.W.3d at ___ (noting that the Department "has not done anything that would require it to compensate the Trust if the streambed is not navigable").

262, 265 (Tex. 2004). Whether such strictures are good policy[7] is a question for the Legislature, not the courts. Allowing a party to litigate title through a takings claim will essentially override these statutory requirements.

Third, the dissent would hold that a takings claim is viable when the government imposes severe penalties for an individual's legitimate assertion of title. At what point are penalties so severe that a takings action is authorized? A proliferation of lawsuits on "severity" is the predictable consequence of the dissent's approach. Even if the severity of a financial penalty could be defined, rarely will a case arise in which a criminal sanction does not accompany the theft of state property. And even if there were such a case, a landowner would be forced to sell natural resources at its peril, subject to a conversion claim the State *might* bring. How can a party manage its property without knowing whether it will be subject to liability for doing so?

The issue here is not whether the Department has taken Trust property but who owns the property in the first place. Answering that question will resolve this case, and under longstanding precedent, an ultra vires action—not a takings claim—is the appropriate vehicle for doing so.

OPINION DELIVERED: August 26, 2011

[7] *See, e.g.*, William V. Dorsaneo, III, *Dorsaneo on Trespass to Try Title Actions,* Martin v. Amerman, *and H.B. 1787*, 2008 EMERGING ISSUES 759, at *1 (Oct. 17, 2007) (asserting that "it is past time for the abolition of trespass to try title actions as the exclusive method of determining land title disputes generally").

IN THE SUPREME COURT OF TEXAS

NO. 07-0945

TEXAS PARKS AND WILDLIFE DEPARTMENT, PETITIONER,

v.

THE SAWYER TRUST, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE SEVENTH DISTRICT OF TEXAS

JUSTICE HECHT, concurring in part and dissenting in part.

By today's decision, the Court abolishes the State's immunity from suit to determine title to real property. All the plaintiff must do is name some state official as the defendant. The suit proceeds as against a private defendant. Of course, naming a state official instead of the State is a complete fiction. For all practical purposes, the suit is against the State. If the plaintiff's claim is superior to the State's, as advocated by the state official, the plaintiff wins, and the State is bound by the judgment.

In the Court's view, repeated in the concurring opinion, the State has *never* been immune from suit over real property, having announced that ruling fifty years ago in *State v. Lain*.[1] It is difficult to take this view seriously. For one thing, if it were true, then we should have granted this petition for review when it was first filed and reversed and remanded in a two-page per curiam

[1] 349 S.W.2d 579, 582-583 (Tex. 1961).

opinion, as we ordinarily would whenever the court of appeals has ruled directly contrary to an opinion of this Court. Instead, we requested full briefing, denied the petition, granted rehearing, requested more briefing, heard argument, and struggled with the issues. That's a lot of work to apply law that has been settled for fifty years ago.

Moreover, the courts of appeals have been divided in their view of *Lain*, with one reading that decision narrowly,[2] and three construing it more broadly.[3] *Lain* unquestionably allows suit against a government official when suit against the government itself would be barred. Less clear is whether, to prevail in a suit against a government official, the plaintiff must prove only that the official is in error in asserting a claim to property on behalf of the government, which is all the plaintiff would be required to prove against a private defendant, or whether the plaintiff must prove more: either that the official abused his discretion in asserting his claim, or that he had no discretion to assert the claim, or that he had no power to act at all. Only because the Court holds today that a plaintiff's burden of proof against a public official is no different than in a suit against a private individual, and the government is bound by a judgment against its officer, does it follow that the government has no immunity from suit.

It is difficult to square the Court's broad reading of *Lain* with its much narrower holding

[3] *Fleming v. Patterson*, 310 S.W.3d 65, 70 (Tex. App.–Corpus Christi-Edinburg 2010, no pet.); *State v. BP Am. Prod. Co.*, 290 S.W.3d 345, 356-357 (Tex. App.–Austin 2009, pet. denied); *Porretto v. Patterson*, 251 S.W.3d 701, 711 (Tex. App.–Hous. [1st Dist.] 2007, no pet.); *Texas Parks and Wildlife Dep't v. Callaway*, 971 S.W.2d 145, 152 (Tex. App.–Austin 1998, no pet.); *Bell v. State Dep't of Highways and Pub. Transp.*, 945 S.W.2d 292, 295 n.1 (Tex. App.–Hous. [1st Dist.] 1997, pet. denied).

recently in *City of El Paso v. Heinrich*.[4] There we allowed suit against a city pension fund's trustees in their official capacity for acting *ultra vires* in denying the plaintiff's claim for benefits even though the city, the fund, and the board were all immune from suit.[5] But "[t]o fall within this *ultra vires* exception," we held, "a suit must not complain of a government officer's exercise of discretion, but rather must allege, and ultimately prove, that the officer acted without legal authority or failed to perform a purely ministerial act."[6] 2Because of this restriction, an *ultra vires* suit is an "exception" to the government's immunity from suit; it does not destroy immunity from suit.

Today — *and for the first time* — the Court allows a plaintiff to sue a government official for title to property, and recover in practical effect against the government itself, proving no more than would be required in a suit against a private defendant. The only remaining immunity from suit is in name only: the government cannot be sued, but its actors can. Why this should be — or as the Court believes, should always have been — the rule for title suits but not for suits for pension benefits, like *Heinrich*, for example, is not clear. Why the government's immunity from suit in tort and contract should be absolute, subject only to statutory waiver, its immunity from suit for the unauthorized actions of its agents should be subject to the narrow *Heinrich* exception, and its immunity from suit over title to real property should be nonexistent is a puzzle to which the Court is strangely oblivious.

I agree with the Court that respondent's declaratory judgment claim fails. In my view, the

law affords a practical solution for settling title disputes with the government that preserves immunity while providing a resolution of serious issues. When the government is met with a claim of ownership contrary to its own that it considers serious, it can sue for a resolution, thus waiving immunity. It would be required to sue to protect its own interests. When the government considers its own possible claim not worth asserting, the individual claimant has the property. But when the government claims immunity from suit over title, refuses to sue for a resolution of the dispute, and imposes criminal penalties on the individual claimant for treating the property as his own, the government has removed itself from the proper scope of immunity. In that situation, I would permit the individual claimant to sue for a taking, for which the government has no immunity.

At bottom, I would allow the government to preserve its immunity from suit but would preclude it from making that immunity absolute. Because the Court chooses to abolish immunity altogether, I respectfully dissent.

I

The parties agree that if the Salt Fork of the Red River is "navigable", a term that by statute refers to "a stream which retains an average width of 30 feet from the mouth up",[7] the State owns the bed on the Sawyer Trust ranch; if not, the Trust owns it.[8]

> The bed of a stream is that portion of its soil which is alternatively covered and left bare as there may be an increase or diminution in the supply of water, and which is adequate to contain it at its average and mean stage during an entire year, without

[7] TEX. NAT. RES. CODE § 21.001(3).

[8] *See State v. Bradford*, 50 S.W.2d 1065, 1069 (Tex. 1932) ("The rule long has been established in this state that the state is the owner of the soil underlying the navigable waters, such as navigable streams, as defined by statute . . . ."). The Department also contends that the Salt Fork on the Trust's property is governed by the "Small Bill", TEX. REV. CIV. STAT. ANN. art. 5414a-1, which grants title to the beds of certain "water courses or navigable streams.

> reference to the extra freshets of the winter or spring or the extreme drouths of the summer or autumn. . . . [The bed] include[s] all of the area which is kept practically bare of vegetation by the wash of the waters of the river from year to year in their onward course, although parts of it are left dry for months at a time . . . .[9]

Determining whether the Salt Fork is "navigable" is not an easy matter. It rises in the Texas Panhandle near Amarillo and flows southeastward some fifty miles to Greenbelt Lake, just north of Clarendon, then extends another hundred miles or so across Texas and Oklahoma to its mouth in the Prairie Dog Town Fork of the Red River.[10] The Salt Fork crosses the Trust's property just below the Greenbelt Lake dam. No water flows there, except in floods. Even before the dam was built in 1966, there was never enough water in the Salt Fork on the Trust property for regular use.[11]

In 2006, the Trust contracted for the mining of sand and gravel from the dry streambed. But removal of such materials from the bed of a navigable stream requires a $1,200 permit[12] issued by

the Texas Parks and Wildlife Department, which may be subject to various conditions.[13] The permittee must also post a bond[14] and pay royalties.[15] The Trust's contractor inquired of the State whether it claimed that the Salt Fork is navigable. When the State would not take a position one way or the other, the Trust sued the Department for a declaration that the Salt Fork is non-navigable. The Department asserted immunity,[16] still refusing to take a position on navigability, but after a hearing before the district court, it agreed to arrange for the Director of Surveying of the Texas General Land Office to visit the Trust property. He found that all water channels on the property were dry but that at one point the riverbed was 330 feet wide. Based on his brief observations at the site and his review of a few unspecified field notes from the original surveys, he concluded that the Salt Fork is navigable.[17] The trial court refused to dismiss the case, and the court of appeals

[17] I quote the report of the Director of Surveying in full:

> Report of Inspection
> Salt Fork of the Red River
> Donley County, Texas
>
> A visit was made to the Salt Fork of the Red River in Donley County on August 22, 2006, for the purpose of determining if the stream was statutorily navigable. The inspection was made at a point approximately 4.7 miles north of Clarendon and less than one mile downstream from the dam creating Greenbelt Lake. Bob Sweeney, an attorney for the Parks & Wildlife Department, and I met with the landowner, a Mr. Sawyer, and his surveyor, Maxey Sheppard, LSLS.
>
> The Salt Fork of the Red River is a "Small Bill" stream. All of the original land surveys in the vicinity cross the river

affirmed.[18]

II

I agree with the Court that the Trust's suit against the Department to determine title to the bed of the Salt Fork is barred by immunity.[19] In *State v. Lain*, we held that "[w]hen in this state the sovereign is made a party defendant to a suit for land, without legislative consent, its plea to the jurisdiction of the court based on sovereign immunity should be sustained in limine."[20] For the reasons the Court explains, the State's immunity from land claims is not waived by the Declaratory

---

even though, in the vicinity of the inspection site, the stream bed widths recited in the patent field notes for the original surveys vary from a minimum of 70 varas (194 feet) to as much as 453.5 varas (1260 feet) and at a point 5 miles west, above Greenbelt Lake, there is a reported width of 463 varas (1286 feet).

The inspection point on the river was in the vicinity of the southwest corner of G.C. & S.F. Ry. Co. Survey No.7, Abstract No. 282, in the east line of the Socorro Irrigation Co. Survey No.5, Abstract No. 238. Aerial photography indicates that, at this point, the river is separated into two channels by a rather large island. Only the north channel was inspected.

As with many high plains streams, the Salt Fork of the Red River is a wide sand-bed river with numerous channels lying between the river banks. The area of inspection was less than one mile below the dam creating Greenbelt Lake and at this point the riverbed is dry except when occasional releases are made from the lake. The riverbed at the point of inspection is vegetated from bank to bank but not with typical upland vegetation. The banks of the stream are well defined on both sides of the bed. There exist at least three separate water channels between the banks but all of them are dry at this time. The portion of the riverbed north of the island at the point of inspection was found to be approximately 330 feet in width.

Based on the above-recited observations, it is my opinion that the Salt Fork of the Red River is a statutorily navigable stream at this point.

Judgment Act.[21] Immunity in this context serves important purposes. It preserves the separation of powers between the Legislative and Judicial Departments by limiting courts' authority to decide policy matters that may attend disputes over the State's ownership of property.[22] Immunity also respects the Executive Department's authority and discretion to handle property dispute issues on a consistent and comprehensive basis. In this case, for example, a decision on the navigability of the Salt Fork would have ramifications for other landowners, not only up and down the Salt Fork, but adjacent other streams as well. And immunity protects the State from the burdens of litigation that would require diversion of limited revenues from other purposes considered more important.

I also agree that immunity would not bar an *ultra vires* action by the Trust against an appropriate official for asserting the State's ownership of the bed contrary to law. Again, *Lain* holds:

> Well reasoned and authoritative decisions of the Supreme Court of the United States and of the courts of this state support the view that a plea of sovereign immunity by officials of the sovereign will not be sustained in a suit by the owner of land having the right of possession when the sovereign has neither title nor right of possession.[23]

We recently reconfirmed in *City of El Paso v. Heinrich* that *ultra vires* actions are permissible,[24] but history teaches that the line between such actions and actions for which the government retains

[21] *Ante* at ___.

[22] *See Federal Sign v. Tex. S. Univ.*, 951 S.W.2d 401, 413-415 (Tex. 1997) (Hecht, J., concurring) (stating that the decision whether to waive immunity from suit on a contract "involves policy choices more complex than simply waiver of immunity" and that "the Legislature . . . is better suited to deciding the kinds of political issues that . . . attend claims against the State").

[23] *Lain*, 349 S.W.2d at 581.

[24] *Heinrich*, 284 S.W.3d at 371.

immunity is hard to draw. The specific Supreme Court decision to which *Lain* referred was *United States v. Lee*,[25] in which the Court, 5-4, upheld a suit against federal officials to void the seizure of General Robert E. Lee's wife's Arlington estate for nonpayment of $92.07 taxes after it had been sold to the United States for $26,800 for use as a national cemetery. *Lee* was the most celebrated case of several over many years in which the Court attempted to set out exactly when a suit for land from which the United States is immune could be brought against a government official. Toward the end of this exercise, the Court admitted that it had been "inconsistent"[26] in determining whether to allow "officer suits", observing that "it is fair to say that to reconcile completely all the decisions of the Court in this field . . . would be a Procrustean task."[27]

Eventually, the Supreme Court "cut through the tangle" of its decisions and applied to land disputes the general rule it had announced for officer suits in *Larson v. Domestic & Foreign Corp.*:[28]

> the action of a federal officer affecting property claimed by a plaintiff can be made the basis of a suit for specific relief against the officer as an individual only if the officer's action is not within the officer's statutory powers or, if within those powers, only if the powers, or their exercise in the particular case, are constitutionally void.[29]

The difficulty with respect to land disputes evaporated with Congress' passage of the Quiet Title Act

of 1972,[30] which waived the federal government's immunity from suits for land under certain conditions but also "provide[d] the exclusive means by which adverse claimants [can] challenge the United States' title to real property.[31]

The Texas Legislature has not acted similarly to free us of the continuing struggle to determine when government officers may be sued though the government is immune. We held in *City of El Paso v. Heinrich* that an *ultra vires* suit is permitted when a government official has acted contrary to a statute requiring him to "perform[] in a certain way, leaving no room for discretion".[32] This rule may not be as restrictive as the rule in *Larson*, as its application depends on the difficult decision of what is properly within an official's discretion and what lies beyond. Locating the banks of a stream to determine navigability may[33] or may not[34] involve discretion; determining from a single measurement and a few surveys that "a stream retains an average width of 30 feet from the mouth up"[35] may be an abuse of discretion. But we cannot decide these issues here because the Trust has not brought an *ultra vires* action. The Department insists that a discretionary determination was made and that any *ultra vires* action the Trust may assert will fail. The Court

[35] TEX. NAT. RES. CODE § 21.001(3).

removes that argument by holding that an appropriate state official may be sued, just as a private person would be, and judgment rendered against the State.

III

The Department contends that there are only two ways for the Trust to challenge the State's assertion of ownership of the Salt Fork bed. One is for the Trust to seek permission from the Legislature to sue.[36] The Department concedes that this may be difficult, citing only one instance in which the Legislature has ever granted consent in similar circumstances.[37] But it argues that the difficulty is justified by the important purposes immunity serves.

The Trust's only other alternative, the Department contends, is to proceed with its mining plans and risk the consequences. This is not simply a dare. The Department might reconsider its claim of ownership or otherwise decide to take no action against the Trust. Or the Department might sue for damages, in which case it would not be immune from the Trust's counterclaim to determine title.[38] The Department would have to determine whether its claim was strong enough to justify losing—the expense of litigation as well as the ramifications of an adverse decision. If the Department prevailed on a claim for common-law conversion, the Trust would be liable, if it acted in good faith, for only the net value of the property taken, and if it did not act in good faith, for the

---

[37] *Brainard*, 12 S.W.3d at 10.

[38] *Reata Constr. Corp. v. City of Dallas*, 197 S.W.3d 371, 375-376 (Tex. 2006) ("[I]t would be fundamentally unfair to allow a governmental entity to assert affirmative claims against a party while claiming it had immunity as to the party's claims against it."); *Anderson, Clayton & Co. v. State*, 62 S.W.2d 107, 110 (Tex. 1933) ("[W]here a state voluntarily files a suit and submits its rights for judicial determination it will be bound thereby and the defense will be entitled to plead and prove all matters properly defensive. This includes the right to make any defense by answer or cross-complaint germane to the matter in controversy.").

gross value of the property and the Department's expenses in recovering it.[39] The Trust would not be liable for punitive damages unless it acted with malice.[40] The Trust would have to evaluate whether the strength of its claim justified its exposure or whether it would be to its benefit in the long run to apply for a permit and pay the State a royalty. A Department-initiated suit for conversion presenting roughly correlative risks to each side preserves immunity and the purposes its serves while providing a viable mechanism for resolving the ownership dispute.

But conversion would not be the only action available to the Department, nor would the Trust's risk be limited to common-law damages. By statute, a person who removes sand and gravel belonging to the State without a permit may also be liable for consequential damages[41] as well as "a civil penalty of not less than $100 or more than $10,000 for each act of violation and for each day of violation".[42] Further, mining the State's sand and gravel without a permit is a crime[43] punishable

[41] TEX. PARKS & WILDLIFE CODE § 86.023 "A person who takes marl, sand, gravel, shell, or mudshell under the jurisdiction of the commission in violation of this chapter or a rule adopted under this chapter is liable to the state for the value of: (1) the material taken; and (2) any other natural resource under the department's jurisdiction that is damaged or diminished in value.").

[42] *Id*. § 86.024.

[43] *Id*. § 86.022 ("A person who violates Section 86.002 [that is, mines sand and gravel without a permit] . . . commits an offense that is a Class C Parks and Wildlife Code misdemeanor.").

by a fine of $25 to $500 per day.[44] With the addition of these statutory civil and criminal penalties, the State has gone to some lengths to discourage any provocation for it to litigate ownership disputes.

The Trust argues for a third alternative: a suit for a taking of its property without compensation in violation of article I, section 17 of the Texas Constitution. The Department acknowledges that it is not immune from such suits but argues that the Trust cannot sue for a taking in this situation. The Court agrees for what I take to be three reasons.

First, the Court notes that "the State has not expressed an intent to take property belonging to the Trust [but] . . . has merely identified the streambed as belonging to the State".[45] But to say that the State is claiming only what it owns obviously begs the question. The Department argues that the government cannot have the intent to take property necessary to trigger a constitutional right to compensation as long as it reasonably believes it owns the property, but the Court does not even require that government's belief be reasonable. And this case illustrates what the Department means by reasonable belief: from one measurement of the dry riverbed on the Trust's property and a few unidentified field notes, one can infer that the Salt Fork has an average width of thirty feet from the mouth up. With no more basis than that, the Department's assertion of ownership is little more than a grab. The rule the Court implicitly applies is that the State never takes something it claims to own, however unfounded the claim may be. The government cannot avoid its constitutional responsibility

---

[44] *Id.* §§ 12.406 ("An individual adjudged guilty of a Class C Parks and Wildlife Code misdemeanor shall be punished by a fine of not less than $25 nor more than $500."); 86.002(b) ("Each day's operation in violation of this section constitutes a separate offense.").

[45] *Ante* at ___.

simply by wishful thinking.

Second, the Court states that "[t]he Trust's suit is an action to determine whether it owns the streambed, not one for compensation".[46] But the fact that the Trust *has not sued* for compensation to date does not mean that it *cannot sue* for a taking in this situation. The Trust *has not sued* a state official, yet the Court explains at length that the Trust *could* bring an *ultra vires* action. There is no less reason to consider whether the Trust *could sue* the Department for a taking if it asserted a claim for compensation. This case is not about pleadings; it is about immunity.

Third, the Court argues that "[a]llowing the Trust's claim of title to be adjudicated by means of a takings claim would sanction claimants' circumventing the State's sovereign immunity by . . . [c]reative pleading . . . ."[47] But it may just as well be said that allowing the State to assert immunity from a takings suit merely because it claims title would sanction the State's circumvention of its constitutional responsibility. If a takings claim—which the Department concedes immunity would not bar—can be asserted even though title is disputed, then its assertion cannot be dismissed as creative pleading.

Not only does the Court offer no persuasive reason for holding that the Trust has no takings claim,[48] it allows a contrary result in a similar case to stand by denying the petition for review today

---

[46] *Ante* at ___.

[47] *Ante* at ___.

[48] The Department also argues that if the Trust had a constitutional claim, it would be for a regulatory taking because the Trust's only complaint is that it must obtain a permit for its proposed mining operations. "Physical possession is, categorically, a taking for which compensation is constitutionally mandated, but a restriction in the permissible uses of property or a diminution in its value, resulting from regulatory action within the government's police power, may or may not be a compensable taking." *Sheffield Development Co., Inc. v. City of Glenn Heights*, 140 S.W.3d 660, 669-670 (Tex. 2004) (footnote omitted). The Department contends that because the Trust has not pleaded and cannot show that the permit requirement severely impacts the value of the property, it has no regulatory takings claim.

in *Koch v. Texas General Land Office*.[49] There, Koch sued the General Land Office for taking limestone from her land for highway construction. The State claimed ownership of the limestone because its 1926 land patent to Koch's predecessor reserved "[a]ll of the minerals", despite our holding in a 1949 case that ordinary limestone is not a mineral.[50] The GLO argued that the rule in that case should not apply retroactively or to the State, that it therefore had a colorable claim to the limestone, and that "if the State believes it is the owner of property, its use of that property cannot be an intentional act to take the property of another."[51] The court rejected this Cartesian *credo ergo capio* argument:

> We are not persuaded that the State's subjective belief regarding its title to property, by itself, changes or dictates the capacity in which the State acts. . . . When a plaintiff alleges a state taking of property and title to that property is in dispute, the State cannot evade its constitutional obligations merely by asserting that it "believes" it is acting as landowner rather than as sovereign regardless of whether that belief is, in fact, accurate. Otherwise, the State would be in the position of unilaterally determining the outcome of takings disputes simply by declaring a subjective belief —whether right or wrong—that it thought it owned the property.[52]

The court noted that two other courts had held that a dispute over the ownership of property does

---

See id. at 672-673. But the disagreement between the Trust and the Department is over ownership of the riverbed, not the requirement of a permit to mine it. This is not a regulatory takings case.

[49] 273 S.W.3d 451 (Tex. App.–Austin 2008, pet. denied).

[50] *Heinatz v. Allen*, 217 S.W.2d 994, 997 (Tex. 1949) ("In our opinion substances such as sand, gravel and limestone are not minerals within the ordinary and natural meaning of the word unless they are rare and exceptional in character or possess a peculiar property giving them special value, as for example sand that is valuable for making glass and limestone of such quality that it may profitably be manufactured into cement. Such substances, when they are useful only for building and road-making purposes, are not regarded as minerals in the ordinary and generally accepted meaning of the word.").

[51] *Koch*, 273 S.W.3d at 458.

[52] *Id*. at 458-459.

not preclude a suit for its taking.[53]

Koch and the present case are quite similar. The ownership issue in *Koch* was purely legal: what did "mineral" mean in the State's land patent. The ownership issue in the present case may be partly legal— what standards govern the measurements made to determine navigability—and partly factual—the actual measurements themselves. But the basic nature of the issues in the two cases is the same. In both cases, the State argues that it cannot take property it reasonably believes it owns, but the bases for its belief are shaky: in *Koch* it claims that limestone is a mineral in the face of a contrary decision from this Court, and in the present case it claims that the Salt Fork is thirty feet wide on average, source to mouth, on the strength of one measurement and some unidentified notes. And although Koch sued for damages while the Trust has sought only declaratory and injunctive relief, nothing would prevent the Trust from adding a claim for damages.

In *Koch*, the State actually removed the limestone, while here, the State has only asserted that the Trust cannot remove sand and gravel without a permit. But in both cases, the State claims ownership of the property in issue. A permit to remove sand and gravel is required, not for the purpose of regulating a landowner's use of his own property, but to protect the State's right to its property. The imposition of a royalty in connection with the permit is based on the State's ownership of the material being mined. The State claims the right to remove sand and gravel from the Trust ranch, just as it removed limestone from Koch's property, only it has not yet chosen to

[53] *Id*. (citing *Porretto v. Patterson*, 251 S.W.3d 701, 709-710 (Tex. App.–Houston [1st Dist.] 2007, no pet.) (holding that a person claiming ownership of property could sue the State for a taking for having leased it); *Kenedy Mem'l Found. v. Mauro*, 921 S.W.2d 278, 282 (Tex. App.–Corpus Christi 1995, writ denied) (holding that immunity did not bar a takings claim merely because the State disputed the plaintiff's ownership of the property). This Court later noted in *Kenedy*, however, that the State's immunity had been waived by statute. *Kenedy Mem'l Found. v. Dewhurst*, 90 S.W.3d 268, 289 & n.71 (Tex. 2002).

exercise that right. At bottom, this distinction in the two cases is one without a difference.

In my view, an action for a constitutionally compensable taking of property is not precluded merely by a dispute between the claimant and the government over ownership of the property. To hold otherwise would allow the government to avoid its constitutional obligation whenever it chose to do so. Nor do I think a takings action can be precluded when the government's belief in its right to the property is colorable or even reasonable. Such a rule would depreciate the constitutional right too much. On the other hand, to hold that the government's claim to property may always be challenged in a takings action would vitiate the rule of *Lain*, that the government is immune from such suits, and abolish any need for *ultra vires* actions. It is not necessary to go that far in this case.

The dilemma presented here results not from the State's assertion of immunity as a shield to prevent being drawn into litigation, but its use as a sword to discourage all claims to streambeds. By imposing statutory damages and civil and criminal penalties for mining a streambed without a permit, the State has all but prohibited a claimant from acting on a right asserted in good faith and risking the consequences in an action brought by the State. Legislative consent to sue for title is thus made virtually absolute. The effect is to shift authority for determining whether the State has taken a person's property without compensation from the Judicial Department to the Legislative Department, in violation of the fundamental principle that it is for the courts to decide what the constitution requires.[54] In these circumstances, I would hold that a takings action must be allowed. If the State loses that action, it must pay for property it might prefer not to have. Thus as a practical matter, the availability of a takings action forces the State to consider more carefully the strength

[54] *Marbury v. Madison*, 5 U.S. (1 Cranch) 137 (1803).

of its claim. The State may statutorily increase the punishment for conversion, but it does so at the risk of incurring damages for insubstantial claims of ownership.

* * *

For these reasons, I would hold that the Trust may assert a claim for compensation against the Department under article I, section 17 of the Constitution. From the Court's decision to waive the State's immunity completely, I respectfully dissent.

Nathan L. Hecht
Justice

Opinion delivered: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0172

TEXAS COMPTROLLER OF PUBLIC ACCOUNTS, PETITIONER,

v.

ATTORNEY GENERAL OF TEXAS AND THE DALLAS MORNING NEWS, LTD., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued September 10, 2009

CHIEF JUSTICE JEFFERSON delivered the opinion of the Court, joined by JUSTICE MEDINA, JUSTICE GREEN, JUSTICE GUZMAN, and JUSTICE LEHRMANN.

JUSTICE WAINWRIGHT delivered a dissenting and concurring opinion, joined by JUSTICE JOHNSON.

JUSTICE HECHT and JUSTICE WILLETT did not participate in the decision.

Invoking the Texas Public Information Act (PIA), the Dallas Morning News sought a copy of the Comptroller's payroll database for state employees. *See* TEX. GOV'T CODE ch. 552. The Comptroller responded with the full name, age, race, sex, salary, agency, job description, work address, date of initial employment, pay rate, and work hours for each employee. But the Comptroller withheld dates of birth as protected under Government Code section 552.101, which excepts from disclosure "information considered to be confidential by law, either constitutional,

statutory, or by judicial decision."[1] *Id*. § 552.101. She then sought the Attorney General's opinion on whether those dates must be disclosed. *Id*. § 552.301. In a comprehensive response, the Attorney General's letter ruling referenced not only section 552.101, but also section 552.102's personnel file exemption, which protects the privacy rights of government employees.

> In addition to [section 552.101], the Act also provides specific protection for the privacy rights of government employees. *See* Gov't Code § 552.102(a). Section 552.102 of the Government Code excepts from disclosure "information in a personnel file, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." *Id.* . . . The limitation of a "clearly unwarranted invasion of personal privacy" requires a balance between the protection of an individual's right of privacy and the preservation of the public's right to government information. *See Hubert v. Harte-Hanks Tex. Newspapers, Inc.*, 652 S.W.2d 546, 551 n.8 (Tex.App.-Austin 1983, writ ref'd n.r.e.) (establishing test for privacy under exception; citing *Dept. of the Air Force v. Rose*, 425 U.S. 352, 378 n.16).

Tex. Att'y Gen. OR2006-01938, at 2.[2]

In the same opinion, the Attorney General discussed the growing problem of identity theft and described how birth dates, particularly when utilized with other data, facilitate that crime. He noted that "a majority of the fifty states protect date of birth information in government employee personnel files." *Id*. at 3. Ultimately, however, the Attorney General concluded that there was no proof "that harmful financial consequences will result from the release of the date of birth information in response to this request." *Id. at* 4. He left open the possibility that "based on a

---

[1] The Comptroller also asserted that the information was protected under section 552.108, which excepts from disclosure certain law enforcement, correction, and prosecutorial information. TEX. GOV'T CODE § 552.108. That exception is not at issue here.

[2] Like all Open Records Letter Rulings, this one was signed by an assistant attorney general in the Open Records Division. *See* OPEN RECORDS LETTER RULINGS, ATTORNEY GENERAL OF TEXAS, https://www.oag.state.tx.us/open/index_orl.php.

presentation of new facts and additional arguments, . . . it is possible that Texas could join the growing number of states that protect from disclosure broad-based requests for date of birth information." *Id*.

The trial court and the court of appeals sided with the Attorney General. 244 S.W.3d 629. The Comptroller has petitioned this Court, and we must now decide if the PIA requires redaction of birth dates. In the course of answering that question, we must also decide whether, to protect 144,000 state employees whose privacy interests would otherwise be compromised,[3] we may consider an argument that the Comptroller presented expressly in the trial court and the court of appeals, but only tangentially here. For reasons expressed by the Attorney General in an earlier phase of this litigation, we conclude that the Comptroller properly withheld birth dates. We hold that, under the unique circumstances presented here, the questions the Comptroller has presented fairly include an argument that the privacy interest of the state's employees must be protected under the personnel-file exception. We reverse in part and affirm in part the court of appeals' judgment.

I. Procedural history

After the Attorney General issued his letter, the Comptroller, represented by the Attorney General, sued the Attorney General and sought a declaration that birth dates were excepted from disclosure. The Comptroller asserted that the Attorney General failed to apply the appropriate standards for employee privacy rights under both sections 552.101 and 552.102. The News

[3] According to the U.S. Census Bureau, as of March 2008, there were 257,830 full-time and 78,625 part-time employees of the State of Texas. 2008 ANNUAL SURVEY OF STATE AND LOCAL GOVERNMENT EMPLOYMENT AND PAYROLL, U.S. CENSUS BUREAU, *available at* http://www2.census.gov/govs/apes/08sttx.txt. (all Internet materials as visited December 1, 2010 and copy available in Clerk of Court's file). According to the Comptroller, around 144,000 employees working for state agencies in Texas would be affected by the Public Information Act request.

intervened and moved for summary judgment, as did the Comptroller. The trial court granted the News' motion (although it denied the News' request for attorney's fees) and denied the Comptroller's. The court of appeals affirmed. 244 S.W.3d 629.

In the trial court and the court of appeals, the Comptroller argued that section 552.102's personnel file exemption applied. Citing *Hubert v. Harte-Hanks Tex. Newspapers, Inc.*, 652 S.W.2d 546 (Tex.App.-Austin 1983, writ ref'd n.r.e.), however, the Comptroller contended that the test was the same under either section 552.101 or 552.102. The Attorney General agreed. The court of appeals, although noting the Comptroller's arguments under both sections 552.101 and 552.102, appears to have considered only section 552.101. 244 S.W.3d 629, 633, 635. We granted the petitions for review. 52 Tex. Sup. Ct. J. 377 (Feb. 27, 2009).[4]

II. The third party privacy interests persuade us to consider the section 552.102 exception that the Comptroller abridged from her argument in this Court.

Although his opinion letter cited a balancing test for determining whether birth date information falls within section 552.102's personnel file exception, neither the Attorney General nor the Comptroller (represented by the Attorney General) now contends that a balancing test is appropriate. Instead, before and since that letter, and based solely on the court of appeals' decision in *Hubert*, the Attorney General says that the test for information excepted from disclosure under section 552.102 is identical to that under section 552.101. *See, e.g.*, Tex. Att'y Gen. OR2010-01791, at 3 ("In *Hubert*, the court ruled that the test to be applied to information claimed to be protected

[4] The Texas Association of School Boards Legal Assistance Fund submitted an amicus curiae brief in support of the Comptroller; the Freedom of Information Foundation of Texas and the Reporters Committee for Freedom of the Press submitted an amici curiae brief in support of the Attorney General and the News.

under section 552.102 is the same as the test formulated by the Texas Supreme Court in *Industrial Foundation*, for information claimed to be protected under the doctrine of common-law privacy as incorporated by section 552.101. Accordingly, we will consider your privacy claims under sections 552.101 and 552.102(a) together.") (citations omitted); Tex. Att'y Gen. OR2005-11671, at 4 (same); Tex. Att'y Gen. OR2005-00721, at 3 (same); ATTORNEY GENERAL OF TEXAS, PUBLIC INFORMATION 2010 HANDBOOK 81 (noting that "[t]he court in *Hubert v. Harte-Hanks Texas Newspapers, Inc.* ruled that the test to be applied under section 552.102 is the same as the test formulated by the Texas Supreme Court in *Industrial Foundation* for applying the doctrine of common law privacy as incorporated by section 552.101" and "[c]onsequently, in claiming that information is excepted from public disclosure under section 552.102, a governmental body should not rely upon decisions interpreting this provision that predate the *Hubert* decision").

In this Court, the Comptroller no longer presses the section 552.102 argument, although her petition for review cites state and federal cases holding that disclosure of dates of birth would be a "clear invasion of personal privacy"—similar to the section 552.102 standard ("clearly unwarranted invasion of personal privacy"). The petition also notes that "[a] majority of the fifty states now exempt[s] date of birth from disclosure when an open records request is made for the personnel files of government employees"; that "[s]everal states protect the information under an 'unwarranted invasion of personal privacy' exemption"; and that "[o]ther states protect date of birth as part of an exception for employee personnel records." The Comptroller cites an analogous case under the Freedom of Information Act's (FOIA) Exemption 6 (the federal personnel policy exemption), as well as a Delaware attorney general opinion determining that public release of the dates of birth of all

state employees would constitute an invasion of personal privacy under that state's personnel file exception. *See* Del. Op. Att'y. Gen. No. 94-I019 (1994). We find it difficult to ignore these citations, even in light of the Comptroller's statement at argument that she was no longer pursuing a section 552.102 exemption.

Given the unique circumstances of this case and the third party interests at stake, we conclude that the Comptroller's petition "fairly include[s]" an argument that section 552.102 applies. TEX. R. APP. P. 53.2(f); *see also Pub. Utils. Comm'n v. Cofer*, 754 S.W.2d 121, 124 (Tex. 1988) (observing that, "in our adversary system, a court has not only the power but the duty to insure that judicial proceedings remain truly adversary in nature"). This comports with the steps taken by the Legislature to protect third party privacy interests in PIA matters. For example, although a governmental body waives any exception to disclosure it fails to raise before the attorney general, that rule is inapplicable when the exception "involv[es] the property or privacy interests of another person." TEX. GOV'T CODE § 552.326. And before disclosure, a governmental body must "make a good faith attempt to notify" a person whose "proprietary information may be subject to exception under Section 552.101, 552.110, 552.113, or 552.131."[5] *Id.* § 552.305.

Cases interpreting the federal Act support a similar construction. The Supreme Court has made it clear that FOIA Exemption 6 protects the privacy interest belonging to the individual. *See DOJ v. Reporters Comm. for Freedom of the Press*, 489 U.S. 749, 763 (1989) ("[B]oth the common law and the literal understandings of privacy encompass the individual's control of information

[5] Although the Comptroller asserted that dates of birth were exempt from disclosure under section 552.101, there is no indication that written notice was provided to the state employees whose data would be disclosed. The News states that no notice was given, and the Comptroller does not argue to the contrary.

concerning his or her person."); *Sherman v. U.S. Dep't of the Army*, 244 F.3d 357, 363 (5th Cir. 2001) ("The Supreme Court has explained that the privacy interest at stake in FOIA exemption analysis belongs to the individual, not the agency holding the information."). In *August v. Federal Bureau of Investigation*, 328 F.3d 697, 702 (D.C. Cir. 2003), the court remanded for consideration of additional exemptions from disclosure because, although the government generally waives any FOIA exemption it fails to raise in initial proceedings, "the Government's failure . . . resulted from human error, because wholesale disclosure would pose a significant risk to the safety and privacy of third parties, and because the Government has taken steps to ensure that it does not make the same mistake again, we see this case as inappropriate for the rigid 'press it at the threshold, or lose it for all times' approach." That court pointed out that third parties, who "bear no responsibility for the Government's litigation strategy," should not "pay for the Government's [failure to raise the applicable exemptions]." *August*, 328 F.3d at 701; *see also Joseph W. Diemert, Jr. & Assocs. Co. v. FAA*, 218 F.App'x 479, 482 (6th Cir. 2007) ("[S]ome courts have concluded that where personal privacy interests are implicated, only the individual who owns such interest may validly waive it."). In another case, the court observed that, although an agency generally waives any exemption it fails to raise at the initial proceedings, "in certain FOIA cases where the judgment will impinge on rights of third parties that are expressly protected by FOIA, such as privacy or safety, district courts not only have the discretion, but sometimes the obligation to consider newly presented facts and to grant" post-judgment relief. *Piper v. DOJ*, 374 F.Supp.2d 73, 78 (D.D.C. 2005). Thus, "the importance of protecting third parties' interests makes judicial intervention proper," even though the Comptroller no longer presses the argument. *Id*. at 81.

III. Determining whether the information sought is a "clearly unwarranted invasion of personal privacy" requires us to balance the individual's right to privacy against the public's right to government information.

The Texas Legislature modeled the PIA after the FOIA. *See City of Garland v. Dallas Morning News*, 22 S.W.3d 351, 355 (Tex. 2000) (plurality op.). Both statutes favor disclosure,[6] but each contains exceptions.[7] Section 552.102(a) exempts information from a "personnel file, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." TEX. GOV'T CODE § 552.102(a). This language tracks its federal counterpart, which protects "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. § 552(b)(6). The United States Supreme Court, in *Department of the Air Force v. Rose*, 425 U.S. 352, 372 (1976), interpreted the personnel file exemption to "require a balancing of the individual's right of privacy against the preservation of the basic purpose of the Freedom of Information Act." The Supreme Court later explained that, under this balancing test "[i]nformation such as place of birth, date of birth, date of marriage, employment history, and comparable data is not normally regarded as highly personal, and yet . . . such information, if contained in a 'personnel' or 'medical' file, would be exempt from any disclosure that would constitute a clearly unwarranted invasion of personal privacy." *U.S. Dep't of State v. Wash. Post Co.*, 456 U.S. 595, 600 (1982) (noting that "'limitation of a "clearly unwarranted invasion of personal privacy" provides a proper balance between the protection of an individual's right of

---

[6] *See* TEX. GOV'T CODE § 552.001(b); *Dep't of Air Force v. Rose*, 425 U.S. 352, 361 (1976) (noting that "disclosure, not secrecy, is the dominant objective of [FOIA]").

[7] *See, e.g.*, 5 U.S.C. § 552(b)(6); TEX. GOV'T CODE § 552.102.

privacy and the preservation of the public's right to Government information *by excluding those kinds of files the disclosure of which might harm the individual*'" (quoting H. R. Rep. No. 1497, 89th Cong., 2nd Sess., at 11 (1966))).

Although we have held that a balancing test is not required under section 552.101 (excepting from disclosure "information considered to be confidential by law, either constitutional, statutory, or by judicial decision"), we have not rejected its application to section 552.102. *See Indus. Found. of South v. Tex. Indus. Accident Bd.*, 540 S.W.2d 668, 681 (Tex. 1976). In *Industrial Foundation*, decided shortly after the U.S. Supreme Court issued *Rose*, we held only that *Rose*'s balancing test was inapplicable to section 552.101 because the PIA "contain[ed] no exception comparable to" FOIA's exception for "files '*similar' to* medical or personnel files." *Id*. (emphasis added).

In *Hubert v. Harte-Hanks Texas Newspapers, Inc*., 652 S.W.2d at 550, the only decision to consider whether a balancing test applied under section 552.102, a divided court of appeals held that it did not:

> Nothing in the language [of the PIA] indicates that . . . the federal balancing test or the *Industrial Foundation* test should be employed in determining cases involving 'information from personnel files.' Nevertheless, this Court has determined, finally, that the *Industrial Foundation* test for information deemed confidential by law under [section 552.101] . . . should apply also to [section 552.102].

The dissenting justice disagreed, arguing that "[t]he plain meaning of the term 'clearly unwarranted' implies in the strongest possible terms that the decision to disclose the information depends upon a balancing test." *Id.* at 559 n.4 (Powers, J., dissenting). He interpreted *Industrial Foundation* to endorse the use of a balancing test for claims under section 552.102:

> With respect to the [PIA], however, the Supreme Court of Texas observed that the same construction, if applied to [section 552.101] of the Texas statute, would render superfluous [section 552.102] of that statute in matters of personnel-file privacy. The Court thus implied in the strongest terms that the balancing test to which it referred would be applicable under [section 552.102], but not applicable outside that subsection.

Id. at 557-58 (Powers, J., dissenting).

We agree with Justice Powers. Because the PIA is modeled on the FOIA, federal precedent is persuasive, particularly where the statutory provisions mirror one another. *See In re Weekley Homes, L.P.*, 295 S.W.3d 309, 316-17 (Tex. 2009) (conceding that state discovery rules are not identical to federal rules, but "are not inconsistent," and "therefore we look to the federal rules for guidance"); *Farmers Group, Inc. v. Lubin*, 222 S.W.3d 417, 425 (Tex. 2007) (looking to cases interpreting federal rules where Texas rules incorporated the identical language); *Hallco Tex., Inc. v. McMullen Cnty.*, 221 S.W.3d 50, 56 (Tex. 2006); *Compaq Computer Corp. v. Lapray*, 135 S.W.3d 657, 664 (Tex. 2004). In drafting the FOIA, the U.S. Senate explained that "'[t]he phrase 'clearly unwarranted invasion of personal privacy' enunciates a policy that will involve a balancing of interests between the protection of an individual's private affairs from unnecessary public scrutiny, and the preservation of the public's right to governmental information.'" *Rose*, 425 U.S. at 372 (quoting S. Rep. No. 813, 89th Cong., 1st Sess., at 9 (1965)). When the Texas Legislature used the same "clearly unwarranted invasion of personal privacy" language, it is fair to presume it intended the same meaning as that articulated by its federal predecessor. *Cf. Farmers Group*, 222 S.W.3d at 425 (noting that Texas statute incorporating language from Federal Rule of Civil Procedure indicated that statute was intended to have similar application).

The Attorney General recognized the applicability of this balancing test in his initial response to the Comptroller's open letter request, noting that "[t]he limitation of a 'clearly unwarranted invasion of personal privacy' requires a balance between the protection of an individual's right of privacy and the preservation of the public's right to government information." Tex. Att'y Gen. OR2006-01938, at 2 (citing *Rose*, 425 U.S. at 378 n.16). We agree: *Rose*'s balancing test is the appropriate standard under section 552.102. Accordingly, we next weigh the third party privacy interest against the public's right to government information.

IV. Both the Attorney General and the Comptroller have identified significant privacy interests at stake, and the public interest in employee birth dates in this case is minimal.

The privacy interests protected by the PIA exemption involve the right of individuals "to determine for themselves when, how, and to what extent information about them is communicated to others." ALAN F. WESTIN, PRIVACY AND FREEDOM 7 (1967), *quoted in Reporters Comm.*, 489 U.S. at 764 n.16. The News responds that it has no interest in disclosing birth dates to the world, but rather would use the information to investigate inappropriate hires or other misadventures the state may commit. We do not doubt that the News would put the information to beneficial use. But if the requested information is disclosed to the News, it must be disclosed to any applicant, including those who would employ it for illegitimate purposes. "[O]nce there is disclosure, the information belongs to the general public." *Nat'l Archives & Records Admin. v. Favish*, 541 U.S. 157, 174 (2004).

Nor is it relevant that birth dates may be readily available from other sources. "An individual's interest in controlling the dissemination of information regarding personal matters does

not dissolve simply because that information may be available to the public in some form." *U.S. Dep't of Defense v. Fed. Labor Relations Auth.*, 510 U.S. 487, 500 (1994). The Supreme Court has held that government employees have a privacy interest in nondisclosure of their home addresses, even though "home addresses often are publicly available through sources such as telephone directories and voter registration lists." *Id*. (holding that such addresses were exempt from disclosure under FOIA Exemption 6).

Instead, we must examine whether state employees have a privacy interest in their birth dates. The Attorney General, in his initial response to the Comptroller, highlighted many of the issues implicated by the News' request:

> Identity theft, without question, is becoming one of the fastest growing criminal and consumer offenses in the twenty-first century. *See Daly v. Metropolitan Life Ins. Co.*, 782 N.Y.S.2d 530, 535 (N.Y. Sup. 2004) (denying defendant's motion for summary judgment in negligence action against insurer who disclosed consumers' names, social security numbers, and date of birth information). The Federal Trade Commission estimated 27.3 million reported cases of identity theft, causing billions of dollars in damages, in the five years preceding early 2003. *Id.* (citing Thomas Fedorek, *Computers + Connectivity = New Opportunities for Criminals and Dilemmas for Investigators*, 76-Feb. N.Y. St. B.J. 10, 15 (February, 2004)). A date of birth obtained in combination with other data about an individual can be used in at least two harmful ways: to obtain sensitive information about an individual and to commit identity theft. *See Daly v. Metropolitan Life Ins. Co.*, 782 N.Y.S.2d at 535-36; *Scottsdale Unified Sch. Dist. v. KPNX Broad. Co.*, 955 P.2d 534, 539 (Ariz. 1998).

Tex. Att'y Gen. OR2006-01938, at 3.

> Nor can we ignore the reality of technology. As one court has noted:
>
> "There is a difference between electronic compilation in searchable form and records that can only be found by a diligent search through scattered files. The former presents a far greater threat to privacy" (Kurtz, *The Invisible Becomes Manifest: Information Privacy in a Digital Age*, 38 WASHBURN LJ 151, 155-56 [1998]).

> Moreover, on-line data brokers often collect information taken from public records and allow access in a searchable form, which potentially leads to abuse by identity thieves.

Goyer v. N.Y. State Dep't of Envtl. Conservation, 813 N.Y.S.2d 628, 639 (N.Y. Sup. Ct. 2005) (holding that personal information (including dates of birth) in hunting licenses were exempt from disclosure under state's "unwarranted invasion of personal privacy" standard). The Attorney General has observed that preventing identity theft "begins by reducing the number of places where your personal information can be found," *Preventing Identity Theft*, FIGHTING IDENTITY THEFT, www.texasfightsidtheft.gov/preventing.shtml, and he concedes that "[c]ertain public information websites allow individuals to locate [highly sensitive personal] information in any state, including Texas, using only a name and date of birth," Tex. Att'y Gen. OR2006-01938, at 3. One commentator has noted that "information deemed useful to be publicly available under the old transactions technology" is now "too available in a world of wired consumers." Alessandro Acquisti & Ralph Gross, *Predicting Social Security Numbers From Public Data*, 106 PROC. NAT'L ACAD. SCI. 10975, 10980 (2009), *available at* www.pnas.org/content/106/27/10975.full.pdf (citation omitted); *cf. Reporters Comm.*, 489 U.S. at 764 ("[T]here is a vast difference between the public records that might be found after a diligent search of courthouse files, county archives, and local police stations throughout the country and a computerized summary located in a single clearinghouse of information."). For this reason, almost every major consumer protection entity, whether governmental or non-governmental (including the Federal Trade Commission, the President's Task

Force on Identity Theft, and the Texas Attorney General's website), advises citizens against publicizing their dates of birth or using their dates of birth as pin numbers and passwords.[8]

Moreover, there is little question that one "can take personal information that's not sensitive, like birth date, and combine it with other publicly available data to come up with something very sensitive and confidential."[9] Hadley Legget, *Social Security Numbers Deduced From Public Data*, WIRED SCI. (July 6, 2009, 5:05 PM) http://www.wired.com/wiredscience/2009/07/predictingssn/. As the Arizona Supreme Court has observed:

> With both a name and birth date, one can obtain information about an individual's criminal record, arrest record . . . driving record, state of origin, political party affiliation, social security number, current and past addresses, civil litigation record, liens, property owned, credit history, financial accounts, and, quite possibly, information concerning an individual's complete medical and military histories, and insurance and investment portfolio.

Scottsdale Unified Sch. Dist. No. 48 v. KPNX Broad. Co., 955 P.2d 534, 539 (Ariz. 1998); *see also Data Tree, LLC v. Meek*, 109 P.3d 1226, 1238 (Kan. 2005) ("An individual's social security number, date of birth, and mother's maiden name are often used as identifiers for financial accounts or for obtaining access to electronic commerce."); *Hearst Corp. v. State*, 882 N.Y.S.2d 862, 875 (N.Y. Sup.

[8] *See, e.g.*, *Fighting Back Against Identity Theft*, FEDERAL TRADE COMMISSION, http://www.ftc.gov/bcp/edu/microsites/idtheft/consumers/deter-detect-defend.html; Graeeme R. Newman & Megan M. McNally, *Identity Theft Literature Review*, NATIONAL INST. J. 210459 (Jan. 27-28, 2005), *available at* http://www.ncjrs.gov/pdffiles1/nij/grants/210459.pdf; PRESIDENT'S TASK FORCE ON IDENTITY THEFT, COMBATING IDENTITY THEFT: A STRATEGIC PLAN (2007), *available at* http://www.idtheft.gov/reports/StrategicPlan.pdf; *Preventing Identity Theft*, ATTORNEY GENERAL OF TEXAS, *available at* https://www.oag.state.tx.us/consumer/identity_theft.shtml; *Seven Main Points of Identification*, GET ID SMART, *available at* http://www.getidsmart.com/; *Working to Resolve Identity Theft*, IDENTITY THEFT RESOURCE CENTER, *available at* http://www.idtheftcenter.org/artman2/publish/c_tips/index.shtml.

[9] This apparently stems from the Social Security Administration's methods for assigning numbers, which is usually done shortly after a person's birth, and based in part on geography. Hadley Legget, *Social Security Numbers Deduced From Public Data*, WIRED SCI. (July 6, 2009, 5:05 PM) http://www.wired.com/wiredscience/2009/07/predictingssn/.

Ct. 2009) (concluding that "a reasonable person would find the disclosure of their precise birth dates, taken together with their full name and other details of their State employment, to be offensive and objectionable"). In fact, "[a] key element from the privacy standpoint is the inclusion of residents' date of birth." Ira Bloom, *Freedom of Information Laws in the Digital Age: The Death Knell of Informational Privacy*, 12 RICH. J.L. & TECH. 9, at *19 (2006).

Additionally, the Legislature has provided that state employees' social security numbers, home addresses, and personal family information are excepted from disclosure. TEX. GOV'T CODE § 552.117(a); *see also id.* § 552.147(a) (excepting from disclosure the social security numbers of all "living person[s]"). As the Attorney General has noted, "it is universally agreed that SSNs are at the heart of identity theft and fraud, and in today's Internet world where information—including public government information—can be instantly and anonymously obtained by anyone with access to the worldwide web, the danger is even greater." Op. Tex. Att'y Gen. No. GA-519, at 6 (2007). These protections would be meaningless, however, if birth dates were disclosed, because those dates, when combined with name and place of birth, can reveal social security numbers. *See* Bob Moos, *How Secure is Your Social Security Data?*, DALLAS MORNING NEWS, Aug. 9, 2009, at 1D. "[I]t is by now well established that the disclosure of an individual's full birth date, taken together with his or her full name and the details of employment, can be used to facilitate identity theft, thereby resulting [in] both economic and personal hardship to individuals." *Hearst Corp.*, 882 N.Y.S.2d at 875; *see also Scottsdale*, 955 P.2d at 536 (noting that "birth dates are in fact private" and "may be used to gather great amounts of private information about individuals").

These concerns have led courts to conclude that birth dates implicate substantial privacy interests. *See, e.g.*, *Oliva v. United States*, 756 F.Supp. 105, 107 (E.D.N.Y. 1991) (holding that, under FOIA Exemption 6, "dates of birth[] are a private matter, particularly when coupled with . . . other information" and disclosure "would constitute a clearly unwarranted invasion of personal privacy"); *cf. Schiller v. INS*, 205 F.Supp.2d 648, 663 (W.D. Tex. 2002) (holding that, under FOIA Exemption 7(c) "the privacy interest of these individuals in their names and identifying information, i.e. birth date, outweighs the public interest in disclosure"); *Creel v. U.S. Dep't of State*, 1993 U.S. Dist. LEXIS 21187, at *19-*20 (E.D. Tex. 1997) (noting that, under FOIA Exemption 7(c), private citizen had a "significant personal privacy interest in her home address, birth date, social security number, and telephone number").

We conclude that the state employees have a "nontrivial privacy interest" in their dates of birth. *Dep't of Defense*, 510 U.S. at 501. And while we may not inquire into the requesting party's intended use of the information,[10] we must nevertheless examine "the only relevant public interest in the . . . balancing analysis—the extent to which disclosure of the information sought would 'shed

[10] *See* TEX. GOV'T CODE 552.222; *A&T Consultants v. Sharp*, 904 S.W.2d 668, 676 (Tex. 1995) (noting that FOIA also "bars the government from examining the motives or interests of the party requesting the release of public information"); *see also Reporters Comm.*, 489 U.S. at 771 (holding that "the identity of the requesting party has no bearing on the merits of his or her FOIA request"); *U.S. Dep't of Air Force, Scott Air Force Base v. Fed. Labor Relations Auth.*, 838 F.2d 229, 232-234 (7th Cir. 1988) (noting that requestor's use was irrelevant, as "[t]he special needs of one, or the lesser needs of another, do not matter," because "[t]he first person to get the information may give it away; so if one person gets it, 'any person' may. 'The Act clearly intended to give any member of the public as much right to disclosure as one with a special interest therein.'" (quoting *Sears*, 421 U.S. at 149)).

light on an agency's performance of its statutory duties' or otherwise let citizens know 'what their government is up to.'"[11]

Like the FOIA, the PIA is based on the notion that citizens are entitled "to complete information about the affairs of government and the official acts of public officials and employees." TEX. GOV'T CODE § 552.001(a); *Dep't of Interior v. Klamath Water Users Protective Ass'n*, 532 U.S. 1, 8 (2001) (observing "the basic policy that disclosure, not secrecy, is [FOIA's] dominant objective"). Thus, personal information about employees that does not shed light on their official actions would not further the purpose of the statute. *Cf.* Op. Tex. Att'y. Gen. GA-519, at 5 (noting that "[r]edacting SSNs from responsive records requested under the PIA will not detract from the PIA's purpose of making publicly available information about the affairs of government and the official acts of public officials and employees because the release of SSNs does not serve the purpose of openness in government in any foreseeably significant way"). In *Reporters Committee*, the U.S. Supreme Court clarified FOIA's statutory purpose as a means for citizens to know "what their government is up to":

> Official information that sheds light on an agency's performance of its statutory duties falls squarely within that statutory purpose. That purpose, however, is not fostered by disclosure of information about private citizens that is accumulated in various governmental files but that reveals little or nothing about an agency's own conduct.

Reporters Committee, 489 U.S. at 773.

---

[11] *Dep't of Defense v. Fed. Labor Relations Auth.*, 510 U.S. 487, 497 (1994) (quoting *Reporters Comm.*, 489 U.S. at 773).

Employee birth dates shed little light on government actions. The News points out that the public has an interest in monitoring the government, and birth dates could be used to determine whether governmental entities like school districts and hospitals have hired convicted felons or sex offenders. But when a protected privacy interest is at stake, the requestor must identify a sufficient reason for the disclosure; mere allegations of the possibility of wrongdoing are not enough. *See Favish*, 541 U.S. at 172 (noting that, when protected privacy interests are at stake, the requestor must "establish a sufficient reason for the disclosure").[12] A requestor must show that the public interest sought to be advanced is significant—an interest more specific than having the information for its own sake—and that the information sought is likely to advance that interest. *Id.* at 172; *cf. Indus. Found.*, 540 S.W.2d at 685 (requiring requestor to show that private information is of "legitimate public concern" before disclosure may be required under PIA section 552.101). This is distinct from identifying "the particular interest of the requestor, and the purpose for which he seeks the information," considerations that are irrelevant to our analysis, except to the extent "the requestor's interest in the information is the same as that of the public at large." *Indus. Found.*, 540 S.W.2d at 685.

But "[i]f a totally unsupported suggestion that the interest in finding out whether Government agents have been telling the truth justified disclosure of private materials, Government agencies would have no defense against requests for production of private information." *Dep't of State v.*

[12] Although *Favish* was decided under FOIA Exemption 7(c), the relevant public interest is the same under Exemption 6. *See Dep't of Defense v. Fed. Labor Relations Auth.,* 510 U.S. at 496 n.6 (noting that the identification of the relevant public interest is the same under Exemptions 6 and 7(c); the exceptions "differ in the magnitude of the public interest required to override the respective privacy interests"); *see also Checkbook v. U.S. Dep't of Health and Human Servs.*, 554 F.3d 1046, 1055 n.4 (D.C. Cir. 2009).

Ray, 502 U.S. 164, 179 (1991) (rejecting, under FOIA Exemption 6, asserted public interest in ascertaining veracity of government reports, as requestors had not produced "a scintilla of evidence . . . that tend[ed] to impugn the integrity of the reports"); *Consumers' Checkbook v. U.S. Dep't of Health and Human Servs.*, 554 F.3d 1046, 1054 n.5 (D.C. Cir. 2009) (holding that a "'mere desire to review how an agency is doing its job, coupled with allegations that it is not, does not create a public interest sufficient to override the privacy interests'" protected by FOIA Exemption 6) (quoting *McCutchen v. U.S. Dep't of Health and Human Servs.*, 30 F.3d 183, 188 (D.C. Cir. 1994))). The Supreme Court has criticized the idea that bare allegations would suffice to require disclosure. *Favish*, 541 U.S. at 174 (holding that "the requester must establish more than a bare suspicion" and "must produce evidence that would warrant a belief by a reasonable person that the alleged Government impropriety might have occurred"). Because the News has produced no evidence supporting government wrongdoing, the public interest in disclosure here is negligible.[13] *See Dep't of Defense*, 510 U.S. at 498 (noting that providing employees' home address would reveal little or nothing about employing agencies or their activities).

Moreover, the Comptroller has relinquished the full name, age, race, sex, salary, agency, job description, work address, date of initial employment, pay rate, and work hours of every agency employee. The Comptroller also showed that, using only the information produced, each employee was distinguishable without resort to date of birth. *See Horowitz v. Peace Corps*, 428 F.3d 271, 278

[13] Of course, should the News obtain such evidence, it would be free to make another PIA request for the relevant birth dates.

(D.C. Cir. 2005) ("The availability of information through other sources lessens the public interest in its release through FOIA.").

We hold that the state employees' privacy interest substantially outweighs the negligible public interest in disclosure here. Consistent with the federal courts and those in other states, we conclude that disclosing employee birth dates constitutes a clearly unwarranted invasion of personal privacy, making them exempt from disclosure under section 552.102.

V. Attorney's fees

The trial court denied the News' request for attorney's fees, and the court of appeals affirmed. 244 S.W.3d at 641-42. The News petitioned this Court for review, arguing that attorney's fees were proper under Government Code section 552.323(b) and the Declaratory Judgment Act. *See* TEX. GOV'T CODE § 552.323(b); TEX. CIV. PRAC. & REM. CODE § 37.009.

A. Government Code § 552.323(b)

Section 552.323(b) authorizes a court to award reasonable attorney's fees incurred by a party "who substantially prevails." TEX. GOV'T CODE § 552.323(b). Before a trial court may award fees, the statute also requires that a number of other conditions be met: that the action be brought under section 552.324; that the trial court consider whether the public information officer who withheld that information had a reasonable basis in law for doing so; and that the trial court examine whether the litigation was brought in bad faith. *See id.* The parties dispute whether these requirements were satisfied here. We need not reach those issues, however, because the Comptroller has prevailed.

B. Declaratory Judgment Act

Under the Declaratory Judgment Act, a trial court may award reasonable and necessary attorney's fees "as are equitable and just." TEX. CIV. PRAC. & REM. CODE § 37.009. The News contends that it is entitled to fees because it is a prevailing party and because the Comptroller has no legal basis to support her position. Because, as outlined above, we disagree, we conclude that the trial court did not abuse its discretion in refusing to award the News attorney's fees, and we affirm the judgment denying the News' request for attorney's fees. *See Bocquet v. Herring*, 972 S.W.2d 19, 21 (Tex. 1998).

VI. Conclusion

Identity theft cost Americans almost $50 billion in 2007 alone. RACHEL KIM, JAVELIN STRATEGY & RESEARCH, 2007 IDENTITY FRAUD SURVEY REPORT 1 (2007), *available at* http://graphics8.nytimes.com/images/blogs/freakonomics/pdf/Javelin%20Report%202007.pdf. In 2004, Texas ranked fourth among states for the number of identity-theft complaints reported to the Federal Trade Commission. OFFICE OF CONSUMER CREDIT, LEGISLATIVE REPORT REVIEWING IDENTITY THEFT AND SENATE BILL 473 (2004), *available at* http://www.occc.state.tx.us/pages/publications/Identity_Theft.pdf. The State of Texas employs over a quarter of a million people, 144,000 of whom represent the true parties involved in this controversy. When the privacy rights of a substantial class of innocent third parties are affected by one of our decisions, we have a duty to pay them heed. And because the state employees' privacy interest substantially outweighs the minimal public interest in the information, we hold that disclosure of state employee birth dates would constitute a clearly unwarranted invasion of personal privacy, and such dates are excepted from disclosure under section 552.102(a). *See* TEX. GOV'T

CODE § 552.102. We reverse in part and affirm in part the court of appeals' judgment and render judgment declaring that the public employee birth dates at issue in OR2006-01938 are excepted from disclosure under section 552.102. *See* TEX. R. APP. P. 60.2(a), (c).

_____
Wallace B. Jefferson
Chief Justice

Opinion Delivered: December 3, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0172

TEXAS COMPTROLLER OF PUBLIC ACCOUNTS, PETITIONER,

v.

ATTORNEY GENERAL OF TEXAS AND THE DALLAS MORNING NEWS, LTD., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued September 10, 2009

JUSTICE WAINWRIGHT, joined by JUSTICE JOHNSON, dissenting in part and concurring in part.

The dates of birth of state government employees that the Dallas Morning News requested from the Comptroller in this case are defined as public information—information legitimately collected and maintained by the State of Texas. There is no dispute of that fact. Unlike social security numbers, the Legislature has not expressly excepted birth dates from disclosure.[1] And no one disagrees with the proposition that public information should be handled in ways that provide protections against identity theft. But we should not forget that the more public information is

[1] Bills submitted in the 2009 legislative session that would prevent disclosure of birth dates of public employees failed to pass. Tex. S.B. 1912, 81st Leg., R.S. (2009); Tex. H.B. 4207, 81st Leg., R.S. (2009). So there is still no express preclusion on the requested disclosure of birth dates. There are protections of birth dates in specific circumstances that are not before the Court in this case. *See, e.g.*, TEX GOV'T CODE § 552.1176; TEX ELEC. CODE § 13.004(d)(4).

protected from disclosure to the people, the less information the public gets from the government that serves it. It is a fundamental policy of the State of Texas that its citizens are entitled "at all times to complete information about the affairs of government and the official acts of public officials and employees." *City of Dallas v. Abbott*, 304 S.W.3d 380, 388 (Tex. 2010) (Wainwright, J., dissenting) (citing TEX. GOV'T CODE § 552.001).

The public information at issue has proven quite useful not only to inform citizens of the actions of the government and to arm citizens to hold the public sector accountable but also to highlight problems in the public sector that should be addressed. For example, the information sought in this case, which had been released to the News in prior years, was used to determine that a number of Texas Youth Commission employees had some criminal background and that some employees of a local school district had criminal records.[2] Dates of birth were used to confirm the identities of public employees with criminal records and avoid confusing them with the wrong persons with similar or the same names. These are legitimate uses of public employees' birth dates, which the Court precludes by its opinion.

Obviously, whether to disclose or keep secret public information involves a balancing of policy objectives, including the public's right to transparency in governmental affairs and privacy concerns of public employees. In promulgating the Texas Public Information Act (PIA), the Legislature balanced disclosure and protection of different types of public information about public

---

[2] Ryan McNeill, *ID Theft vs. Public Record: State May Hide Workers' Birthdates, but It Sells Same Info on All Drivers*, [hereinafter "McNeill, *ID Theft vs. Public Record*"] DALLAS MORNING NEWS, May 7, 2009, at A1, *available at* http://www.dallasnews.com/sharedcontent/dws/dn/yahoolatestnews/stories/050709dnprodateofbirth.3fcf743.html (reporting that "private companies spent nearly $50 million during the last fiscal year" buying Texas drivers' data, including birth dates).

employees. The Legislature decided that dates of birth are public information, as the Court and the Comptroller concede. And the State of Texas for years has sold birth date information of Texas public employees to businesses, and the parties point to no problems with identity theft arising from those prior disclosures.[3] To address illicit *use* of personal information, the Legislature promulgated the Identity Theft Enforcement and Protection Act with criminal penalties for those parties who engage in identity theft.[4] Before today, no Texas court had held that dates of birth of public employees are confidential or otherwise precluded their disclosure.

This case is fundamentally about which institution decides that balance—the Legislature or the judiciary. Our task in this case is not to decide if we think these birth dates should be confidential. We are charged with deciding whether the Legislature excepted dates of birth of public employees from disclosure under section 552.101 of the PIA. I would hold that it did not. The Court reaches the contrary result, not under section 552.101, but under section 552.102, an issue the Comptroller did not raise in this Court and expressly disclaims as a basis for its position that the information should be protected. I respectfully dissent.

I. Factual and Procedural History

On November 18, 2005, an editor with the Dallas Morning News (News) submitted a PIA request to the Comptroller for an electronic copy of the Texas state employee payroll database. The

---

[3] *See* McNeill, *ID Theft vs. Public Record*, at A1.

[4] The Identity Theft Enforcement and Protection Act prohibits use of personal identifying information without the other person's consent to obtain anything of value in the other person's name. TEX. BUS. & COM. CODE § 521.051. Personal identifying information includes name, social security number, date of birth or government-issued identification number. *Id.* § 521.002(a)(1). The penalties for violation may be civil or, in certain types of credit card theft, criminal. *Id.* §§ 521.151, 522.002.

News requested the full name, birth date, job description, agency, salary, race, sex, work address, date of initial employment, pay rate, and work hours of every state employee in the database. Contending that birth dates, certain salary deductions, and an employee's designation as a peace officer are protected from disclosure under sections 552.101 and 552.108 of the Act, the Comptroller submitted a timely request for an attorney general decision determining whether those portions of the public information should be withheld. *See* TEX. GOV'T CODE § 552.301 (mandating that a governmental body that wishes to withhold requested information from public disclosure that it considers to be excepted from disclosure under Subchapter C of the PIA must timely ask for a decision from the attorney general). In an open records letter ruling, the Attorney General concluded that public employees' dates of birth are public information that must be disclosed to the requestor. *See* Tex. Att'y Gen. OR2006–01938.

Arguing that the release of the birth dates could lead to identity theft, the Comptroller filed suit seeking declaratory relief from compliance with the Attorney General's letter ruling as provided by Subchapter H of the PIA. TEX. GOV'T CODE §§ 552.321–.327. The News intervened in the lawsuit and moved for partial summary judgment on the ground that birth dates are not protected from disclosure by the PIA. The Comptroller responded with a cross-motion for summary judgment, contending that the information is protected as a matter of law or, alternatively, that the issue is fact-intensive and not appropriate for summary judgment. The trial court granted the News's motion for partial summary judgment and denied the Comptroller's cross-motion for summary judgment. The Comptroller appealed arguing to withhold the information under 552.101 and 552.102.

The Comptroller argued that the trial court erred in granting the News's partial summary judgment because the release of a public employee's birth date, in conjunction with his name, is a violation of the employee's right of privacy. The court of appeals held that the disclosure of state employees' birth date information would not violate any privacy interests, and thus was not protected under section 552.101 of the PIA. 244 S.W.3d 629, 635 (Tex. App.—Austin 2008, pet. granted). In this Court, however, the Comptroller narrowed her argument and only argues that the birth dates are "confidential" under section 552.101 of the PIA and thus excepted from the PIA's mandatory disclosure requirement. Section 552.101 provides that information is excepted from disclosure "if it is information considered to be confidential by law, either constitutional, statutory, or by judicial decision." TEX. GOV'T CODE § 552.101. The Comptroller argues that birth date information is excepted as confidential "by judicial decision" because the Texas common law privacy tort of intrusion upon seclusion, described by this Court in *Billings v. Atkinson*, creates a protected privacy interest in this information, thus making it confidential. 489 S.W.2d 858, 859–60 (Tex. 1973).

II. Preservation and Waiver: The Court Decides This Case on an Issue the Comptroller Expressly Disclaimed.

The Comptroller was asked at oral argument specifically if her position included arguments under PIA section 552.102 and employing a balancing test to determine whether to protect the birth dates from disclosure. Her counsel responded:

> Answer: I would say that we are going solely under 552.101 . . . . We are not advocating a balancing test . . . we don't believe a balancing test is applicable under this particular state regulatory system.

* * *

Question: There's an argument that 552.102 is a stronger argument, but you're not making that argument. I want to be clear about that.

Answer: We are not making that argument.

* * *

Answer: [A] balancing test . . . is simply not found in the PIA.

The Comptroller's position on this issue could not be clearer. She unequivocally limited her argument for nondisclosure of birth dates of public employees "solely" to section 552.101 of the PIA and shunned the application of a balancing test. Nevertheless, the Court renders its decision not on section 552.101 of the PIA, but instead bases its decision on section 552.102 and creates a balancing test to determine that the information is excepted from disclosure. The Comptroller presents neither argument and disclaims both. She did not cite, much less discuss, section 552.102 in her petition for review or brief on the merits, and, at oral argument, specifically disclaimed any reliance on either section 552.102 or a balancing test.

On occasion, a case may present a court with a fine line between adjudication and advocacy. However, we should remain on the side of adjudicating only the issues presented, absent rare and extraordinary situations not presented here. *See In re B.L.D.*, 113 S.W.3d 340, 351–55 (Tex. 2003) (recognizing that courts may review fundamental error not assigned). The Legislature and the Attorney General have both decided as a matter of policy not to protect dates of birth from disclosure, yet the Court shuns its substantial precedents on waiver to reach the contrary policy. Moreover, the information the Court protects has already in large part been disclosed. In the summary judgment evidence, the News submitted an affidavit stating that it has received the state

employees database, including the dates of birth of the employees, from the Comptroller's office in response to previous requests for the information.

Our rules of procedure require that a party present the issues to be decided by this Court in the party's petition and brief on the merits. *See* TEX. R. APP. P. 33.1, 53.2(f), 53.4, 55.2(f). "[I]ssues not presented in the petition for review and brief on the merits are waived." *Guitar Holding Co., L.P. v. Hudspeth Cnty. Underground Water Conservation Dist. No. 1.*, 263 S.W.3d 910, 918 (Tex. 2008) (citing TEX. R. APP. P. 53.2(f)); *Ramos v. Richardson*, 228 S.W.3d 671, 673 (Tex. 2007) (per curiam) (refusing to address an argument raised in petitioners' merits brief because petitioners failed to advance it in their petition for review); *City of Austin v. Travis Cnty. Landfill Co.*, *L.L.C.*, 73 S.W.3d 234, 241 n.2 (Tex. 2002) (precluding consideration of an argument raised below because the respondent disclaimed the argument before the Supreme Court). "[W]e should not stretch for a reason to reverse that was not raised." *Del Lago Partners, Inc. v. Smith*, 307 S.W.3d 762, 776 (Tex. 2010). This is true even for constitutional issues. *In re B.L.D.*, 113 S.W.3d at 350–51. We make rare exceptions to our waiver rules to review "fundamental error," but only in situations related to preservation of jurisdictional error and in "quasi-criminal" juvenile delinquency cases. *Id.* The Comptroller does not allege fundamental error.

Waiver rules exist for good reasons. "[A]dhering to our preservation rules isn't a mere technical nicety; the interests at stake are too important to relax rules that serve a critical purpose." *In re L.M.I.*, 119 S.W.3d 707, 708 (Tex. 2003). The rules, among other things, prevent unfair surprise of the other party and constrain us to perform our constitutional task to decide only existing cases or controversies. *See B.L.D.*, 113 S.W.3d at 350; *L.M.I.*, 119 S.W.3d at 710–11; *see also* TEX.

CONST. art. II, § 1; *Brooks v. Northglen Ass'n*, 141 S.W.3d 158, 164 (Tex. 2004) (recognizing that the separation of powers clause in article II, section 1 of the Texas Constitution bars this Court from issuing advisory opinions). I dare say that the News will be surprised by the Court's deciding this case on a ground it was not given an opportunity to address.

This is not a typical waiver case in which a party argues that it did raise the issue or that it is fairly included in its petition and briefs. Not only did the Comptroller choose not to raise or analyze the exception from disclosure under section 552.102 in her petition or brief, her counsel affirmatively disclaimed the argument at least four times at oral argument. *See supra* at 5–6 ("[W]e are going solely under 552.101 . . . . We are not making that argument . . . . We are not advocating a balancing test. . . . [A] balancing test . . . is simply not found in the PIA.").

The Court holds that the Comptroller properly withheld birth dates under section 552.102. The Court's reasoning for reaching the section 552.102 issue is: "Given the unique circumstances of this case and the third party interests at stake, we conclude that the Comptroller's petition 'fairly include[s]' an argument that section 552.102 applies. TEX. R. APP. P. 53.2(f)." ___ S.W.3d ___ (further citation omitted). That's an odd conclusion when the beneficiary of the ruling expressly disclaims that very argument. In essence, the Court holds that the Comptroller's section 552.101 argument fairly includes the section 552.102 argument, and it will consider arguments the Comptroller did not make.

The Court indicates it acts on behalf of public employees who do not have a voice in this dispute. But, the PIA provides a mechanism for the public employees affected to submit their arguments to the Attorney General when considering a governmental body's decision not to disclose

public information. The governmental entity shall make a good faith attempt to notify such persons in writing of the request for the attorney general decision and may then submit a brief with reasons why the information should be withheld. TEX. GOV'T CODE § 552.305. Although the record indicates that the mechanism was not utilized, the Court's holding makes the provision irrelevant in this case.

I disagree that the Court should disregard our rules on waiver to decide an issue specifically and repeatedly disclaimed by the Comptroller, without any allegation of fundamental error. Because the Court decides this case under section 552.102, I note some concerns with that analysis. I also analyze this dispute under the statutory framework raised and argued by the parties—whether section 552.101 excepts state employees' dates of birth from disclosure.

III. Risk of Identity Theft

Applying Section 552.102 and adopting a new balancing test articulated by the U.S. Supreme Court in *Department of the Air Force v. Rose*, 425 U.S. 352, 372 (1976), the Court holds that the state employees' privacy interests substantially outweigh the public interest in disclosure. ___ S.W.3d ___.

A. The Sky Is Not Falling: The Court's Characterization of the Privacy Interest at Stake Is Overstated.

Section 552.102 excepts from disclosure information in a personnel file "the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." TEX. GOV'T CODE § 552.102. The *Rose* test, adopted today by this Court, balances an individual's privacy claims against the public interest in disclosure. *Rose*, 425 U.S. at 372. Because Congress only excepted

from disclosure information that constitutes a "clearly unwarranted" invasion of privacy, federal courts have noted that the balance of disclosure interests should be tilted in favor of disclosure and creates a "heavy burden" for an agency invoking the exception. *E.g., Morley v. Cent. Intelligence Agency*, 508 F.3d 1108, 1128 (D.C. Cir. 2007) (noting that the CIA had the burden to show withholding is necessary under the federal Freedom of Information Act (FOIA) Exemption 6 for records pertaining to a deceased CIA officer, and no privacy interest was articulated); *Wash. Post Co. v. U.S. Dep't of Health & Hum. Servs.*, 690 F.2d 252, 275 (D.C. Cir. 1982). The Court jumps on the bandwagon of a number of other states, or federal trial courts, that have held that birth date information may constitute a clearly unwarranted invasion of personal privacy. While I am sensitive to the privacy rights of public employees and understand the concern of the Court, I believe the Court's reasoning is misguided for three fundamental reasons.

First, the Legislature has not protected dates of birth of public employees from disclosure. Birth dates by themselves are not private or damaging.[5] The Court and the parties have recognized as much. And the Restatement of Torts recognizes as much. RESTATEMENT (SECOND) OF TORTS § 652D cmt. b ("Thus there is no liability for giving publicity to facts about the plaintiff's life that are matters of public record, such as the date of his birth . . . ."). And even the U.S. Supreme Court has recognized as much, reasoning that information that is "not intimate" such as "place of birth, date of birth, date of marriage, employment history, and comparable data" may be restricted only in the disclosure of a "personnel" or "medical" file that itself would be a clearly unwarranted invasion

[5] Unless, of course, one is sensitive about one's age. But if that were the case, then the Comptroller's release of employees' ages would be just as offensive as birth dates.

of personal privacy. *U.S. Dep't of State v. Wash. Post Co.*, 456 U.S. 595, 600 (1982). "'[C]ongress also made clear that nonconfidential matter was not to be insulated from disclosure merely because it was stored by an agency in its "personnel" files.'" *Id.* at 601 (quoting *Rose*, 425 U.S. at 372).

The Court points to no evidence that disclosure of birth dates would be offensive to a reasonable person, would cause harm, or would lead to personal harm. Instead, the Court holds, much more tenuously, that disclosure is harmful because birth date information, "taken together" with other information, may "be used to facilitate identity theft," or may be used to locate a Social Security number, which may be used to facilitate identity theft. ___ S.W.3d ___ (quoting *Hearst Corp. v. State*, 882 N.Y.S.2d 862, 875 (N.Y. Sup. Ct. 2009)). In other words, the harm is not in the disclosure of the birth date, but in the possibility that some evildoer *may use* a birth date to gain other information (such as a social security number) which he or she then *may* use to commit identity theft. Never before has the Court held that information is not subject to disclosure under the PIA because the information may lead to other information that may be used to cause harm. By that logic, much information of a personal nature would be immune from disclosure—names of public employees, dates of employment, home addresses. This sort of information, taken together with other information, might lead to the employee's social security number and possibly to identity theft. While the state has outlawed identity theft, and individuals may sue when others misappropriate their private data, the Court should not allow subversion of the open-government policies of the PIA under the risk that some of the public information may later be misused.

As written, FOIA Exemption 6 (substantially identical to section 552.102) likely only protects the information itself, not its derivative uses or problems down the line.

> Perhaps FOIA would be a more sensible law if the Exemption applied whenever disclosure would "cause," "produce," or "lead to " a clearly unwarranted invasion of personal privacy—though the practical problems in implementing such a provision would be considerable. That is not, however, the statute Congress enacted. Since the question under 5 U.S.C. § 552(b)(6) is whether "disclosure" would "constitute a clearly unwarranted invasion of personal privacy"; and since we have repeatedly held that FOIA's exemptions "'must be narrowly construed,'" *it is unavoidable that the focus, in assessing a claim under Exemption 6, must be solely upon what the requested information reveals, not upon what it might lead to*. That result is in accord with the general policy of FOIA, which we referred to in *United States Dept. of Justice v. Reporters Committee for Freedom of Press*, 489 U.S. 749, 771 (1989) that the particular purposes for which a request is made are irrelevant.

U.S. Dep't of State v. Ray, 502 U.S. 164, 180–81(1991) (Scalia, J., concurring) (emphasis added) (citations and quotations omitted). Birth date information is not highly intimate or embarrassing; birth dates are not generally included in "the type of information that a person would ordinarily not wish to make known about himself or herself." *Assoc. Press. v. U.S. Dep't of Def.*, 554 F.3d 274, 292 (2d Cir. 2009). If it had been raised, the text of section 552.102 does not require consideration of derivative harm.

Interestingly, the Texas Identity Theft Enforcement and Protection Act requires businesses to take reasonable steps to protect "sensitive personal information" collected or maintained by the business in the regular course. TEX. BUS. & COM. CODE § 521.052. Sensitive personal information is generally an individual's name combined with any one or more of the following: social security number, driver's license number or government-issued identification number, or account, credit card or debit card number. *Id.* § 521.002(a)(2). The Legislature has not extended this obligation to dates of birth. *Id.*[6] Notifications to others required by the Identity Theft Act for breaches of computer

[6] "Personal identifying information," different from "sensitive personal information," includes date of birth. TEX. GOV'T CODE § 521.002(a)(1).

security apply only when sensitive personal information is reasonably believed to have been acquired by an unauthorized person. *Id.* § 521.053. Again, the Legislature did not include dates of birth in the same risk category with sensitive personal information.

Second, the support relied on by the Court is far from conclusive. The Court repeats general statements about birth date information but cites to and provides no real data supporting the proposition that birth date information truly leads to identity theft, or that the disclosure of someone's birth date, in and of itself, has caused any person to be the victim of identity theft. The Court points to a study from Carnegie-Mellon University in which researchers were able, with *60% accuracy*, to determine *the first six digits* of a person's Social Security number when given the person's date and location of birth, for persons *born after 1989*. ___ S.W.3d ___ (citing Alessandro Acquisti & Ralph Gross, *Predicting Social Security Numbers From Public Data*, 106 PROC. NAT'L ACAD. SCI. 10975 (2009)). Other scholarly and media reports and court cases cited by the Court repeat the findings of the Acquisti and Gross study, or make general statements that compilation of data can be more helpful to identity thieves than data spread out through multiple sources, or that simply assert that birth dates may lead to more private data. Neither the Court nor the Comptroller cite any study positively demonstrating that release of birth date information with a person's name, without a social security number, makes it significantly more likely that the person will be the victim of identity theft. And neither cites any study evidencing an identity theft that began through birth date information being disclosed in a public database.

Credible studies indicate that dates of birth are not the *sin qua non* of identity theft. The most common form of identity theft arises from credit card theft or check fraud, and the least common

form arises from stolen social security numbers or other personal information. Herb Weisbaum, *Identity Theft Problem: The Facts Behind the Fear*, MSNBC (Oct. 21, 2010, 7:42 AM) http://www.msnbc.msn.com/id/39763386/ns/business-consumer_news/ (last visited Dec. 1, 2010) (recognizing a recent report that the "most common form of identity theft is . . . 'old-fashioned credit card theft or check fraud,'" with nearly all respondents to the survey recognizing that their identity theft was due to stolen or misused credit or debit cards, and that a hijacking of an identity using a "Social Security number and other basic information" is the "least common form of identity fraud"). A recent study published by the United States Federal Trade Commission reports that a thief's use of a social security number with a new name and *false* date of birth currently accounts for 80–85 percent of all identity fraud. Lanny Britnell, Identity Theft America, *The Changing Face of Identity Theft*, at 1, *available at* http://www.ftc.gov/os/comments/creditreportfreezes/534030-00033.pdf; *see also* SYNOVATE, FEDERAL TRADE COMMISSION—2006 IDENTITY THEFT SURVEY REPORT 30 (Nov. 2007), *available at* http://www.ftc.gov/os/2007/11/SynovateFinalReportIDTheft2006.pdf (recognizing that 56 percent of victims did not know how their information was stolen, and of the 43 percent of victims who did, many knew the thief personally, had their identities stolen through a purchase or other transaction, from a wallet, from a company that had the information, from hacking, "phishing," the mail, or some other way). The Attorney General's office indicated its strong desire to eliminate identity theft, but candidly acknowledged at argument that there is "no firm evidence" that disclosure of birth dates facilitates identity theft and confirmed that the PIA is not intended to prohibit illegal use of data.

The information here is public information, and the connection between the information being disclosed and the actual harm sought to be prevented is too tenuous to support the judicial restrictions on disclosure of the public's information proffered by the Court when that same public information has been shown to have positive benefits.

Finally, the privacy interest at stake here is lower than the Court makes it out to be because much if not most of the information at issue has been distributed by the state for years—in some instances for a fee. Texas sells personal information under the Motor Vehicle Records Disclosure Act, including names, addresses, dates of birth and driver's license numbers, to businesses, insurance companies, private investigatory agencies and other third parties, for a number of specified purposes. *See* TEX. TRANSP. CODE §§ 730.007, .011 (permitting agencies to disclose the personal information and to charge "reasonable fees for such disclosure"); Ryan McNeill, *ID Theft vs. Public Record* at A1 (reporting that "private companies spent nearly $50 million during the last fiscal year" buying Texas drivers' data). To the extent that Texas government employees have driver's licenses, it is likely that their dates of birth have either already been released by a Texas governmental agency or sold to private entities, or both. Even though the Transportation Code section has been in place for nearly 13 years, there is no evidence submitted indicating that information disclosed through that mechanism has been a hotbed of identity theft. The State has sold similar information on Texans with driver's licenses for years, suggesting that arguments that the same information about a subset of Texans will greatly increase the possibility of identity theft ring hollow. This Act regulates the use of motor vehicle information and allows disclosure of birth dates of all Texas drivers, whether public or private employees, to many private parties capable of disguising their true identities. And

an authorized recipient of this personal information is authorized to resell or redisclose that information for permitted purposes. TEX. TRANSP. CODE § 730.013(b).[7] It is ironic that the Court cuts off free access by the public under the PIA to the same public information that is being sold under the Transportation Code.

B. The News Has Established a "Sufficient Reason" for the Disclosure.

When personal privacy interests are at stake, the second part of the *Rose* balancing test is whether the requestor has established a "sufficient reason for the disclosure." *See Nat'l Archives & Records Admin. v. Favish*, 541 U.S. 157, 172 (2004). The requesting party must establish "that the public interest sought to be advanced is a significant one, an interest more specific than having the information for its own sake. Second, the citizen must show the information is likely to advance the interest. Otherwise, the invasion of privacy is unwarranted." *Id.*

The Court holds that the News loses under the balancing test because it "has produced no evidence supporting government wrongdoing [and therefore] the public interest in disclosure is negligible." ___ S.W.3d ___ (citation omitted). I disagree; the public interest in the information is demonstrated. The News argues that it wishes to use the date of birth information to determine whether particular governmental employees who work in or near children are convicted felons or sex offenders. The News asserts a two-fold need for birth dates: first, to determine whether governmental entities are employing sex offenders or felons in jobs that may put children or the public at large at risk, and second, to confirm the identity of a particular governmental employee who

[7] Prior to 2001, the Transportation Code permitted agencies to distribute birth date information "for bulk distribution for surveys, marketing, or solicitations" provided that persons had the opportunity to opt-out and prohibit the uses. TEX. TRANSP. CODE § 730.007, *repealed* by Acts 2001, 77th Leg., R.S., ch. 1032.

may have a criminal record. The News advises that some 2,000 employees of the State of Texas have the same first and last name. It is reasonable and desirable that the media check the identities of these employees before publishing unflattering facts about them. The News further advises that, through its research, it was able to disclose in an article that over 250 employees of the Texas Youth Commission were convicted felons. *See* McNeill, *ID Theft vs. Public Record*, at A1. These are legitimate and productive uses of dates of birth.

No one doubts that citizens of this state have a right to know the names of those who work for them in government. Neither party, nor the Court, disputes that the News has the right to such names, and the names are easily available, in electronic form, on various governmental websites and other databases. *See, e.g.*, Capitol Complex Telephone System (CCTS) Directory, http://www.dir.state.tx.us/ccts/directory/index.html (last visited Dec. 1, 2010) (listing the names, titles, and telephone numbers of employees working in or near the Capitol). On the other hand, no one argues that state employees give up all of their privacy rights simply by working as an unelected public servant. But the disclosure of the birth dates in this case may actually help preserve government workers' privacy, by ensuring that any organization—media, political, watchdog, financial, governmental, or otherwise—does not falsely accuse those governmental employees of being persons they are not. This is different from the data that the government collects about non-governmental employees. *Cf. U.S. Dep't of Justice v. Reporters Comm. for Free Press*, 489 U.S. 749, 773 (1989) (concerning a FOIA request for criminal records of an individual investigated by the FBI). The information at issue may actually prevent mistaken identities and will help keep the government accountable for those they hire.

But fundamentally, under the summary judgment procedures, the Court errs by requiring evidence in the record that the News had no reason to provide in the first place. At the trial court in her summary judgment motion, the Comptroller argued that section 552.101 excepted birth dates from disclosure under *Industrial Foundation* and the Texas common law. Although the Comptroller mentioned that other courts had applied a balancing test, she did not request that one be applied to the facts here. Likewise, at the court of appeals, the Comptroller once again argued that section 552.101 excepts public employees' birth dates from disclosure under common law and constitutional concepts. *Rose*, and the balancing test now adopted by the Court, was not cited as a basis for the Comptroller's position before the court of appeals issued its opinion. The Comptroller cited section 552.102 only in her reply brief at the court of appeal to support the position that sections 552.101 and 552.102 "protect the same privacy interests." There was no need for the News to submit any evidence for the trial court summary judgment proceedings showing a "significant" public interest that the information is "likely to advance." ___ S.W.3d ___ (citing *Favish*, 541 U.S. at 172). We cannot expect a party to present evidence for a standard unknown, unargued, and unapplied below—another reason we enforce our waiver rules. *E.g.*, *Pirtle v. Gregory*, 629 S.W.2d 919, 920 (Tex. 1982) (per curiam) (noting that a party should not "surprise his opponent on appeal by stating his complaint for the first time"). At a minimum, this Court should remand the case to the trial court for the parties to develop the record and argue the balancing test under the new standard. TEX. R. APP. P. 60.2(f), 60.3 (providing that this Court may remand for further proceedings in light of changes in the law or in the interest of justice); *Boyles v. Kerr*, 855 S.W.2d 593, 603 (Tex. 1993) ("We have broad discretion to remand for a new trial in the interest of justice where it appears a party

may have proceeded under the wrong legal theory. Remand is particularly appropriate where the losing party may have presented his or her case in reliance on controlling precedent that was subsequently overruled." (citations omitted)). Here, the successful party at trial relied on a standard that the Court has now abandoned. Certainly the News should have an opportunity to make its case under the new formula.

For these reasons, I would not decide this case under section 552.102 and the Court's balancing test. As discussed below, under the issue asserted by the Comptroller, birth dates are not confidential under section 552.101.

IV. Disclosure of Birth Date Information

The Comptroller argues that public employees' dates of birth are "confidential" under section 552.101 of the PIA. It is useful to understand the PIA's structure.

A. The Legislature's Comprehensive Statutory Scheme for Government Transparency

The stated policy of the PIA is to promote open government. "[I]t is the policy of this state that each person is entitled, unless otherwise expressly provided by law, at all times to complete information about the affairs of government and the official acts of public officials and employees." TEX. GOV'T CODE § 552.001(a). "Public information" includes information that is "collected, assembled, or maintained . . . in connection with the transaction of official business" by a governmental body. *Id.* § 552.002(a). In general, the PIA is to be liberally construed in favor of granting requests for information. *Id.* § 552.001(b). Relative to other freedom of information laws, such as FOIA, the Texas PIA more strongly favors transparency and open government. *See*, *e.g.*, *City of Garland v. Dallas Morning News*, 22 S.W.3d 351, 364 (Tex. 2000) ("Unlike the FOIA, our

Act contains a strong statement of public policy favoring public access to governmental information and a statutory mandate to construe the Act to implement that policy and to construe it in favor of granting a request for information.").

While the PIA provides an ardent statutory edict for openness in state affairs, the Legislature has protected specified information from disclosure in Subchapter C of the PIA. TEX. GOV'T CODE §§ 552.101–.151. A governmental agency is not required to disclose information excepted under Subchapter C of the PIA, but it may disclose such information if it chooses, "unless the disclosure is expressly prohibited by law or the information is confidential under law." *Id*. § 552.007. Some examples of information that the PIA excepts from disclosure include information that would give advantage to a competitor or bidder, information in a student record at an educational institution funded wholly or partly by state revenue, and the social security number of a living person. *Id*. §§ 552.104, .114(a), .147(a).

In addition to these exceptions, the Legislature created a special category of information in the PIA— "confidential" information. Information that is considered "confidential" is a subset of the information excepted from disclosure. *See id*. § 552.101. But, unlike information that is merely excepted from disclosure, the PIA *prohibits* the disclosure of confidential information and makes its disclosure a crime punishable by: "(1) a fine of not more than $1,000; (2) confinement in the county jail for not more than six months; or (3) both the fine and confinement." *Id.* § 552.352. The Legislature specifically identifies in the PIA some information that is considered confidential.[8]

[8] Examples include the home address, home telephone number, or social security number of peace officers, county jailers, and current or former employees of the Texas Department of Criminal Justice, among others; any identifying information of a crime victim or claimant, including address and social security number; credit card, debit

Outside of the PIA, no fewer than 100 Texas statutes classify information as confidential for purposes of the PIA.[9] Other statutes specifically limit the scope of "confidential" information. For example, while section 552.147 generally excepts social security numbers of living persons from disclosure, it also explicitly states that it "does not make the social security number of a living person confidential under another provision of this chapter or other law." TEX. GOV'T CODE § 552.147. Other statutes, however, do make social security numbers contained in specified records "confidential" and subject to criminal penalties, such as on voter registration applications and in law enforcement personnel records. *See* TEX. ELEC. CODE § 13.004(c); TEX. GOV'T CODE § 552.1175.

The text of the PIA indicates that the Legislature intended the word "confidential" to have a specific meaning in the PIA, separating highly sensitive information that is *prohibited* from disclosure (such as the home address of a peace officer) from sensitive information that is merely *excepted* from disclosure (such as information in a student record). The PIA thus creates three distinct categories of public information—information required to be disclosed, information excepted from mandatory (but not voluntary) disclosure, and confidential information that is

---

card, charge card, or access device number that is collected, assembled, or maintained by or for a governmental body; and the social security number of applicants for a marriage license. TEX. GOV'T CODE § 552.1175, .132, .136, .141.

[9] An electronic search of Texas statutes returned 101 results in which certain information was "confidential" and "not subject to disclosure" under the PIA. Examples include certain records of teacher certification examinations (TEX. EDUC. CODE § 21.048(c-1)), student loan borrower records (TEX. EDUC. CODE § 57.11(d)), child welfare service reports, (TEX. FAM. CODE § 264.613(a)), DNA records stored in the Department of Public Safety DNA database (TEX. GOV'T CODE § 411.153(a)), the responses to exit interviews provided by departing government workers (TEX. GOV'T CODE § 651.007(g)), certain nursing home records (TEX. HEALTH & SAFETY CODE § 242.134(a)), certain carrier contracts in the workers' compensation system, (TEX. INS. CODE § 1305.154(a)), social security numbers provided by applicants for professional licenses (TEX. OCC. CODE § 59.001), pending proposals for comprehensive development agreements in transportation projects (TEX. TRANSP. CODE § 370.307(a)), and certain information relating to mineral, oil, and gas leases (TEX. NAT. RES. CODE §§ 52.190(d), 53.081(d)).

prohibited from disclosure and subject to criminal penalties.[10] It is within this statutory framework that I consider whether birth dates of public employees are considered to be part of this third category of "confidential information."

As a policy matter, it is admittedly undesirable to release information about public employees that could lead to identity theft. States typically have overwhelmingly addressed this issue by legislation. The Attorney General noted that a number of other states have excepted birth date information in personnel files from open records request disclosures in statutes.[11]

The Texas Legislature has balanced the competing interests of open government and individual privacy in deciding which types of public information are excepted from disclosure in the

---

[10] The PIA may not criminalize all distribution of information designated "confidential" in some manner in the statute. The penal provision of the PIA makes distribution of information "considered confidential under the terms of this chapter" a misdemeanor punishable by fine, confinement in county jail, or both. TEX. GOV'T CODE § 552.352(a). Information "considered to be confidential by law" is "excepted" from the disclosure requirements of section 552.021. *Id.* § 552.101. We have not addressed whether the "confidential" information referred to in section 552.021 is treated the same as the "confidential" information in section 552.352(a).

[11] Tex. Att'y Gen. OR2006-01938 (citing State Practices for Classification of Date of Birth in Public Records (on file with Open Records Division of the Office of the Attorney General)):

> According to the survey, states with an "unwarranted invasion of personal privacy" exemption in their open records law protect date of birth information. *See* HAW. REV. STAT. § 92F-13(1); 5 ILL. COMP. STAT. 140/7(1)(b); KAN. STAT. ANN. § 45-221(30); KY. REV. STAT. § 61.878(1)(a); MASS. GEN. LAWS ANN. ch. 66, § 10; MICH. COMP. LAWS ANN. § 15.243; N.H. REV. STAT. ANN. § 91-A:5; N.J. STAT. ANN. § 47:1A-10; N.Y. PUB. OFF. § 89(2)(b)(iv); UTAH CODE ANN. § 63-2-302(2)(d). One state grants date of birth protection under a similar standard, "unreasonable invasion of personal privacy." *See* S.C. CODE ANN. § 30-4-40(a)(2). Several states protect date of birth information under an exception for employee "personnel" records. *See* ARIZ. ADMIN. CODE R2-5-105; DEL. CODE ANN. tit. 29 § 10002; KAN. STAT. ANN. § 45-221(4); IOWA CODE § 22.7; MD. CODE ANN., STATE GOV'T § 10-616(h)(2)(I); MISS. CODE ANN. § 25-1-100; N.D. CENT. CODE § 44-04-18.1; OR. REV. STAT. § 192.502(3); R.I. GEN. LAWS § 38-2-2; VA. CODE ANN. § 2.2-3705.1(1); WYO. STAT. ANN. § 16-4-203. The state of Georgia protects employee date of birth information under a statute that specifically makes confidential date of birth information "if technically feasible at a reasonable cost." *See* GA. CODE ANN. § 50-18-72(a)11.3(A). Several states protect date of birth information by unofficial policy. Finally, the state of Washington protects date of birth information under a state plan to curtail identity theft.

PIA. This Court previously acknowledged that this is the Legislature's role. "Although we recognize that there is often much potential for abuse of information in government records, the task of balancing the public's right of access to government records against potential abuses of the right has been made by the Legislature; the court's task is to enforce the public's right of access given by the Act." *Indus. Found. of the S. v. Tex. Indus. Accident Bd.*, 540 S.W.2d 668, 675 (Tex. 1976). The Legislature excepted information for privacy reasons if it has been "considered to be confidential by law, either constitutional, statutory, or by judicial decision." TEX. GOV'T CODE § 552.101. We are constrained therefore not to apply a different, or more expansive meaning of "confidential" for purposes of section 552.101 because it might be good policy to prevent the disclosure of certain information. Our task is to enforce the public's right to access given by the PIA and adhere to the language of section 552.101 and the statutory scheme set up by the PIA, "not to second-guess the policy choices" that inform these statutes. *See McIntyre v. Ramirez*, 109 S.W.3d 747, 748 (Tex. 2003).

Nowhere in the PIA has the Legislature specifically excepted general birth date information, birth date information combined with other identifying information, or information the disclosure of which is feared may lead to identity theft. The Legislature has enacted specific statutes to protect against identity theft. *See* TEX. BUS. & COM. CODE §§ 72.004, 521.001–523.053. My inquiry, then, is whether birth date information is "confidential" pursuant to section 552.101.

B. Exception to Mandatory Disclosure of Public Information Under Section 552.101 of the PIA

Section 552.101 of the PIA states that public information is excepted from the broad disclosure "requirements of Section 552.021 if it is information considered to be confidential . . . by judicial decision." Relying on the opinion in *Industrial Foundation*, the Comptroller argues that the release of birth date information would violate the tort of intrusion upon seclusion. Therefore, she argues, such information has been considered to be confidential by the judicial decision in *Billings v. Atkinson* and is excepted from disclosure by section 552.101.

This Court's only interpretation of section 552.101 was the subject of a fractured opinion (a three justice plurality, two separate concurrences, and a four justice dissent) in *Industrial Foundation of the South v. Texas Industrial Accident Board.*, 540 S.W.2d 668, 675 (Tex. 1976). Despite the various views of the *Industrial Foundation* Court, there was unanimity on the proposition that the PIA does not give courts the discretion to secret certain information from the public by creating new categories of confidential information not protected by the terms of the PIA. In *Industrial Foundation*, the petitioners argued that the Legislature intended section 552.101 "to delegate to the courts a duty to determine what information should be excepted from disclosure as confidential by balancing in each case the interest in privacy against the interest in disclosure, thus creating a common-law privacy doctrine which would except the information involved 'by judicial decision.'" *Indus. Found.*, 540 S.W.2d at 681. The Court rejected that argument:

> We do not believe that a court is free to balance the public's interest in disclosure against the harm resulting to an individual by reason of such disclosure. This policy determination was made by the Legislature when it enacted the statute. "All

> information collected, assembled, or maintained by governmental bodies" is subject to disclosure unless specifically excepted. We decline to adopt an interpretation which would allow the court in its discretion to deny disclosure even though there is no specific exception provided.

Id. at 681–82; *see also id*. at 691–92 (Reavley, J., dissenting, joined by Steakley, Pope, and Denton, JJ.) ("I agree with everything in the opinion of the majority except what is written to support the holding that information on the nature of the injury. . . may be 'deemed confidential' . . . . It was not the intention of the Legislature to turn over the administration of the Open Records Act to the judiciary."). In other words, courts do not have the discretion to classify information as confidential on an *ad hoc* basis; confidentiality of public information is to be determined by the terms of the Act. To sanction the creation by courts of new types of protected information not identified in the PIA would open the way for judicial amendment of the PIA. Accordingly, I would interpret section 552.101 to deem confidential information that was held by judicial decision to be confidential at or before the time of the provision.

This approach would leave policy-making to the Legislature. It would also provide certainty in the definition of confidential information so that governmental entities and public officials may act accordingly. If courts decided which public information is considered to be confidential on an *ad hoc* basis, according to what individual jurists believe to be good policy, a court could decide to make birth date information confidential under the PIA in order to further the policy goal of preventing identity theft. An immediate consequence of this might be the attachment of criminal penalties for the disclosure, apparently even if unintended, of birth date information. *See* note 10. Government officials may be forced to redact all birth date information disclosed to the public or

face criminal penalties, even in records that are decades old and currently made available to the public in, for example, all the state courthouses in the two hundred fifty-four counties around the state.[12] By limiting these determinations to information that has already been considered confidential, such as information the disclosure of which would violate the public disclosure tort, legislators can enact policy in a careful, deliberate manner, often preventing the substantial practical problems that may accompany judicial overstepping.

A majority of the court in *Industrial Foundation* looked to the Court's decision in *Billings v. Atkinson*, which recognized the tort of public disclosure of private facts, in order to determine whether the information at issue had been considered to be "confidential." "We recognized in *Billings* . . . that an individual has the right to be free from 'the publicizing of one's private affairs with which the public has no legitimate concern . . . .'" *Indus. Found.*, 540 S.W.2d at 682. The Court interpreted "confidential" according to its common dictionary definition—"'known only to a limited few: not publicly disseminated: PRIVATE, SECRET.'" *Id*. at 683. The majority reasoned that the characteristics of the dictionary definition of confidential are "precisely the characteristics which information protected by this branch of the tort invasion of privacy must have. And, we believe that it is this type of information which the Legislature intended to exempt from mandatory disclosure . . . ." *Id*. *Billings* explained that certain information is protected by the tort of public

[12] An example of the scope of unintended consequences and potential harm of such a seemingly simple act of making birth date information confidential was shown recently when an attorney general opinion opined that social security numbers are confidential. Tex. Att'y Gen. Op. No. GA-0519 (2007). District and county court clerks around the state uniformly petitioned for relief because their provision of access to the social security numbers in the public records of the numerous courts they serve potentially subjected them to criminal penalties. The Attorney General's office abated its opinion and the Legislature swiftly and unanimously passed a statute expressly providing that Social Security numbers are not confidential. *See* TEX. GOV'T CODE 552.147(a).

disclosure. The majority opinion in *Industrial Foundation* held that the Legislature intended to protect this same information from disclosure under the PIA by excepting it as confidential (or private) by the judicial decision in *Billings*. Thus, "if a governmental unit's action in making its records available to the general public would be an invasion of an individual's freedom from the publicizing of his private affairs, then the information in those records should be deemed confidential by judicial decision." *Id.*

Reasonable minds may differ today as to the meaning of the phrase "information considered to be confidential . . . by judicial decision."[13] But the Legislature has not amended this section of the PIA in the thirty-seven years since that decision, and *Industrial Foundation* is still our sole authority on the meaning of section 552.101. TEX. GOV'T CODE § 552.101; *see* Acts June 14, 1973, 63rd Leg., R.S., ch. 424, § 3, 1973 Tex. Gen. Laws 1112, 1113. Respecting the Legislature's prerogative and the precedential value of the opinion in *Industrial Foundation*, I would not extend it to create unintended exceptions under the PIA.

C. The Comptroller's Argument for Analysis under the Intrusion upon Seclusion Tort

The Comptroller asks this Court to expand *Industrial Foundation* by holding that if the disclosure of information would lead to a violation of the privacy tort of intrusion upon seclusion,

---

[13] *See*, *e.g.*, *Indus. Found.,* 540 S.W.2d at 688 (Daniel, J., concurring) ("It is my opinion that . . . the Legislature did not intend [the Open Records Act] to be as broad as it was written."); *id*. (Johnson, J., concurring) ("Since a majority of this court has concluded that Rule 9.040 of the Industrial Accident Board is invalid . . . this writer joins Justice Doughty's opinion insofar as it requires that certain information in the Board's records be withheld to protect the common law right of privacy of compensation claimants."); *id*. at 691–92 (Reavley, J., dissenting) ("I doubt that we are entitled to read this intent into the Legislature's use of 'confidential.' . . . It was not the intention of the Legislature to turn over the administration of the Open Records Act to the judiciary. I would construe our question of legislative intent in favor of disclosure and then await legislative change if the result is objectionable. This area of confidentiality can best be mapped by statute.").

such information should be considered to be confidential under section 552.101. The Comptroller acknowledges that no judicial decision has ever held that information is confidential because disclosure of such would violate the tort of intrusion upon seclusion, and no Texas court has ever held that the intrusion upon seclusion tort can be violated by a disclosure of information. *Cf. Valenzuela v. Aquino*, 853 S.W.2d 512, 513 (Tex. 1993); *Cornhill Ins. PLC v. Valsamis*, *Inc.*, 106 F.3d 80, 85 (5th Cir. 1997) (applying Texas law); *Clayton v. Wisener*, 190 S.W.3d 685, 696–97 (Tex. App.—Tyler 2005, no writ); *Wilhite v. H.E. Butt Co.*, 812 S.W.2d 1, 6 (Tex. App.—Corpus Christi 1991, no writ).

The elements of the torts of public disclosure of private facts (as applied in *Industrial Foundation*) and intrusion upon seclusion contain important differences. The public disclosure tort has two elements: "information [is] deemed confidential by law if (1) the information contains highly intimate or embarrassing facts the publication of which would be highly objectionable to a reasonable person, and (2) the information is not of legitimate concern to the public." *Indus. Found.*, 540 S.W.2d at 685. On the other hand, the intrusion tort's elements are: "(1) an intentional intrusion, physically or otherwise, upon another's solitude, seclusion, or private affairs or concerns, which (2) would be highly offensive to a reasonable person." *Valenzuela*, 853 S.W.2d at 513.

The Comptroller attempts to expand section 552.101 to include as confidential by judicial decision information that would be protected by the intrusion upon seclusion tort. For this argument to succeed, the Court would have to redefine the intrusion tort to include the disclosure of birth date information that *may* lead to an intrusion (i.e. by an identity thief). This connection is difficult to make. For instance, if a burglar enters your house, reads through your private files and papers, and

steals your credit cards and identification, is the publisher of the phone book from which the burglar obtained your address liable for the intrusion? The answer is, of course, no. The tort of intrusion upon seclusion can only be committed by "[o]ne who intentionally intrudes, physically or otherwise, upon the solitude or seclusion of another or his private affairs or concerns." *Id*. The tort is not committed by one who unintentionally facilitates the possible intrusion. Moreover, no Texas court has ever found a violation of the intrusion tort absent a physical intrusion or surveillance upon the seclusion of another, and the Comptroller does not cite any judicial decision that has ever made such a determination. *Cf. Clayton*, 190 S.W.3d at 696–97; *Wilhite,* 812 S.W.2d at 6; *Valsamis,* 106 F.3d at 85.

Industrial Foundation is very clear that the question is whether the disclosure itself, not the requestor's use of the information, would violate an individual's right to privacy. "[I]f a *governmental unit's action* in making its records available to the general public would be an invasion of an individual's freedom from the publicizing of his or her private affairs, then the information in those records should be deemed confidential by judicial decision under . . . the Act." *Indus. Found*, 540 S.W.2d at 683 (emphasis added). Justice Reavley, in dissent, also agreed that the Legislature is "concerned with confidentiality entirely apart from the manner of use of the information." *Id*. at 692 (Reavley, J., dissenting). The analysis should focus on whether the government's disclosure would violate the individual's privacy. For PIA tenets to apply based on the use rather than nature of the information would require government entities to obtain the reasons why the information is requested. This would contradict the clear prohibition in the PIA against government inquiries into the purpose for the requested information. TEX. GOV'T CODE § 552.222; *A & T Consultants, Inc.*

v. Sharp, 904 S.W.2d 668, 676 (Tex. 1995) (holding that courts may neither consider purpose of the request nor inquire into how the requestor intends to use the information).

The Comptroller's argument for extending *Industrial Foundation* to include an alternative analysis of section 552.101 using the intrusion upon seclusion tort is not supported by the provisions of the PIA.

D. Application of the Industrial Foundation *Test*

The *Industrial Foundation* test holds that information "is excepted from mandatory disclosure . . . as information deemed confidential by law if (1) the information contains highly intimate or embarrassing facts the publication of which would be highly objectionable to a reasonable person, and (2) the information is not of legitimate concern to the public." *Indus. Found.*, 540 S.W.2d at 685. I first analyze whether birth date information is highly intimate or embarrassing information, the publication of which would be highly objectionable to a reasonable person.

The Court in *Industrial Foundation* analyzed information contained in workers' compensation files to determine whether it satisfied this element of the tort. The Court reasoned that some information would satisfy the "highly intimate" standard, including:

> a claim for injuries arising from a sexual assault of a female clerk following an armed robbery; a claim on behalf of illegitimate children for benefits following their father's death; a teacher's claim for expenses of a pregnancy resulting from the failure of a contraceptive device; claims for psychiatric treatment of mental disorders following work related injuries; claims for injuries to sexual organs, and for injuries stemming from an attempted suicide; and claims of disability caused by physical or mental abuse by co-employees or supervisors.

Id. at 683. This is the deeply personal, highly intimate type of information the tort is meant to protect from publicity.

The Second Restatement of Torts also gives examples of information that rises to the level of highly intimate or embarrassing. "Sexual relations, for example, are normally entirely private matters, as are family quarrels, many unpleasant or disgraceful or humiliating illnesses, most intimate personal letters, most details of a man's life in his home, and some of his past history that he would rather forget." RESTATEMENT (SECOND) OF TORTS § 652D cmt. b (1977). Contrasting this private information, the Restatement notes, "there is no liability for giving publicity to facts about the plaintiff's life that are matters of public record, such as the *date of his birth*, the fact of his marriage, [or] his military record . . . ." *Id.* (emphasis added). The U.S. Court of Appeals for the Fifth Circuit, interpreting Texas law, came to the same conclusion:

> However, none of these items of information — middle initial, age, street address, job title — can be characterized under Texas law as "private" and "highly intimate or embarrassing facts about a person's private affairs, such that its publication would be highly objectionable to a person of ordinary sensibilities." Texas invasion of privacy law in this respect has been guided by Prosser, *Law of Torts* § 117 (4th ed. 1971) and Restatement (Second) of Torts § 652D. Prosser, *supra*, states "'[t]he plaintiff cannot complain when . . . publicity is given to matters such as the *date of his birth*.'" *Id*. § 117 at 858 . . . . The Restatement (Second) of Torts . . . is to the same effect . . . "[t]here is no liability for giving publicity to facts about the plaintiff's life . . . such as the *date of his birth* . . . ."

Johnson v. Sawyer, 47 F.3d 716, 732–33 (5th Cir. 1995) (citing *Indus. Found.*, 540 S.W.2d at 682–84) (further citations omitted) (emphasis added). If disclosure of birth dates is held to violate the public disclosure of private facts tort, the consequence to tort law would be to potentially allow recovery for damages whenever someone publicizes information as "highly intimate" as a birth date. The public disclosure tort was not meant to protect such information from publicity. *See Johnson*, 47 F.3d at 732; RESTATEMENT (SECOND) OF TORTS § 652D cmt. b (1977).

The Comptroller argues that the combination of birth date information and other identifying information, such as a name, rises to the level of "highly intimate" justifying exclusion from disclosure. She argues that because birth date information, in conjunction with this other information, can be *used* to access sensitive information, such as a social security number, birth date information itself is sensitive information. The argument casts too broad a net and misses the essence of the inquiry. How otherwise public information is used after disclosure does not guide the analysis of whether it is confidential and excepted from disclosure under section 552.101. *See Indus. Found.* 540 S.W.2d at 692 (Reavley, J., dissenting) ("I read the Legislature to be concerned with confidentiality entirely apart from the manner of use of the information."). If that analysis were determinative, much of the defined public information would be withheld because of a possibility or likelihood of it being used itself or in conjunction with other public information for inappropriate or illegal purposes. For example, that a person's business address, race, and gender could be *used* by a stalker to identify and commit an assault at the person's workplace, does not convert the work address into confidential information. In addition, the public disclosure tort focuses on the character of the information itself. Is it "highly intimate" such that its mere publication would be objectionable to a reasonable person? *See Indus. Found.* 540 S.W.2d at 683. How the information is used once it is made public, while of obvious concern to policy-makers who balance the risks in writing statutes, does not drive the analysis in interpreting section 552.101. Accordingly, public employees' birth dates do not constitute highly intimate or embarrassing facts the publication of which would be highly objectionable to a reasonable person.

This information is also of legitimate public concern. The News contends that birth date information ensures accuracy in identifying subjects of newspaper articles, and the information has also been used to determine that criminal offenders have been employed by some public school systems. The Comptroller has offered no response to this contention. In any event, birth date information does not satisfy the first requirement of the public disclosure analysis, that the information contain highly intimate or embarrassing facts the publication of which would be highly objectionable to a reasonable person. I would conclude that the disclosure of birth date information does not violate the public disclosure tort, and birth date information is not confidential under section 552.101 of the PIA.

E. The Balancing Test

The Court applies a balancing test following the U.S. Supreme Court's decision in *Rose v. Department of the Air Force*, 425 U.S. 352 (1976), to hold that birth date information is confidential under our PIA. In that case, the Supreme Court interpreted Exemption 6 of FOIA, which excepts from disclosure "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." *Id.* at 370 (quoting 5 U.S.C. § 552(b)(6)). The Court held that the language "clearly unwarranted invasion of personal privacy" in the statute was a Congressional mandate for courts to balance "the individual's right of privacy against the preservation of the basic purpose of the Freedom of Information Act 'to open agency action to the light of public scrutiny.'" *Id.* at 372.

As noted above, the pivotal language in FOIA Exemption 6 is not contained in section 552.101 of the Texas PIA. The Court should not create a balancing test for the section 552.101

analysis when the language from which the test arises ("clearly unwarranted invasion of personal privacy") is not contained in the relevant provision. *See Indus. Found.*, 540 S.W.2d at 681–82 ("Absent [a provision with the "clearly unwarranted" language], we do not believe that a court is free to balance the public's interest in disclosure against the harm resulting [from] disclosure."). Therefore, the Court's balancing test is inappropriate here, and we should leave for another day whether a balancing test is appropriate for any determination under section 552.102, or, as the Austin Court of Appeals held in *Hubert v. Harte-Hanks Texas Newspapers, Inc.* twenty-seven years ago, that the test is the same under both sections. 652 S.W.2d 546, 550 (Tex. App.—Austin 1983, writ ref'd n.r.e.).

IV. Fee Shifting

The News also challenges the trial court's refusal to award attorney's fees under the PIA and the Uniform Declaratory Judgment Act as an abuse of discretion, based upon language in two sections of the PIA that were in effect at the time of this suit but have subsequently been amended. TEX GOV'T CODE §§ 552.323(b), .324.[14] The Court did not address the issue at length because the

[14] Each of these sections has since been amended, clarifying the attorney's fees issue. The Legislature moved the cause of action from Texas Government Code section 552.353(b)(3) to 552.324. The amended section 552.324 now reads:

> (a) The only suit a governmental body may file seeking to withhold information from a requestor is a suit that:
>
> (1) is filed in a Travis County district court against the attorney general in accordance with Section 552.325; and
>
> (2) seeks declaratory relief from compliance with a decision by the attorney general issued under Subchapter G.
>
> (b) The governmental body must bring the suit not later than the 30th calendar day after the date the governmental body receives the decision of the attorney general determining that the requested information must be disclosed to the requestor . If the governmental body does not bring suit within that period, the governmental body shall comply with the decision of the attorney general. If a governmental body wishes to preserve an affirmative defense for its officer for public information as provided in Section 552.353(b)(3), suit must be filed within the deadline provided in Section 552.353(b)(3) .

Comptroller prevailed. ___ S.W.3d ___. In my view, the News should prevail, but I would hold that the trial court was correct in exercising its discretion in deciding whether to assess attorney's fees against the Comptroller. Because the Comptroller had a legitimate concern over privacy issues relating to the disclosure of birth date information under the PIA, she had a reasonable basis in law to refuse disclosure of the information and the litigation was brought in good faith. Accordingly, I concur in the judgment of the Court on the attorney's fees issue.

V. Conclusion

The Legislature's comprehensive statutory scheme that guarantees public access to government information through the PIA, with selected exceptions, does not make birth dates confidential under section 552.101. Because the Court reaches a different result based on an issue the Comptroller waived, I respectfully dissent. I concur in the judgment on the attorney's fees issue.

Dale Wainwright
Justice

Opinion Delivered: December 3, 2010

TEX. GOV'T CODE § 552.324. Section 552.353(b)(3) now reads:

> (b) It is an affirmative defense to prosecution under Subsection (a) that the officer for public information reasonably believed that public access to the requested information was not required and that:
>
> > (3) not later than the 10th calendar day after the date of receipt of a decision by the attorney general that the information is public, the officer or the governmental body for whom the defendant is the officer for public information filed a petition for a declaratory judgment against the attorney general in a Travis County district court seeking relief from compliance with the decision of the attorney general, as provided by Section 552.324, and the cause is pending.

Id. § 552.353(b)(3). And section 552.323(b) now explicitly allows the trial court to shift fees in an action under section 552.324:

> (b) In an action brought under Section 552.324, the court may assess costs of litigation and reasonable attorney's fees incurred by a plaintiff or defendant who substantially prevails. . . .

Id. § 552.323(b). This new statutory scheme should prevent the confusion found here from occurring in future cases.

IN THE SUPREME COURT OF TEXAS

NO. 08-0215

UNIVERSITY OF TEXAS SOUTHWESTERN MEDICAL CENTER AT DALLAS, PETITIONER,

v.

THE ESTATE OF IRENE ESTHER ARANCIBIA BY ITS BENEFICIARY VICTOR HUGO VASQUEZ-ARANCIBIA, VICTOR HUGO VASQUEZ-ARANCIBIA, INDIVIDUALLY, AND CECILIA VASQUEZ-ARANCIBIA, INDIVIDUALLY, RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued September 10, 2009

CHIEF JUSTICE JEFFERSON delivered the opinion of the Court, joined by JUSTICE HECHT, JUSTICE MEDINA, JUSTICE GREEN, JUSTICE WILLETT, JUSTICE GUZMAN, and JUSTICE LEHRMANN.

JUSTICE JOHNSON delivered a dissenting opinion, joined by JUSTICE WAINWRIGHT.

This appeal turns not on the merits of the underlying claim but on whether prerequisites to suit have been satisfied, and if not, whether an interlocutory appeal is available. Because the relevant requirements were met here, and because interlocutory appeal was appropriate, we affirm the court of appeals' judgment.

I. Background

Irene Arancibia underwent laparoscopic hernia surgery at Parkland Memorial Hospital on September 4, 2003. The procedure was performed by two resident physicians, Drs. Curtis and Yau, and attended by Dr. Watson, an assistant professor of surgery in the gastrointestinal/endocrine division, Department of Surgery, at U.T. Southwestern in Dallas. Arancibia was discharged later that day. Two days later, she presented to Parkland's emergency room with severe abdominal pain. Emergency surgery revealed that, during the hernia repair, her bowel had been perforated in two places, leading to acute peritonitis with sepsis. She died the following day.

Her family initially sued the operating physicians but later nonsuited them, naming Southwestern and Parkland in their stead. Southwestern moved to dismiss the case, contending that the trial court lacked jurisdiction because the Arancibias failed to provide timely notice of their claim. The trial court denied the plea, and the court of appeals affirmed. 244 S.W.3d 455, 462. We granted the petition for review, 52 Tex. Sup. Ct. J. 910, 911 (June 26, 2009), and now affirm.

II. The 2005 amendment to Government Code section 311.034 applies.

Absent a waiver, governmental entities, like Southwestern, are generally immune from suits for damages. *Reata Constr. Corp. v. City of Dallas*, 197 S.W.3d 371, 374 (Tex. 2006). The Texas Tort Claims act waives immunity from suit "to the extent of liability created by [the Act]." TEX. CIV. PRAC. & REM. CODE § 101.025(a). To take advantage of this waiver, the plaintiffs must notify the government of a claim within six months. *Id*. § 101.101(a). The notice must reasonably describe the injury, the time and place of the incident, and the incident itself. *Id*. But this formality is not required "if the governmental unit has actual notice that death has occurred [or] that the claimant has received some injury." *Id*. § 101.101(c).

In 2004, we concluded that the notice requirements were mandatory, rather than jurisdictional, and that there was no interlocutory appellate jurisdiction over an order that denied a governmental unit's jurisdictional plea based on a claimant's failure to provide notice. *See Univ. of Tex. Sw. Med. Ctr. v. Loutzenhiser*, 140 S.W.3d 351, 365-66 (Tex. 2004). Shortly thereafter, the Legislature amended the Government Code to provide that "[s]tatutory prerequisites to a suit, including the provision of notice, are jurisdictional requirements in all suits against a governmental entity." TEX. GOV'T CODE § 311.034. The 2005 amendment did not change those statutory prerequisites; it merely stated the consequence of a failure to comply with them. The amendment took effect September 1, 2005. Act of May 25, 2005, 79th Leg., R.S., ch. 1150, § 2, 2005 Tex. Gen. Laws 3783, 3783.

Southwestern then filed a plea to the jurisdiction, contending that it had no pre-suit notice (formal or actual) of the Arancibias' claim. The court of appeals did not reach this issue, because it held that this case, filed years before the 2005 amendment, was not governed by its terms—an issue that has led to considerable disagreement among our courts of appeals (including a split between Houston's First and Fourteenth Districts).[1]

---

[1] 244 S.W.3d at 459 (holding that amendment was "not retroactive"); *compare Howard v. Harrell*, No. 07-08-0013-CV, 2009 Tex. App. LEXIS 2322, *10-11 (Tex. App—Amarillo Mar. 31, 2009, no pet.)(amendments to section 311.034 do not apply to case filed before statute enacted), *and Dallas Cty. v. Posey*, 239 S.W.3d 336, 339 (Tex. App.—Dallas 2007) (same), *vacated on other grounds*, *Dallas Cty. v. Posey*, 290 S.W.3d 869, 872 n.1 (Tex. 2009) (per curiam), *and Tex. Tech Univ. Health Sci. Ctr. v. Lucero*, 234 S.W.3d 158, 166 (Tex. App.—El Paso 2007, pet. denied) (same), *and Baylor Coll. of Med. v. Hernandez*, 208 S.W.3d 4, 8 (Tex. App.—Houston [14th Dist.] 2006, pet. denied) (same) *with Tex. Dep't of Criminal Justice v. Thomas*, 263 S.W.3d 212, 218 (Tex. App.—Houston [1st Dist.] 2007, pet. denied) (amendment applies to case filed before enactment), *and Med. Arts Hosp. v. Robison*, 216 S.W.3d 38, 41 (Tex. App.—Eastland 2006, no pet.) (same), *and Tex. Dep't of Criminal Justice v. Simons*, 197 S.W.3d 904, 906-07 (Tex. App.—Beaumont 2006, no pet.)(same); *see also* Hon. Scott Brister, *Is It Time To Reform Our Courts of Appeals?*, 40 HOUS. LAW. 22, 25 (Mar./Apr. 2003) (noting that "conflicting interpretations of the law are especially acute in Houston, due both to the volume of litigation in Harris County and the larger uncertainty as to who will hear the

If the amendment applies, a lack of notice would be jurisdictional, meaning that the trial court could dispose of the case on a plea to the jurisdiction, and a governmental unit would have a statutory right of interlocutory appeal if the plea failed. TEX. CIV. PRAC. & REM. CODE § 51.014(a)(8); *Loutzenhiser*, 140 S.W.3d at 359. If the requirement is merely mandatory, a governmental unit would be entitled to summary judgment, but the trial court's denial of that motion could not be immediately appealed, and the governmental unit could waive the issue. *Loutzenhiser*, 140 S.W.3d at 359.

The Legislature did not state whether the amendment applied prospectively or retroactively, nor did the act contain a savings clause for pending suits. The amendment merely provided that it "takes effect September 1, 2005." Act of May 25, 2005, 79th Leg., R.S., ch. 1150, § 2, 2005 Tex. Gen. Laws 3783, 3783. We presume the statute is prospective unless expressly made retrospective. *See* TEX. GOV'T CODE § 311.022.

But the prospectivity presumption does not necessarily answer whether the amendment governs this suit. Another rule provides that a court is to apply the law in effect at the time it decides the case. *See Bradley v. Sch. Bd. of the City of Richmond*, 416 U.S. 696, 711 (1974); *Tex. Mun. Power Agency v. Public Utils. Comm'n of Tex.*, 253 S.W.3d 184, 198 (Tex. 2007)(explaining that jurisdictional statutes should be applied as they exist at the time judgment is rendered); *see also Landgraf v. USI Film Prods*., 511 U.S. 244, 264 (1994)(noting the "apparent tension" between these two maxims). On closer examination, however, these two rules can be reconciled. *See Landgraf*,

---

appeal"). This conflict gives us jurisdiction over this interlocutory appeal. TEX. GOV'T CODE § 22.225(c), (e).

511 U.S. at 273 (noting that "[e]ven absent specific legislative authorization, application of new statutes passed after the events in suit is unquestionably proper in many situations"). A statute does not operate retroactively merely because it is applied in a case arising from conduct predating the enactment. *Id*. at 269.

The prohibition against retroactive application of laws does not apply to procedural, remedial, or jurisdictional statutes, because such statutes typically do not affect a vested right. *Tex. Mun. Power Agency*, 253 S.W.3d at 198. Because application of a new jurisdictional rule generally takes away no substantive right but simply impacts a tribunal's power to hear the case, present law normally governs in such situations. *Landgraf*, 511 U.S. at 273 ("When the intervening statute authorizes or affects the propriety of prospective relief, application of the new provision is not retroactive."). Thus, the Supreme Court of the United States has "regularly applied intervening statutes conferring or ousting jurisdiction, whether or not jurisdiction lay when the underlying conduct occurred or when the suit was filed." *Id*. at 274. Statutes—like section 311.034—that do not deprive the parties of a substantive right and "speak to the power of the court rather than to the rights or obligations of the parties" may be applied to cases pending at the time of enactment. *Id*. at 274-75 (noting that "[c]hanges in procedural rules may often be applied in suits arising before their enactment without raising concerns about retroactivity") (citations omitted). We agree that it is appropriate to do so here, and such a construction is not retroactive. *See Quick v. City of Austin*, 7 S.W.3d 109, 132 (Tex. 1999).

Because the amendment applies, the purported failure to provide notice would deprive the trial court of jurisdiction, an issue that may be raised on interlocutory appeal. We now turn to Southwestern's contention that it lacked actual notice under the Act.

III. Southwestern had actual notice under Government Code section 101.101(c).

The Tort Claims Act states that formal notice is not required "if the governmental unit has actual notice that death has occurred, that the claimant has received some injury, or that the claimant's property has been damaged." TEX. CIV. PRAC. & REM. CODE § 101.101(c). But we have rejected an interpretation of actual notice that would "require[] *only* that a governmental unit have knowledge of a death, an injury, or property damage," because a defendant, like a hospital, would then have "to investigate the standard of care provided to each and every patient that received treatment," eviscerating the notice requirement's purpose. *See Cathey v. Booth*, 900 S.W.2d 339, 341 (Tex. 1995) (emphasis added). Instead, we held that the governmental unit had to know of its "alleged fault producing or contributing to the death, injury, or property damage."[2] *Id*. This standard led to some confusion among our courts of appeals,[3] and we explained it further in *Texas Department of Criminal Justice v. Simons*, 140 S.W.3d 338 (Tex. 2004):

> What we intended in *Cathey* by the second requirement for actual notice was that a governmental unit have knowledge that amounts to the same notice to which it is entitled by section 101.101(a). That includes subjective awareness of its fault, as ultimately alleged by the claimant, in producing or contributing to the claimed injury.

---

[2] We also held that actual notice required that the governmental unit know of the death, injury, or damages claimed, as well as the identity of the parties involved. *Cathey v. Booth*, 900 S.W.2d at 341. Southwestern does not dispute that it had notice of those matters in this case.

[3] *See Tex. Dep't of Criminal Justice v. Simons*, 140 S.W.3d 338, 345-48 (Tex. 2004) (collecting cases).

Simons, 140 S.W.3d at 347. We observed that, if a governmental unit had this awareness of fault, along with the other information to which it was entitled under section 101.101(a), then requiring formal, written notice in addition would do nothing to further the statutory purposes of information gathering, settling claims, and preparing for trial.[4] *Id.*

We must, then, decide whether this record demonstrates Southwestern's subjective awareness of its fault, as ultimately alleged by the Arancibias, in producing or contributing to Arancibia's death. Although we have said that actual notice may be a fact question when the evidence is disputed, *id.* at 348, the pertinent facts here are uncontested. Dr. Watson was present during Arancibia's laparoscopic hernia repair. The day after her death, Watson emailed his immediate supervisor, who was chief of the division. The email begins, "I wanted to give you a heads up on a terrible outcome with a Surgery A patient." Watson described the surgery, which he believed went well, and Arancibia's return to the emergency room two days later. A laparotomy at that time "showed an unrecognized bowel injury," and Arancibia died the next day of multiple organ failure. Watson's email concluded, "I have already spoken with risk mgt."

Watson's supervisor responded, thanking Watson for the notification and mentioning that he would forward the email to the Chair of the Department of Surgery. The Chair responded and discussed several of the reasons patients might present with symptoms more than twenty-four hours after surgery. His email began, "I heard about this today."

---

[4] We did not decide whether the TDCJ had actual notice of Simons's claim because, in a case decided the same day as *Simons*, we held that a claimant's failure to provide notice did not deprive the trial court of jurisdiction. *See Simons*, 140 S.W.3d at 348-49 (citing *Univ. of Tex. Sw. Med. Ctr. v. Loutzenhiser*, 140 S.W.3d 351 (Tex. 2004)).

Dr. Watson surmised that the bowel perforation "was a result of a retraction injury out of the field of view." He stated that, in Arancibia's subsequent surgery, the physician observed a "through and through hole in the jejunum."[5] This was confirmed by the surgery records, which showed two perforations in the jejunum.

Shortly thereafter, upon reviewing Arancibia's treatment, Watson's supervisor concluded that "[a] technical error occurred during the original hernia operation resulting in a through-and-through small bowel injury" and that "[c]linical management contributed to" Arancibia's death. He stated that "[a]lthough unfortunate, this is a recognized complication of laparoscopic hernia surgery. No standard of care issues were identified upon review."

We conclude that this record shows that Southwestern was subjectively aware of its fault, as ultimately alleged by the Arancibias, in producing or contributing to Arancibia's death. Although Dr Watson's supervisor determined that there were no standard of care violations, he noted that a "technical error" was made, that clinical management contributed to Arancibia's death, and that the care "was not necessarily consistent with established standards." His ultimate conclusion that those errors were acceptable does not detract from his subjective awareness that medical error contributed to Arancibia's death. It is true that, although Watson said he had contacted risk management, there was no evidence of why he did so or what he reported. But Watson and his superiors knew that Arancibia had died of multiple organ failure caused by sepsis, that her jejunum had been perforated in two places (an injury that Watson surmised probably occurred when surgical tools were being

[5] The jejunum is "the first two fifths of the small intestine beyond the duodenum usu. merging almost imperceptibly with the ileum though somewhat larger, thicker-walled, and more vascular and having more numerous circular folds and fewer Peyer's patches." WEBSTER'S THIRD NEW INTERNATIONAL DICTIONARY 1213 (2002).

retracted), and that risk management had been alerted. *Simons*, 140 S.W.3d at 348 (noting that subjective awareness will often be proved, "if at all, by circumstantial evidence").

Fault, as it pertains to actual notice, is not synonymous with liability; rather, it implies responsibility for the injury claimed. Thus, we have held that a police report showing that barricades were missing was not evidence of a governmental unit's subjective awareness of its fault after an accident, because "a private contractor or another governmental entity (such as the county or state) could have been responsible for the [missing barricades]." *City of Dallas v. Carbajal*, 53 Tex. Sup. Ct. J. 715, 716 (May 7, 2010) (per curiam). But that cannot be the case when the sole instrumentality of harm is the government itself. Here, the government has conceded that its surgical error perforated Arancibia's intestine, resulting in sepsis, multiple organ failure, and death. A jury may absolve the government of liability for that death for any number of reasons. But a government cannot evade the determination by subjectively refuting fault. We cannot conclude that Southwestern was unaware of its fault in producing or contributing to the injury alleged.

Under the dissent's approach, only an unqualified confession of fault would provide actual notice of the incident. The dissent would conclude that because Southwestern's internal investigation found no breach of the standard of care, Southwestern could not have been aware of its fault in producing or contributing to Arancibia's death. But "fault" as required under *Simons* is not fault as defined by *the defendant*, but rather "as ultimately alleged by *the claimant*." *Simons*, 140 S.W.3d at 347 (emphasis added). Here, the Arancibias alleged that physician error led to Arancibia's perforated intestine and, ultimately, her death. That Southwestern was aware that its surgeons' errors caused those perforations and that clinical management contributed to her death is undisputed.

The purpose of the notice requirement is "to enable governmental units to gather information necessary to guard against unfounded claims, settle claims, and prepare for trial." *Cathey*, 900 S.W.2d at 341. The notice here satisfied that requirement; "requiring formal, written notice in addition would do nothing to further the purpose of the statute." *Simons*, 140 S.W.3d at 347. Indeed, such notice would state exactly what Southwestern already knew. And while a bad result, in and of itself, is not evidence of a breach of the standard of care, the proof of actual notice in this case went beyond the mere fact of Arancibia's death. Viewing the evidence in the light most favorable to the Arancibias, as we must,[6] Southwestern had actual notice as required by section 101.101(c).

IV. We need not reach the question of whether a party may raise on interlocutory appeal an issue of sovereign immunity that it failed to raise in the trial court.

Even assuming that it had the requisite notice, Southwestern contends that the Arancibias did not substitute it as a party within thirty days of Dr. Watson's motion to dismiss under Tort Claims Act section 101.106. *See* TEX. CIV. PRAC. & REM. CODE § 101.106(f). Because Southwestern failed to raise this argument in the trial court, the court of appeals refused to consider the issue on interlocutory appeal. 244 S.W.3d at 461. Southwestern challenges this conclusion and argues that because we have held that immunity implicates subject matter jurisdiction, we may reach on interlocutory appeal issues the parties failed to raise in the trial court. The Arancibias disagree, contending that immunity is different from standing, ripeness, or other matters involving subject matter jurisdiction, and interlocutory appeal is different from final judgment.

---

[6] *See Tex. Dep't of Parks & Wildlife v. Miranda*, 133 S.W.3d 217, 228 (Tex. 2004).

We need not resolve this issue today. The 101.106 argument fails as a matter of law even if Southwestern could raise the issue for the first time on interlocutory appeal.

V. Dr. Watson's answer was not a 101.106 motion.

Section 101.106(f) requires that "[o]n the employee's motion, the suit against the employee shall be dismissed" unless amended pleadings naming the governmental unit as a defendant are filed within thirty days. TEX. CIV. PRAC. & REM. CODE § 101.106(f). Dr. Watson moved to dismiss the case against him on January 20, 2005. Eight days later, the Arancibias filed their amended petition naming Southwestern as a defendant.

Southwestern argues that the Arancibias failed to meet the thirty-day deadline because the last sentence of Dr. Watson's answer (and his prayer), filed months earlier, mentioned 101.106 and prayed for dismissal. Southwestern urges us to treat Watson's general denial as if it were a 101.106 motion, triggering the thirty-day amended pleading deadline.

We conclude that Southwestern's general denial was not a 101.106(f) motion. Section 101.106(f) lists several prerequisites that must be satisfied before an employee is entitled to dismissal. The employee must show that the suit was filed against him based on conduct within the general scope of his employment and that it could have been brought under chapter 101 against the governmental unit only. *See id.* Watson's motion attached an affidavit stating he was acting within the scope of his employment with Southwestern; his answer did not.

Watson's motion incorporated portions of Arancibia's petition and argued that the claims she alleged were ones that could have been brought against Southwestern in the first instance; his answer did not.

Watson's motion was entitled "Motion to Dismiss Pursuant to TCPRC Section 101.106"; his answer was not.[7]

The motion attached a blank fiat setting the matter for hearing; the answer did not.

The parties' Rule 11 agreement stated that Dr. Watson would not file a 101.106(f) motion before January 31, 2005 (long after he had filed his answer). While that agreement has no bearing on whether the answer was a motion, it shows that the parties certainly did not consider it as such. Nor do we.

Watson's answer bears little resemblance to the motion he filed subsequently. Pleadings must give fair notice of a claim, and we must construe them "so as to do substantial justice." TEX. R. CIV. P. 45. Construing the answer as a 101.106(f) motion would not comport with this rule. Even assuming Southwestern's 101.106 complaint was properly before us, Watson's answer was not a motion to dismiss under section 101.106(f).

VI. Conclusion

Southwestern had the right of interlocutory appeal, but it also had actual notice and a timely substitution after a section 101.106 motion. We affirm the court of appeals' judgment. TEX. R. APP. P. 60.2(a).

Opinion Delivered: October 22, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0215

UNIVERSITY OF TEXAS SOUTHWESTERN MEDICAL CENTER AT DALLAS, PETITIONER,

v.

THE ESTATE OF IRENE ESTHER ARANCIBIA BY ITS BENEFICIARY VICTOR HUGO VASQUEZ-ARANCIBIA, VICTOR HUGO VASQUEZ-ARANCIBIA, INDIVIDUALLY, AND CECILIA VASQUEZ-ARANCIBIA, INDIVIDUALLY, RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued September 10, 2009

JUSTICE JOHNSON, joined by JUSTICE WAINWRIGHT, dissenting.

I agree that the Tort Claims Act's prerequisites to suit are jurisdictional as to the Arancibias' claim. And because the Arancibias did not give timely formal notice of their claim as required by the Tort Claims Act, U. T. Southwestern's immunity from suit was waived only if it had actual notice of the Arancibias' claim as the term "actual notice" is used in the Tort Claims Act. In order for Southwestern to have had actual notice, it had to have timely, subjective knowledge that it was at fault in causing Irene Arancibia's death. *See Tex. Dep't of Criminal Justice v. Simons*, 140 S.W.3d 338, 348 (Tex. 2004). The basis for the Arancibias' claim that Southwestern was at fault

is that the surgeons who first operated on Irene negligently caused her death by breaching the applicable standard of care. The Court does not identify evidence that Southwestern knew the injuries to Irene were caused by breach of a standard of care and that it therefore had actual subjective awareness it was at fault in causing Irene's death. Thus, I disagree with the Court's conclusion that Southwestern had timely, actual notice of the Arancibias' claim within the meaning of the Tort Claims Act.

I.

The Arancibia family did not give notice of claim to Southwestern, Parkland Hospital, where the surgery was performed, or any of the doctors who performed the first surgery until over seven months after Irene's death. By a letter dated May 7, 2004, they notified Dr. Mark Watson, who had supervised Irene's surgery, that the family intended to pursue legal action. On August 3, 2004, Irene's son and daughter filed suit against Dr. Watson and the doctors who had performed the surgery, Drs. Curtis and Yau, individually. They alleged that in several ways the doctors breached applicable standards of care and the breaches caused Irene's death. On January 28, 2005, the Arancibias amended their pleadings. They added Southwestern and Dallas County Hospital District d/b/a Parkland Hospital (collectively, the entities) as defendants and dismissed the doctors. The entities pled lack of notice under the Tort Claims Act and sought dismissal on the basis of sovereign immunity.

The trial court denied the entities' jurisdictional pleas and the court of appeals affirmed. 244 S.W.3d 455, 460.

Only Southwestern filed a petition for review. It asserts, in part, that sovereign immunity bars the Arancibias' claims because section 311.034 makes prerequisites to suit jurisdictional, *see* TEX. GOV'T CODE § 311.034, the Arancibias admittedly failed to give timely notice of claim under section 101.101(a), *see* TEX. CIV. PRAC. & REM. CODE § 101.101(a), and Southwestern did not have actual notice of the claim pursuant to section 101.101(c). *See id.* § 101.101(c). In response, the Arancibias urge that formal notice to Southwestern was not required because they first sued the doctors individually as opposed to the entities, and reading the Tort Claims Act to require pre-suit notice to Southwestern under such circumstances would yield an absurd result. They also claim that Southwestern had actual notice of their claim so formal notice under section 101.101(a) was not required.

II.

Section 101.101(a) of the Tort Claims Act establishes the general rule that timely notice of a claim must be given to a governmental entity as a prerequisite to suit against that entity:

> A governmental unit is entitled to receive notice of a claim against it under this chapter not later than six months after the day that the incident giving rise to the claim occurred. The notice must reasonably describe:
>
> (1) the damage or injury claimed;
> (2) the time and place of the incident; and
> (3) the incident.

TEX. CIV. PRAC. & REM. CODE § 101.101(a). As the Court notes, the purpose of the notice requirement "is to ensure prompt reporting of claims in order to enable governmental units to gather information necessary to guard against unfounded claims, settle claims, and prepare for trial."

Cathey v. Booth, 900 S.W.2d 339, 341 (Tex. 1995) (citing *City of Houston v. Torres*, 621 S.W.2d 588, 591 (Tex. 1981)).

Even absent the formal notice of claim required by section 101.101(a), however, section 101.101(c) waives a governmental entity's immunity if the entity "has actual notice that death has occurred, that the claimant has received some injury, or that the claimant's property has been damaged." TEX. CIV. PRAC. & REM. CODE § 101.101(c). In *Cathey*, the Court held that to have actual notice under section 101.101(c), the governmental unit must have "knowledge of (1) a death, injury, or property damage; (2) the governmental unit's alleged fault producing or contributing to the death, injury, or property damage; and (3) the identity of the parties involved." *Id.* at 341.

The Court clarified the second element of this standard—the governmental unit's alleged fault producing or contributing to the death, injury, or property damage—in *Simons*, a case strikingly similar to the case before us in regard to whether the governmental entity had actual notice of its fault. *See* 140 S.W.3d 338. In *Simons*, a work crew from the Terrell Unit of the Texas Department of Criminal Justice was digging postholes using an auger attached to a power take-off (PTO) mounted on the rear of a tractor. The auger became stuck in the ground, so the PTO was disengaged and a pipe wrench was attached to the auger in an attempt to back the auger out of the ground by hand. The TDCJ work supervisor, Ron Canon, left the area of the auger, went to the tractor and re-engaged the PTO. Simons was struck in the head and severely injured when the auger rotated and the pipe wrench swung around.

TDCJ immediately investigated and took statements from Canon and all the work crew. The statements and the report of the accident submitted by the prison safety officer indicated that when

Canon went back to the tractor to re-engage the PTO, the pipe wrench had been taken off the auger, the workers had been told to stand clear of the auger, and Canon looked back before he engaged the auger and could see Simons but could not see that the pipe wrench, instead of being off the auger, was on the auger. *Id.* at 339-41.

Three days after the accident, the prison safety officer and the TDCJ regional safety officer took a statement from Simons who was in the hospital and on a prescription pain reliever. Simons opined that the person operating the tractor was "kinda new." Simons remembered putting the pipe wrench on the auger and making one or two turns to back the auger out, and he did not remember hearing anyone say "stand clear." He also opined that he did not blame anyone for his injury, he did not want anyone to get in trouble or lose good time over it, it was a mistake and "a mistake is a mistake." 140 S.W.3d at 339-42. Thus, there was an unquestioned, unintended injury that resulted from a TDCJ employee's intentional act of re-engaging the PTO while a pipe wrench was attached to the auger, the wrench was out of the employee's field of view, and the injured person attributed the injury to a "mistake" without directing blame toward anyone specific.

The court of appeals held that TDCJ had actual notice under the Tort Claims Act. *Tex. Dep't of Criminal Justice v. Simons*, 74 S.W.3d 138, 142 (Tex. App.—Beaumont 2002), *rev'd*, 140 S.W.3d 338 (Tex. 2004). In reaching its conclusion, it noted that there was an unquestioned injury, a TDCJ employee had re-engaged the PTO that resulted in the injury, and an investigation was accomplished that put TDCJ on inquiry of its possible fault:

> To support its argument that its records do not raise a fact issue on notice of culpability, the Department relies upon the conclusion it reached after it completed its investigation of the incident. We are concerned here only with the Department's

> realization of its possible culpability, that is, whether the Department realized that it could be accused of negligence arising from the accident. . . . [T]he Department's safety officers conducted an extensive investigation of a serious injury that occurred while the inmates were operating motor-driven machinery in a supervised work detail. Reports were prepared and promptly submitted to the unit's safety committee. That notice, sufficient to put the Department on inquiry of its possible fault, is demonstrated by the existence of the safety review actually conducted. The Department did investigate the accident and gather the information it needed to defend Simons's claim.

Id. This Court disagreed and explained:

> What we intended in *Cathey* by the second requirement for actual notice was that a governmental unit have knowledge that amounts to the same notice to which it is entitled by section 101.101(a). That includes *subjective awareness of its fault, as ultimately alleged by the claimant*, in producing or contributing to the claimed injury. *If a governmental unit has this subjective awareness of fault, along with the other information to which it is entitled under section 101.101(a),* then requiring formal, written notice in addition would do nothing to further the purpose of the statute—which is, "to enable governmental units to gather information necessary to guard against unfounded claims, settle claims, and prepare for trial." It is not enough that a governmental unit should have investigated an incident as a prudent person would have, *or that it did investigate, perhaps as part of routine safety procedures, or that it should have known from the investigation it conducted that it might have been at fault.* If a governmental unit is not subjectively aware of its fault, it does not have the same incentive to gather information that the statute is designed to provide, even when it would not be unreasonable to believe that the governmental unit was at fault.

Simons, 140 S.W.3d at 347-48 (emphasis added).

Proof of a defendant's fault in a health care liability claim does not depend on proof of ordinary negligence, such as failing to assure that no one would be injured by the auger or an attached pipe wrench when a PTO on a tractor was engaged, but is rather dependant on proof that the defendant breached an applicable standard of care. *See* TEX. CIV. PRAC. & REM. CODE § 74.351 (requiring timely service of a report providing an expert's opinion regarding applicable standards of

care, the manner in which the care rendered by the physician or health care provider failed to meet the standards, and the causal relationship between that failure and the injury, harm, or damages claimed); *Murphy v. Russell*, 167 S.W.3d 835, 838 (Tex. 2005). Then, if breach of a standard of care is shown and it is also proved that the breach proximately caused the injury, the defendant may be found liable for damages. *E.g.*, *Hart v. Van Zandt*, 399 S.W.2d 791, 792 (Tex. 1965) (noting that it is not enough in a medical negligence case to show an injury and that the injury might have occurred because of a doctor's negligence). In this case, the Arancibias allege that the surgeons who first operated on Irene were at fault because they breached standards of care. They also allege, of course, that the breaches caused her death and Southwestern is liable for the surgeons' fault or negligence.

III.

A.

The Arancibias first claim that they were not required to give notice of claim to Southwestern at all because they first sued the doctors individually. I disagree.

Under section 101.106 of the Tort Claims Act, plaintiffs must elect to sue either government employees or their employers. TEX. CIV. PRAC. & REM. CODE § 101.106. The Arancibias assert that the notice requirements of section 101.101 do not apply to suits against employees sued individually and because they first sued the doctors individually, interpreting the Tort Claims Act to require notice to the doctors' governmental-entity employers is unreasonable and absurd. They argue that plaintiffs will not generally give notice when they sue government employees individually because they are not required to. Thus, as will generally be the case, if notice has not been given to the entity,

then requiring the governmental entity to be substituted for the employee is unfair and requires a futile action because the entity will do what Southwestern has done here and assert its lack of notice. The Arancibias, however, do not point to any language in the Tort Claims Act that indicates the Legislature intended section 101.106 to dispense with the notice requirements of section 101.101.

In responding, Southwestern makes four arguments: (1) section 101.101(a) specifies that it applies to any claim against a governmental entity "under this chapter," and the clear statutory language contains no exceptions; (2) the Legislature did not intend to allow plaintiffs to grant themselves an exemption from the notice requirement by suing employees first, and to do so makes no sense because regardless of when the governmental entity is sued it still needs notice, so it can investigate the claim; (3) the Arancibias' interpretation would eviscerate the notice requirements of section 101.101 because a plaintiff who failed to give notice could initially sue an individual employee, wait for the inevitable motion to dismiss the employee pursuant to section 101.106(f) and then sue the employer; and (4) it is not unfair, as the Arancibias claim, to require all claimants to give notice pursuant to section 101.101(a)—the notice requirement is clearly stated and compliance is simple and inexpensive.

I agree with Southwestern. There is no language in the Tort Claims Act indicating the Legislature intended section 101.106 to allow persons to sue governmental entities without giving statutory notice. Regardless of the Arancibias' concerns, construing the Tort Claims Act's language as they urge would, for all practical purposes, negate the notice requirements of section 101.101(a). Plaintiffs who failed to give notice of claim as required could sue a governmental employee individually, wait for the employee to move for dismissal, and then sue the employer, thereby

avoiding the notice requirements. Thus, I would hold that regardless of the fact that the Arancibias first filed suit against the doctors individually, the Arancibias must still have satisfied the notice prerequisites of section 101.101 in order to maintain their suit against Southwestern.

B.

As to actual notice, the Arancibias urge that Dr. Watson's e-mails to his supervisor and the subsequent investigation prove, or at least create a fact question about, whether Southwestern had subjective knowledge of its fault. They also rely on testimony by Victor Arancibia that one of the surgeons who performed the corrective surgery after Irene returned to the hospital told Victor "somebody did something very wrong" during the first surgery and Victor should get a lawyer. Southwestern argues this evidence does not raise a fact question regarding whether Southwestern subjectively knew that breach of a standard of care, as ultimately claimed by the Arancibias, caused Irene's death.

First, Victor Arancibia's testimony that following the second (corrective) surgery, one of the surgeons told Victor that he should find a lawyer because someone had done something wrong during the first surgery is not evidence that Southwestern had subjective knowledge it was at fault in causing Irene's death. Victor did not identify the surgeon who made the statement and there is no evidence the surgeon was an employee of Southwestern or that the surgeon's opinion should be imputed to Southwestern. Further, whether "in the first operation somebody did something very wrong" is not the issue. Everyone agrees that the colon perforations were an unintended and undesirable result. The issue is whether Southwestern had subjective knowledge that the surgeons

breached a standard of care appropriate to the laparoscopic surgery. That issue was not addressed by the statement Victor attributed to the unknown surgeon.

As for the actions of the doctors, immediately after Irene's death Dr. Watson e-mailed his supervisor, Dr. Edward Livingston, Chief of the Gastrointestinal Endocrine Surgery Division at Southwestern, and Dr. Robert Rege, Chair of both the Department of Surgery at Southwestern and the Division of Surgery at Parkland Hospital, about the situation. Dr. Watson described Irene's death as a terrible outcome, noted that he had "scrubbed the entire procedure," thought it went well, and advised Drs. Livingston and Rege that he had already spoken with risk management.

Parkland has a possible three-step review process that takes place when an unexpected patient care occurrence is identified. The first step is initial screening by the hospital's quality management team. The second is referral to a physician or monitoring committee if certain criteria are identified in the screening process. The third step is review by a Division Peer Review Committee if the second-step physician reviewer or monitoring committee so recommends.

Dr. Livingston was assigned to review the surgery as part of Parkland's quality control process.[1] His review was the second of the three-step process. The documents used by Dr. Livingston in making his report were preprinted with specific questions about most aspects of the patient's care. He answered in one instance that "[c]linical management contributed to" Irene's death and explained his answer by a narrative that "a technical error occurred during the original hernia operation resulting in a through-and-through small bowel injury." In regard to questions as

[1] The parties stipulated that Dr. Livingston's investigation and findings could be considered for the purpose of determining if Southwestern had actual notice of the Arancibias' claim.

to medical management, he checked the "No" box in response to "**Criteria 1** = Practice [was] consistent with established standards. Physician Reviewer comfortable with practice. Practice Acceptable." However, he checked the "Yes" box in regard to "**Criteria 2** = Reviewed practice not necessarily consistent with established standards, but still acceptable. Physician Reviewer comfortable with practice. Practice Acceptable." He checked additional boxes to indicate that the reviewed practice did not deviate or deviate significantly from established standards or that the practice was unacceptable. He included a narrative statement of his findings/conclusions in which he said that the unfortunate occurrence was a recognized complication of laparoscopic hernia surgery and no standard of care issues were identified. He did not recommend further review of the case. *See Roark v. Allen*, 633 S.W.2d 804, 811 (Tex. 1982) (holding there was no evidence that a doctor's negligence proximately caused the injury when forceps slipped during delivery and a baby's skull was fractured).

In regard to Dr. Watson's e-mail statement that he had contacted risk management about Irene's death, evidence that an employee or agent contacted an enterprise's risk management department is not evidence that the employee or anyone else subjectively believed the enterprise was at fault. Most entities of any significant size have risk management departments and require accidents or unusual incidents to be reported to the risk management team. The reporting requirement generally exists regardless of who, if anyone, is suspected of being at fault in causing the accident or incident.

The Arancibias point to the fact that Dr. Watson contacted risk management, but the record does not contain evidence explaining why he made the contact or what he reported to risk

management. For example, there is no evidence of whether (1) Dr. Watson contacted risk management pursuant to routine protocol because a death was involved or because of the unexpected patient outcome, (2) his contact was not routine but was out of an abundance of caution, or (3) his contact was because he subjectively believed a breach of appropriate standards of care caused Irene's death. Although Dr. Watson could not recall what he told risk management, the evidence is undisputed that he reported to Drs. Rege and Livingston that he believed the surgery went well and that the perforations could have been retraction injuries that occurred out of the field of view of the surgeons. Absent evidence of the reason Dr. Watson contacted risk management or what he reported, the fact the contact took place does not raise an inference that he believed Irene's death was due to a breach of applicable standards of care as alleged by the Arancibias any more than it raises an inference that the contact was the product of routine protocol or some other reason. *Cf. Lozano v. Lozano*, 52 S.W.3d 141, 148 (Tex. 2001) (Phillips, C.J., concurring in part and dissenting in part) (noting that the equal inference rule is a species of the no-evidence rule that "when the circumstantial evidence is so slight that any plausible inference is purely a guess, it is in legal effect no evidence"). For the same foregoing reasons, the fact that Dr. Watson reported his contact with risk management to Drs. Livingston and Rege, without more, does not support an inference that any of the doctors subjectively believed Irene's death was due to a breach of applicable standards of care.

Next to be considered are Dr. Livingston's investigation and report. The evidence shows that when a patient dies, Parkland's standard procedure is to have the case reviewed for quality management purposes. There is no evidence Dr. Livingston's review was other than pursuant to standard procedures. His report contains language that, considered in isolation or out of context,

might support an inference that he developed a subjective belief the surgeons may have been at fault. For example, he indicated "[c]linical management contributed to" Irene's death, "a technical error occurred during the original hernia operation resulting in a through-and-through small bowel injury," and checked the "No" box in response to "Criteria 1 = Practice consistent with established standards. Physician Reviewer comfortable with practice. Practice Acceptable." But in considering all the evidence, as we must, Dr. Livingston's explanatory statement giving his opinions and conclusions cannot be disregarded. *See City of Keller v. Wilson*, 168 S.W.3d 802, 824-25 (Tex. 2005). He checked boxes specifically indicating Irene's death was not the result of a breach of standards of care and in a narrative statement on the form he clearly set out his opinion that the unfortunate occurrence was a recognized complication of laparoscopic hernia surgery and "no standard of care issues were identified." *See Roark*, 633 S.W.2d at 811. He recommended that no further review be taken, and none was. The third step in Parkland's quality management follow-up process was not initiated and there is no evidence that further investigation of any nature was made.

The Court recently considered the actual notice issue in a non-health care setting in *City of Dallas v. Carbajal*, ___ S.W.3d ___ (Tex. 2010). There, the plaintiff sued for injuries she suffered when she drove into a gap in the roadway in a construction area. A City of Dallas police officer promptly investigated the accident. The officer's written report indicated that the plaintiff drove through an unbarricaded area. The plaintiff sued over a year after the accident, but she had not given timely formal notice of claim to the City. The trial court denied the City's plea to the jurisdiction based on lack of timely notice under the Tort Claims Act and the court of appeals affirmed. The court of appeals' opinion turned on the City's immediate notice that an incident had occurred, the

lack of evidence of a responsible entity other than the City, and the City's knowledge of its possible fault in the matter:

> [T]he police report here shows the City had *immediate notice* of the incident and its *possible fault* in failing to block the gap in the road properly with barricades. . . . [T]here is no evidence here of a responsible entity other than the City, and the police officer making the report is an employee of that entity. . . . [T]he police report here is more than just notice of an accident or a description of a road condition; it is the police officer's report of her perception of the cause of the accident.

City of Dallas v. Carbajal, 278 S.W.3d 802, 806 (Tex. App.—Dallas 2009), *rev'd*, ___ S.W.3d ___ (Tex. 2010) (emphasis added). The Court reversed the court of appeals' judgment. In doing so, the Court quoted and emphasized some of the previously-quoted language from *Simons*:

> "It is not enough that a governmental unit should have investigated an incident . . . , or that it did investigate, perhaps as part of routine safety procedures, or that it should have known from the investigation it conducted that it might have been at fault. If a governmental unit is not subjectively aware of its fault, it does not have the same incentive to gather information that the statute is designed to provide, even when it would not be unreasonable to believe that the governmental unit was at fault."

Carbajal, ___ S.W.3d at ___ (quoting *Simons*, 140 S.W.3d at 347-48). The Court concluded that "[w]hen a police report does not indicate that the governmental unit was at fault, the governmental unit has little, if any, incentive to investigate its potential liability because it is unaware that liability is even at issue." *Id.* at ___. That same reasoning should apply to the Arancibias' claim.

Dr. Livingston was designated to investigate the care Irene received and determine whether breaches of applicable standards of care occurred as part of routine procedures. His report shows that he recognized the perforations in Irene's bowel were technical errors, yet it also shows his opinion was that the perforations were a recognized complication of the surgery Irene underwent and were not outside the boundaries of accepted standards of care. He made an unambiguous hand-

written summary statement to that effect and recommended that no further review of the matter take place. Dr. Livingston explained his reasoning in his deposition and maintained that his report correctly set out his subjective opinion that there were no standard of care violations. Based on Dr. Livingston's recommendation, the third step of Parkland's quality management review process did not occur. And there is no evidence that before the Arancibias finally sent their letter notice to Dr. Watson more than seven months after Irene's death, Southwestern believed it should take action to gather information "necessary to guard against unfounded claims, settle claims, and prepare for trial." *See Cathey*, 900 S.W.2d at 341.

The Court's holding today does not take into account the nature of determining "fault" in health care cases. All the physicians recognized that the unrepaired perforations and Irene's death were bad results. But although there is always possible, or potential, liability for a bad health care result, a bad result simply is not evidence that a health care provider was at fault because standards of care were breached. The Arancibias dispute Dr. Livingston's opinion, but they do not point to any reason for Southwestern to have subjectively disbelieved the sincerity of his findings and conclusions. Nor do they refer to evidence that Southwestern or any of its physicians discounted Dr. Livingston's investigation and opinion or otherwise independently formed a subjective belief that the surgeons caused the perforations by breaching any standards of care. Thus, there is no evidence that Drs. Watson, Livingston, Rege, or Southwestern had subjective knowledge or belief that the surgeons and Southwestern were at fault in regard to Irene's death—and until today such knowledge has been required for actual notice when a litigant fails to give timely formal notice of claim.

In *Simons*, the Court stated that "a governmental unit cannot acquire actual notice merely by conducting an investigation, or even by obtaining information that would reasonably suggest its culpability. The governmental unit must have actual, subjective awareness of its fault in the matter." 140 S.W.3d at 348. And in *Carbajal*, the Court rejected the argument that immediate knowledge of the facts by the City of Dallas together with the absence of evidence of other responsible parties and its knowledge of possible fault because of missing barricades was actual notice. ___ S.W.3d at ___. The Court should likewise reject the argument that Southwestern had actual notice because it knew of injuries and knew of undetected and uncorrected technical errors that potentially could generate allegations that the injuries were caused by breaches of standards of care.

IV.

I agree that statutory notice is jurisdictional under the Tort Claims Act as it applies to this case. I would hold that the notice issue is dispositive: Southwestern did not have actual notice, thus the Arancibias were required to, but did not, give timely formal notice. I would reverse the judgment of the court of appeals and dismiss the Arancibias' suit against Southwestern for lack of jurisdiction.

OPINION DELIVERED: October 22, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0231

OMAHA HEALTHCARE CENTER, LLC, PETITIONER,

v.

WILMA JOHNSON, ON BEHALF OF THE ESTATE OF CLASSIE MAE REED, DECEASED, RESPONDENT

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE SIXTH DISTRICT OF TEXAS

JUSTICE JOHNSON delivered the opinion of the Court, in which CHIEF JUSTICE JEFFERSON, JUSTICE HECHT, JUSTICE WAINWRIGHT, JUSTICE GREEN, JUSTICE WILLETT, and JUSTICE GUZMAN joined.

JUSTICE LEHRMANN filed a dissenting opinion, in which JUSTICE MEDINA joined.

In this case we consider whether claims against a nursing home regarding a patient's death alleged to have been caused by a brown recluse spider bite are health care liability claims (HCLCs) that required an expert report to be served. The trial court and court of appeals held that they were not. We disagree.

I. Background

Wilma Johnson, on behalf of the estate of her deceased sister, Classie Mae Reed, filed suit against Omaha Healthcare Center (Omaha), a nursing home. Johnson alleged that while Reed was being cared for by Omaha she was bitten by a brown recluse spider and died. Johnson asserted that

Omaha had a duty to use ordinary care in maintaining its premises in a safe condition and breached its duty by failing to (1) inspect the premises for spider and insect infestations, (2) properly clean the premises, (3) institute proper pest control policies and procedures, and (4) take the necessary actions to prevent insect and spider infestations.

Omaha filed a motion to dismiss on the grounds that Johnson's claims were HCLCs and she did not serve an expert report as required by statute. *See* TEX. CIV. PRAC. & REM. CODE § 74.351 (a), (b)[1] (stating that an HCLC claimant must serve an expert report within 120 days of filing suit and a trial court shall dismiss the claim if no report is served). Johnson responded that her claims were matters of ordinary negligence and did not fall under the statutory definition of "health care liability claim." The trial court denied Omaha's motion and Omaha filed an interlocutory appeal. *See id.* § 51.014. The court of appeals affirmed. 246 S.W.3d 278. We reverse the judgment of the court of appeals and remand the case to the trial court with instructions to dismiss the case and consider Omaha's request for attorney's fees and costs.

II. Discussion

As relevant to this case an HCLC is

> a cause of action against a health care provider or physician for treatment, lack of treatment, or other claimed departure from accepted standards of medical care, or health care, or safety or professional or administrative services directly related to health care, which proximately results in injury to or death of a claimant, whether the claimant's claim or cause of action sounds in tort or contract.

[1] Section 74.351 was amended after Johnson's cause of action accrued, and the prior law is applicable to Johnson's claim. *See* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.01, 2003 Tex. Gen. Laws 847, 875, *amended by* Act of May 18, 2005, 79th Leg., R.S., ch. 635, § 1, 2005 Tex. Gen. Laws 1590, 1590. At the time of Reed's injury, the statute required an expert report to be served within 120 days of the "claim" being filed. It now requires that an expert report be filed within 120 days of the filing of the "original petition." Because the amendment has no impact on our analysis, for ease of reference we will cite the current version of the statute.

Id. § 74.001(a)(13). "Health care" is

> any act or treatment performed or furnished, or that should have been performed or furnished, by any health care provider for, to, or on behalf of a patient during the patient's medical care, treatment, or confinement.

Id. § 74.001(a)(10); *see Diversicare Gen. Partner, Inc. v. Rubio*, 185 S.W.3d 842, 847 (Tex. 2005) (describing health care as "broadly defined"). "Safety" is not defined in the statute, so "we apply its meaning as consistent with the common law [which is] the condition of being 'untouched by danger; not exposed to danger; secure from danger, harm or loss.'" *Diversicare*, 185 S.W.3d 855 (quoting BLACK'S LAW DICTIONARY 1336 (6th ed. 1990)).

The court of appeals concluded that the claim was a safety claim and under section 74.001(a)(13), a safety claim must be "'directly related to health care' to be actionable as an HCLC." 246 S.W.3d at 284. The court then concluded that because Johnson's claims were neither integral to nor inseparable from the health care and nursing services Omaha provided to Reed, they were not HCLCs. *Id.* at 287.

In this Court, Omaha asserts that Johnson's claim is a safety claim directly related to health care and the court of appeals incorrectly determined otherwise.[2] Under such standard, Johnson's claim against Omaha is an HCLC if it is for a departure from accepted standards of safety directly related to "any act . . . that should have been performed or furnished by [Omaha] to, or on behalf of [Reed] during [Reed's] medical care, treatment, or confinement." *See* TEX. CIV. PRAC. & REM. CODE § 74.001(a)(10), (13).

[2] Omaha does not challenge the court of appeals' conclusion that a safety claim under section 74.001(a)(13) must be directly related to health care. We agree with Omaha that Johnson's claim is directly related to health care and do not address the issue of whether it must be.

In order to determine whether a claim is an HCLC, we consider the underlying nature of the claim. *Yamada v. Friend*, 335 S.W.3d 192, 196 (Tex. 2010). Artful pleading cannot alter that nature. *Id.*

The services a nursing home provides to its patients during their confinement include meeting patients' fundamental needs. *See Diversicare*, 185 S.W.3d at 849. Part of the fundamental patient care required of a nursing home is to protect the health and safety of the residents. 40 TEX. ADMIN. CODE § 19.1701; *see id.* § 19.401(b) (providing that nursing home residents have a right to safe, decent, and clean conditions). A nursing home facility "must provide a safe, functional, sanitary, and comfortable environment for residents" and "must . . . maintain an effective pest control program." *Id.* § 19.309(1)(c). In its pest control program a nursing home must "use the least toxic . . . effective insecticides." *Id.* § 19.324.

The court of appeals concluded that just because there are regulations requiring pest control in nursing homes does not mean that the regulations are related to health care. 246 S.W.3d at 286-87. It found "no indication pest control judgments are actually, as opposed to theoretically, based on the physical care the patients require or implicate the medical duty to diagnose and treat." *Id.* at 287.

But "health care" involves more than acts of physical care and medical diagnosis and treatment. It involves "*any act* performed or furnished, or that should have been performed or furnished, by any health care provider for, to, or on behalf of a patient during the patient's . . . confinement." TEX. CIV. PRAC. & REM. CODE § 74.001(a)(10) (emphasis added). And nursing homes are required to provide more than physical care and treatment. They are required to take

actions to provide "quality care" which includes things such as safety of the environment. *See* TEX. HEALTH & SAFETY CODE § 242.001(a)(1), (8).

As noted above, Johnson alleged that Omaha failed to maintain the premises in a safe condition by failing to inspect the premises, failing to properly clean the premises, failing to institute proper pest control policies, and failing to prevent insect and spider infestations. Although Johnson pled that Omaha was liable because it failed to exercise ordinary care to conduct the referenced activities, the underlying nature of her claim was that Omaha should have but did not exercise the care required of an ordinarily prudent nursing home to protect and care for Reed while she was confined there. That is, she alleged that Omaha failed to take appropriate actions to protect Reed from danger or harm while caring for her. *See Diversicare*, 185 S.W.3d at 855. Those claims fell within the statutory definition of a health care liability claim. Because they did, the statute required the suit to be dismissed unless Johnson timely filed an expert report. *See* TEX. CIV. PRAC. & REM. CODE § 74.351 (a), (b).

III. Response to the Dissent

The dissent relies to a large degree on language derived from the dissenting opinions in *Marks v. St. Luke's Episcopal Hospital*, 319 S.W.3d 658 (Tex. 2010), and *Diversicare*, and the dissent's interpretation of the statutory definitions of "health care liability claim" and "health care." The dissenting opinions in *Marks* and *Diversicare* did not carry the day in those cases; they do not do so in this case. Further, we disagree with the dissent's interpretation of the statutory language. The dissent opines that interpreting the language of the statute to mean what it simply and plainly says—as we do—will cause confusion. We fail to see how. Consistently interpreting statutory

language according to its plain meaning and context, unless that interpretation yields an absurd or nonsensical result, honors the Legislature's intent and reduces confusion by giving legislators, the bar, and ordinary persons confidence that courts will interpret statutes to mean what they say. *See Molinet v. Kimbrell*, ___ S.W.3d ___, ___ (Tex. 2011) ("Our primary objective in construing statutes is to give effect to the Legislature's intent. The plain meaning of the text is the best expression of legislative intent unless a different meaning is apparent from the context or the plain meaning leads to absurd or nonsensical results.") (citations omitted).

It is not absurd or nonsensical for the Legislature to have required that a party filing suit against a health care provider must timely serve a statutory expert report. In a suit against a nursing home—a health care provider—based on allegations that the facility failed to take proper actions it should have "performed or furnished, . . . for, to, or on behalf of a patient during the patient's . . . confinement," a claimant must timely serve a statutory expert report. Johnson did not do so and her claim must be dismissed.

IV. Conclusion

Johnson's claim is an HCLC and should have been dismissed. Because Omaha requested its attorney's fees and costs in the trial court pursuant to Civil Practice and Remedies Code section 74.351(b)(1), the case must be remanded.

We grant Omaha's petition for review. Without hearing oral argument we reverse the court of appeals' judgment and remand the case to the trial court with instructions to dismiss Johnson's claims and consider Omaha's request for attorney's fees and costs.

Phil Johnson
Justice

OPINION DELIVERED: July 1, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0231

OMAHA HEALTHCARE CENTER, LLC, PETITIONER,

v.

WILMA JOHNSON, ON BEHALF OF THE ESTATE OF CLASSIE MAE REED, DECEASED, RESPONDENT

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE SIXTH DISTRICT OF TEXAS

JUSTICE LEHRMANN, joined by JUSTICE MEDINA, dissenting

Expert testimony is often critical to assist the trier of fact. *See Salem v. U.S. Lines Co.*, 370 U.S. 31, 32 (1962). Complex matters need to be explained to aid in assessing the nature of the claims and separating the meritorious from the frivolous. *See Daubert v. Merrell Dow Pharm., Inc.*, 509 U.S. 579, 590 (1993). An expert witness may testify regarding "scientific, technical, or other specialized" matters if the expert is qualified and if the expert's opinion is relevant and based on a reliable foundation. TEX. R. EVID. 702; *Mack Trucks, Inc. v. Tamez*, 206 S.W.3d 572, 578 (Tex. 2006); *E.I. du Pont de Nemours & Co. v. Robinson*, 923 S.W.2d 549, 556–57 (Tex. 1995).

Our Legislature, in enacting the health care liability claim statute, recognized the importance of expert testimony in medical malpractice suits by requiring that plaintiffs serve, within 120 days, expert reports for each health care provider against whom a liability claim is brought. TEX. CIV.

PRAC. & REM. CODE § 74.351(a). The Legislature defined a health care liability claim as one "against a health care provider or physician for treatment, lack of treatment, or other claimed departure from accepted standards of medical care, or health care, or safety or professional or administrative services directly related to health care, which proximately results in injury to or death of a claimant." *Id.* § 74.001(a)(13). In holding that a spider bite in a nursing home is a health care liability claim for which an expert report is required, the Court reaches a result that is contrary to the Legislature's intent, belies common sense, and contorts the role of experts in health care litigation.

The Court has not, at least so far, expressly held that *all* injuries in a health care setting, regardless of any relationship to medical care, must be filed as health care liability claims. But today's opinion does as much implicitly. In doing so, the Court radically departs from our clear assurances that there can be "premises liability claims in a healthcare setting that may not be properly classified as health care liability claims," *Diversicare Gen. Partner, Inc. v. Rubio*, 185 S.W.3d 842, 854 (Tex. 2005), and the plurality's recognition in *Marks v. St. Luke's Episcopal Hospital* that safety-based health care liability claims necessarily implicate medical care standards. 319 S.W.3d 658, 664 (Tex. 2010) (plurality opinion). In *Marks*, the plurality noted that the alleged negligence in health care safety claims must be "*inseparabl[y] and integral[ly]*" related to the rendition of medical services. *Marks*, 319 S.W.3d at 664; *see Diversicare*, 185 S.W.3d at 848–49. In applying that standard, we have heretofore considered a number of factors, among them whether a specialized standard in the health care community applies in the particular circumstances; whether the alleged negligence involves medical judgment related to patient care or treatment; and whether expert

testimony from a medical professional is necessary to prove a cause of action. *See Diversicare*, 185 S.W.3d at 847–52. But the Court considers none of these limiting factors in the present case, effectively holding that *all* premises claims by injured patients are health care liability claims.

In *Diversicare*, we emphasized that the acts or omissions at issue were inseparable from the provision of health care, carefully distinguishing them from garden-variety negligence claims like those stemming from "an unlocked window" or a "rickety staircase." *Id.* at 854. Similarly, in *Marks*, the plurality's holding that an injury caused by a defective footboard on a hospital bed was a health care liability claim turned on the fact that a hospital bed, unlike a typical one, was "[m]edical equipment specific to [the] particular patient's care or treatment," and thus an "integral and inseparable part of the health care services provided." *Marks*, 319 S.W.3d at 664. The *Marks* plurality noted that the Legislature could not have intended that safety standards within the statute's scope "encompass all negligent injuries to patients" in light of the statute's "more specific standards of medical and health care." *Id.* In my view, a spider, in any setting, is more akin to a rickety staircase than a condition resulting from medical negligence or defective medical equipment.

In holding that inadequate pest control is a health care safety violation, the Court essentially declares that all injuries in a health care setting are subject to Chapter 74, without explicitly saying so. As a result of the Court's holding, any patient injured in a hospital will be required to file an expert report even though the injury is entirely unrelated to the delivery of health care services. If it had been the Legislature's intent to subject all claims against health care providers to the statute, "it would have defined a 'health care liability claim' to be any claim against a physician or health care provider in a medical or health care setting." *See Drewery v. Adventist Health System/Tex., Inc.*,

No. 03–10–00334–CV, 2011 WL 1991763 at n. 4 (Tex. App.—Austin May 20, 2011, no pet. h.). Given the sweeping interpretation of "safety" implicit in the Court's conclusion, I urge the Legislature to clarify whether a safety violation must be related to health care.

The present case is the Court's second opinion in two months to hold that a health care provider's departure from general safety standards gives rise to a health care liability claim. *See Harris Methodist Fort Worth v. Ollie*, ___ S.W.3d ___ (Tex. 2011) (per curiam). In *Harris Methodist*, we held that a patient's post-knee-replacement slip and fall on a slick bathroom floor was a health care liability claim. I agreed with the Court's decision because the underlying nature of Ollie's claim—the hospital's failure to supervise her or warn her of the slick floor—bore on the staff's medical judgment in assessing her post-surgery condition and her ability to safely bathe. *See id.* at ___. Applying *Diversicare*, it was logical to presume that health care providers generally adhere to specialized standards governing post-surgical patient care, including assessing the patient's ability to safely bathe without assistance, necessitating expert testimony on that issue. Likewise, expert medical testimony may have been necessary to prove that lack of supervision or assistance specific to the patient's condition resulted in the injuries. None of those factors are present in *Omaha*.

In *Harris Methodist*, we noted that the underlying nature of the patient's claim determines "whether the claim is for a departure from accepted standards of safety" relating to an act that should have been performed on the patient's behalf during the patient's medical care, treatment, or confinement. *Id.* at ___. Because medical expert testimony would have been necessary on whether the hospital should have provided special equipment or staff supervision to allow the patient to safely

bathe, the claim was the type the Legislature intended to be governed by the statute. The same cannot be said, though, of a nursing home's extermination procedures. Wilma Johnson's claim against the nursing home involves the home's failure to keep the premises properly treated for pests, leading to her sister's death as the result of a brown recluse spider bite. The nursing home's alleged negligence did not involve defective medical equipment or a lapse in medical judgment, but instead a general, common-sense duty to keep the premises clean and bug-free. This is not a situation where the jury would be aided by expert medical opinion. No medical judgment or expertise is implicated in determining whether Omaha adopted proper extermination standards.

The Court's holding that Omaha's failure to prevent a spider infestation is a health care liability claim, of course, means that Johnson was required to serve an expert report in order to avoid dismissal. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(a). An expert qualified to file a report on the health care provider's departure from accepted standards of care must "practic[e] health care in a field of practice that involves the same type of care or treatment," "ha[ve] knowledge of accepted standards of care for . . . the diagnosis, care, or treatment of the illness, injury, or condition involved in the claim[, and be] qualified on the basis of training or experience to offer an expert opinion regarding" those standards. *Id.* § 74.402(b); *see also id.* § 74.351(r)(5)(B). In assessing witness qualifications, the court should look at licenses, certifications, or substantial training or experience "in the area of health care relevant to the claim," as well as active practice in the health care industry relevant to the claim. *Id.* § 74.402(c). In making this determination, the court is permitted to depart from the above criteria only if it determines, and states so on the record, that there is good reason to admit the proffered testimony. *See id.* § 74.402(d).

Applying the Court's holding, Johnson's experts would need to testify on what the applicable standard of pest control would be in providing a safe nursing home environment, whether allowing a spider infestation departs from that standard, and whether that departure caused the patient's injuries. *See id.* § 74.351(a), (r)(6). Presumably, the expert report would outline the standard of care in selecting pest control services for a prudent nursing home, as well as Omaha's breach and causation. *See id.* § 74.351(r)(6) (expert report must state "applicable standards of care, the manner in which the care . . . failed to meet the standards, and the causal relationship between that failure and the injury, harm, or damages claimed").

Omaha argues that in addition to physician testimony on causation, Johnson had to produce testimony from an "expert qualified to address application of pesticide in the context of a nursing home" to establish the "correct dosage . . . to prevent a breach of the standard of care by allowing a brown recluse to harm a resident, without the pesticide harming the resident." It is hard for me to imagine how this expert could be anyone other than a professional exterminator, not the health care practitioner that the statute contemplates. And even if the court were to use the "good cause" exception in section 74.402(d) to qualify an exterminator as an expert on measures necessary to prevent spider infestation, I cannot imagine how the exterminator could be qualified to testify that the nursing home's practices breached a *medical* standard of care. *See Marks*, 319 S.W.3d at 664; *see also Diversicare*, 185 S.W.3d at 854 (suggesting that unsafe conditions unrelated to provision of health care might not be health care liability claims). The Court's imposition of Chapter 74 requirements in a way the Legislature never intended is what leads to this jarring result.

The Court's contorted reading of the statute will disserve both patients and health care providers. As the dissent in *Marks* warned, "[b]y sweeping even simple negligence claims under the umbrella of medical malpractice insurance policies, the Court risks broadening the class of claims that medical malpractice insurance companies must cover." *Marks*, 319 S.W.3d at 686 (Guzman, J., concurring and dissenting). Health care providers will incur higher medical malpractice insurance premiums as insurers adjust their rates to account for more claims attributed to medical malpractice. *See Diversicare*, 185 S.W.3d at 862 (O'Neill, J., dissenting) (noting that providers carry both general and malpractice liability policies, and health care liability claim litigation expenses fall under the malpractice policy). This defeats the very purpose of the statute as expressed by the Legislature, "which is to reduce the cost of medical malpractice insurance in Texas so that patients can have increased access to health care." *Marks*, 319 S.W.3d at 686 (Guzman, J., concurring and dissenting) (citing a previous version of the statute). The uncertain line between premises liability and medical malpractice claims also means that premises liability insurance premiums could be adversely affected. Above all, continuing uncertainty will lead to increased litigation costs, forcing plaintiffs to procure multiple expert reports in cases involving no medical expertise or true health care related claims.

Because the Court's decision will spawn uncertainty and extend health care liability claim treatment to claims that are not "inseparabl[y] and integral[ly]" related to the rendition of medical services, *Marks*, 319 S.W.3d at 664, without regard to legislative intent, I am compelled to respectfully express my dissent.

OPINION DELIVERED: July 1, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0244

BASIC CAPITAL MANAGEMENT, INC., AMERICAN REALTY TRUST, INC., TRANSCONTINENTAL REALTY INVESTORS, INC., CONTINENTAL POYDRAS CORP., CONTINENTAL COMMON, INC., AND CONTINENTAL BARONNE, INC., PETITIONERS,

v.

DYNEX COMMERCIAL, INC. AND DYNEX CAPITAL, INC., RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued September 10, 2009

JUSTICE HECHT delivered the opinion of the Court.

This is an action for breach of a commitment to provide financing for future real estate investments. The borrowers were to be entities that would be formed to hold each investment separately as opportunities arose. We hold that the corporate owners of those entities were third-party beneficiaries of the commitment, and that consequential damages for the lender's breach of the commitment were foreseeable. We reverse the judgment of the court of appeals[1] and remand the case to that court for further consideration.

[1] 254 S.W.3d 508 (Tex. App.–Dallas 2008).

I

Basic Capital Management, Inc. managed publicly traded real estate investment trusts in which it also owned stock, including American Realty Trust, Inc. ("ART") and Transcontinental Realty Investors, Inc. ("TCI").[2] We refer to the three collectively as petitioners. Respondent Dynex Commercial, Inc. provided financing for multi-family and commercial real estate investors.[3]

ART and TCI held investment property through wholly owned "single-asset, bankruptcy-remote entities" — SABREs, for short. A SABRE, as the term for which it stands suggests, is an entity that owns a single asset and whose solvency is independent of affiliates. Lenders like Dynex commonly require a SABRE as a borrower so that in the event of default, the collateral can be recovered more easily than from a debtor with multiple assets and multiple creditors.[4]

After several months of discussions and negotiations, Dynex agreed to loan three TCI-owned SABREs[5] $37 million to acquire and rehabilitate three commercial buildings — one each — in New

---

[2] Another real estate investment trust managed by Basic and involved in the events leading to this case, Continental Mortgage and Equity Trust, Inc., merged into TCI after litigation began. For simplicity, we ascribe Continental's pre-suit actions to TCI. In 1998, the time period relevant to this case, Basic had assets of about $3 billion, ART about $1.3 billion, Continental about $426 million, and TCI about $445 million.

[3] Dynex Commercial, Inc. underwrote, closed, and serviced loans funded by Dynex Capital, Inc., also a respondent in the case. Our references to Dynex are to Dynex Commercial.

[4] *See*, *e.g.*, *In re Gen. Growth Props., Inc.*, 409 B.R. 43, 49 n.15 (Bankr. S.D.N.Y. 2009) ("Sometimes referred to as a 'single-purpose entity' or 'bankruptcy remote entity,' an SPE has been described by one commentator as 'an entity, formed concurrently with, or immediately prior to, the closing of a financing transaction, one purpose of which is to isolate the financial assets from the potential bankruptcy estate of the original entity, the borrower or originator.' David B. Stratton, *Special-Purpose Entities and Authority to File Bankruptcy*, 23-2 AM. BANKR. INST. J. 36 (March 2004). 'Bankruptcy-remote structures are devices that reduce the risk that a borrower will file bankruptcy or, if bankruptcy is filed, ensure the creditor procedural advantages in the proceedings.' MICHAEL T. MADISON, ET AL., THE LAW OF REAL ESTATE FINANCING, § 13:38 (2008).").

[5] The three, Continental Poydras Corp., Continental Common, Inc., and Continental Baronne, Inc., were plaintiffs in the trial court, but the jury awarded them no damages. They are petitioners in this Court, but they do not complain of the verdict or make any arguments apart from TCI's.

Orleans if Basic would propose other acceptable SABREs to borrow $160 million over a two-year period.[6] The agreements were eventually formalized in letters. The New Orleans Agreement was between Dynex and TCI and provided in part:

> Dynex Commercial, Inc. (Lender) herein agrees to provide financing for the acquisition and/or rehabilitation of the captioned three (3) properties located in New Orleans, Louisiana under the following terms and conditions:
>
> 1. BORROWER: Three (3) single asset, bankruptcy remote borrowing entities, acceptable to Lender . . . .

TCI accepted the agreement as "borrower", although it is not a SABRE. The $160 million commitment ("the Commitment") was between Dynex and Basic. It also stated that each borrower would be a "Single Asset, Bankruptcy Remote Borrowing Entity acceptable to Lender". The SABREs would be owned by ART or TCI. "First and foremost," Dynex stressed, "the two transactions [were] intertwined."

Dynex loaned TCI's three SABREs the money to acquire the New Orleans buildings and funded a $6 million loan presented by Basic under the Commitment. But then market interest rates rose, making the terms of the Commitment unfavorable to Dynex. Dynex refused to provide further funding for improvements to the New Orleans buildings or to make any other loans under the Commitment.

Petitioners sued Dynex for breach of the Commitment, alleging that as a result, transactions that would have qualified for funding were financed elsewhere at higher rates or not at all. Petitioners claimed damages for interest paid in excess of what would have been charged under the

[6] Dynex contends that the commitment period was only eighteen months. The difference is immaterial to our opinion.

Commitment and for lost profits from investments for which financing could not be found. TCI also sued Dynex for breach of the New Orleans Agreement. Dynex counterclaimed against petitioners for fraud.

ART and TCI alleged that they "were intended beneficiaries of the $160 million Commitment because their wholly owned subsidiaries would own the properties and borrow the funds advanced by Dynex Commercial under the commitment." Dynex controverted this claim, pleading that ART and TCI "lack[ed] standing to assert claims under the alleged $160 million loan commitment". Dynex and petitioners filed cross-motions for partial summary judgment on the issue, and the trial court granted petitioners' motion. Based on its ruling, the trial court issued an order *in limine* forbidding reference to the standing arguments before the jury.

After a trial of over a month, the jury returned a petitioners' verdict. The jury found that Dynex breached the Commitment, resulting in $256,233.25 lost profits for Basic, $25,367,090 lost profits for ART and TCI, and $2,183,287 increased costs in obtaining alternate financing for ART and TCI. The jury also found that TCI lost $252,577 profits as a result of Dynex's breach of the New Orleans Agreement.[7]

Dynex moved for judgment notwithstanding the verdict. Among other things, Dynex re-urged what it had earlier called its standing argument: that ART and TCI could not recover damages for breach of the Commitment, nor TCI for breach of the New Orleans Agreement, because neither was a party to, nor a third-party beneficiary of, those agreements. Dynex also argued that Basic

[7] The jury found that petitioners' reasonable attorney fees were $1.95 million through trial and $150,000 for any appeal.

could not recover lost profits for breach of the Commitment because such consequential damages were not reasonably foreseeable when the Commitment was made. The trial court granted the motion and rendered a take-nothing judgment for Dynex.

Petitioners appealed. The parties raised a number of issues, but the court of appeals found two to be dispositive and focused on them.[8] First, it agreed with Dynex that ART and TCI were not third-party beneficiaries of the Commitment, nor TCI of the New Orleans Agreement.[9] Both agreements, the court reasoned, were expressly made for the benefit of the borrowers — the SABREs that ART or TCI were to create as occasion arose — and any benefit to ART and TCI was at most indirect and therefore unrecoverable.[10] Petitioners countered that Dynex was contending, in essence, that ART and TCI were "not entitled to recover in the capacity in which [they sued]", a matter Dynex had not raised by a verified pleading as required by Rule 93(2) of the Texas Rules of Civil Procedure,[11] and therefore could not assert. The court of appeals rejected petitioners' argument.[12]

Second, the court held that Basic could not recover lost profits as consequential damages for Dynex's breach of the Commitment because there was no evidence that Dynex knew, when it made the Commitment, what specific investments would be proposed, or that other financing would not

[9] *Id*. at 518, 524.

[10] *Id*. at 517-518. The court also concluded that ART and TCI had failed to plead that they were actually parties to the Commitment because Basic had been acting as their agent. *Id*. at 518.

[11] *Id*. at 514; TEX. R. CIV. P. 93(2) ("A pleading setting up any of the following matters, unless the truth of such matters appear of record, shall be verified by affidavit. . . . 2. That the plaintiff is not entitled to recover in the capacity in which he sues, or that the defendant is not liable in the capacity in which he is sued.").

[12] 254 S.W.3d at 515, 524.

be obtainable.[13] Having concluded that there was no basis for any recovery by ART and TCI, the court did not consider Dynex's challenges to their damage claims.[14] The court affirmed the trial court's judgment.

We granted the petition for review.[15]

II

We consider first whether ART and TCI can recover for breach of the Commitment, and TCI for breach of the New Orleans Agreement, as third-party beneficiaries.

We agree with the court of appeals that Dynex's failure to file a verified denial under Rule 93(2) does not preclude it from contesting ART's and TCI's right to recover as non-parties. Though the requirement of a verified denial to challenge a plaintiff's capacity to recover has long been part of Texas civil procedure,[16] the case law is somewhat confused about when the requirement applies.[17] The issue is made more difficult here because Dynex pleaded its challenge as lack of standing, which

[15] 52 Tex. Sup. Ct. J. 599 (Apr. 17, 2009).

[16] Act of May 13, 1846, 1st Leg., R.S., § 31, 1846 Tex. Gen. Laws 363, 371, *reprinted in* 2 H.P.N. Gammel, *The Laws of Texas 1822–1897*, at 1669, 1677 (Austin, Gammel Book Co. 1898); *Sixth RMA Partners v. Sibley*, 111 S.W.3d 46, 56 (Tex. 2003); ("When capacity is contested, Rule 93 requires that a verified plea be filed unless the truth of the matter appears of record."); *Nootsie, Ltd. v. Williamson Cnty. Appraisal Dist.*, 925 S.W.2d 659, 662 (Tex. 1996) ("We have not hesitated in previous cases to hold that parties who do not follow rule 93's mandate waive any right to complain about the matter on appeal.").

[17] *See Schoellkopf v. Pledger*, 739 S.W.2d 914, 920-921 (Tex. App.–Dallas 1987) ("It is something of an understatement to say that the cases have not been entirely consistent in determining whether a defendant must have filed a verified denial of the plaintiff's right to recover in the capacity in which he sues in order to complain on appeal that the plaintiff failed to prove ownership of the cause of action asserted." (citing cases)), *rev'd*, 762 S.W.2d 145, 146 (Tex. 1988) (per curiam) (stating elliptically that "[t]he rule means just what it says").

need not be raised by verified denial.[18] These problems need not detain us here. Regardless of whether the issue is properly denominated standing, as the parties seemed to think in the trial court, or capacity, as petitioners have argued on appeal, the *substance* of Dynex's assertion — that ART and TCI cannot recover for Dynex's breaches of its agreements because they were not parties to the agreements — was addressed in cross-motions for summary judgment and adjudicated prior to trial. Not only was the matter raised by Dynex in its motion without objection,[19] it was raised by petitioners themselves in their own motion, and then adjudicated in their favor. At that point, there was no longer any reason for a verified pleading,[20] and the trial court's post-trial about-face did not resurrect the pleading requirement.

The law governing third-party beneficiaries is relatively settled:

> The fact that a person might receive an incidental benefit from a contract to which he is not a party does not give that person a right of action to enforce the contract. A third party may recover on a contract made between other parties only if the parties intended to secure some benefit to that third party, and only if the contracting parties entered into the contract directly for the third party's benefit.

* * *

[18] *Austin Nursing Ctr., Inc. v. Lovato*, 171 S.W.3d 845, 849 (Tex. 2005) ("Unlike standing, however, which may be raised at any time, a challenge to a party's capacity must be raised by a verified pleading in the trial court.").

[19] *See Roark v. Stallworth Oil & Gas, Inc.*, 813 S.W.2d 492, 495 (Tex. 1991) ("In this case, Respondents moved for summary judgment based on the affirmative defense of no consideration. Although Respondents did not plead the affirmative defense upon which their motion for summary judgment relies, they did expressly rely on this affirmative defense in their motion for summary judgment. Because Roark failed to direct the trial court's attention to the absence of the pleading in his written response or before the court rendered judgment, this complaint may not be raised on appeal.").

[20] *See Schoellkopf*, 739 S.W.2d at 921 ("The purpose of requiring that certain matters be denied by verified pleadings or waived is to eliminate from trial issues not seriously contested.").

> In determining whether a third party can enforce a contract, the intention of the contracting parties is controlling. A court will not create a third party beneficiary contract by implication. The intention to contract or confer a direct benefit to a third party must be clearly and fully spelled out or enforcement by the third party must be denied. Consequently, a presumption exists that parties contracted for themselves unless it clearly appears that they intended a third party to benefit from the contract.[21]

And of course, "[w]hen a contract is not ambiguous, the construction of the written instrument is a question of law for the court."[22]

Dynex knew that the purpose of the Commitment was to secure future financing for ART and TCI, real estate investment trusts that Basic managed and in which it held an ownership interest. Basic was never to be the borrower. On the contrary, the Commitment expressly required that the borrowers be SABREs acceptable to Dynex. Nor was Basic to own the SABREs. Dynex knew that Basic's business was to manage the investment trusts that created and owned the SABREs as part of their investment portfolio. The requirement that all borrowers be SABREs was for Dynex's benefit, to provide more certain recourse to the collateral in the event of default.

As a practical matter, the parties knew that it would likely not be a SABRE that would enforce the Commitment. By its very nature as a single-asset entity, a SABRE would not be created until an investment opportunity presented itself, and without financing, there would be no investment. It would be unreasonable to require ART and TCI to have created SABREs for no business purpose, merely in order that those otherwise inert entities could sue Dynex.

---

[21] *MCI Telecomms. Corp. v. Tex. Utils. Elec. Co.*, 995 S.W.2d 647, 651 (Tex. 1999) (citations and internal quotation marks omitted).

[22] *Id*. at 650.

The court of appeals was concerned that the benefit to ART and TCI was indirect in the sense that it flowed through the SABRE-borrowers.[23] We certainly agree that as a general proposition, a corporate parent is not a third-party beneficiary of its subsidiary's contract merely by virtue of their relationship. But here the benefit to each SABRE not only inured to its parent, the transaction was so structured to benefit Dynex. SABRE-borrowers provided a mechanism for ART and TCI to hold investment property directly but in a way that would provide Dynex greater security. If Dynex and Basic did not intend the Commitment to benefit ART and TCI directly, then the Commitment had no purpose whatever.

Dynex and Basic could have prevented any doubt about their intentions by expressly stating in the Commitment that it was to benefit ART and TCI. Perhaps they did not do so because it seemed to go without saying. But we need not speculate. The Commitment "clearly and fully spelled out" the benefit to ART and TCI because their role was basic to Dynex's and Basic's agreement.

Dynex insists that ART's and TCI's failure to request a jury finding on whether they were third-party beneficiaries is fatal to their recovery on that theory. But as we noted above, the proper construction of an unambiguous contract is a matter of law. The Commitment itself, and the undisputed evidence regarding its negotiation and purpose,[24] establish that ART and TCI were third-party beneficiaries.

---

[23] 254 S.W.3d at 517-518.

[24] *See Banker v. Breaux*, 128 S.W.2d 23, 24 (Tex. 1939) (stating that the contracting parties' intention, which is of controlling importance, must be ascertained from their agreement "in the light of the attending circumstances").

Dynex argues that the New Orleans Agreement consisted of the promissory notes signed by each of TCI's three SABREs, and that TCI was not a third-party beneficiary of the obligations set out in those notes. But the notes were executed pursuant to a commitment by Dynex that TCI itself signed. As a party to the commitment that provided the New Orleans Agreement financing for its SABREs, TCI was a third-party beneficiary of the Agreement.

Accordingly, we conclude that ART and TCI were entitled to recover for Dynex's breach of the Commitment and the New Orleans Agreement.

III

We turn to the second issue addressed by the court of appeals: whether Basic is precluded from recovering lost profits as consequential damages for breach of the Commitment because Dynex could not reasonably foresee them. Foreseeability is a fundamental prerequisite to the recovery of consequential damages for breach of contract.

> Consequential damages are those damages that result naturally, but not necessarily, from the defendant's wrongful acts. They are not recoverable unless the parties contemplated at the time they made the contract that such damages would be a probable result of the breach. Thus, to be recoverable, consequential damages must be foreseeable and directly traceable to the wrongful act and result from it.[25]

The foreseeability requirement finds its most familiar expression in the venerated case of *Hadley v. Baxendale*. Baxendale, a common carrier, failed to timely deliver Hadley's steam engine crankshaft to engineers for repairs, and Hadley sued for lost profits from his mill as a result of the

[25] *Stuart v. Bayless*, 964 S.W.2d 920, 921 (Tex. 1998) (per curiam) (citations and internal quotation marks omitted).

delay. The court disallowed recovery of the damages because Baxendale had no reason to know delay would have such consequences. The correct rule, according to the court, was this:

> Where two parties have made a contract which one of them has broken, the damages which the other party ought to receive in respect of such breach of contract should be such as may fairly and reasonably be considered either arising naturally, i.e., according to the usual course of things, from such breach of contract itself, or such as may reasonably be supposed to have been in the contemplation of both parties at the time they made the contract as the probable result of the breach of it.[26]

The *Restatement (Second) of Contracts* states the rule as follows:

> (1) Damages are not recoverable for loss that the party in breach did not have reason to foresee as a probable result of the breach when the contract was made.
>
> (2) Loss may be foreseeable as a probable result of a breach because it follows from the breach
>
> (a) in the ordinary course of events, or
>
> (b) as a result of special circumstances, beyond the ordinary course of events, that the party in breach had reason to know.
>
> (3) A court may limit damages for foreseeable loss by excluding recovery for loss of profits, by allowing recovery only for loss incurred in reliance, or otherwise if it concludes that in the circumstances justice so requires in order to avoid disproportionate compensation.[27]

Dynex contends that when it issued the Commitment, it could not have foreseen that its breach would cause Basic to suffer lost profits because it had no idea what specific investments Basic would propose or that alternative financing for them would be unavailable. The court of appeals agreed, concluding that Dynex could not be liable for Basic's lost profits unless it

---

[26] 9 Exch. 341, 354, 156 Eng. Rep. 145, 151 (1854).

[27] RESTATEMENT (SECOND) OF CONTRACTS § 351 (1981).

> knew, at the time it entered into the [Commitment]: (1) that the contracted financing was for a specific venture; and (2) that in the event of its breach the borrower probably would be unable to obtain other financing in a manner that would permit the borrower to carry out that venture.[28]

Certainly, a general knowledge of a prospective borrower's business does not give a lender reason to foresee the probable results of its refusal to make the loan. But Dynex cites no authority, and we are aware of none, for the proposition that the consequences of a lender's breach of a loan commitment are not reasonably foreseeable unless the lender knew, at the time the commitment was made, not only the nature of the borrower's intended use of the money, but the specific venture in which the borrower intended to engage. One case, *National Bank of Cleburne v. M.M. Pittman Roller Mill*,[29] is to the contrary. There, the Bank breached its agreement to loan the Mill $14,000 to buy wheat, and the Mill sued for the profits it would have made from the resale.[30] The trial court rendered judgment for the Mill, but the commission of appeal reversed because there was no evidence that the Bank knew the Mill intended to resell the wheat.[31] Had there been such evidence, however, the Bank need not have known to whom the Mill intended to sell the wheat.

> If, as found by the trial court, it was in contemplation of the parties at the time of the contract that [the Mill] was to engage in the business of buying and selling wheat with the hope of deriving a profit therefrom, it would be entitled, under proper pleading, to recover whatever net profits it could show that it would have made had the terms of the contract been complied with. If [the Bank] knew at the time it obligated itself to loan the $14,000 that the [Mill] intended to use this sum in

---

[28] 254 S.W.3d at 520.

[29] 265 S.W. 1024 (Tex. Comm'n App. 1924, holding approved).

[30] *Id*.

[31] *Id*. at 1024, 1026.

> purchasing wheat to be sold for a profit, it could not excuse itself from liability for its wrong in breaching its contract on the plea that at the time of the contract it was uncertain whether there would be any profits at all. If it contracted that [the Mill] should reap the benefit of profits, should there be any, it should be required to pay whatever damages [the Mill] could show had been sustained by being deprived of such profits.[32]

Although this Court approved only the holding and judgment of the commission of appeals, we nevertheless regard its reasoning as sound. To be liable for the consequential damages resulting from a breach of a loan commitment, the lender must have known, at the time the commitment was made, the nature of the borrower's intended use of the loan proceeds but not the details of the intended venture.

There is no question Dynex knew that Basic's purpose in arranging the $160 million Commitment was to ensure financing for ART's and TCI's real estate investments. Dynex's executive vice president testified: "We were aware . . . that they were involved in significant commercial and multifamily endeavors [and] were constantly buying, selling, improving, doing the normal and usual things that a real estate developer does to enhance values." Dynex was in the business of providing capital for large real estate transactions and had entered into a number of other similar loan arrangements. For months, Dynex discussed with Basic its intended uses of the financing and negotiated detailed requirements for the loans to be made under the Commitment, including the specification that the borrowers by SABREs. In sum, the evidence establishes that Dynex clearly knew how the Commitment would be used. Indeed, it would be surprising if Dynex had agreed to lend Basic $160 million without such knowledge.

---

[32] *Id*. at 1025.

Dynex certainly knew that if market conditions changed and interest rates rose, its refusal to honor the Commitment would leave Basic having to arrange less favorable financing. Because that is in fact what happened, Dynex argues that it had no reason to expect that Basic's increased financing costs would price some investments beyond reach, resulting in opportunities lost altogether. But we cannot infer from Basic's ability to arrange for alternate financing in a few instances that it could always do so, and nothing in the record supports such a counterintuitive proposition. Certain that its breach would increase Basic's costs, Dynex cannot profess blindness to the foreseeability that its breach would also cost Basic business.

Which is not to say that it actually did. The court of appeals held that the lost profits Basic claims as consequential damages were not foreseeable to Dynex at the time the Commitment was made, and on this issue we disagree. Dynex also argues, in this Court as in the court of appeals, that even if lost profits were foreseeable, they were not sustained. The court of appeals did not address that argument, and neither do we. It, among many others that the parties have raised, we leave for further consideration by the court of appeals on remand.

* * *

Accordingly, we reverse the judgment of the court of appeals and remand the case to that court for further consideration.

Opinion delivered: April 1, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0246

GILBERT TEXAS CONSTRUCTION, L.P., PETITIONER,

v.

UNDERWRITERS AT LLOYD'S LONDON, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued October 6, 2009

JUSTICE JOHNSON delivered the opinion of the Court.

JUSTICE LEHRMANN did not participate in the decision.

We deny Gilbert Texas Construction's motion for rehearing. We withdraw our opinion of June 4, 2010 and substitute the following in its place.

During a Dallas Area Rapid Transit Authority (DART) construction project, unusually heavy rains resulted in water damage to a building adjacent to the construction site. The owner of the building sued DART and its contractors, alleging that construction activities caused the water damage. The building owner sued the general contractor in tort and for breach of contract. In the breach of contract claim, the building owner alleged that the general contractor assumed liability for the damage under its contract with DART. Except for the breach of contract claim, the trial court

granted summary judgment for the general contractor on the basis of governmental immunity. The general contractor later settled the breach of contract claim and sought indemnity from its insurers. The excess insurer denied coverage.

We address two issues. The first is whether the contractual liability exclusion in a Commercial General Liability (CGL) policy excludes coverage for property damage when the only basis for liability is that the insured contractually agreed to be responsible for the damage, and if so, whether an exception to the exclusion operates to restore coverage. We hold that the exclusion applies, the exception does not, and there is no coverage. The second issue is whether Gilbert is entitled to recover its settlement payment under an estoppel theory. We hold it is not.

I. BACKGROUND

A. The Underlying Suit

In 1993, DART contracted with Gilbert Texas Construction, L.P., as general contractor, to construct a light rail system. One part of the contract required Gilbert to protect the work site and surrounding property:

> 10. Protection of Existing Site Conditions
>
> a. The Contractor shall preserve and protect all structures . . . on or adjacent to the work site. . . .
>
> b. The Contractor shall protect from damage all existing improvements and utilities (1) at or near the work site and (2) on adjacent property of a third party . . . [and] repair any damage to those facilities, including those that are the property of a third party, resulting from failure to comply with the requirements of this contract or failure to exercise reasonable care in performing the work. If the Contractor fails or refuses to repair the damage promptly, [DART] may have the necessary work performed and charge the cost to the Contractor.

During construction, Dallas suffered an unusually heavy rain, and a building adjacent to the construction area was flooded. RT Realty (RTR), the building's owner,[1] sued DART, Gilbert, and other persons and entities involved in the construction. RTR alleged various theories of liability, including violations of the Texas Transportation Code and the Texas Water Code, nuisance, and trespass. RTR also claimed it was a third-party beneficiary of the contract between Gilbert and DART and that Gilbert was liable to RTR for breach of that contract.

DART provided insurance for the project through an Owner Controlled Insurance Program. Gilbert's primary coverage was by a CGL policy with Argonaut Insurance Company. Gilbert also had several layered excess coverage policies[2] through Underwriters at Lloyd's London[3] (Underwriters). Argonaut assumed Gilbert's defense and provided a list of approved defense counsel to Gilbert, who selected attorney James Grau to defend it. The original answer Grau filed for Gilbert contained a pleading asserting that Gilbert had sovereign immunity.[4]

---

[1] Various interveners eventually joined the suit, including RTR's property insurers and persons who had offices in the flooded building.

[2] Underwriters' policies generally followed form, meaning the policies tracked the essential terms of the primary policy. Underwriters' policies also had separate provisions and exclusions applicable to the excess policies. We will generally refer to Underwriters' policies collectively as "the policy" for ease of reference. Because our analysis focuses on provisions found in the primary policy, the policy language we reference, unless specifically noted otherwise, will be that of Argonaut's primary policy, which is incorporated by Underwriters' policy.

[3] The policies were underwritten and risks participated in by various Members of the Lloyd's market and individual insurance companies. The underwriters and participating insurers will be referred to collectively as "Underwriters."

[4] The State has sovereign immunity and subdivisions have what is called governmental immunity. The parties refer to DART's immunity and that of Gilbert, as DART's contractor, as sovereign immunity. However, we will use the term "governmental immunity" throughout this opinion as that is the proper terminology.

Through its coverage counsel, Underwriters sent a series of reservation of rights letters to Gilbert. The letters generally (1) reviewed the claims made by RTR in each successive petition, (2) noted that under its policy, Underwriters did not have a duty to defend Gilbert and its obligation to indemnify Gilbert did not depend on allegations made in RTR's pleadings but would be determined by the judgment rendered and facts found in the suit, (3) stated that a coverage determination was not possible because no judgment had yet been entered and no fact finding accomplished, and (4) referenced various policy provisions that might preclude coverage for the damages being sought from Gilbert. In addition, the letters reserved Underwriters' rights to deny coverage under the policies and noted the potential conflict of interest between Gilbert and Underwriters because of Underwriters' position that damages claimed by RTR might not be covered. Underwriters' policy included a provision allowing Underwriters to associate with Gilbert in defense of claims.

Other defendants also responded to RTR's suit, in part, by claiming they had governmental immunity. The defendants moved for summary judgment on the basis of immunity. The trial court granted the motions for summary judgment except for RTR's claims against Gilbert for breach of contract.

A few weeks after the trial court granted partial summary judgment to Gilbert, Underwriters sent another reservation of rights letter. In that letter, Underwriters, for the first time, took the specific position that RTR's breach of contract claim was not covered because Underwriters' policy excluded coverage for contractual liability. Gilbert settled RTR's breach of contract claim for $6.175 million. Underwriters denied coverage.

B. The Coverage Suit

Gilbert sued Underwriters for breach of contract and Insurance Code violations, also urging that Underwriters waived its right to deny coverage and was estopped to deny coverage. Both parties moved for summary judgment on all issues. The trial court granted Gilbert's motion as to coverage and granted Underwriters' motion as to Gilbert's statutory, waiver, and estoppel claims.

Underwriters and Gilbert both appealed. The court of appeals reversed and rendered judgment for Underwriters, holding that the breach of contract claim (1) fell within the policy's contractual liability exclusion and (2) was not excepted from the exclusion. 245 S.W.3d 29, 34-35 (Tex. App.—Dallas 2007, pet. granted). It additionally held that Underwriters had not waived its policy defenses and was not estopped from raising the defense of non-coverage because Underwriters had not assumed Gilbert's defense. *Id.* at 37.

In this Court, Gilbert asserts that (1) the contractual liability exclusion does not apply because Gilbert's liability arises from its own breach of contract and not from another's liability that Gilbert assumed; (2) even if the exclusion applies, an exception to the exclusion brings the breach of contract claim back into coverage because Gilbert would have been liable to RTR in the absence of its contract with DART; and (3) in the alternative, Underwriters asserted control over Gilbert's defense and prejudiced Gilbert, so under an estoppel theory Gilbert should be awarded damages for the amount it paid to settle RTR's lawsuit.

We agree with the court of appeals: the contractual exclusion applies to the breach of contract claim and the exception for liability the insured would have absent its contract is

inapplicable. Further, we determine that Gilbert was not prejudiced by Underwriters' actions and Underwriters is not required to pay damages to Gilbert under an estoppel theory.[5]

II. DISCUSSION

A. Standard of Review

The parties do not dispute the applicable burdens of proof. Initially, the insured has the burden of establishing coverage under the terms of the policy. *Ulico Cas. Co. v. Allied Pilots Ass'n*, 262 S.W.3d 773, 782 (Tex. 2008). If the insured proves coverage, then to avoid liability the insurer must prove the loss is within an exclusion. *Id.* If the insurer proves that an exclusion applies, the burden shifts back to the insured to show that an exception to the exclusion brings the claim back within coverage. *Comsys Info. Tech. Servs., Inc. v. Twin City Fire Ins. Co.*, 130 S.W.3d 181, 193 (Tex. App.—Houston [14th Dist.] 2003, pet. denied); *see also Century Sur. Co. v. Hardscape Constr. Specialties, Inc.*, 578 F.3d 262, 265 (5th Cir. 2009).

When both sides move for summary judgment, as they did here, and the trial court grants one motion and denies the other, reviewing courts consider both sides' summary-judgment evidence, determine all questions presented, and render the judgment the trial court should have rendered. *Embrey v. Royal Ins. Co. of Am.*, 22 S.W.3d 414, 415-16 (Tex. 2000).

[5] Underwriters also asserted issues the court of appeals did not reach: (1) an exclusion in the excess policy bars coverage for breach of contract; (2) RTR's claim did not involve a covered occurrence resulting in liability for which Gilbert was obligated to pay damages; and (3) Gilbert lacked a reasonable basis for settling RTR's claim when there was no potential liability or basis for a judgment against Gilbert. In this Court, Underwriters argues those issues warrant remand to the court of appeals in the event we reverse. Because we affirm the court of appeals' judgment, we do not reach the remand issues.

B. Jurisdiction

As a preliminary matter, Underwriters argues that we lack jurisdiction. Gilbert contends, in part, that we have jurisdiction because the court of appeals' opinion conflicts with opinions of other courts of appeals on a question of law material to the decision of the case. *See* TEX. GOV'T CODE § 22.001(a)(2). We agree with Gilbert. The court of appeals' decision is contrary to a decision of the Fourteenth Court of Appeals that held the contractual liability exclusion is limited to liability assumed for conduct of a third party, such as in an indemnity or hold-harmless agreement. *See Lennar Corp. v. Great Am. Ins. Co.*, 200 S.W.3d 651, 693 (Tex. App.—Houston [14th Dist.] 2006, pet. denied). Here, the court of appeals held that the exclusion applies because Gilbert assumed liability in its contract with DART. 245 S.W.3d at 34. We have jurisdiction pursuant to section 22.001(a)(2) of the Government Code.

C. Contractual Liability Exclusion

Coverage A of the policy, which is entitled "Bodily Injury and Property Damage Liability," provides that the insurer "will pay those sums that the insured becomes legally obligated to pay as damages because of 'bodily injury' or 'property damage' to which this insurance applies. . . . The 'bodily injury' or 'property damage' must be caused by an occurrence." Exclusion 2(b)provides that the insurance does not apply to

> "Bodily injury" or "property damage" for which the insured is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages:
>
> (1) Assumed in a contract or agreement that is an "insured contract;" or
>
> (2) That the insured would have in the absence of the contract or agreement.

The policy's definitions section provides a definition of "insured contract." The term is defined as seven types of agreements, the last of which is an agreement to assume another's tort liability:

> "Insured contract" means:
>
> a. A lease of premises;
> b. A sidetrack agreement;
> . . .
> g. That part of any other contract or agreement pertaining to your business under which you assume the tort liability of another to pay damages because of "bodily injury" or "property damage" to a third person or organization, if the contract or agreement is made prior to the "bodily injury" or "property damage." Tort liability means a liability that would be imposed by law in the absence of any contract or agreement.

Underwriters does not argue that RTR's claim is not within the general terms of the policy; rather, it asserts that exclusion 2(b)—the contractual liability exclusion—precludes coverage because at the time Gilbert settled, the trial court had already granted summary judgment on all RTR's statutory and tort claims, and the only basis for liability remaining was for breach of contractual obligations Gilbert assumed in its contract with DART. Gilbert contends the contractual liability exclusion applies more narrowly. It contends the exclusion applies only in the limited situation in which the insured has assumed the liability *of another* such as in hold-harmless or indemnity agreements. Gilbert argues that to hold otherwise runs afoul of our decision in *Lamar Homes, Inc. v. Mid-Continent Cas. Co.*, 242 S.W.3d 1 (Tex. 2007), in which we stated that a breach of contract claim can involve an occurrence and coverage does not turn on the label of the cause of action. Finally, Gilbert contends that, at the very least, the exclusion is ambiguous and must be interpreted in favor of coverage.

1. Preservation on Appeal

Underwriters argues at the outset that Gilbert waived its argument regarding the inapplicability of the exclusion because Gilbert did not timely assert and brief the issue in the court of appeals. *See* TEX. R. APP. P. 53.2(f). As Underwriters observes, the court of appeals did not consider, in depth, the applicability of the exclusion because Gilbert did not dispute its applicability in its initial appeal. 245 S.W.3d at 34. Gilbert argues that it prevailed on the exclusion issue in the trial court and did not need to initially raise the issue in the court of appeals. We agree with Gilbert.

After the court of appeals reversed the trial court's judgment on this issue, Gilbert challenged the court of appeals' judgment both in a motion for rehearing in the court of appeals and in its petition for review. While ordinarily a party waives a complaint not raised in the court of appeals, a complaint arising from the court of appeals' judgment may be raised either in a motion for rehearing in that court or in a petition for review in this Court. *See* TEX. R. APP. P. 53.2(f); *Bunton v. Bentley*, 153 S.W.3d 50, 53 (Tex. 2004). Gilbert did not waive the issue.

2. Scope of the Exclusion

The policy at issue is a standard CGL policy developed by the Insurance Services Office, Inc. (ISO).[6] *See Lamar Homes*, 242 S.W.3d at 5; 2 JEFFREY W. STEMPEL, STEMPEL ON INSURANCE CONTRACTS § 14.01 (3d ed. 2007). The meaning of the terms and exclusions within a standard policy should theoretically be the same in Texas as in other states. *See Lamar Homes*, 242 S.W.3d at 5. However, a lack of consensus on the meaning of terms in a CGL policy is not unusual. As

[6] The ISO is an insurance industry organization which drafts standard forms used by insurers. *See Lamar Homes*, 242 S.W.3d at 5 n.1.

noted above, Texas courts of appeals have reached different conclusions about the exclusion's effect, as have other state and federal courts.

The principles courts use when interpreting an insurance policy are well established. Those principles include construing the policy according to general rules of contract construction to ascertain the parties' intent. *Don's Bldg. Supply, Inc. v. OneBeacon Ins. Co.*, 267 S.W.3d 20, 23 (Tex. 2008); *Kelley-Coppedge, Inc. v. Highlands Ins. Co.*, 980 S.W.2d 462, 464 (Tex. 1998). First, we look at the language of the policy because we presume parties intend what the words of their contract say. *See Don's Bldg. Supply*, 267 S.W.3d at 23. We examine the entire agreement and seek to harmonize and give effect to all provisions so that none will be meaningless. *See MCI Telecomms. Corp. v. Tex. Utils. Elec. Co.*, 995 S.W.2d 647, 652 (Tex. 1999). The policy's terms are given their ordinary and generally-accepted meaning unless the policy shows the words were meant in a technical or different sense. *Don's Bldg. Supply*, 267 S.W.3d at 23; *see also Sec. Mut. Cas. Co. v. Johnson*, 584 S.W.2d 703, 704 (Tex. 1979). Courts strive to honor the parties' agreement and not remake their contract by reading additional provisions into it. *See Nat'l Union Fire Ins. Co. of Pittsburg, PA v. Crocker*, 246 S.W.3d 603, 606 (Tex. 2008). With these principles in mind, we turn to the language of the exclusion.

Considered as a whole, the contractual liability exclusion and its two exceptions provide that the policy does not apply to bodily injury or property damage for which the insured is obligated to pay damages by reason of the assumption of liability in a contract or agreement, except for enumerated, specific types of contracts called "insured contracts" and except for instances in which the insured would have liability apart from the contract. In this case, Gilbert agreed under its

contract with DART to "repair any damage to . . . facilities, including those that are the property of a third party, resulting from failure to comply with the requirements of this contract or failure to exercise reasonable care in performing the work." RTR originally sued on tort and statutory theories of liability, then added a breach of contract claim. But Gilbert prevailed on its summary-judgment motion, leaving only RTR's breach of contract claim. Thus, the only liability theory remaining at the time Gilbert settled arose from Gilbert's contract with DART and Gilbert does not claim there are facts that could result in its being liable under some theory besides breach of contract. Underwriters argues that the exclusion unambiguously applies to the breach of contract claim.

Gilbert, however, argues that the policy's plain language is not as plain as it might seem. Citing several authorities, Gilbert contends that in order to give meaning to the word "assumption" in the exclusion, the liability assumed must be that of another. *E.g.*, *Am. Family Mut. Ins. Co. v. Am. Girl, Inc.*, 673 N.W.2d 65, 80-81 (Wis. 2004) ("The term 'assumption' must be interpreted to add something to the phrase 'assumption of liability in a contract or agreement.' Reading the phrase to apply to all liabilities sounding in contract renders the term 'assumption' superfluous."). In other words, Gilbert would have us read the exclusion to say "'property damage' for which the insured is obligated to pay damages by reason of the assumption of *another's* liability in a contract or agreement." Underwriters counters that we should not judicially rewrite the exclusion by inserting the word "another's" into it. We agree with Underwriters.

The exclusion bars coverage for liability of a third party that is assumed, such as that assumed by an indemnity agreement. But had it been intended to be so narrow as to apply *only* to an agreement in which the insured assumes liability of another party by an indemnity or hold-harmless

agreement, it would have been simple to have said so. The parties' intent is governed by what they said in the insurance contract, not by what one side or the other alleges they intended to say but did not. *See Fortis Benefits v. Cantu*, 234 S.W.3d 642, 647, 649 (Tex. 2007) (noting that contract rights arise from the parties' agreement and declining to "judicially rewrite the parties' contract by engrafting extra-contractual standards"); *Fiess v. State Farm Lloyds*, 202 S.W.3d 744, 753 (Tex. 2006) ("[W]here the language is plain and unambiguous, courts must enforce the contract as made by the parties, and cannot make a new contract for them, nor change that which they have made under the guise of construction.").

The exclusion applies when the insured is obligated to pay damages "by reason of the assumption of liability in a contract or agreement." Those terms are not defined, so we give them their "generally accepted or commonly understood meaning." *Lamar Homes*, 242 S.W.3d at 8 (citing *W. Reserve Life Ins. Co. v. Meadows*, 261 S.W.2d 554, 557 (Tex. 1953)). To "assume" means to "undertake." WEBSTER'S THIRD NEW INTERNATIONAL DICTIONARY 133 (2002). "Liability" is "[t]he quality or state of being legally obligated or accountable." BLACK'S LAW DICTIONARY 997 (9th ed. 2009). Independent of its contractual obligations, Gilbert owed RTR the duty to comply with law and to conduct its operations with ordinary care so as not to damage RTR's property, and absent its immunity it could be liable for damages it caused by breaching its duty. In its contract with DART, however, Gilbert undertook a legal obligation to protect improvements and utilities on property adjacent to the construction site, and to repair or pay for damage to any such property "resulting from a failure to comply with the requirements of this contract *or* failure to exercise reasonable care in performing the work." (emphasis added). The latter obligation—to

exercise reasonable care in performing its work—mirrors Gilbert's duty to RTR under general law principles. The obligation to repair or pay for damage to RTR's property "resulting from a failure to comply with the requirements of this contract" extends beyond Gilbert's obligations under general law and incorporates contractual standards to which Gilbert obligated itself. The trial court granted summary judgment on all RTR's theories of liability other than breach of contract, so Gilbert's only potential liability remaining in the lawsuit was liability in excess of what it had under general law principles. Thus, RTR's breach of contract claim was founded on an obligation or liability contractually assumed by Gilbert within the meaning of the policy exclusion.

Further, considering the exclusion and its exceptions as a whole reinforces our conclusion. *See MCI Telecomms.*, 995 S.W.2d at 652 ("When interpreting a contract, we examine the entire agreement in an effort to harmonize and give effect to all provisions of the contract so that none will be meaningless."); *Kelley-Coppedge, Inc.*, 980 S.W.2d at 464 (observing that we must "attempt to give effect to all contract provisions so that none will be rendered meaningless"). The first exception—the insured-contract exception—lists six specific types of contracts to which the exclusion does not apply. The seventh and final item in the list addresses assumption of another's tort liability: "That part of any other contract or agreement pertaining to your business under which you assume the tort liability *of another* to pay damages because of 'bodily injury' or 'property damage' to a third person or organization . . . ." (emphasis added). The fact that the definition explicitly references assumption of the tort liability *of another* demonstrates that the parties are capable of using such narrow, specific language when that is their intent.

Gilbert argues that the exclusion should be read as applying to all situations in which the insured assumes another's liability while the insured-contract exception to the exclusion should be read as applying only to agreements in which the insured assumes another's tort liability. We agree that the insured-contract exception brings back into coverage contracts in which the insured assumes the tort liability of another—it says it does. But the exclusion does not say it is limited to the narrow set of contracts by which the insured assumes the liability of another person; the exclusion's language applies without qualification to liability assumed by contract except for two situations: (1) specified types of contracts referred to as "insured contracts," including indemnity agreements by which the insured assumes another's tort liability, and (2) situations in which the insured's liability for damages would exist absent the contract—in other words, situations in which the insured's liability for damages does not depend solely on obligations assumed in the contract.

Gilbert further argues that if the exclusion were meant to apply to a breach of contract claim like the one at issue in this case, it could easily have said just that. To illustrate its argument, Gilbert points to language in another section of the policy—"Coverage B. Personal and Advertising Injury Liability." As we understand it, Gilbert's argument is that Coverage B has an exclusion for both personal injury and advertising injury that is substantively the same as Coverage A's contractual liability exclusion, except Coverage B's exclusion does not provide coverage for "insured contracts" as does the Coverage A exclusion:

> This insurance does not apply to:
>
> a. "Personal injury" or "advertising injury:"
>
> . . .

> (4) For which the insured has assumed liability in a contract or agreement. This exclusion does not apply to liability for damages that the insured would have in the absence of the contract or agreement.

Gilbert argues that if the foregoing exclusion applied to all contractual obligations, then a separate exclusion in Coverage B specific to advertising injury would be unnecessary. That particular exclusion provides as follows:

> b. "Advertising injury" arising out of:
>
> > (1) Breach of contract, other than misappropriation of advertising ideas under an implied contract.

According to Gilbert, if Coverage B's contractual liability exclusion excluded all breach of contract claims, then the express breach of contract claim exclusion for advertising injury would be unnecessary. We are not persuaded. We do not hold that the exclusion in Coverage A precludes liability for all breach of contract claims. We hold that it means what it says: it excludes claims when the insured assumes liability for damages in a contract or agreement, except when the contract is an insured contract or when the insured would be liable absent the contract or agreement. The express breach of contract exclusion in Coverage B, on the other hand, excludes all claims "arising out of" a breach of contract—a potentially larger category of claims than is excluded under the contractual liability exclusion.[7]

[7] In its post-submission brief, Gilbert notes that some insurance policies include an express breach of contract exclusion in Coverage A of the policy. This, according to Gilbert, is further evidence that the contractual liability exclusion is not intended to exclude general breach of contract claims. We are not persuaded by the argument because the policy we are interpreting does not include such language in Coverage A, and each policy must be interpreted according to its own specific provisions and coverages.

3. Holdings from Other Jurisdictions

Other jurisdictions have interpreted the exclusion differently than the way we do today. Gilbert points out that some jurisdictions, including the federal Fifth Circuit, have suggested, and held, that the exclusion applies to a limited category of cases in which the insured assumes the liability of another, such as in an indemnity or hold-harmless agreement.[8] Underwriters, on the other

[8] *See, e.g.*, *Ferrell v. W. Bend Mut. Ins. Co.*, 393 F.3d 786, 795 (8th Cir. 2005) (suggesting exclusion applies only where insured assumes liability of a third party); *Federated Mut. Ins. Co. v. Grapevine Excavation Inc.*, 197 F.3d 720, 726 (5th Cir. 2000) (the insured was not sued as the contractual indemnitor of a third party's conduct but rather for its own conduct, so the contractual liability exclusion was inapplicable); *Olympic, Inc. v. Providence Wash. Ins. Co.*, 648 P.2d 1008, 1011 (Alaska 1982) ("'Liability assumed by the insured under any contract' refers to liability incurred when one promises to indemnify or hold harmless another, and does not refer to the liability that results from breach of contract."); *ACUITY v. Burd & Smith Constr., Inc.*, 721 N.W.2d 33, 40 (N.D. 2006) (liability assumed by the insured in a CGL policy is "generally understood and interpreted by the courts to mean the liability *of another* which one 'assumes' in the sense that one agrees to indemnify or hold the other person harmless"); *Gibbs M. Smith, Inc. v. U.S. Fid. & Guar. Co.*, 949 P.2d 337, 341 (Utah 1997) ("Courts have over and over again interpreted the phrase 'liability assumed by the insured under any contract' to apply only to indemnification and hold-harmless agreements, whereby the insured agrees to 'assume' the tort liability of another."); *Am. Family Mut. Ins. Co.*, 673 N.W.2d at 70 (Wis. 2004) (contractually-assumed liability clause excludes coverage for liability "where the insured has contractually assumed the liability of another, as in an indemnification or hold-harmless agreement"); 4 PHILLIP L. BRUNER & PATRICK J. O'CONNOR, BRUNER AND O'CONNOR ON CONSTRUCTION LAW § 11:109 (2010) (criticizing the court of appeals' judgment in this case and observing that the exclusion addresses "situations where the insured assumes the liability of another and, as a consequence, the insurer is placed in the position of extending coverage to a third party's liabilities for which the insurer performed no underwriting. In other words, the exclusion applies to the 'assumed' liability of another, not one's own liability due to a contractual undertaking."); C.T. Drechsler, Annotation, *Scope and Effect of Clause in Liability Policy Excluding from Coverage Liability Assumed by Insured Under Contract Not Defined In Policy, Such as One of Indemnity*, 63 A.L.R.2d 1122 (2009) ("[T]he contractual liability exclusion clause is not effective primarily in the two following situations: (1) where the insured is the one who is solely responsible for the injury, and (2) where the insured is the actively negligent wrongdoer."); 21 ERIC MILLS HOLMES, HOLMES' APPLEMAN ON INSURANCE § 132.3, 36-40 (2d ed. 1996) (noting that the contractual liability exclusion clause refers to the assumption of another's liability as in an indemnity agreement); 2 ROWLAND H. LONG, THE LAW OF LIABILITY INSURANCE § 10.05[2], 10-61 (1st ed. 2006) ("Although it could be argued that one assumes liability (*i.e.*, a duty of performance, the breach of which will give rise to liability) whenever one enters into a binding contract, in the CGL policy and other liability policies an 'assumed' liability is generally understood and interpreted by the courts to mean the liability *of another* which one 'assumes' in the sense that one agrees to indemnify or hold the other person harmless therefor."); 1 BARRY R. OSTRAGER & THOMAS R. NEWMAN, HANDBOOK ON INSURANCE COVERAGE DISPUTES § 7.05, 546 (14th ed. 2008) ("[C]ourts have consistently interpreted the phrase 'liability assumed by the insured under any contract' to apply only to indemnification and hold-harmless agreements, whereby the insured agrees to 'assume' the tort liability of another. This phrase does not refer to the insured's breaches of its own contracts."); 2 JEFFREY W. STEMPEL, STEMPEL ON INSURANCE CONTRACTS § 14.14 (3d ed. 2006 & Supp. 2009) ("The CGL coverage for a policyholder's liability assumed by contract 'refers to liability incurred when one promises to indemnify or hold harmless another, and does not refer to liability that results from breach of contract.'") (quoting *Olympic*, 648 P.2d at 1011).

hand, cites cases interpreting the exclusion as we do—not limiting the exclusion's scope to only those situations in which the insured has assumed the liability of another.[9] While we believe our interpretation of the policy accords with longstanding principles of insurance contract interpretation, we consider it worthwhile to examine the rationale of courts reaching contrary conclusions.

Most courts that have held the exclusion to be limited in nature and to apply only when indemnity or hold-harmless agreements are involved have relied on a case from the Alaska Supreme Court, *Olympic, Inc. v. Providence Washington Insurance Co. of Alaska*, 648 P.2d 1008 (Alaska 1982), which interpreted an earlier version of the standard CGL form.[10] When *Olympic* was decided in 1982, the CGL policy contained an exclusion for contractual liability that was similar to the exclusion in the CGL policy before us, but which included an exception for "incidental contracts" rather than "insured contracts." *See id.*, at 1010; 21 ERIC MILLS HOLMES, HOLMES' APPLEMAN ON INSURANCE § 132.3[B][1] (2d ed. 1996) (explaining the 1973 CGL contractual liability exclusion). The definition of "incidental contract" was narrower than the definition of "insured contract"; it did

---

[9] *See, e.g.*, *Nationwide Mut. Ins. Co. v. CPB Int'l Inc.*, No. 3:06-CV-0363, 2007 WL 4198173, at *8 (M.D. Pa. Nov. 26, 2007) ("Exclusion (b) is simply further clarification in the policy that contract-based claims are not covered."); *CIM Ins. Corp. v. Midpac Auto Ctr., Inc.*, 108 F. Supp. 2d 1092, 1099-1100 (D. Haw. 2000) (clause in policy stating that policy does not apply to liability assumed under any contract or agreement means that any claim that is dependent on the existence of an underlying contract is not covered); *Monticello Ins. Co. v. Dismas Charities, Inc.*, No. 3:96CV-550-S, 1998 WL 1969611, at *2 (W.D. Ky. Apr. 3, 1998) (exclusion for liability assumed by the insured under any contract or agreement does not arise only when a party assumes the liability for another party; rather, the plain meaning of the policy excludes a breach of contract claim from coverage); *Silk v. Flat Top Constr., Inc.*, 453 S.E.2d 356, 359 (W. Va. 1994) (exclusion removed coverage for breach of contract); *See also TGA Dev., Inc. v. N. Ins. Co. of N.Y.*, 62 F.3d 1089, 1091-92 (8th Cir. 1995) (exclusion for which the insured has assumed liability in a contract or agreement plainly excluded coverage for contractual claims and not just hold-harmless or indemnity agreements); *but see Ferrell*, 393 F.3d at 795 (without overruling or mentioning *TGA Development*, holding that the contractual liability exclusion applies only to situations where the insured has contractually assumed a third party's liability, such as in an indemnification or hold-harmless agreement).

[10] Prior to 1986, the CGL policy was called the Comprehensive General Liability Insurance Policy.

not include an explicit exception for certain indemnity or hold-harmless agreements as does the current CGL policy. *See* 21 ERIC MILLS HOLMES, HOLMES' APPLEMAN ON INSURANCE § 132.3[B][1]. Instead, coverage for specific indemnity or hold-harmless agreements was generally provided through a broad-form endorsement to the CGL policy. *See* 2 ROWLAND H. LONG, THE LAW OF LIABILITY INSURANCE § 10.05[2] (2006).

In 1986, the ISO revised the CGL form to generally provide coverage for indemnity and hold-harmless agreements through the insured-contract exception within the general CGL policy, as opposed to through a broad-form endorsement. *See* 21 ERIC MILLS HOLMES, HOLMES' APPLEMAN ON INSURANCE § 132.3[B] (explaining that the purpose of the 1986 revision was to "combine the essence of the former 1973 [contractual liability exclusion] with the expanded liability coverage formerly provided under the broad-form endorsement"); *see Am. Family Mut. Ins. Co.*, 673 N.W.2d at 81.

With this history in mind, we examine *Olympic*. In that case, a lessee agreed to obtain insurance indemnifying its lessor, but obtained insurance indemnifying only itself in case of breach of the lease between the parties. *Olympic*, 648 P.2d at 1009-10. When a firefighter was killed in a fire on the leased premises, the firefighter's estate sued both lessee and lessor. *Id.* at 1010. The lessor's insurer settled with the firefighter's estate, then sued the lessee's liability insurer to recover part of the settlement. *Id.* The lessor's insurer claimed the lessee's insurer was liable because the lessee breached the lease agreement. *Id.* The lessor's insurer asserted that the lessee's insurer's incidental contract exception to the contractual liability exclusion for "any written . . . lease of premises" implied that the policy insured against liability pursuant to any contract that was an

incidental contract, i.e. the lease agreement. *Id.* The Alaska Supreme Court disagreed, holding that "'[l]iability assumed by the insured under any contract' refers to liability incurred when one promises to indemnify or hold harmless another, and does not refer to the liability that results from breach of contract." *Id.* at 1011. According to the court, because the exclusion was limited to indemnity and hold-harmless agreements and did not apply, the exception to the exclusion for leases could not bring the claim into coverage because the contract was not an indemnity or hold-harmless agreement. *Id.* Accordingly, the court held that the lessee's policy did not cover its failure to procure proper insurance coverage. *Id.* at 1013-14.

The *Olympic* court was interpreting the pre-1986 contractual liability exclusion, thus the court did not have a specific exception for indemnity or hold-harmless agreements before it as part of the contract. The court was not faced with a circular reading of the exclusion and insured-contract exception as we are in the instant dispute. However, the rationale behind the *Olympic* decision lends support to our interpretation of the exclusion. In reaching its holding, the *Olympic* court relied, at least in part, on its perception that breach of contract claims generally are not covered absent tort liability. The court noted in its opinion that the general terms of the policy applied only to liability imposed by law for torts, and not to damages for breach of contract. *Id.* at 1012. Thus, "[t]he contractual liability exclusion functions to relieve the insurer of responsibility for any 'extra' liability that the insured undertakes by contract beyond the liability imposed by law for negligence." *Id.* at 1011 n.6. Moreover, the lessee in *Olympic* had a separate contractual liability policy listing specific contracts that were included in coverage, but the separate policy did not apply to the lease covenant

because it did not list the covenant. A similar situation exists here: the policy did not have an endorsement adding Gilbert's contract with DART as an insured contract.

We disagree, by and large, with courts' and treatises' conclusions that the language of the contractual liability exclusion before us applies only to indemnity or hold-harmless agreements for the reasons mentioned above. Insurance policy interpretation principles emphasize a policy's plain language in determining its intended coverage. *See, e.g.*, *Lamar Homes*, 242 S.W.3d at 14 (stating in regard to a CGL policy that coverage for a particular risk "depends, as it always has, on the policy's language, and thus is subject to change when the terms of the policy change"); *Fortis Benefits*, 234 S.W.3d at 647 (noting that insurance contract rights arise from the insurance contract language); *Fiess*, 202 S.W.3d at 753 ("For more than a century this Court has held that in construing insurance policies 'where the language is plain and unambiguous, courts must enforce the contract as made by the parties, and cannot make a new contract for them, nor change that which they have made under the guise of construction.'") (quoting *E. Tex. Fire Ins. Co. v. Kempner*, 27 S.W. 122, 122 (Tex. 1894)); *but see Puckett v. U.S. Fire Ins. Co.*, 678 S.W.2d 936, 938-39 (Tex. 1984) (holding that an aviation insurance policy's failure to include a causal connection requirement between the breach of the policy and the accident violated Texas public policy). We hold that the exclusion means what it says. It applies when the insured assumes liability for bodily injury or property damages by means of contract, unless an exception to the exclusion brings a claim back into coverage or unless the insured would have liability in the absence of the contract or agreement.

4. *Lamar Homes*

Gilbert argues that to adopt Underwriters' interpretation of the exclusion "effectively eviscerates" our decision in *Lamar Homes*. In *Lamar Homes*, we said a breach of contract can constitute an occurrence that causes property damage, thus bringing some breach of contract claims within the general grant of coverage for purposes of determining a duty to defend. *Lamar Homes*, 242 S.W.3d at 13. We explained that "the label attached to the cause of action—whether it be tort, contract, or warranty—does not determine the duty to defend" and that "any preconceived notion that a CGL policy is only for tort liability must yield to the policy's actual language." *Id.* Gilbert contends that if the exclusion in Underwriters' policy can operate to exclude general breach of contract claims, then our opinion in *Lamar Homes* would not have been necessary. Underwriters counters that our *Lamar Homes* decision did not interpret the exclusion but instead dealt with whether unintended construction defects could constitute an accident that would fall within the definition of an occurrence in the CGL policy's general grant of coverage.

We disagree that our interpretation of the exclusion in the policy runs afoul of our decision in *Lamar Homes*. The contractual liability exclusion was not at issue in *Lamar Homes*. There we considered whether property damage to a house that resulted from construction defects could nevertheless come within the general terms of liability coverage because the damage resulted from an occurrence as defined by the CGL policy. *See id.* at 10 ("The CGL's insuring agreement grants the insured broad coverage for property damage and bodily injury liability, which is then narrowed by exclusions that 'restrict and shape the coverage otherwise afforded.'") (quoting *Weedo v. Stone-E-Brick, Inc.*, 405 A.2d 788, 790 (N.J. 1979)). Whether a claim triggers an insurer's duty to defend

and whether a claim eventually is covered or excluded for purposes of indemnity are different questions. *See D.R. Horton-Tex., Ltd. v. Markel Int'l Ins. Co.*, 300 S.W.3d 740, 743 (Tex. 2009) (observing that "the duty to defend and the duty to indemnify 'are distinct and separate duties'") (quoting *Utica Nat'l Ins. Co. of Tex. v. Am. Indem. Co.*, 141 S.W.3d 198, 203 (Tex. 2004)). In *Lamar Homes*, we did not address the duty to indemnify, but rather the separate duty to defend. An insurer's duty to defend is determined under the eight-corners doctrine, while the duty to indemnify is determined by the facts as they are established in the underlying suit. *Id.* at 744 (quoting *Pine Oak Builders, Inc. v. Great Am. Lloyds Ins. Co.*, 279 S.W.3d 650, 656 (Tex. 2009)). Here, the facts demonstrate that Gilbert settled RTR's breach of contract claim after the trial court granted judgment in Gilbert's favor on all theories of liability besides the contractual one. And Gilbert does not contend the trial court erred in granting summary judgment on these other theories or that any liability it might have had to RTR arose from some source other than the breach of contract claim. Thus, RTR's only claim that remained pending against Gilbert fell within the policy's contractual exclusion for purposes of determining Underwriters' duty to indemnify.

5. Ambiguity

Gilbert argues that even if we hold the exclusion applies to the facts of this case, the exclusion is ambiguous and we must interpret it in favor of coverage. According to Gilbert, the exclusion could apply to general breach of contract claims *or* it could only apply to contracts for indemnity, depending on one's interpretation. Underwriters counters that the exclusion is unambiguous.

Terms in insurance policies that are subject to more than one reasonable construction are interpreted in favor of coverage. *Comsys*, 130 S.W.3d at 194; *Evergreen Nat'l Indem. Co. v. Tan It All, Inc.*, 111 S.W.3d 669, 676 (Tex. App.—Austin 2003, no pet.). "Where an ambiguity involves an exclusionary provision of an insurance policy, we 'must adopt the construction . . . urged by the insured as long as that construction is not unreasonable, even if the construction urged by the insurer appears to be more reasonable or a more accurate reflection of the parties' intent.'" *Balandran v. Safeco Ins. Co. of Am.*, 972 S.W.2d 738, 741 (Tex. 1998) (quoting *Nat'l Union Fire Ins. Co. of Pittsburg, Pa. v. Hudson Energy Co.*, 811 S.W.2d 552, 555 (Tex. 1991)). But an ambiguity does not exist simply because the parties interpret a policy differently. *See Am. Mfrs. Mut. Ins. Co. v. Schaefer*, 124 S.W.3d 154, 157 (Tex. 2003). If a contract as written can be given a clear and definite legal meaning, then it is not ambiguous as a matter of law. *Progressive County Mut. Ins. Co. v. Sink*, 107 S.W.3d 547, 551 (Tex. 2003); *Grain Dealers Mut. Ins. Co. v. McKee*, 943 S.W.2d 455, 458 (Tex. 1997).

We agree with Underwriters that the exclusion is not ambiguous. The exclusion is straightforward and not reasonably subject to two interpretations. It applies to liabilities the insured assumes by contract or agreement and not just to a particular subset of liabilities such as indemnity contracts. As discussed above, interpreting the exclusion as narrowly as Gilbert urges would yield a circular reading when the exclusion is considered in context with the insured-contract exception to the exclusion. In order to interpret the policy in a manner that harmonizes and gives effect to all provisions so that none are meaningless, Underwriters' interpretation is the only reasonable interpretation. *See MCI Telecomms. Corp.*, 995 S.W.2d at 652.

D. Second Exception to the Exclusion

Gilbert next argues that the second exception to the exclusion brings RTR's claim back into coverage. The second exception provides that the exclusion "does not apply to liability for damages . . . [t]hat the insured would have in the absence of the contract or agreement." Gilbert urges that (1) in the absence of its contract with DART, Gilbert would have been liable to RTR in tort because without the contract Gilbert would not have enjoyed governmental immunity status; (2) to hold otherwise would defeat the purpose of CGL coverage because there would not be coverage when there are multiple causes of action and the tort claim is dismissed for some reason; and (3) the exception must be construed broadly in favor of coverage. Underwriters counters that the duty to indemnify is based on the actual facts proven and adjudicated liability, and the only liability theory remaining when Gilbert settled with RTR was the breach of contract claim. We agree with Underwriters.

As the court of appeals observed, it is well settled that "a claim based on a contract that provides indemnification from liability does not accrue until the indemnitee's liability becomes fixed and certain." 245 S.W.3d at 35 (quoting *Ingersoll-Rand Co. v. Valero Energy Corp.*, 997 S.W.2d 203, 205 (Tex. 1999)); *see Hartrick v. Great Am. Lloyds Ins. Co.*, 62 S.W.3d 270, 275 (Tex. App.—Houston [1st Dist.] 2001, no pet.) ("[T]he duty to indemnify arises from proven, adjudicated facts.").

While this case involves a policy exception, not an indemnity provision as in the cases referenced above, the contract language similarly guides our analysis. *See Ingersoll-Rand*, 997 S.W.2d at 207. As modified by the second exception, the exclusion precludes the insurer's liability

for indemnity if the insured is obligated to pay only because of its contractually assumed liability. If the insured's liability is because of an otherwise covered basis in addition to its contractually-assumed liability, the second exception brings the claim back into coverage. *See Sw. Bell Tel. Co. v. DeLanney*, 809 S.W.2d 493, 494-95 (Tex. 1991) (recognizing that tort obligations are imposed by law independent of contractual obligations, but the acts of a party may simultaneously breach duties in tort and contract); *Cagle v. Commercial Standard Ins. Co.*, 427 S.W.2d 939, 943-44 (Tex. Civ. App.—Austin 1968, no writ) ("[W]here the express contract actually adds nothing to the insured's liability, the contractual liability exclusion clause is not applicable, but where insured's liability would not exist except for the express contract, the contractual liability clause relieves the insurer of liability."). Therefore, to determine whether the exception applies, we must decide whether Gilbert proved it would have had liability for RTR's damages absent its contractual undertaking. *See Comsys*, 130 S.W.3d at 193.

Gilbert asserts that if no contract existed in the first place, it would not have had immunity and RTR's negligence claim against Gilbert would not have been subject to an immunity defense. Assuming, without deciding, that Gilbert is correct, the argument misses the mark. The determination of an indemnity obligation is based on the actual facts of the case as proven and the language of the indemnity agreement. Here, the existence of the contract between Gilbert and DART was merely an underlying fact that was to be considered in determining Underwriters' indemnity obligation. *See Ingersoll-Rand*, 997 S.W.2d at 208 (noting that an indemnification cause of action accrues when the indemnitee's liability becomes fixed and certain). Because RTR's tort claims were properly dismissed, the only viable claim underlying Gilbert's settlement was for breach of contract.

Gilbert asserts no other basis for its settlement than the breach of contract claim; thus, Gilbert's settlement payment for which it seeks indemnity simply was not a liability for damages it had apart from its contract with DART, as it must have been in order for the second exception to apply.

Gilbert correctly argues that our decisions require us to interpret an exception to an exclusion broadly in favor of coverage. *See Evanston Ins. Co. v. ATOFINA Petrochems., Inc.*, 256 S.W.3d 660, 668 (Tex. 2008). But that principle does not mean we should distort the exception in order to find coverage where none exists. Gilbert would have us disregard the actual facts underlying its settlement and hold that the exception applies even to potential liability that Gilbert *might* have had if it had not entered into a contract with DART. We decline to do so. Indemnity under a liability policy depends on the actual facts and adjudicated liability, not possible scenarios that did not occur.

Gilbert also argues that interpreting the exception to apply only to actual proven facts and adjudicated liability will bar coverage anytime a tort claim is dismissed during litigation and a contractual claim remains—for example, where a tort claim is dismissed based on a statute of limitations defense but a breach of contract claim remains. We understand Gilbert's concerns, but speculation about coverage of insurance policies based on surmised factual scenarios is a risky business because small alterations in the facts can warrant completely different conclusions as to coverage. It is proper that we await a fully developed, actual case to decide an issue not presented here. We note, however, as did the court of appeals, that it is common for insurance coverage determinations to depend on the final basis for the insured's liability. 245 S.W.3d at 35. For example, when a claim alleges that an insured caused damages by both negligent and intentional conduct, "a judgment based upon [negligent] conduct often triggers the duty to indemnify, while a

judgment based on [intentional conduct] usually establishes the lack of a duty." *Farmers Tex. County Mut. Ins. Co. v. Griffin*, 955 S.W.2d 81, 84 (Tex. 1997).

Finally, contrary to Gilbert's assertions, to hold that the second exception does not apply here does not run afoul of our decision in *Lamar Homes*, in which we said that a cause of action's label does not determine whether an insurer has a duty to defend. *See Lamar Homes*, 242 S.W.3d at 13. The second exception contemplates a situation in which an insured's liability for damages results from matters that are within the policy's coverage in addition to or in lieu of the insured's contractually-assumed liability, but it does not prescribe whether the covered liability must be based in contract or tort. Moreover, *Lamar Homes* concerned a duty to defend rather than a duty to indemnify. *Id.* at 4-5. These are separate duties and are determined differently. *D.R. Horton-Tex., Ltd.*, 300 S.W.3d at 744 n.2 ("In contrast [to the duty to defend], the duty to indemnify arises only once liability has been conclusively determined.") (quoting 14 LEE R. RUSS & THOMAS F. SEGALLA, COUCH ON INSURANCE § 200:3 (3d ed. 2009)).

The exception for liability for damages Gilbert would have in the absence of the DART contract is inapplicable where, as here, the insured has governmental immunity and liability is based on its contract. If particular relationships of the parties, their contracts, and applicable legal principles create unusual circumstances, as they do here, it is incumbent on the parties to take those relationships, circumstances, and applicable legal principles into account when entering into

contracts and insurance agreements. If we held as Gilbert proposes, we would be remaking the parties' insurance agreement. We decline to do so.[11]

E. Estoppel

Finally, Gilbert argues that if we determine no coverage exists under the policy, Gilbert is entitled to recover under an estoppel theory because Underwriters assumed control of Gilbert's defense and prejudiced Gilbert as a result. Underwriters responds that (1) Gilbert waived the issue because it did not raise it in the court of appeals, (2) Underwriters did not assume Gilbert's defense, and (3) Gilbert was not prejudiced by Underwriters' actions. We first address the procedural question.

In the court of appeals, Gilbert argued that coverage existed by virtue of waiver and estoppel. After the court of appeals released its decision, we overruled cases on which Gilbert relied and held that the doctrine of estoppel may not be used to create insurance coverage where none exists under the policy. *Ulico*, 262 S.W.3d at 780. Following our decision in *Ulico*, Gilbert reframed its argument to argue that it is entitled to damages by virtue of estoppel. Our rules provide that a case

[11] Underwriters raises additional arguments which we need not address. First, Underwriters asserts that Gilbert was not cloaked with governmental immunity based on the DART contract per se, but based on Gilbert's status as a governmental contractor and its performance of specific governmental functions. *See* TEX. TRANSP. CODE § 452.056(d) ("A private operator who contracts with an authority under this chapter is not a public entity for purposes of any law of this state except that an independent contractor of the authority that . . . performs a function of the authority or an entity . . . that is created to provide transportation services is liable for damages only to the extent that the authority or entity would be liable if the authority or entity were performing the function . . . ."). Our holding precludes the need to determine whether Gilbert would have had immunity under the statute even in the absence of its particular contract, and we express no opinion on the question. Second, Underwriters argues that although its policy is a following-form policy generally, a separate exclusion in the excess policy bars coverage for "the failure of the Insured to complete a contract on time or to comply with any contractual obligations." Because we hold that the contractual liability exclusion in the underlying primary policy bars coverage for RTR's claim and exceptions to the exclusion do not bring the claim back into coverage, we do not reach the issue of the separate contractual exclusion in the excess policy.

may be remanded for further proceedings in light of changes in the law. TEX. R. APP. P. 60.2(f). However, an analysis pursuant to our *Ulico* opinion is substantively the same as that undertaken by the court of appeals in addressing Gilbert's estoppel issue: a determination must be made as to whether Underwriters assumed control of Gilbert's defense and is estopped to refuse to pay damages Gilbert suffered because of Underwriters' actions. We see no need to remand the case to allow the court of appeals to consider an argument it has effectively already considered. In light of the unusual circumstances, we conclude that Gilbert is entitled to make its estoppel argument, so we will consider its merits. *See Westgate, Ltd. v. State*, 843 S.W.2d 448, 455 (Tex. 1992).

In *Ulico*, we explained the estoppel doctrine as it relates to coverage when an insurer assumes an insured's defense:

> [I]f an insurer defends its insured when no coverage for the risk exists, the insurer's policy is not expanded to cover the risk simply because the insurer assumes control of the lawsuit defense. But, if the insurer's actions prejudice the insured, the lack of coverage does not preclude the insured from asserting an estoppel theory to recover for any damages it sustains because of the insurer's actions.

Ulico, 262 S.W.3d at 787.

Gilbert asserts that Underwriters directed Gilbert to seek summary judgment on RTR's tort claims based on governmental immunity, but did not inform Gilbert of Underwriters' position that the insurance policy did not cover breach of contract claims. Gilbert contends it was prejudiced because Underwriters' actions deprived it of the opportunity to make an informed decision about which risk to take: (1) assert the immunity defense and risk Underwriters' denying coverage for the

breach of contract claim, or (2) refuse to assert the immunity defense and risk Underwriters' denying coverage because Gilbert breached the cooperation clause.[12]

The court of appeals concluded that Underwriters did not assume control of Gilbert's defense. 245 S.W.3d at 37. We need not address whether Underwriters assumed control of the defense, however, because we conclude that even if Gilbert was deprived of the opportunity to make an informed decision as it claims, it was not prejudiced by the deprivation because in the final analysis, Gilbert did not have coverage for the contract claim regardless of whether it asserted the immunity defense as Underwriters directed it to do.

Gilbert primarily relies on our decision in *Employers Casualty Co. v. Tilley*, 496 S.W.2d 552 (Tex. 1973), to support its claim of prejudice. *Tilley* involved a suit in which Employers sought a declaratory judgment that it did not have coverage for a personal injury suit in which Joe Tilley was a defendant. When Tilley reported that he had been sued, Employers and Tilley entered into a standard non-waiver agreement and Employers retained an attorney to defend him. *Id.* at 554. Employers questioned whether Tilley had timely reported the accident on which the suit was based, but it did not specifically advise Tilley that a conflict of interest existed because of the late notice issue. Nor did the defense attorney advise Tilley that the attorney had a conflict of interest in that he was simultaneously defending Tilley and gathering coverage information favorable to Employers. *Id*. Employers later denied coverage, in part, on the basis of evidence developed by the defense

[12] We assume the validity of Gilbert's argument. However, both Grau and Gilbert's claims manager testified that at a mediation before the hearing on Gilbert's summary judgment motion one of Underwriters' attorneys told Grau the breach of contract claim might not be covered if summary judgment were granted on the basis of immunity.

attorney. *Id.* We held, largely on public policy grounds, that Tilley was prejudiced by Employers' actions and Employers was estopped to deny coverage. *Id.* at 561.

The facts of this case are not similar to those present in *Tilley*, and the prejudice Tilley suffered is different from the type of prejudice Gilbert claims. First, unlike the insurer in *Tilley*, Underwriters did not have a duty to defend Gilbert, nor did it retain Gilbert's defense attorney, Grau. There is no claim by Gilbert that Grau simultaneously defended Gilbert and represented Underwriters in regard to coverage, had a conflict of interest with Gilbert, developed and provided evidence to Underwriters that harmed Gilbert's coverage position without advising Gilbert, or in any other way breached his duty to Gilbert. To the contrary, Grau advised Gilbert to obtain coverage counsel and Gilbert knew Grau was not involved in coverage issues. Further, the suit with RTR was supervised by Gilbert's in-house claims manager who had over twenty-six years of experience in insurance claims and was monitored by in-house attorneys of Gilbert's parent corporation. Second, Underwriters consistently advised Gilbert during the pendency of RTR's case that coverage would be based on the actual facts underlying RTR's claims as they were determined to exist.

Gilbert does not explain how it was prejudiced by being unable to make an informed decision about whether to assert immunity when the ultimate risk to Gilbert under either choice—whether asserting immunity or refusing to assert immunity—was the same. While Gilbert claims that if it did not assert immunity Underwriters would have denied coverage for lack of cooperation, there is no evidence that Gilbert would have had coverage for the claims even if it had refused to assert the immunity defense. Gilbert does not contest that the facts established in RTR's suit showed that all the contractors were immune. Further, there is no evidence that, regardless of whether Gilbert

asserted immunity, Underwriters would have changed its position that coverage would be determined based on the facts of RTR's claim. Gilbert's lack of prejudice is reflected in a statement made by an attorney for its parent company. The attorney acknowledged that it likely would not have mattered whether Gilbert raised and pursued the issue of governmental immunity because the trial court ruled that governmental immunity extended to all the contractors. *See D.R. Horton-Tex., Ltd.*, 300 S.W.3d at 744 (noting that the duty to indemnify is determined by the facts as they are established in the underlying suit); *Pine Oak Builders, Inc.*, 279 S.W.3d at 656. Thus, Underwriters did not have coverage for RTR's claims regardless of whether Gilbert would have breached the policy's cooperation clause if it had refused to assert immunity, a question on which we express no opinion.

In sum, there is no evidence that if (1) Underwriters had advised Gilbert of Underwriters' belief that the breach of contract claim would not be covered if Gilbert succeeded in obtaining summary judgment on RTR's tort claims and (2) Gilbert had chosen not to pursue the summary judgment, then Underwriters would have settled the claim on behalf of Gilbert or been liable to indemnify Gilbert for the settlement. Thus, there is no evidence that Gilbert was prejudiced by not being able to make an informed decision as it claims.

III. CONCLUSION

We agree with the court of appeals that the trial court (1) erred in granting Gilbert's motion for summary judgment on the issue of coverage and (2) correctly granted Underwriters' motion for summary judgment on the issue of estoppel. We affirm the court of appeals' judgment.

Phil Johnson
Justice

OPINION DELIVERED: December 17, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0248

CARMELITA P. ESCALANTE, M.D., E. EDMUND KIM, M.D.,
EDGARDO RIVERA, M.D., AND FRANKLIN C. WONG, M.D., PETITIONERS,

v.

DONITA ROWAN AND JAMES NIESE, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

PER CURIAM

Respondents Donita Rowan and her husband filed suit against petitioners Dr. Carmelita P. Escalante, Dr. E. Edmund Kim, Dr. Edgardo Rivera, and Dr. Franklin C. Wong, physicians at University of Texas M.D. Anderson Cancer Center, alleging the doctors were negligent in failing to diagnose and treat the recurrence of Rowan's cancer. The doctors moved to dismiss the suit under section 101.106(f) of the Texas Tort Claims Act, TEX. CIV. PRAC. & REM. CODE § 101.106(f), claiming that the suit was based on conduct within the general scope of their employment and that the cause of action could have been brought against M.D. Anderson.

The trial court denied the doctors' motion to dismiss, and they filed an interlocutory appeal. While the appeal was pending, the doctors filed a motion for summary judgment on other grounds,

which the trial court granted. The court of appeals affirmed the denial of the motion to dismiss and reversed the summary judgment. 251 S.W.3d 720, 722 (Tex. App.–Houston [14th Dist.] 2008).

While this case has been pending on appeal, we have decided *Franka v. Velasquez*, ___ S.W.3d ___ (Tex. 2011), holding among other things that, for purposes of section 101.106(f), a tort action is brought "under" the Texas Tort Claims Act, even if the government has not waived its immunity for such actions. ___ S.W.3d at ___. In light of *Franka*, we grant the doctors' petition for review, and without hearing oral argument, reverse the court of appeals' judgment and remand the case to the court of appeals for further proceedings. TEX. R. APP. P. 59.1.

Opinion delivered: January 21, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0262

ROY KENJI YAMADA, M.D., PETITIONER,

v.

LAURA FRIEND, INDIVIDUALLY AND AS PERSONAL REPRESENTATIVE OF THE ESTATE OF SARAH ELIZABETH FRIEND, DECEASED, AND LUTHER FRIEND, INDIVIDUALLY, RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE SECOND DISTRICT OF TEXAS

Argued March 10, 2009

JUSTICE JOHNSON delivered the opinion of the Court.

In this appeal we address whether claims against a health care provider based on one set of underlying facts can be brought as both health care liability claims subject to the Texas Medical Liability Act (TMLA) and ordinary negligence claims not subject to the TMLA. We hold that they cannot.

Sarah Friend collapsed at a water park and later died. As a result of her death her parents sued several parties, including Roy Yamada, M.D. Sarah's parents alleged that Dr. Yamada negligently advised the water park about safety procedures and placement of defibrillators. They did not file an expert report as is required by the TMLA for health care liability claims.

The court of appeals held that the Friends' allegations that Dr. Yamada's actions violated medical standards of care were health care liability claims and the Friends were required to comply with provisions of the TMLA as to those claims. The Friends do not dispute that holding. The court also held, however, that the Friends' allegations that the same actions by Dr. Yamada violated ordinary standards of care and were not subject to the TMLA.

We hold that because all the claims against Dr. Yamada were based on the same underlying facts, they must be dismissed because the Friends did not timely file an expert report. When the underlying facts are encompassed by provisions of the TMLA in regard to a defendant, then all claims against that defendant based on those facts must be brought as health care liability claims. Application of the TMLA cannot be avoided by artfully pleading around it or splitting claims into both health care liability claims and other types of claims such as ordinary negligence claims.

I. Background

A. Trial Court

The city of North Richland Hills owns and operates North Richland Hills Family Water Park. In July 2004, twelve-year-old Sarah Friend was waiting in line for one of the water park rides when she collapsed. Personnel from the water park and North Richland Hills Fire Department administered emergency aid and she was then transported to a hospital where she died from a heart condition.

Sarah's mother and father, Laura[1] and Luther Friend, sued the City and several individual defendants. They alleged that Sarah's death was proximately caused by the defendants' failure to timely and properly evaluate and care for her after she collapsed. The Friends' allegations focused on the failure of water park personnel to use an automated external defibrillator (AED) in attending to Sarah.

The Friends eventually joined Dr. Yamada as a defendant. They alleged that he (1) was a licensed medical doctor who specialized in emergency medicine; (2) "had a duty to exercise ordinary care and act as an emergency medicine physician of reasonable and ordinary prudence under the same or similar circumstances"; (3) "was responsible for and provided medical consultative advice and recommendations to and for the various safety practices and procedures" at the water park prior to and as of the date Sarah collapsed; (4) "had a duty under Texas law to exercise ordinary care and act as an emergency medicine physician of reasonable and ordinary prudence" in providing services to the water park; and (5) breached "that duty" by (a) failing to timely, properly, and adequately provide services to the water park and (b) committing "other acts or omissions of negligence or wrongdoing." There was never a doctor-patient relationship between Dr. Yamada and Sarah.

The Friends did not file an expert report pursuant to Texas Civil Practice and Remedies Code section 74.351 after they sued Dr. Yamada, so he filed a motion to dismiss. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(a), (b). The Friends' response specified that their claims were based on Dr. Yamada's provision of medical consultative advice and recommendations in regard to various safety

[1] Laura sued individually and as representative of Sarah's estate.

practices and procedures at the water park. The trial court denied Dr. Yamada's motion and he appealed. *See id.* § 51.014(a)(9) (authorizing interlocutory appeal from an order denying a motion to dismiss for lack of an expert report).

B. Court of Appeals

The court of appeals noted that the only alleged acts or omissions on which the Friends based their claims against Dr. Yamada were his failure to properly provide advice and recommendations to the City about its safety practices, including the placement and maintenance of AEDs. ___ S.W.3d ___, ___. It determined that the pleadings stated claims for negligence based on breach of an emergency medicine physicians' standard of care, but also stated claims for ordinary negligence. *Id.* at ___. The appeals court reasoned that medical testimony is not required to establish the proper placement of AED devices, thus such claims were not health care liability claims because the alleged negligence was not based on advice directly related to acts performed or furnished by a health care provider to Sarah during her medical care, treatment, or confinement. The court held that the trial court properly refused to dismiss the claims based on allegations of ordinary negligence. *Id.* at ___. However, the court also held that the pleadings alleging Dr. Yamada gave negligent advice about where to locate AEDs were health care liability claims to the extent they alleged Dr. Yamada had a duty to act as an emergency physician under the circumstances and he breached that duty. The court held that the Friends' failure to file an expert report required dismissal of the claims based upon allegations of breach of an emergency room physician's standard of care. *Id.* at ___. Thus, the court of appeals held that the same acts and omissions by Dr. Yamada formed the basis of both

health care and non-health care claims based on pleadings alleging that the acts and omissions breached different standards of care.

C. Positions of the Parties

The Friends did not file a petition for review. But Dr. Yamada did and we granted it. 52 Tex. Sup. Ct. J. 331, 333 (Feb. 13, 2009).

Dr. Yamada asserts that the court of appeals erred in two ways. First, he argues the court construed the definition of health care liability claim based on a breach of accepted standards of safety too narrowly. Second, he asserts the court impermissibly allowed "claim splitting" by holding that the same underlying facts gave rise to an ordinary negligence claim, which the court held could continue, and a health care liability claim, which the court dismissed. The difference between the claims, Dr. Yamada urges, is nothing more than artful pleading.

In their brief, the Friends specify that Dr. Yamada's connection to Sarah's death was his consultative services in regard to placement of life-saving devices such as the AEDs. They do not dispute the court of appeals' characterization of their claims as alleging only that Dr. Yamada failed to properly provide advice and recommendations to the City about its safety practices. And they agree that the court of appeals "correctly . . . reversed the trial court's order denying Petitioner Dr. Yamada's motion to dismiss [their] claims that are based on a standard of medical care and dismissed those claims with prejudice." However, they argue that their ordinary negligence claim should not be dismissed because it is not in essence a health care liability claim. The Friends first assert that their ordinary negligence claim is not for breach of standards of medical care or health care as those terms are defined in the TMLA. Next, they argue that to be a health care liability claim

for breach of an accepted standard of safety under the TMLA, the claim must be for an act or omission directly related to health care, which their ordinary negligence claim is not. *See* TEX. CIV. PRAC. & REM. CODE § 74.001(a)(13).

We agree with Dr. Yamada in part.[2] The court of appeals' holding that the Friends asserted health care liability claims against Dr. Yamada is unchallenged and all their claims were based on the same facts. The Friends' claims against Dr. Yamada cannot be split into health care and non-health care claims by pleading that his actions violated different standards of care; all their claims must be dismissed.

II. Claims Under the TMLA

The TMLA requires the trial court to dismiss a suit asserting health care liability claims against a physician or health care provider if the plaintiff does not timely file an expert report as to that defendant. *Id.* § 74.351. The TMLA defines "health care liability claim" as

> [A] cause of action against a health care provider or physician for treatment, lack of treatment, or other claimed departure from accepted standards of medical care, or health care, or safety or professional or administrative services directly related to health care, which proximately results in injury to or death of a claimant, whether the claimant's claim or cause of action sounds in tort or contract.

Id. § 74.001(a)(13).

Whether a claim is a health care liability claim depends on the underlying nature of the claim being made. *Garland Cmty. Hosp. v. Rose*, 156 S.W.3d 541, 543 (Tex. 2004) (addressing former TEX. REV. CIV. STAT. art. 4590i, *repealed by* Act of June 2, 2003, 78th Leg., ch. 204, § 10.09, 2003

[2] Our decision makes it unnecessary to consider whether the court of appeals properly construed the TMLA's language regarding breaches of accepted standards of safety. It is also unnecessary to consider the effect, if any, of the lack of a doctor-patient relationship between Dr. Yamada and Sarah.

Tex. Gen. Laws 847, 884). Artful pleading does not alter that nature. *Diversicare Gen. Partner, Inc. v. Rubio*, 185 S.W.3d 842, 854 (Tex. 2005); *Garland Cmty. Hosp.*, 156 S.W.3d at 543.

III. Discussion

In *Diversicare*, Maria Rubio was the victim of a sexual assault at a nursing home. 185 S.W.3d at 845. Rubio filed suit against the nursing home based in part on claims that the home failed to hire and train appropriate personnel to monitor Rubio, failed to provide twenty-four-hour nursing services from a sufficient number of qualified nursing personnel to meet her nursing needs, hired incompetent staff who were unqualified to care for her, and failed to establish and implement appropriate safety policies to protect its residents. *Id.* The concurring and dissenting justices in *Diversicare* concluded that Rubio asserted a premises liability claim against the nursing home independent of her health care liability claim. *Id.* at 857-58 (Jefferson, C.J., concurring in part, and dissenting in part) (pointing to Rubio's claims that the home failed to protect her by failing to implement safety precautions and establish appropriate corporate safety, training, and staffing policies); *id.* at 861-66 (O'Neill, J., dissenting) (construing Rubio's claim that the facility failed to use ordinary care to protect her from a known danger to be a premises liability claim). The Court rejected the view that Rubio could allege a claim for premises liability independent of her healthcare liability claim because it "would open the door to splicing health care liability claims into a multitude of other causes of action with standards of care, damages, and procedures contrary to the Legislature's explicit requirements. It is well settled that such artful pleading and recasting of claims is not permitted." *Id.* at 854; *see also Murphy v. Russell*, 167 S.W.3d 835, 838 (Tex. 2005) ("[A] claimant cannot escape the Legislature's statutory scheme by artful pleading."); *Garland Cmty.*

Hosp., 156 S.W.3d at 543 ("Plaintiffs cannot use artful pleading to avoid the MLIIA's requirements when the essence of the suit is a health care liability claim.").

Because the Friends do not challenge the court of appeals' holding that their claims against Dr. Yamada are in part health care liability claims and based on facts covered by the TMLA, the question before us is whether claims based on the same facts can alternatively be maintained as ordinary negligence claims. We hold that they cannot.

Despite agreeing that the court of appeals correctly dismissed their health care liability claims based on the acts and omissions of Dr. Yamada, the Friends allege that his conduct can also be measured by ordinary standards of care as opposed to standards that require specific expertise in health care. But it would be hard to find a health care liability claim in which some action by the health care provider or physician arguably would not be within the common knowledge of jurors, and thus would support a claim for ordinary negligence. This case is a prime example of such a claim. The Friends assert that the same actions and omissions by Dr. Yamada are governed by both standards requiring expert testimony to establish—one of the factors that can be considered in determining whether a claim is a health care liability claim—and standards that do not require expert testimony.

The Friends reference other examples in their brief. In *Institute for Women's Health, P.L.L.C. v. Imad*, 2006 Tex. App. Lexis 1182 (Tex. App.—San Antonio Feb. 15, 2006, no pet.), an embryologist dropped a tray of embryos and destroyed all of them except one. The Friends note their agreement with the holding that the claims against the embryologist were health care liability claims because the specific acts and omissions of the embryologist were an inseparable part of the health

and medical transaction. But even though the carrying of the tray was an inseparable part of the health and medical services, the care required in carrying a tray of embryos without dropping it could have been asserted as ordinary negligence because the care required to carry a tray—whether one carrying embryos or something else such as a child's lunch—is not generally outside the common knowledge of jurors.

The Friends also reference *Valley Baptist Medical Center v. Azua*, 198 S.W.3d 810 (Tex. App.—Corpus Christi 2006, no pet.). There a hospital employee was assisting a patient into a wheelchair. The employee allegedly failed to block the wheels of the wheelchair and the patient was injured when the wheelchair moved as the patient was attempting to sit in it. *Id.* at 814. It certainly could be argued, as Azua did, that expert testimony is not necessary to establish the need to secure a wheelchair so it will not move when an ill patient tries to sit down in it. Nevertheless, the Friends note their agreement with the court of appeals' holding that the Azua's claim, although pled as an ordinary negligence claim, was a health care liability claim. *Id.*

Clearly, particular actions or omissions underlying health care liability claims can be highlighted and alleged to be breaches of ordinary standards of care. But if the same underlying facts are allowed to give rise to both types of claims, then the TMLA and its procedures and limitations will effectively be negated. Plaintiffs will be able to entirely avoid application of the TMLA by carefully choosing the acts and omissions on which to base their claims and the language by which they assert the claims.

Our prior decisions are to the effect that if the gravamen or essence of a cause of action is a health care liability claim, then allowing the claim to be split or spliced into a multitude of other

causes of action with differing standards of care, damages, and procedures would contravene the Legislature's explicit requirements. *Diversicare*, 185 S.W.3d at 854. Those decisions dictate the outcome here. The Friends' allegations that Dr. Yamada's actions breached ordinary standards of care did not change either the substantive basis or the nature of the claims.

IV. Conclusion

Based on the unchallenged holding of the court of appeals that the Friends' claims based on Dr. Yamada's actions encompassed health care liability claims, all their claims should have been dismissed because they did not file an expert report. We affirm the court of appeals' judgment to the extent it reversed the trial court's order and dismissed some of the Friends' claims. We reverse the court of appeals' judgment to the extent it affirmed the trial court's order denying Dr. Yamada's motion to dismiss. Because Dr. Yamada requested his attorney's fees and costs in the trial court under Texas Civil Practice and Remedies Code section 74.351(b)(1), we remand to that court with instructions to dismiss all the Friends' claims against Dr. Yamada and consider his request for attorney's fees and costs.

Phil Johnson
Justice

OPINION DELIVERED: December 17, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0265

CITY OF DALLAS, PETITIONER,

v.

VSC, LLC, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued January 8, 2010

CHIEF JUSTICE JEFFERSON delivered the opinion of the Court, joined by JUSTICE HECHT, JUSTICE MEDINA, JUSTICE GREEN, JUSTICE WILLETT, and JUSTICE LEHRMANN.

JUSTICE WAINWRIGHT delivered a dissenting opinion, joined by JUSTICE JOHNSON and JUSTICE GUZMAN.

We expect our government to retrieve stolen property and return it to the rightful owner. What happens, though, when a person claims an interest in property the government has seized? In this case, the City of Dallas seized vehicles, which it alleged were stolen, from a company that was entitled to petition for their return. *See* TEX. CODE CRIM. PROC. art. 47.01a(a). Instead of pursuing its statutory remedy, the company sued, alleging that its interest in those vehicles had been taken without just compensation. We hold that the availability of the statutory remedy precludes a takings claim. We reverse the court of appeals' judgment and render judgment dismissing this suit.

I. Background

Beginning in the summer of 2002 and continuing through 2004, the City's police department seized a number of vehicles from VSC, a licensed vehicle storage facility.[1] VSC initially alleged that the City seized 326 vehicles.[2] City police officers testified that all of the seized vehicles had been reported stolen or otherwise displayed indicia of theft, such as altered vehicle identification numbers. VSC's records confirmed that many of these vehicles had been reported stolen.

Several days after the initial seizure, VSC sued the City, asserting a lien for fees related to the vehicles' storage and contending that the City's actions amounted to an unconstitutional taking. The City removed the suit to federal court, which took jurisdiction over all but the takings claim,[3] which it remanded to state court along with the related declaratory judgment action.[4] The City filed a plea to the trial court's jurisdiction on several grounds, which that court denied. The court of

[1] *See* TEX. OCC. CODE ch. 2303. A vehicle storage facility is a parking facility that is used to store or park at least ten vehicles each year. *Id.* § 2303.002(8)(B). The chapter does not regulate vehicles parked with the consent of the owner. *Id.* § 2303.003(a). VSC's license to operate as a vehicle storage facility was revoked sometime after the occurrence of the facts that form the basis of this case.

[2] The precise total is disputed, with the City claiming that 324 vehicles were seized. In any event, VSC ultimately abandoned its claims to 47 of the seized vehicles and another 25 or 27 were either not seized or were the result of duplications or inaccuracies in VSC's records.

[3] VSC alleges a taking under both the Texas and United States Constitutions. Where the parties have not argued that there are any material differences between the state and federal versions of a constitutional provision, we typically treat the two clauses as congruent. *See New Times, Inc. v. Isaacks*, 146 S.W.3d 144, 150 (Tex. 2004).

[4] *See VSC, LLC v. City of Dallas*, No. 3:04-CV-1046-D (N.D. Tex. Feb. 23, 2005) (order remanding some claims to state court and retaining jurisdiction over others). The federal court retained jurisdiction over VSC's constitutional claims alleging an unlawful search and seizure, as well as its pendent state-law tort claims. *See id.*

appeals affirmed with respect to all but one issue.[5] 242 S.W.3d 584, 599. We granted the petition for review. 53 Tex. Sup. Ct. J. 13, 15 (Oct. 23, 2009).[6]

II. VSC's Takings Claim

A. The Statutory Remedy

Texas law permits a police officer to seize, without a warrant, vehicles that reasonably appear to have been stolen. TEX. TRANSP. CODE § 501.158(a) (permitting the warrantless seizure of allegedly stolen vehicles if an officer has probable cause). Vehicles seized under that authority are treated as stolen for purposes of custody and disposition. *Id.* § 501.158(b). But it may turn out that the property was not stolen at all, that it has multiple owners, or that it is subject to other claims, like a lien or leasehold interest. For these and other reasons, the Legislature enacted chapter 47 of the Code of Criminal Procedure, which protects a person's claimed interest in seized property. When there is a dispute as to property ownership, an officer possessing allegedly stolen property must secure it until the court directs its disposition. TEX. CODE CRIM. PROC. art. 47.01(a). That officer must file with the court a schedule of the property and its value and must "notify the court of the names and addresses of each party known to the officer who has a claim to possession of the seized property." *Id.* art. 47.03.

Because the officer may not know the identity of all persons with a claim to possession, the statute provides that any person with a property interest may assert that interest directly with the

[5] The court of appeals held that the trial court abused its discretion in denying the plea with respect to VSC's claim that the City took, damaged, or destroyed VSC's property for a private purpose. 242 S.W.3d 584, 596. VSC does not challenge that ruling here.

[6] We called for the views of the Solicitor General, who submitted a brief on behalf of the State of Texas as amicus curiae.

court.[7] *Id.* art. 47.01a(a) ("[U]pon the petition of an interested person" a judge "may hold a hearing to determine the right to possession of the property."). During that hearing "any interested person" may present evidence establishing ownership. *Id.* art. 47.01a(c). The individual proving the superior right to the property is entitled to its return, subject to the State's use of it in prosecuting related crimes.[8] *Id.* arts. 47.01a(a)(1)-(a)(2), 47.04. Occasionally—perhaps frequently—the property is never claimed and the government either sells or destroys it. *Id.* arts. 18.17, 47.06. If the property is sold, its true owner may recover the proceeds. *Id.* arts. 18.17(e), 47.07.[9]

Here, forty-seven of the seized vehicles were the subject of chapter 47 proceedings initiated by the City and adjudicated in municipal court. The court awarded some of the cars to VSC, some to the cars' owners, and others to the owners on the condition that VSC's fees were first satisfied. Thus, in many cases, VSC regained possession of the vehicles that the City had seized, and in others it was awarded compensation. VSC concedes that this procedure, when properly used, adequately protects its interests. As such, VSC has not brought takings claims with respect to the vehicles for which municipal court hearings were held.

---

[7] Though chapter 47 proceedings are typically brought in municipal court, that venue is not exclusive. *See* TEX. CODE CRIM. PROC. § 47.01(d). Claims under chapter 47 may be brought in the same suit as other claims.

[8] A chapter 47 proceeding initiated in municipal or justice court may be appealed to a county court or statutory county court, where they are "governed by the applicable rules of procedure for appeals for civil cases in justice courts to a county court or statutory county court." TEX. CODE. CRIM. PROC. 47.12(b). Matters appealed to county court are tried de novo. TEX. R. CIV. P. 574b.

[9] The owner of property sold pursuant to chapter 47 may recover the proceeds of the sale under the same circumstances as may the owner of property sold under the abandoned and unclaimed property statute. TEX. CODE CRIM. PROC. art. 47.07. Thus, the real owner must file a claim for the proceeds "not later than the 30th day after the date of [the property's] disposition." *Id.* art. 18.17(e).

For the other 270 vehicles, VSC claims that it does not know how the City disposed of them—or if it did. Though VSC could have initiated chapter 47 proceedings to assert its interest in the vehicles, it argues here that if the City wished to dispose of the vehicles, it was required to give VSC notice prior to hearings on their disposition. Any failure to do so, VSC argues, amounts to an unconstitutional taking of its asserted lien interest.[10] We disagree and hold that because VSC had actual knowledge of the vehicles' seizure—VSC knew the cars were seized from its lot, and it knew who seized them—it was required to pursue the chapter 47 proceedings.[11] We hold further that VSC must have utilized those procedures before a takings suit can be viable.

The constitution waives immunity for suits brought under the Takings Clause,[12] but this does not mean that a constitutional suit may be brought in every instance. The Legislature's broad authority to prescribe compensatory remedies for takings is well-established, so long as those methods comply with due process and other constitutional requirements. *See, e.g.*, *Secombe v. R.R. Co.*, 90 U.S. 108, 117-18 (1874) (holding that the Legislature has broad authority to create eminent

---

[10] We assume without deciding that a licensed vehicle storage facility may have a garageman's lien in a stored vehicle and that a garageman's lien may exist in stolen property. *See* TEX. PROP. CODE § 70.003(c) (providing for a lien in vehicles "left for care" with a garageman). The City disputes both of these contentions.

[11] The dissent provides a number of quotations from VSC's pleadings to argue that VSC did ask for chapter 47 relief in the trial court. While VSC asked to be declared an interested party entitled to notice under chapter 47, it pointedly *did not* seek a hearing. To the contrary, VSC disclaimed any responsibility to file under chapter 47 and argued, as it continues to argue here, that it was the City's sole responsibility to seek such hearings. Likewise, VSC's response to the City's plea to the jurisdiction focused solely on its takings claim—the only claim asserted in its live pleading. This does not amount to a request for chapter 47 relief. VSC was required to protect its alleged property interest by seeking relief under chapter 47. The statute authorized VSC to seek such relief, and the reasons for its failure to do so are irrelevant. *Cf.* ___ S.W.3d at ___ (suggesting that VSC failed to request a hearing because it "did not believe that it could bring a claim under Chapter 47").

[12] *See Steele v. City of Houston*, 603 S.W.2d 786, 791 (Tex. 1980) ("The Constitution itself is the authorization for compensation for the destruction of property and is a waiver of governmental immunity for the taking, damaging or destruction of property for public use.").

domain procedures). When the Legislature creates such a statutory procedure, recourse may be had to a constitutional suit only where the procedure proves inadequate, for it is not the taking of property, as such, that raises constitutional concerns, but the taking of property *without just compensation*. *See Williamson Cnty. Reg'l Planning Comm'n v. Hamilton Bank*, 473 U.S. 172, 194 (1985) ("The [Takings Clause] does not proscribe the taking of property; it proscribes taking without just compensation.").[13] When there exists provision for compensation—or, as here, for the property's return—a constitutional claim is necessarily premature. *See id.* at 194-95 ("If the government has provided an adequate process for obtaining compensation, and if resort to that process '[yields] just compensation,' then the property owner 'has no claim against the Government' for a taking." (quoting *Ruckelshaus v. Monsanto Co.*, 467 U.S. 986, 1013, 1018 n.21 (1984)) (alteration in original)); *see also Yearsley v. W. A. Ross Constr. Co.*, 309 U.S. 18, 21 (1940) (refusing to pass upon a takings claim because of the existence of a statute "afford[ing] a plain and adequate remedy"); *Hurley v. Kincaid*, 285 U.S. 95, 104 (1932) (holding that governmental action

[13] The dissent contends that *Williamson County*'s state-court litigation requirement does not apply here because that decision was based on federalism concerns not present in this case. ___ S.W.3d at ___. We believe, though, that the Court's reasoning has direct relevance. *Williamson County* requires complainants alleging a taking to file inverse condemnation suits in state court before bringing suit in federal court. *Williamson Cnty. Reg'l Planning Comm'n v. Hamilton State Bank*, 473 U.S. 172, 186 (1985). The Court began with the basic proposition that the Takings Clause only prohibits takings without just compensation. *Id.* at 194. Citing *Ruckelshaus v. Monsanto Co.*, 467 U.S. 986 (1984), the Court explained that it had already interpreted this to mean that "taking claims against the Federal Government are premature until the property owner has availed itself of" remedial statutory procedures. *Williamson Cnty.*, 473 U.S. at 195. The Court further held that a state-court inverse condemnation claim *was* a *Ruckelshaus*-type remedial procedure, and that a property owner therefore could not bring a *federal* takings claim until he had proceeded in state court. *Id.* at 195-96. This second holding has been criticized, as it has made it more difficult for property owners to bring takings claims against state governments in federal courts. *See San Remo Hotel, L.P. v. City & Cnty. of San Francisco*, 545 U.S. 323, 348 (2005) (Rehnquist, C.J., concurring) (arguing that *Williamson County*'s state-court litigation rule should be reconsidered).

Our holding today, however, relies only on *Williamson County*'s primary observation that utilization of a remedial scheme for recovery of property logically precedes a takings claim. As the Court acknowledged, this is a proposition implicit in the Takings Clause and well-supported by precedent.

was not unconstitutional because "the complainant can recover just compensation under the Tucker Act in an action at law . . . [and t]he compensation which he may obtain in such a proceeding will be the same as that which he" is entitled to under the constitution); *Crozier v. Fried. Krupp Aktiengesell-Schaft*, 224 U.S. 290, 306-07 (1912) (rejecting a constitutional challenge on the basis of the Takings Clause because the relevant statute provided a compensatory mechanism).[14]

Immediately following the vehicles' seizure, however, when VSC filed its district court lawsuit, VSC had a legal avenue through which it could potentially regain possession or compensation. As the dissent acknowledges, operation of the chapter 47 procedure might have "moot[ed] VSC's takings claim." ___ S.W.3d at ___. This is significant, because if a remedial procedure might have obviated the need for a takings suit, then the property simply had not, prior to the procedure's use, been taken *without just compensation*. Because VSC could seek possession or compensation through a remedial statutory scheme, it could not ignore that scheme in favor of initiating a constitutional takings suit.

Hays v. Port of Seattle, 251 U.S. 233 (1920), is a good illustration of this rule. There, the Supreme Court refused to permit a claimant to bring a takings suit, despite the fact that the government had seized his property for a public purpose. *Hays*, 251 U.S. at 238. The Court emphasized that the state provided a procedure by which the claimant could seek just compensation. *Id.* ("[T]his statute constitutes an adequate provision for assured payment of any compensation due

[14] The Supreme Court later explained that the existence of a statutory remedy in *Crozier* made the government's taking of property in that case constitutionally unobjectionable. *See William Cramp & Sons Ship & Engine Bldg. Co. v. Int'l Curtis Marine Turbine Co.*, 246 U.S. 28, 44-45 (1918) ("[T]he provisions of the statute affording a right of action and compensation were adequate to justify the exercise" of the government's power.).

to complainant . . . ."). Thus, the Supreme Court held that there could be no taking because the claimant bypassed the compensatory procedure.

As in *Hays*, the claimant here alleges that a taking has occurred. As in *Hays*, the Legislature has provided a procedure capable of "constitut[ing] an adequate provision," *id.*, for compensation—here, actual possession. And, as in *Hays*, the claimant here has ignored the compensatory scheme in favor of a constitutional claim. Thus, we reject VSC's taking claim because it did not pursue an established remedy to recover its claimed interest in the seized property.[15]

B. Notice

VSC suggests, however, that chapter 47 is constitutionally infirm because it does not require that the City notify claimed owners of these proceedings. Disputes about proper notice invoke procedural due process, not the Takings Clause. In *Lingle v. Chevron U.S.A. Inc.*, 544 U.S. 528, 543 (2005), the Supreme Court observed that takings and due process are distinct inquiries and held that due process claims must be addressed first because whether there has been proper notice is a question "logically prior to and distinct from" whether there has been a taking. The Takings Clause guarantees compensation "in the event of *otherwise proper interference* amounting to a taking." *Id.*

[15] *See also Ruckelshaus*, 467 U.S. at 1013 n.16 (holding that a statutory procedure that provides just compensation "nullif[ies] any claim against the Government for a taking"). In *Ruckelshaus*, Monsanto claimed that the Environmental Protection Agency (EPA) had taken without just compensation certain trade secrets that it was required to submit during the approval process for insecticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). *Id.* at 998. The alleged taking occurred when the EPA used some of Monsanto's trade secrets in assessing the permit applications of other companies' insecticides. *Id.* However, under FIFRA, Monsanto was entitled to compensation from the companies to whose benefit its trade secrets were applied, which it could seek through a statutory arbitration process. *Id.* at 995. The Court held that Monsanto's takings claims were unripe because it had not yet arbitrated its claims, noting that "[i]f a negotiation or arbitration pursuant to [FIFRA] were to yield just compensation . . ., then Monsanto would have no claim against the Government for a taking." *Id.* at 1013.

(internal quotations omitted). If due process is violated due to failure of notice, however, "that is the end of the inquiry" because "[n]o amount of compensation can authorize such action." *Id.* Thus, VSC's failure-of-notice claim is more properly considered as alleging a due process violation than a taking. Regardless, we believe that VSC's actual notice of the vehicles' seizures was constitutionally sufficient and that it therefore had the burden of pursuing the chapter 47 remedy.

In *Mullane v. Cent. Hannover Bank & Trust Co.*, 339 U.S. 306 (1950), the Supreme Court concluded that due process is satisfied if notice is "reasonably calculated, under all the circumstances, to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections." *Id.* at 314. The *Mullane* Court focused on the requirement that the parties be actually notified of an action that might affect their interests. *Id.* at 315 ("The chance of actual notice is further reduced when, as here, the notice required does not even name those whose attention it is supposed to attract . . . ."). The Supreme Court recognized "the impossibility of setting up a rigid formula as to the kind of notice that must be given," holding that the "notice required will vary with circumstances and conditions." *Walker v. City of Hutchinson*, 352 U.S. 112, 115 (1956).

In *City of West Covina v. Perkins*, 525 U.S. 234, 241 (1999), the Supreme Court held that actual notice is constitutionally sufficient notice of a remedial procedure when that procedure is easily discoverable. There, the police seized personal property from Perkins's home under a valid search warrant. *West Covina*, 525 U.S. at 236. The police did not suspect Perkins of a crime but, rather, were pursuing a former boarder who was purportedly involved in a homicide. *Id.* As required by statute, the police left Perkins a warrant that listed the seized property and named the

issuing magistrate and executing officer. *Id.* at 236-37. Rather than seek a court order, Perkins sued the officers and alleged that the remedies for the property's return did not satisfy due process. *Id.* at 237-38. The Supreme Court distinguished *Mullane*, writing that while individualized notice of the seizure itself is necessary,

> [n]o similar rationale justifies requiring individualized notice of state-law remedies which, like those at issue here, are established by published, generally available state statutes and case law. Once the property owner is informed that his property has been seized, he can turn to these public sources to learn about the remedial procedures available to him. The City need not take other steps to inform him of his options.

Id. at 241. The notice contained in the search warrant was sufficient process and Perkins was then required to initiate proceedings for the property's return. *Id.* at 242-44.

The facts in this case mirror those in *West Covina*. The police legally seized VSC's property, and VSC was aware of what property was seized and by whom. The Legislature provided a statutory remedy for the return of the property that was easily discoverable from public sources. *See* TEX. CODE CRIM. P. ch. 47.[16] Having given constitutionally sufficient notice of the seizures, the City was under no obligation to invite VSC to initiate chapter 47 proceedings.[17]

---

[16] Even if it failed to participate in the chapter 47 proceedings, VSC might have had, in certain cases, a second post-deprivation option available to it. *See* TEX. CODE CRIM. PROC. arts. 18.17(e), 47.07.

[17] VSC, having notice of the vehicles' seizure, should have initiated chapter 47 proceedings, both to notify the government that it was asserting an interest in the vehicles and to determine its interest in them. VSC failed to do so. After *West Covina*, federal courts have held that where a claimant fails to take advantage of a State's post-deprivation procedures, that claimant cannot then complain of the State's subsequent disposition of the property. *See, e.g.*, *Revell v. Port Auth. of N.Y. & N.J.*, 598 F.3d 128, 139 (3rd Cir. 2010) (affirming summary judgment against the claimant because "he did not take advantage of state procedures available to him for the return of his property"); *Mora v. City of Gaithersburg*, 519 F.3d 216, 230 (4th Cir. 2008) ("Mora has had, and continues to have, notice and an opportunity to be heard in Maryland, and he cannot plausibly claim that Maryland's procedures are unfair when he has not tried to avail himself of them."); *McKinney v. Chidley*, 87 F. App'x 615, 617 (9th Cir. 2003) (memo. op.) (affirming summary judgment against claimant because he admitted that he did not follow State procedures for recovering property).

We also note that the dissent's position on notice could severely hamper law enforcement. We assume for the

III. Declaratory Judgments

The City filed a plea to the trial court's jurisdiction as to several declarations requested by VSC.[18] The trial court denied the plea, and the court of appeals affirmed despite the fact that VSC had by then lost its license to operate a vehicle storage facility and therefore could no longer store the type of vehicles involved in this suit. The court of appeals noted that VSC's requested declarations were not by their terms limited to nonconsensually-towed vehicles, and on this basis it refused to grant the plea. 242 S.W.3d at 597. This, however, conflicts with our rule that a declaratory judgment action may lie only where there is a "substantial controversy involving genuine conflict of tangible interests."[19] *Bonham State Bank v. Beadle*, 907 S.W.2d 465, 467 (Tex. 1995) (internal quotations omitted). But with regard to the sort of vehicles VSC may still store, there is no apparent conflict at all, and as such the relief sought is highly speculative and theoretical, incapable of settling any actual controversy between the parties. *See id.*; *State ex rel. McKie v. Bullock*, 491 S.W.2d 659, 660 (Tex. 1973) (holding that there could be no declaratory judgment action where a declaration would not settle an actual controversy between the parties).

---

purposes of this case that VSC does in fact have a property interest in its alleged liens on the seized vehicles, although the State strenuously disputes this proposition. But in a case like this, where the precise contours of property rights are unclear, it is difficult to charge the government with the duty of notice. The dissent's rule would subject political subdivisions to takings liability in cases in which they did not even know property rights existed. Because VSC's actual notice was sufficient here, however, we need not reach this issue.

[18] VSC sought declarations that (1) it was entitled to fees for stolen vehicles, (2) the City lacked authority to seize allegedly stolen vehicles from VSC, and (3) VSC was entitled to notice and a hearing under chapter 47.

[19] We have conflicts jurisdiction over this case based on section 22.225(c) of the Government Code as it existed at the time this action was filed, which grants us jurisdiction where the court of appeals' decision would overrule a decision of this Court if both had been decided by the same court. *Tex. Natural Res. Conservation Comm'n v. White*, 46 S.W.3d 864, 867 (Tex. 2001); *see also* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 1.02, 2003 Tex. Gen. Laws 847, 848 (codified at TEX. GOV'T CODE § 22.225).

IV. Conclusion

VSC received all of the process to which it was entitled. A party cannot claim a lack of just compensation based on its own failure to invoke a law designed to adjudicate such a claim. We reverse the court of appeals' judgment and render judgment dismissing the case. TEX. R. APP. P. 60.2(c).

Wallace B. Jefferson
Chief Justice

OPINION DELIVERED: July 1, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0265

CITY OF DALLAS, PETITIONER,

v.

VSC, LLC, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued January 8, 2010

JUSTICE WAINWRIGHT, joined by JUSTICE JOHNSON and JUSTICE GUZMAN, dissenting.

A peace officer may take possession without a warrant of property in the hands of innocent third parties if he or she has probable cause to believe it may have been stolen. *See* TEX. TRANSP. CODE § 501.158 (a) ("A peace officer may seize a vehicle or part of a vehicle without a warrant if the officer has probable cause to believe that the vehicle or part: (1) is stolen; or (2) has had the serial number removed, altered, or obliterated."). The government holds such property, at times at private storage facilities, until its usefulness, if any, as evidence in a judicial proceeding is over and the actual owner is determined. Under such circumstances, we expect our government to preserve and protect individuals' property and dispose of it only when allowed by law and with notice to the property's owners. In this case, a third party with a protectable interest in property that was seized sought, among other things, injunctive relief in state district court to prohibit the government from

disposing of that interest and declaratory relief seeking recognition of its rights in the property. During the pendency of the lawsuit, the government not only physically removed more of the property, but also disposed of the property subject to the original suit without notice or compensation to the third party. The third party had a storage lien on confiscated vehicles to secure its right to be paid for the storage services it provided.

The Court holds that because the third party failed to pursue remedies through a vague, incomplete, and likely constitutionally infirm statutory procedure, its recovery is precluded in the original suit filed in district court requesting the same relief the Court says it must seek as a prerequisite to a takings claim. The Court, on an issue not raised by the parties, dismisses VSC's claims for its failure to specifically plead a claim (1) usually initiated in municipal court that is not a required prerequisite, (2) that the City argued at the trial court and the court of appeals was unavailable for VSC to seek during the pendency of a lawsuit, covering the same conduct, and (3) where VSC sought equivalent relief through injunctions and declaratory judgment actions. I would hold that VSC sought the relief under Chapter 47 of the Code of Criminal Procedure that the Court holds is a prerequisite to an inverse condemnation claim. VSC satisfied that prerequisite with its pleadings. And on the merits, I would hold that there are fact questions as to whether and how the City disposed of the vehicles at issue and affirm the trial court's denial of the plea to the jurisdiction. I therefore respectfully dissent.

I. Factual and Procedural Background

The Court's brief recitation of the facts omits important information regarding the substance and timing of VSC's claims and the government's actions regarding VSC's property. In 2002, VSC

operated a Vehicle Storage Facility licensed in accordance with the Vehicle Storage Facility Act (VSFA), which authorized VSC to receive and store vehicles towed to its lot without the owners' consent. TEX. OCC. CODE §§ 2303.001–.305. In 2002 the Dallas Police Department (DPD), directed by the City of Dallas (City), entered VSC's property and took possession of fifty vehicles from VSC's storage lot. VSC stored the vehicles towed there. Four days after the first fifty vehicles were seized, VSC sought a temporary restraining order in state district court against the City, presumably to prevent seizures of any more vehicles. Eventually, the City filed proceedings under Chapter 47 of the Texas Code of Criminal Procedure to determine possession of the allegedly stolen vehicles. *See* TEX. CODE CRIM. PROC. arts. 47.01–.12. VSC participated in a hearing before a municipal court judge pursuant to article 47.01a. *See id.* art. 47.01a. The municipal court awarded eighteen of the vehicles to their owners. Fourteen of those eighteen awards were contingent upon the owners paying VSC the storage fees due. The municipal court awarded the remaining thirty-two vehicles to VSC.[1]

Even though its district court action remained pending, VSC contends that the City seized a total of 276 additional vehicles, and that the City stored some of the seized vehicles, released some to their owners, and sold the rest, but failed to pay VSC any storage fees collected from those sales. The City admitted that it seized 326 vehicles from VSC's lot. The City does not indicate whether it used Chapter 47 hearings to dispose of these additional vehicles, and the record does not provide the answer. VSC asserts that the City did not notify it of any hearings on the remaining 276 vehicles and did not advise VSC of how it had disposed of any of the vehicles. Moreover, the City allegedly

[1] VSC does not seek damages for the loss of any of the fifty vehicles subject to the Chapter 47 hearings.

did not inform the municipal court that VSC was an interested party or had asserted a right to possession, as required by statute. *See id.* art. 47.03 ("The officer shall notify the court of the names and addresses of each party known to the officer who has a claim to possession of the seized property."). The City does not challenge these assertions, and they are taken as true for purposes of this appeal of the plea to the jurisdiction.

VSC contends that it notified the City that it had a property interest in the vehicles and requested notice of any hearings. It further claims it had "a legitimate and recognized property interest" in the seized vehicles that the City destroyed by disposing of the vehicles without notice to VSC. The City does not dispute that it did not pay VSC any storage fees on the vehicles. At the trial court and court of appeals, the City asserted that because VSC was not the owner of the vehicles, it was not entitled to notice of Chapter 47 hearings.

VSC's suit against the City in state court was amended multiple times, eventually alleging various state and federal causes of action. In its Fourth Amended Petition, filed just before the case was removed to federal court,[2] VSC alleged, among other things, that it was an "interested person" for purposes of Chapter 47, that it had a possessory property interest in the seized vehicles, and that the City's actions constituted a taking under state and federal law. It sought injunctive relief, damages, and declaratory relief. VSC pled that the trial court "should specifically make a determination as to the rightful possession of the seized vehicles still in Defendants' possession and

[2] The City removed the case to federal district court. At VSC's request, the federal court remanded three of the causes of action to the state court and abated the remaining federal claims until disposition of the state court litigation. The third cause of action, a takings claim for private use, is not at issue because the court of appeals dismissed it. Neither party appeals that decision.

Plaintiff's property interest in these vehicles as well as vehicles recovered by Plaintiff in the future . . . ."

Later, in VSC's Sixth Amended Petition, the live petition for this appeal, VSC alleged that the City had disposed of the remaining 276 vehicles. Nonetheless, it still sought, contrary to the Court's suggestion, relief under Chapter 47. VSC alleged that the City "intentionally entered onto Plaintiff's property and seized vehicles to which Plaintiff had a superior right to possess and in which Plaintiff had a recognized property interest," that it was entitled to notice under Chapter 47, that the Court should declare its superior rights in the vehicles and that the City lacks authority to seize and dispose of the vehicles, and that it was entitled to damages for the City's alleged taking of its interest in the vehicles.

Two claims are the subject of this appeal. One alleges that the City's seizure and subsequent disposition of the vehicles without notice to VSC was a taking of VSC's property interest in the vehicles for public use and violated VSC's right to just compensation under the Texas and United States Constitutions. TEX. CONST. art. I, § 17; U.S. CONST. amends. V, XIV § 1. The second cause of action sought a declaratory judgment against the City related to its towing policies and its entitlement to storage fees.

The City filed a plea to the jurisdiction, asserting VSC could not state a valid takings claim and that VSC alleged no other basis to waive the City's governmental immunity. The City did not allege at the trial court that VSC's claims were unripe or otherwise not justiciable because VSC failed to request a hearing under Chapter 47. The trial court denied the plea to the jurisdiction, and the City brought an interlocutory appeal. *See* TEX. CIV. PRAC. & REM. CODE § 51.014(a)(8)

(permitting interlocutory appeals from a court order that grants or denies a plea to the jurisdiction by a governmental unit). The court of appeals affirmed the trial court ruling as to the "public use" state and federal takings claims[3] and affirmed the denial of the plea as to VSC's declaratory judgment action. 242 S.W.3d 584, 599 (Tex. App.—Dallas 2008, pet. granted). The City appealed, and we granted review.

The City argues that the trial court did not have jurisdiction because VSC does not have a valid property interest in the seized vehicles to assert a state takings claim. It argues that even if there is a property interest, the seizures themselves were not compensable takings. Although the parties discussed the applicability of Chapter 47 at oral argument, in its briefing to this Court the City did not argue that Chapter 47 was a prerequisite to suit or that its plea to the jurisdiction should be granted for VSC's failure to exhaust any presuit procedure. However, today the Court avoids the issues raised by the parties and instead holds that the plea to the jurisdiction should be granted, not because VSC cannot state a takings claim, but because its takings claim is precluded by VSC's failure to seek relief under Chapter 47. A close examination of Chapter 47 will help to understand the extent of the Court's error.

II. Chapter 47

A. Structure and Use of Chapter 47

[3] VSC contended, in the alternative, that the seizures constituted a taking of private property for a "private use." The court of appeals reversed the trial courts' denial of the plea on this claim, which is not before us.

Various statutes provide that a peace officer may seize property that has been, or appears to be, stolen. *E.g.*, TEX. TRANSP. CODE § 501.158(a). Chapter 47 of the Texas Code of Criminal Procedure provides a mechanism for return of that property. When an officer seizes property,

> he shall immediately file a schedule of the same . . . with the court having jurisdiction of the case, certifying that the property has been seized by him, and the reason therefor . . . [and] shall notify the court of the names and the addresses of each party known to the officer who has a claim to possession of the seized property.

TEX. CODE CRIM. PROC. art. 47.03. If the ownership of the property is disputed, the officer "shall hold it subject to the order of the proper court." *Id.* art. 47.01(a). If no criminal trial is pending, an appropriate judge, which may include a district judge, county court judge, statutory county court judge, magistrate, or justice of the peace "may hold a hearing to determine the right to possession of the property, upon the petition of an interested person, a county, a city, or the state." *Id.* art. 47.01a(a). Following the hearing, the judge may award the property "to whoever has the superior right to possession," or to the state, pending resolution of the criminal case. *Id.* "If it is shown in a hearing that probable cause exists to believe that the property was acquired by theft or by another manner that makes its acquisition an offense and that the identity of the actual owner of the property cannot be determined," the court may award possession to the state for official purposes, for disposition as unclaimed property, or for destruction. *Id.* art. 47.01a(b).

Chapter 47 is different from civil forfeiture, which applies to seized property that was used in the commission of a crime. *See* TEX. CODE CRIM. PROC. arts. 59.01–.14. While Chapter 47 gives a small framework for the quick disposition of property "alleged to have been stolen," it leaves important gaps in its procedure. *Id.* art 47.01. For example, the chapter does not refer to a party

filing a "petition" or initiating a "civil action," but only that an interested party may request a "hearing." It does not require notice to interested parties, as the civil forfeiture statute does. *Cf. id.* art. 59.04(b) (requiring that, to institute civil forfeiture proceedings, the state's attorney "shall cause certified copies of the notice to be served on [relevant] persons in the same manner as provided for the service of process by citation in civil cases"). Chapter 47 is schizophrenic in what the judicial officer may determine, whether it is the person who "has the superior right to possession," *id.* art. 47.01a(a)(1), or who is the "actual owner" of the property, *see id.* arts. 47.01(a), .02(b), .04. *Compare Universal Underwriters Grp. v. State*, 283 S.W.3d 897, 900 (Tex. App.—Houston [14th Dist.] 2009, no pet.) ("[U]nder article 47.01a, the trial court determines 'superior right to possession,' rather than ownership."), *and Perry v. Breland*, 16 S.W.3d 182, 189 (Tex. App.—Eastland 2000, pet. denied) ("The justice court had no jurisdiction . . . to determine ownership [of the property at issue] . . . ."), *with Allstate Ins. Co. v. Troy's Foreign Auto Parts*, No. 05-00-01239-CV, 2001 WL 840613, at *3 (Tex. App.—Dallas July 26, 2001, pet. denied) ("[Chapter 47] provides the court with the power to direct the property be restored to the owner. In addition, the right to possession without legal ownership would render the possession useless . . . . The municipal court has jurisdiction to award both possession and title . . . ." (citations omitted)). And it certainly does not include any expression that Chapter 47 is the *exclusive* method of determining ownership, or a right to possession. "Nothing in the statute suggests that Chapter 47 provides the exclusive forum for establishing ownership." *Tipton Int'l, Inc. v. Davenport*, No. 10-02-00242-CV, 2004 WL 1474663, at * 3 (Tex. App.—Waco June 30, 2004, no pet.).

Because of the lack of specificity and comprehensive scheme, the only way to view Chapter 47 is as a *process* rather than a *proceeding*, applicable to a number of different judicial forums. Chapter 47 provides that a district, county court, statutory county court judge, or a justice of the peace or municipal judge with magistrate jurisdiction may "hold a hearing" to determine disposal of allegedly stolen property. TEX. CODE CRIM. PROC. art. 47.01a(a)(1). It is not surprising that our courts of appeals have dealt with Chapter 47 claims not only brought as stand-alone claims, but also as independent tort claims and counterclaims brought by the state in tort and constitutional civil rights actions against it. *See York v. State*, 298 S.W.3d 735, 741 (Tex. App.—Fort Worth 2009, pet. filed) (alleging takings violation through improper disposal of trailer under Chapter 47); *Universal Underwriters*, 283 S.W.3d at 899 (noting that the state filed a "Petition for Disposition of Stolen Property" under Chapter 47); *Allstate Ins. Co.*, 2001 WL 840613, at *1 ("Seeking possession of [the property] under article 47.01a [the parties] attended a hearing . . . ."); *City of Pasadena v. De Los Santos*, No. 01-98-00104-CV, 1999 WL 339335, at *1 (Tex. App.—Houston [1st Dist.] May 27, 1999, pet. denied) (dismissing appeal from a trial court order holding that the city was entitled to possession of property in action wherein citizens sued city for civil rights violations for wrongful seizure and tort claims, and the city counterclaimed for possession of the property under article 47.01a). No wonder that the City did not claim that a separate action under Chapter 47 was a prerequisite to suit. And no wonder that VSC argued, and the City disputed, that it was entitled to a declaration from the trial court that VSC is an entity with a "claim to possession of the seized

property" and entitled to notice under article 47.03. 242 S.W.3d at 599 (noting, and not reaching, the City's contention that VSC is not entitled to notice under Chapter 47).[4]

B. The Court's Chapter 47 Prerequisite

But despite this, the Court contends that VSC loses its case here because it did not take advantage of the "statutory remedy" of Chapter 47. There is a ripeness requirement for federal takings claims based on state action. In general, for a federal takings claim to be ripe, the owner of the allegedly taken property must (1) obtain a final decision regarding the application of the regulations to the property at issue from the government entity charged with implementing the regulations, and (2) utilize state procedures for obtaining just compensation. *Williamson Cnty. Reg'l Planning Comm'n v. Hamilton Bank of Johnson City*, 473 U.S. 172, 186 (1985).[5] There is some

---

[4] The Court says that the dissent's position could hamper law enforcement. That misconstrues the dissent. First, to be clear, this case does not involve property subject to civil forfeiture because of its use in the commission of a crime, notwithstanding the Court's reliance on forfeiture cases. That is not at issue and no one argues it is. The vehicles were towed to a private, licensed storage facility (VSC) for safekeeping. Second, the Court chastises the dissent saying "it is difficult to charge the government with the duty of notice." __ S.W.3d __. Actually, the Court's quibble is with the statute. Chapter 47 mandates, presumably to allow for notice of the proceeding, that when an officer seizes property alleged to have been stolen, he shall "immediately file a schedule of the same . . . [and] notify the court of the names and addresses of each party . . . who has a claim to possession of the seized property." TEX. CRIM. PROC. CODE art. 47.03. Moreover, federal courts have held that, even in forfeiture cases, if the government intends to make permanent the deprivation of property seized at the time of an arrest, adequate notice is required. *United States v. Cardona-Sandoval*, 518 F.3d 13, 16 (1st Cir. 2008) (concerning personal items destroyed nearly two years after confiscation); *see Matthias v. Bingley*, 906 F.2d 1047, 1052 (5th Cir. 1990). Simply knowing that the government confiscated the property at some time in the past is insufficient.

[5] The first part of the *Williamson County* rule (most applicable to regulatory takings) ensures that there is a regulatory interpretation about the scope of the regulation for the court to determine whether the regulation goes "too far." *Mayhew v. Town of Sunnyvale*, 964 S.W.2d 922, 929 (Tex. 1998). It has been applied to state court takings claims. But the second part—the exhaustion requirement the Court sees as determinative—has not been applied to state takings. "Ordinarily, a plaintiff must seek compensation through *state inverse condemnation proceedings* before initiating a takings suit in *federal court*, unless the State does not provide adequate remedies for obtaining compensation." *Suitum v. Tahoe Reg'l Planning Agency*, 520 U.S. 725, 734 n.8 (1997) (emphasis added) (citation omitted). In other words, in deference to the state and the Fifth Amendment's protection against the state depriving property "without just compensation," to state a claim under the Fifth Amendment, a state *court* action must come first. That is exactly what VSC did in this case.

authority to suggest that the *Williamson County* requirements apply to physical takings as well as the more common regulatory taking scenarios. *See Severance v. Patterson*, 566 F.3d 490, 496–97 (5th Cir. 2009). But *Williamson County* and its progeny do not apply in this situation.

The Court's only substantial authority[6] for its proposition that Chapter 47 precludes a takings claim is one distinguishable case. In *Hays v. Port of Seattle*, a contractor entered in to a "cost plus" contract with the Commissioner of Public Lands of the State of Washington to excavate waterways, secured by a lien upon the shorelands. 251 U.S. 233, 234 (1920). After the contractor began work, the Commissioner wanted to change plans, and when neither party provided new plans, the work stalled. *Id.* at 235. Seventeen years later, the Washington state legislature enacted statutes establishing the Port of Seattle and vested title to a port authority, which took over the waterway and performed its own excavation. *Id.* at 236. Hays brought a bill in equity, seeking to enjoin the legislature's act, as he alleged that it impaired his contract and took property without due process. *Id.* at 237–38. On the contract claim, the Supreme Court essentially held that he had abandoned the

[6] The Court cites a number of federal appellate court opinions for the proposition that "where a claimant fails to take advantage of a State's post-deprivation procedures, that claimant cannot then complain of the State's subsequent disposition of the property." ___ S.W.3d ___ n.17. The cases are inapposite. *Revell v. Port Authority of New York* is a case in which the appellate court held that because the plaintiff failed to file a state tort lawsuit for conversion or a writ of replevin before seeking remedies in federal court for deprivation of property without due process. 598 F.3d 128, 139 (3d Cir. 2010). VSC's requests for injunctive and declaratory relief certainly qualifies in that case. Likewise, in *Mora v. City of Gaithersburg*, the Fourth Circuit held that a plaintiff's § 1983 procedural and substantive due process claim seeking the return of firearms was "like a state law claim dressed up in due process clothing," and thus declined to exercise supplemental jurisdiction over the claims. 519 F.3d 216, 231 (4th Cir. 2008). Once again, we are in state court, VSC's constitutional claims are takings, not due process, and VSC did assert claims of injunctive and declaratory relief against the governmental entities. *McKinney v. Chidley* is an unpublished Ninth Circuit case in which the panel merely recites that the pro se plaintiff "did not follow California state law procedures for recovering property" and awarded summary judgment to the law enforcement officials. No. 03-56068-CV, 87 F. App'x 615, 617 (9th Cir. 2003) (unpublished mem. op.). These cases do not address a state inverse condemnation claim, address a plaintiff's attempt for injunctive relief and request to be named as an "interested person" in the state court procedure for return of property, or are otherwise applicable to VSC.

contract. *Id.* at 237. On the deprivation of property without due process claim, the Court held that Hays was barred from relief by laches. *Id.* at 238–39. It noted that, if he had not delayed, he could have filed a claim under what was a similar tort claim / state inverse condemnation proceeding under the then-active statute. *Id.* at 238. The Court held that such a procedure "satisfies the requirement of due process of law as clearly as if the ascertainment of compensation had preceded the taking." *Id.* The case is simply an early example of the *Williamson County* rule.

I see no legally determinative distinction in this context between protecting one's property rights by requesting a hearing before a municipal judge under Chapter 47 and promptly filing an injunction action in district court after the original seizures. Surely such a lawsuit, when there is nothing in Chapter 47 that makes it the exclusive remedy or establishes it as a prerequisite to a takings claim, is sufficient under *Williamson County*. This is not an inverse condemnation regulatory taking claim, where an administrative agency must determine the scope of the regulation as a prerequisite to suit. Nor is this a lawsuit commanded by the Legislature to be an "exclusive" remedy for a particular wrong. Chapter 47 comprehends a lawsuit, in one form or another.

The Court's holding creates a new rule preferring one type of civil claim over another, when no governing statute or case law has heretofore required it. It suggests that "[c]laims under chapter 47 may be brought in the same suit as other claims," ___ S.W.3d ___ n.7, but provides no analysis why its rule that *precludes* the civil claims brought by VSC *permits* claims specifically under Chapter 47.

C. VSC's Pleadings and Chapter 47

Even assuming that the Court is correct in its assertion that Chapter 47 is somehow a prerequisite to other types of tort actions (which no party argues, no courts have held, and which the court of appeals precedent cited above demonstrates is simply not how the procedure works), I would hold that VSC sufficiently asserted its rights. The Court claims that "VSC, having notice of the vehicles' seizure, should have initiated chapter 47 proceedings, both to notify the government that it was asserting an interest in the vehicles and to determine its interest in them. VSC failed to do so." ___ S.W.3d___ n.17. The Court simply ignores VSC's lawsuit and pleadings in reaching this unsupported conclusion.[7]

First, VSC sought a temporary restraining order. It later sought injunctive relief against the City, requesting, among other things, prohibitions against the City from "[o]rdering the release of any vehicle (in Plaintiff's possession) for a reduced fee or charge" and from "releasing vehicles seized from Plaintiff that Plaintiff is authorized by law to possess and in which Plaintiff has a recognized property interest without requesting a hearing under Chapter 47 of the Texas Code of Criminal Procedure and including Plaintiff as an interested party and notifying Plaintiff of the hearing." It sought declaratory relief, including a declaration that VSC "is the rightful possessor of

[7] The Court contends that VSC did not adequately pursue its Chapter 47 remedies and failed to raise them in its response to the City's plea to the jurisdiction. The record shows otherwise. After the City filed its plea to the jurisdiction (on June 24, 2005) in the state district court case, VSC filed its Sixth Amended Petition (on July 25, 2005) continuing to seek a declaratory judgment for Chapter 47 relief and compensation for a taking, as I specifically set out in Section I above. The Sixth Amended Petition did not contain the specific requests for possession that were in earlier pleadings because VSC believed, and pled, that the City had already disposed of all the vehicles. However, in its response (filed on July 27, 2005) to the City's plea, VSC again asserted its "property interest and/or lien for towing, storage, other fees and taxes" with respect to the vehicles taken, that "VSC is an interested party with a claim to possession entitled to notice and a hearing pursuant to Chapter 47 of the Texas Code of Criminal Procedure," that it brings the claim for a declaration of "its rights under Chapter 47"and that the City committed a taking for which VSC is entitled to just compensation. Certainly, in a notice pleading jurisdiction (and perhaps even if not), VSC's pleadings raise the issue of its rights and remedies under Chapter 47. Discovery hearings were held but we cannot discern from the record whether hearings were held to address the merits of VSC's complaints.

seized vehicles currently in possession of" the City, and that VSC "has a property interest in the seized vehicles and is an interested person entitled to a Chapter 47 property hearing on vehicles seized" by the City. VSC requested relief in the nature of Chapter 47 (even though, as discussed above, it shouldn't have to) by specifically requesting the court "make a determination as to the rightful possession of the seized vehicles still in Defendants' possession and Plaintiff's property interest in these vehicles . . . ." I see no significant difference between such a request for relief and a request to "hold a hearing to determine the right to possession of the property, upon the petition of an interested person." TEX. CODE CRIM. PROC. art. 47.01a(a). At a minimum, VSC "notif[ied] the government that it was asserting an interest in the vehicles" and requested a "determin[ation of] its interest in them." ___ S.W.3d ___ n.17. Particularly because VSC most likely did not believe that it could bring a claim under Chapter 47, and particularly because the City argued—up until oral argument before this Court—that VSC was not entitled even to *notice* of a Chapter 47 hearing—it is difficult to imagine what the Court would have had VSC do. Under our rules of notice pleading, VSC satisfied the prerequisites the Court musters. It does not deserve to have its claims dismissed.

Of course, a claimant may not simply sit on his rights for an unreasonable time period, knowing that the government has seized his property, and then claim that the government has taken his property when it has been sold. A claimant has some duty to investigate the status of his property and take reasonable steps to secure it from the government or receive just compensation for the taking. *See, e.g., Hallco Tex., Inc. v. McMullen Cnty.*, 221 S.W.3d 50, 74 & n.38 (Tex. 2006) (Hecht, J., dissenting) (discussing Texas cases applying limitations periods or laches to regulatory takings claims); *see also, e.g., Waddy v. City of Houston*, 834 S.W.2d 97, 102 (Tex. App.—Houston

[1st Dist.] 1992, writ denied) (recognizing that an action for inverse condemnation of property is barred after the ten-year period necessary to acquire land by adverse possession, but an inverse condemnation action for damage to property is governed by the two-year statute of limitations).

VSC was not dilatory in protecting its rights. VSC promptly sought an injunction against the City. Thereafter, VSC participated in several Chapter 47 proceedings disposing of seized vehicles prior to seizure of the vehicles at issue in this proceeding. VSC was notified of the proceedings, and in most cases the municipal court either returned the vehicles to VSC or to the owners subject to the payment of fees owed to VSC. These proceedings protected VSC's property rights and ensured that VSC's liens were not improperly destroyed. Although VSC did not know it and the City disputed it, VSC could have included an explicit request for the trial court to hold a hearing pursuant to Chapter 47, but did not do so. On the other hand, the City could have filed a counterclaim in district court seeking possession and disposition of the vehicles, but it evidently did not do so. *See De Los Santos*, 1999 WL 339335, at *1. Instead, according to VSC, the City unilaterally determined that VSC did not have an interest in the vehicles entitling VSC to notice of any Chapter 47 proceedings and, notwithstanding the pendency of a lawsuit over the same vehicles, disposed of the vehicles by either returning them to their owners or selling them and keeping the proceeds. It is difficult to understand why the Court requires a party to file a separate civil action, or to use "magic words" in its petition invoking a malleable and incomplete procedure to enforce rights covered by a civil action as a prerequisite to filing the already-pending litigation.

D. Due Process

The Court states that "VSC suggests . . . that chapter 47 is constitutionally infirm because it does not require that the City notify claimed owners of these proceedings. Disputes about proper notice invoke procedural due process, not the Takings Clause." ___ S.W.3d___. VSC is not claiming a violation of due process, and the City has not argued that Chapter 47 is a prerequisite to a takings claim. It is the Court's invocation of a prerequisite to Chapter 47 that does that. Rather, in its active petition, VSC's complaint was about its money—it alleged that the City intentionally seized property for a public purpose in which VSC had a property interest and suffered damages. A claim for deprivation of due process cannot be the basis for a takings claim.

However, for the reasons articulated above, if Chapter 47 were required as a prerequisite to suit, I disagree that Chapter 47 "complies with both the Texas and United States Constitutions" to protect VSC's property interests. Although any interested party may request a hearing under Chapter 47, the existence of the Chapter 47 proceeding itself would not immunize a governmental entity from takings liability.[8] The proceeding may result in returning the vehicle to VSC (and thus potentially mooting VSC's takings claim), and the municipal court may return a vehicle to an owner subject to the owner paying VSC's fees (also potentially mooting VSC's takings claim). Yet, no provision of Chapter 47 specifically deals with ownership of the vehicle or of the lien that is created when VSC properly takes possession of a vehicle and provides notice as required by the Property Code. Likewise, while article 47.03 requires that an officer provide notice to the relevant court "of

[8] Chapter 47 is not a forfeiture statute. The vehicles at issue in Chapter 47 proceedings, while they may have been stolen, are not contraband, instrumentalities of crime, or proceeds of criminal activity. The purpose of Chapter 47 is to return stolen property to its rightful owner. The government may dispose of the property, not because the property is "tainted" and should be taken from the public domain, with the proceeds going to the state, but only when the state, after some reasonable search, cannot ascertain the property's owner. To use Chapter 47 to circumvent the procedure for seizing contraband, a much higher threshold of proof for the state, would raise serious constitutional concerns.

the names and addresses of each party known to the officer who has a claim to possession of the seized property," nothing in Chapter 47 requires that the court or anyone else provide notice to the vehicle's owner or any other person with an actual interest in the seized vehicle and/or of the hearing. This facial infirmity in the statute has been recognized and addressed informally by municipal court judges who indicate in their Bench Book for Chapter 47 hearings that such notice should be given. TEXAS MUNICIPAL COURTS EDUCATION CENTER, 2008 BENCH BOOK 45 (2008); *cf.* TEX. CODE CRIM. PROC. art. 47.03. As discussed above, I believe that disposing of property without notice to the property owner would raise serious due process concerns. But those concerns arise only if a Chapter 47 hearing is a prerequisite to a takings suit.

The Court also states that once an owner or interested party's property has been legitimately seized by the government, the government need not give notice even years later that it is about to permanently dispose of the property. ___ S.W.3d ___. There are two responses to this position. First, it makes no sense. Even though criminal proceedings in which such property may be germane may take months or years, the Court indicates that the state might simply dispose of potentially valuable property after its usefulness for criminal prosecutions wanes or it has been determined not to have been stolen, without giving the owners or interest holders an opportunity to intervene. The property owners do not know when the confiscated property is no longer needed. After legitimately seizing private property, the government should give notice to the owners and interest holders before disposing of the property. Even in forfeiture cases, if "the government intends to make permanent the deprivation of property seized at the time of an arrest, whether through forfeiture or destruction of that property, adequate notice is required." *United States v. Cardona-Sandoval*, 518 F.3d 13, 16

(1st Cir. 2008); *see Matthias v. Bingley*, 906 F.2d 1047, 1052–53 (5th Cir. 1990). Second, VSC did file an injunction action in state district court to protect its interests in the property and asserted that the district court should determine ownership and possession of the vehicles. But the Court's holding makes that action useless.

The Court errs when it holds that a Chapter 47 proceeding is the only state adjudication that may serve as a prerequisite to a takings claim. It compounds its error by holding that VSC did not live up to its newly created standard in its pleadings in district court. I would hold that no such prerequisite exists, either in our case law on takings or in Chapter 47 itself, and I would not dismiss VSC's claims on that basis.

III. VSC's State Takings Claim

Because I would not hold that VSC's failure to seek possession of the vehicles specifically under Chapter 47 precludes its takings claim, I now proceed to analyze the merits of the dispute. The City asserts the trial court erred in denying its plea to the jurisdiction to VSC's takings claim. The City does not have immunity from a valid takings claim. *See Gen. Servs. Comm'n v. Little-Tex Insulation Co.*, 39 S.W.3d 591, 598 (Tex. 2001). However, if the plaintiff fails to allege a valid takings claim, the City retains its immunity from suit. *See id*. (affirming a grant of a governmental entity's plea to the jurisdiction where the plaintiff's constitutional takings claim failed). Whether particular facts constitute a taking is a question of law. *Id*. (citation omitted).

Article one, section seventeen of the Texas Constitution provides: "No person's property shall be taken, damaged, or destroyed for or applied to public use without adequate compensation being made, unless by the consent of such person . . . ." TEX. CONST. art. I, § 17. A takings claim

consists of three elements: (1) an intentional act by the government under its lawful authority, (2) resulting in a taking of the plaintiff's property, (3) for public use. *See Little-Tex Insulation Co.*, 39 S.W.3d at 598; *see also State v. Holland*, 221 S.W.3d 639, 643 (Tex. 2007); *City of Dallas v. Jennings*, 142 S.W.3d 310, 313 (Tex. 2004).

The City challenges VSC's takings claims on four grounds: (1) VSC could not have a property interest in stolen vehicles; (2) the City did not seize VSC's liens or debts, only the vehicles; (3) the seizure was not for "public use"; and (4) the seizure occurred under the proper and reasonable exercise of the City's "police power" or some other exception to a takings claim.

A. VSC's Property Interest

I would hold, as the Court "assume[s]," ___ S.W.3d ___ n.10, that VSC had a cognizable property interest in the vehicles through the "garageman's lien" in the Property Code. "A garageman with whom a motor vehicle . . . is left for care has a lien . . . for the amount of the charges for the care, including reasonable charges for towing . . . to the garageman's place of business and excluding charges for repairs." TEX. PROP. CODE § 70.003(c). The Property Code does not define "garageman" or identify exactly what "care" is required for the lien to attach. The dictionary defines "care" as "protection; charge; temporary keeping as for the benefit of or until claimed by the owner." RANDOM HOUSE UNABRIDGED DICTIONARY (1987). Vehicle Storage Facilities must provide protection and keep vehicles for the benefit or until claimed by the owner. They must also provide reasonable storage efforts to protect vehicles, "such as locking doors, rolling up windows, and closing doors, hatchbacks, sunroofs, trunks, hoods, or convertible tops" and putting tarps over vehicles whose interiors are open to the elements. 16 TEX. ADMIN. CODE § 85.719(a), (b). Thus,

under the plain language of the Property Code, a vehicle storage facility that follows the requirements of the statute would qualify as a "garageman."

The City argues that the VSFA precludes VSC's claim to garageman's lien rights because only the VSFA determines the rights and interests of a "Vehicle Storage Facility." Although that act regulates the operation of "Vehicle Storage Facilities" which, among other things, store at least ten vehicles each year without the owners' consent, TEX. OCC. CODE §§ 2303.001–.003, .151–.161, no language in the VSFA excludes Vehicle Storage Facilities from the benefits of the garageman's lien. Further, the VSFA allows a vehicle storage facility to withhold a vehicle from its owner or operator "if the owner or operator of the vehicle does not pay the charges associated with delivery or storage of the vehicle . . . ." *Id.* § 2303.160(c). And the garageman's lien statute specifically recognizes that a garageman may come into possession of a vehicle not only through the consent of the owner of the vehicle but also "under a state law or city ordinance." TEX. PROP. CODE § 70.004(a). The VSFA specifically permits Vehicle Storage Facilities to retain possession of vehicles if an owner refuses to pay the storage charges, and the garageman's lien statute recognizes that a garageman can come into possession of a vehicle in a manner other than it being left by the owner. The two statutes are not mutually exclusive, but complementary.

Further, the garageman's lien statute can reasonably be read to include vehicles "left for care" by those other than the vehicles' owners. The statute uses the passive voice—"is left for care"—indicating that who leaves the vehicle with the garageman is inconsequential to whether the lien attaches. *Id.* § 70.003(c). The next section of the Property Code specifically contemplates a garageman's lien in favor of one who stores a vehicle without the owner's consent. "A holder of

a lien under Section 70.003 on a motor vehicle . . . who obtains possession . . . under a state law or city ordinance shall give notice . . . to the last known registered owner and each lienholder of record . . . ." *Id*.§ 70.004. The garageman's lien statute grants a lien to an entity, including a Vehicle Storage Facility, who came into possession of the vehicle lawfully. *See* TEX. PROP. CODE § 70.003(c) ("A garageman with whom a motor vehicle . . . is left for care has a lien . . . ."). VSC may acquire a garagemen's lien on vehicles "left for care" with them, regardless of whether they were left voluntarily or without the owners' consent.

I would hold that if VSC can show these vehicles were left for care with them and that they followed the proper procedures under both the VSFA and the Property Code, VSC establishes a valid garageman's lien in the vehicles and thus a valid property interest worthy of protection under the takings clause.

B. Liens and the Takings Clause

The City contends that even if VSC had a property interest in liens on the stored vehicles, the recovery by police of stolen vehicles cannot be the basis of a compensable taking. The City erects a strawman, contending that the vehicles were stolen.

First and foremost, there is no judicial determination in the record that any of the vehicles at issue were in fact stolen. There appears to have been a sufficient basis for DPD initially to obtain possession. *See* TEX. TRANSP. CODE § 501.158(b). However, whether the vehicles were stolen is a factual matter to be determined at the trial court. Because the City has not shown the vehicles to

have been stolen, the City's contention that a lien cannot attach to a stolen vehicle that has been innocently stored need not be addressed.[9]

The United States Supreme Court considered a similar takings claim in *Armstrong v. United States*, 364 U.S. 40 (1960).[10] In *Armstrong*, materialmen delivered materials to a prime contractor for use in constructing U.S. Navy personnel boats. Under state law, they obtained liens on the vessels. *Id*. at 41. The prime contractor defaulted on his obligations to the United States, and the government took title to and possession of the uncompleted hulls and unused materials. *Id*. The United States government argued that any destruction of the plaintiffs' liens could not constitute a taking due to the government's immunity. *Id*. at 47. The Court held:

> The total destruction by the Government of all value of these liens, which constitute compensable property, has every possible element of a Fifth Amendment "taking" and is not a mere "consequential incidence" of a valid regulatory measure. Before the liens were destroyed, the lienholders admittedly had compensable property. Immediately afterwards, they had none. This was not because their property vanished into thin air. It was because the Government for its own advantage destroyed the value of the liens . . . . Neither the boats' immunity, after being acquired by the Government, from enforcement of the liens nor the use of a contract to take title relieves the Government from its constitutional obligation to pay just compensation for the value of the liens the petitioners lost and of which loss the Government was the direct, positive beneficiary.

---

[9] The City has presented no case and I have not found any case from another jurisdiction holding that a garageman's lien for vehicle storage costs cannot attach to stolen vehicles that the City takes to a storage lot for safekeeping. Further, this holding is limited to *liens* created for the safekeeping of allegedly stolen property and is separate and apart from our precedent regarding transfer of *title* to stolen property by a thief to a subsequent purchaser. *Cf. McKinney v. Croan*, 188 S.W.2d 144, 146 (Tex. 1945) (recognizing the common law rule that a subsequent purchaser may not acquire title to stolen property from a thief) (citations omitted).

[10] The takings clauses in the United States and Texas Constitutions are comparable, though worded differently, and so Texas courts have looked to federal jurisprudence for guidance on the constitutionality of a taking. *Sheffield Dev. Co. v. City of Glenn Heights*, 140 S.W.3d 660, 669 (Tex. 2004); *City of Austin v. Travis Cnty. Landfill Co.*, 73 S.W.3d 234, 238–39 (Tex. 2002); *Mayhew v. Town of Sunnyvale*, 964 S.W.2d 922, 932 (Tex. 1998). The most recent amendment to article I, section 17, limiting when the state may condemn land for private development, does not apply to this case. TEX. CONST. art. I, § 17.

Id. at 48–49. Thus, the state violates the takings clause by destroying valid liens on property for public use without just compensation. *See also United States v. Sec. Indus. Bank*, 459 U.S. 70, 75, 78 (1982) (holding that liens were property protected by the takings clause of the Fifth Amendment); *Ft. Worth Improvement Dist. No. 1 v. City of Fort Worth*, 158 S.W. 164, 168 (Tex. 1913) ("The word 'property,' as used in [article one, section seventeen of the Texas Constitution], is doubtless used in its legal sense, and means not only the thing owned, but also every right which accompanies ownership and is its incident.").

Whether the City destroyed VSC's liens is a question of fact that the trial court did not have an opportunity to decide, as that question is the subject of an interlocutory appeal of a plea to the jurisdiction. Rather, the question to this Court is whether VSC can overcome the City's plea to the jurisdiction and state a valid takings claim. According to its various pleadings, VSC alleges that the City, after seizing the vehicles, took one of three possible actions: (1) it stored the vehicles and is still storing them (though, by the time of the Sixth Amended Complaint, it seems that VSC believed that the City had disposed of all of the vehicles); (2) it returned the vehicles to their rightful owners; or (3) it sold the vehicles and kept the proceeds. In all three scenarios, VSC claims it was deprived of fees for its storage of the vehicles.

Regardless of whether VSC's lien is possessory or nonpossessory, VSC's lien could be foreclosed on, and VSC can pursue its lien rights for storage fees because it did not voluntarily relinquish possession of the vehicles. *See Paul v. Nance Buick Co.*, 487 S.W.2d 426, 427–28 (Tex. Civ. App.—El Paso 1972, no writ) (distinguishing between possessory and nonpossessory liens and

noting that even in possessory liens, the lien and right to possession are not lost if the property is relinquished voluntarily). VSC is free to pursue its property interests allegedly taken in the seized vehicles in its state district court case or under Chapter 47 of the Code of Criminal Procedure. TEX. CODE CRIM. PROC. §§ 47.01a, .02.

It is unclear how the City disposed of these vehicles, a crucial question of fact as to whether VSC can assert a valid takings claim. VSC claims the City destroyed its liens on the vehicles. The City offers no evidence to rebut this claim nor even an assertion of the disposition of the vehicles. Therefore, a fact question remains, and I would hold that the trial court was correct to deny the City's plea to the jurisdiction.

C. Police Power

The City argues that the vehicle seizures were a valid exercise of police power exempted from takings liability.[11] The distinction between the state's eminent domain power and police power has been the subject of much consternation, and attempts to distinguish the powers can involve courts in a "sophistic Miltonian Serbonian Bog." *Sheffield Dev. Co. v. City of Glenn Heights*, 140 S.W.3d 660, 671 (Tex. 2004) (quoting *City of Austin v. Teague*, 570 S.W.2d 389, 391 (Tex. 1978) (further quotation and citation omitted)).

In *DuPuy v. City of Waco*, this Court noted that the distinction is said to rest on "the relation which the property affected bears to the danger or evil which is to be provided against." 396 S.W.2d

[11] VSC has a valid takings claim only if the City destroyed its lien on the vehicles, so I only analyze the exemption arguments in that specific situation, *i.e.*, if VSC can show that the City sold the vehicles and kept the proceeds. I would not reach the question of whether the seizure of stolen vehicles in order to return them to their rightful owner is a valid exercise of police power for which no compensation is owed.

103, 107 n.2 (quotation omitted). Police power involves the regulation of property that harms the community in order to prevent the harm; eminent domain involves the taking or destruction of private property for public use. *Id*. at 107 n.3 (quotation omitted); *see also Tahoe-Sierra*, 535 U.S. at 323 ("This longstanding distinction between acquisitions of property for public use, on the one hand, and regulations prohibiting private uses, on the other, makes it inappropriate to treat cases involving physical takings as controlling precedents for the evaluation of a claim that there has been a 'regulatory taking,' and vice versa."). But as the Court conceded in *DuPuy*, "our refusal to compartmentalize an exercise of sovereignty as either police power or eminent domain for the resolution of problems arising under Article I, Sec. 17, of the Constitution rests upon the manifest illusoriness of distinctions between them." 396 S.W.2d at 107. On the other hand,

> it is universally conceded that when land or other property is actually taken from the owner and put to use by the public authorities, the constitutional obligation to make just compensation arises, however much the use to which the property is put may enhance the public health, morals or safety.

Id. at 107 n.3 (citations omitted). Put another way, "[w]hen the government physically takes possession of an interest in property for some public purpose, it has a categorical duty to compensate the former owner . . . regardless of whether the interest that is taken constitutes an entire parcel or merely a part thereof." *Tahoe-Sierra*, 535 U.S. at 322 (citation omitted). The police power distinction may lead courts into a bog, but the law of physical takings rests on firm, dry land.

We have recognized that "[a] city is not required to make compensation for losses occasioned by the proper and reasonable exercise of its police power." *City of Coll. Station v. Turtle Rock Corp.*, 680 S.W.2d 802, 804 (Tex. 1984). However, the state cannot commit a physical taking, by taking

or destroying property, and escape liability for compensation by merely "labeling the taking as an exercise of police powers." *Steele v. City of Houston*, 603 S.W.2d 786, 789 (Tex. 1980). The City argues that its actions do not amount to a physical taking because even if VSC's liens were somehow taken, they are intangible property and thus cannot be *physically* taken. But the liens in *Armstrong* were the same type of property interest as those here, and as the Court stated there, "[t]he total destruction by the Government of all value of these liens, which constitute compensable property, has every possible element of a Fifth Amendment 'taking' and *is not a mere 'consequential incidence' of a valid regulatory measure*." 364 U.S. at 48 (emphasis added). The Court has affirmed this characterization of the government's destruction of liens in *Armstrong* as a physical taking. "The Government seeks to distinguish *Armstrong* on the ground that it was a classical 'taking' in the sense that the Government acquired for itself the property in question . . . . The classical taking is of the sort that the Government describes . . . ." *Sec. Indus. Bank*, 459 U.S. at 77–78. I see no reason why intangible and valuable property interests cannot be physically taken and why the police power exception provides a free pass when government officials try.

Further, while the reasonable, necessary, and proper application of the police power may excuse a governmental unit from providing just compensation, there is nothing here to suggest that there is any police power interest in the taking of VSC's liens. The valid exercise of the police power over potentially stolen vehicles does not extinguish an undisputed and legally applied lien on the vehicle. Thus, these seizures and alleged sales of the vehicles do not constitute the proper exercise of the police power over VSC's liens, and *Turtle Rock* is not applicable to the situation at bar, despite its perhaps broad language.

VSC alleges that the City seized vehicles from their storage facility, disposed of them (thereby destroying all property interest they had in the form of liens), and kept the proceeds for itself. These actions satisfy the basic elements of a physical taking—taking or destroying property for public use. As we have said, "[t]he social desirability of leaving government free to seek its own enrichment at the expense of those whom it governs under the guise that it has the power to regulate harmful conduct is not readily apparent." *Teague*, 570 S.W.2d at 393–94. The final destination of the seized vehicles is absent from the record, and we decline to speculate. But the City cannot avoid paying compensation to VSC by "labeling the taking as an exercise of police powers." *Steele*, 603 S.W.2d at 789.

D. Special Exception

Finally, the City argues that we should carve out a special exception to a physical takings claim for the recovery of stolen property.[12] The City focuses its analysis on cases confirming the absence of takings liability for civil forfeiture proceedings against "innocent" owners, citing *Bennis v. Michigan*, 516 U.S. 442 (1996), and *State v. Richards*, 301 S.W.2d 597 (Tex. 1957). But *Bennis* and *Richards*, civil forfeiture cases whose holdings rest on the unique nature of forfeiture as a criminal deterrent, are inapposite. Further, they affirm that an "innocent" owner's property cannot be forfeited when the property was taken without privity or consent. *Bennis*, 516 U.S. at 448–52 & n.5; *Richards*, 301 S.W.2d at 599–600.

[12] Again, because I would hold that VSC can only have a valid takings claim if the City destroyed their liens, I only analyze whether an exception should be made if VSC can show that the City sold the vehicles and kept the proceeds after seizure.

VSC has a valid lien, the loss of which may be compensable as a taking if the City, without notice, disposed of the vehicles and kept their proceeds. Because fact questions exist in this case, VSC has pled and submitted sufficient evidence to withstand the City's plea to the jurisdiction. I would thus hold that the immunity does not bar VSC's state takings claim at this stage.[13]

IV. Declaratory Judgment

The City asserts the trial court erred in denying its plea to the jurisdiction as to VSC's declaratory judgment action. "A declaratory judgment is appropriate only if a justiciable controversy exists as to the rights and status of the parties and the controversy will be resolved by the declaration sought." *Bonham State Bank v. Beadle*, 907 S.W.2d 465, 467 (Tex. 1995). Based on the declaratory relief requested in the currently pending Sixth Amended Petition and VSC's current status, I agree with the Court that "there is no apparent conflict at all, and as such the relief sought is highly speculative and theoretical, incapable of settling any actual controversy between the parties." ___ S.W.3d___ (citing *Bonham State Bank*, 907 S.W.2d at 467; *State ex rel. McKie v. Bullock*, 491 S.W.2d 659, 660 (Tex. 1973)). I therefore concur in the Court's judgment on the declaratory judgment claim. However, I do not believe such a holding forecloses VSC's Chapter 47-like claims related to possession of or rights in the past-seized vehicles.

V. Conclusion

[13] VSC also brought a federal takings claim. The City contends that VSC's federal takings claim is unripe until VSC has sought and been denied compensation in state court, and therefore the trial court lacks jurisdiction. "The fact that the federal constitutional guaranty is not violated if state law affords just compensation does not preclude both claims from being asserted in the same action. Recovery denied on the state takings claim may yet be granted on the federal claim, in the same action." *Town of Flower Mound v. Stafford Estates Ltd. P'ship*, 135 S.W.3d 620, 646 (Tex. 2004). I would thus agree with the court of appeals that the trial court correctly denied the City's plea to the jurisdiction on this issue.

Evidence demonstrated that the City seized 276 vehicles VSC lawfully possessed and on which it had storage liens. VSC alleges that the City disposed of the 276 vehicles without notice of how, when, or where the disposal occurred. Although VSC immediately filed an injunction action in district court over the propriety of the City's seizures of its property and the payment of its storage fees for the vehicles, the Court holds that such action is useless in protecting VSC's property rights. I would hold that the trial court and court of appeals were correct to deny the City's plea to the jurisdiction. Even assuming the Court's prerequisites, I would hold that VSC's pleadings in the district court were sufficient to invoke the requested relief in Chapter 47 and thus VSC's entire case should not be barred. I would remand the case to the trial court to make a determination of the unanswered questions of fact and determine whether VSC's property was wrongfully taken.

I therefore respectfully dissent.

_____

Dale Wainwright
Justice

OPINION DELIVERED: July 1, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0419

THE UNIVERSITY OF TEXAS HEALTH SCIENCE CENTER AT SAN ANTONIO, PETITIONER,

v.

KIA BAILEY AND LARRY BAILEY, RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE FOURTH DISTRICT OF TEXAS

Argued October 7, 2009

JUSTICE HECHT delivered the opinion of the Court.

Section 101.106(f) of the Texas Tort Claims Act allows a plaintiff who has sued a government employee in what is considered to be his official capacity to avoid dismissal of the action by substituting the governmental employer as a defendant.[1] The question in this case is whether action against the substituted defendant is barred after limitations has run. The court of appeals answered no.[2] We agree, though for somewhat different reasons.

[1] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

[2] 261 S.W.3d 147 (Tex. App.—San Antonio 2008).

On April 15, 2004, Dr. Albert E. Sanders, a clinical assistant professor at the University of Texas Health Science Center at San Antonio, operated on Kia Bailey, age 32, to replace spinal fixation hardware previously implanted to correct for scoliosis that she developed as a child.[3] One of the pedicle screws he inserted broke through the medial wall, injuring the dural sac and impinging the nerves, resulting in a serious neurologic deficit. When Sanders realized what had happened, he notified the Center's risk manager that "an untoward event" had occurred and that Bailey had a potential claim.

Bailey and her husband, respondents here, sued Sanders on a health care liability claim[4] on July 14, 2005, and later added other defendants, but did not sue the Center, Sanders's employer, a governmental unit.[5] The Baileys' petition did not specify whether they were suing Sanders in his official capacity as a government employee or in his individual capacity, but the Attorney General was not served and did not appear as counsel on his behalf.[6] On August 25, 2006, several weeks

---

[3] At age five, Bailey's right kidney was removed because of a Wilms tumor. Her radiation therapy led to scoliosis, and at age thirteen, a spinal fusion with instrumentation.

[4] TEX. CIV. PRAC. & REM. CODE § 74.001(a)(13) ("'Health care liability claim' means a cause of action against a . . . physician for treatment . . . which proximately results in injury to . . . a claimant . . . .").

[5] State universities and their component entities are governmental units within the meaning of the Texas Tort Claims Act. *See* TEX. CIV. PRAC. & REM. CODE § 101.001(3) ("'Governmental unit' means: (A) this state and all the several agencies of government that collectively constitute the government of this state . . . ; and (D) any other institution, agency, or organ of government the status and authority of which are derived from the Constitution of Texas or from laws passed by the legislature under the constitution."); *Univ. of Tex. [6] Sanders appears to have been represented by private counsel.

after limitations had run on the Baileys' claim,[7] Sanders filed a motion asserting that the suit was, by law, against him in his official capacity, and requesting the trial court to order the Baileys to substitute the Center for him as the defendant or suffer dismissal of their action. Sanders based his motion on section 101.106(f) of the Texas Tort Claims Act, which states — with spacing inserted to aid the reader:

> If a suit is filed against an employee of a governmental unit based on conduct within the general scope of that employee's employment and
>
> if it could have been brought under this chapter against the governmental unit,
>
> the suit is considered to be against the employee in the employee's official capacity only.
>
> On the employee's motion, the suit against the employee shall be dismissed unless the plaintiff files amended pleadings dismissing the employee and naming the governmental unit as defendant on or before the 30th day after the date the motion is filed.[8]

In response, the Baileys did not contest the first condition — that Sanders had acted within the scope of employment. They argued that he could not invoke the statute because he had not established the second — that suit could have been brought under the Act against the Center — by which they meant that their suit was one for which the Act waived the Center's governmental immunity. In construing the second condition as they did, the Baileys relied in part on the court of

---

[7] Limitations ran June 20, 2006. *See* TEX. CIV. PRAC. & REM. CODE § 74.251(a) (prescribing a limitations period of two years from the date of treatment); *id*. § 74.051(c) (tolling limitations for 75 days following notice of the claim).

[8] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

appeals' decision in *Franka v. Velasquez*, which we have since reversed.[9] None of their arguments is relevant to the issue that is now before us, and we mention them only in the margin. Important here is that the trial court ordered the suit against Sanders dismissed with prejudice unless the Baileys amended their pleadings to substitute the Center by September 24, 2006, and that the Baileys complied.[10]

---

[9] *Franka v. Velasquez*, 216 S.W.3d 409 (Tex. App.–San Antonio 2006), *rev'd*, ___ S.W.3d ___ (Tex. 2011).

[10] In response to Sanders' motion, the Baileys argued that while they had certainly *alleged* that Kia Bailey's injuries were caused by the use of tangible personal property — a pedicle screw — and thus fell within the Act's waiver of immunity, their allegations had not been *proved*, and their claim might yet be held to be barred. *See* TEX. CIV. PRAC. & REM. CODE § 101.021(2) ("A governmental unit in the state is liable for . . . personal injury and death [proximately] caused by a condition or use of tangible personal or real property if the governmental unit would, were it a private person, be liable to the claimant according to Texas law."). The Baileys also argued that the record did not establish whether the Act's pre-suit notice requirement had been met. *See id*. § 101.101 ("(a) A governmental unit is entitled to receive notice of a claim against it under this chapter not later than six months after the day that the incident giving rise to the claim occurred. . . . (c) The notice requirements . . . do not apply if the governmental unit has actual notice . . . that the claimant has received some injury . . . ."). Finally, the Baileys argued that if the Center could no longer be sued without its consent, *see id*. § 101.106(b) ("The filing of a suit against any employee of a governmental unit constitutes an irrevocable election by the plaintiff and immediately and forever bars any suit or recovery by the plaintiff against the governmental unit regarding the same subject matter unless the governmental unit consents."), then section 101.106(f) violated the Open Courts provision of the Texas Constitution. TEX. CONST. art. I, § 13 ("All courts shall be open, and every person for an injury done him, in his lands, goods, person or reputation, shall have remedy by due course of law.").

After the Center answered the suit, the trial court issued an order dismissing Sanders and severed it from the case to make it final. The Baileys appealed. While the appeal was pending, the Baileys and the Center filed with the trial court an agreement under Rule 11, TEX. R. CIV. P., that:

"1. At the time of Dr. Albert Sanders' surgery on Kia Bailey on April 15, 2004, and all times thereafter concerning her care by Dr. Sanders, he was a paid, full time employee of Defendant University of Texas Health Science Center at San Antonio acting in the scope of his employment;

"2. Defendant University of Texas Health Science Center at San Antonio agrees not assert to its defense of Six (6) months notice under § 101.101(c) Texas Tort Claims Act; and

"3. In their lawsuit, Plaintiffs have plead a viable use of tangible property claim against Defendant University of Texas Health Science Center at San Antonio."

The basis for paragraph 2 appears to have been Sanders' notice to the Center's risk manager shortly after Bailey's surgery. *See also Univ. of Tex. Sw. Med. Ctr. at Dallas v. Estate of Arancibia ex rel. Vasquez-Arancibia*, 324 S.W.3d 544, 550 (Tex. 2010) (concluding that a physician's report to a medical center's risk manager, under the circumstances, provided actual notice of a patient's claim). Notwithstanding the parties' agreement that the Act's pre-suit notice

After the Center answered, the Baileys moved for partial summary judgment that their amended pleading substituting the Center, filed after limitations had run, related back to their original petition filed against Sanders and was therefore timely. The Center filed a cross-motion contending that the relation-back doctrine does not apply to the addition of a new party, and in any event, the statute of limitations for health care liability claims expressly applies "[n]otwithstanding any other law",[11] which includes the relation-back doctrine. Therefore, the Center argued, the Baileys' claim against it was barred by limitations. The Center did not contend that it had been prejudiced by the delay in being substituted for Sanders. The trial court granted the Center's motion, dismissed the Center from the case, and severed the order, making it final.

The court of appeals reversed.[12] It reasoned that even though the Baileys had sued Sanders in his individual capacity,[13] the Center "had actual knowledge of the Baileys' claim"[14] and "was not misled about the claim or disadvantaged by its substitution".[15] Because "[t]he purpose of limitations

---

requirement was satisfied, the court of appeals held that section 101.106(f) requires substitution of a government defendant even if suit against it is barred for lack of pre-suit notice. *Bailey v. Sanders*, 261 S.W.3d 153, 157 (Tex. App.–San Antonio 2008). Although the Baileys' response to Sanders' motion had not mentioned limitations as an impediment to substitution, the court held that a health care liability claim may be brought under the Act, within the meaning of section 101.106(f), even if barred by limitations, because the limitations provision is not part of the Act. *Id*. The court held that section 101.106(b) could not be construed to defeat section 101.106(f) and was not implicated. *Id*. at 158. Finally, the court found no constitutional violation. *Id*. at 159. Consistent with paragraph 3 of the parties' Rule 11 agreement, based on injury resulting from the use of a pedicle screw, the court noted that the Baileys had pleaded "a claim that falls within the ambit of the Tort Claims Act's waiver of immunity." *Id*. at 158. The court affirmed Sanders' dismissal. *Id*. at 159.

[15] *Id*.

[was] served in this case",[16] the court concluded that the relation-back doctrine should apply. Moreover, the court continued, applying the doctrine was necessary "to fulfill the purpose of section 101.106(f)".[17] Since the statute imposes no deadline for the employee to file a motion,

> a defendant may effectively bar the plaintiff's claims by filing a motion under section 101.106(f) after the limitations period. A defendant would be rewarded for dilatory conduct and the plaintiff penalized despite complying with the statutory requirements. We find great difficulty in accepting the notion that the Legislature intended this result.[18]

We granted the Center's petition for review.[19]

The statute of limitations for health care liability claims states in pertinent part: "*Notwithstanding any other law* . . . , no health care liability claim may be commenced unless *the action* is filed within two years" from the subject incident.[20] The Center argues that the relation-back doctrine is "any other law" and therefore cannot apply. But we stated in *Chilkewitz v. Hyson* that the opening phrase of the statute forecloses the application of only those laws that "extend[] the time within which a health care liability claim [can] be commenced".[21] There, we held that the statute did not preclude the application of Rule 28 of the Texas Rules of Civil Procedure, which simply allows

an entity to be sued in an assumed name,[22] because it did not affect "when limitations began to run or whether limitations could be tolled or interrupted".[23]

The relation-back doctrine does not affect the running of limitations on a cause of action; rather, it defines what is to be included in "the action" to which limitations applies. The common law took a very narrow view. Professor Wright and his co-authors tell us:

> At common law a litigant had very little freedom to amend the written pleadings other than to correct formal defects and remedy errors of oversight. Thus, an amendment that attempted to introduce a new cause of action or to change the form of the action — for example, from trespass to trespass on the case — would be disallowed.[24]

Our early view was similarly strict. In a 1901 case, we held that in a suit for breach of an express contract, a claim for breach of an implied contract, added by amended pleadings, was barred by limitations.[25] To avoid the bar of limitations, we said, "[i]t is not sufficient that the causes of action be similar in their nature, but they must be essentially identical."[26] The Legislature took a broader approach in 1931, enacting the rule that remains the law today:

> If a filed pleading relates to a cause of action, cross action, counterclaim, or defense that is not subject to a plea of limitation when the pleading is filed, a subsequent amendment or supplement to the pleading that changes the facts or

---

[22] TEX. R. CIV. P. 28 ("Any partnership, unincorporated association, private corporation, or individual doing business under an assumed name may sue or be sued in its partnership, assumed or common name for the purpose of enforcing for or against it a substantive right, but on a motion by any party or on the court's own motion the true name may be substituted.").

[26] *Id*.

> grounds of liability or defense is not subject to a plea of limitation unless the amendment or supplement is wholly based on a new, distinct, or different transaction or occurrence.[27]

But narrow or broad, the purpose of the relation-back doctrine is to determine not *when*, but *on what* limitations runs. Because the doctrine does not impede the running of limitations on health care liability claims, it is not, under *Chilkewitz*, an "other law", the application of which is forbidden. Even apart from *Chilkewitz*, because the doctrine determines "the action" that must be timely filed, its application is a matter of necessity.

But contrary to the court of appeals' conclusion, the doctrine does not help the Baileys. We have observed that "[o]rdinarily, an amended pleading adding a new party does not relate back to the original pleading."[28] Misnomer is an exception, misidentification a more limited one.[29] The Baileys fall under neither. They did not misname or misidentify their defendant; they sued exactly whom they intended to sue: Sanders, and not the Center. The relation-back doctrine does not save their suit against the Center from its limitations defense.

[27] TEX. CIV. PRAC. & REM. CODE § 16.068, recodifying former TEX. REV. CIV. STAT. ANN. art. 5539b, Act approved May 13, 1931, 42nd Leg., R.S., ch. 115, § 1, 1931 Tex. Gen Laws 194.

[28] *Alexander v. Turtur & Assoc., Inc.*, 146 S.W.3d 113, 121 (Tex. 2004).

[29] *In re Greater Houston Orthopaedic Specialists, Inc.*, 295 S.W.3d 323, 325 & n.1 (Tex. 2009) (per curiam); *see also Stokes v. Beaumont, Sour Lake & W. Ry. Co.*, 339 S.W.2d 877, 877 (1960) (indicating that the relation-back doctrine as applied to new parties is governed by the common law rather than by statute). The federal rule is similar. *See* FED. R. CIV. P. 15(c)(1) ("An amendment to a pleading relates back to the date of the original pleading when: . . . (C) the amendment changes the party or the naming of a party against whom a claim is asserted, if [the amendment asserts a claim or defense that arose out of the conduct, transaction, or occurrence set out — or attempted to be set out — in the original pleading] and if, within the period provided by Rule 4(m) for serving the summons and complaint, the party to be brought in by amendment: (i) received such notice of the action that it will not be prejudiced in defending on the merits; and (ii) knew or should have known that the action would have been brought against it, but for a mistake concerning the proper party's identity.").

But the Baileys do not need the doctrine. In effect, when the Baileys sued Sanders, they sued the Center. Section 101.106(f) provides that when a government employee is sued for conduct within the general scope of employment, as Sanders was, and the employer could have been sued under the Act — in tort, that is[30] — instead, "the suit is considered to be against the employee in the employee's official capacity only."[31] So while the Baileys may have intended to sue Sanders in his individual capacity, as the court of appeals concluded they did, section 101.106(f) did not allow them that choice. Under the statute, it matters not that the Baileys may not have been aware of Sanders' government employment when they sued him; only the fact of his employment, eventually established, is important. Substitution of the Center as the defendant was not automatic; Sanders was required to file a motion. But the statute does not require a motion for a government employee to be considered to have been sued in his official capacity.

As we have said:

> It is fundamental that a suit against a state official is merely "another way of pleading an action against the entity of which [the official] is an agent." A suit against a state official in his official capacity "is not a suit against the official personally, for the real party in interest is the entity." Such a suit actually seeks to impose liability against the governmental unit rather than on the individual specifically named and "is, in all respects other than name, . . . a suit against the entity."[32]

---

[30] *Franka v. Velasquez*, ___ S.W.3d ___ (Tex. 2011).

[31] TEX. CIV. PRAC. & REM. CODE § 101.106(f).

[32] *Texas A & M Univ. Sys. v. Koseoglu*, 233 S.W.3d 835, 844 (Tex. 2007) (quoting *Kentucky v. Graham,* 473 U.S. 159, 165-166 (1985)) (additional citations and emphasis omitted) (alterations in original).

A government employee has the same immunity from suit against him in his official capacity as his employer, unless he has acted *ultra vires*.[33] Even then, "the suit is, for all practical purposes, against the state."[34]

Under section 101.106(f), the Baileys' suit against Sanders was, in all respects other than name, a suit against the Center. In requiring a government employer to be substituted on the employee's motion, the statute is silent on whether the employer may complain of prejudice from the delay in being named a party. In this case, the Center has made no such complaint. When the Center was substituted as the defendant in Sanders' place, there was no change in the real party in interest. Consequently, the Center cannot prevail on its defense of limitations.

For these reasons, the court of appeals' judgment is

Affirmed.

IN THE SUPREME COURT OF TEXAS

NO. 08-0421

THE STATE OF TEXAS, ET AL., PETITIONERS,

v.

PUBLIC UTILITY COMMISSION OF TEXAS, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued October 6, 2009

JUSTICE WILLETT delivered the opinion of the Court.

This complex case poses several vexing questions regarding Texas utility-deregulation laws and the Public Utility Commission's application of those laws. In short, numerous parties — the State of Texas, utility companies, municipal groups, consumer groups, and others — challenge the Commission's interpretations of various cost-recovery provisions in Chapter 39 of the Utilities Code. As detailed below, we affirm the court of appeals' judgment in part, reverse it in part, and remand to the PUC for further proceedings consistent with this opinion.

I. Background

A. Overview of Chapter 39[1]

The Legislature in 1999[2] overhauled the Public Utility Regulatory Act (PURA or Act) to create a "fully competitive electric power industry" in Texas.[3] As part of this restructuring, utilities were required, not later than January 1, 2002, to split into three distinct units: (1) a power-generation company, (2) a retail electric provider, and (3) a transmission and distribution utility.[4] After that date, retail consumers could choose among competing retail providers.[5] Rates charged by the transmission and distribution utility continue to be regulated by the Public Utility Commission (PUC or Commission).[6]

The Legislature recognized that utilities had made investments in power-generation assets that produced a reasonable return under the existing regulated environment "but might well become uneconomic and thus unrecoverable in a competitive, deregulated electric power market."[7] The Act

---

[1] This overview closely tracks the overview set out in our recent decision in a related Chapter 39 case, *Texas Industrial Energy Consumers v. CenterPoint Energy Houston Electric, LLC*, 324 S.W.3d 95, 97–100 (Tex. 2010).

[6] *See id.* §§ 39.201–.205; *In re TXU Elec. Co*, 67 S.W.3d 130, 132 (Tex. 2001) (Phillips, C.J., concurring) ("Because the generating companies and retail electric providers must use the existing power lines to move electricity from the plant to the retail customer's home or business, the transmission and delivery companies will remain regulated monopolies.").

[7] *CenterPoint Energy, Inc. v. Pub. Util. Comm'n*, 143 S.W.3d 81, 82 (Tex. 2004).

thus allows utilities to recover these "stranded costs," which consist generally of "the portion of the book value of a utility's generation assets that is projected to be unrecovered through rates that are based on market prices."[8]

The Act deregulated the market in phases. Retail rates were frozen from September 1, 1999 until January 1, 2002.[9]

Section 39.201 directed transmission and distribution utilities to file, on or before April 1, 2000, proposed tariffs that included "nonbypassable delivery charges" to retail electric providers.[10] It also directed the PUC to approve rates as of January 1, 2002.[11] The nonbypassable delivery charges included a "competition transition charge" (CTC) based on an estimate of stranded costs projected to exist at the end of the freeze period on December 31, 2001.[12] The CTC is "nonbypassable" in "that with limited exceptions, all retail electric customers in an existing utility's service area will pay charges to allow that utility to recover stranded costs regardless of whether those customers purchase their electricity from that utility, switch to one of its competitors, or generate their own electricity."[13] In estimating stranded costs, utilities were required to use the

"ECOM" model,[14] an estimation model earlier used in a 1998 PUC report to the Legislature.[15] Section 39.201(h) required the PUC to rerun the ECOM model using "updated company-specific updates." Provision is made in Section 39.201 for a utility to recover estimated stranded costs at any time after the start of the freeze period on September 1, 1999 by issuing bonds and using a "transition charge" (TC) to service the bonds,[16] or by imposing a CTC.[17] However, no such charges were imposed because the Commission concluded after the updated ECOM calculations that no utility would incur stranded costs.[18]

Under Section 39.262, utilities were required, after January 10, 2004, to file with the PUC a reconciliation of stranded costs and the previous estimate of stranded costs that had been used in determining rates under Section 39.201.[19] Section 39.262 further directed the PUC to conduct a "true-up proceeding" and enter a final order adjusting the CTC to reflect the ultimate valuation of stranded costs.[20] "If, based on the proceeding, the competition transition charge is not sufficient, the

commission may extend the collection period for the charge or, if necessary, increase the charge."[21] The adjusted CTC is applied to the nonbypassable delivery rates of the transmission and distribution utility.[22]

In addition to adjustments for stranded costs, the PUC is directed at the true-up proceeding to make other adjustments to the nonbypassable delivery charges of the transmission and distribution utility. The parties refer to these other costs as "non-stranded costs." These adjustments can result in an increase or decrease in the amount or collection period of the CTC.[23]

From January 1, 2002 until January 1, 2007, affiliated retail electric providers were required to charge rates six percent below average rates that were in effect on January 1, 1999, subject to certain adjustments including a fuel factor.[24] This price is known as the "price to beat." After January 1, 2002, each affiliated power-generation company is required to file a final fuel reconciliation that calculates a final fuel balance as of December 31, 2001.[25]

To foster competition, utilities or their unbundled power-generation companies were required, at least 60 days before January 1, 2002, to conduct a "capacity auction" that sold entitlements to at least 15 percent of the utilities' generation capacity.[26] The obligation continued

until the earlier of 60 months after the date customer choice was introduced or the date the Commission determined "that 40 percent or more of the electric power consumed by residential and small commercial customers within the affiliated transmission and distribution utility's certificated service area before the onset of customer choice [was] provided by nonaffiliated retail electric providers."[27]

Under Section 39.262(d), the Act directs the affiliated power-generation company at the true-up proceeding to reconcile and either bill or credit the transmission and distribution utility for the net sum of (1) the former integrated utility's final fuel balance,[28] and (2) a balance parties refer to as the "capacity auction true-up balance" or the "wholesale clawback," consisting of the difference between the price of power realized at the capacity auctions and the power cost projections used in the ECOM model.[29]

Section 39.262(e) directs the affiliated retail electric provider at the true-up proceeding to credit the affiliated transmission and distribution utility for "any positive difference between the price to beat under Section 39.202, reduced by the nonbypassable delivery charge established under 39.201, and the prevailing market price of electricity during the same time period."[30] This credit is sometimes called the "retail clawback."

B. Proceedings Below

Pursuant to Chapter 39, Reliant Energy, Inc., an integrated electric utility, separated into three entities:

- CenterPoint Energy Houston Electric, LLC (CenterPoint) — the transmission and distribution utility,[31]
- Reliant Energy Retail Services, LLC (RERS) — the retail electric provider,[32] and
- Texas Genco, LP (Genco or TGN) — the power-generation company.

These three entities filed an application with the PUC to determine stranded costs and other true-up balances pursuant to Section 39.262.[33] Numerous parties, including the State of Texas, intervened. The intervenors consist of electricity consumers and consumer groups. In this proceeding (the true-up proceeding), the PUC made many factual and legal determinations, some of which are now before us on appeal. The PUC determined that CenterPoint was entitled to recover approximately $2.3 billion in stranded costs and other non-stranded costs. The PUC entered a final order on rehearing (Order) in the true-up proceeding.[34] One Commissioner dissented on a single

[31] More specifically, under the business separation plan, Reliant Energy, Inc. survives as CenterPoint Energy, Inc., a publicly traded holding company. CenterPoint Energy, Inc. owns CenterPoint Energy Houston Electric, LLC, the transmission and distribution utility.

[32] More specifically and as discussed below, under the business separation plan, Reliant Energy, Inc. created Reliant Resources, Inc., a publicly traded company that became the parent of Reliant Energy Retail Services, LLC, the retail electric provider.

[33] CenterPoint and Genco remain petitioners to this appeal, and for convenience are sometimes referred to collectively as CenterPoint.

[34] *Application of CenterPoint Energy Houston Electric, LLC, Reliant Energy Retail Servs., LLC, and Tex. Genco, LP to Determine Stranded Costs and Other True-Up Balances Pursuant to PURA § 39.262*, PUC Docket No. 29526 (Dec. 17, 2004) (Order), *available at* http://interchange.puc.state.tx.us (item no. 2286).

issue, as discussed below.

CenterPoint and various intervenors appealed the Order to district court. The district court affirmed the Order except as to two issues, one of which, concerning the capacity auction true-up, is discussed below. Both sides appealed to the court of appeals,[35] which affirmed the district court on numerous issues, but reversed the district court on a stranded cost issue and a capacity auction issue discussed below. We granted three petitions for review filed by CenterPoint,[36] a group of intervenors[37] who filed a joint petition, and the State of Texas. The State of Texas and the other petitioner-intervenors (collectively the Intervenors) subsequently filed joint briefing on the merits.

II. Discussion

A. Standards of Review

Generally, "[a]ny party to a proceeding before the commission is entitled to judicial review under the substantial evidence rule."[38] Chapter 39 also provides that the true-up order is subject to review under Chapter 2001 of the Government Code, the Texas Administrative Procedure Act (APA).[39] The APA looks to the scope of review "as provided by the law under which review is

---

sought,"[40] which in this case is the substantial evidence standard. Under substantial evidence review of fact-based determinations, "[t]he issue for the reviewing court is not whether the agency's decision was correct, but only whether the record demonstrates some reasonable basis for the agency's action."[41]

The APA also provides in Section 2001.174 that, under substantial evidence review, the court may reverse the agency's order where the agency has made a prejudicial error of law,[42] or where the order is "arbitrary or capricious or characterized by abuse of discretion or clearly unwarranted exercise of discretion."[43] Questions of statutory construction are questions of law and are reviewed de novo.[44] We have noted that an agency's interpretation of the statute it administers is entitled to serious consideration so long as it is reasonable and does not conflict with the statute's language.[45] However, "the PUC may not exercise what is effectively a new power" in addition to powers expressly conferred by statute or necessary to accomplish its express duties "on the theory that such a power is expedient for administrative purposes."[46]

B. Stranded Cost True-Up

1. Market Value

By statutory definition, stranded costs are based on the difference between the book value of generation assets and the market value of these assets.[47] Section 39.251(7) provides that for purposes of establishing stranded costs in the true-up proceeding, "market value is established through a market valuation method under Section 39.262(h)."

Section 39.262(h) provides that the affiliated power-generation company shall establish the market value of its generation assets using one or more of four methods: the sale of assets method, the stock valuation method, the partial stock valuation (PSV) method, and the exchange of assets method.[48]

CenterPoint complains that the PUC erred in refusing to employ the PSV method. CenterPoint attempted to establish the market value of its generation assets and resulting stranded costs under this method, found in subsection (h)(3). This method may be employed if "at least 19 percent, but less than 51 percent, of the common stock of [Genco] is spun off and sold to public

---

[47] More precisely, Section 39.251(7) defines stranded costs as

> the positive excess of the net book value of generation assets over the market value of the assets, taking into account all of the electric utility's generation assets, any above market purchased power costs, and any deferred debit related to a utility's discontinuance of the application of Statement of Financial Accounting Standards No. 71 ("Accounting for the Effects of Certain Types of Regulation") for generation-related assets if required by the provisions of this chapter. For purposes of Section 39.262, book value shall be established as of December 31, 2001, or the date a market value is established through a market valuation method under Section 39.262(h), whichever is earlier, and shall include stranded costs incurred under Section 39.263.

Section 39.263 pertains to certain environmental cleanup costs.

[48] A fifth method, found in Section 39.262(i), pertains to the valuation of certain nuclear assets.

investors through a national stock exchange, and the common stock has been traded for not less than one year."[49] If these conditions are met, "the resulting average daily closing price of the common stock over 30 consecutive trading days chosen by the commission out of the last 120 consecutive trading days before the [stranded cost filing] shall be presumed to establish the market value of the common stock equity in [Genco]."[50] The PUC may accept this valuation or it may convene "a valuation panel of three independent financial experts to determine whether the percentage of common stock sold is fairly representative of the total common stock equity or whether a control premium exists for the retained interest."[51] As the court of appeals noted, with a partial stock spinoff, the control retained by the parent company "might increase the value of the stock privately held, rendering the average closing price of the publicly-traded stock an inaccurate measure of the true value of the stock."[52]

CenterPoint contends that the PSV method was appropriately employed because CenterPoint distributed 19.0447 percent of Genco stock to CenterPoint shareholders, and retained ownership of the rest, on January 6, 2003. CenterPoint listed Genco on the New York Stock Exchange, where the stock publicly traded. CenterPoint contends and offered evidence that it chose a stock dividend to existing shareholders in lieu of an initial public offering (IPO) because market conditions at the time would have made an IPO difficult. It further contends and offered evidence that it sold slightly over

---

[49] TEX. UTIL. CODE § 39.262(h)(3).

[50] *Id.*

[51] *Id.*

[52] 252 S.W.3d at 17.

19 percent of the stock because that percentage complied with the statute and also allowed CenterPoint and Genco to benefit from consolidated tax returns. A parent and subsidiary may file consolidated returns if the parent owns at least 80 percent of the stock in the subsidiary.[53]

The Commission conceded in its Order that it "may not substitute its judgment for a properly conducted market valuation of generation assets determined under PURA §§ 39.262(h) and (i)." It further recognized that utilities are "required to follow one of the four methods in PURA § 39.262(h) to determine the market value of generation assets for purposes of stranded-cost recovery." Section 39.252(a) indeed provides that a utility is "allowed to recover all of its net, verifiable, nonmitigable stranded costs," but Section 39.252(d) makes clear that "nothing in this section authorizes the commission to substitute its judgment for a market valuation of generation assets determined under Sections 39.262(h) and (i)."

Nevertheless, the PUC concluded that the PSV method could not be employed by CenterPoint. The PUC noted a lack of proof that 19 percent of Genco shares had ever been sold on a national exchange. Focusing on the statutory language that the PSV method relies on a block of stock that "is spun off and sold to public investors through a national stock exchange," it concluded that while the required amount of stock was "spun off" to public investors, it was not "sold" to public investors. It noted that "CenterPoint did not conduct an initial public offering of [Genco] shares." It further noted that "[t]here was no public involvement in valuing the distribution of [Genco's] stock," and that "a distribution of stock is not a sale of stock."

---

[53] *See* 26 U.S.C. § 1504. According to CenterPoint, one advantage of a consolidated return is that the parent can offset one subsidiary's losses against another subsidiary's gains.

Because the PUC found that the PSV method could not be used and that no other statutorily prescribed method was available, it embarked on an effort to establish market value based on a number of "data points," including the announced sale of Genco (discussed below), market value estimates chosen by the valuation panel convened under subsection (h)(3), and other information. The valuation reached using this hybrid method resulted in a stranded cost recovery $258 million smaller than the recovery requested by CenterPoint under the PSV method. On this issue, the trial court and the court of appeals[54] agreed with the PUC.

CenterPoint, on the other hand, reads the statute to require that (1) 19 percent of Genco's stock be spun off, and (2) this block trade on a national exchange. It contends that so long as this block is publicly traded, it is being "sold to public investors through a national exchange" under the statute, and the market value of all of Genco's stock can be determined, subject to a control premium adjustment for the retained interest as provided in the statute.

The PUC argues that CenterPoint failed to prove that 19 percent of Genco's common stock sold on a national stock exchange. Assuming that this is a statutory requirement for the partial stock valuation method, it would be satisfied if the spin-off[55] of Genco's stock is a "sale" of securities

---

[54] 252 S.W.3d at 16–34.

[55] The SEC explains, "In a 'spin-off,' a parent company distributes shares of a subsidiary to the parent company's shareholders." SEC Staff Legal Bulletin No. 4 (Sept. 16, 1997). "[A] spin-off is effected by the parent's board of directors declaring a dividend of the subsidiary shares payable to the parent's stockholders." Bruce Hawthorn et al., *Planning and Structuring Spin-Offs and Subsidiary Offerings*, *in* CORPORATE LAW AND PRACTICE COURSE HANDBOOK SERIES 185, 209 (2001). "[I]n its purest form, a spinoff involves the creation of a separate ownership structure for a business through the distribution of stock of a subsidiary to the existing stockholders of a parent corporation as a dividend." Steven Ostner, *Spinoffs Discover New Life: Energized Shareholders Seek Enhanced Value*, 210 N.Y. L.J. 11, 11 (1993). "[T]he spin-off device involves the distribution by a corporation to its shareholders of another corporation's securities held by the distributing corporation." Simon M. Lorne, *The Portfolio Spin-Off and Securities Registration*, 52 TEX. L. REV. 918, 919 (1974) (footnote omitted).

under PURA. However, PURA does not define a "sale" of securities.[56] There are no Texas cases

[56] The Texas Securities Act, TEX. REV. CIV. STAT. art. 581-4(E), defines "sale" as follows:

> The terms "sale" or "offer for sale" or "sell" shall include every disposition, or attempt to dispose of a security for value. The term "sale" means and includes contracts and agreements whereby securities are sold, traded or exchanged for money, property or other things of value, or any transfer or agreement to transfer, in trust or otherwise.

As with the federal securities statutes, the Texas definition of "sale" of a security is broad, including "every disposition" and "any transfer or agreement to transfer." *See Tex. Capital Sec., Inc. v. Sandefer*, 58 S.W.3d 760, 775 (Tex. App.—Houston [1st Dist.] 2001, pet. denied) ("[The Texas Legislature] broadly defined 'sale,' 'sell,' and 'security.'"); 11 WILLIAM V. DORSANEO & PETER WINSHIP, TEXAS LITIGATION GUIDE § 171.03[1][a] (interpreting the statute as including a "for value" requirement). No Texas court has addressed whether a stock distribution though a stock dividend constitutes a "sale," although a court has said that the exercise of a stock option will constitute a "sale" under the Texas Act. *See Key Energy Servs., Inc. v. Eustace*, 290 S.W.3d 332, 342–43 (Tex. App.—Eastland 2009, no pet.) ("[T]he grant of an employee stock option on a covered security is a sale of that security.").

The Securities Act of 1933 defines "sale" of a security as including "every contract of sale or disposition of a security or interest in a security, for value." 15 U.S.C § 77b(a)(3). "The term 'offer to sell', 'offer for sale', or 'offer' shall include every attempt or offer to dispose of, or solicitation of an offer to buy, a security or interest in a security, for value." *Id.* The Securities Exchange Act of 1934 defines "sale" of a security to include "any contract to sell or otherwise dispose of." *Id.* § 78c(a)(14).

Some federal courts have determined that a spin-off through a stock distribution constitutes a "sale" under both the 1933 Securities Act and the 1934 Securities Exchange Act. *Int'l Controls Corp. v. Vesco*, 490 F.2d 1334, 1343–44 (2d Cir. 1974) (discussing 1934 Act); *S.E.C. v. Datronics Eng'rs, Inc.*, 490 F.2d 250, 253–54 (4th Cir. 1973) (discussing 1933 Act); *S.E.C. v. Harwyn Indus. Corp.*, 326 F. Supp. 943, 953–54 (S.D.N.Y. 1971) (same); *see also S.E.C. v. Sierra Brokerage Servs. Inc.*, 608 F. Supp. 2d 923, 940–44 (S.D. Ohio 2009) (considering "gifts" of securities to former directors and shareholders as "sales" where defendant schemed to create public companies without registration and then later transfer control for a fee). Other federal circuits have held to the contrary. The Fifth Circuit has held that an asset-for-stock exchange is not a "sale" within the meaning of Section 10(b) of the 1934 Act where the parties are not at arms length. *Rathborne v. Rathborne*, 683 F.2d 914, 918 (5th Cir. 1982) ("[A] transfer of securities from a wholly controlled subsidiary to its parent or between two corporations wholly controlled by a third does not amount to a statutory purchase or sale."); *see also Blau v. Mission Corp.*, 212 F.2d 77, 80 (2d Cir. 1954) (determining stock-exchanges between corporations with shared ownership were not "sales" within the meaning of Section 16(b) of the 1934 Act because the transaction was "a mere transfer between corporate pockets"). Several more recent cases declined to characterize spin-offs as sales, often considering the earlier cases' reasoning as a means to prevent backdoor IPOs without registration and making information available to the public. *See Isquith v. Caremark Int'l, Inc.*, No. 94 C 5534, 1997 WL 162881, at *6 (N.D. Ill. March 26, 1997) (distinguishing *Harwyn* and *Datronics* as SEC enforcement actions, as opposed to shareholder suits), *aff'd*, 136 F.3d 531 (7th Cir. 1998); *In re Union Carbide Corp. Consumer Prods. Bus. Sec. Litig.*, 676 F. Supp. 458, 475 (S.D.N.Y. 1987) (noting that outside *Harwyn* and its progeny, "[t]here has been no other case demonstrating acceptance of such a broad view of 'value'"); *Fed. Ins. Co. v. Campbell Soup Co.*, No. Civ.A. 131-04, 2004 WL 1631405, at *9–13 (N.J. Sup. Ct. Law Div. July 2, 2004) ("Notwithstanding the[] broad statutory definition[], however, courts have still found that spin-offs generally do not constitute a sale of securities. . . . [T]his court finds that in all of the cases cited, the courts which did find a purchase and sale were struggling to do so in order to insure a remedy for a wrong . . . or the mischief of an unsympathetic defendant . . . would not go without a federal remedy."); *see also In re Adelphia Commc'ns Corp. Sec. & Derivatives Litig.*, 398 F. Supp. 2d 244, 260 (S.D.N.Y. 2005).

In 1997, the SEC issued a Staff Legal Bulletin No. 4, which attempted to explain the SEC's view of spin-offs in regards to registration under the 1933 Act. SEC Staff Legal Bulletin No. 4 (Sept. 16, 1997). The Bulletin begins by

that decide whether a stock spin-off constitutes a "sale" under Texas securities laws, and while the federal case law seems to suggest a trend, it is far from unanimous on the issue. We need not answer this question because we resolve this valuation issue utilizing the sale of assets method.

Like CenterPoint, Intervenors contend that the PUC acted outside of its statutory authority in determining fair market value under a method not prescribed in Section 39.262. They contend the PUC should have used the sale of assets method found in Section 39.262(h)(1). This provision[57] states that if the utility sells all of its generation assets "in a bona fide third-party transaction under a competitive offering, the total net value realized from the sale establishes the market value of the generation assets sold."

During the true-up proceeding, under a signed agreement dated July 21, 2004, CenterPoint agreed to sell Genco, which held all of the joint applicants' generating assets, to private equity firms. This agreement, styled the "Transaction Agreement," was made known to the PUC and admitted into the administrative record. The Genco shares held by CenterPoint were sold for $45.25 per share and other shares sold for $47 per share. These prices are higher than the value of $42.425 per share

---

stating the general requirement that a subsidiary must register if the spin-off is a "sale." *Id.* The subsidiary does not have to register, and thus it logically follows no "sale" occurs, if: (1) the parent shareholders do not provide consideration for the spun-off shares; (2) the spin-off is pro-rata to the parent shareholders; (3) the parent provides adequate information about the spin-off and the subsidiary to its shareholders and the trading markets; (4) the parent has a valid business purpose for the spin-off; and (5) if the parent spins off "restricted securities," it held those securities for at least two years. *Id*.

[57] In its entirety Section 39.262(h)(1) states:

> Sale of Assets. If, at any time after December 31, 1999, an electric utility or its affiliated power generation company has sold some or all of its generation assets, which sale shall include all generating assets associated with each generating plant that is sold, in a bona fide third-party transaction under a competitive offering, the total net value realized from the sale establishes the market value of the generation assets sold. If not all assets are sold, the market value of the remaining generation assets shall be established by one or more of the other methods in this section.

chosen by the PUC under its extra-statutory method of determining fair market value. They are also higher than the price of $36.26 (plus a control premium of up to 10 percent) applicable to the PSV method. Intervenors urged the PUC to reject the use of the PSV method and to either deny any stranded cost recovery or to use the announced sale of Genco under the Transaction Agreement to determine stranded costs. They argue that the Transaction Agreement was a definitive agreement to sell the assets and was made months before the final Order issued on December 17, 2004. They contend that if the Transaction Agreement is used to determine the market value of the generation assets under the sale of assets method, the resultant market value is $253 million higher than the market value determined by the PUC, and the stranded cost recovery should be reduced by this same amount.

Although acknowledging the existence of the Transaction Agreement, the PUC concluded that "[t]he announced sale of [Genco] does not constitute a sale of assets under PURA § 39.262(h)(1) because the sale is not final and there is not sufficient evidence in the record to establish under the statute that the sale is a bona fide third-party transaction under a competitive offering."

We agree with Intervenors and CenterPoint that the PUC should not have used the extra-statutory method it employed in calculating market value. Section 39.262(h) specifies the permitted methods for determining market value. We need not decide if the PSV method could have been used if Genco had not been sold to private investors under the Transaction Agreement. Given that Genco actually did sell under that Agreement, we hold that the PUC should have used the sale of assets method to determine market value. There is no dispute that the Transaction Agreement closed under

its terms and Genco was sold to new owners.[58] Nor is there any dispute that CenterPoint was legally obliged to sell Genco under an agreement signed during the true-up proceeding. A November 9, 2004 CenterPoint press release, filed with the SEC, described the Transaction Agreement as a "definitive agreement." Nor does the PUC posit any compelling reason it could not have simply delayed issuing the Order if it felt the need for the Transaction Agreement to fully close and fund before it could serve as the basis for calculating market value. Its own rules provide that it can for good cause extend the deadline for issuing the true-up order.[59]

On remand the Commission should use the sale of assets method to determine market value. For several reasons Chapter 39 compels the use of this method in this case. First, Chapter 39 recognizes and the PUC Order repeatedly acknowledged in both its findings of fact and conclusions of law that "[m]arket value is defined as the value the assets would have if bought and sold in a bona fide third-party transaction on the open market under PURA § 39.262(h)." Section 39.251(4) indeed defines market value using these exact words. While other methods are provided to determine market value indirectly, we think the actual sale of all the generation assets under the Transaction Agreement provides the best measure of market value.

Second, since CenterPoint succeeded in selling Genco for an amount greater than the value of the company as measured by the PSV method or the extra-statutory method employed by the PUC, CenterPoint achieved a higher market value for the assets by completing the transaction than the

---

[58] According to an SEC filing by CenterPoint, the sale of Genco's fossil generation assets was completed on December 15, 2004, two days before the PUC's Order was signed, and the sale of Genco's nuclear assets concluded in April 2005.

[59] 16 TEX. ADMIN. CODE § 25.263(e)(6).

market value derived from other methods. This higher market value translates to a lower measure of stranded costs, and is consistent with the utility's duty under Section 39.252(d) to "pursue commercially reasonable means to reduce its potential stranded costs," with Section 39.252(a)'s recognition that a utility should recover only "nonmitigable stranded costs," and with Section 39.262(a)'s requirement that utilities "may not be permitted to overrecover stranded costs through the procedures established by this section." CenterPoint reduced its stranded costs by executing and fully performing under the Transaction Agreement. The Commission should not ignore that agreement unless it had a sound factual or legal reason to do so, and none appears in this case. CenterPoint's own chief executive testified that "we're not trying to recover more money than we have on our books. And if we get it from the sale, as opposed to stranded investment, great. Matter of fact, I think that would help everybody."

Third, there is ample evidence in the record that the Transaction Agreement was indeed "a bona fide third-party transaction under a competitive offering" as specified in subsection (h)(1). A CenterPoint investment banker testified that the bidding process for Genco consisted of contacting 107 potential buyers; 90 expressed an interest in receiving a teaser letter; of those 90, confidentiality agreements were negotiated with 38; and 17 expressed an interest in bidding. Ten parties submitted "first round indicative interest proposals"; six of those ten had an opportunity to conduct a full due diligence review of Genco[60]; and three submitted final round bids. Moreover, the fact that the

[60] The banker testified that the six potential bidders

> had the opportunity to meet the management team. They had the opportunity to visit the sites. They had the opportunity to participate and review all the data in the data room. They had the opportunity to ask detailed questions, and they did ask lots of detailed questions. And they basically had the

process resulted in a price exceeding the stock price available under the alternative PSV method or the extra-statutory price used by the PUC compels the conclusion that it was sufficiently "bona fide" and "competitive" to serve the purposes of Chapter 39. The court of appeals recognized that since "[t]he actual market value used by the Commission was lower than the price offered" in the Transaction Agreement, "the apparent purpose of the statute would seem to have been satisfied despite the lack of evidence showing sufficient competitive circumstances."[61] And the PUC stated in its Order that it considered the Transaction Agreement prices as "data points" in making its hybrid valuation.

Fourth, as we read Chapter 39, it does not give any preference to the PSV method in this case simply because CenterPoint sought recovery of stranded costs under that method. We disagree with CenterPoint and the PUC to the extent that they argue the utility may choose the valuation method even when the method results in higher stranded costs than another readily available method. In these circumstances, the utility should not be allowed to increase its stranded costs by choosing the market valuation method that results in the smaller measure of market value. While Section 39.262(h) provides that "the affiliated power generation company shall quantify its stranded costs using one or more of the following methods," other provisions make clear that the PUC ultimately determines stranded costs under Chapter 39 and the rates and charges needed to recoup them.[62] The true-up procedure set out in Chapter 39 unmistakably assigns the Commission to act as an

---

opportunity to do as much due diligence as needed to get to a final round proposal.

[61] 252 S.W.3d at 26 n.20.

[62] *See* TEX. UTIL. CODE §§ 39.201(*l*), .252(d), .262(g).

adjudicative body in "determining the amount of the utility's stranded costs"[63] and issuing a "final order"[64] in the true-up proceeding, subject to judicial review. The PUC cannot forego use of the sale of assets method if it is otherwise readily available simply because CenterPoint prefers another method that would increase its stranded costs.

2. Net Book Value

a. Excess Mitigation Credits Paid to RERS

The Act required utilities to undertake certain efforts to mitigate stranded costs in the 1998–2001 time frame. Section 39.254 directed utilities to use these efforts to reduce the book value of generation assets. Because stranded costs represent the difference between book value and market value, a reduction in the book value of generation assets had the effect of reducing stranded costs. The Act directed utilities to redirect depreciation expenses from transmission and distribution assets to generation assets, and to apply certain "excess earnings" to reduce the book value of generation assets.[65] The required mitigation is consistent with the principles that under Chapter 39 utilities "may not be permitted to overrecover stranded costs"[66] and are only allowed to recoup their "net,

---

[63] *Id.* § 39.252(d).

[64] *Id.* § 39.262(j).

[65] *See id.* §§ 39.254, .256, .257. Chapter 39 does not actually use the term "excess earnings," but the parties, the PUC, and this Court have used the term as a shorthand expression for the earnings that are applied to reduce stranded costs under Sections 39.254 and other provisions. *See, e.g.*, *CenterPoint Energy*, 143 S.W.3d at 88. According to the PUC's brief, the excess earnings concept is tied to the Legislature's decision to freeze retail rates under Section 39.052: "Recognizing that a utility might earn more under those frozen rates than if new rates had been set using more current information," Section 39.254 "addressed those excess earnings" by providing that "excess earnings would be credited against stranded costs."

[66] TEX. UTIL. CODE § 39.262(a).

verifiable, nonmitigable stranded costs."[67]

Prior to January 1, 2002, CenterPoint engaged in mitigation efforts by redirecting $841 million in depreciation and applying $1.13 billion in excess earnings to reduce the net book value (NBV) of its generation assets.

Section 39.201(h) required the PUC to make a determination of estimated stranded costs based on the ECOM model using "updated company-specific inputs." As noted above, Section 39.201 provided for interim rates during the 2002–2003 period, until the calculation of final stranded costs in the Section 39.262 true-up proceeding. The projections indicated that CenterPoint would have no stranded costs.[68] As a result, the PUC concluded that CenterPoint should cease mitigation efforts and should issue "excess mitigation credits" (EMCs) to all retail electric providers, including its affiliate RERS. The EMCs were deducted from the transmission and distribution charges that retail electric providers paid CenterPoint.

The EMCs increased the NBV of CenterPoint's generation assets on a dollar-for-dollar basis. However, the PUC concedes that the ECOM model assumptions underlying the 2001 finding that CenterPoint would have no stranded costs — the finding that the PUC used to justify the EMCs — proved to be false. At the 2004 true-up proceeding, CenterPoint established that it had substantial stranded costs.

---

[67] *Id.* § 39.252(a).

[68] Courts have noted that a surge in natural gas prices was one reason projections of stranded costs changed after the 1998 ECOM report. *E.g.*, *In re TXU Elec. Co.*, 67 S.W.3d at 134 (Phillips, C.J., concurring) ("TXU's investment in the Comanche Peak nuclear plant, once a liability, had now become profitable because the cost of generating electricity from natural gas plants exceeded that of generating electricity from nuclear plants.").

In a mandamus proceeding, CenterPoint objected to the order requiring EMCs. In that proceeding, the PUC represented to this Court in its briefing and at oral argument that CenterPoint could recoup the EMC payments in the true-up proceeding now under review if CenterPoint was ultimately determined to have stranded costs. This Court denied mandamus relief,[69] although three justices would have reached the merits and held the EMCs unlawful as unauthorized by Chapter 39.[70] The PUC terminated EMCs on April 29, 2005. In September 2005, the Third Court of Appeals held that the PUC exceeded its authority in ordering EMCs.[71]

In the true-up proceeding, CenterPoint contended all the EMCs it had already paid retailers could be recovered as stranded costs. CenterPoint argued it should not be penalized for following the PUC's mistaken decision to order the EMCs. Intervenor City of Houston argued that CenterPoint should not be allowed to recover $385 million in EMCs paid to its retail affiliate, RERS. The PUC rejected this argument, finding "no legal basis for the recommended disallowance" and declining to "penalize CenterPoint for following a Commission order." One commissioner dissented in part to the true-up Order, solely on this issue. The dissenting commissioner reasoned that the EMC payments to RERS amounted to "wealth transfers between two companies who knew they would be joint applicants in this true-up proceeding."

The trial court agreed with the PUC majority on this issue. The court of appeals, however,

---

[69] *In re TXU Elec. Co.*, 67 S.W.3d at 131.

[70] *Id.* at 150 (Hecht, J., dissenting).

[71] *City of Corpus Christi v. Pub. Util. Comm'n*, 188 S.W.3d 681, 684, 691 (Tex. App.—Austin 2005, pet. denied).

agreed with the dissenting commissioner and held that CenterPoint could not recoup the EMCs paid to RERS. Although the court of appeals assumed that CenterPoint and RERS are "completely separate entities,"[72] it reasoned that "joint true-up applicants are prohibited from overrecovering [stranded costs] as a single unit" by Section 39.262(a), which generally prohibits the overrecovery of stranded costs.[73]

We reverse the court of appeals and affirm the PUC on this issue. We need not decide whether the PUC could ever order excess mitigation credits. Even if the PUC theoretically possessed the legal authority to order EMCs, as a factual matter the PUC should not have done so in this case. The credits were ordered only because the ECOM model incorrectly predicted that CenterPoint would have no stranded costs. CenterPoint should recover whatever stranded costs it would have recovered if the EMCs had never been paid. EMCs paid to RERS had the same dollar-for-dollar impact on CenterPoint's stranded costs as EMCs paid to unaffiliated retailers. Intervenors concede in their brief that as to EMC payments generally, "[f]or every dollar of EMC payments made, CenterPoint wrote up its NBV by one dollar, thus increasing potential stranded costs," and that as to EMC payments to RERS in particular, "every dollar that CenterPoint paid to [RERS] resulted in CenterPoint writing up NBV by an equal amount." In either case, the purpose of the EMCs was to increase the NBV of CenterPoint's generation assets. The PUC did not err, therefore, in declining to adjust stranded costs by disregarding any of the EMCs paid by CenterPoint, and Intervenors fail to demonstrate a sound legal or factual basis for deducting the EMCs that were paid to RERS.

[72] 252 S.W.3d at 38.

[73] *Id.* at 39.

We cannot agree with the court of appeals that the payment of EMCs to CenterPoint's affiliate RERS merits special treatment. Chapter 39, in its express measures for recovering stranded costs and preventing the over-recovery of stranded costs, makes no distinction between affiliated and unaffiliated electric retailers that would warrant special treatment of the EMCs paid to RERs. The EMCs were simply an interim and ultimately unwarranted effort to reverse what the PUC perceived to be an over-recovery of stranded costs before the final true-up. There is no express statutory provision allowing such credits, as the Third Court of Appeals noted in holding that Chapter 39 did not permit them. However, Section 39.201 does provide for the transmission and distribution utility to impose competition transition charges, based on interim estimates of stranded costs. Section 39.107(d) provides that these charges are made to "a customer's retail electric provider." These provisions make no exception or distinction for an affiliated retail electric provider. If the interim CTCs result in an over-recovery of stranded costs, Sections 39.201(*l*) and 39.262(c) provide for the transmission and distribution utility to refund stranded costs by reducing the CTCs or rates charged to retail providers. Again, in providing for these refunds Chapter 39 makes no statutory distinction between affiliated and unaffiliated retailers, and Chapter 39 indeed generally requires that such distinctions not be drawn when billing retail electric providers and their customers.[74]

Because the EMCs, by design, had the effect of increasing the NBV of generation assets regardless of whether they were directed to an affiliated or unaffiliated retail electric provider, and because such an increase in NBV correspondingly increased the amount of stranded costs under the

[74] *See, e.g.*, TEX. UTIL. CODE §§ 39.107(e), .203.

relevant provisions of Chapter 39, the PUC did not err in refusing to reduce stranded costs by the portion of the EMCs paid to RERS.

b. The RRI Option

CenterPoint and Intervenors complain that the PUC erred in its treatment of the "RRI Option." Under the business separation plan, Reliant Energy, Inc. conveyed its generation assets to a subsidiary, Genco. Reliant Energy changed its name to CenterPoint. As discussed above, CenterPoint spun off approximately 19 percent of the shares of Genco to CenterPoint's shareholders. CenterPoint also spun off a company named Reliant Resources, Inc. (RRI), by selling approximately 20 percent of the shares in RRI in an initial public offering, with CenterPoint retaining about 80 percent of RRI.[75] RRI, in turn, owned the affiliated retail electric provider, RERS.

As part of the business separation plan, which the PUC approved in a separate proceeding, RRI received an option to purchase CenterPoint's shares in Genco. The Option expired on January 24, 2004. The Option price was set at the price for Genco that was to be determined at the true-up proceeding.

Under its "primary holding" that rejected the use of the PSV method, the PUC employed an extra-statutory method that considered various "data points" for determining market value, as described above. Under this holding, the PUC concluded that its method of calculating fair market value accounted for the effect of the RRI Option. It therefore held under its primary holding that no adjustment to NBV relating to the RRI Option was necessary. The trial court and the court of

[75] In 2002, CenterPoint distributed its remaining ownership in RRI to CenterPoint's shareholders.

appeals[76] affirmed this decision. Under its "alternative holding," the PUC calculated true-up amounts assuming that the fair market value was properly calculated under the PSV method. As explained above, we conclude that neither the primary nor the alternative holding can be sustained, because the sale of assets method must be used — and not the extra-statutory method used in the primary holding or the PSV method used in the alternative holding.

Intervenors complain that if the Court agrees with the primary holding rejecting the use of the PSV method, the PUC nevertheless erred in refusing to make a requested deduction from the NBV calculation to reflect the RRI Option. We need not reach this issue because we reject the primary holding. CenterPoint complains that if as it contends the PSV method must be used, the PUC erred in concluding under its alternative holding that an adjustment should be made to NBV to reflect the RRI option. Again, this issue is moot because we reject the use of the PSV method.

However, Intervenors argue that "[r]egardless of how market value is determined," an adjustment to NBV should be made for the RRI Option. Insofar as Intervenors argue an adjustment to NBV should be made for the RRI Option even if we agree with them that the sale of assets method should be used to determine market value,[77] we reject this argument.

The PUC reasoned in its alternative holding that if it is required to use the PSV method of calculating market value, an adjustment should be made to NBV to reflect the RRI option. It made

---

[76] 252 S.W.3d 32–34.

[77] Intervenors repeatedly complain that an NBV adjustment should be made for the RRI Option under the primary holding as well as the alternative holding. However, they also argue more generally that this adjustment should be made "regardless of how market value is determined." In their brief on the merits and petition for review, they ask that we sum dollar amounts for the alleged errors of the PUC in failing to use the sale of assets method and to adjust for the RRI Option, suggesting that these amounts should be stacked if the sale of assets method is used.

the adjustment under PURA Section 39.252(d), which provides:

> An electric utility shall pursue commercially reasonable means to reduce its potential stranded costs, including good faith attempts to renegotiate above-cost fuel and purchased power contracts or the exercise of normal business practices to protect the value of its assets. The commission shall consider the utility's efforts under this subsection when determining the amount of the utility's stranded costs; provided, however, that nothing in this section authorizes the commission to substitute its judgment for a market valuation of generation assets determined under Sections 39.262(h) and (i).

Applying this provision, the PUC found that CenterPoint had received no compensation for the Option conveyed to RRI and that the Option placed restrictions on the management and operations of Genco that "were not commercially reasonable and did not represent normal business practices."

The PUC could consider the commercial reasonableness of the RRI Option in determining NBV. The PUC adjusted NBV in making the stranded cost determination, after finding that the conveyance of the Option was commercially unreasonable and did not represent normal business practices. Section 39.252(d) expressly directs the PUC, when making the stranded cost determination, to consider whether the utility used "commercially reasonable means" and "normal business practices" to reduce stranded costs. Since Section 39.252(d) bars the PUC from adjusting the market value component of stranded costs, it necessarily authorizes an adjustment to NBV, the other principal component of stranded costs.

CenterPoint points out that in an earlier proceeding approving the business separation plan, the PUC noted that the Option "was an integral part" of the plan and "meets the separation requirements in PURA § 39.051." Section 39.051, however, is the provision requiring the separation of the utility into three separate entities. The PUC's conclusion that the business separation plan

complied with this provision did not necessarily mean that CenterPoint had taken all reasonable efforts to minimize stranded costs under Section 39.252(d). Indeed, in the earlier proceeding the PUC expressly stated that it was not approving the RRI Option and other agreements that had not yet been finalized, and that its approval of the business separation plan "does not preclude a review in the 2004 true-up proceeding of whether [CenterPoint] pursued reasonable means to reduce its potential stranded costs."

The PUC considered evidence that the grant of the RRI option was not a normal business practice and had an adverse effect on the value of the generation assets. One of Genco's own SEC filings conceded that the Option limited Genco's ability to (1) merge with another company, (2) sell assets, (3) enter into long-term contracts, (4) engage in other businesses, (5) construct or acquire new plant or capacity, (6) engage in certain hedging activities, (7) encumber assets, (8) issue new securities, (9) pay special dividends, and (10) engage in certain transactions with affiliates. The report states that these restrictions "may adversely affect our ability to compete with companies that are not subject to similar restrictions." The PUC also considered expert testimony that the Option was very unusual and did not represent normal business practices, gave RRI an incentive to reduce the value of Genco, was viewed negatively in the investment community, and limited Genco's upside potential. The last point seems obvious, since RRI could derail an outside offer for Genco above the option price by exercising the Option, assuming that RRI had the funds. CenterPoint's own financial advisor on the spinoff of Genco acknowledged in a presentation that the "RRI option limits upside potential." Michael Gorman, a witness for Intervenors, opined that the Option was unreasonable because it "essentially transferred significant control of [Genco] to RRI," which then had "an

incentive to minimize the value of" Genco, an incentive "diametrically opposite of [CenterPoint's] obligation to protect the value of [Genco] and mitigate stranded costs." Another witness for Intervenors, William Purcell, testified that the Option "gave RRI in effect the right of first refusal to buy" Genco, which "acted as a deterrent for [Genco or CenterPoint] to receive independent third party purchase bids or indications of interest — and, accordingly, was a drag on [Genco's] stock price."

Gorman calculated the "intrinsic value" of the Option at approximately $330 million. He made further adjustments to this figure that the PUC rejected because they did not reflect the value the Option would have had in an arms-length transaction. The PUC valued the Option at $330,314,000 and determined the NBV should be reduced by this amount, and further grossed up this amount by an additional $177,874,089 to reflect accumulated deferred federal income taxes.

Summarizing Gorman's approach (and ignoring that the PUC only agreed with part of his methodology), the Option was priced at the market price to be determined under the PSV method, with an adjustment for a control premium of up to 10 percent to be determined by the PUC, as Section 39.262(h)(3) specifies. Gorman, however, believed that the actual control premium should be 30 percent, based on premiums over market prices paid in corporate acquisitions of similar companies. The difference between the 30 percent market premium and statutory premium was therefore 20 percent. Gorman determined that Genco's future market value at the Option exercise date would approximately equal its book value of $2.9 billion, took 20 percent of that number ($580 million) to reflect the 20 percent difference in control premiums, took 81 percent of that figure to reflect CenterPoint's ownership in Genco ($469.8 million) and then discounted that value back to

the date the Option was granted to arrive at $330 million as the Option's "intrinsic value."

We have reviewed the administrative record and conclude that while substantial evidence supports the PUC's conclusions that the Option was not commercially reasonable and for a time depressed the value of Genco stock, no adjustment should be made to NBV if the sale of assets method is used.

The PUC apparently believed that the $330 million dollar figure derived from Gorman's testimony reflected the negative impact of the Option on the market value of Genco. In a subheading on "Market Value," the PUC found that "the entire [market] valuation process was not commercially reasonable," and accordingly made an adjustment to NBV as required by Section 39.252(d). Further, the PUC explained that no adjustment to market value under its primary holding was needed because the stock price selected under that method, which included consideration of the market control premium, "takes into consideration the operational constraints placed upon [Genco] by the Option and the control premium." When it turned to NBV, the PUC made an adjustment for the Option because of its effect on market value, reasoning that "Gorman calculated the amount of the option's below-market pricing by taking the difference between the 10 percent maximum control premium RRI would have had to pay if it had exercised the option, and an average industry control premium of 30 percent, which RRI would likely have had to pay in a bona fide third-party transaction." The PUC apparently concluded that the Option depressed the market value of Genco stock by $330 million, since under Gorman's testimony, as analyzed and accepted in part by the PUC, this amount arguably reflected the difference between what a third-party bid for the company might have brought and the ceiling on market value imposed by the Option.

However, this analysis breaks down if the sale of assets method is used, because the actual sale of Genco took place months after the Option expired. The Option expired in January 2004, and the sale of Genco assets occurred in December 2004 and April 2005. There is no evidence that the Option had an impact on the value of the assets sold under the Transaction Agreement. As the PUC notes in its brief to this Court, "The announced future sales price for Genco occurred months after the Option expired. Moreover, the sale itself resolved the uncertainty about the future of the company. Thus, that price was unaffected by the unreasonableness of the expired Option." The court of appeals similarly noted that the offer to purchase Genco in the Transaction Agreement "came several months after the option expired and after the restrictions placed upon Genco by the option had ended. As a result, any detrimental effect on Genco's value resulting from the option should have dissipated."[78] Further, there is some empirical support for concluding that the sale of Genco long after the Option expired was not affected by the Option, even if the market value of the company had earlier been depressed by it. As CenterPoint notes in a post-submission brief, "The $508 million deduction for the grossed-up Option under the alternate holding using the PSV method would reduce CenterPoint's stranded-cost recovery by virtually the same amount — $511 million — as the sale-of-assets method Intervenors advocate."

Intervenors nevertheless argue that if CenterPoint had sold the Option instead of imprudently giving it away, the sale of that asset could have been used to reduce net book value and thus mitigate stranded costs. But this simply assumes that the Option could have been sold. There was no

[78] 252 S.W.3d at 34.

evidence that RERS or any third party was interested in purchasing the Option, nor is there any evidence that any party would have actually paid the "intrinsic value" Gorman calculated if the Option had been put up for sale. On the contrary, CenterPoint offered evidence of "extremely difficult market conditions" at the time of the business separation that included the Option, which necessitated the spinoff of Genco to existing CenterPoint shareholders in lieu of an IPO. In their briefing to this Court, Intervenors criticize CenterPoint for its decision to go forward with the business separation at a time when "the wholesale energy markets were in disarray as a result of action undertaken by Enron in California. Nearly all generation company stocks had lost significant value."

Accordingly, on remand, the PUC should not make an adjustment to NBV for the RRI Option in conjunction with its use of the sale of assets method to determine market value.

c. Depreciation

CenterPoint complains that the PUC erred in reducing stranded costs attributable to depreciation on generation assets. The PUC reduced CenterPoint's stranded costs by reducing the NBV of its generation assets by approximately $378 million, a figure representing depreciation on those assets for years 2002 and 2003. The PUC reasoned that this adjustment was necessary to prevent an excessive recovery of stranded costs. It noted that under Section 39.262(a), a utility "may not be permitted to overrecover stranded costs through the procedures established by this section," which governs the final stranded cost and capacity auction true-ups.

Specifically, the PUC found it inappropriate

for the joint applicants to recover the remaining book value of generation assets

> through stranded-costs recovery while at the same time being guaranteed a level of revenue through the capacity auction that, by design, covers a portion of this same book value. To allow recovery of a portion of the book value through both stranded-costs recovery and the capacity auction true-up is, plain and simple, a double recovery of this portion of book value, and therefore, an overrecovery of stranded costs.

The PUC therefore held that an "adjustment" to NBV must be made in the stranded cost calculation to prevent the perceived "double recovery." The trial court and the court of appeals[79] agreed with this result.

We agree with CenterPoint that the Commission misread the relevant provisions of Chapter 39. As explained above, Chapter 39 requires both a stranded cost true-up and a capacity auction true-up. Nothing in the world of business or accounting requires both true-ups to transition a regulated industry to a more competitive market. But the Legislature provided for both and requires both. As we noted in our earlier *CenterPoint* decision, "the Legislature chose not to include the capacity auction true-up amount in its definition of stranded costs or to incorporate it into the methods it prescribes for calculating stranded costs."[80] The capacity auction true-up amount does not depend on the amount or existence of stranded costs, but on a specific formula set out in Section 39.262(d) and the Commission's rules thereunder that can result in a positive or negative number. "Stranded costs" is a different matter and a term of art defined by Chapter 39. In this case it essentially consists of the difference between the book value of the generation assets "*established*

[79] 252 S.W.3d at 62–70.

[80] *CenterPoint Energy*, 143 S.W.3d at 99 (brackets omitted).

as of December 31, 2001" under Section 39.251(7)[81] and the market value of those assets, which are determined under the methods set out in Section 39.262. The PUC conceded in its Order that "stranded-costs recovery requires that book value be determined as of December 31, 2001."

On the other hand, as we have previously explained, the capacity auction true-up "guarantees consumers and power companies that the power company will receive no more and no less than a margin predetermined by the PUC in 2001 when the ECOM model was run in compliance with section 39.201."[82] This margin is determined by taking the difference between projected power sales and actual power prices "obtained through the capacity auctions."[83]

Critically, the capacity auction true-up amount is determined for the years 2002 and 2003. We have so stated, explaining that this true-up consists of "the difference between the price of power obtained through the capacity auctions and the power cost projections that were employed in the 2001 ECOM model for the years 2002 and 2003."[84] The PUC likewise recognized in its Order that the capacity auction true-up "ensures that an affiliated [power-generation company] with significant investment in generation assets will recover the power costs the PUC had projected, in the 2001 ECOM model, would be recovered for the 2002–2003 period." Its Substantive Rule 25.263(i) also defines precisely the formula for calculating the capacity auction true-up, based on "the difference between the price of power obtained through capacity auctions conducted for the years 2002 and

---

[81] TEX. UTIL. CODE § 39.251(7) (emphasis added).

[82] *CenterPoint Energy*, 143 S.W.3d at 96.

[83] TEX. UTIL. CODE § 39.262(d)(2).

[84] *CenterPoint Energy*, 143 S.W.3d at 96.

2003 and the power cost projections for the same time period as used in the determination of ECOM for that utility in the proceeding under PURA § 39.201."[85]

The PUC apparently reasoned that the capacity auction true-up is based on the ECOM market revenue projections used to set interim rates in the 2001 Section 39.201 proceeding. As discussed further below, we agree with the Order that these revenue projections "assumed the continuation of regulation." Under traditional rate regulation, rates are set to allow the utility to recover a reasonable return on its capital investments.[86] Since these capital assets are depreciated over time on the books,[87] depreciation affects the NBV of the utility. The PUC apparently further reasoned that stranded costs must be based on book value as of the end of 2001, and this value includes generating plant assets that have not yet been depreciated further in years 2002 and 2003. Since the capacity auction true-up is based on revenue projections under rates intended to recoup investments in plants that are further depreciated in 2002 and 2003, the PUC apparently reasoned that the capacity auction true-up and the stranded costs true-up allowed for a "double recovery" of a portion of book value.

---

[85] 16 TEX. ADMIN. CODE § 25.263(i). By way of further explanation, years 2002 and 2003 are used in the capacity true-up calculation because PURA Section 39.262(d)(2) requires a comparison of a revenue figure based on the capacity auctions and ECOM power cost projections "for the same time period." The capacity auctions were required to begin at least 60 days before the date of consumer choice, January 1, 2002. *See* TEX. UTIL. CODE § 39.153(a). ECOM power cost projections were run to determine interim tariffs in 2002 and 2003 under Section 39.201. *See id.* § 39.201(b)(1),(d), (g), (h), (*l*). The final true-up filing was initiated and completed in 2004. *See id.* § 39.262(c), (j). Therefore, the years 2002 and 2003 are the years that data are compared for purposes of the capacity auction true-up calculation.

[86] *See* TEX. UTIL. CODE § 36.051 ("In establishing an electric utility's rates, the regulatory authority shall establish the utility's overall revenues at an amount that will permit the utility a reasonable opportunity to earn a reasonable return on the utility's invested capital used and useful in providing service to the public in excess of the utility's reasonable and necessary operating expenses.").

[87] *See, e.g.*, *id.* § 36.053 ("Electric utility rates shall be based on the original cost, less depreciation, of property used by and useful to the utility in providing service.").

We think the Commission erred in its analysis. Any utility will eventually retire all of its stranded costs, or any other capital investment or portion thereof, if it survives deregulation and continues to operate at a profit for a sufficient period of time. "Depreciation" is a general term referring to the accounting practice of spreading an asset's cost over the projected useful life of the asset or some other period.[88] In this case, however, "stranded costs" is a purely legal term that depends entirely on how it is defined by statute. Under Chapter 39, stranded costs depend on book value as of the end of 2001. We agree with CenterPoint that "[i]t is indisputable that the NBV of generation assets as of December 31, 2001 would not reflect a reduction for depreciation attributable to 2002 and 2003." An "adjustment" to stranded costs to reflect further depreciation of power plant assets in 2002 and 2003 is not permitted because the PUC is not allowed to alter the statutory definition of stranded costs. The PUC's view that the adjustment is necessary to prevent a "double recovery" of stranded costs necessarily depends on its conclusion, in direct contravention of the statute, that stranded costs should be redefined to incorporate further depreciation of generation assets in 2002 and 2003, thereby reducing NBV and correspondingly reducing stranded costs. Statutory stranded costs always depend on the distance between two values — NBV and market value — both of which constantly change over time.[89] The PUC is constrained to determine those values as of the time periods selected by the Legislature.

---

[88] As the PUC noted in its Order, "Stranded-costs recovery is simply a method to recover the book value of generation assets that would have been recovered through depreciation and amortization ordinarily over the life of the asset under traditional rate regulation."

[89] *See CenterPoint Energy*, 143 S.W.3d at 102 (Brister, J., dissenting) ("[W]ith stranded costs, a more apt analogy would be a system in which a jury returns a different verdict every day for a period of years, each one very different from the verdict the day before, and each one correct.").

Intervenors contend in their brief: "The problem the Commission addressed in the true-up award was that because NBV was frozen as of December 31, 2001, it could not be reduced by the $378 million in depreciation expense that CenterPoint indisputably collected through the capacity auction true-up as a contribution to its fixed costs." The problem with this analysis is that, by statutory definition, the NBV component of stranded costs is frozen as of December 31, 2001, and the PUC's adjustment effectively moved that date in violation of the statute.

d. Construction Work in Progress

Intervenors argue that the Commission erred in not requiring CenterPoint to meet ratemaking requirements for inclusion of construction work in progress (CWIP) in NBV. The court of appeals[90] and the district court agreed with the PUC on this issue, as do we.

Inclusion of CWIP increased stranded costs by about $110 million. The PUC's Substantive Rule 25.263(g)(2)(A)[91] provides that the NBV of generation assets includes "generation-related construction work in progress."

In addressing Intervenors' arguments, the PUC noted that "[n]o party claimed accounting mistakes or imprudence on any specific project included in CWIP," and found "there is no evidence of any accounting discrepancies or any failure to follow GAAP in connection with these balances." It recognized that under PURA § 36.054, applicable to general ratemaking, CWIP can be included in the rate base only if "(1) necessary for the utility's financial integrity and (2) not inefficiently or imprudently planned or managed." The PUC, however, declined Intervenors' request to apply these

[90] 252 S.W.3d at 45–48.

[91] 16 TEX. ADMIN. CODE § 25.263(g)(2)(A).

additional requirements because Chapter 39 is concerned with the unique matter of stranded costs measured by the difference between the NBV of generation assets and market value, while general ratemaking applies ratemaking standards to determine what amounts of book value may be included in the rate base and the appropriate rate of return on that rate base. It also noted that "[o]ne significant difference between a traditional rate case and this proceeding . . . is that whereas under traditional regulation a utility is allowed to file rate cases on a recurring basis into the future, this proceeding is strictly a one-time phenomenon." In other words, CWIP can be recovered under Section 36.054 in the exceptional case if the requirements of that provision are met; otherwise, the utility can simply seek recovery for the construction project in a future rate case. There is no analogous recurring procedure for the recovery of stranded costs.

Intervenors argue that under Section 39.260(a), "[t]he definition and identification of invested capital and other terms . . . that affect the net book value of generation assets . . . shall be treated in accordance with generally accepted accounting principles as modified by regulatory accounting rules generally applicable to utilities." The PUC did not agree that in the calculation of stranded costs this provision requires the application of Section 36.054's special rules regarding CWIP. It noted that Section 39.260(a) did not expressly incorporate those particular standards. The PUC further reasoned:

> [U]nlike a traditional rate case, there will be no future opportunity for the joint applicants to recover the CWIP costs that are subsequently moved into EPS [electric plant in service]. Second, including CWIP in NBV of generating assets is necessary for an apples-to-apples comparison of book value and market value, because the market value of CWIP is reflected in TGN's stock price. These additional arguments by CenterPoint further amplify the difference between a traditional rate case and this proceeding. For [these and other reasons], the joint applicants do not need to satisfy

> rate-case requirements for including CWIP in NBV in this proceeding. Accordingly, the Commission declines to exclude the $109,966,000 for nonenvironmental CWIP from NBV.

We cannot say the Commission's analysis is legally or factually flawed, and we defer to the Commission on this technical issue.

C. Capacity Auction True-Up

1. Capacity Auction Price

CenterPoint complains that the court of appeals and the PUC erred in concluding that an adjustment to the capacity auction price should be made in calculating the capacity auction true-up under Section 39.262(d). We agree with CenterPoint.

Genco became the affiliated power-generation company of CenterPoint in 2001. Section 39.153 required Genco to auction "at least 60 days before [January 1, 2002], entitlements to at least 15 percent of [its] Texas jurisdictional installed generation capacity."[92] The capacity auctions thus assured that power was available to new competitors in the deregulated retail electricity market. The PUC recognized in its Substantive Rule 25.381(b) that the purpose of the capacity auctions is to "promote competitiveness in the wholesale market through increased availability of generation and increased liquidity."[93]

Under Section 39.201, the PUC approved rates intended to cover expected stranded costs and other charges. Stranded costs were estimated based on "the ECOM administrative model"[94] the PUC

---

[92] TEX. UTIL. CODE § 39.153(a).

[93] 16 TEX. ADMIN. CODE § 25.381(b).

[94] TEX. UTIL. CODE § 39.201(h).

ran in 2001.

Section 39.262(d)(2) required a capacity auction true-up at the final true-up proceeding. Section 39.262(d) states:

> The affiliated power generation company shall reconcile, and either credit or bill to the transmission and distribution utility, the net sum of:
>
> (1) the former electric utility's final fuel balance determined under Section 39.202(c); and
>
> (2) any difference between the price of power obtained through the capacity auctions under Sections 39.153 and 39.156 and the power cost projections that were employed for the same time period in the ECOM model to estimate stranded costs in the proceeding under Section 39.201.

The final fuel balance of subpart (1), which is summed with the capacity auction true-up amount, is not at issue in this appeal. Under subpart (2), the power-generation company (Genco) bills the transmission and distribution company (CenterPoint) if revenues as determined by the capacity auction price are less than the revenues predicted by the ECOM model. The amount billed to the transmission and distribution company can then be recovered from consumers through adjustment of the nonbypassable delivery rates.[95] Under the formula used by the PUC in its Substantive Rule 25.263(i),[96]

(ECOM market revenues – ECOM fuel costs)
less
(market revenues (as determined from capacity auctions) – actual fuel costs)
equals
capacity auction true-up

[95] *See id.* § 39.262(g).

[96] 16 TEX. ADMIN. CODE § 25.263(i).

Under this formula, market revenues "as determined from capacity auctions" is a term of art and is a proxy for actual market revenues of the utility during the relevant period. Under the Rule, market revenues consist of the "capacity auction price x total 2002 and 2003 busbar sales." "Total busbar sales" refers to the total quantity of power generated for sale by Genco. The formula deems all busbar sales as being made at the average capacity auction price, since Rule 25.263(i)(1)(C) defines the capacity auction price as the affiliated power-generation company's "total capacity auction revenues derived from the capacity auctions conducted for the years 2002 and 2003 divided by that [company's] total [megawatt hour] sales of capacity auction products for the years 2002 and 2003."

In its Order the PUC stated that "the purpose of the capacity auction true-up is to ensure that utilities receive the margins predicted in the ECOM model which assumed the continuation of regulation." We agree, having previously noted that the capacity auction true-up "guarantees consumers and power companies that the power company will receive no more and no less than a margin predetermined by the Commission in 2001 when the ECOM model was run in compliance with section 39.201."[97] We further explained the underlying rationale for the capacity auction true-up as follows:

> The Legislature recognized that on the first day of deregulation, January 1, 2002, there was no way to validly quantify stranded costs, if any, because a market for electricity, both wholesale and retail, would need time to develop, and there would be interim distortions and fluctuations, perhaps severe ones. The Legislature was also concerned that distortions and fluctuations in the market price of power during the first two years of deregulation could harm consumers and generation companies alike. The Legislature accordingly designed the capacity auction true-up proceeding

[97] *CenterPoint Energy*, 143 S.W.3d at 96.

because of the likelihood that no stable market would exist until up to two years after the first day of deregulation.[98]

Sections 39.153(e) and (f) required the PUC to adopt rules governing the statutory capacity auctions. The PUC adopted rules governing the auctions in many particulars, covering the time of sale, the type of products sold, and the terms of the sales.[99] The PUC required Genco to sell entitlements to its generation capacity in four product categories: baseload, gas-intermediate, gas-cyclic, and gas-peaking. Due to variations of market demand, these rules contained a "safe-harbor" provision deeming the 15-percent requirement met if the affiliated power-generation company "offered products in a product category (for example, gas-intermediate) and successfully sold, at least, all of the entitlements offered in one particular month, in that product category."[100] If demand was insufficient to meet even this provision, the company was to make "a proposal to the commission" to modify the auction process, prices, or products.[101]

Genco offered the required 15 percent of its capacity in the four product categories in its statutory capacity auctions and sold all the entitlements for at least one month in 2002 and 2003 for each product category except for gas-intermediate in 2003. Genco made proposals to facilitate the auction for gas-intermediate, two of which were approved by the PUC, that included cut-rate pricing for as little as one cent for kilowatt-month, but Genco was ultimately unsuccessful in meeting the

---

[98] *Id.*

[99] 16 TEX. ADMIN. CODE § 25.381.

[100] *Id.* § 25.381(h)(1)(B)(iv).

[101] *Id.* § 25.381(h)(7)(C).

safe-harbor requirement that it sell all entitlements to gas-intermediate for at least one month in 2003.

The Commission found that Genco had sold only 65 percent of the capacity it was required to sell under the 15 percent requirement of Section 39.153, and less than half the gas-intermediate capacity required of Commission rules. However, Genco correctly points out that it would have complied with the safe harbor provisions if it had succeeded in selling additional entitlements in one product category for $5,250. Based on this failure, the PUC concluded that Genco had not complied with PURA Section 39.153(a) and therefore its formula under Rule 25.263(i) could not be used. It then proceeded to consider an alternative "proper method" for determining the capacity auction true-up amount, one that in the eyes of the PUC would avoid "the bias created by the failure of [Genco] to auction a full 15 percent of its auction products."[102]

The PUC considered various proposals but adopted the approach of an Intervenor witness, Dennis Goins, who proposed "that the capacity auction price used in the formula should be defined as the average price of all capacity products sold in the PUC and private auctions." Under this formula, the capacity auction true-up amount was reduced by $439,744,218. The district court reversed the PUC on this issue, but the court of appeals agreed with the PUC and reinstated this disallowance.[103]

---

[102] In addressing the "bias" created by Genco's inability to auction the required quantity of product, the PUC stated in its Order that "[t]he absence of capacity products produces a downward bias in the market price derived from capacity auction sales, thereby overstating the capacity auction true-up." However, under the formula described above for calculating the capacity auction true-up, if Genco had succeeded in selling an additional 21 gas-intermediate entitlements for 1 cent per kilowatt-month, under a proposal approved by the PUC under its safe-harbor rules, the effect on the capacity auction true-up would have been negligible.

[103] 252 S.W.3d at 48–59.

We conclude that the court of appeals and the PUC erred in reducing the capacity auction true-up amount as described above. The capacity auction true-up amount should not be reduced by over $400 million because Genco was unable to sell $5000 worth of one subcategory of its generation capacity at auction. While Section 39.153 specifies that the utility sell 15 percent of its generating capacity at auction, the record indicates that Genco made a good faith effort to comply with this statute and was simply unable to sell by auction, at any price, the amount of one product category required by PUC rules. It points out that no utility was able to sell all its gas-intermediate entitlements for even one month in 2003. We avoid statutory constructions that impose an impossible condition.[104]

Further, Section 39.262 does not state that the capacity auction price specified therein should be ignored because of a trivial noncompliance with rules promulgated under Section 39.153. Nothing in Chapter 39 requires such a result. In the portion of the Order discussing the issue, the PUC conceded, "Neither PURA nor the Commission's rules specify what happens if a company fails to meet the 15 percent sales requirement or the safe-harbor provisions." The capacity auction true-up in Section 39.262 is not conditioned on compliance with the requirement, under the separate statute governing the capacity auctions themselves, that the utility *succeed* in auctioning 15 percent of its generating capacity. As discussed above, the two sections address different legislative purposes. The capacity auctions themselves were intended to provide a supply of power to new entrants in the retail electric market, while the capacity auction true-up was intended to assure that the original

[104] *See* TEX. GOV'T CODE § 311.021(4) (recognizing that courts, in construing statutory codes, should presume that "a result feasible of execution is intended"); *Barshop v. Medina Cnty. Underground Water Conservation Dist.*, 925 S.W.2d 619, 629 (Tex. 1996) (avoiding construction that would subject parties to an impossible condition).

utilities recovered "a margin predetermined by the Commission in 2001."[105]

Section 39.262 does, however, expressly require the use of the "*price* of power obtained through the capacity auctions under Sections 39.153 and 39.156."[106] Goins conceded that CenterPoint used the statutory price as spelled out in Section 39.262 and Rule 25.263(i) in making its capacity auction true-up request. However, he believed that the statutory formula created a "downward bias" if the auction was unsuccessful in selling a relatively higher-priced product such as gas-intermediate. He therefore proposed following Rule 25.263(i) "with one major modification." He recommended calculating the capacity auction price based on the average prices of products sold in the PUC capacity auctions as well as prices obtained in so-called "TGN auctions." The TGN auctions were private auctions that did not have to comply with PUC rules.[107] Notably RERS, Genco's affiliated retail electric provider and its biggest customer, could participate in these auctions, in direct violation of the letter of Section 39.153[108] and its essential purpose in making capacity available to new competitors. Not surprisingly, the prices obtained in the TGN auctions were sometimes higher than those obtained in the Chapter 39 auctions, since an additional, established competitor was allowed to bid. The chief executive of Genco testified that since RERS "had the majority of the load in the Houston area . . . there was a lot more competition, I believe, in the TGN than there was in the PUC auction." Goins agreed that the TGN auctions were "somewhat

[105] *CenterPoint Energy*, 143 S.W.3d at 96.

[106] TEX. UTIL. CODE § 39.262(d)(2) (emphasis added).

[107] *See id.* § 39.153(d).

[108] *See id.* § 39.153(c) ("An affiliate of the electric utility selling entitlements in the auction required by this section may not purchase entitlements from the affiliated electric utility at the auction.").

more successful" in selling products because RERS was eligible to participate in those auctions. Goins's "major modification" was inconsistent with Chapter 39 and the PUC should not have adopted it.

Section 39.262 unambiguously specifies that the statutory capacity auction price, not some other blended price the PUC finds more appropriate, must be used in calculating the capacity auction true-up amount. The PUC's Rule 25.263(i), the validity of which is not challenged by any party,[109] provides the correct method for calculating the capacity auction price, and it should have been used. Parties, experts, and the PUC can look to the formula derived from Section 39.262(d)(2) and question why it chooses the capacity auction price instead of some other price in calculating market revenues, why sales in 2002 and 2003 are used instead of sales in some other time period, or indeed why a capacity auction true-up is necessary at all in light of other provisions providing for the recovery of stranded costs. But the statute is clear enough and we apply it as written.[110]

2. Carrying Costs on Capacity Auction True-Up

Intervenors complain that the PUC erred in allowing CenterPoint to recover $168 million in interest on the capacity auction true-up award. The trial court and court of appeals[111] agreed with the PUC on this issue, as do we.

In *Texas Industrial Energy Consumers v. CenterPoint Houston Electric, LLC*, we recently

---

[109] *See id.* § 39.001(f) ("A person who challenges the validity of a competition rule must file a notice of appeal with the court of appeals and serve the notice on the commission not later than the 15th day after the date on which the rule as adopted is published in the Texas Register.").

[110] *See City of Rockwall v. Hughes*, 246 S.W.3d 621, 625 (Tex. 2008) ("In construing statutes, we ascertain and give effect to the Legislature's intent as expressed by the language of the statute.").

[111] 252 S.W.3d at 59–62.

held that interest on the capacity auction true-up and other non-stranded costs awarded in a Section 39.262 true-up proceeding was recoverable.[112] We upheld the validity of the portion of PUC Rule 25.263(*l*)(3) providing for "carrying costs on the true-up balance," even though in *CenterPoint Energy* we had invalidated another portion of the Rule specifying the date at which interest begins to accrue.[113] We noted that "invalidating the whole rule and barring any recovery of interest whatsoever would *contradict* our view in *CenterPoint Energy* 'that the Legislature intended electric utilities to recover carrying costs on stranded costs to compensate for the financial costs incurred during the stranded cost recovery period,' consistent with the prior ratemaking principle that 'carrying costs on investments in generation plants were included in rates.'"[114]

While, as discussed above, general ratemaking principles need not always be applied to a Chapter 39 true-up proceeding, we again see no valid reason the PUC cannot provide for interest on true-up balances under Rule 25.263(*l*)(3), including interest on the capacity auction true-up balance. The parties in *TIEC* challenged the amount of interest specified under Rule 25.263(*l*)(3), and did not necessarily question the authority vel non of the PUC to award interest, but in today's case we see no error in the PUC's decision to award interest on the capacity auction true-up to reflect the time value of money. Since, as discussed above, this true-up award is designed to assure the recovery of revenues projected in the ECOM model for 2002 and 2003, the PUC reasonably concluded that a full recovery of this amount must include interest to reflect the time value of money. It correctly found

---

[112] 324 S.W.3d 95, 101–05 (Tex. 2010) (hereinafter *TIEC*).

[113] The current version of the Rule complies with *CenterPoint Energy*. 16 TEX. ADMIN. CODE § 25.263(*l*)(3).

[114] *Id.* at 103–04 (quoting *CenterPoint Energy*, 143 S.W.3d at 83).

in its Order: "Awarding the time value of the capacity auction true-up award puts the joint applicants in the same economic position they would have been in had they received this amount in 2002 and 2003." Intervenors provide no persuasive reason that interest on the capacity auction true-up cannot be awarded in this case as in other cases where utilities are allowed to recover costs with interest.

III. Conclusion

We affirm the court of appeals' judgment in part and reverse it in part. We remand this case to the Commission for further proceedings consistent with this decision.

Don. R. Willett
Justice

OPINION DELIVERED: March 18, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0497

RAILROAD COMMISSION OF TEXAS AND PIONEER EXPLORATION, LTD., PETITIONERS,

v.

TEXAS CITIZENS FOR A SAFE FUTURE AND CLEAN WATER AND JAMES G. POPP, RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued April 14, 2010

JUSTICE GUZMAN delivered the opinion of the Court, joined by JUSTICE HECHT, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE GREEN, and JUSTICE JOHNSON.

CHIEF JUSTICE JEFFERSON delivered an opinion concurring in the judgment, joined by JUSTICE WILLETT and JUSTICE LEHRMANN.

The Texas Water Code requires the Railroad Commission of Texas to weigh the "public interest" in the permitting of proposed oil and gas waste injection wells. In a ruling, the Commission declined to consider traffic-safety factors in its public interest inquiry. We determine whether the Commission's interpretation of "public interest" is entitled to judicial deference. Because we conclude the Commission's construction of the phrase was reasonable and in accord with the plain language of the statute, we hold the court of appeals erred in not deferring to the Commission's

interpretation. We therefore reverse the court of appeals' judgment and render judgment for the petitioners in accordance with the trial court's original judgment.

I. Background

The Barnett Shale is a large, prolific oil and gas field lying beneath several counties, including Wise County, in north Texas. As in other shale formations, wells in the Barnett Shale require fracture stimulation in order to produce. Fracing a well entails pumping large volumes of water and sand into reservoir rock, which then mixes with saline formation water and must be flowed back out of the well before production can begin. A company fracing a well must dispose of the resulting waste. Most companies do so by injecting the waste into subsurface zones which are naturally saline environments, usually in old wells converted to injection wells.[1] A company seeking to convert a well to an injection well for oil and gas waste must apply to the Commission for a permit. TEX. WATER CODE § 27.031.

In granting an injection well permit, the Commission is required to make the following findings:

> (1) that the use or installation of the injection well *is in the public interest*;
>
> (2) that the use or installation of the injection well will not endanger or injure any oil, gas, or other mineral formation;

[1] The Water Code defines "injection well" as "an artificial excavation or opening in the ground made by digging, boring, drilling, jetting, driving, or some other method, and used to inject, transmit, or dispose of industrial and municipal waste or oil and gas waste into a subsurface stratum; or a well initially drilled to produce oil and gas which is used to transmit, inject, or dispose of industrial and municipal waste or oil and gas waste into a subsurface stratum; or a well used for the injection of any other fluid; but the term does not include any surface pit, surface excavation, or natural depression used to dispose of industrial and municipal waste or oil and gas waste." TEX. WATER CODE § 27.002(11).

> (3) that, with proper safeguards, both ground and surface fresh water can be adequately protected from pollution; and
>
> (4) that the applicant has made a satisfactory showing of financial responsibility if required by Section 27.073.

Id. § 27.051(b) (emphasis added). The instant dispute centers on the requisite public interest finding in section 27.051(b)(1).

Pioneer Exploration, Ltd. (Pioneer) applied to the Commission for a permit to convert an existing well into an injection well for the disposal of oil and gas waste. But several Wise County residents living near the well—respondents Texas Citizens for a Safe Future and Clean Water and James Popp (collectively, Texas Citizens)—opposed the proposed injection well, necessitating a contested administrative hearing before Commission hearing examiners. At the hearing, Texas Citizens voiced a variety of concerns about the well's environmental soundness, but also presented arguments and evidence related to traffic-safety issues. Specifically, Texas Citizens argued that large trucks used to haul waste water to the well would damage nearby roads and pose a threat to area residents who use the roads, and thus would not serve the "public interest" under section 27.051(b)(1).[2] Pioneer did not rebut this traffic-safety evidence. Instead, Pioneer essentially argued that the production of natural gas is in the public interest.

The hearing examiners recommended issuing the permit. In the examiners' findings of fact and conclusions of law, adopted by the Commission in its final order, the examiners found

[2] Texas Citizens presented evidence that (1) the small country gravel roads leading to the well are too narrow (about sixteen feet wide) for large truck traffic, (2) the trucks would damage the roads, and (3) the trucks would pose a safety threat to children and other pedestrians who frequently use the roads. The evidence at the hearing demonstrated that up to fifty trucks per day could travel the roads at all hours of the day and night.

> [u]se of the proposed disposal well is in the public interest because it will provide needed additional disposal capacity and an economical means of disposing of produced salt water from completed wells in the rapidly expanding Barnett Shale Field Area, thereby increasing ultimate recovery from these wells and preventing waste. The safe and proper disposal of produced saltwater serves the public interest.
>
> . . .
>
> The use of the proposed disposal well is in the public interest pursuant to Sec[tion] 27.051 of the Texas Water Code.

In the proposal for decision, the examiners additionally concluded the "production of hydrocarbons for use by the people of Texas and industry serves the public interest." In addressing Texas Citizens' traffic-safety evidence, the examiners stated the Commission "does not have jurisdiction to regulate truck traffic on the state's roads and highways." The examiners concluded that, while they empathized with Texas Citizens' concerns about property values and quality of life, Pioneer had met its burden of proof on the public interest finding.[3]

The Commission adopted the examiners' findings of fact and conclusions of law and approved Pioneer's application. Texas Citizens appealed to the trial court, which affirmed the Commission's order. The court of appeals, however, reversed, holding that the Commission abused its discretion in interpreting the "public interest" inquiry too narrowly by solely focusing on the proposed well's effect on the conservation of natural resources.[4] *See* 254 S.W.3d 492, 503. The

[3] In their findings of fact and conclusions of law, the hearing examiners also addressed the other statutory findings required for the Commission's grant of a permit, finding Pioneer had posted required financial assurance, and concluding that the proposed injection well would not endanger oil, gas, or geothermal resources or cause pollution of surface or fresh water. *See id.* § 27.051(b)(2)–(4).

[4] Texas Citizens also raised procedural due process and notice arguments in the court of appeals. The court of appeals affirmed the Commission's order on both of these grounds. Texas Citizens does not appeal these rulings to this Court.

court of appeals remanded the case to the Commission to "reconsider its public interest determination, using a broader definition of 'the public interest,' which includes public-safety concerns where evidence of such concerns has been presented." *Id.* The Commission moved for rehearing en banc, which the court of appeals denied in a per curiam opinion with two justices writing separately, concurring in the denial. *See id.* at 503–07. The Commission and Pioneer petitioned this Court for review of the court of appeals' holding on the "public interest" issue.

II. Standard of Review

The parties disagree on the contours of the precise issue in dispute, which is a matter we initially address. The Commission contends this case fundamentally concerns the need for court deference to an agency's interpretation of what it argues is an ambiguous statute. If an agency's construction of an ambiguous statute it is charged with administering is reasonable, the Commission urges, it is improper for a court to overturn that interpretation.[5] Texas Citizens counters that the core issue is not an agency's interpretation of a statutory term or even the proper definition of "public interest," but rather whether that phrase may include factors beyond the production of oil and gas, requiring the Commission to weigh all evidence offered in support of or against the public interest finding.

We agree with the Commission that this case turns on a matter of statutory construction—specifically, the definition of the term "public interest"—and therefore the proper

[5] Pioneer also argues that the Court must defer to the Commission's reasonable interpretation of the statute. However, Pioneer primarily contends that, under the substantial evidence rule, the Commission did not abuse its discretion because substantial evidence in the record supported the Commission's ruling and the ruling comports with the law. *See* TEX. GOV'T CODE § 2001.174.

level of deference a court must grant the Commission's interpretation of that term. As Texas Citizens asserts, the Commission's order does not expressly define the term "public interest." Rather, the order—by way of adopting the examiners' findings of fact and conclusions of law—states that the well is in the public interest because of its positive effect on increased productivity from wells in the Barnett Shale field. But although the Commission's final order does not explicitly adopt the examiners' statements concerning Texas Citizens' traffic-safety evidence, the Commission has made clear, throughout these proceedings, that it does not view its public interest analysis as an open-ended inquiry including public-safety issues, but rather one limited to matters related to oil and gas production. The crux of the dispute, then, is whether the term "public interest" in section 27.051(b) of the Water Code is a broad, open-ended term, encompassing any conceivable subject potentially affecting the public, or a more narrow term that does not include a subsidiary issue like traffic safety but is limited to matters related to oil and gas production.

The Utilities Code generally requires a court to review a decision of the Commission under a substantial evidence standard. *See* TEX. UTIL. CODE § 105.001(a) ("Any party to a proceeding before the railroad commission is entitled to judicial review under the substantial evidence rule."). This standard requires a court to reverse or remand a case for further proceedings "if substantial rights of the appellant have been prejudiced because the administrative findings, inferences, conclusions, or decisions" are, among other things, not reasonably supported by substantial evidence, or are "characterized by abuse of discretion." TEX. GOV'T CODE § 2001.174(2).

The gravamen of this dispute, however, is a governmental agency's construction of a statute it is charged with administering. The construction of a statute is a question of law we review de

novo. *First Am. Title Ins. Co. v. Combs*, 258 S.W.3d 627, 631 (Tex. 2008); *F.F.P. Operating Partners, L.P. v. Duenez*, 237 S.W.3d 680, 683 (Tex. 2007). We have long held that an agency's interpretation of a statute it is charged with enforcing is entitled to "serious consideration," so long as the construction is reasonable and does not conflict with the statute's language. We have stated this principle in differing ways, but our opinions consistently state that we should grant an administrative agency's interpretation of a statute it is charged with enforcing some deference.[6]

Citing the Supreme Court's seminal case on judicial deference, the Commission argues that state law principles regarding judicial deference to an agency's interpretation of a statute it implements are closely aligned to federal-court precedent. *See Chevron U.S.A. Inc. v. Natural Res. Def. Council, Inc.*, 467 U.S. 837 (1984). Under the *Chevron* doctrine, a federal court embarks on a two-part test in determining whether to defer to an agency's construction of a statute. First, the court must consider whether Congress has "directly spoken to the precise question at issue." *Id.* at

---

[6] *See, e.g.*, *First Am. Title Ins. Co.*, 258 S.W.3d at 632 (explaining that we give "serious consideration" to an agency's construction of its statute and should uphold the agency's interpretation, so long as it is reasonable and does not contradict the statute's plain language); *Mid-Century Ins. Co. v. Ademaj*, 243 S.W.3d 618, 623 (Tex. 2007) (observing that an agency's construction of a statute it is charged with enforcing is entitled to serious consideration, as long as the construction is reasonable and does not contradict the statute's plain language); *Fiess v. State Farm Lloyds*, 202 S.W.3d 744, 747–48 (Tex. 2006) (recognizing that courts give "some deference" to an agency regulation—including an agency's formal opinion adopted after a formal proceeding—concerning a statute, so long as the language at issue is ambiguous and the agency's construction reasonable); *TXU Elec. Co. v. Pub. Util. Comm'n of Tex.*, 51 S.W.3d 275, 286 (Tex. 2001) (concluding that the Court gives "some deference" to the Public Utility Commission's interpretation of a statute if it is reasonable and does not conflict with the statute's language); *Quick v. City of Austin*, 7 S.W.3d 109, 123 (Tex. 1998) (noting that the contemporaneous construction of a statute by a governmental agency charged with its enforcement is entitled to "great weight"); *Dodd v. Meno*, 870 S.W.2d 4, 7 (Tex. 1994) (recognizing that an administrative agency's construction of a statute that it is charged with enforcing is entitled to "serious consideration," so long as the construction is reasonable and does not contradict the statute's plain language); *Tarrant Appraisal Dist. v. Moore*, 845 S.W.2d 820, 823 (Tex. 1993) (same); *Tex. Emp'rs Ins. Ass'n v. Holmes*, 196 S.W.2d 390, 395 (Tex. 1946) (observing that "'the practical interpretation of [an] Act by the agency charged with the duty of administering it is entitled to the highest respect from the courts'") (quoting *Indus. Accident Bd. v. Glenn*, 190 S.W.2d 805, 809 (Tex. 1945) (Simpson, J., dissenting)); *Stanford v. Butler*, 181 S.W.2d 269, 273 (Tex. 1944) (observing that courts will ordinarily adopt and uphold a construction of a statute by the executive officer or department charged with its administration, if the statute is ambiguous and the construction reasonable).

842. If Congress's intent is clear and unambiguous under the language of the statute, that is the end of the inquiry. *See id.* at 842–43. If the statute is silent or ambiguous, however, the court does not impose its own construction of the statute, but rather defers to the agency's interpretation so long as it is reasonable. *See id.* at 843. The *Chevron* doctrine applies to a formal agency construction of a statute, as in an order following a formal adjudication or a regulation. *See U.S. v. Mead Corp.*, 533 U.S. 218, 229–30 (2001). Informal interpretations, such as advisory opinions, may merit some deference, as articulated in *Skidmore v. Swift & Co.*, 323 U.S. 134, 139–40 (1944), but not the high deferential standard afforded in *Chevron*. *See Mead*, 533 U.S. at 234–35; *see generally* Bradley Lipton, *Accountability, Deference, and the* Skidmore *Doctrine*, 119 YALE L.J. 2096 (2010).

We have never expressly adopted the *Chevron* or *Skidmore* doctrines for our consideration of a state agency's construction of a statute, but we agree with the Commission that the analysis in which we engage is similar. In our "serious consideration" inquiry, we will generally uphold an agency's interpretation of a statute it is charged by the Legislature with enforcing, "'so long as the construction is reasonable and does not contradict the plain language of the statute.'" *First Am. Title Ins. Co.*, 258 S.W.3d at 632 (quoting *Tarrant Appraisal Dist. v. Moore*, 845 S.W.2d 820, 823 (Tex. 1993)). As we observed in *Fiess*, this deference is tempered by several considerations:

> It is true that courts give some deference to an agency regulation containing a reasonable interpretation of an ambiguous statute. But there are several qualifiers in that statement. First, it applies to formal opinions adopted after formal proceedings, not isolated comments during a hearing or opinions [in a court brief]. Second, the language at issue must be ambiguous; an agency's opinion cannot change plain language. Third, the agency's construction must be reasonable; alternative *unreasonable* constructions do not make a policy ambiguous.

Fiess v. State Farm Lloyds, 202 S.W.3d 744, 747–48 (Tex. 2006).

Here, the examiners' opinion, and the Commission's final order, were formally adopted after an adjudication. Accordingly, we will review the Commission's interpretation of "public interest" and uphold it if it is reasonable and in accord with the plain language of the statute. *See First Am. Title Ins. Co.*, 258 S.W.3d at 632.[7]

III. Analysis

A. Injection Well Act

In 1961, the Legislature enacted the Injection Well Act (the Act), which governs the permitting process for all injection wells in the state.[8] The Act—currently codified in Chapter 27 of the Water Code—distinguishes between two types of injection wells, those used to dispose of "industrial and municipal waste," and those used to dispose of "oil and gas waste." TEX. WATER CODE § 27.002(5)–(6). Under the Act, the Commission has jurisdiction over injection wells used to dispose of oil and gas waste, *see id.* §§ 27.031, 27.051(b), while the Texas Commission for Environmental Quality (TCEQ) has jurisdiction over other types of injection wells, including those used for the disposal of industrial and municipal waste, *see id.* §§ 27.011, 27.051(a).

The distinction between the jurisdictions of these two agencies is important because the statute governing the issuance of permits differs as to factors each agency must consider in granting a permit. Both statutes require the agencies to determine "that the use or installation of the injection well is in the public interest," *id.* § 27.051(a)(1), (b)(1), but the TCEQ is additionally required to find

---

[7] Because we evaluate the contours of "public interest" as made in formal Commission statements following an adjudication, we need not determine whether some lesser level of deference would be warranted if the statements were made informally, as expressed in *Skidmore*. *See Skidmore*, 323 U.S. at 139–40.

[8] *See* Act of April 5, 1961, 57th Leg., R.S., ch. 82, 1961 Tex. Gen. Laws 159.

that an applicant for a hazardous waste well not located in an industrial area has made reasonable effort to ensure that any burden of the proposed injection well on public roadways will be minimized or mitigated, *id.* § 27.051(a)(6).[9] The statute does not require the Commission to make this public roadway determination. Originally, the Act required both agencies to consider the same factors in determining whether to issue a permit, but a 1987 amendment added the public roadway requirement for the TCEQ's consideration in certain situations but did not enact a similar requirement for the Commission.[10]

---

[9] Specifically, the TCEQ is required to make the following findings in granting an injection well permit:

> (1) that the use or installation of the injection well is in the public interest;
>
> (2) that no existing rights, including, but not limited to, mineral rights, will be impaired;
>
> (3) that, with proper safeguards, both ground and surface fresh water can be adequately protected from pollution;
>
> (4) that the applicant has made a satisfactory showing of financial responsibility if required by Section 27.073 of this code;
>
> (5) that the applicant has provided for the proper operation of the proposed hazardous waste injection well;
>
> (6) that the applicant for a hazardous waste injection well not located in an area of industrial land use has made a reasonable effort to ensure that the burden, if any, imposed by the proposed hazardous waste injection well on local law enforcement, emergency medical or fire-fighting personnel, or public roadways, will be reasonably minimized or mitigated; and
>
> (7) that the applicant owns or has made a good faith claim to, or has the consent of the owner to utilize, or has an option to acquire, or has the authority to acquire through eminent domain, the property or portions of the property where the hazardous waste injection well will be constructed.

Id. § 27.051(a).

[10] *See* Act of June 1, 1987, 70th Leg., R.S., ch. 638, § 5, 1987 Tex. Gen. Laws 2433, 2434.

The Act further requires the TCEQ to consider specific criteria—including the compliance history of the applicant, whether an alternative to the well is reasonably available, and, in some circumstances, whether the applicant will maintain sufficient insurance—in its public interest inquiry, though the Act specifically states the TCEQ is not limited to consideration of these factors. *Id.* § 27.051(d).[11] The Act provides no parallel provision enumerating the types of public interest considerations the Commission must evaluate.

---

[11] Texas Water Code § 27.051(d) provides:

> The [TCEQ], in determining if the use or installation of an injection well is in the public interest under Subsection (a)(1), shall consider, but shall not be limited to the consideration of:
>
> > (1) compliance history of the applicant and related entities under the method for evaluating compliance history developed by the [TCEQ] under Section 5.754 and in accordance with the provisions of Subsection (e);
> >
> > (2) whether there is a practical, economic, and feasible alternative to an injection well reasonably available; and
> >
> > (3) if the injection well will be used for the disposal of hazardous waste, whether the applicant will maintain sufficient public liability insurance for bodily injury and property damage to third parties that is caused by sudden and non-sudden accidents or will otherwise demonstrate financial responsibility in a manner adopted by the [TCEQ] in lieu of public liability insurance. A liability insurance policy which satisfies the policy limits required by the hazardous waste management regulations of the [TCEQ] for the applicant's proposed pre-injection facilities shall be deemed "sufficient" under this subdivision if the policy:
> >
> > > (A) covers the injection well; and
> > >
> > > (B) is issued by a company that is authorized to do business and to write that kind of insurance in this state and is solvent and not currently under supervision or in conservatorship or receivership in this state or any other state.

Id.

The Act declares a purpose of protecting freshwater supplies in this state, as provided in its statement of policy and purpose:

> It is the policy of this state and the purpose of this chapter to maintain the quality of fresh water in the state to the extent consistent with the public health and welfare and the operation of existing industries, taking into consideration the economic development of the state, to prevent underground injection that may pollute fresh water, and to require the use of all reasonable methods to implement this policy.

Id. § 27.003.

Beyond this statement of purpose, the Act, as a whole, details procedures related to the protection of natural resources, as well as the technical processes involved, in the permitting of an injection well. The chapter prescribes no requirements for the Commission to engage in any sort of process or deliberation involving matters that do not involve oil and gas production and the protection of natural resources.

With this statutory framework in mind, we turn to the Commission's construction of "public interest" to determine if it is reasonable and in harmony with the language of the statute.

B. The Commission's Interpretation of "Public Interest"

Texas Citizens argues, and the court of appeals held, that "public interest" is a broad term, intended by the Legislature to encompass any number of subsidiary issues that might impact the public interest. Texas Citizens asserts two primary arguments in favor of its interpretation: (1) the term is inherently an amorphous, unlimited term, encompassing all possible factors that might affect the public; and (2) since other factors in section 27.051(b) require the Commission to consider matters pertaining to the production of oil and gas and the prevention of fresh water pollution, it must follow that the "public interest" factor is intended to encompass something else.

Both of these arguments are at least somewhat reasonable, though both have flaws. An argument can be asserted—as Pioneer does—that sections 27.051(b)(2) and (3) specifically address the need to produce oil and gas in a manner that does not harm oil, gas, and mineral reserves and protects fresh water supplies, while the public interest factor contemplates whether the proposed well will ultimately positively impact the production of oil and gas. The "amorphousness" of the phrase "public interest" further cuts against Texas Citizens' argument that its interpretation is the only reasonable interpretation of the provision—the statute is, as this dispute demonstrates, subject to more than one interpretation. The greater deficit in Texas Citizens' arguments, though, is that while Texas Citizens' position has some merit, the Commission's interpretation does too.

It is precisely when a statutory term is subject to multiple understandings that we should defer to an agency's reasonable interpretation. *See Fiess*, 202 S.W.3d at 747–48. Because we only require an agency's interpretation of a statute it is charged with administering to be reasonable and in accord with the statute's plain language, we need not consider whether the Commission's construction is the only—or the best—interpretation in order to warrant our deference. In determining whether the Commission's interpretation is reasonable, we begin with the language in the statute itself.

1. Statutory Scheme

The term "public interest" in section 27.051(b)(1) is undefined. We ordinarily construe a statute so as to give effect to the Legislature's intent as expressed in its plain language. *Duenez*, 237 S.W.3d 680 at 683. "'If the statute is clear and unambiguous, we must apply its words according to their common meaning.'" *First Am. Title Ins. Co.*, 258 S.W.3d at 631 (quoting *State v. Shumake*, 199 S.W.3d 279, 284 (Tex. 2006)).

As discussed above, the phrase "public interest" is anything but clear and unambiguous. There are several factors, however, lending support to the Commission's determination that its consideration of the public interest is intended to be a narrow one precluding consideration of traffic-safety concerns.

First, the Legislature's addition of a traffic-related inquiry to the TCEQ's required findings—amended more than twenty-five years after the Act was initially enacted—weighs in favor of the Commission's interpretation. We generally avoid construing individual provisions of a statute in isolation from the statute as a whole. *See City of San Antonio v. City of Boerne*, 111 S.W.3d 22, 25 (Tex. 2003). We therefore "'read the statute as a whole and interpret it to give effect to every part.'" *Id.* (quoting *Jones v. Fowler*, 969 S.W.2d 429, 432 (Tex. 1998) (per curiam)). When the Legislature uses a word or phrase in one portion of a statute but excludes it from another, the term should not be implied where it has been excluded. *Laidlaw Waste Sys. (Dallas), Inc. v. City of Wilmer*, 904 S.W.2d 656, 659 (Tex. 1995).[12] Had the Legislature intended for the Commission and the TCEQ to entertain traffic-related evidence in their public interest inquiries, it would not have needed to amend the statute to expressly require the TCEQ to consider a well's impact on traffic in certain situations. *See Acker v. Tex. Water Comm'n*, 790 S.W.2d 299, 301 (Tex. 1990) ("A statute

[12] *See also Fireman's Fund Cnty. Mut. Ins. Co. v. Hidi*, 13 S.W.3d 767, 769 (Tex. 2000) (per curiam) ("When the Legislature has employed a term in one section of a statute and excluded it in another, we presume that the Legislature had a reason for excluding it."); *Shumake*, 199 S.W.3d at 287 (observing statutory construction rule of giving effect to all words and not treating any statutory language as surplusage).

is presumed to have been enacted by the legislature with complete knowledge of the existing law and with reference to it."); *see also Leland v. Brandal*, 257 S.W.3d 204, 208 (Tex. 2008).[13]

Second, under the principle of *ejusdem generis*, we have warned against expansively interpreting broad language where it is immediately preceded by narrow and specific terms. *Marks v. St. Luke's Episcopal Hosp.*, 319 S.W.3d 658, 663 (Tex. 2010). "[W]hen words of a general nature are used in connection with the designation of particular objects or classes of persons or things, the meaning of the general words will be restricted to the particular designation." *Hilco Elec. Coop. v. Midlothian Butane Gas Co.*, 111 S.W.3d 75, 81 (Tex. 2003). Given that the surrounding statutory scheme—including the other three factors the Commission is specifically required to consider in evaluating a permit application—exclusively concern matters related to the production of oil and gas, it is reasonable for the Commission to decline to consider the completely unrelated inquiry of traffic safety in weighing the public interest.

Third, the Act's statement of purpose expressly declares the purpose of the Act is to "maintain the quality of fresh water in the state to the extent consistent with the public health and welfare and the operation of existing industries." TEX. WATER CODE § 27.003. This narrow policy statement declines to promote a purpose of protecting public safety except where natural resources are concerned.

---

[13] CHIEF JUSTICE JEFFERSON would hold that the term "public interest" unambiguously precludes the Commission from considering traffic-safety factors because of the TCEQ's separate statutory duty to consider those factors in certain situations. We do not agree that the content or legislative history of these extrinsic provisions renders the term "public interest" unambiguous as to the Commission. As we have previously stated, we apply an *unambiguous* statutory term according to its common meaning. *First Am. Title Ins. Co.*, 258 S.W.3d at 631. Here, we cannot interpret "public interest" according to its common meaning because it *is* ambiguous—instead, we must look to the statutory scheme of Chapter 27 and other extrinsic interpretative aids to determine the meaning of the term.

Finally, in the portions of the Act where the Legislature intends for the TCEQ or the Commission to evaluate a particular factor in considering the public interest, it says so. The Legislature requires the TCEQ to examine specific factors in its public interest inquiry. *See id.* § 27.051(d). Texas Citizens argues that section 27.051(d) does not limit the TCEQ's consideration of these factors in its public interest investigation. *See id.* (providing that the TCEQ "shall not be limited to the consideration of" the enumerated public interest factors). But the Legislature does not require the TCEQ to consider any particular additional factor either. *Id.* In contrast, there is no statutory directive for the Commission to consider matters related to traffic safety or any other specific factor in its public interest evaluation.

When, as here, a statutory scheme is subject to multiple interpretations, we must uphold the enforcing agency's construction if it is reasonable and in harmony with the statute. *See First Am. Title Ins. Co.*, 258 S.W.3d at 632. As the Supreme Court has explained, governmental agencies have a "unique understanding" of the statutes they administer. *Wyeth v. Levine*, 129 S. Ct. 1187, 1201 (2009) (citing *Hines v. Davidowitz*, 312 U.S. 52, 67 (1941)). In a complex regulatory scheme like the Act and with a phrase as amorphous as "public interest," this deference is particularly important. *See Pub. Util. Comm'n of Tex. v. Tex. Tel. Ass'n.*, 163 S.W.3d 204, 213 (Tex. App.—Austin 2005, no pet.) ("Public interest determinations are dependent upon the special knowledge and expertise of the [Public Utility] Commission."). Under the plain terms of the Act, we conclude the Commission's construction of "public interest" as a narrow term that does not include traffic-safety considerations is reasonable and in alignment with the statute's meaning.

2. The Commission's Area of Expertise

Texas Citizens argues that we should afford no deference to an agency's interpretation of a statute that does not lie within its administrative expertise or pertain to a nontechnical issue of law. *See Rylander v. Fisher Controls Int'l, Inc.*, 45 S.W.3d 291, 302 (Tex. App.—Austin 2001, no pet.). Texas Citizens further contends that requiring the Commission to consider traffic-safety evidence in its public interest evaluation does not impose on it a duty to "regulate truck traffic" or otherwise evaluate matters beyond its expertise, but rather to simply consider whether traffic-safety concerns might cut against the propriety of the proposed well. The Commission could, Texas Citizens argues, limit the amount of waste the injection well can accept or regulate hours of operation, thus curtailing potential truck traffic, without having to regulate or make policy decisions impacting the state's roads. The Commission counters that its statutory directive is to regulate matters related to oil and gas production, not traffic concerns, and that it does not have the expertise or jurisdiction to consider these sorts of public-safety issues.

As an initial matter, the breadth of the term "public interest" is a question of law that implicates the Commission's very technical decision of whether to grant an injection well permit. But, more importantly, we disagree with Texas Citizens that the Commission's public interest inquiry is unrelated to its administrative expertise: to the contrary, the Commission interpreted the public interest finding in such a way as to ensure that it will *only* consider matters within its expertise. As we concluded above, the Commission's determination that "public interest" does not include traffic-safety matters is reasonable under the Act's statutory scheme. We further conclude

it is reasonable given the Commission's unique competence as the state's agency overseeing oil and gas production.

The Commission has long been the agency charged with regulating matters related to oil and gas production, and is given broad discretion in its administration of oil and gas laws. *See* TEX. NAT. RES. CODE § 85.202(b) (requiring the Commission to "do all things necessary for the conservation of oil and gas and prevention of waste of oil and gas"); *R.R. Comm'n of Tex. v. Lone Star Gas Co.*, 844 S.W.2d 679, 686 (Tex. 1992) (acknowledging the Legislature's grant of "broad discretion to the Commission in administering the laws regulating oil and natural gas"); *Stewart v. Humble Oil & Ref. Co.*, 377 S.W.2d 830, 834 (Tex. 1964) ("[T]he courts have consistently recognized that the Commission must be given discretion in administering the oil and gas statutes."). Among other matters related to oil and gas production, the Legislature charges the Commission with making and enforcing "rules and orders for the conservation of oil and gas and prevention of waste of oil and gas." TEX. NAT. RES. CODE § 85.201.[14]

As the Commission argues, nothing in any of the Commission's enabling acts grants the Commission authority over matters related to traffic safety. Rather, each of these statutory provisions make clear that the Commission is the agency charged with administering laws related to oil and gas production. *See R.R. Comm'n v. Sterling Oil & Ref. Co.*, 218 S.W.2d 415, 418 (Tex. 1949) ("The Legislature realized the great value of oil and gas and the importance of the task and

[14] *See also id.* § 85.202(b) ("The commission shall do all things necessary for the conservation of oil and gas and prevention of waste of oil and gas and may adopt other rules and orders as may be necessary for those purposes."); § 86.041 ("The commission has broad discretion in administering the provisions of this chapter and may adopt any rule or order in the manner provided by law that it finds necessary to effectuate the provisions and purposes of this chapter.").

duty placed on the Railroad Commission to conserve same for the use of the public, and by many provisions of the statutes full power is given the Railroad Commission to prevent the waste of oil and gas."). Further, it is "utterly impossible for the Legislature to meet the demands of every detail in the enactment of laws relating to the production of oil and gas . . . . The Legislature . . . has authorized the Railroad Commission to handle the details relating to the preservation and conservation of the natural resources of the State." *Corzelius v. Harrell*, 186 S.W.2d 961, 964 (Tex. 1945). The Commission must have discretion in determining the minutiae of its statutory mandates.

Here, Texas Citizens raised arguments concerning the impact of large trucks on dirt roads, inadequate road width to handle truck traffic, and safety concerns related to the truck traffic. Given the Commission's institutional focus on matters concerning oil and gas production, it is reasonable for the Commission to decline to consider matters beyond its administrative expertise. This is especially the case given the limitless number of factors the Commission may need to consider in evaluating an injection well permit if the Commission is required to study any potential subsidiary matter bearing on the public interest, such as truck traffic in this case. As Texas Citizens conceded at oral argument, it does not merely want for the Commission to examine matters related to truck traffic, but rather any factor that might conceivably touch on a broad definition of "public interest." In opposition to an injection well, a creative opponent could assert any number of concerns impacting the public interest entirely unrelated to the Commission's express legislative directives.

Under Texas Citizens and the court of appeals' approach, the Commission would have to consider and weigh a limitless number of factors beyond the Commission's institutional competence.[15]

The Commission's purpose is to "do all things necessary for the conservation of oil and gas and prevention of waste of oil and gas." TEX. NAT. RES. CODE § 85.202(b). As the agency charged with administering the state's oil and gas laws, it is reasonable for the Commission to refuse to consider traffic-safety evidence in its public interest analysis.[16]

3. Commission Practice in Weighing the "Public Interest"

The Commission finally argues that in the half-century since the Legislature first promulgated the requirement that it weigh the public interest in evaluating an injection well permit, it has never considered traffic-safety concerns. The Commission urges that its long-standing construction of the term "public interest" is especially entitled to judicial deference. Citing an Amarillo Court of Appeals' opinion, Texas Citizens counters that, at least on one occasion, the Commission did, in fact, consider traffic-safety evidence. The Amarillo Court of Appeals' decision, however, does not support Texas Citizens' assertion. In that case, as in the instant dispute, property owners protested

---

[15] As Justice Pemberton noted in his concurrence to the denial of en banc review in the court of appeals, there is a "virtually infinite range of considerations" that could bear upon the public interest inquiry. 254 S.W.3d at 503 (Pemberton, J., concurring in denial of reconsideration en banc). In his concurrence to the denial of en banc review, Justice Waldrop also opined that the term public interest "could well have been intended to be broad enough to allow the Commission to address the myriad possible circumstances that might be presented in an injection well permit application." *Id.* at 507 (Waldrop, J., concurring in denial of reconsideration en banc). Nonetheless, both justices ultimately concluded the statutory scheme did not demonstrate a legislative intent to limit the Commission's statutory authority or jurisdiction so as to preclude its consideration of traffic-safety issues.

[16] We note that the Legislature has granted other entities express statutory authority over the regulation of traffic-related concerns. *See, e.g.*, TEX. TRANSP. CODE § 251.151 (granting county commissioners court the authority to "regulate traffic on a county road or on real property owned by the county that is under the jurisdiction of the commissioners court"); § 311.001 (granting home-rule municipality control over public highways, streets, and alleys of the municipality). We need not consider the potential intersection of another entity's regulation of traffic-safety issues with the Commission's grant of an injection well permit as that issue is not before us.

a proposed injection well in a contested hearing before the Commission, arguing that the well would not comport with the public interest because of public-safety concerns. *Berkley v. R.R. Comm'n of Tex.*, 282 S.W.3d 240, 244 (Tex. App.—Amarillo 2009, no pet.). Following the Austin Court of Appeals' holding in the instant case, the Amarillo Court of Appeals explained that safety concerns "are indicia that should be considered by the Commission when assessing public interests." *Id.* In *Berkley*, however, there is no indication the Commission considered traffic-safety evidence in its decision; instead, the Commission found the proposed injection well would serve the public interest for similar reasons as those articulated in the order here. *Id.*[17]

We agree with the Commission that an agency's long-standing construction of a statute, especially in light of subsequent legislative amendments, is particularly worthy of our deference. *See Stanford v. Butler*, 181 S.W.2d 269, 273 (Tex. 1944) (explaining that an agency's construction of a statute it is charged with enforcing is "worthy of serious consideration as an aid to interpretation, particularly where such construction has been sanctioned by long acquiescence") (citations omitted); *see also Pub. Util. Comm'n of Tex. v. City Pub. Serv. Bd. of San Antonio*, 53 S.W.3d 310, 324 (Tex. 2001).[18] The Commission has declined to consider public-safety evidence in its public interest analysis for almost fifty years, and Texas Citizens provides no authority to the contrary. Had the Legislature disagreed with the Commission's construction of "public interest," it could have

[17] The *Berkley* decision was also rendered more than a year after the court of appeals' decision in this case, so it is possible that, even if the Commission did weigh public-safety factors, it was doing so as required by the Austin Court of Appeals' holding.

[18] Because the Commission has long interpreted the public interest finding to not include traffic-safety issues, we need not consider the manner in which the Commission can potentially later revise its interpretation.

amended the Act to require the Commission to take a broader view of the term. *See Stanford*, 181 S.W.2d at 273–74. We will not judicially amend the Act in the manner Texas Citizens proposes.

IV. Conclusion

The court of appeals failed to grant deference to the Commission's interpretation of "public interest" in section 27.051(b)(1) of the Water Code and instead held the Commission abused its discretion in its construction of the statute. Because we conclude the Commission's interpretation of the phrase "public interest" is reasonable and in accord with the plain meaning of the statute, we hold the court of appeals erred in refusing to defer to the Commission's construction of the term.

Accordingly, we reverse the court of appeals' judgment and render judgment for the Commission and Pioneer in accordance with the trial court's original judgment.

OPINION DELIVERED: March 11, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0497

RAILROAD COMMISSION OF TEXAS AND PIONEER EXPLORATION, LTD., PETITIONERS,

v.

TEXAS CITIZENS FOR A SAFE FUTURE AND CLEAN WATER AND JAMES G. POPP, RESPONDENTS

ON PETITION FOR REVIEW FROM THE COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued April 14, 2010

CHIEF JUSTICE JEFFERSON, joined by JUSTICE WILLETT and JUSTICE LEHRMANN, concurring.

I concur in the Court's judgment, but I write separately because the statute at issue in this case unambiguously precludes the Railroad Commission ("Commission") from considering traffic safety factors as part of its public interest inquiry in the permitting of oil and gas waste injection wells.

As the Court and the parties attest, ___ S.W.3d at ___, "public interest" is a broad term, the scope of which is difficult to determine with precision. But the fact that a term may admit of different meanings, and may be ambiguous as to some conceivable set of facts, does not mean that it is ambiguous as to every proposed reading. The potential breadth of a statutory term does not

prevent us from holding that a party's proposed construction is unambiguously precluded. *See* 2A NORMAN J. SINGER & J.D. SHAMBIE SINGER, SUTHERLAND ON STATUTES AND STATUTORY CONSTRUCTION § 45:1 (7th ed. 2007) (noting that the object of statutory interpretation is to determine a statute's "correct application *in a particular situation*" (emphasis added)).

The Commission relies principally on *Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc.*, 467 U.S. 837 (1984), in urging us to defer to its interpretation of the statute. While we frequently defer to administrative agencies' statutory interpretations, we do so principally when the relevant statute is ambiguous. *See Fiess v. State Farm Lloyds*, 202 S.W.3d 744, 747 (Tex. 2006) (noting that "the language at issue must be ambiguous" before we grant the agency's interpretation deference). Here, I believe the statute unambiguously makes clear that, in this context, "public interest" cannot include traffic safety factors.

Chapter 27 of the Water Code regulates the permitting of injection wells. The Commission is charged with permitting injection wells for the disposal of oil and gas waste, while the Texas Commission on Environmental Quality ("TCEQ") is charged with permitting injection wells for the disposal of industrial or municipal waste. TEX. WATER CODE § 27.011 (granting TCEQ the power to regulate injection wells for the disposal of industrial and municipal waste); *id.* § 27.031 (granting the Commission the power to regulate injection wells for the disposal of oil and gas waste). The Code mandates consideration by the agencies of a number of factors in deciding whether to grant a permit application. Most relevantly, both must consider whether the proposed well "is in the public interest." *Id.* § 27.051(a)(1); *id.* § 27.051(b)(1). The Commission is directed to consider a number of other factors, all of which have to do with the protection of natural resources and the regulation

of the oil and gas industry. *See id.* § 27.051(b). TCEQ is directed to consider a similar list of factors, to which is added one crucial provision: a mandate that TCEQ consider traffic safety in granting injection well permits. *Id.* § 27.051(a)(6). The significance of this provision is twofold. First, had the Legislature intended for the Commission to consider traffic safety factors in permitting wells, it would have included the same express language among the Commission's charges as it did among TCEQ's. Second, the portion of the statute dealing with TCEQ, unlike that dealing with the Commission, contains a partial definition of the term "public interest." TCEQ, in considering the public interest, "shall consider, but shall not be limited to the consideration of" several factors bearing on the protection of natural resources and the environment. *Id.* § 27.051(d). The directive to consider traffic safety is not made part of that public interest inquiry. This suggests that the Legislature, even as it required TCEQ to consider traffic safety factors, did not want that inquiry to be part of a consideration of the public interest. Rather, public interest, in the context of the statute governing both TCEQ and the Commission, is limited to a consideration of factors consistent with the chapter's purpose: "to maintain the quality of fresh water in the state to the extent consistent with the public health and welfare and the operation of existing industries, taking into consideration the economic development of the state." *Id.* § 27.003.

We do not defer to agency interpretations of unambiguous statutes. Although I agree with the Commission that it need not consider traffic safety when permitting injection wells, I do so because chapter 27 of the Water Code so requires. The principle behind the Court's holding would require deference to a future Commission's decision that denied a permit based on the consideration of such traffic safety factors as the presence of trucks hauling saltwater on narrow neighborhood

roads. I believe, to the contrary, that the statute's language and context preclude such an interpretation as a matter of law. Because there is no legitimate role for deference here, and because the statute prohibits consideration of traffic safety in the Commission's decision to issue injection permits, I concur in the Court's judgment.

OPINION DELIVERED: March 11, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0523

TEXAS LOTTERY COMMISSION, PETITIONER,

v.

FIRST STATE BANK OF DEQUEEN, STONE STREET CAPITAL, INC., AND CLETIUS L. IRVAN, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued December 16, 2009

JUSTICE JOHNSON delivered the opinion of the Court.

This case arises because provisions of the Texas Uniform Commercial Code (UCC) and the Texas Lottery Act conflict as to whether installment payments of a lottery prize are assignable. The primary issues are whether the Commission has sovereign immunity from suit and whether the Lottery Act's prohibition against transferring the last two installments of a prize are negated by the UCC.

Cletius Irvan, a Texas Lottery prizewinner, assigned his final two annual installment prize payments as part of a financial arrangement by which he was to pay a bank debt. The Lottery Commission refused to recognize the assignment because the Lottery Act prohibits assignments of installment payments due within the final two years of the prize payment schedule. Irvan and other

parties to the assignment sought a declaratory judgment that the UCC permits such assignments and specifically renders conflicting provisions of the Lottery Act ineffective. The trial court and court of appeals held that the UCC prevailed and the assignments were permitted. We agree and affirm the court of appeals' judgment.

I. Background

A. The Statutory Conflict

When the Lottery Act was first enacted, lottery prizes generally could not be assigned, and to the extent they could be assigned, the assignment had to be pursuant to an "appropriate judicial order" that resolved a controversy involving the prize winner. *See* Act of Aug. 12, 1991, 72nd Leg., 1st C.S., ch. 6, § 2, 1991 Tex. Gen. Laws 197, 218 (current version at TEX. GOV'T CODE § 466.406). In 1999, the Act was amended and restrictions on assignment of prizes were relaxed. Act of May 30, 1999, 76th Leg., R.S., ch. 1394, §§ 2, 4, 1999 Tex. Gen. Laws 4717, 4717-18. The amended provisions authorized prize winners to assign all but the last two installment prize payments if certain requirements were met.[1] TEX. GOV'T CODE § 466.410(a). Under the amended Act, however, "prize payments due within the final two years of the prize payment schedule may not be assigned." *Id.*

[1] The requirements are not relevant to disposition of this appeal, but they include: (1) approval of the assignments by a district court in Travis County, (2) service of the petition seeking approval on the executive director of the Lottery Commission, (3) the assignment being in writing, and (4) the assignor providing an affidavit stating that he is of sound mind, is over 18 years of age, has been advised regarding the assignment by independent legal counsel, has had the opportunity to receive independent financial advice, and has been provided a disclosure stating the payments being assigned, the purchase price being paid, the rate of discount to the present value of the prize, and the amount of closing fees. TEX. GOV'T CODE § 466.410(b).

The apparent statutory conflict in this case arises because thirteen days before amending the Lottery Act in 1999 the Legislature amended the UCC and included "winnings in a lottery or other game of chance operated or sponsored by a state" as part of the definition of "account." Act of May 17, 1999, 76th Leg., R.S., ch. 414, § 1.01, 1999 Tex. Gen. Laws 2639, 2640 (codified at TEX. BUS. & COM. CODE § 9.102(a)(2)(viii)). Under the UCC, accounts are assignable. *See* TEX. BUS. & COM. CODE § 9.406(a). The UCC amendments, however, did not parallel the Lottery Act amendments that prohibited assignment of the last two installment payments of a lottery prize. To the contrary, the UCC reinforced the assignable character of accounts by specifying that rules of law, statutes and regulations purporting to prohibit or restrict assignment of accounts are ineffective:

> [A] rule of law, statute, or regulation that prohibits, restricts, or requires the consent of a government, governmental body or official, or account debtor to the assignment or transfer of, or creation of a security interest in, an account or chattel paper is ineffective to the extent that the rule of law, statute, or regulation:
>
> > (1) prohibits, restricts, or requires the consent of the government, governmental body or official, or account debtor to the assignment or transfer of, or the creation, attachment, perfection, or enforcement of a security interest in, the account or chattel paper . . . .

Id. § 9.406(f). The amendments to the UCC were effective in 2001. In 2001, section 9.406(f) was amended in part and reenacted; the provisions making conflicting statutes ineffective were not changed by the amendment. *See* Act of May 17, 2001, 77th Leg., R.S. ch. 705, § 11, 2001 Tex. Gen. Laws 1403, 1405 (codified at TEX. BUS. & COM. CODE § 9.406(f)).

B. Facts

Cletius Irvan won a Texas Lottery prize in 1995. The prize was payable in twenty annual installments of just over $440,000 each, with the final two payments to be made in 2013 and 2014. After the Legislature amended the Act so prize payments could be assigned, Irvan assigned his rights to all but the last two of his prize payments in exchange for a lump sum.[2] He later became indebted to First State Bank of DeQueen (FSB DeQueen). Arrangements were made in 2006 for Irvan to pay the debt through a common-law Composition of Creditors proceeding in Arkansas. The creditors' arrangement provided for Irvan to assign the rights to his final two annual lottery payments to Stone Street Capital, which would in turn assign the rights to Great-West Life and Annuity. In consideration for assigning his rights, Irvan was to receive a lump sum of $308,032, out of which he would pay FSB DeQueen. The arrangement was approved by an Arkansas court. FSB DeQueen notified the Lottery Commission of the assignment and filed an application in Travis County to register the Arkansas judgment approving the arrangement. *See* TEX. CIV. PRAC. & REM. CODE § 35.003. The Commission advised FSB DeQueen and Irvan that it did not recognize the validity of the Arkansas judgment and it intended to make the final prize payments to Irvan.

FSB DeQueen, Irvan, and Stone Street Capital (collectively, FSB) filed suit pursuant to the Declaratory Judgments Act (DJA) seeking declaratory and injunctive relief. *See id.* §§ 37.001-.011. Specifically, FSB sought declaratory judgment that (1) the final Arkansas order is effective as a Travis County judgment, (2) Section 9.406(c) of the UCC renders Lottery Act sections 466.406 and 466.410 ineffective, (3) the assignments of the final prize payments from Irvan to Stone Street and

[2] Irvan made two assignments to the same company. The record is not clear whether he received one or two lump sum payments.

from Stone Street to Great-West are enforceable, and alternatively, (4) the Arkansas Final Order is an "appropriate judicial order pursuant to which the Commission shall make the final prize payments to Great-West." *See* TEX. GOV'T CODE § 466.406(f) ("A prize to which a winner is otherwise entitled may be paid to any person under an appropriate judicial order."). FSB also requested the court to enjoin the Commission and to require it to make the final lottery payments to Great-West.

FSB moved for partial summary judgment on its claim that the UCC renders the anti-assignment provisions of the Lottery Act ineffective. The trial court granted the motion and declared that UCC sections 9.406 and 9.102 render Lottery Act sections 466.406 and 466.410 ineffective to the extent those sections purport to restrict or prohibit assignment of prize payments. At the parties' request, the trial court severed the UCC claim and the Commission appealed the summary judgment. The court of appeals affirmed. 254 S.W.3d 677.

In this Court, the Commission seeks reversal of the court of appeals judgment on the bases that: (1) the Commission has sovereign immunity from suit, thus the appeal and suit should be dismissed for lack of jurisdiction; (2) under the UCC, conflicts should be resolved in favor of the Lottery Act because the act is a consumer protection law; and (3) under established canons of statutory interpretation regarding conflicting statutes, the Lottery Act controls.[3] We disagree with the Commission and affirm the judgment of the court of appeals.

II. Jurisdiction

[3] The Commission also, in a footnote, urges that the UCC does not apply because it is inapplicable to assignments undertaken to satisfy a preexisting debt such as Irvan's debt to FSB DeQueen. The Commission does not cite authority for nor present argument to support its position. We decline to make its case for it. *See* TEX. R. APP. P. 55.2(i).

The Commission first argues that it has sovereign immunity from suit so the appeal and suit should be dismissed for lack of jurisdiction. It urges that this is an *ultra vires* suit which must be brought against a state official and it cannot be brought against the Commission because the Commission is a governmental entity. *See City of El Paso v. Heinrich*, 284 S.W.3d 366, 372-73 (Tex. 2009). FSB counters that this appeal involves a challenge to the validity of a statute and the DJA waives the Commission's immunity as to such claims. We agree with FSB. As we explain below, the claim in this appeal is not one involving a government officer's action or inaction, but is a challenge to a statute. Thus this is not an *ultra vires* claim to which a government officer must be a party.

An *ultra vires* suit is one to require a state official to comply with statutory or constitutional provisions. *Id.* at 372. In *Heinrich* we distinguished between claims seeking declaratory relief in an *ultra vires* suit, which must be brought against governmental officials, and suits challenging the validity of an ordinance or statute. *Id.* at 373 n.6 ("For claims challenging the validity of ordinances or statutes . . . the Declaratory Judgment Act requires that the relevant governmental entities be made parties, and thereby waives immunity." (citing TEX. CIV. PRAC. & REM. CODE § 37.006(b))). While FSB filed an initial claim challenging Commission actions and requesting the Commission be required to comply with statutory provisions, that is not the claim at issue here. FSB asserted in its pleadings that the Commission did not recognize the validity of the final order filed in Travis County and refused to acknowledge and comply with it, but that the Act authorized the Commission to accept and comply with the assignments. FSB requested a declaratory judgment that the final order was an appropriate judicial order pursuant to which the Commission should make payments to

Great-West. It also sought a judgment enjoining the Commission to make payments to Great-West. Those claims were severed from the question ruled on by the trial court and at issue here: whether UCC sections 9.406 and 9.102 render Texas Government Code sections 466.406 and 466.410 ineffective to the extent those sections restrict or prohibit the assignment of Texas Lottery prize payments. FSB asserts that immunity does not apply because, unlike the plaintiff in *Heinrich*, it is not challenging an individual's actions under a statute, but is challenging the validity of the statute itself. We agree.

> The Declaratory Judgments Act
>
> > expressly provides that persons may challenge ordinances or statutes, and that governmental entities must be joined or notified. Governmental entities joined as parties may be bound by a court's declaration on their ordinances or statutes. The Act thus contemplates that governmental entities may be—indeed must be—joined in suits to construe their legislative pronouncements.

Tex. Educ. Agency v. Leeper, 893 S.W.2d 432, 446 (Tex. 1994).[4]

The Commission also argues that the DJA does not waive immunity in this case because it only waives immunity of a municipality, not a state entity. The Commission points to Civil Practice and Remedies Code section 37.006(b), which states that "[i]n any proceeding that involves the validity of a municipal ordinance . . . the municipality must be made a party." But the Court in *Leeper* did not rely on section 37.006 when it concluded that "governmental entities" are to be joined in suits to construe legislative pronouncements. Rather, the Court concluded that because the DJA permits statutory challenges and governmental entities may be bound by those challenges, the DJA

[4] *See also Heinrich*, 284 S.W.3d at 373 n.6 (citing Texas Civil Practice and Remedies Code section 37.006(b) and noting that when the *validity* of ordinances or statutes is challenged, the DJA waives immunity to the extent it requires relevant governmental entities be made parties).

contemplates entities must be joined in those suits. *Leeper*, 893 S.W.2d at 446. We have subsequently applied the holding of *Leeper* to different governmental entities. *Heinrich*, 284 S.W.3d at 373 n.6; *Wichita Falls State Hosp. v. Taylor*, 106 S.W.3d 692, 697-98 (Tex. 2003); *Tex. Natural Res. Conservation Comm'n v. IT-Davy*, 74 S.W.3d 849, 859-60 (Tex. 2002). Accordingly, we disagree that the DJA only waives the immunity of municipalities.

Next, the Commission asserts that the DJA does not waive immunity because it applies only to suits involving constitutional invalidation and not to those involving statutory interpretation. But the language in the DJA does not make that distinction. In *Leeper*, the issue was whether a mandatory school attendance private school exemption statute applied to children taught at home. *Leeper*, 893 S.W.2d at 433. While the plaintiffs also claimed that enforcement of the statute violated their constitutional rights, the Court did not reach the constitutional issue. *Id.* at 446. Rather, the DJA discussion was in the context of a statutory clarification. *Id.*

Because the claim at issue here is not one involving a government officer's action or inaction, but is a challenge to a statute, this is not an *ultra vires* claim to which a government officer should have been made a party. The decision on this claim may ultimately impact actions taken by officers of the Commission, but that does not deprive the trial court of jurisdiction. *Id.* at 445 (noting that the DJA allows courts to declare relief "whether or not further relief is or could be claimed"). The trial court properly exercised jurisdiction over this claim.

We next turn to the question of whether the UCC impacts the Lottery Act's anti-assignment provisions, and if so, how.

III. Construing the Statutes

We review issues of statutory construction de novo. *City of San Antonio v. City of Boerne*, 111 S.W.3d 22, 25 (Tex. 2003). In construing statutes our primary objective is to give effect to the Legislature's intent. *Galbraith Eng'g Consultants, Inc. v. Pochucha*, 290 S.W.3d 863, 867 (Tex. 2009). We rely on the plain meaning of the text as expressing legislative intent unless a different meaning is supplied by legislative definition or is apparent from the context, or the plain meaning leads to absurd results. *See City of Rockwall v. Hughes*, 246 S.W.3d 621, 625-26 (Tex. 2008). We presume the Legislature selected language in a statute with care and that every word or phrase was used with a purpose in mind. *See In re Caballero*, 272 S.W.3d 595, 599 (Tex. 2008); *Chastain v. Koonce*, 700 S.W.2d 579, 582 (Tex. 1985).

A. Does the Lottery Act Provide a Different Rule for Consumers?

The UCC authorizes state lottery winners to freely assign their winnings. TEX. BUS. & COM. CODE § 9.406(a) (permitting account assignments); *see id.* § 9.102(a)(2)(viii) (including "winnings in a lottery or other game of chance operated or sponsored by a state" in the definition of "Account"). Citing section 9.201 of the UCC, the Commission asserts that Chapter 9 of the UCC conflicts with the Lottery Act and the Lottery Act controls.

Section 9.201 of the UCC provides, in relevant part:

> (b) A transaction subject to this chapter is subject to any applicable rule of law that establishes a different rule for consumers . . . .
>
> (c) In case of a conflict between this chapter and a rule of law, statute, or regulation described in Subsection (b), the rule of law, statute, or regulation controls.

Id. § 9.201. The Commission asserts sections 9.201(b) and (c) make it clear that any conflict between Article 9 and consumer protection laws must be resolved against Article 9 and that the

Lottery Act and its anti-assignment provisions are unquestionably consumer protection provisions. FSB counters that (1) the Lottery Act provision does not "establish a different rule of law for consumers" because neither the Lottery Act nor the UCC refers to lottery prize winners or assignors as "consumers," (2) the Lottery Act's anti-assignment provisions protect lottery *winners* who are not consumers, but rather who are account creditors who sell their rights, and (3) a lottery winner such as Irvan who sells his right to receive payments is not purchasing or acquiring anything, thus he cannot be a consumer as to the transaction. We agree with FSB that the Lottery Act does not provide a different rule for consumers within the meaning of section 9.201 of the UCC.

Chapter 9 of the UCC does not provide a definition for "consumer," but the term is defined in Chapter 1 as "an individual who enters into a transaction primarily for personal, family, or household purposes." *Id.* § 1.201(b)(11). The Chapter 1 definitions apply to all chapters of the UCC except when the context in which they are used requires otherwise or a different definition is provided by a particular chapter. *Id.* § 1.201(a). Neither of the exceptions applies here, thus the definition in section 1.201(b)(11) applies.

While the Lottery Act establishes a rule regarding lottery prize assignments different from the provisions in the UCC, the Lottery Act's rule is not specifically directed at or limited to individuals who enter into a transaction primarily for personal, family, or household purposes. Any purchaser of a lottery ticket, whether an individual or some type of entity such as a partnership, trust, or corporation, purchases the ticket subject to the provisions of the Lottery Act. TEX. GOV'T CODE § 466.252 ("By purchasing a ticket in a particular lottery game, a player agrees to abide by and be bound by the commission's rules, including the rules applicable to the particular lottery game

involved."). The Lottery Act provides that "[a] person may assign, in whole or in part, the right to receive prize payments that are paid by the commission" and then sets out what is required of the assignor. *Id.* § 466.410. The Legislature has defined the term "person" to include "[a] corporation, organization, government or governmental subdivision or agency, business trust, estate, trust, partnership, association, and any other legal entity." *Id.* § 311.005(2). Nothing in section 466.410 indicates the assignment provisions are applicable only when an individual purchases a ticket, much less only when an individual purchases a ticket for purposes of personal, family, or household use. *See* TEX. BUS. & COM. CODE § 1.201(b)(11). Nor does the Lottery Act limit the applicability of the assignment provisions and restrictions to individuals such as Irvan, even if they are entering the assignment transaction to receive and use money for personal, family, or household purposes. To the contrary, the Lottery Act contemplates that a prizewinner, and therefore a person entitled to receive and assign—or restricted from assigning—prize payments, may be "persons" who are not individuals or consumers. *See* TEX. GOV'T CODE § 466.406(b). Furthermore, the Lottery Act refers to "individuals" in several sections. *See, e.g.*, *id.* § 466.3051 (providing that an individual younger than eighteen years of age may not purchase a lottery ticket); *id.* § 466.409 (providing that certain individuals are not eligible to receive lottery prizes). The fact that the Legislature made certain provisions of the Act applicable only to individuals indicates that its use of the word "person" rather than "individual" in section 466.410 was intentional. *See Tex. Mun. Power Agency v. Pub. Util. Comm'n of Tex.*, 253 S.W.3d 184, 193 n.20 (Tex. 2007); *see also Harris County Hosp. Dist. v. Tomball Reg'l Hosp.*, 283 S.W.3d 838, 842 (Tex. 2009) (noting that we examine the Legislature's words in context of the statute as a whole and do not consider words or parts of the statute in

isolation). So, while section 466.410 applies to individuals who assign or desire to assign their prize payments for personal, family, or household purposes, the use of "person" in context of section 466.410 does not require a different definition than that prescribed by the Code Construction Act. And, we do not see how use of the Legislature's definition yields an absurd result. Under the circumstances, we are bound to construe the term "person" to mean what the Legislature defined it to mean, and it is not limited to consumers as defined by the Lottery Act, the UCC, or any other applicable definition of consumer. Moreover, if section 9.201(b)'s reference to a statute or rule that establishes a different rule for consumers encompasses statutes and rules applying equally to both consumers and non-consumers, as opposed to only consumers, then all conflicting laws or rules that apply to consumers would be subject to the exception, and the exception would swallow the UCC's overarching rule that accounts are assignable.

The Commission stresses that a transaction by a consumer occurred in this case: Irvan assigned his future lottery winnings in return for an up-front lump sum payment—a transaction primarily for personal, family, or household purposes. But even assuming Irvan's assignment was a consumer *transaction*, the UCC does not address individual transactions undertaken by consumers. It addresses rules of law, statutes, and regulations that apply broadly. Section 466.410 establishes a rule for all persons, not just individuals involved in Lottery Act transactions primarily for personal, family, or household purposes. Read in context, we do not believe section 466.410 is a statute or rule of law "that establishes a different rule for consumers" within the meaning of section 9.201(b).

B. Do Canons of Construction Apply?

The Commission asserts that the UCC does not render the Lottery Act assignment restrictions in sections 466.406 and 466.410 ineffective based on established canons of statutory interpretation. It points to the Code Construction Act, which provides guidance for courts when they seek to determine the Legislature's intent. Specifically, the Commission points to the following as legislative guidance that should be used here: (1) an entire enacted statute is presumed to be effective, TEX. GOV'T CODE § 311.021(2); (2) if statutes are irreconcilable, the statute latest in date of enactment prevails, *id.* § 311.025(a); and (3) a specific statutory provision prevails as an exception over a conflicting general provision. *Id.* § 311.026.

FSB argues that even though the Legislature's guidance for construing statutes would confirm the conclusions of the trial court and court of appeals if they were applied, applying the canons is inappropriate because in the UCC the Legislature specifically provided the means for resolving conflicts between the UCC and other statutes such as the Lottery Act. We agree with FSB that because the Legislature expressly and unambiguously set out the method for resolving conflicts between the UCC and other statutes, it would be improper to go outside the language of the statute and use canons of construction to resolve the question. *City of Rockwall*, 246 S.W.3d at 626 ("When a statute's language is clear and unambiguous, it is inappropriate to resort to rules of construction or extrinsic aids to construe the language."). Courts "do not lightly presume that the Legislature may have done a useless act." *Liberty Mut. Ins. Co. v. Garrison Contractors, Inc.*, 966 S.W.2d 482, 485 (Tex. 1998). But we must take statutes as we find them and first and primarily seek the Legislature's intent in its language. *St. Luke's Episcopal Hosp. v. Agbor*, 952 S.W.2d 503, 505 (Tex. 1997). Courts are not responsible for omissions in legislation, but we are responsible for a true and fair

interpretation of the law as it is written. *Id.* Additionally, "[i]t is at least theoretically possible that legislators—like judges or anyone else—may make a mistake." *Brown v. De La Cruz*, 156 S.W.3d 560, 566 (Tex. 2004). Even when it appears the Legislature may have made a mistake, courts are not empowered to "fix" the mistake by disregarding direct and clear statutory language that does not create an absurdity. *See id.* (citing *Touche Ross & Co. v. Redington*, 442 U.S. 560, 579 (1979)). And although some might believe precluding lottery prize winners from assigning all or some of their installment payments is the better policy choice, we do not see how it is an absurdity to construe this clear statutory language to mean what it says. Here the result is that lottery winners are allowed to assign what no one contests is their property, even at the risk of their making poor assignment choices.

The UCC specifies that state lottery winnings are accounts and are assignable, TEX. BUS. & COM. CODE § 9.406(a), but the Lottery Act prohibits assignments of the last two prize installments. TEX. GOV'T CODE §§ 466.406, 466.410. While these statutory provisions conflict, the Legislature also explicitly provided that "a rule of law, statute, or regulation that prohibits [or] restricts" an assignment of a prize won in a state lottery "is ineffective." TEX. BUS. & COM. CODE § 9.406(f). Giving effect to the clear legislative language about how to resolve conflicts regarding assignments results in there being no conflict to resolve because the Lottery Act's anti-assignment provisions are ineffective insofar as they conflict with the UCC.

Moreover, the Commission's argument that we should not construe the UCC to render the Lottery Act anti-assignment provisions useless turns on itself. If we construe the Lottery Act's anti-assignment restrictions as valid because otherwise their enactment would be a useless legislative

action, we render UCC section 9.406(f) useless as it applies here. Under that construction section 9.406(f) would be useless legislative action, at least in part, because that section clearly was enacted to address situations in which the Legislature enacted a conflicting statute.

The Commission points to cases from other jurisdictions holding that statutory restrictions on lottery assignments are effective. In three of the cases the facts and statutes are distinguishable from those at issue here. *See In re Guluzian*, No. BK 04-10390-JMD, 2004 WL 2813523, at *3 (Bankr. D.N.H. Dec. 3, 2004) (noting that legislation amending the UCC assignment provisions to include lottery payments also amended the lottery statute to provide that the lottery prize assignment prohibition prevailed over UCC provisions); *In re Duboff*, 290 B.R. 652, 656 (Bankr. C.D. Ill. 2003) (holding that UCC provision was inapplicable because it was not enacted until nineteen months after the assignment was executed); *Midland States Life Ins. Co. v. Cardillo*, 797 N.E.2d 11, 17-18 (Mass. App. Ct. 2003) (noting that at the same time the UCC was amended, the lottery statute was amended to provide that it prevailed over UCC provisions).

In two cases factually similar to the one before us, courts held that statutory restrictions on lottery prize assignments prevailed over UCC provisions declaring such restrictions ineffective. *See Stone St. Capital, LLC v. Cal. State Lottery Comm'n*, 80 Cal. Rptr. 3d 326, 340 (Cal. Ct. App. 2008); *Va. State Lottery Dept. v. Settlement Funding, LLC*, No. CH-2003-183848, 2005 WL 3476682, at *3 (Va. Cir. Ct. Nov. 7, 2005). But in both those cases, the courts relied on statutory construction aids to reach their conclusions. *Stone St. Capital*, 80 Cal. Rptr. 3d at 333 (noting that under California rules of statutory construction, a more specific statute controls over a general statute, regardless of which statute was passed earlier); *Va. State Lottery Dep't*, 2005 WL 3476682, at *2-3

(applying the rule of statutory construction that a specific statute applies over a general one). While we have no argument with how those courts resolved their statutory conflicts, neither court discussed resolving the conflict by initially and primarily looking at the language in the statutes themselves. In contrast, we construe statutes by first looking to the statutory language for the Legislature's intent, and only if we cannot discern legislative intent in the language of the statute itself do we resort to canons of construction or other aids such as which statute is more specific. *City of Rockwall*, 246 S.W.3d at 626. Under Texas rules of statutory construction, the language of UCC section 9.406 prevails because on its face it manifests clear legislative intent that conflicting statutes are ineffective.

The Commission argues that failing to give effect to the Lottery Act would essentially amount to an impermissible requirement that the Legislature use explicit language to carve out the Lottery Act from the reach of section 9.406; in other words, a requirement of a "magical password." *See Lockhart v. United States*, 546 U.S. 142, 149 (2005) (Scalia, J., concurring) ("When the plain import of a later statute directly conflicts with an earlier statute, the later enactment governs, *regardless* of its compliance with any earlier-enacted requirement of an express reference or other 'magical password.'"). But Justice Scalia was referring to provisions that require Congress to use specific language in order to repeal, limit, or modify a statutory provision. *See id.* Here, UCC section 9.406(f) does not require some specific language to be included in subsequent legislation in order for it to be modified or repealed. Nor does the Commission contend that the Legislature was attempting to repeal or otherwise modify section 9.406(f) when it enacted the prohibition on lottery prize assignments.

Finally, the Commission asserts that we should give serious consideration to the Commission's construction of the Lottery Act, by which it gives full effect to the assignment restrictions. *See Tarrant Appraisal Dist. v. Moore*, 845 S.W.2d 820, 823 (Tex. 1993) ("Construction of a statute by the administrative agency charged with its enforcement is entitled to serious consideration, so long as the construction is reasonable and does not contradict the plain language of the statute."). But here we are not construing the Lottery Act. We are construing the UCC and determining whether it renders sections 466.406 and 466.410 of the Lottery Act ineffective. The Commission does not argue that it is charged with enforcement of the UCC, and even if it were so charged, its interpretation of the UCC contradicts the plain language of that statute. *See id.*

In sum, the language of UCC section 9.406(f) is clear; we need not use a canon of construction to construe it other than the prime canon: we construe statutes by first looking to the statutory language for the Legislature's intent, and only if we cannot discern legislative intent in the language of the statute itself do we resort to canons of construction or other aids such as which statute is more specific. *City of Rockwall*, 246 S.W.3d at 626. Here the statute's unambiguous words disclose the legislative intent: if the Legislature should happen to have enacted, or enacts, a conflicting statute, the conflicting statute is "ineffective to the extent that the . . . statute . . . prohibits [or] restricts" the assignment of an account. TEX. BUS. & COM. CODE § 9.406(f). Section 9.406(f) makes sections 466.406 and 466.410 of the Lottery Act ineffective to the extent they prohibit or restrict Irvan's assignment.

IV. Child Support

Finally, the Commission asserts that holding the UCC prevails over sections 466.406 and 466.410 will inhibit the State's efforts to collect child support because the Lottery Act provisions requiring the Commission to deduct the amount of a child support lien before paying a prize to a child support obligor will also be rendered ineffective. *See* TEX. GOV'T CODE § 466.4075. The argument is substantively similar to the argument that we should use construction aids to resolve the conflict between the statutory provisions; it effectively urges us to disregard the rule that when a statute's language is clear and unambiguous courts do not resort to rules of construction or extrinsic aids to construe the language. *See City of Rockwall*, 246 S.W.3d at 626. We agree that persons who owe child support should pay it. But when the language of a statute is clear, it is not the judicial prerogative to go behind or around that language through the guise of construing it to reach what the parties or we might believe is a better result. *See Harris Cnty. Hosp. Dist. v. Tomball Reg'l Hosp.*, 283 S.W.3d 838, 847 (Tex. 2009).

V. Conclusion

Sections 466.406 and 466.410 of the Lottery Act are ineffective to the extent they restrict or prohibit Irvan's assignment. We affirm the judgment of the court of appeals.

Justice

OPINION DELIVERED: October 1, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0613

NAFTA TRADERS, INC., PETITIONER,

v.

MARGARET A. QUINN, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued October 8, 2009

JUSTICE HECHT delivered the opinion of the Court, in which CHIEF JUSTICE JEFFERSON, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE GREEN, JUSTICE JOHNSON, JUSTICE WILLETT, JUSTICE GUZMAN, and JUSTICE LEHRMANN joined.

CHIEF JUSTICE JEFFERSON filed a concurring opinion, in which JUSTICE WAINWRIGHT and JUSTICE LEHRMANN joined.

"The answer to most questions regarding arbitration 'flow inexorably from the fact that arbitration is simply a matter of contract between the parties.'"[1] Nevertheless, the United States Supreme Court has held in *Hall Street Associates, L.L.C. v. Mattel, Inc.*, that the grounds for vacating or modifying an arbitration award under the Federal Arbitration Act (FAA)[2] "are exclusive"

[1] *Perry Homes v. Cull*, 258 S.W.3d 580, 593 (Tex. 2008) (quoting *First Options of Chi., Inc. v. Kaplan*, 514 U.S. 938, 943 (1995)).

[2] 9 U.S.C. §§ 1-16. All references to the FAA are to these provisions.

and cannot be "supplemented by contract".[3] The principal questions in this case are whether the Texas General Arbitration Act (TAA)[4] likewise precludes an agreement for judicial review of an arbitration award for reversible error, and if not, whether the FAA preempts enforcement of such an agreement. We answer both questions in the negative and consequently reverse the judgment of the court of appeals[5] and remand the case to that court for further proceedings.

I

Petitioner, Nafta Traders, Inc., an international re-distributor of athletic apparel and footwear, terminated its employment of respondent, Margaret A. Quinn, its Vice President of Operations, citing as the basis for its decision a reduction in force due to worsening business conditions. Quinn sued Nafta for sex discrimination in violation of the Texas Commission on Human Rights Act.[6] Nafta's employee handbook included a section captioned "Arbitration", which called for "a dispute arising out of [the] employment relationship . . . or its termination" to be submitted to binding arbitration. The arbitration section did not indicate whether state or federal law would apply, providing only that "[a]ll proceedings shall be conducted in the City of Dallas, State of Texas."[7]

---

[3] 552 U.S. 576, 578 (2008).

[4] TEX. CIV. PRAC. & REM. CODE §§ 171.001-.098. All references to the TAA are to these provisions.

[5] 257 S.W.3d 795 (Tex. App.–Dallas 2008).

[6] TEX. LAB. CODE §§ 21.001-.556.

[7] The section in full read as follows:

"In the event there is a dispute arising out of your employment relationship with the Company or its termination which the parties are unable to resolve through direct discussion or the Complaint Resolution Procedure that would involve a litigable claim, regardless of the kind or type of dispute (excluding insured workers' compensation claims [other than wrongful discharge claims], claims for unemployment insurance, administrative claims before the National Labor Relations Board, the Equal Employment Opportunity Commission or any parallel state or local agency), the parties agree

Nafta moved to compel arbitration under the FAA, which applies to "contract[s] evidencing a transaction involving commerce".[8] Quinn did not object, and the district court signed an agreed order.

The parties then selected an AAA arbitrator, who heard evidence and awarded Quinn $30,000 in back pay, $30,000 in mental anguish damages, $29,031 in "special damages",[9] $104,828 in attorney fees, and costs. A verbatim record was made of the proceedings. Quinn moved the court to confirm the award under the TAA. Nafta moved for vacatur under the FAA, the TAA, the common law, and a provision in the arbitration section of the employee handbook that stated: "The arbitrator does not have authority (i) to render a decision which contains a reversible error of state or federal law, or (ii) to apply a cause of action or remedy not expressly provided for under existing state or federal law." Nafta argued in part that by agreeing to these limits on the arbitrator's authority

---

to submit such dispute to binding arbitration in lieu of pursuing a trial in a court of law.

"The arbitration will be conducted by the American Arbitration Association or other mutually agreeable arbitration service. The arbitrator will be selected by mutual agreement from a list of five, or through alternative strikes from a second list of five. In all other respects, the arbitration process will be conducted in accordance with the American Arbitration Association Employment Arbitration rules with each party's expenses therefrom to be borne by that party unless otherwise determined by the arbitrator. The arbitrator shall be required to state in a written opinion the facts and conclusions of law relied upon to support the decision rendered. The arbitrator does not have authority (i) to render a decision which contains a reversible error of state or federal law, or (ii) to apply a cause of action or remedy not expressly provided for under existing state or federal law. All proceedings shall be conducted in the City of Dallas, State of Texas. The duty to arbitrate described above shall survive the termination of the employee's employment with the Company. The provisions of the Employee Handbook constitute a knowing and voluntary waiver of the parties' rights to a jury trial."

[8] 9 U.S.C. § 2.

[9] While unemployed, Quinn used $6,000 in personal savings, took out a $5,000 loan on her life insurance policy, withdrew $15,000 from her 401(k) plan, incurring a $1,572 penalty, and paid $1,459 COBRA expenses to maintain her health insurance. These amounts comprised the "special damages".

the parties had in effect agreed to expand the narrow scope of judicial review otherwise provided by the TAA and the FAA.

As grounds for vacating the award, Nafta asserted that the arbitrator had applied federal law to Quinn's sex discrimination claim even though she had alleged only a violation of Texas law, and that the evidence did not support a finding of sex discrimination. Regarding damages, Nafta asserted that the attorney fee award was improper, that the "special damages" award was really a double recovery of lost wages, and that the evidence did not support an award of mental anguish damages. Quinn responded that none of the grounds asserted by Nafta is recognized by the TAA or the FAA as a basis for vacating an arbitration award, and that neither the TAA nor the FAA permits the grounds for vacating an arbitration award to be enlarged by agreement. Even if such an agreement were permissible, Quinn argued, the statement in the handbook was too vague and one-sided to be enforced. And finally, she contended, even if the grounds asserted by Nafta could be considered, they should all be rejected as meritless.

The district court issued a brief order simply confirming the arbitrator's award without giving any indication whether it had considered the substance of Nafta's complaints and rejected them or instead had concluded that the TAA or FAA did not permit consideration of such grounds for vacatur. Nafta appealed.[10] After oral argument in the court of appeals but before an opinion had issued, the United States Supreme Court decided *Hall Street Associates, L.L.C. v. Mattel, Inc.*, holding that the FAA's grounds for vacatur and modification "are exclusive" and cannot be

[10] Quinn also appealed from the district court's denial of her claim for attorney fees incurred in the confirmation proceeding. The court of appeals affirmed, and Quinn has not petitioned for review.

"supplemented by contract".[11] Although the court of appeals applied the TAA in this case rather than the FAA, noting that neither Nafta nor Quinn had disputed on appeal that the TAA governed their arbitration,[12] it concluded that similarities between the two statutes weighed heavily in favor of construing the TAA as *Hall Street* had construed the FAA.[13] Accordingly, the court held that "parties seeking judicial review of an arbitration award covered under the TAA cannot contractually agree to expand the scope of that review and are instead limited to judicial review based on the statutory grounds enumerated in the statute."[14]

One such statutory ground is section 171.088(a)(3)(A), that an arbitrator has exceeded his power,[15] and Nafta argued that the arbitrator had exceeded his power by issuing an erroneous award when the arbitration agreement denied him the authority to commit reversible error or apply an action or remedy contrary to law.[16] The court of appeals rejected Nafta's argument because, it explained, while an arbitrator exceeds his power by deciding an issue the parties did not agree to submit to him, he does not exceed his power by deciding matters incorrectly.[17] Moreover, the court said, Nafta could not use section 171.088(a)(3)(A) "to accomplish indirectly what we have already

[22] TEX. CIV. PRAC. & REM. CODE § 171.088(a) ("On application of a party, the court shall vacate an award if: (1) the award was obtained by corruption, fraud, or other undue means; (2) the rights of a party were prejudiced by: (A) evident partiality by an arbitrator appointed as a neutral arbitrator; (B) corruption in an arbitrator; or (C) misconduct or wilful misbehavior of an arbitrator; (3) the arbitrators: (A) exceeded their powers; (B) refused to postpone the hearing after a showing of sufficient cause for the postponement; (C) refused to hear evidence material to the controversy; or (D) conducted the hearing, contrary to Section 171.043, 171.044, 171.045, 171.046, or 171.047, in a manner that substantially prejudiced the rights of a party; or (4) there was no agreement to arbitrate, the issue was not adversely determined in a proceeding under Subchapter B, and the party did not participate in the arbitration hearing without raising the objection."); *cf.* UNIF. ARBITRATION ACT § 23(a), 7 U.L.A. 77-78 (2000) ("Upon [motion] to the court by a party to an arbitration proceeding, the court shall vacate an award made in the arbitration proceeding if: (1) the award was procured by corruption, fraud, or other undue means; (2) there was: (A) evident partiality by an arbitrator appointed as a neutral arbitrator; (B) corruption by an arbitrator; or (C) misconduct by an arbitrator prejudicing the rights of a party to the arbitration proceeding; (3) an arbitrator refused to postpone the hearing upon showing of sufficient cause for postponement, refused to consider evidence material to the controversy, or otherwise conducted the hearing contrary to Section 15, so as to prejudice substantially the rights of a party to the arbitration proceeding; (4) an arbitrator exceeded the arbitrator's powers; (5) there was no agreement to arbitrate, unless the person participated in the arbitration proceeding without raising the objection under Section 15(c) not later than the beginning of the arbitration hearing; or (6) the arbitration was conducted without proper notice of the initiation of an arbitration as required in Section 9 so as to prejudice substantially the rights of a party to the arbitration proceeding.").

[23] TEX. CIV. PRAC. & REM. CODE § 171.091(a) ("On application, the court shall modify or correct an award if: (1) the award contains: (A) an evident miscalculation of numbers; or (B) an evident mistake in the description of a person, thing, or property referred to in the award; (2) the arbitrators have made an award with respect to a matter not

offered, "the court, on application of a party, shall confirm the award."[24] One such ground for vacating an arbitration award is that "the arbitrators . . . exceeded their powers".[25] In arbitration conducted by agreement of the parties, the rule is well established that "[a]n arbitrator derives his power from the parties' agreement to submit to arbitration".[26] As the United States Supreme Court has stated:

> Whether enforcing an agreement to arbitrate or construing an arbitration clause, courts and arbitrators must give effect to the contractual rights and expectations of the parties. In this endeavor, as with any other contract, the parties' intentions control. This is because an arbitrator derives his or her powers from the parties' agreement to forgo the legal process and submit their disputes to private dispute resolution.[27]

Nafta and Quinn agreed that an arbitrator appointed to resolve disputes between them "does not have authority (i) to render a decision which contains a reversible error of state or federal law, or (ii) to

---

submitted to them and the award may be corrected without affecting the merits of the decision made with respect to the issues that were submitted; or (3) the form of the award is imperfect in a manner not affecting the merits of the controversy."); *cf.* UNIF. ARBITRATION ACT § 24(a), 7 U.L.A. 87-88 (2000) ("Upon [motion] made within 90 days after the [movant] receives notice of the award pursuant to Section 19 or within 90 days after the [movant] receives notice of a modified or corrected award pursuant to Section 20, the court shall modify or correct the award if: (1) there was an evident mathematical miscalculation or an evident mistake in the description of a person, thing, or property referred to in the award; (2) the arbitrator has made an award on a claim not submitted to the arbitrator and the award may be corrected without affecting the merits of the decision upon the claims submitted; or (3) the award is imperfect in a matter of form not affecting the merits of the decision on the claims submitted.").

[24] TEX. CIV. PRAC. & REM. CODE § 171.087; *cf.* UNIF. ARBITRATION ACT § 22, 7 U.L.A. 76 (2000) ("After a party to an arbitration proceeding receives notice of an award, the party may make a [motion] to the court for an order confirming the award at which time the court shall issue a confirming order unless the award is modified or corrected pursuant to Section 20 or 24 or is vacated pursuant to Section 23.").

[25] TEX. CIV. PRAC. & REM. CODE § 171.088(a)(3)(A).

[26] *City of Pasadena v. Smith*, 292 S.W.3d 14, 20 (Tex. 2009) (citing *Gulf Oil Corp. v. Guidry*, 327 S.W.2d 406, 408 (Tex. 1959) ("the authority of arbitrators is derived from the arbitration agreement")).

[27] *Stolt-Nielsen S.A. v. AnimalFeeds Int'l Corp.*, 130 S.Ct. 1758, 1773-1774 (2010) (citations and internal quotation marks omitted).

apply a cause of action or remedy not expressly provided for under existing state or federal law." Unless there is some reason to exclude such limitations from the general rule that the parties' agreement determines arbitral authority, Nafta's contention that the arbitrator exceeded his authority raises a ground to vacate the award, and the court of appeals erred in holding to the contrary.

Quinn argues that her agreement to limit the arbitrator's authority is in effect an agreement for broader judicial review of the arbitration award than permitted by the TAA for the same reasons it is not permitted under similar provisions of the FAA, as the United States Supreme Court held in *Hall Street*. Sections 10 and 11 of the FAA specify grounds for vacating,[28] modifying, or correcting[29] an arbitration award that are similar to the TAA's, and like the TAA, section 9 of the FAA mandates confirmation absent such grounds.[30] In *Hall Street*, the parties had tried part of their dispute to the

---

[28] 9 U.S.C. § 10(a) ("In any of the following cases the United States court in and for the district wherein the award was made may make an order vacating the award upon the application of any party to the arbitration — (1) where the award was procured by corruption, fraud, or undue means; (2) where there was evident partiality or corruption in the arbitrators, or either of them; (3) where the arbitrators were guilty of misconduct in refusing to postpone the hearing, upon sufficient cause shown, or in refusing to hear evidence pertinent and material to the controversy; or of any other misbehavior by which the rights of any party have been prejudiced; or (4) where the arbitrators exceeded their powers, or so imperfectly executed them that a mutual, final, and definite award upon the subject matter submitted was not made.").

[29] *Id.* § 11 ("In either of the following cases the United States court in and for the district wherein the award was made may make an order modifying or correcting the award upon the application of any party to the arbitration — (a) Where there was an evident material miscalculation of figures or an evident material mistake in the description of any person, thing, or property referred to in the award. (b) Where the arbitrators have awarded upon a matter not submitted to them, unless it is a matter not affecting the merits of the decision upon the matter submitted. (c) Where the award is imperfect in matter of form not affecting the merits of the controversy. The order may modify and correct the award, so as to effect the intent thereof and promote justice between the parties.").

[30] *Id.* § 9 ("If the parties in their agreement have agreed that a judgment of the court shall be entered upon the award made pursuant to the arbitration, and shall specify the court, then at any time within one year after the award is made any party to the arbitration may apply to the court so specified for an order confirming the award, and thereupon the court must grant such an order unless the award is vacated, modified, or corrected as prescribed in sections 10 and 11 of this title.").

federal district court and then agreed to submit another part to arbitration.[31] They agreed that the court could "enter judgment upon any award" unless "the arbitrator's findings of facts are not supported by substantial evidence, or . . . the arbitrator's conclusions of law are erroneous."[32] The Supreme Court held that this agreement impermissibly enlarged the grounds for vacating or modifying an arbitration award under the FAA.[33]

We must, of course, follow *Hall Street* in applying the FAA, but in construing the TAA, we are obliged to examine *Hall Street*'s reasoning and reach our own judgment. The Supreme Court based its decision on the framework of the FAA and on policy. It found that "textual features" of sections 9, 10, and 11 were "at odds with enforcing a contract to expand judicial review following the arbitration."[34] Because the grounds listed in sections 10 and 11 all "address egregious departures from the parties' agreed-upon arbitration" and "extreme arbitral conduct", the FAA did not, the Court reasoned, "authorize contracting parties to supplement review for specific instances of outrageous conduct with review for just any legal error."[35] Further, the Court observed, section 9 "carries no hint of flexibility"; it "unequivocally tells courts to grant confirmation in all cases, except when one of the 'prescribed' exceptions applies", and does not merely "tell a court what to do just

[34] *Id.* at 586.

[35] *Id.*

in case the parties say nothing else."[36] This construction, the Court added, was consistent with policy favoring limited judicial review:

> Instead of fighting the text, it makes more sense to see the three provisions, §§ 9-11, as substantiating a national policy favoring arbitration with just the limited review needed to maintain arbitration's essential virtue of resolving disputes straightaway. Any other reading opens the door to the full-bore legal and evidentiary appeals that can render informal arbitration merely a prelude to a more cumbersome and time-consuming judicial review process, and bring arbitration theory to grief in post-arbitration process.[37]

We agree with Quinn that while the Supreme Court and the parties in *Hall Street* framed the issue as "expandable judicial review authority",[38] the flip-side is limited arbitral decision-making authority, the aim of Quinn and Nafta's agreement. Though the parties in *Hall Street* did not couch their agreement in terms of limiting the arbitrator's authority to issue a decision unsupported by the law and the evidence, that was certainly the practical effect of what they expressly agreed to — that the court could not "enter judgment" on such a decision. The parties in *Hall Street* attempted to accomplish indirectly the same end that Quinn and Nafta sought directly — a limit on the arbitrator's authority.

Yet the Supreme Court, in holding that under the FAA the grounds for vacating, modifying, or correcting an arbitration award cannot be expanded beyond those listed in sections 10 and 11, did not discuss section 10(a)(4), which like section 171.088(a)(3)(A) of the TAA, provides for vacatur

---

[36] *Id*. at 587.

[37] *Hall St.*, 552 U.S. at 588 (citations, internal quotation marks, and brackets omitted).

[38] *Id*. at 584.

"where the arbitrators exceeded their powers".[39] The omission appears to us to undercut the Supreme Court's textual analysis. When parties have agreed that an arbitrator should not have authority to reach a decision based on reversible error — in other words, that an arbitrator should have no more power than a judge — a motion to vacate for such error as exceeding the arbitrator's authority is firmly grounded in the text of section 10. The Supreme Court's reasoning that an arbitrator's merely legal errors are not the kind of "egregious departures from the parties' agreed-upon arbitration" section 10 addresses loses force when such errors directly contradict the parties' express agreement and deprive them of the benefit of their reasonable expectations.

When parties have agreed to limit an arbitrator's power to that of a judge, whose decisions are reviewable on appeal, and the complaint is that the arbitrator's decision exceeds his powers, a statutory ground for vacatur, the only way to maintain a textual argument for limited judicial review is to hold that such an agreement is not encompassed by the statutory provision and unenforceable. In other words, the textual argument entails that arbitrators can never, by committing reversible error, "exceed their powers" within the meaning of section 10(a)(4), regardless of the parties' agreement. But the FAA itself imposes no such limitation on parties' right of contract.[40] On the contrary, as the

---

[39] 9 U.S.C. § 10(a)(4). The only mention of section 10(a)(4) in *Hall Street* is the observation that "some courts have thought[] 'manifest disregard' may have been shorthand for § 10(a)(3) or § 10(a)(4), the paragraphs authorizing vacatur when the arbitrators were 'guilty of misconduct' or 'exceeded their powers.'" *Hall St.*, 552 U.S. at 585.

[40] The Supreme Court has never addressed section 10(a)(4), except to say, since *Hall Street*, that "[i]t is only when [an] arbitrator strays from interpretation and application of the agreement and effectively dispense[s] his own brand of industrial justice that his decision may be unenforceable", and that "[i]n that situation, an arbitration decision may be vacated under § 10(a)(4) of the FAA on the ground that the arbitrator 'exceeded [his] powers,' for the task of an arbitrator is to interpret and enforce a contract, not to make public policy." *Stolt-Nielsen S.A. v. AnimalFeeds Int'l Corp.*, 130 S.Ct. 1758, 1767 (2010) (citations and internal quotation marks omitted). *Stolt-Nielsen* did not involve an arbitration agreement for expanded judicial review.

Supreme Court noted, "the FAA lets parties tailor some, even many features of arbitration by contract, including the way arbitrators are chosen, what their qualifications should be, which issues are arbitrable, along with procedure and choice of substantive law."[41] Furthermore, the Court recognized a "general policy of treating arbitration agreements as enforceable".[42] The Court regarded this general policy as "beg[ging] the question . . . whether the FAA has textual features at odds with enforcing a contract to expand judicial review following the arbitration",[43] but one such "textual feature[]" is section 10(a)(4), which requires vacatur when arbitrators exceed their authority. Whether that feature is at odds with expanded judicial review depends on whether the right to contract to circumscribe arbitral authority includes limiting the authority to err in decision-making.

The Supreme Court's textual analysis, when taking account of the complete statutory text, circles back to the question whether parties can agree to limit an arbitrator's power to err. If not, then section 10(a)(4) is consistent with the Court's analysis, but if so, the analysis would appear to be flawed. It is the statutory text that begs the policy question, not policy that begs the statutory construction issue.

The Supreme Court stated that it "makes . . . sense" for there to be "a national policy favoring arbitration with just the limited review needed to maintain arbitration's essential virtue of resolving

---

[41] *Hall St.*, 552 U.S. at 586.

[42] *Id*.

[43] *Id*.

disputes straightaway."[44] One difficulty with this statement of national policy is that the Court had previously identified the enforcement of private agreements as the FAA's "overriding goal", writing:

> The legislative history of the [FAA] establishes that the purpose behind its passage was to ensure judicial enforcement of privately made agreements to arbitrate. We therefore reject the suggestion that the overriding goal of the Arbitration Act was to promote the expeditious resolution of claims. The Act, after all, does not mandate the arbitration of all claims, but merely the enforcement — upon the motion of one of the parties — of privately negotiated arbitration agreements.[45]

Hall Street dismissed these words as taken out of context, explaining that all the Court had said was that arbitration should be expedited, in accordance with the parties' agreement, despite pending litigation, even if proceeding in different forums is not the most efficient course for resolving the disputes.[46] But the Court has since reaffirmed that "[t]he 'principal purpose' of the FAA is to 'ensur[e] that private arbitration agreements are enforced according to their terms'",[47] so *Hall Street* cannot fairly be read to replace the FAA's "principal purpose" of enforcing arbitration agreements with arbitration's "essential virtue" of expedition in determining what policy should guide its textual

---

[44] *Id*. at 588.

[45] *Dean Witter Reynolds, Inc. v. Byrd*, 470 U.S. 213, 219 (1985).

[46] 552 U.S. at 588 ("Despite the [*Dean Witter*] opinion's language 'reject[ing] the suggestion that the overriding goal of the [FAA] was to promote the expeditious resolution of claims,' the holding mandated immediate enforcement of an arbitration agreement; the Court was merely trying to explain that the inefficiency and difficulty of conducting simultaneous arbitration and federal-court litigation was not a good enough reason to defer the arbitration." (citations and internal quotation marks omitted)).

[47] *AT&T Mobility LLC v. Concepcion*, No. 09-893, 563 U.S. ___, 2011 WL 1561956, at *8 (Apr. 27, 2011) (slip op. at 9-10, *available at* http://www.supremecourt.gov/opinions/10pdf/09-893.pdf) (quoting *Volt Info. Scis., Inc. v. Bd. of Trs. of Leland Stanford Junior Univ.*, 489 U.S. 468, 478 (1989), and citing *Stolt–Nielsen S.A. v. AnimalFeeds Int'l Corp.*, 130 S.Ct. 1758, 1763 (2010)).

interpretation.[48] Parties agree to arbitration for reasons other than speed and cost, such as flexibility, privacy, and in some instances, expertise.[49] In some cases, at least, whether arbitration reduces cost and delay at all is fiercely debated. In any event, it would hardly make sense to force more expedition on parties than they want. If we were to identify an essential virtue of arbitration, it would be that it is a creature of agreement.

But assuming that the ultimate goal of arbitration is haste, the abiding difficulty with a policy against expanded judicial review, and correspondingly, limited arbitral authority, is that the Court could not itself say whether the policy was a good one:

> Hall Street and its *amici* say parties will flee from arbitration if expanded review is not open to them. One of Mattel's *amici* foresees flight from the courts if it is. We do not know who, if anyone, is right, and so cannot say whether the exclusivity reading of the statute is more of a threat to the popularity of arbitrators or to that of courts. But whatever the consequences of our holding, the statutory text gives us no business to expand the statutory grounds.[50]

A national policy favoring limited judicial review that turns out to be inimical to arbitration could hardly reside comfortably alongside the "national policy favoring arbitration" that the Supreme Court has held Congress declared in the FAA.[51] But without denying that possibility, the Court concluded that the statutory text leaves no alternative.

---

[48] *Id.* at *9 (slip op. at 11) ("'We . . . are not persuaded by the argument that the conflict between two goals of the Arbitration Act — enforcement of private agreements and encouragement of efficient and speedy dispute resolution — must be resolved in favor of the latter in order to realize the intent of the drafters.'" (quoting *Dean Witter*, 470 U.S. 221)).

[49] *See*, *e.g.*, Peter F. Gazda, Comment, *Arbitration: Making Court-Annexed Arbitration an Attractive Alternative in Texas*, 16 ST. MARY'S L.J. 409, 426 (1985).

[51] *Southland Corp. v. Keating*, 465 U.S. 1, 10 (1984).

Thus, the search for a policy to justify limited judicial review winds back around to the statutory text, which, as we have already seen, is what commissioned the expedition in the first place. The problem comes down to this. Under the TAA (and the FAA), an arbitration award must be vacated if the arbitrator exceeds his powers. Generally, an arbitrator's powers are determined by agreement of the parties. Can the parties agree that an arbitrator has no more power than a judge, so that his decision is subject to review, the same as a judicial decision? *Hall Street* answers no, based on an analysis of the FAA's text that ignores the provision that raises the problem, and a policy that may be at odds with the national policy favoring arbitration. With great respect, we are unable to conclude that *Hall Street*'s analysis of the FAA provides a persuasive basis for construing the TAA the same way.

The Supreme Court expressed concern that "a more cumbersome and time-consuming judicial review process [would] bring arbitration theory to grief in post-arbitration process",[52] and we agree that delay and resulting expense are concerns that arbitration is intended, at least, to alleviate.[53] But equally grievous is a post-arbitration process that refuses to correct errors as the parties intended, and of equal concern is a civil justice system that allows parties an alternative to litigation only if they are willing to risk an unreviewable decision. The California Supreme Court, declining to follow *Hall Street* in construing its own state's statute, offered this assessment:

---

[52] *Hall St.*, 552 U.S. at 588 (citations and internal quotation marks omitted).

[53] *CVN Group, Inc. v. Delgado*, 95 S.W.3d 234, 238 (Tex. 2002) ("Subjecting arbitration awards to judicial review adds expense and delay, thereby diminishing the benefits of arbitration as an efficient, economical system for resolving disputes. Accordingly, we have long held that 'an award of arbitrators upon matters submitted to them is given the same effect as the judgment of a court of last resort. All reasonable presumptions are indulged in favor of the award, and none against it.'" (quoting *City of San Antonio v. McKenzie Constr. Co.*, 150 S.W.2d 989, 996 (Tex. 1941))).

> The judicial system reaps little benefit from forcing parties to choose between the risk of an erroneous arbitration award and the burden of litigating their dispute entirely in court. . . . There are also significant benefits to the development of the common law when arbitration awards are made subject to merits review by the parties' agreement. . . . These advantages, obtained with the consent of the parties, are substantial.[54]

As a fundamental matter, Texas law recognizes and protects a broad freedom of contract. We have repeatedly said that

> if there is one thing which more than another public policy requires it is that men of full age and competent understanding shall have the utmost liberty of contracting, and that their contracts when entered into freely and voluntarily shall be held sacred and shall be enforced by Courts of justice.[55]

We find nothing in the TAA at odds with this policy.[56] On the contrary, the purpose of the TAA is to facilitate arbitration agreements, which have been enforceable in Texas by Constitution or statute since at least 1845.[57] Specifically, the TAA contains no policy against parties' agreeing to limit the

VII, § 15)); *id*. at 122 n.1 ("Each constitution provided that it is 'the duty of the Legislature to pass such laws as may be necessary and proper to decide differences by arbitration, when the parties shall elect that method of trial.' TEX. CONST.

authority of an arbitrator to that of a judge, but rather, an express provision requiring vacatur when "arbitrators [have] exceeded their powers".[58]

Quinn argues that an agreement like the one in this case is one-sided, but we fail to see how. Had the arbitration award gone against her and against the law and evidence, the agreement would have been to her benefit. We have said that an arbitration agreement may be so one-sided as to be unconscionable,[59] but the benefits or burdens of judicial review for reversible error fall to each side alike.

The Supreme Court in *Hall Street* squarely rejected the argument that an agreement to expand the statutory grounds for judicial review of an arbitration award is an invalid attempt to confer jurisdiction on a court by contract:

> Because the FAA is not jurisdictional, there is no merit in the argument that enforcing the arbitration agreement's judicial review provision would create federal jurisdiction by private contract.[60]

The TAA, also, is not jurisdictional, and the argument has no more merit with respect to Texas courts' jurisdiction. Nothing more need be said on the subject.

1876, art. XVI, § 13 (repealed 1969). This section was repealed by the voters in 1969 as one of the 'obsolete, superfluous and unnecessary sections of the Constitution.' Tex. H.J.R. [59] *In re Poly-America, L.P.*, 262 S.W.3d 337, 348 (Tex. 2008) ("Unconscionability is to be determined in light of a variety of factors, which aim to prevent oppression and unfair surprise; in general, a contract will be found unconscionable if it is grossly one-sided.").

[60] 552 U.S. 576, 582 n.2 (2008).

We are mindful of the TAA's mandate that it "be construed to . . . make uniform the construction of other states' law applicable to an arbitration."[61] But the states are already divided over whether their own statutes permit agreements for expanded judicial review of arbitration awards: three say yes,[62] five say no.[63] In construing the TAA, we are obliged to be faithful to its text.

Accordingly, we hold that the TAA presents no impediment to an agreement that limits the authority of an arbitrator in deciding a matter and thus allows for judicial review of an arbitration award for reversible error.

III

When, as in this case, an arbitration agreement is covered by both state and federal law,[64] state law is preempted "to the extent that it actually conflicts with federal law — that is, to the extent that it 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives

---

[64] The FAA applies to maritime transactions and transactions involving commerce, 9 U.S.C. § 2, defined as follows: "'Maritime transactions', as herein defined, means charter parties, bills of lading of water carriers, agreements relating to wharfage, supplies furnished vessels or repairs to vessels, collisions, or any other matters in foreign commerce which, if the subject of controversy, would be embraced within admiralty jurisdiction; 'commerce', as herein defined, means commerce among the several States or with foreign nations, or in any Territory of the United States or in the District of Columbia, or between any such Territory and another, or between any such Territory and any State or foreign nation, or between the District of Columbia and any State or Territory or foreign nation, but nothing herein contained shall apply to contracts of employment of seamen, railroad employees, or any other class of workers engaged in foreign or interstate commerce." 9 U.S.C. § 1.

Quinn argued in the court of appeals that her agreement with Nafta did not involve interstate commerce, but she has abandoned that argument in this Court, and in any event, there is no serious argument that her agreement as Vice President of Operations of a business with national and international sales did not involve interstate commerce.

The TAA applies to written arbitration agreements, TEX. CIV. PRAC. & REM. CODE § 171.001, except as follows:

"(a) This chapter does not apply to:
(1) a collective bargaining agreement between an employer and a labor union;
(2) an agreement for the acquisition by one or more individuals of property, services, money, or credit in which the total consideration to be furnished by the individual is not more than $50,000, except as provided by Subsection (b);
(3) a claim for personal injury, except as provided by Subsection (c);
(4) a claim for workers' compensation benefits; or
(5) an agreement made before January 1, 1966.

"(b) An agreement described by Subsection (a)(2) is subject to this chapter if:
(1) the parties to the agreement agree in writing to arbitrate; and
(2) the agreement is signed by each party and each party's attorney.

"(c) A claim described by Subsection (a)(3) is subject to this chapter if:
(1) each party to the claim, on the advice of counsel, agrees in writing to arbitrate; and
(2) the agreement is signed by each party and each party's attorney."

Id. § 171.002.

As the court of appeals noted, the parties have not disputed the applicability of the TAA to their agreement.

The TAA and the FAA may both be applicable to an agreement, absent the parties' choice of one or the other. *In re L & L Kempwood Assocs., L.P.*, 9 S.W.3d 125, 127-128 (Tex. 1999) (per curiam).

of Congress.'"[65] Having concluded that the TAA permits parties to agree to expanded judicial review of arbitration awards, we must determine whether the FAA, which under *Hall Street* precludes such agreements, preempts Texas law. That is, do such agreements thwart Congress's purposes and objectives in the FAA?

In *Volt Information Sciences, Inc. v. Board of Trustees of Leland Stanford Junior University*, the Supreme Court explained the FAA's preemptive effect as follows:

> The FAA was designed to overrule the judiciary's long-standing refusal to enforce agreements to arbitrate and to place such agreements upon the same footing as other contracts. While Congress was no doubt aware that the Act would encourage the expeditious resolution of disputes, its passage was motivated, first and foremost, by a congressional desire to enforce agreements into which parties had entered. Accordingly, we have recognized that the FAA does not require parties to arbitrate when they have not agreed to do so, nor does it prevent parties who do agree to arbitrate from excluding certain claims from the scope of their arbitration agreement. It simply requires courts to enforce privately negotiated agreements to arbitrate, like other contracts, in accordance with their terms.[66]

FAA-preemption is thus aimed at state-law hindrances to enforcement of arbitration agreements not applicable to contracts generally. We have explained it this way:

> The FAA only preempts the TAA if: (1) the agreement is in writing, (2) it involves interstate commerce, (3) it can withstand scrutiny under traditional contract defenses under state law, and (4) state law affects the enforceability of the agreement. . . . The mere fact that a contract affects interstate commerce, thus triggering the FAA, does not preclude enforcement under the TAA as well. For the FAA to preempt the TAA, state law must refuse to enforce an arbitration agreement that the FAA would enforce, either because (1) the TAA has expressly exempted the agreement from

[66] *Id.* at 478 (citations, punctuation, and internal quotation marks omitted).

> coverage, or (2) the TAA has imposed an enforceability requirement not found in the FAA.[67]

In *Volt*, the parties chose California law to govern their arbitration agreement.[68] When a dispute arose between them, one demanded arbitration while the other filed suit, joining two strangers to the agreement as defendants. The state trial court stayed the arbitration pursuant to a provision of the California Arbitration Act that authorized a court "to stay arbitration pending resolution of related litigation between a party to the arbitration agreement and third parties not bound by it, where 'there is a possibility of conflicting rulings on a common issue of law or fact.'"[69] Though the FAA contains no similar provision, the Supreme Court held that the FAA did not preempt state law:

> In recognition of Congress' principal purpose of ensuring that private arbitration agreements are enforced according to their terms, we have held that the FAA pre-empts state laws which require a judicial forum for the resolution of claims which the contracting parties agreed to resolve by arbitration. But it does not follow that the FAA prevents the enforcement of agreements to arbitrate under different rules than those set forth in the Act itself. Indeed, such a result would be quite inimical to the FAA's primary purpose of ensuring that private agreements to arbitrate are enforced according to their terms. Arbitration under the Act is a matter of consent, not coercion, and parties are generally free to structure their arbitration agreements as they see fit. Just as they may limit by contract the issues which they will arbitrate, so too may they specify by contract the rules under which that arbitration will be conducted. Where, as here, the parties have agreed to abide by state rules of arbitration, enforcing those rules according to the terms of the agreement is fully consistent with the goals of the FAA, even if the result is that arbitration is stayed where the Act would otherwise permit it to go forward. By

[68] *Volt*, 489 U.S. at 470.

[69] *Id.* at 471 (quoting CAL. CIV. PROC. CODE § 1281.2(c)(3) (West 1982)).

> permitting the courts to "rigorously enforce" such agreements according to their terms, we give effect to the contractual rights and expectations of the parties, without doing violence to the policies behind by the FAA.[70]

State law was not preempted, even though it operated to stay arbitration that would have gone forward under federal law. The parties' agreement was enforced, not thwarted, by application of the California law they had chosen. The Supreme Court concluded that the FAA's purposes and objectives are not defeated by conducting arbitration under state-law procedures different from those provided by the federal statute. Indeed, as *Volt* acknowledged, it is not clear to what extent the FAA's procedures, prescribed expressly for federal courts, ever apply in state courts.[71] Section 10 of the FAA, the basis of the decision in *Hall Street*, is itself addressed only to "the United States court in and for the district wherein the award was made".[72] The lesson of *Volt* is that the FAA does not preempt all state-law impediments to arbitration; it preempts state-law impediments to arbitration agreements.

The opinion in *Hall Street*, as we have discussed, seems at one point to promote expedition as the primary goal of the FAA. But if expedition is the touchstone for FAA-preemption, then *Volt*

---

[70] *Id*. at 478-479 (citations and internal quotation marks omitted).

[71] *Id*. at 477 n.6 ("While we have held that the FAA's 'substantive' provisions — §§ 1 and 2 — are applicable in state as well as federal court, see *Southland Corp. v. Keating*, 465 U.S. 1, 12 (1984), we have never held that §§ 3 and 4, which by their terms appear to apply only to proceedings in federal court, see 9 U.S.C. § 3 (referring to proceedings 'brought in any of the courts of the United States'); § 4 (referring to 'any United States district court'), are nonetheless applicable in state court. See *Southland Corp. v. Keating, supra,* at 16, n. 10 (expressly reserving the question whether '§§ 3 and 4 of the Arbitration Act apply to proceedings in state courts'); see also *id.,* at 29 (O'CONNOR, J., dissenting) (§§ 3 and 4 of the FAA apply only in federal court)."); *see also Vaden v. Discover Bank*, 129 S.Ct. 1262, 1279 n.20 (2009) (stating that "[t]his Court has not decided whether §§ 3 and 4 apply to proceedings in state courts," citing *Volt*); *Cable Connection, Inc. v. DIRECTV, Inc.*, 190 P.3d 586, 597 n.12 (Cal. 2008) (stating that the FAA's procedural provisions do not apply in state court proceedings). We need not resolve the issue here.

[72] 9 U.S.C. § 10.

was incorrectly decided, since it upheld the use of state law to delay arbitration. Though *Hall Street*'s majority did not cite *Volt*, the Court has since relied on it.[73] With *Volt* intact, we cannot read *Hall Street*'s discussion of the importance of expedition to displace as the principal basis for preemption the protection of parties' agreements.[74] More importantly, *Hall Street* expressly contemplates that the FAA will not preempt state law that allows agreements to enlarge judicial review of arbitration awards:

> In holding that [FAA] §§ 10 and 11 provide exclusive regimes for the review provided by the statute, we do not purport to say that they exclude more searching review based on authority outside the statute as well. The FAA is not the only way into court for parties wanting review of arbitration awards: they may contemplate enforcement under state statutory or common law, for example, where judicial review of different scope is arguable. But here we speak only to the scope of the expeditious judicial review under §§ 9, 10, and 11, deciding nothing about other possible avenues for judicial enforcement of arbitration awards.[75]

---

[73] *AT&T Mobility LLC v. Concepcion*, No. 09-893, 563 U.S. ___, 2011 WL 1561956, at *8 (Apr. 27, 2011) (slip op. at 9-10, *available at* http://www.supremecourt.gov/opinions/10pdf/09-893.pdf) (quoting *Volt*); *Stolt-Nielsen S.A. v. AnimalFeeds Int'l Corp.*, 130 S.Ct. 1758, 1773-1774 (2010) ("While the interpretation of an arbitration agreement is generally a matter of state law, the FAA imposes certain rules of fundamental importance, including the basic precept that arbitration is a matter of consent, not coercion . . . . [W]e have said on numerous occasions that the central or primary purpose of the FAA is to ensure that private agreements to arbitrate are enforced according to their terms . . . . Whether enforcing an agreement to arbitrate or construing an arbitration clause, courts and arbitrators must give effect to the contractual rights and expectations of the parties . . . . [W]e have held that parties are generally free to structure their arbitration agreements as they see fit . . . and may agree on rules under which any arbitration will proceed." (citing *Volt,* 489 U.S. at 479) (citations and internal quotation marks omitted)).

[74] A state law that both denies enforcement of the parties' agreement and defeats arbitration's goal of expedition is, not surprisingly, preempted. *Concepcion*, 2011 WL 1561956 (holding that the California rule, regarding the unconscionability of class arbitration waivers in consumer contracts, from *Discover Bank v. Superior Court*, 113 P.3d 1100 (Cal. 2005), is preempted by the FAA).

[75] *Hall St. Assocs., L.L.C. v. Mattel, Inc.*, 552 U.S. 576, 590 (2008).

Dissenting from the Court's construction of the FAA, Justice Breyer emphasized that the Court was in agreement that its decision would not have preclusive effect. Citing the passage of the Court's opinion we have just quoted, and a part of Justice Stevens' dissenting opinion, he stressed:

> The question presented in this case is whether "the Federal Arbitration Act . . . *precludes* a federal court from enforcing" an arbitration agreement that gives the court the power to set aside an arbitration award that embodies an arbitrator's mistake about the law. Like the majority and Justice STEVENS, and primarily for the reasons they set forth, I believe that the Act does not *preclude* enforcement of such an agreement.[76]

These passages, we think, refute any argument that *Volt*'s reasoning applies only to the procedure by which arbitration is conducted, not the procedure by which awards are reviewed. The only reasonable reading of the opinions in *Hall Street*, in our view, is that the FAA does not preempt state law that allows parties to agree to a greater review of arbitration awards.[77]

It was not necessary for Quinn and Nafta to choose the TAA to govern their agreement, nor would that choice alone have provided them expanded judicial review of an arbitration award. The TAA, as we have construed it, permits parties to agree to expanded review, or to a corresponding limit on the arbitrator's authority, as in this case, but it does not impose such review on every arbitration agreement. Nor was it necessary for Quinn and Nafta to choose not to be governed by the FAA, since even if it applies, as it does in this case, it does not preempt the parties' agreement for expanded judicial review. The matter is left to the agreement of the parties. But absent clear

---

[76] *Id*. at 596 (Breyer, J., dissenting) (emphasis added) (citation omitted).

[77] *See Cable Connection, Inc. v. DIRECTV, Inc.*, 190 P.3d 586, 595-599 (Cal. 2008).

agreement, the default under the TAA, and the only course permitted by the FAA, is restricted judicial review.[78]

For these reasons, we hold that the FAA does not preempt enforcement of an agreement for expanded judicial review of an arbitration award enforceable under the TAA.

IV

An arbitration award is not susceptible to full judicial review merely because the parties have agreed. A court[79] must have a sufficient record of the arbitral proceedings, and complaints must have been preserved, all as if the award were a court judgment on appeal.[80] For efficiency's sake, arbitration proceedings are often informal; procedural rules are relaxed, rules of evidence are not followed, and no record is made. These aspects of arbitration, which are key to reducing costs and delay in resolving disputes, must fall casualty to the requirements for full judicial review. The parties can decide for themselves whether the benefits are worth the additional cost and delay, but the only review to which they can agree is the kind of review courts conduct. If error cannot be demonstrated, an award must be presumed correct.[81]

---

[78] *See Mastrobuono v. Shearson Lehman Hutton, Inc.*, 514 U.S. 52, 64 (1995) (holding that an agreement that did not unambiguously limit the scope of arbitration by choosing a state-law rule did not effectively do so under the FAA).

[79] In ruling on motions to confirm, alter, or vacate an arbitration award, a trial court reviewing the award for reversible error serves an appellate function.

[80] In appeals from judicial proceedings, the requirements for preserving complaints and for the record are set out, respectively, in Rules 33 and 34 of the Texas Rules of Appellate Procedure. Although these rules are not written for appeals from arbitration awards, their principles should govern such appeals.

[81] *See also Cable Connection*, 190 P.3d at 605 ("Some courts have expressed concern that arbitration is so different from judicial proceedings that courts would be unable to adequately review the substance of arbitrators' decisions. . . . Problems with the record are not reflected in the cases, but in the event they arise, there is a ready solution in the familiar rule that the decision under review is presumed correct on matters where the record is silent.").

By the same token, arbitration parties cannot agree to a different standard of judicial review than the court would employ in a judicial proceeding involving the same subject matter. "[A]n arbitration agreement providing that a 'judge would review the award by flipping a coin or studying the entrails of a dead fowl' would be unenforceable."[82]

Here, the parties have submitted a record of the arbitration proceeding, including a transcript of the evidence offered. Nafta has attacked the award on several legal grounds and challenged the sufficiency of the evidence. On remand, the court must determine whether the record is sufficient to review Nafta's complaints.

V

In the trial court, Nafta invoked the provision of its agreement with Quinn limiting the arbitrator's authority "to render a decision which contains a reversible error of state or federal law, or . . . to apply a cause of action or remedy not expressly provided for under existing state or federal law", and raised its arguments under this provision for vacating the award. Since the trial court's order confirming the award gives no basis for its decision, we must presume that the court rejected Nafta's arguments in substance. Nafta raised the same arguments in the court of appeals, but the court did not reach them, concluding instead that even if meritorious, they were not grounds for vacatur. Because we disagree, the judgment of the court of appeals must be reversed and the case remanded to that court for consideration of the merits of Nafta's challenges to the arbitration award.

It is so ordered.

---

[82] *Id*. (citations omitted) (quoting *LaPine Tech. Corp. v. Kyocera Corp.*, 130 F.3d 884, 891 (9th Cir. 1997) (Kozinski, J., concurring)).

Nathan L. Hecht
Justice

Opinion Delivered: May 13, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0613

NAFTA TRADERS, INC., PETITIONER,

v.

MARGARET A. QUINN, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIFTH DISTRICT OF TEXAS

Argued October 8, 2009

CHIEF JUSTICE JEFFERSON, joined by JUSTICE WAINWRIGHT and JUSTICE LEHRMANN, concurring.

Increasingly, our civil disputes are submitted to the private sector rather than a judge or jury. The trend is neither intrinsically good nor bad, but there are consequences. When a case is tried in open court, rules of evidence inherited from Britain and modified by American courts dictate what facts a jury may properly consider. The proceeding is recorded, and dispositive rulings are subject to principles of error preservation. When the facts are established and the law applied, the State of Texas enforces the trial court's judgment. Journalists report the facts, editorial writers critique the judgment, citizens reflect on the state of our laws, and legislators file bills to alter future outcomes. When the parties appeal, the resulting precedent gives predictability to the activities and transactions in which people and corporations engage.

An arbitration is different.[1] It is said to be speedier, often less costly, and overseen by experts in the relevant subject matter. But it is conducted in private.[2] The rules of evidence do not apply. There may be no official transcript of the proceedings. The award is usually final, even when an identical judgment appealed to a state court would be reversed on procedural or substantive grounds. Courts are generally required to confirm an arbitral award because trial judges have little power to reverse it for factual insufficiency or, with certain exceptions, to prevent a miscarriage of justice.[3]

This case asks whether parties can agree to "try" a case privately, but then enlist state courts to review the decision for reversible errors of state or federal law. I agree with the Court that the agreement is enforceable under the TAA, *Hall Street* notwithstanding. ___ S.W.3d at ___. I write only to observe that our system is failing if parties are compelled to arbitrate because they believe our courts do not adequately serve their needs. If litigation is leaving because lawsuits are too expensive, the bench and the bar must rethink the crippling burdens oppressive discovery imposes. If courts have yet to embrace modern case-management practices, the Legislature should ensure that the justice system has resources to improve technology and to hire qualified personnel—two sure ways to improve efficiency.

---

[1] *See Bowles Fin. Grp., Inc. v. Stifel, Nicolaus & Co., Inc.*, 22 F.3d 1010, 1011 (10th Cir. 1994) ("Arbitration provides neither the procedural protections nor the assurance of the proper application of substantive law offered by the judicial system.").

[2] *See* Gu Weixia, Note & Comment, *Confidentiality Revisited: Blessing or Curse in International Arbitration?*, 15 AM. REV. INT'L ARB. 607, 622 (2004) ("How disputes are actually decided concerns not only the parties to the arbitration, but may also have substantial effects on the world at large, including shareholders, administrative regulators, consumers, and the like. Decisions affecting them should be subject to public scrutiny." (footnote omitted)).

[3] *See* 9 U.S.C. § 9 ("[A]ny party to the arbitration may apply to the court so specified for an order confirming the award, and thereupon the court must grant such an order unless the award is vacated, modified, or corrected as prescribed in sections 10 and 11 of [the FAA]."); TEX. CIV. PRAC. & REM. CODE § 171.087 ("Unless grounds are offered for vacating, modifying, or correcting an award under Section 171.088 or 171.091 [of the TAA], the court, on application of a party, shall confirm the award.").

And it is unlikely, given a choice, that parties to an arbitration would choose, as their arbitrator, a person whose only qualification is the possession of a law license, and who need not have significant experience as an advocate or as a judge.[4] They seek instead a pool of qualified professionals rather than individuals who are swept in and out of office based not on considerations of merit, but on the vagaries of partisan election. *See* TEX. CONST. art. V (outlining the requirements for judicial election). The solution to that quandary is beyond the scope of this case, but the parties' contractual agreement for reviewing the arbitrator's decision demonstrates that people know how to avoid this perceived deficiency. They will, increasingly, select their own specialized tribunal and seek to retain a contractual right to meaningful appellate review in our state courts. As the Court does, I would affirm that right. Nevertheless, we must, in the future, address those aspects of our justice system that compel litigants to circumvent the courts and opt for private adjudication.

Opinion Delivered: May 13, 2011

[4] *See* TEX. CONST. art. V, § 7 ("Each district judge shall be elected by the qualified voters at a General Election and shall be a citizen of the United States and of this State, who is licensed to practice law in this State and has been a practicing lawyer or a Judge of a Court in this State, or both combined, for four (4) years next preceding his election . . . .").

IN THE SUPREME COURT OF TEXAS

NO. 08-0634

AEP TEXAS CENTRAL COMPANY, PETITIONER,

v.

PUBLIC UTILITY COMMISSION OF TEXAS, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

JUSTICE WILLETT delivered the opinion of the Court.

This appeal challenges a final order of the Public Utility Commission in a true-up proceeding under Chapter 39 of the Utilities Code, a part of the Public Utility Regulatory Act (PURA). The district court affirmed the order in part and reversed it in part. The court of appeals affirmed the judgment of the district court in part and reversed it in part.[1] In two recent decisions, we have reviewed PUC orders in true-up proceedings, giving a general description of Chapter 39 and the true-up procedure.[2]

In today's case, AEP Texas Central Co. (AEP), a transmission and distribution utility, and CPL Retail Energy, L.P., its affiliated retail electric provider, initiated a proceeding under Section

[1] 258 S.W.3d 272, 276.

[2] *See State v. Pub. Util. Comm'n*, ___ S.W.3d ___, ___ (Tex. 2011) (*State v. PUC*); *Tex. Indus. Energy Consumers v. CenterPoint Energy Houston Elec., LLC*, 324 S.W.3d 95, 97–100 (Tex. 2010) (*TIEC*).

39.262 to finalize stranded costs and other true-up amounts.[3] The State of Texas, several municipalities, and several other parties who are consumers of electricity or represent consumer interests (collectively the Consumers),[4] intervened in the proceeding.

In its final order (Order), the PUC determined stranded costs, which generally are "based on the difference between the book value of generation assets and the market value of these assets."[5] The PUC also made a separate determination of the capacity auction true-up under Section 39.262(d)(2). The issues before us now concern market value, net book value (NBV), and the capacity auction true-up.

I. Market Value

Generally, "Section 39.262(h) provides that the affiliated power-generation company shall establish the market value of its generation assets using one or more of four methods: the sale of assets method, the stock valuation method, the partial stock valuation (PSV) method, and the exchange of assets method."[6] Section 39.262(h) provides that stranded costs shall be quantified using these methods "[e]xcept as provided in Subsection (i)."

Subsection (i) provides in part: "Unless an electric utility or its affiliated power generation company combines all of its *remaining* generation assets into one or more transferee corporations

---

[3] TEX. UTIL. CODE § 39.262. All statutory sections cited herein are found in Chapter 39 of the Texas Utilities Code.

[4] The issues and arguments discussed below are not all raised by the same Consumers. For brevity we identify any issue or argument raised by any Consumer as one raised by "the Consumers."

[5] *State v. PUC*, ___ S.W.3d at ___.

[6] *Id.* at ___.

as described in Subsections (h)(2) and (3), the electric utility shall quantify its stranded costs for nuclear assets using the ECOM method."[7] Subsection (h)(2) pertains to the stock valuation method, and Subsection (h)(3) pertains to the PSV method. These methods involve spinning off assets into a publicly traded corporation. The ECOM method refers to a model developed by the PUC to estimate stranded costs.[8]

In this case, AEP chose to quantify its stranded costs under Subsection (h)(1), the sale of assets method, because it had sold its generation assets including its interest in the South Texas Nuclear Project. The Consumers argue that the market value of AEP's nuclear assets could not be determined using the sale of assets method, because Subsection (i) requires use of the ECOM model for valuing nuclear assets unless the stock valuation or PSV method is used.

The PUC ruled that the sale of assets method could be used to determine the market value of nuclear assets, and that Subsection (i), by its terms, is limited to the valuation of "remaining" nuclear assets. It reasoned that once AEP sold its nuclear assets, they were not remaining. Like the court of appeals, we conclude that the PUC's construction of the provision is reasonable and should be followed.[9] The PUC's construction gives meaning to the word "remaining," consistent with our view that every word in a statute is presumed to have a purpose and should be given effect if reasonable and possible.[10] The PUC construction is also consistent with the last sentence of

---

[7] TEX. UTIL. CODE § 39.262(i) (emphasis added).

[8] *See State v. PUC*, ___ S.W.3d at ___ n.15 and accompanying text.

[9] *See id.* at ___ ("[A]n agency's interpretation of the statute it administers is entitled to serious consideration so long as it is reasonable and does not conflict with the statute's language.").

[10] *See Tex. Workers' Comp. Ins. Fund. v. DEL Indus., Inc.*, 35 S.W.3d 591, 593 (Tex. 2000).

Subsection (h)(1), providing that "[i]f not all assets are sold" through a sale of assets, "the market value of the remaining generation assets shall be established by one or more of the other methods in this section." A plausible reading of Section 39.262(i) is that it provided a backup method, namely the ECOM method, for assigning a market value to a nuclear plant that might prove difficult to sell or exchange, and hence would be a "remaining" asset of the utility, and that stock market conditions might also make spinning off the plant into a publicly traded company difficult.

Further, we have noted that "[w]hile other methods are provided to determine market value indirectly, we think the actual sale of all the generation assets . . . provides the best measure of market value,"[11] in part because Section 39.251(4) generally defines market value as "the value the assets would have if bought and sold in a bona fide third-party transaction or transactions on the open market." By its language this statutory definition applies to "nonnuclear assets and certain nuclear assets."[12] Where, as here, the utility managed to sell its stake in a nuclear plant, we see no error in using the sale of assets method, which is, if anything, the preferred method for valuing generation assets. There is nothing sacrosanct about the ECOM computer model, which turned out to be a very inaccurate predictor of stranded costs.[13] Further, as the PUC urges, if under Section 39.251(4) the market value of "certain nuclear assets" is the value obtained in a "bona fide third-party transaction or transactions on the open market," Subsection (i) should not be read to impose

---

[11] *State v. PUC*, ___ S.W.3d at ___.

[12] TEX. UTIL. CODE § 39.251(4).

[13] At one point, the ECOM model predicted "that no generation company was projected to have stranded costs," *CenterPoint Energy, Inc. v. Pub. Util. Comm'n*, 143 S.W.3d 81, 91 (Tex. 2004), but ultimately billions of dollars in stranded costs were assessed at the final true-ups of the utilities subject to Chapter 39.

a categorical prohibition against using the sale of assets method set out in Subsection (h)(1) to value nuclear assets. Such a reading would conflict with Section 39.251(4), which contemplates that at least "certain nuclear assets" can be valued using the sale of assets method. The PUC's interpretation of the relevant statutory provisions is reasonable and gives meaning and consistency to each of the relevant statutory terms.

II. Net Book Value

A. Excess Mitigation Credits

The PUC required AEP to issue excess mitigation credits to customers based on interim projections that AEP would have no stranded costs. The projections turned out to be erroneous, and at the true-up proceeding, the PUC reasoned that the EMCs, including the EMCs paid to the affiliate retailer CPL Retail Energy, had by design increased the net book value (and decreased stranded costs) on a dollar-for-dollar basis, and accordingly stranded costs should reflect the total amount of EMCs paid. In *State v. PUC*, we affirmed the PUC's order regarding the identical treatment of EMCs in the CenterPoint true-up proceeding.[14] We reversed the court of appeals' judgment on this issue.[15]

In today's case, the same court of appeals remanded this issue to the PUC for reconsideration in light of its decision in the CenterPoint true-up case and its decision in another case holding that

[14] *State v. PUC*, ___ S.W.3d at ___.

[15] *Id.*

the PUC never had authority to issue EMCs.[16]

AEP argues that the PUC did not err in including in stranded costs all EMCs that had been paid. The Consumers argue that stranded costs should be reduced by the amount of EMCs paid by AEP to its affiliated retail provider, CPL Retail Energy. Consistent with our decision in *State v. PUC*, we agree with AEP that no adjustment to the PUC's calculation of stranded costs is warranted to account for EMCs paid to CPL Retail Energy. We rejected the same argument in *State v. PUC*, reasoning that regardless of whether the EMCs were paid to the affiliated retail electric provider or another retail provider, "the purpose of the EMCs was to increase the NBV of CenterPoint's generation assets,"[17] the impact on stranded costs was the same, and "CenterPoint should recover whatever stranded costs it would have recovered if the EMCs had never been paid."[18]

AEP separately argues that the PUC miscalculated interest on the excess earnings. In this proceeding, the PUC calculated interest on stranded costs monthly, running from January 2002. As discussed further below, the interest rate and the start date for the running of interest were correct under our holdings in *TIEC*. Schedule II to the Order shows the PUC's calculation of interest on the stranded cost true-up award, with the column for net book value increasing monthly to reflect the unrefunded EMC balance. The EMCs, by design, increased the net book value and were credited against excess earnings, and therefore correspondingly increased stranded costs and the interest on

App.—Austin 2008), *rev'd in part sub nom. State v. Pub. Util. Comm'n*, __ S.W.3d ___ (Tex. 2011), and in light of *City of Corpus Christi v. Pub. Util. Comm'n*, 188 S.W.3d 681 (Tex. App.—Austin 2005, pet. denied)).

[17] ___ S.W.3d at ___.

[18] *Id.* at ___.

the principal amount of stranded costs. We see no error in the PUC's treatment of interest in this true-up proceeding. We are not persuaded by AEP's argument that the Order double-counted interest.[19]

B. Construction Work in Progress

The Consumers complain that the PUC erred in including construction work in progress (CWIP) in the net book value determination. They argue that ratemaking standards must be met before the inclusion of CWIP in net book value. We rejected this argument in *State v. PUC*.[20]

C. Adjustments to NBV for Commercially Unreasonable Conduct

AEP argues that once the PUC determined market value by concluding that the sale of its generation assets was, under Section 39.262(h)(1), a bona fide sale under a competitive offering, the PUC was not free to adjust net book value to account for specific instances of commercially unreasonable conduct that affected the value of its generation assets. The Consumers argue that not only is an adjustment to NBV permitted, but the PUC did not make sufficiently large reductions to NBV to account for AEP's commercially unreasonable conduct. A majority of the court of appeals agreed with AEP that an adjustment to NBV was not permitted in these circumstances.[21] The dissenting justice agreed with the PUC that an adjustment to NBV was permitted, and would have rejected the arguments of the Consumers that greater adjustments should have been made by the

---

[19] The PUC suggests in its briefing that some recovery of interest on retained excess earnings should be made on remand of the PUC docket that ordered the EMCs. We express no opinion on this question, and our decision today is not intended to foreclose an adjustment to interest on excess earnings in another proceeding.

[20] ___ S.W.3d at ___.

[21] 258 S.W.3d at 308–14.

PUC.[22]

On these issues, we agree with the PUC across the board. First, we agree that commercially unreasonable conduct can result in a reduction to net book value even when the PUC uses the sale of assets method to determine market value, and finds that the sale of assets was "a bona fide third-party transaction under a competitive offering," as specified in Section 39.262(h)(1).

Section 39.252(d) provides:

> An electric utility shall pursue commercially reasonable means to reduce its potential stranded costs, including good faith attempts to renegotiate above-cost fuel and purchased power contracts or the exercise of normal business practices to protect the value of its assets. The commission shall consider the utility's efforts under this subsection when determining the amount of the utility's stranded costs; provided, however, that nothing in this section authorizes the commission to substitute its judgment for a market valuation of generation assets determined under Sections 39.262(h) and (i).

A similar issue arose in *State v. PUC*. We held that market value should be determined under the sales of assets method, concluding that the sale of assets in that case "was indeed 'a bona fide third-party transaction under a competitive offering'" as provided in Subsection (h)(1).[23] We then considered whether a separate transaction called the "RRI Option" was commercially unreasonable conduct that should result in a reduction in NBV. We discussed whether the Option had depressed the market value of the affiliated power generation company, and concluded the option had no effect if the sale of assets method was used, since the sale of the assets took place after the Option expired.[24] Before reaching this conclusion, however, we accepted the legal proposition

---

[22] *Id.* at 287–93 (Patterson, J., dissenting).

[23] ___ S.W.3d at ___.

[24] *See id.* at ___.

that a reduction in NBV is permitted if commercially unreasonable conduct had negatively affected the market value of the utility's assets:

> The PUC could consider the commercial reasonableness of the RRI Option in determining NBV. The PUC adjusted NBV in making the stranded cost determination, after finding that the conveyance of the Option was commercially unreasonable and did not represent normal business practices. Section 39.252(d) expressly directs the PUC, when making the stranded cost determination, to consider whether the utility used "commercially reasonable means" and "normal business practices" to reduce stranded costs. Since Section 39.252(d) bars the PUC from adjusting the market value component of stranded costs, it necessarily authorizes an adjustment to NBV, the other principal component of stranded costs.[25]

Hence, we accepted, as we do here, that even if the sale of assets is, overall, sufficiently "bona fide" and "competitive" to qualify for a market value determination under Section 39.262(h)(1), commercially unreasonable conduct by the utility affecting the value of the assets sold is subject to an adjustment to net book value under Section 39.252(d). This authority flows from Section 39.252(d), requiring the PUC, when determining stranded costs, to consider whether the utility engaged in "commercially reasonable" conduct and "normal business practices." This authority also flows from Section 39.252(a), providing that a utility may only recover its "nonmitigable" stranded costs, and Section 39.262(a), providing that a utility "may not be permitted to overrecover stranded costs" at the true-up proceeding. These provisions should be read together in construing Chapter 39.[26] In harmonizing the provisions as it did, the PUC was able to make a market value determination under Section 39.262(h)(1), an essential step in determining stranded costs, while still

---

[25] *Id.* at ___.

[26] *See State v. Gonzalez*, 82 S.W.3d 322, 327 (Tex. 2002) ("[W]e determine legislative intent from the entire act and not just from isolated portions."); *State v. Pub. Util. Comm'n*, 883 S.W.2d 190, 196 (Tex. 1994) ("In ascertaining the scope of the Commission's authority, we must read PURA as a whole to ascertain the underlying legislative intent.").

giving effect to the Section 39.252(d) duty to mitigate stranded costs. While there is obviously some overlap between the concepts of a "bona fide" and "competitive" sale under Section 39.262(h)(1), and the concepts of "commercially reasonable means" and "normal business practices" under Section 39.252(d), the PUC reasonably harmonized these provisions, gave meaning to both, and conformed to the overall goal of awarding the utility its nonmitigable stranded costs.

In today's case, the utility's election to use the sale of assets method under Section 39.262(h)(1), and a PUC finding that the sale of assets was conducted through a bona fide and competitive sale,[27] does not preclude an adjustment to NBV under Section 39.252(d) for specific, commercially unreasonable conduct. The language of Section 39.262(h) requires the utility to "quantify its stranded costs using one or more of the following methods," but Chapter 39 as a whole provides "that the PUC ultimately determines stranded costs . . . . The true-up procedure set out in Chapter 39 unmistakably assigns the Commission to act as an adjudicative body in 'determining the amount of the utility's stranded costs' and issuing a 'final order' in the true-up proceeding, subject to judicial review."[28] The PUC's authority to ultimately determine stranded costs carries with it the authority to make particularized adjustments to net book value to account for commercially unreasonable conduct. While Section 39.252(d) states that the PUC shall not, in considering whether the utility used commercially reasonable means to reduce stranded costs, "substitute its judgment for a market valuation of generation assets determined under Sections 39.262(h) and (i),"

[27] In concluding that AEP's auction of its generation assets met the test of a bona fide transaction under a competitive offering, the PUC was persuaded by evidence that AEP used competent and independent advisers, engaged in broad marketing efforts, employed an auction structure that promoted competitive bids, provided bidder access to equal and accurate data, and negotiated vigorously with bidders.

[28] *State v. PUC*, ___ S.W.3d at ___ (quoting Sections 39.252(d) and 39.262(j)).

the PUC did not "substitute its judgment" as to the market-based methods set out in Chapter 39 for determining market value. It accepted AEP's election to employ the sale of assets method to determine market value, but made authorized NBV adjustments to account for specific instances of commercially unreasonable conduct by AEP prior to the sale of those assets that negatively affected the prices received. Therefore, we disagree with the court of appeals that employment of the sale of assets method to determine market value under Section 262(h)(1) automatically and necessarily means that the PUC can make no adjustments to NBV under the separate Section 39.252(d) duty to mitigate stranded costs. The authority to review the commercial reasonableness of specific utility conduct in selling generation assets derives from the nature of stranded-cost recovery and the effect it might have on normal business incentives. Conduct that unreasonably reduces the price of assets sold will reduce the proceeds of the sale, one measure of market value, but such a reduction simply increases the stranded cost recovery on a dollar-for-dollar basis, since stranded costs are measured by the difference between book value and market value. To counter this lack of incentive to minimize stranded costs, the Legislature empowered the PUC to make adjustments to net book value under Section 39.252(d).

Our agreement with the PUC and the court of appeals dissent that an NBV adjustment is allowed in these circumstances leaves the question whether the PUC's dollar adjustments to NBV are supported by substantial evidence. After considering numerous alleged instances of commercially unreasonable conduct, the PUC made two adjustments to NBV. AEP argues that one of the adjustments was too large, while the Consumers complain that both of the adjustments were too small.

Under substantial evidence review of fact-based determinations, "[t]he issue for the reviewing court is not whether the agency's decision was correct, but only whether the record demonstrates some reasonable basis for the agency's action."[29]

The PUC reduced AEP's net book value by $68.7 million on grounds that AEP's conduct before the sale of its interest in the South Texas Nuclear Project was commercially unreasonable. It found fault in AEP's failure to prepare an adequate pre-sale valuation analysis so that it had an estimate of the intrinsic value of its interest, and to establish ahead of the sale a "walk-away" or reserve price. It arrived at the $68.7 million figure by comparing the price received by AEP and the price received by Texas Genco (Genco), a co-owner of the Project that also sold its interest. This figure was based on the relative sizes of the interests sold by the two companies. AEP and the Consumers, relying on conflicting evidence in the record, argue that the PUC miscalculated the relative sizes of the Genco and AEP interests. AEP further argues that the PUC offered no rational explanation for how its alleged unreasonable conduct affected the price for its interest in the Project. We have reviewed the evidence and conclude that the PUC's calculation is supported by substantial evidence. The PUC gave rational reasons for the disallowance.[30] The Consumers concede that the sale of the Genco interest "was part of an extremely complex transaction" and the comparison with

---

[29] *Id.* at ___ (quoting *Mireles v. Tex. Dep't of Pub. Safety*, 9 S.W.3d 128, 131 (Tex. 1999)).

[30] The PUC plausibly reasoned in its Order:

> If [AEP] had determined an intrinsic value for its STP share, and established a walk-away price, it may have attempted to negotiate a higher price for STP, modified its auction procedure to ensure that it obtained such a price, or ceased negotiations and either reopened bidding or considered pursuing another valuation method if it became apparent that the auction results would not approach this price. Obtaining a walk-away price, referencing it throughout the auction process, and modifying or terminating the sale if the offered price does not approach the walk-away price are all measures that a commercially reasonable seller would take to maximize the sales price of an asset.

the sale of AEP's interest in the same nuclear project was not at all straightforward. The PUC relied on documentary and testimonial evidence relating to the Genco transaction that provides a reasonable basis for the PUC's calculation, thus satisfying the substantial evidence standard.

The PUC also made an $8 million adjustment to NBV on grounds that AEP had unreasonably bundled the sale of its Coleco Creek coal-fired plant with other plants instead of considering whether it could obtain a higher price by selling this plant separately. It noted that AEP had sold the bundled facilities for less than one bidder had offered for Coleco Creek plant by itself. The Consumers argue that a much greater adjustment was warranted. The PUC considered conflicting evidence and argument on this issue. In response to AEP's contention that the other plants actually had negative value, the PUC noted evidence that AEP "was only concerned about selling these facilities as generation units, rather than examining other options such as selling the facilities for their land, parts and scrap metal, or the water rights associated with the facilities." The PUC relied on an actual "nonconforming" bid for the Coleco Creek plant by itself, and compared that bid to the sale price of the bundled assets in reaching the $8 million figure. The bid was nonconforming in that it did not fully comply with AEP's bidding instructions, but the PUC argues that evidence on which the Consumers relied were not actual bids at all, but less reliable evidence such as sales of allegedly similar plants or expressions of interest that occurred before the potential bidder had conducted any due diligence. Given the conflicting evidence and reasonable inferences to be drawn therefrom, the PUC's adjustment is sustained under the substantial evidence test.

The Consumers also argue that the PUC should have made a further adjustment to NBV because AEP failed to execute "bridge power sales" agreements relating to the sale of certain assets.

Some of the generation assets were sold under agreements that closed at a future date. AEP received the profits from these assets during the period between the signing of the agreements and the transfer of the assets to the buyer. Under a bridge power sales agreement, the purchaser of generation facilities receives the profits from power sales while the sale is pending. The Consumers argue that such agreements would have increased the calculated market value of the assets and correspondingly reduced stranded costs. The PUC, district court, and court of appeals have all rejected this argument.[31] The PUC points out that no statute requires a bridge power sales agreement or an adjustment to stranded costs to reflect profits earned between the time a sale of assets is negotiated and the formal transfer of those assets to the purchaser. The PUC further considered expert testimony that bridge power sales agreements are not a normal business practice due to regulatory uncertainties in finalizing the sale of generation assets. The PUC's ruling that such agreements were not mandated under a commercial reasonableness standard is affirmed under the substantial evidence test.

AEP argues that, assuming the NBV adjustments were legally and factually warranted, the PUC erred in "grossing up" the disallowances to reflect the federal corporate income tax benefits of the adjustments to stranded costs. The PUC adjustments had lowered stranded costs, with the result that AEP would owe less tax on stranded costs than anticipated. But the utility already had an accumulated deferred federal income tax (ADFIT) account to pay taxes that it now would not owe. The PUC concluded that without the gross up to reflect the effect of taxes, AEP would retain funds in its ADFIT account for the payment of taxes collected from rates charged to customers in

[31] *See* 258 S.W.3d at 293, 314–15.

previous years that would never be paid, resulting in an overrecovery of stranded costs.[32]

We see no error in the PUC approach. With the benefit of expert testimony, the PUC concluded that without the gross ups an overrecovery of stranded costs would occur, because straight-line depreciation is used for ratemaking while accelerated depreciation is used for paying taxes to the IRS. The result of these divergent depreciation methods is that the ADFIT account to pay income taxes accumulates funds in the early years of an asset's life, as regulatory tax expense paid by ratepayers exceeds the actual tax expense, and then reverses in the later years. The excess funds from early years are held in the ADFIT account and then paid out in later years. Grossing up the adjustment assured that AEP would not receive a windfall in the form of customer charges to cover taxes that would never be paid. As one expert opined, without the gross ups AEP would retain a tax benefit that partially offset the disallowances, resulting in "the government partially subsidizing the disallowance[s]."

Grossing up a true-up amount to reflect the effect of taxes is not novel to this case. We have recognized, in the ratemaking context, that "[t]he propriety of including all taxes among cost of service expenses has been long established."[33] In *TIEC*, we affirmed a PUC order in a Chapter 39 case that authorized the utility to recover a competition transition charge.[34] The charge allowed the utility to recover a true-up award where carrying costs were grossed up to assure the utility an

---

[32] *See* § 39.262(a) (providing that a utility "may not be permitted to overrecover stranded costs" at the true-up proceeding).

[33] *Suburban Util. Corp. v. Pub. Util. Comm'n*, 652 S.W.2d 358, 363 (Tex. 1983).

[34] 324 S.W.3d at 97.

appropriate after-tax return.[35] The gross-up worked in the utility's favor in that case, and in today's case, the interest rate AEP received on its stranded costs was also grossed up.

III. Capacity Auction True-Up

AEP complains that the PUC and the court of appeals erred in declining to base the capacity auction true-up under Section 39.262(d)(2) on actual prices obtained in the capacity auctions it conducted under Section 39.153. Specifically, it contends: "The court of appeals erred by upholding an order that disregards the true-up statute and rule, both of which prescribe a formula that must be applied regardless of whether a utility sells 15% of its capacity at auctions in compliance with the statute and rule that govern the auctions themselves." We agree.

AEP contends that due to lack of market demand it was unable to sell the full 15 percent of its capacity specified in Section 39.153 and PUC rules thereunder specifying four separate gas products, but that the Section 39.262(d)(2) capacity auction true-up should still be based on the prices actually obtained in the capacity auctions conducted under Chapter 39. The same issue arose in *State v. PUC*, and we agreed with the utility, as we agree with AEP today, that "Section 39.262 unambiguously specifies that the statutory capacity auction price, not some other blended price the PUC finds more appropriate, must be used in calculating the capacity auction true-up amount."[36] On remand, the PUC must recalculate the capacity auction true-up in a manner consistent with our decision in *State v. PUC*, rather than relying on the proxy price it selected in the true-up proceeding.

IV. Interest on Stranded Costs

[35] *Id.* at 104 n.57.

[36] ___ S.W.3d at ___.

The Consumers argue that interest on stranded costs should not have been assessed under PUC Rule 25.263(*l*)(3). They argue that we invalidated the Rule in *CenterPoint Energy, Inc. v. Public Utility Commission*.[37] The PUC contends that we only invalidated the date on which interest began to run, not the interest rate. In *TIEC*, we agreed with the PUC on this issue.[38] The PUC therefore correctly applied Rule 25.263(*l*)(3), with a modified start date, in calculating interest on stranded costs.

V. Conclusion

We grant the petition for review, and without hearing oral argument,[39] affirm in part and reverse in part the court of appeals' judgment, and remand this case to the PUC for further proceedings consistent with this opinion.

IN THE SUPREME COURT OF TEXAS

NO. 08-0658

CARROLL G. ROBINSON, BRUCE R. HOTZE,
AND JEFFREY N. DAILY,
PETITIONERS,

v.

ANNISE D. PARKER, MAYOR; CITY OF HOUSTON;
HOUSTON CITY COUNCIL, ET AL.,
RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued November 18, 2009

JUSTICE GREEN delivered the opinion of the Court.

JUSTICE GUZMAN did not participate in the decision.

In this case, we are asked to decide (1) whether citizens who signed a petition proposing a local ballot initiative have standing to assert their declaratory judgment claims that the voter-approved initiative is valid and must be enforced; and (2) the validity of the voter-approved initiative. Because the citizens' claims are not ripe, however, we cannot reach those issues.

I

Petitioners Carroll G. Robinson, Bruce R. Hotze, and Jeffrey N. Daily are citizens of Houston who participated to varying degrees in efforts to place a proposition regarding city revenues and spending on the ballot for public referendum. Hotze and Daily organized the petition drive and helped draft the final language of the proposal. All three Petitioners signed the petition, donated time and money to campaigns promoting the passage of the proposition, and voted in favor of it.

On November 2, 2004, Houston voters passed the proposition, called Proposition 2, as well as Proposition 1, which the Houston City Council had placed on the ballot by its own act in response to Prop. 2.[1] Prop. 1 garnered more votes, with 280,596 favorable votes, or 64% of the total, as opposed to 242,697 favorable votes for Prop. 2, or 56% of the total. However, the City of Houston determined that, because Prop. 1 and Prop. 2 conflict, Prop. 2 was ineffective and unenforceable. The City based that determination both on what Petitioners refer to as Prop. 1's "poison pill

---

[1] Prop. 2 was described on the ballot as:

> The City Charter of the City of Houston shall be amended to require voter approval before the City may increase total revenues from all sources by more than the combined rates of inflation and population, without requiring any limit of any specific revenue source, including water and sewer revenues, property taxes, sales taxes, fees paid by utilities and developers, user fees, or any other sources of revenues.

Prop. 1 was described on the ballot as:

> The Charter of the City of Houston shall be amended to require voter approval before property tax revenues may be increased in any future fiscal year above a limit measured by the lesser of 4.5% or the cumulative combined rates of inflation and population growth. Water and sewer rates would not increase more than the cumulative combined rates of inflation and population growth without prior voter approval. The Charter Amendment also requires minimum annual increases of 10% in the senior and disabled homestead property tax exemptions through the 2008 tax year.

provision,"[2] and on the conflicting-ordinance provision in the Houston City Charter. *See* Hous., Tex., Code Ordinances, City Charter art. IX, § 19 (2006) ("[A]t any election for the adoption of amendments if the provisions of two or more proposed amendments approved at said election are inconsistent the amendment receiving the highest number of votes shall prevail."). The mayor therefore did not certify the results of the passage of Prop. 2 to the secretary of state, and the city council did not enter an order in the city records declaring that Prop. 2 had been adopted. *See* TEX. LOC. GOV'T CODE §§ 9.005(b) (requiring city council to pass an ordinance declaring the adoption of an initiative that receives a majority of the vote), 9.007 (requiring mayor to certify results of an election that passes a charter amendment to the secretary of state).

Petitioners sought relief from the court of appeals, which granted their petition for writ of mandamus, holding that the City had failed to perform the ministerial duties of certifying the results to the secretary of state and entering an order declaring the charter amendments to have been adopted. *In re Robinson*, 175 S.W.3d 824, 826–32 (Tex. App.—Houston [1st Dist.] 2005, orig. proceeding). On the same day that they petitioned for mandamus relief, Petitioners filed the underlying suit seeking a declaratory judgment that Prop. 2 is effective and must be enforced. While that case was pending, the city council passed an ordinance recognizing that both Prop. 1 and Prop. 2 had passed but also declaring that Prop. 1 had received the higher number of votes. As a result, both propositions became part of the Houston City Charter. *See* Hous., Tex., Code Ordinances, City

---

[2] Prop. 1 provides:

> If another proposition for a Charter amendment relating to limitations on increases in City revenues is approved at the same election at which this proposition is also approved, and if this proposition receives the higher number of favorable votes, then this proposition shall prevail and the other shall not become effective.

Charter art. III, § 1; art. VI-a, § 7; art. IX, § 20 (2006). The trial court ultimately granted summary judgment in favor of Petitioners. The court of appeals, however, ruled that Petitioners lacked standing to assert their claims, relying on our holding in *Brown v. Todd*, 53 S.W.3d 297, 305 (Tex. 2001). 260 S.W.3d 463, 470–72 (Tex. App.—Houston [14th Dist.] 2008, pet. filed). The court remanded the case to the trial court to allow Petitioners to amend their pleadings and establish standing. *Id.* at 466.

Robinson, Hotze, and Daily petition for review on two grounds.[3] First, they assert that the court of appeals erred when it determined that Petitioners lack standing. Second, they ask us to consider the merits of their claim that Prop. 2 should be enforced.

II

Ripeness "is a threshold issue that implicates subject matter jurisdiction . . . [and] emphasizes the need for a concrete injury for a justiciable claim to be presented." *Patterson v. Planned Parenthood of Hous. & Se. Tex.*, 971 S.W.2d 439, 442 (Tex. 1998). In evaluating ripeness, we consider "whether, *at the time a lawsuit is filed*, the facts are sufficiently developed 'so that an injury has occurred or is likely to occur, rather than being contingent or remote.'" *Waco Indep. Sch. Dist. v. Gibson*, 22 S.W.3d 849, 851–52 (Tex. 2000) (emphasis in original) (quoting *Patterson*, 971 S.W.2d at 442). Although a claim is not required to be ripe at the time of filing, if a party cannot demonstrate a reasonable likelihood that the claim will soon ripen, the case must be dismissed. *See Perry v. Del Rio*, 66 S.W.3d 239, 251 (Tex. 2001).

[3] The current Houston mayor has been substituted for her predecessor. *See* TEX. R. APP. P. 7.2(a) (automatic substitution when public officer is party in official capacity).

The record is silent as to whether the City has, in fact, failed to comply with the Prop. 2 spending caps. As the parties acknowledged at oral argument, the record in this case indicates that then-mayor Bill White, in response to Prop. 2's inclusion in the City Charter, stated his intention to comply with the caps Prop. 2 imposed. In an attempt to show noncompliance, Petitioners presented several documents with their post-submission brief. Petitioners point to a May 2009 letter from then-controller Annise Parker, who is now mayor of Houston, stating that the controller's office is "no longer responsible for analyzing the budget for compliance with Proposition 2." However, nothing in that letter or elsewhere in the record indicates that the City has actually failed or will soon fail to comply with Prop. 2's spending caps. Petitioners also point to a series of letters they sent to the City's accounting firm. In the letters, they demanded documentation of the City's compliance with Prop. 2, as well as correction of alleged errors in the City's calculation of its compliance with Prop. 2's allowable spending caps. In a transmittal letter to this Court, Petitioners stated that "proper calculations by an independent outside auditor would show that the City is not in compliance [with] the spending controls" set forth in Prop. 2. But a case is not ripe when the determination of whether a plaintiff has a concrete injury can be made only "on contingent or hypothetical facts, or upon events that have not yet come to pass." *Gibson*, 22 S.W.3d at 852. From such inconclusive documentation and mere allegations and speculation, we cannot ascertain with necessary certainty that the City has failed to comply with Prop. 2's spending caps or that it is likely to exceed the spending caps in the near future. *See Perry*, 66 S.W.3d at 249 (stating that a case based on "uncertain or contingent future events" is not ripe for judicial determination); *Patterson*, 971 S.W.2d

at 444 (explaining that a potential injury cannot be ripe unless it is established with certain and definite documentation).

Because there is no showing that Petitioners have suffered a concrete injury, we hold that Robinson, Hotze, and Daily have failed to present a sufficiently ripe, justiciable claim. We express no opinion on whether, even if the case were ripe, Robinson, Hotze, and Daily would have standing to assert their declaratory judgment claims, as "[t]he essence of the ripeness doctrine is to avoid premature adjudication . . . [and] to hold otherwise would be the essence of an advisory opinion, advising what the law would be on a hypothetical set of facts." *Patterson*, 971 S.W.2d at 444.

III

Because Petitioners' claims are not ripe for adjudication, the trial court did not have jurisdiction to hear this dispute. *See Gibson*, 22 S.W.3d at 852. Accordingly, we vacate the judgments of the court of appeals and trial court and dismiss the case for want of jurisdiction.

Paul W. Green
Justice

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0667

EBERHARD SAMLOWSKI, M.D., PETITIONER,

v.

CAROL WOOTEN, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE TENTH DISTRICT OF TEXAS

Argued November 18, 2009

JUSTICE MEDINA announced the judgment of the Court and delivered an opinion in which CHIEF JUSTICE JEFFERSON and JUSTICE HECHT joined.

JUSTICE GUZMAN filed an opinion concurring in the judgment in which JUSTICE LEHRMANN joined and in Parts I & II.B of which JUSTICE WAINWRIGHT joined.

JUSTICE WAINWRIGHT filed an opinion dissenting in part and concurring in the judgment.

JUSTICE JOHNSON filed a dissenting opinion in which JUSTICE GREEN and JUSTICE WILLETT joined.

Texas Civil Practice and Remedies Code section 74.351 requires that a trial court dismiss a health care liability claim unless the claimant serves an expert report within 120 days after filing suit. TEX. CIV. PRAC. & REM. CODE § 74.351(b). This dismissal requirement is subject to the trial court's discretion to grant one thirty-day extension for the claimant to cure a timely served but deficient report. *Id.* § 74.351(c). The trial court in this health care liability case determined that claimant's

timely served report was deficient and dismissed her suit without granting her request for an extension of time to cure the report. The court of appeals agreed the report was deficient but concluded the trial court abused its discretion by denying the requested extension. 282 S.W.3d 82, 91.

We granted the petition to consider under what circumstances a trial court might abuse its discretion when denying such an extension. Like most cases involving trial court discretion, a single rule will not fit every situation, but generally a trial court should grant an extension when the deficient report can be cured within the thirty-day period the statute permits. The court of appeals concluded, among other things, that the case should be remanded to the trial court for further proceedings, and a majority of the Court agrees with that judgment. There is no majority reasoning for why we remand, however. Three members of the Court essentially agree with the court of appeals' analysis, three members disagree with that analysis and would reverse and render, and three members disagree with the court of appeals' analysis but would nevertheless remand in the interests of justice. I am in this last group.

Because the record does not establish that the deficient expert report would have been cured if the extension had been granted in this case, I cannot say that the trial court abused its discretion in denying the extension. Although I disagree with the court of appeals' analysis of the statute and its application of the abuse of discretion standard, I conclude that the interests of justice require a remand to the trial court in this case. Accordingly, I would affirm the court of appeals' judgment remanding this cause as modified by this opinion.

I

Carol Wooten was admitted to Walls Regional Hospital in Cleburne, complaining of severe abdominal pain. Dr. Eberhard Samlowski assumed Wooten's primary care and two days later performed laparascopic gall bladder surgery. The surgery failed to relieve Wooten's pain. Following additional tests and a consult recommending further surgery to explore the abdomen, Dr. Samlowski performed an exploratory laparotomy that revealed a complete bowel obstruction with perforations in the pelvic region. Dr. Samlowski attempted to repair the perforations and adhesions he found during this surgery.

Postoperative complications resulted in Wooten's transfer to Hughley Memorial Medical Center in Fort Worth. Her admission diagnosis there included postoperative cholecystectomy and repair of bowel perforation, sepsis syndrome, acute respiratory distress syndrome, renal insufficiency/failure, acute blood loss anemia, respiratory failure, type 2 diabetes mellitus, and sarcoidosis. Four additional surgical procedures were performed on Wooten at Hughley where she remained for over sixty days.

Wooten subsequently sued Dr. Samlowski for medical negligence, serving Dr. R. Don Patman's expert report 105 days later.[1] In this report, Dr. Patman discusses the standard of care and several instances where Dr. Samlowski's care fell short. In Dr. Patman's opinion, the patient's lab results, complaints, and history did not indicate the need for gall bladder surgery. Instead, Dr. Patman states that Dr. Samlowski should have performed additional tests to discover the actual cause

[1] Dr. Patman is a board-certified general and vascular surgeon and Clinical Assistant Professor of Surgery at the University of Texas Southwestern Medical School and Attending Surgeon at Baylor University Medical Center in Dallas.

of the patient's acute abdominal pain—a complete pelvic bowel obstruction with several areas of necrosis and perforation. Regarding causation, Dr. Patman concludes that Dr. Samlowski's inaccurate diagnosis and incomplete preoperative evaluation proximately caused the patient's subsequent complications and prolonged hospitalization, and that in all likelihood the patient would require future treatment and additional surgery.

Dr. Samlowski promptly filed a motion challenging the report as "wholly deficient in providing any expert opinions regarding specifically how the care [he] rendered . . . proximately caused the injury, harm, or damages claimed." Dr. Samlowski subsequently filed a motion to dismiss after the statutory deadline for serving expert reports had passed. Wooten responded to both motions, arguing that her expert report was sufficient, but also asking for a thirty-day extension to cure the report, if the trial court found it deficient.

The trial court heard the motions and a few days later signed an order dismissing Wooten's case. No record was made at the hearing. The court's order expressly granted both of Dr. Samlowski's motions but did not mention Wooten's request for a thirty-day extension to cure. The court's order, however, disposed of Wooten's pending motion by reciting that all relief not expressly granted was denied. Wooten appealed.

A divided court of appeals reversed and remanded with directions that Wooten be granted a thirty-day extension. 282 S.W.3d 82, 91. Although the court agreed that the expert report was deficient, it nevertheless concluded that the trial court had abused its discretion[2] by not giving

[2] In *Walker v. Gutierrez*, we held that a trial court's denial of an extension to cure an expert report under former Section 13.01(g) of the Medical Liability and Insurance Improvement Act, Texas Revised Civil Statute art. 4590i, was to be reviewed for abuse of discretion. 111 S.W.3d 56, 62 (Tex. 2003). The procedures in former section 13.01 and

Wooten additional time to cure that deficiency. *Id.* at 90–91. The report was deficient, according to the court of appeals, because it did "not represent a good-faith effort to summarize the causal relationship between Dr. Samlowski's failures to meet the applicable standards of care and Wooten's claimed injury, harm, and damages." *Id.* at 90 (citing TEX. CIV. PRAC. & REM. CODE § 74.351(r)(6)). But the court concluded that the trial court should have given Wooten additional time to cure that deficiency because the expert report was a "good-faith attempt" to comply with the statute that could easily be cured with a supplemental report. *Id.* at 91. A dissent argued that the trial court had not abused its discretion in dismissing the underlying lawsuit because the report was not "an objective good faith effort to comply with the [statutory] definition of an expert report." *Id*. at 93 (Gray, C.J. dissenting).

II

Dr. Samlowski's argument here is similar to the dissent in the court of appeals. He complains the court's concession that Wooten's expert report was not a "good faith effort" conflicts with its abuse-of-discretion holding and submits that the former negates the latter. He further submits that the court of appeals' characterization of the report as a "good faith attempt" is a meaningless distinction through which the court has merely substituted its judgment for that of the

---

section 74.351 for serving expert reports and granting extensions of time to correct deficiencies are similar, although the requirements and deadlines are not exactly the same. The former statute required, and current statute requires, dismissal of the suit in the event a timely expert report is not served. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(b); former TEX. CIV. STAT. art. 4590i § 13.01(e). The former statute authorized the trial court, under certain circumstances, to grant extra time to meet the statutory requirements. *See* former TEX. REV. CIV. STAT. art. 4590i § 13.01(g). So does the current statute. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c). Given the structural and substantive similarities between section 74.351 and former section 13.01, the abuse of discretion standard likewise applies to a trial court's decision to deny an extension of time under section 74.351(c).

trial court. Dr. Samlowski thus views a good faith effort in producing an expert report as the predicate for the trial court's discretion under section 74.351(c).

Wooten, on the other hand, argues that trial court discretion under section 74.351(c) should be judged by the relative good faith exhibited in a deficient expert report. The court of appeals' opinion similarly adopts this view, suggesting that the deficiency in Dr. Patman's report was too small to permit the denial of Wooten's motion to cure. 282 S.W.3d at 90. Wooten concludes that the court of appeals' judgment should be affirmed because a fair reading of Dr. Patman's report shows that her claim has merit and the report's defect easily cured.[3]

Neither party's argument proposes a reasonable scheme for the exercise or review of the trial court's discretion under section 74.351(c). Dr. Samlowski's argument suggests that trial court discretion in this instance is absolute, while Wooten's indicates that appellate review is not for abuse of discretion, but de novo. Both arguments are based on a similar faulty premise: that trial court discretion under section 74.351(c) should be measured or controlled by some notion of good faith. Good faith, however, is not mentioned in section 74.351(c).

Subsection (c) merely states that "the court may grant one 30-day extension" if elements of the expert report are deficient. TEX. CIV. PRAC. & REM. CODE § 74.351(c).[4] The term "good faith"

---

[3] Wooten also argued in the court of appeals and in her brief to this Court that Dr. Patman's report was sufficient, but at oral argument she conceded that the report was deficient.

[4] Section 74.351(c) provides in full:

> (c) If an expert report has not been served within the period specified by Subsection (a) because elements of the report are found deficient, the court may grant one 30-day extension to the claimant in order to cure the deficiency. If the claimant does not receive notice of the court's ruling granting the extension until after the 120-day deadline has passed, then the 30-day extension shall run from the date the plaintiff first received the notice.

is used in the statute, but it appears in a later provision discussing motions that challenge "the adequacy of the expert report." *Id*. § 74.351(*l*). Subsection (*l*) states that "[a] court shall grant a motion challenging the adequacy of an expert report [when] the report does not represent an objective *good faith* effort to comply with the definition of an expert report[.]" TEX. CIV. PRAC. & REM. CODE § 74.351(*l*) (emphasis added).

We have explained that a "good faith effort" in this context simply means a report that does not contain a material deficiency. Therefore, an expert report that includes all the required elements, *Jernigan v. Langley*, 195 S.W.3d 91, 94 (Tex. 2006), and that explains their connection to the defendant's conduct in a non-conclusory fashion, *Bowie Memorial Hospital v. Wright*, 79 S.W.3d 48, 53 (Tex. 2002), is a good faith effort. In contrast, a report that omits an element or states the expert's opinions in conclusory form is not a good faith effort. *Am. Transitional Care Ctrs. of Tex., Inc. v. Palacios*, 46 S.W.3d 873, 879 (Tex. 2001). Under these cases, a "good faith effort" will produce an adequate expert report for which no extension under section 74.351(c) is needed. A deficient expert report then is the predicate for the exercise of the trial court's discretion under section 74.351(c), and not, as Dr. Samlowski suggests, proof that the trial court decided the matter correctly.

Dr. Samlowski's complaint that the court of appeals has merely substituted its judgment for that of the trial court, however, is more troubling. The court of appeals described Dr. Patman's report as "thorough, well-detailed, and—except for one small and easily curable deficiency—patently

---

TEX. CIV. PRAC. & REM. CODE § 74.351(c).

and sufficiently specific." 282 S.W.3d at 90. But the underlying merit of Wooten's claim and the relative ease of curing Dr. Patman's report are matters in dispute. It is not enough that the court of appeals would have decided the dispute differently because the abuse of discretion standard generally "insulates the trial judge's reasonable choice from appellate second guessing." W. Wendell Hall, *Standards of Review in Texas*, 38 ST. MARY'S L. J. 47, 62 (2006). As we have said, "to find an abuse of discretion [when factual matters are in dispute], the reviewing court must conclude that the facts and circumstances of the case extinguish any discretion in the matter." *Johnson v. Fourth Court of Appeals*, 700 S.W.2d 916, 918 (Tex. 1985).

A trial court therefore abuses its discretion when it renders an arbitrary and unreasonable decision lacking support in the facts or circumstances of the case. *Goode v. Shoukfeh*, 943 S.W.2d 441, 446 (Tex. 1997). Similarly, a trial court abuses its discretion when it acts in an arbitrary or unreasonable manner without reference to guiding rules or principles. *Mercedes-Benz Credit Corp. v. Rhyne*, 925 S.W.2d 664, 666 (Tex. 1996) (citing *Downer v. Aquamarine Operators, Inc.*, 701 S.W.2d 238, 241 (Tex. 1985). Section 74.351(c)'s text, however, provides no particular guidance on how the court should exercise its discretion, stating merely that "the court may grant one 30-day extension to the claimant in order to cure [a timely but deficient report]." *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c). Guidance must come instead from the broader purposes of the Texas Medical Liability Act of which section 74.351(c) is a part.

III

A core purpose of this legislation was to identify and eliminate frivolous health care liability claims expeditiously, while preserving those of potential merit. Act of June 2, 2003, 78th Leg., R.S.,

ch. 204, § 10.11(b)(1), (3), 2003 Tex. Gen. Laws 847, 884 (seeking to reduce frivolous claims but "in a manner that will not unduly restrict a claimant's rights any more than necessary to deal with the crisis"); *see also Leland v. Brandal*, 257 S.W.3d 204, 208 (Tex. 2008) (noting that in "section 74.351, Legislature struck a careful balance between eradicating frivolous claims and preserving meritorious ones"). To further this goal, the statute sets a deadline for the claimant to substantiate the underlying health care liability claim with expert reports.

The claimant is required to serve each defendant physician or other health care provider with an expert report within 120 days of filing suit. TEX. CIV. PRAC. & REM. CODE § 74.351(a). This report must provide a fair summary of the expert's opinions "regarding applicable standards of care, the manner in which the care rendered by the physician or health care provider failed to meet the standards, and the causal relationship between that failure and the injury, harm, or damages claimed." *Id*. § 74.351(r)(6). If the report is deficient, it may be challenged, and a deficient report may likewise lead to dismissal. *Id*. § 74.351(a), (b) & (*l*). But a deficient report does not invariably require dismissal of the underlying health care liability claim. The statute incorporates a significant exception "explicitly giv[ing] trial courts discretion to grant a thirty day extension so that parties may, where possible, cure deficient reports." *Ogletree v. Matthews*, 262 S.W.3d 316, 320 (Tex. 2007) (citing TEX. CIV. PRAC. & REM. CODE § 74.351(c)).

The overriding principle guiding trial court discretion under section 74.351(c) then is the elimination of frivolous claims and the preservation of meritorious ones. An adequate expert report is how the statute distinguishes between the two. A trial court should therefore grant an extension when a deficient expert report can readily be cured and deny the extension when it cannot. In

making that determination, a trial court may sometimes err and dismiss a claim when the report could have been cured. A reasonable error in judgment, however, is not an abuse of discretion. *See Walker v. Packer*, 827 S.W.2d 833, 839-40 (Tex. 1992) (noting that reviewing court may not substitute its judgment as to factual matters committed to trial court's discretion).

Wooten has conceded in this Court that her report was deficient but maintains that she was entitled to an extension because her expert report could easily have been cured. The court of appeals agreed, but this is only the court's best judgment in the matter. The record does not establish that the deficient report *would* have been cured if the extension had been granted, and a claimant's mere assertion or belief that it *could* have been cured with an extension of time does not demonstrate an abuse of discretion under section 74.351(c). When the trial court denies a motion to cure, the claimant must make a record that demonstrates the deficiency would have been cured.

The claimant must therefore be prepared to cure a deficient expert report whether or not the trial court grants the claimant's motion. When, as in this case, the trial court simultaneously finds the expert report deficient, denies a motion to cure, and dismisses the underlying health care liability claim, the claimant must move the court to reconsider and promptly fix any problems with the report. This should further be done within the statutory, thirty-day period, thereby demonstrating that the report would have been cured had the extension been granted. If this is accomplished and the court refuses to reconsider, the now compliant report will typically establish the trial court's abuse of discretion. Wooten didn't make such a record in the trial court, and thus we are left to speculate about whether she could have cured her expert report with an extension.

IV

I, however, agree with Justice Guzman's view that "trial courts should err on the side of granting claimants' extensions to show the merits of their claims." ___ S.W.3d at ___. The right answer in many cases will be for the trial court to grant one thirty-day extension upon timely request and be done with it. Justice Guzman agrees that this report was deficient, but good enough to warrant an extension, and again I do not disagree.

The statute, however, grants the trial court discretion in the matter, and Justice Guzman's analysis appears to be no different from that of the court of appeals, which I view as merely a substitution of the appellate court's discretion for that of the trial court. Under her analysis, it remains unclear how we are to distinguish between deficient reports that demonstrate merit and deficient reports that do not, other than by Justice Potter Stewart's famous maxim: "I know it when I see it." *Jacobellis v. Ohio*, 378 U.S. 184, 197 (1964) (Stewart, J. concurring) (stating his test for determining hard-core pornography outside the bounds of constitutional protection). Because the expert report was deficient as served, I cannot agree unequivocally that the trial court abused its discretion when denying the motion to cure. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(b) (stating that if an expert report has not been served, the court shall, subject to the court's discretionary power to grant one 30-day extension, dismiss the claim).

V

Although the record in this case does not clearly indicate that the trial court abused its discretion, Dr. Patman's report is largely as described by the court of appeals—"thorough and well-detailed." 282 S.W.3d at 90. The court of appeals was plainly concerned about whether justice had

been done in the trial court. And although the claimant did not follow the procedure I set out in this opinion, I too am not unsympathetic. A claim is not typically saved by doing precisely what the trial court has refused permission to do. But when a motion to cure under section 74.351(c) is denied, the claimant must act to correct any problems with the expert report in a timely manner to demonstrate an abuse of discretion.

The statute, however, does not express the procedure I have outlined today. Because the statute is silent on the principles and procedure that should control the trial court's discretion in this area and the arguments of the parties unfocused as a result, I conclude that the interests of justice will best be served by a remand to the trial court. *See, e.g., Low v. Henry*, 221 S.W.3d 609, 621 (Tex. 2007) (remanding "to allow the parties to present evidence responsive to our [new] guidelines"); *Humble Sand & Gravel, Inc. v. Gomez*, 146 S.W.3d 170, 195 (Tex. 2004) ("Because the parties have not focused on the issue we think is crucial, we conclude that the interests of justice would be best served by a new trial.").

* * *

The court of appeals' judgment is modified to reflect a remand to the trial court for further proceedings, and the court's judgment, as modified, is affirmed.

COURT OF APPEALS FOR THE TENTH DISTRICT OF TEXAS

Argued November 18, 2009

JUSTICE WAINWRIGHT, dissenting in part and concurring in the judgment.

The requirement to serve an expert report from a qualified health care expert on defendant health care providers within 120 days of filing suit is intended to cull out at an early stage of the litigation medical malpractice claims that have not been shown to have merit. The Texas Medical Liability Act instructs courts to dismiss such claims. TEX. CIV. PRAC. & REM. CODE § 74.351. At that stage, the claims that have been shown likely to have merit may proceed. *See Leland v. Brandal*, 257 S.W.3d 204, 208 (Tex. 2008) (noting that section 74.351 strikes a balance between "eradicating frivolous claims and preserving meritorious ones"). The hurdle dividing the two is the expert report.

The Legislature established an expert report hurdle that should be cost and time efficient. *See In re McAllen Med. Cntr., Inc.*, 275 S.W.3d 458, 467 (Tex. 2008). The question in this case is

how to define the characteristics of an inadequate expert report that nevertheless entitle a claimant to obtain a statutory extension to cure the report.

JUSTICE MEDINA attempts to erect a just standard under the applicable statute for reviewing trial court decisions to grant or deny extensions to cure expert reports. In his view, "generally a trial court should grant an extension when the deficient report can be cured within the thirty-day period the statute permits." ___ S.W.3d ___. Unfortunately, this standard is neither cost nor time efficient. His opinion directs the trial court to consider matters beyond the four corners of the report but leaves undecided the limits on the scope of extraneous matter that a trial court may consider. Whether it's an attorney's busy schedule, the client's unavailability, the expert's mistake, or something else, the trial court must conduct a hearing on, and weigh the credibility of, such extraneous assertions. His opinion then requires the plaintiff to move the trial court to reconsider a denial of an extension with the option of filing a cured expert report, the sufficiency of which the trial court then ponders. More time passes. This procedure will often add to the litigation and raise the costs, extend the time, and undermine the purpose of the intended efficient hurdle. The statute contains no mention of extraneous evidence, additional delay, or additional hearings, and neither it nor the opinion place deadlines on completion of these new procedures.

In my view, for an extension to be considered, an expert report must address all of the elements required by statute to be in the report—duty, breach, and a causal relationship between the breach and the plaintiff's injury.[1] An expert report is:

[1] There is no challenge in this case to the expert's qualifications.

> [A] written report by an expert that provides a fair summary of the expert's opinions as of the date of the report regarding applicable standards of care, the manner in which the care rendered by the physician or health care provider failed to meet the standards, and the causal relationship between that failure and the injury, harm, or damages claimed.

TEX. CIV. PRAC. & REM. CODE § 74.351(r)(6). The Legislature determined that a medical malpractice claim supported by an expert report that satisfies subsection (r)(6) possesses the requisite merit to proceed beyond that hurdle. If such a report has not been served on the defendant health care provider within 120 days after the original petition is filed, on motion of the defendant the court "shall" dismiss the claim. *Id.* § 74.351(b). However, if the report fails to satisfy subsection (r)(6) "because elements of the report are found deficient," then the trial "court may grant one 30-day extension to the claimant in order to cure the deficiency." *Id.* § 74.351(c). The legislative requirement that elements of the expert report be found deficient as a condition to considering an extension presumes that the elements at least be included in the report. *See Ogletree v. Matthews*, 262 S.W.3d 316, 320 (Tex. 2007) ("[A] deficient report differs from an absent report."); *Leland*, 257 S.W.3d at 207 ("The statute does not allow for an extension unless, and until, elements of a report are found deficient . . . ."). Unless an expert report addresses all of the required elements, section 74.351(c) does not authorize a trial court to consider an extension. As we explained in *Walker v. Gutierrez*, a claimant's expert report that omits one or more of the statutorily required elements fails to be eligible for a grace period. 111 S.W.3d 56, 65 (Tex. 2003) (interpreting the predecessor statute—the Medical Liability and Insurance Improvement Act, TEX. REV. CIV. STAT. art. 4590i,

§ 13.01(r)(6), *repealed by* Act of June 2, 2003, 78th Leg., ch. 204, § 10.09, 2003 Tex. Gen. Laws 847, 884).[2]

I also question whether the standard for a court's determination of the adequacy of an expert report, a precondition to considering an extension, should be an abuse of discretion. In *American Transitional Care Centers of Texas, Inc. v. Palacios*, we held that to be the standard. 46 S.W.3d 873 (Tex. 2001). But *Palacios* relied in large part on the statement in the predecessor statute, article 4590i, § 13.01(e), that upon failure of the report to satisfy statutory requirements the court must "enter an order as sanctions." *Id.* at 877. In the amended language of the Chapter 74 recodification of article 4590i, if an expert report is not timely served, the trial court shall "enter an order" that dismisses the claim. TEX. CIV. PRAC. & REM. CODE § 74.351(b). The characterization that such an order is a "sanction" has been removed from the text of the statute. Along with it, *Palacios*'s proper and supporting rationale that "[s]anctions are generally reviewed under an abuse-of-discretion standard" was removed as well. *See* 46 S.W.3d at 877.

Appellate review of an expert report is analogous to review of a summary judgment. Appellate courts review the same pieces of paper that the trial court reviews. Personal observations

---

[2] While a trial court's consideration of a motion to dismiss and a motion for an extension are inseparable, *see Ogletree*, 262 S.W.3d at 321, the statutory grounds for dismissal of a claim versus granting an extension to cure an expert report are, to some degree, distinct. Section 74.351(*l*) instructs that a claim for which the corresponding expert report does not represent a good faith effort to provide an adequate expert report "shall" be dismissed on proper motion. TEX. CIV. PRAC. & REM CODE § 74.351(*l*). If that mandate governed the entirety of section 74.351, then the authorization to grant an extension in section 74.351(c) would be meaningless. *See Ogletree*, 262 S.W.3d at 321. Further, "good faith" is a consideration in dismissal of claims but not in extensions to cure the report. I agree with JUSTICE MEDINA's opinion that "good faith" is not a consideration in the analysis of an extension under section 74.351(c). ___ S.W.3d ____. "Good faith" is important to determining the adequacy of an expert report. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(*l*). The term is in the text of section 74.351(*l*) but not in the text of section 74.351(c). It therefore appears that the grounds for considering the dismissal of a report versus the extension of time to serve an adequate report are independent, except for the initial determination that the report is inadequate.

of human behavior that appropriately suggest deference to certain trial court rulings in proceedings with live witnesses do not arise when the trial court interprets a document. *See Otis Elevator Co. v. Parmelee*, 850 S.W.2d 179, 181 (Tex. 1993) ("[Where] the trial court heard no evidence but expressly based its decision on the papers filed and the argument of counsel . . . there are no factual resolutions to presume in the trial court's favor."). I would suggest a de novo standard of review on appeal for rulings on the adequacy of expert reports under Chapter 74. *Cf. Provident Life & Accident Ins. Co. v. Knott*, 128 S.W.3d 211, 215 (Tex. 2003) (reviewing a trial court's grant of summary judgment de novo); *MCI Telecomms. Corp. v. Tex. Utils. Elec. Co.*, 995 S.W.2d 647, 650–51 (Tex. 1999) (reviewing a trial court's legal conclusions on an unambiguous contract de novo).

JUSTICE JOHNSON argues that the word "may" in section 74.351(c) provides a trial court discretion in granting or denying an extension. But the Code Construction Act also instructs that "may" could also denote a legislative grant of power to act. TEX. GOV'T CODE § 311.016(1) ("'May' creates discretionary authority *or grants permission or a power*." (emphasis added)). If courts are interpreting a document and are not issuing a sanction, the logic for an abuse of discretion standard falls away. JUSTICE MEDINA expands the extension analysis to include extraneous evidence, both before and after the trial court's decision, laying the groundwork for his argument for an abuse of discretion standard. Besides the increased litigation expense, such a standard will also result in disparate rulings in different courts addressing materially indistinct expert reports. In these circumstances, a de novo standard would promote consistency and predictability across the state.

Applying a de novo standard of review to this case, I would reverse the trial court's ruling because although elements of the expert report were found deficient, the report addressed each of

the elements required by the statute. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c); *Walker*, 111 S.W.3d at 65. I therefore concur in the Court's judgment, for the reasons explained herein. I also join Parts I and II.B of JUSTICE GUZMAN's concurrence.

_____

Justice Dale Wainwright

OPINION DELIVERED: February 25, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0667

EBERHARD SAMLOWSKI, M.D., PETITIONER,

v.

CAROL WOOTEN, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE TENTH DISTRICT OF TEXAS

Argued November 18, 2009

JUSTICE JOHNSON, joined by JUSTICE GREEN and JUSTICE WILLETT, dissenting.

Texas Civil Practice and Remedies Code section 74.351 provides that a trial court must dismiss a health care liability suit unless the claimant serves an expert report within 120 days after filing suit. It also provides that if a report is served timely but is deficient, the trial court "may" grant one thirty-day extension for the claimant to cure the report.

I agree with Justice Medina that the trial court did not abuse the discretion afforded it by statute in denying Wooten's motion for an extension. I do not agree with him to the extent he indicates that if Wooten had served a cured report and motion for reconsideration within thirty days after the trial court denied her motion for extension, those actions and the cured report could be considered in determining if the trial court abused its discretion by denying the motion for extension.

The trial court's ruling on a motion for reconsideration or motion for new trial would have been reviewable for abuse of discretion had Wooten filed either of them, which she did not. But events occurring after a trial court's ruling on a motion should not be considered in determining whether the ruling was an abuse of discretion.

The Court's action in affirming and modifying the court of appeals' judgment results in the reversal of an errorless trial court judgment. I would reverse the court of appeals' judgment and affirm that of the trial court. Because the Court does not, I dissent.

I. Background

After Carol Wooten sued Dr. Samlowski, alleging that he negligently treated her, she timely filed and served a report by R. Don Patman, M.D. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(a) (requiring a healthcare liability claimant to file an expert report within 120 days of filing suit). Dr. Samlowski timely objected to the report, asserting that the report was conclusory as to the causal relationship between his care and the damages Wooten claimed. *See id.* In her response to the motion, Wooten essentially repeated part of the report's contents, claimed the report met the requirements of section 74.351, and requested a thirty-day extension to cure any inadequacies the trial court found in the report. *See id.* § 74.351(c). Dr. Samlowski then filed a motion to dismiss Wooten's suit because the report was deficient. *See id.* § 74.531(b).

After a hearing where no evidence was introduced, the trial court determined that Dr. Patman's report did not represent a good faith effort to comply with the expert report requirements of section 74.351 and granted Dr. Samlowski's motion to dismiss. *See Am. Transitional Care Ctrs. of Tex., Inc. v. Palacios*, 46 S.W.3d 873, 879 (Tex. 2001) (noting that a report that does not set out

elements required by the statute or states those elements in conclusory fashion does not constitute a good faith effort to comply with the statute). Without taking any further action in the trial court, Wooten appealed.

II. Discussion

A. Expert Report

The claimant in a health care liability suit must serve each defendant with an expert report within 120 days of filing suit. TEX. CIV. PRAC. & REM. CODE § 74.351(a).[1] If an expert report is not timely served, the trial court "shall" dismiss the claim. *Id.* § 74.351(b). The statutory directive to

---

[1] In relevant part, Texas Civil Practice and Remedies Code section 74.351 reads as follows:

> (a) In a health care liability claim, a claimant shall, not later than the 120th day after the date the original petition was filed, serve on each party or the party's attorney one or more expert reports, with a curriculum vitae of each expert listed in the report for each physician or health care provider against whom a liability claim is asserted. The date for serving the report may be extended by written agreement of the affected parties. Each defendant physician or health care provider whose conduct is implicated in a report must file and serve any objection to the sufficiency of the report not later than the 21st day after the date it was served, failing which all objections are waived.
>
> (b) If, as to a defendant physician or health care provider, an expert report has not been served within the period specified by subsection (a), the court, on the motion of the affected physician or health care provider, shall, subject to subsection (c), enter an order that:
>
> > (1) awards to the affected physician or health care provider reasonable attorney's fees and costs of court incurred by the physician or health care provider; and
> > (2) dismisses the claim with respect to the physician or health care provider, with prejudice to the refiling of the claim.
>
> (c) If an expert report has not been served within the period specified by subsection (a) because elements of the report are found deficient, the court may grant one 30-day extension to the claimant in order to cure the deficiency. If the claimant does not receive notice of the court's ruling granting the extension until after the 120-day deadline has passed, then the 30-day extension shall run from the date the plaintiff first received the notice.
>
> . . . .
>
> (l) A court shall grant a motion challenging the adequacy of an expert report only if it appears to the court, after hearing, that the report does not represent an objective good faith effort to comply with the definition of an expert report in subsection (r)(6).

dismiss applies to both absent and deficient reports. *See id.* § 74.351(c); *Lewis v. Funderburk*, 253 S.W.3d 204, 207 (Tex. 2008). However, if an expert report has not been timely served because elements of the report are found deficient, the court "may" grant one thirty-day extension to allow the claimant to cure the deficiency. TEX. CIV. PRAC. & REM. CODE § 74.351(c).

B. Standard of Review

As Justice Medina discusses, the standard by which the trial court's order is reviewed is abuse of discretion. *See* ___ S.W.3d at ___ n.2. And when a trial court order is reviewed for abuse of discretion, the order necessarily is reviewed based on the record as it was at the time the trial court made its ruling. *See Univ. of Tex. v. Morris*, 344 S.W.2d 426, 429 (Tex. 1961); *Stephens County v. J.N. McCammon, Inc.*, 52 S.W.2d 53, 55 (1932) ("When an appellate court is called upon to revise the ruling of a trial court, it must do so upon the record before that court when such ruling was made."); *Beard v. Comm'n for Lawyer Discipline*, 279 S.W.3d 895, 902 (Tex. App.—Dallas 2009, pet. denied); *Methodist Hosps. of Dallas v. Tall*, 972 S.W.2d 894, 898 (Tex. App.—Corpus Christi 1998, no pet.) ("It is axiomatic that an appellate court reviews actions of a trial court based on the materials before the trial court at the time it acted.").

C. Abuse of Discretion and Section 74.351

The Legislature has provided that in statutes "unless the context in which the word or phrase appears necessarily requires a different construction or unless a different construction is expressly provided by statute . . . '[m]ay' creates discretionary authority or grants permission or a power" and "'[s]hall' imposes a duty." TEX. GOV'T CODE § 311.016. The parties do not contend, and the context does not indicate, that in section 74.351 either "shall" or "may" should be given different

meanings than those prescribed by section 311.016. *See FKM P'ship, Ltd. v. Bd. of Regents of Univ. of Houston Sys.*, 255 S.W.3d 619, 633 (Tex. 2008); *see also Fleming Foods of Tex., Inc. v. Rylander*, 6 S.W.3d 278, 284 (Tex. 1999). Thus, if the trial court properly determines that an expert report is deficient, then the statutory language not only authorizes dismissal of the suit, it imposes a duty on the trial court to dismiss it. TEX. CIV. PRAC. & REM. CODE § 74.351 (b)(2). That duty, however, is subject to the permissive power afforded in the same section for the trial court to grant an extension. *Id.* § 74.351(c).

The situation is similar to the one the Court faced in *In re Pirelli Tire, L.L.C.*, 247 S.W.3d 670 (Tex. 2007). There, the Court was called upon to construe a statute providing that if a trial court "finds that in the interest of justice a claim or action to which this section applies would be more properly heard in a forum outside this state, the court *may* decline to exercise jurisdiction." *See* TEX. CIV. PRAC. & REM. CODE § 71.051(a) (emphasis added), *repealed by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 3.09 2003, Tex. Gen. Laws 855. We had previously held that section 71.031 of the Civil Practice and Remedies Code afforded non-residents an absolute right to try cases such as the one filed against Pirelli in Texas courts. *Dow Chem. Co. v. Alfaro*, 786 S.W.2d 674, 676, 678 (Tex. 1990). Thus, the issue before us in *In re Pirelli* was whether the trial court abused its discretion by failing to grant a forum non conveniens motion to dismiss pursuant to the permission granted in section 71.051, despite section 71.031's effective mandate that the trial court exercise jurisdiction over the case. We held that the trial court abused its discretion. We explained that the purposes of the forum non conveniens doctrine informed the guiding principles against which we measured the trial court's exercise of discretion. *In re Pirelli*, 247 S.W.3d at 675-76.

In construing the trial court's authority under the permissive statute, the Court relied, in part, on *In re Van Waters, Inc.*, 145 S.W.3d 203 (Tex. 2004), where the Court concluded mandamus relief was available because the trial court abused its discretion by consolidating twenty cases for trial even though the rule governing consolidations was permissive in nature. *See* TEX. R. CIV. P. 174(a). The Court looked to the principles underlying the rule and said that in *Van Waters* "the trial court's consolidation order did not comport with the principles we have articulated that must guide a court's exercise of discretion under the rule." *In re Pirelli*, 247 S.W.3d at 676.

Similarly, in *In re Ethyl Corp.*, 975 S.W.2d 606, 610 (Tex. 1998), the Court considered the permissive language of Texas Rule of Civil Procedure 174(b), which provides that a trial court "in furtherance of convenience or to avoid prejudice may order a separate trial" of claims or issues. *See* TEX. R. EVID. 174(b). The Court referenced with approval *Womack v. Berry*, 291 S.W.2d 677 (Tex. 1956) and the principle set out there: the permissive "may" does not afford a trial court unlimited discretion, but rather requires the exercise of sound discretion based on all the circumstances of the particular case. *Ethyl Corp.*, 975 S.W.2d at 610.

Just as the Court determined that the trial court's discretion was not unlimited in *In re Pirelli* and *Womack*, a trial court's discretion should not be unlimited pursuant to the permissive "may" in section 74.351(c). Section 74.351(c) requires the court to exercise sound discretion under all the facts and circumstances of the case, including the language and purposes of Chapter 74. *See Ethyl Corp.*, 975 S.W.2d at 610.

D. Factors for a Trial Court to Consider

Wooten argues that if a report such as Dr. Patman's is deficient, the trial court should not be limited to the report in deciding whether to grant an extension. I agree.

When a defendant challenges the adequacy of an expert report, the trial court is to determine whether the report is adequate based only upon the contents of the report. *See Palacios*, 46 S.W.3d at 878. As we noted in *Palacios*, the prior statute focused on the contents of the report with regard to the trial court's determination of whether the report was an objective good faith effort. *Id.* at 878. The current statute also focuses on the report's contents. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(l) (stating that a motion challenging the adequacy of a report shall be granted only if "it appears to the court, after hearing, that the report does not represent an objective good faith effort to comply" with the statutory expert report requirements). In contrast, section 74.351 is not so focused. It places no limitation on what the court may consider in exercising its discretion:

> (c) If an expert report has not been served within the period specified by subsection (a) because elements of the report are found deficient, the court may grant one 30-day extension to the claimant in order to cure the deficiency.

Id. § 74.351(c). So, although the deficient report's content is one factor the trial court must consider in determining if it will grant an extension to cure, the court should not be limited to considering only the content of the report. *See id.*; *Womack*, 291 S.W.2d at 683.

The statute provides guidance as to what factors a trial court may consider when determining whether to grant an extension to cure. Part of the purpose of requiring an expert report in health care liability suits is to remove unwarranted delays and the attendant litigation expense involved in disposing of non-meritorious claims. *See In re McAllen Med. Ctr., Inc.*, 275 S.W.3d 458, 467 (Tex.

2008). Hard-and-fast deadlines for both serving and objecting to reports advance that purpose by accelerating the disposition of such cases. *See Intracare Hosp. N. v. Campbell*, 222 S.W.3d 790, 797 (Tex. App.—Houston [1st Dist.] 2007, no pet.); *Mokkala v. Mead*, 178 S.W.3d 66, 76 (Tex. App.—Houston [14th Dist.] 2005, pet. denied). From the Legislature's establishing of a deadline for serving a report and directing that the suit shall be dismissed unless the deadline is met or the trial court grants an extension "in order *to cure* the deficiency," at least three criteria for the granting of an extension of time can be distilled. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c) (emphasis added). First, the deficient report must qualify as a report, albeit a deficient one. Second, the deficient report must have been served within the statutorily-specified time limit. Third, the deficient report will be cured during the extension if one is granted.

In many, if not most, instances the determination of whether a report will be cured if an extension is granted will be a fact question. And a trial court generally will not have abused its discretion by denying a motion for an extension if there is conflicting evidence on the matter. *See Walker v. Packer*, 827 S.W.2d 833, 839 (Tex. 1992) ("With respect to resolution of factual issues or matters committed to the trial court's discretion, for example, the reviewing court may not substitute its judgment for that of the trial court."); *Davis v. Huey*, 571 S.W.2d 859, 862 (Tex. 1978) (noting that an abuse of discretion does not exist where the trial court bases its decision on conflicting evidence). So, the trial court's discretionary refusal to grant an extension will not ordinarily be an abuse of discretion unless the record conclusively shows that the report would have been timely cured if an extension had been granted.

The import of Justice Medina's opinion is that a cured report served within thirty days after the denial of an extension can be considered in determining whether the trial court abused its discretion in denying the extension. Because a trial court's actions are reviewed based on what was before the court at the time it ruled, I disagree. *See Univ. of Tex.*, 344 S.W.2d at 429; *Stephens County*, 52 S.W.2d at 55. Which is not to say that if a claimant such as Wooten were to make a proper record on a motion to reconsider or motion for new trial, an appellate court could decline to fully review the trial court's action on the motion. For example, if a trial court denied an extension to a claimant whose timely-served report was deficient, then the claimant timely filed a motion for new trial or motion to reconsider and served a cured report, the trial court's ruling on the motion would be reviewable on appeal. *See In re R.R.*, 209 S.W.3d 112, 114 (Tex. 2006) ("We review a trial court's denial of a motion for new trial for abuse of discretion."); *Simon v. York Crane & Rigging Co., Inc.*, 739 S.W.2d 793, 795 (Tex. 1987) (concluding that the decision whether to grant a motion for new trial is addressed to the trial court's discretion, and the court's ruling will not be disturbed on appeal absent a showing of an abuse of discretion). And that review would necessarily be in light of the Legislature's purpose to have non-meritorious cases promptly disposed of while allowing meritorious cases to proceed.

E. Application

Wooten timely served Dr. Patman's report, but there was no evidence before the trial court when it ruled on the motions of Dr. Samlowski and Wooten to prove that the report would have been cured if a thirty-day extension had been granted. Dr. Samlowski's motion to dismiss was heard on August 28, 2007, over three months after he filed his objection to Dr. Patman's report. As relevant

to this matter, the record before the trial court at the hearing consisted of Dr. Patman's report dated April 15, 2007 and served on April 26, 2007, Dr. Samlowski's objection, and Wooten's response to the objection. Wooten's response asserted the report was sufficient and requested an extension of time to cure the report if it was not. Yet there was no evidence in the record about whether the report could or would be cured if an extension were granted. Certainly, Wooten did not conclusively prove that the report would be cured by offering evidence such as a supplemental report actually curing the deficiency in Dr. Patman's report. Thus, she has not shown that the trial court abused its discretion by denying her request for an extension.

III. Remand

Even though a majority of the Court is not of the opinion that the trial court abused its discretion or otherwise committed error by dismissing Wooten's case, the Court nevertheless determines that remand for further proceedings is appropriate. I disagree with that decision for two reasons.

First, our rules provide that a judgment may not be reversed on appeal on the ground that a trial court committed an error of law unless that error (1) probably caused the rendition of an improper judgment, or (2) probably prevented the appealing party from properly presenting the case to the appellate courts. *See* TEX. R. APP. P. 44.1, 61.1; *In re Columbia Med. Ctr. of Las Colinas, L.P.*, 290 S.W.3d 204, 211 (Tex. 2009) ("[A]ppellate courts are limited to the issues urged and record presented by the parties and . . . are specifically limited to reversing judgments only for errors that probably resulted in entry of an improper judgment or precluded a party from properly presenting its case on appeal."); *Pat Baker Co., Inc. v. Wilson*, 971 S.W.2d 447, 450 (Tex. 1998) ("It

is axiomatic that an appellate court cannot reverse a trial court's judgment absent properly assigned error."); *Sears, Roebuck & Co. v. Marquez*, 628 S.W.2d 772, 773 (Tex. 1982) (noting that it is not within the power of an appellate court to reverse a judgment absent error); *Barnum v. Lopez*, 471 S.W.2d 567, 568 (Tex. 1971) (noting that an appellate court may only reverse a case for error committed by the trial court). Neither of those situations exist here because the trial court did not commit error. The substance of the Court's action today is to endorse an erroneous court of appeals judgment that reversed an errorless trial court judgment. The Court then, in effect, grants a new trial even though the rules of procedure adopted by this Court vest such discretion in trial courts, *see* TEX. R. CIV. P. 320, not appellate courts. *See* TEX. R. APP. P. 44.1, 61.1.

Second, when a litigant is faced with a motion to dismiss because of some defect in her pleadings or filings, there is nothing procedurally new about her filing a corrected pleading or, in this case, a corrected report, before seeking relief from the trial court. *Cf. Leland v. Brandal*, 257 S.W.3d 204, 205 (Tex. 2008) (discussing a supplemental expert report served in response to defendants' objections). Nor is there anything new about a litigant whose case has been dismissed seeking a new trial or moving the trial court to reconsider its dismissal ruling and filing post-dismissal affidavits or presenting evidence in support of his or her motion. *See, e.g.*, TEX. R. CIV. P. 320, 329b.

The "procedure . . . outlined today" by Justice Medina is not new, *see* ___ S.W.3d at ___; it encompasses well-known procedural devices. Wooten was not ambushed; she knew exactly what Dr. Samlowski's objection was and had adequate opportunity to show the trial court that the alleged defect in Dr. Patman's report was curable—if it was. She failed to either file a supplemental report attempting to address Dr. Samlowski's objection or present other such evidence at the hearing. Nor

did she seek relief by filing a post-dismissal motion for reconsideration or motion for new trial, serving a supplemental report or offering other evidence to demonstrate that Dr. Patman's report was curable, and requesting a trial court ruling.

In sum, Wooten did not avail herself of standard procedural avenues. She does not present a record that supports reversing the trial court's judgment.

IV. Conclusion

The court of appeals' judgment is erroneous because it reverses an error-free trial court judgment. I would reverse the judgment of the court of appeals and affirm that of the trial court.

Phil Johnson
Justice

OPINION DELIVERED: February 25, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0667

EBERHARD SAMLOWSKI, M.D., PETITIONER,

v.

CAROL WOOTEN, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE TENTH DISTRICT OF TEXAS

Argued November 18, 2009

JUSTICE GUZMAN, joined by JUSTICE LEHRMANN, and by JUSTICE WAINWRIGHT as to Parts I and II-B, concurring.

I agree with the Court that the proper disposition is to remand this case to the trial court for further proceedings; accordingly, I join the Court's judgment. However, I do not join Justice Medina's opinion because I disagree with the new procedure Justice Medina sets out to challenge a trial court's failure to grant a thirty-day extension to cure. Additionally, I disagree with Justice Medina's conclusion that the trial court did not abuse its discretion.

I. Procedural Issues

At issue in this case is whether the trial court abused its discretion by denying Carol Wooten a thirty-day extension to cure her inadequate expert report. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c). Justice Medina holds the trial court did not abuse its discretion, but then proceeds into

new territory to address the manner in which a claimant must challenge a trial court's denial of a motion to cure. Justice Medina concludes that when a trial court finds an expert report inadequate and denies a motion to cure, the claimant "*must* move the court to reconsider and promptly fix any problems." __ S.W.3d at __ (emphasis added). Justice Medina states that a subsequently filed compliant report will demonstrate the trial court abused its discretion by failing to grant the extension. *Id.* Justice Medina's approach thus establishes a new procedure for challenging the denial of a motion to cure.

But rules already exist governing the manner in which a person may challenge the trial court's denial of a motion to cure, *see, e.g.*, TEX. CIV. PRAC. & REM. CODE § 74.351(c); TEX. R. CIV. P. 329b (establishing timeline for filing certain motions); TEX. R. APP. P. 26.1 (establishing timeline for perfecting appeal), and it is unclear how these rules intersect with the procedure created in Justice Medina's opinion. For example, what if a plaintiff believes the initially-served report is not deficient and seeks to challenge the trial court's finding on that issue as well as the failure to grant an extension, as Carol Wooten did in this case? Is that plaintiff also required to submit a new report and, if so, would that action waive the plaintiff's complaint that the initial report was not deficient? Additionally, when a claimant files a new report after the trial court has denied a motion for extension, what happens if a trial court declines to timely set a motion for reconsideration for hearing? Is a claimant then required to challenge the trial court's failure to set the motion for a hearing, further delaying resolution of the question of whether the trial court erroneously denied the extension in the first place? Or must the court of appeals consider whether the amended report is sufficient to establish the trial court abused its discretion in denying an extension? Justice Medina

also does not address when the appellate deadlines begin to run—whether from the time the trial court signs the order of dismissal or, because a claimant must move the court to reconsider, from the denial of a motion to reconsider. Nor does Justice Medina consider whether this deadline is different if a claimant chooses not to file an amended report, but to stand on the initial report filed.

Aside from the procedural questions raised, Justice Medina erroneously concludes that an amended report filed *after* the trial court has denied a motion for extension will "typically establish the trial court's abuse of discretion." __ S.W.3d at __. It is well-established that a reviewing court is to determine whether a trial court abused its discretion based on the record before the trial court at the time the decision was made. *Univ. of Tex. v. Morris*, 344 S.W.2d 426, 429 (Tex. 1961); *see Owens-Corning Fiberglas Corp. v. Malone*, 972 S.W.2d 35, 52 n.7 (Tex. 1998). I believe, based on this principle and the purposes of the expert report requirement and the thirty-day extension to cure, that rather than considering an amended report submitted after the trial court has denied an extension, a reviewing court should analyze whether a trial court abused its discretion based on the expert report initially submitted.

II. Abuse of Discretion

A. Discretion in Reviewing Expert Reports

If a trial court finds an expert report deficient, it "may" grant one thirty-day extension to cure the report. TEX. CIV. PRAC. & REM. CODE § 74.351(c). This statutory authority is couched in permissive terms, but it is not unfettered. *See In re Pirelli Tire, L.L.C.*, 247 S.W.3d 670, 676 (Tex. 2007) (orig. proceeding). While "may" gives a trial court discretion, discretionary decisions must not be arbitrary or unreasonable and must be made with reference to guiding principles. *Id.* (citing

Goode v. Shoukfeh, 943 S.W.2d 441, 446 (Tex. 1997)); *Womack v. Berry*, 291 S.W.2d 677, 683 (Tex. 1956) (orig. proceeding) (noting that use of the permissive word "may" does not vest a court with unlimited discretion, but requires a trial court to exercise that discretion within "limits created by the circumstances of the particular case"). The principles that are to guide a trial court's discretionary decision are determined by the purposes of the rule at issue. *See In re Van Waters & Rogers, Inc.*, 145 S.W.3d 203, 207 (Tex. 2004) (orig. proceeding); *Womack*, 291 S.W.2d at 683. Justice Medina acknowledges this and looks to the "broader purposes" of the Texas Medical Liability Act (TMLA) to determine the principles that should guide a trial court's determination of whether to grant an extension. __ S.W.3d at __. But the purpose of the actual rule permitting a trial court to grant an extension must also be considered. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c).

B. Scope of the Trial Court's Review

One stated purpose of section 74.351 is to "reduce excessive frequency and severity of health care liability claims." *Leland v. Brandal*, 257 S.W.3d 204, 208 (Tex. 2008) (quoting Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.11(b)(1), 2003 Tex. Gen. Laws 847, 884). The expert report requirement helps accomplish this purpose by providing a basis for the trial court to determine a claim has merit. *Id.* at 206-07. Justice Medina and the dissent both conclude that factors other than the report should be considered to determine whether the trial court abused its discretion by denying an extension. But if one purpose of the report is to inform the trial court of the merits of a claim, then the purpose of an extension is to provide a claimant the opportunity to amend a report to a point that would allow the trial court to make that determination. We have previously held that a trial court should look no further than the four corners of an expert report when considering a motion

challenging the adequacy of the report because all the information relevant to that inquiry is contained within the report. *See Bowie Mem'l Hosp. v. Wright*, 79 S.W.3d 48, 52 (Tex. 2002). Section 74.351(l) does not explicitly state that a trial court may not look beyond the report to determine adequacy, but we have held this is so because the statute specifically focuses on what the report discusses. *Am. Transitional Care Ctrs. of Tex., Inc. v. Palacios*, 46 S.W.3d 873, 878 (Tex. 2001). The same is true in a trial court's consideration of a motion for extension: the extension provision focuses only on the report itself. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c) (providing that a trial court may grant an extension if "elements of the report are found deficient"). Further, the expert report requirement is not a substitute for a trial on the merits—just as a trial court should not consider the defendant's pleadings and other evidence when ruling on a motion to dismiss on adequacy grounds, the trial court should similarly refrain from considering these extraneous matters when considering a motion for an extension to cure. *See Palacios*, 46 S.W.3d at 878.

Even though the trial court should only consider the expert report when determining whether to grant an extension, that is not to say a claimant is only entitled to an extension when the report contains specific information or is not entitled to an extension when the report lacks certain information. The Legislature clearly contemplated that trial courts would grant extensions when reports contained varying degrees of deficiencies. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(c) (providing that a trial court may grant one thirty-day extension when "elements" of the report are deficient). Therefore, as long as a claimant has filed a report (as defined by the statute), the specific deficiencies of a report should not determine whether the trial court should grant an extension. Rather, a trial court should be able to determine, based on the initial report, if a claim warrants an

extension—that is, whether a claim could potentially have merit if the report were cured. A report from a qualified health care professional stating a belief that a plaintiff has a claim against a defendant, even though elements of the report are deficient, should be sufficient for a trial court to determine the curability of the report.[1]

As further evidence that a trial court need not consider more than the report itself, nothing in section 74.351 requires a trial court to hold a hearing before denying an extension to cure a deficient report and dismissing a case. *Compare id.* § 74.351(b)–(c) (requiring dismissal if an extension to cure a deficient report is not granted), *with* TEX. REV. CIV. STAT. art. 4590i § 13.01(g) (requiring a court to hold a hearing before granting a single thirty-day extension for good cause under the former statute);[2] *see, e.g.*, *Johnson v. Willens*, 286 S.W.3d 560, 565-66 (Tex. App.—Beaumont 2009, pet. filed) (trial court granted order dismissing case without holding a hearing). Had the Legislature intended for a trial court to consider more than the report when determining whether to grant an extension to cure, it could have required a hearing to allow a claimant to present additional evidence.

---

[1] Justice Medina contends this approach mirrors that of the court of appeals, and that it is unclear the manner in which a court will distinguish between deficient reports that are curable and those that are not. But this mischaracterizes my position—a court will be able to determine from the four corners of the report whether it is from a qualified health care professional stating a belief that the plaintiff has a claim against a defendant.

[2] Act of May 5, 1995, 74th Leg., R.S., ch. 140, § 1, sec. 13.01(g), 1995 Tex. Gen. Laws 985, 986, *amending* the Medical Liability and Insurance Improvement Act of Texas, 65th Leg., R.S., ch. 817, 1977 Tex. Gen. Laws 2039, *repealed by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.09, 2003 Tex. Gen. Laws 847, 884. Former article 4590i section 13.01 was replaced by Texas Civil Practice and Remedies Code section 74.351, as amended.

III. Application

In this case, Wooten's expert report by R. Don Patman, M.D. was over nine single-spaced pages. The report contained Wooten's medical history, the applicable standard of care, and a numbered list of Dr. Samlowski's alleged standard-of-care breaches, including failing to perform a comprehensive diagnostic work-up and thereby failing to determine the extent of Wooten's illness. Dr. Patman concluded that Dr. Samlowski's actions constituted negligence and were the proximate causes of Wooten's developing multiple life-threatening complications. The report inferred that Dr. Samlowski performed an unnecessary surgery, delaying treating Wooten's condition. The report, however, did not contain an explanation of how Dr. Samlowski's actions caused Wooten's injuries and was, as Wooten now acknowledges, deficient. 282 S.W.3d at 90. But the report did not demonstrate, on its face, that it was incurable. To the contrary, it demonstrated that it had the potential to be cured since the report was from a qualified health care professional and explained a belief that Samlowski's actions caused Wooten's injuries. Nothing outside of this report would have aided in the trial court's determination that Wooten's report could have been cured. Therefore, I would hold the trial court abused its discretion in denying Wooten's motion for an extension to cure her report, and allow her the opportunity to attempt to cure her report.

IV. Additional Considerations

Justice Medina and the dissent conclude that the trial court did not abuse its discretion in denying the thirty-day extension because Wooten failed to prove that the report would have been cured. But the provision allowing for an extension is not punitive—it says nothing about withholding an extension when a claimant has failed do something. Rather, the provision is curative,

intending to give claimants an opportunity to save their claims from dismissal. While the Legislature, by enacting the TMLA, sought to "reduce excessive frequency and severity of health care liability claims," Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.11(b)(1), 2003 Tex. Gen. Laws 847, 884, it intended to "do so in a manner that will not unduly restrict a claimant's rights," *id.* § 10.11(b)(3); *Leland*, 257 S.W.3d at 208. "In enacting section 74.351, the Legislature struck a careful balance between eradicating frivolous claims and preserving meritorious ones . . . ." *Leland*, 257 S.W.3d at 208. In order to preserve the highest number of meritorious claims, trial courts should err on the side of granting claimants' extensions to show the merits of their claims. The price of preserving a meritorious claim will be thirty days, compared to a much higher price of dismissal.

V. Conclusion

Because Wooten filed an expert report from a qualified expert explaining a belief that Samlowski's actions caused Wooten's injuries, even though elements of the report were deficient, I would hold the trial court abused its discretion by denying her motion for an extension to cure. I join the Court's judgment remanding the case to the trial court.

OPINION DELIVERED: February 25, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0727

TEXAS INDUSTRIAL ENERGY CONSUMERS, PETITIONER,

v.

CENTERPOINT ENERGY HOUSTON ELECTRIC, LLC,
AND PUBLIC UTILITY COMMISSION OF TEXAS, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued October 6, 2009

JUSTICE WILLETT delivered the opinion of the Court.

This appeal concerns a Public Utility Commission order setting a "competition transition charge" under Chapter 39 of the Utilities Code. The order followed a true-up proceeding initiated by CenterPoint Energy Houston Electric, LLC to recover from ratepayers its investments "stranded" by Texas's transition to a less regulated, more competitive retail electricity market. Groups representing electricity consumers challenged the order, contesting CenterPoint's (1) recovery of interest,[1] and (2) recovery of costs of a valuation panel. The court of appeals affirmed the PUC's order in favor of CenterPoint. We affirm the court of appeals' judgment.

[1] We use "interest" and "carrying costs" interchangeably and intend no distinction between them.

I. Background

A. Overview of Relevant Provisions of Chapter 39

The Legislature in 1999 overhauled the Public Utility Regulatory Act (PURA or Act) to create a "fully competitive electric power industry" in Texas.[2] As part of this restructuring, utilities were required, not later than January 1, 2002, to split into three distinct units: (1) a power-generation company, (2) a retail electric provider, and (3) a transmission and distribution utility.[3] After that date, known as the date of consumer choice, retail consumers could choose among competing retail providers.[4]

As for the transmission and distribution utility, its rates continue to be regulated by the PUC.[5] This unit also continues to provide metering services[6] and to charge retail electric providers for "nonbypassable delivery charges" under rates approved by the Commission.[7] The transmission and distribution utility may also, at the retail provider's request, bill retail customers directly.[8]

[5] *See id.* §§ 39.201–.205; *In re TXU Elec. Co*, 67 S.W.3d 130, 132 (Tex. 2001) (Phillips, C.J., concurring) ("Because the generating companies and retail electric providers must use the existing power lines to move electricity from the plant to the retail customer's home or business, the transmission and delivery companies will remain regulated monopolies.").

[6] TEX. UTIL. CODE § 39.107(a).

[7] *Id.* § 39.107(d).

[8] *Id.* § 39.107(e).

1. Stranded Costs

The Legislature recognized that utilities had made investments in power-generation assets that produced a reasonable return under the existing regulated environment "but might well become uneconomic and thus unrecoverable in a competitive, deregulated electric power market."[9] The Act thus allows utilities to recover these "stranded costs," which consist generally of "the portion of the book value of a utility's generation assets that is projected to be unrecovered through rates that are based on market prices."[10]

The Act deregulated the market in phases. Retail rates were frozen from September 1, 1999 until January 1, 2002.[11]

PURA Section 39.201 directed transmission and distribution utilities to file, on or before April 1, 2000, proposed tariffs that included nonbypassable delivery charges to retail electric providers.[12] It also directed the PUC to approve rates as of January 1, 2002.[13] The nonbypassable delivery charges included a "competition transition charge" (CTC) based on an estimate of stranded costs projected to exist at the end of the freeze period on December 31, 2001.[14] The CTC is "nonbypassable" in "that with limited exceptions, all retail electric customers in an existing utility's

service area will pay charges to allow that utility to recover stranded costs regardless of whether those customers purchase their electricity from that utility, switch to one of its competitors, or generate their own electricity."[15] In estimating stranded costs, utilities were required to use the "ECOM" model,[16] an estimation model earlier used in a 1998 PUC report to the Texas Senate.[17] Section 39.201 allowed a utility to recover estimated stranded costs at any time after the start of the freeze period on September 1, 1999, by issuing bonds and using a "transition charge" (TC) to service the bonds, a process known as "securitization" or "securitization financing,"[18] or by imposing a CTC.[19] But no such charges were imposed because the PUC concluded that under the ECOM model no utility would incur stranded costs.[20]

Under Section 39.262, utilities were required, after January 10, 2004, to file with the PUC a reconciliation of stranded costs and the previous estimate of stranded costs that had been used in determining rates under Section 39.201.[21] By this time, the utility had been unbundled into a transmission and distribution utility, a generating company, and a retail electric provider. Section 39.262 further directed the PUC to conduct a "true-up proceeding" and enter a final order adjusting

[18] *See* TEX UTIL. CODE §§ 39.201(i), .301.

[19] *Id.* § 39.201(i).

[20] *CenterPoint Energy*, 143 S.W.3d at 91.

[21] TEX. UTIL. CODE § 39.262(c).

the CTC to reflect the ultimate valuation of stranded costs.[22] "If, based on the proceeding, the competition transition charge is not sufficient, the commission may extend the collection period for the charge or, if necessary, increase the charge."[23] The adjusted CTC is applied to the nonbypassable delivery rates of the transmission and distribution utility.[24]

For purposes of finalizing the measure of stranded costs, a power-generation company must quantify its stranded costs using "one or more" of four valuation methods specified in the Act: (1) the sale of assets method, (2) the stock valuation method, (3) the partial stock valuation (PSV) method, and (4) the exchange of assets method.[25] If the PSV method is used, the PUC may convene "a valuation panel of three independent financial experts to determine whether the percentage of common stock sold is fairly representative of the total common stock equity or whether a control premium exists for the retained interest."[26]

2. Non-Stranded Cost Adjustments at the True-Up Proceeding

In addition to adjustments for stranded costs, the PUC is directed at the true-up proceeding to make other adjustments to the nonbypassable delivery charges of the transmission and distribution

---

[22] *Id.* §§ 39.201(*l*), .262(c).

[23] *Id.* § 39.201(*l*).

[24] *Id.* §§ 39.201(*l*), .262(c). Alternatively, stranded costs may be securitized, as discussed below.

[25] *Id.* § 39.262(h)(1)–(4). These methods apply except for the valuation of stranded costs for certain nuclear assets. *See id.* § 39.262(h)–(i).

[26] *Id.* § 39.262(h)(3).

utility. These adjustments are made to what are sometimes labeled non-stranded costs, and can result in an increase or decrease in the amount of or collection period of the CTC.[27]

From January 1, 2002, until January 1, 2007, affiliated retail electric providers were required to charge rates six percent below average rates that were in effect on January 1, 1999, subject to certain adjustments including a fuel factor.[28] This price is known as the "price to beat." After January 1, 2002, each affiliated power-generation company is required to file a final fuel reconciliation that calculates a final fuel balance as of December 31, 2001.[29]

To foster competition, each utility or its unbundled power-generation company was required, at least 60 days before January 1, 2002, to conduct a "capacity auction" that sold entitlements to at least 15 percent of the utility's generation capacity.[30] The obligation continued until the earlier of 60 months after the date customer choice is introduced or the date the PUC determined "that 40 percent or more of the electric power consumed by residential and small commercial customers within the affiliated transmission and distribution utility's certificated service area before the onset of customer choice is provided by nonaffiliated retail electric providers."[31]

Under Section 39.262(d), the Act directs the affiliated power-generation company at the true-up proceeding to reconcile and either bill or credit the transmission and distribution utility for the

---

[27] *See id.* § 39.262(g).

[28] *Id.* § 39.202(a).

[29] *Id.* § 39.202(c).

[30] *Id.* § 39.153(a).

[31] *Id.* § 39.153(b).

net sum of (1) the former integrated utility's final fuel balance,[32] and (2) the capacity auction true-up balance, which consists of the difference between the price of power realized at the capacity auctions and the power-cost projections used in the ECOM model.[33]

Section 39.262(e) directs the affiliated retail electric provider at the true-up proceeding to credit the affiliated transmission and distribution utility for "any positive difference between the price to beat established under Section 39.202, reduced by the nonbypassable delivery charge established under Section 39.201, and the prevailing market price of electricity during the same time period."[34] This credit is known as the "retail clawback."

Section 39.262(f) directs the PUC at the true-up proceeding to modify the transmission and distribution utility's nonbypassable rates to reflect adjustment to the amount of "regulatory assets," a special category of assets[35] we have described as "essentially bookkeeping entries."[36]

B. Proceedings Below

Pursuant to Chapter 39, Reliant Energy, Inc., an integrated electric utility, separated into three entities:

---

[32] *Id.* §§ 39.202(c), .262(d)(1).

[33] *Id.* § 39.262(d)(2).

[34] *Id.* § 39.262(e). This credit is subject to a cap. *Id.*

[35] The Act defines regulatory assets as "the generation-related portion of the Texas jurisdictional portion of the amount reported by the electric utility in its 1998 annual report on Securities and Exchange Commission Form 10-K as regulatory assets and liabilities, offset by the applicable portion of generation-related investment tax credits permitted under the Internal Revenue Code of 1986." *Id.* § 39.302(5).

[36] *CenterPoint Energy*, 143 S.W.3d at 85.

- CenterPoint Energy Houston Electric, LLC — the transmission and distribution utility,
- Reliant Energy Retail Services, LLC — the retail electric provider, and
- Texas Genco, LP — the power-generation company.

These entities filed an application with the PUC to determine stranded costs and other true-up balances pursuant to Section 39.262. In this proceeding (the true-up proceeding), the PUC determined that CenterPoint was entitled to recover approximately $2.3 billion in stranded costs and other non-stranded costs. CenterPoint then initiated parallel proceedings to recover these costs either through securitization or a CTC.

The PUC approves securitization financing with a financing order.[37] CenterPoint filed an application for a financing order, and in that proceeding the PUC issued an order in 2005 allowing CenterPoint to securitize most of the previously determined costs, including stranded costs, carrying costs on the stranded costs, and certain regulatory assets, but held that certain non-stranded costs were not "qualified costs"[38] that could be securitized.

In the separate CTC proceeding under review in today's case, CenterPoint sought a CTC that would cover the costs it was not allowed to securitize. In July 2005, the PUC issued an order (the Order) determining that CenterPoint could recover approximately $570 million in non-stranded costs

[37] TEX. UTIL. CODE § 39.303.

[38] *See id.* § 39.302(4). Various sections of Chapter 39 were amended in 2007 to expand the categories of costs that can be securitized. Act of May 28, 2007, 80th Leg., R.S., ch. 1186, 2007 Tex. Gen. Laws 4049. The CTC at issue in this case was eventually securitized, after the PUC order and the interest-rate period at issue in this appeal.

through a CTC, to be imposed over a 14-year period.[39] This amount consisted of a positive capacity auction true-up amount, net of a negative final fuel adjustment, a downward adjustment for the retail clawback, and an additional downward adjustment to reflect the retention of deferred federal income taxes. The final CTC amount included accrued interest on the true-up balance. The Order further allows CenterPoint to receive interest on the unrecovered CTC balance over the 14-year recovery period. One commissioner dissented from the part of the Order allowing CenterPoint to recover interest on the true-up balance under PUC Rule 25.263(*l*)(3), discussed below.

The PUC also allowed CenterPoint to recover certain rate-case expenses, including a roughly $5.2 million fee charged by J.P. Morgan Securities Inc. and its law firm. This fee pertained to services by three J.P. Morgan bankers as the valuation panel convened by the PUC under Section 39.262(h)(3), after Texas Genco elected to rely on the PSV method to value its generating assets.

Two consumers groups, Texas Industrial Energy Consumers (TIEC) and Gulf Coast Coalition of Cities (GCCC), intervened in the CTC proceeding. Both challenged CenterPoint's recovery of interest, and TIEC additionally challenged CenterPoint's recovery of the valuation-panel fee. They appealed the Order to state district court.[40] The trial court agreed with the consumer groups that CenterPoint could not recover interest on the CTC balance from ratepayers because this Court had invalidated the PUC rule allowing such recovery in *CenterPoint Energy, Inc. v. Public Utility*

Commission.[41] The trial court further held that CenterPoint could not recover the valuation-panel fee.

The court of appeals reversed the trial court's judgment and rendered judgment affirming the PUC's Order.[42]

II. Discussion

A. Interest on the CTC True-Up Balance

The PUC allowed CenterPoint to recover interest on the CTC balance under its Rule 25.263(*l*)(3), which at the time provided:

> The TDU [transportation and distribution utility] shall be allowed to recover, or shall be liable for, carrying costs on the true-up balance. Carrying costs shall be calculated using the utility's cost of capital established in the utility's UCOS [unbundled cost-of-service] proceeding, and shall be calculated for the period of time from the date of the true-up order until fully recovered.

The consumer groups argue that interest on the true-up balance is not allowed because we invalidated Rule 25.263(*l*)(3) in its entirety in *CenterPoint Energy*. The PUC and CenterPoint argue that we only invalidated the *timing* portion of the Rule — the date that interest begins to accrue. We agree with the PUC and CenterPoint. Any fair reading of our *CenterPoint Energy* decision makes clear we were focused on the date, not the rate.

---

[41] 143 S.W.3d 81 (Tex. 2004).

[42] 263 S.W.3d 448, 468.

We stated in *CenterPoint Energy* that "Rule 25.263(*l*)(3) is invalid,"[43] and we reasonably read that statement in context.[44] We explained:

> No one disputes that the Legislature intended electric utilities to recover carrying costs on stranded costs to compensate for the financing costs incurred during the stranded cost recovery period. Nor does anyone dispute that prior to deregulation, carrying costs on investments in generation plants were included in rates. The only issue before us is the date from which carrying costs may be recovered once deregulation commenced: January 1, 2002, which was the first day of deregulation, or two or more years later, at the end of final true-up proceedings.[45]

We did not hold utilities cannot recover interest on their stranded costs or other costs. Indeed, we held that the rule was too parsimonious because it did not provide for the recovery of interest for the period between January 1, 2002, the date consumer choice commenced, and the date of the final true-up order. The basis of our holding was that failure to allow the recovery of interest during this period would fail to compensate the utilities fully for their stranded costs that existed on December 31, 2001, the last day of the freeze period.[46] "A two- or three-year gap in recovery of carrying costs would not permit generation companies full recovery of their stranded costs as the Legislature intended."[47] We further noted that in allowing securitization to reduce stranded costs, the Act specifically states that the purpose of securitization is to enable utilities to use this financing

---

[43] 143 S.W.3d at 84, 99.

[44] *See Dresser Indus., Inc. v. Lee*, 880 S.W.2d 750, 753 (Tex. 1993) ("The Court's language must be read in the context of the issues decided.").

[45] *CenterPoint Energy*, 143 S.W.3d at 83. *See also id.* at 86 ("The only issue is whether the Act contemplates roughly a two-year gap in recovery of carrying costs between the date regulation ceased (January 1, 2002) and the date of a final true-up order (2004 or perhaps beyond).").

[46] *Id.* at 84 (citing TEX. UTIL. CODE §§ 39.252(a), .201(g)).

[47] *Id.*

technique "to recover regulatory assets and stranded costs, because this type of debt will lower the carrying costs of the assets."[48]

We invalidated Rule 25.263(*l*)(3) only insofar as it picked the wrong start date for the accrual of carrying costs:

> We conclude that the Commission's construction of chapter 39 was incorrect regarding the *date* as of which stranded costs are to be determined. . . . Because the Commission's rule is based on an incorrect construction of the Act *in this regard*, it is infirm.[49]

We did not hold broadly that the PUC could not allow utilities to recover interest on the CTC balance.

The consumer groups argue that even if the Court only invalidated the timing element of Rule 25.263(*l*)(3) — the date interest begins to accrue — that portion of the Rule is not severable, and the whole Rule is therefore invalid. The consumer groups provide no persuasive reason why the PUC cannot follow the Court's directive regarding the accrual date but otherwise enforce its Rule by allowing the recovery of interest. The Rule is part of Chapter 25 of Title 16 of the Texas Administrative Code, covering substantive rules of the PUC applicable to electric service providers. Rule 25.3(a) of the same Chapter states that "[i]f any provision of this chapter is held invalid, such invalidity shall not affect other provisions or applications of this chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this chapter are declared to be severable." The PUC thus followed its own severability rule and enforced Rule

---

[48] TEX. UTIL. CODE § 39.301, quoted in *CenterPoint Energy*, 143 S.W.3d at 89.

[49] *CenterPoint Energy*, 143 S.W.3d at 87 (emphasis added).

25.263(*l*)(3), but with an accrual date consistent with *CenterPoint Energy*. We see no error in this approach, which complied with our decision while also enforcing the remainder of the PUC's rule allowing the recovery of interest.

By analogy to statutory construction, severability is a question of legislative intent.[50] Here, the body enacting the regulation in issue has expressly stated by general rule that it intends invalid provisions to be severable. Absent an expression of intent regarding severability, the valid remaining portions of a statute remain enforceable if the invalidity of one portion "does not affect other provisions or applications of the [rule] that can be given effect without the invalid provision or application."[51] Here, the PUC was able to otherwise enforce its rule by modifying only the date that interest begins to accrue. It specifically concluded in the Order that PURA's function is not impaired by *CenterPoint Energy*'s invalidation of a portion of Rule 25.263(*l*)(3) and that the remainder of the Rule should be given effect.[52] We agree with the PUC that there is no ground to invalidate the entire rule because of the one defect we found in *CenterPoint Energy*. In fact, invalidating the whole rule and barring any recovery of interest whatsoever would *contradict* our view in *CenterPoint Energy*

---

[50] *See* TEX. GOV'T CODE §§ 311.032(a)–(b), 312.013(b).

[51] *Id.* §§ 311.032(c), 312.013(a).

[52] The Order states that the interest-rate portion of Rule 25.263(*l*)(3) is severable from the invalidated accrual start date in the Rule because "[t]here is no logical connection between the accrual of interest at a utility's UCOS WACC [weighted-average cost of capital] and the time period specified by the rule." In Conclusion of Law 12 to the Order, the PUC concludes: "The function of PURA is not impaired by [*CenterPoint Energy*'s] invalidation of the portion of [Rule] 25.263(*l*)(3) that required interest on a utility's true-up balance to accrue starting on the date of the Commission order in the utility's true-up case." Conclusion of Law 13 further reasons: "Because [Rule] 25.263(*l*)(3) requires that interest accrue starting on a date not fixed by the rule or PURA, and because such interest would accrue for a period of time that was unknown at the time of adoption of the rule, there is no connection between the interest-accrual start date and the portion of the rule requiring accrual at a utility's UCOS WACC."

"that the Legislature intended electric utilities to recover carrying costs on stranded costs to compensate for the financial costs incurred during the stranded cost recovery period," consistent with the prior ratemaking principle that "carrying costs on investments in generation plants were included in rates."[53]

GCCC separately argues that regardless of the validity of Rule 25.263(*l*)(3), the 11.075 percent interest rate chosen by the PUC was arbitrary and capricious, and not supported by substantial evidence, because there was no evidence in the record that it reflected CenterPoint's current weighted-average cost of capital (WACC).[54] For several reasons, we are unpersuaded.

First, given our conclusion that Rule 25.263(*l*)(3) remains valid with the corrected start date mandated by *CenterPoint Energy*, we agree with the court of appeals that, as a general proposition, an agency cannot be said to "err or act arbitrarily or capriciously by complying with the mandate of its own rule,"[55] assuming that the rule is based on a valid delegation of legislative authority and is a reasonable exercise of that authority. Indeed, we have stated that if an agency "does not follow the clear, unambiguous language of its own regulation, we reverse its action as arbitrary and capricious."[56]

---

[53] *CenterPoint Energy*, 143 S.W.3d at 83.

[54] We understand TIEC to argue that the interest rate chosen by the PUC is improper only if Rule 25.263(*l*)(3) is invalidated in its entirety. It argues in its brief on the merits that "[b]ecause the rule was invalidated in its entirety, the use of an 11.075% interest rate is arbitrary and capricious," and that "[b]ecause this Court invalidated the Rule in *CenterPoint Energy*, the Commission had no authority to rely on the Rule by applying the interest rate adopted in the UCOS proceeding."

[55] 263 S.W.3d at 458.

[56] *Rodriguez v. Serv. Lloyds Ins. Co.*, 997 S.W.2d 248, 255 (Tex. 1999).

Second, GCCC does not persuade us that the PUC can as a practical matter constantly re-determine a utility's cost of capital or is required by law to do so. The PUC selected the 11.075 percent rate in the true-up proceeding where a final order issued in December 2004 and in the financing order proceeding where a final order issued in March 2005. This rate was based on the weighted-average cost of capital established in the utility's 2001 unbundled cost-of-service (UCOS) proceeding, adjusted for federal income taxes,[57] and GCCC offers no proof or argument that the earlier proceedings in which CenterPoint's cost of capital was determined were flawed. Further, as all parties agree, the PUC in 2006 prospectively reset the interest rate on the CTC to reflect changed economic conditions. The rate was lowered to 8.06 percent.[58]

Finally, the PUC points to expert testimony in the administrative record offered by CenterPoint that the 11.075 percent interest rate was appropriate given the risk associated with the recovery of CTCs, the fact that the rate was a pre-tax rate that had to be grossed up to ensure the

---

[57] As the Order explains, the 11.075 percent rate is "stated on a pre-tax basis. By accruing interest at a pretax rate, CenterPoint will recover the interest due at its actual UCOS WACC, after the effect of taxes."

[58] As the court of appeals explained, "[i]n July 2006, the Commission amended rule 25.263(*l*)(3) to both conform to *CenterPoint Energy, Inc.*, and alter the rate methodology." 263 S.W.3d at 457 n.10 (citing 31 Tex. Reg. 5603 (2006)). And as TIEC explains in its brief on the merits, the revised rule "replaced the interest rate from the utility's WACC as established in the UCOS proceeding with a new method for calculating interest, which relies on updated information regarding the utility's marginal cost of long term debt and results in a significantly lower interest rate. . . . In response to the new rule, CenterPoint made a compliance filing seeking to adjust the interest rate to reflect its current financial status and the risk associated with recovering the CTC balance from ratepayers. CenterPoint agreed to reduce its interest rate, on a going forward basis, from 11.075% to 8.06% based on this new rule." CenterPoint further explains that it agreed to the lower interest rate as part of the settlement of a then-pending rate case. CenterPoint thus contends that since the consumer groups did not appeal the 11.075 percent interest rate selected in the true-up proceeding, they can only complain in today's case about the use of the 11.075 percent interest rate for the period from December 17, 2004, the date of the final order in the true-up proceeding, until August 1, 2006, the date CenterPoint began using the 8.06 percent interest rate. CenterPoint also points out that some time after August 1, 2006, the CTC balance was securitized. Once the CTC balance was received through a bond offering, the interest rate on the CTC balance earlier assigned by the PUC became irrelevant.

recovery of income taxes on the CTC, the use of the same rate in other proceedings, and other factors. The consumer groups do not challenge the credentials of the expert, whose testimony was offered by CenterPoint to rebut the argument that the previously determined rate had become outdated and that one of several other rates proposed by intervenors and PUC staff should be used. While there was some conflicting testimony on the appropriate interest rate, under the applicable substantial evidence standard of review,[59] we ask only whether some reasonable basis exists in the record for the agency's action.[60] That standard was met here.[61]

In sum, the PUC did not act in an arbitrary or capricious manner in (1) following its own rule, (2) relying on a previously determined cost of capital in proceedings whose fairness is not challenged here, (3) ultimately choosing an interest rate for which a reasonable basis exists in the record, and (4) substantially lowering the interest rate when circumstances warranted.

B. Control Premium Valuation-Panel Fee

The PUC convened the valuation panel under Section 39.262(h)(3) to help determine the market value of transferred generation assets under the PSV method. The PUC retained J.P. Morgan to serve as the valuation panel and approved its $5.2 million fee. J.P. Morgan insisted that CenterPoint guarantee payment of the fee on behalf of Texas Genco. Texas Genco and CenterPoint

---

[59] TEX. UTIL. CODE § 15.001.

[60] *See Mireles v. Tex. Dep't of Pub. Safety*, 9 S.W.3d 128, 131 (Tex. 1999) ("A court applying the substantial evidence standard of review may not substitute its judgment for that of the agency. The issue for the reviewing court is not whether the agency's decision was correct, but only whether the record demonstrates some reasonable basis for the agency's action. Courts must affirm administrative findings in contested cases if there is more than a scintilla of evidence to support them.") (citations omitted).

[61] Under substantial evidence review, "an administrative decision may be sustained even if the evidence preponderates against it." *Id.*

(then Texas Genco's corporate parent) ultimately signed a contract agreeing to be jointly obliged for the fee, and CenterPoint ultimately paid it. As part of the fee negotiations, CenterPoint sought agreement that PUC staff would support recovery by CenterPoint of the valuation-panel fee. PUC staff agreed not to contest such recovery.

The PUC allowed CenterPoint to recover this fee from ratepayers through the CTC. It found the fee reasonable, and also noted in the Order that "[t]he true-up applicants were required to incur this expense by the Commission, and the expense was necessary for the resolution of the case."

TIEC argues the valuation-panel fee must be borne by Texas Genco, the company receiving the transferred generation assets, and the PUC exceeded its authority in allowing CenterPoint to recoup the fee through its retail customers. TIEC argues that this sentence from Section 39.262(h)(3) prohibits cost-shifting and requires Texas Genco to incur the fee alone: "The costs and expenses of the panel, as approved by the commission, shall be paid by each transferee corporation." The PUC and CenterPoint respond that Section 39.262(h)(3) only specifies that the transferee (as opposed to the PUC or someone else) is *initially* responsible for paying the valuation-panel fee, but the statute does not limit how the transferee satisfies that obligation or prohibit the PUC from allowing CenterPoint to recover the fee through its rates. They contend that since CenterPoint guaranteed the fee and ultimately paid it, it can recoup it under Section 36.061(b)(2), applicable generally to ratemaking proceedings. Under this provision, the PUC may allow recovery of "reasonable costs

of participating in a proceeding under this title not to exceed the amount approved by the regulatory authority."[62]

So does "shall be paid by the transferee corporation" in Section 39.262(h)(3) mean Texas Genco must exclusively underwrite the fee, or does it merely require Texas Genco to cover the fee in the first instance, while letting other law (including Section 36.061(b)(2)) determine how that obligation is ultimately funded or perhaps recouped through rates like other rate-case expenses?

The court of appeals' careful analysis persuades us that CenterPoint and the PUC, whose reasonable construction of PURA merits "serious consideration,"[63] have the better argument:

> [B]y providing that the transferee corporations "shall pay" valuation panel expenses, the legislature did not intend to preclude those expenses ultimately being recovered through rates under PURA 36.061(b)(2). [Section 39.262(h)(3)], in other words, reflects not a mandate that such expenses be borne exclusively by transferee corporations, as TIEC suggests, but merely an expectation that the expenses would be "paid" by transferee corporations in the same manner that parties to rate proceedings routinely pay legal expenses, consultant fees, and myriad other "costs of participating in a proceeding" that are potentially eligible for later recovery under PURA section 36.061(b)(2).[64]

It is true, as TIEC contends, that state-agency powers are limited, and agencies may not "on a theory of necessary implication from a specific power, function, or duty expressly delegated, erect and exercise what really amounts to a new and additional power or one that contradicts the statute,

---

[62] TEX. UTIL. CODE § 36.061(b)(2).

[63] *First Am. Title Ins. Co. v. Combs*, 258 S.W.3d 627, 632 (Tex. 2008).

[64] 263 S.W.3d at 462.

no matter that the new power is viewed as expedient for administrative purposes."[65] But that admonition is inapposite here.

PURA nowhere discusses the interplay between Sections 36.061(b)(2) and 39.262(h)(3), much less suggests any conflict between them. Contrast that to other examples within PURA where the Legislature acknowledged potential conflicts and clarified which provision would control.[66] PURA's drafters knew how to resolve perceived inconsistences, and absent any indication that lawmakers desired one PURA provision to prevail over another, we must presume they wanted both sections here to be fully effective.

TIEC argues principally that Section 39.262(h)(3) must control because its specific focus on valuation panels gives it a precision that Section 36.061(b)(2)'s ordinary cost-recovery regime lacks. But the specific-controls-over-general maxim "applies only when overlapping statutes cannot be reconciled."[67] Here, we can construe the two provisions in a way that harmonizes rather than conflicts.[68] Section 39.262(h)(3) does not restrict, or even address, how the transferee corporation fulfills its panel-fee obligation. It nowhere prohibits, even implicitly, a transferor corporation from

---

[65] *Pub. Util. Comm'n v. GTE-Southwest, Inc.*, 901 S.W.2d 401, 407 (Tex. 1995) (quoting *Sexton v. Mount Olivet Cemetery Ass'n*, 720 S.W.2d 129, 137–38 (Tex. App.—Austin 1986, writ ref'd n.r.e.)). *See also Pub. Util. Comm'n v. City Pub. Serv. Bd.*, 53 S.W.3d 310, 316 (Tex. 2001).

[66] *See* TEX. UTIL. CODE §§ 36.007(d), 36.204, 36.351(a), 39.158(d), 39.263(d). In addition, the fact that Section 39.262(h)(3) is the later-enacted provision — and is silent regarding any interplay with Section 36.061(b)(2) — gives additional support for the view that the Legislature intended no impact on PURA's preexisting cost-recovery provision.

[67] *Lexington Ins. Co. v. Strayhorn*, 209 S.W.3d 83, 86 (Tex. 2006).

[68] *See* TEX. GOV'T CODE § 311.026(a) ("If a general provision conflicts with a special or local provision, the provisions shall be construed, if possible, so that effect is given to both."); *see also Argonaut Ins. Co. v. Baker*, 87 S.W.3d 526, 531 (Tex. 2002).

covering a transferee's upfront obligation to pay the valuation-panel fee and later seeking recovery as a "reasonable cost[] of participating in a proceeding" under Section 36.061(b)(2).

In short, the provisions do not collide because they govern different subjects — initial payment of the valuation-panel fee (Section 39.262(h)), and separately, the PUC's authority to permit the recoupment of certain rate-case expenses (Section 36.061(b)(2)). True, one provision has a narrower focus, but they are easily harmonized, as the PUC did here. TIEC's construction would create a conflict where none need exist. We agree with the court of appeals' analysis.

III. Conclusion

We affirm the court of appeals' judgment.

_____

Don R. Willett
Justice

OPINION DELIVERED: October 22, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-0751

TEXAS MUTUAL INSURANCE COMPANY, PETITIONER,

v.

TIMOTHY J. RUTTIGER, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIRST DISTRICT OF TEXAS

Argued April 14, 2010

JUSTICE JOHNSON delivered the opinion of the Court with respect to Parts I, II, III, IV, and VI, in which JUSTICE HECHT, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE WILLETT and JUSTICE GUZMAN joined, and an opinion with respect to part V, in which JUSTICE HECHT, JUSTICE WAINWRIGHT, and JUSTICE MEDINA joined.

JUSTICE WILLETT filed a concurring opinion, in which JUSTICE GUZMAN joined.

CHIEF JUSTICE JEFFERSON filed a dissenting opinion, in which JUSTICE GREEN and JUSTICE LEHRMANN joined.

In 1989 the Legislature enacted major amendments to the Workers' Compensation Act (Act). TEX. LAB. CODE §§ 401.001–506.002. The amendments included significant reforms, among which were changes in how to calculate income benefits for injured workers, the amount of income benefits workers could recover, the dispute resolution process, the addition of an ombudsman program to provide assistance for injured workers who had disputes with insurers, and increasing sanctions for violations of the Act. In this case, the issues presented involve, among other matters, (1) the interaction of the current Act with the Insurance Code and the Deceptive Trade Practices Act

(DTPA), and (2) whether the 1989 restructuring of the Act and subsequent amendments obviate the need we found in *Aranda v. Insurance Co. of North America*, 748 S.W.2d 210 (Tex. 1988) to engraft an extra-statutory cause of action for breach of the duty of good faith and fair dealing onto the workers' compensation system.

We conclude that (1) claims against workers' compensation insurers for unfair settlement practices may not be made under the Insurance Code, but (2) claims under the Insurance Code may be made against those insurers for misrepresenting provisions of their policies, although in this case there was no evidence the insurer did so.

Further, seven members of the Court would consider whether *Aranda* should be overruled even though the court of appeals did not reach the issues involving the cause of action for breach of the duty of good faith and fair dealing. Four Justices would hold that *Aranda* should be overruled while three would hold that it should not be. Two members of the Court would have the court of appeals first consider the issues involving breach of the duty of good faith and fair dealing before addressing them. In accordance with these views, a majority of the Court joins in the judgment reversing the judgment of the court of appeals and rendering judgment in part and remanding in part for further proceedings as to the issues involving breach of the duty of good faith and fair dealing.

I. Background

On June 21, 2004, Timothy Ruttiger was working for A&H Electric in Galveston when he reported to his supervisor that he was injured while carrying pipe. He went to the University of Texas Medical Branch at Galveston where he was diagnosed as having bilateral inguinal hernias. Later that day he went to A&H's office and filled out a TWCC-1 form reporting that he had been

injured on the job. *See* TEX. LAB. CODE § 409.001.[1] Ruttiger was scheduled for hernia repair surgery to be performed on July 14, 2004.

When A&H's workers' compensation carrier, Texas Mutual Insurance Company (TMIC), received written notice that Ruttiger was claiming an injury, it initiated temporary income benefit payments and began investigating. As part of the investigation process, TMIC's adjuster, Audie Culbert, interviewed A&H employees. One employee told Culbert that Ruttiger had been at a softball tournament the weekend before the alleged injury and had come to work on the morning of the incident with a limp. She later reported that one of Ruttiger's co-workers informed her Ruttiger was injured at the softball game and "bragged about getting it paid by workers' comp." The vice president of A&H said that Ruttiger "wasn't 100 percent" when he arrived at work on the day of the incident and he "never got a straight story" on how Ruttiger was injured. Culbert testified at trial that he attempted to contact Ruttiger by telephone and by mail, but was unable to do so. Ruttiger denied receiving a letter or phone call from TMIC.

On July 11, Ruttiger's doctor notified him that TMIC refused to pay for the hernia surgery. Ruttiger testified that he then called Culbert who told him the claim was denied because the hernias resulted from Ruttiger's playing softball and were not work related.

On July 12, 2004, TMIC filed a "Notice of Refused or Disputed Claim" with the Texas Workers' Compensation Commission[2] and discontinued temporary income benefit payments after

[1] Further references to the Labor Code will generally be by reference to section numbers.

[2] In 2005, the Legislature abolished the Texas Workers' Compensation Commission and transferred its functions to the Texas Department of Insurance, Workers' Compensation Division. *See* Act of May 29, 2005, 70th Leg., R.A., ch. 265, § 8.001, 2005 Tex. Gen. Laws 469, 607-08. For ease of reference we will refer to the Division, or "WCD" instead of the Commission.

having sent one check. *See id.* § 409.021 (providing that a carrier commits an administrative violation if it does not, no later than the 15th day after the carrier receives written notice of an injury, either begin paying benefits or notify the WCD and the employee of its refusal to pay as well as notifying the employee of (1) his right to request a benefit review conference and (2) the means to obtain further information).[3] In its notice, TMIC stated that its investigation revealed Ruttiger sustained the hernias while he was playing softball and that it "disput[ed] this claim in its entirety." *See id.* § 409.022 (providing that an insurer's notice of refusal to pay benefits must specify the grounds for the refusal, that absent new evidence such grounds are the only basis on which the carrier may dispute compensability in a later proceeding, and failure to comply with such requirements is an administrative violation). The notice included the WCD's telephone number and a statement that an injured worker whose claim was denied had the right to contact the Division to request a benefit review conference (BRC). *See id.* § 409.022(a)(2).

Two days after he was notified that TMIC refused to pay for his surgery, Ruttiger hired a lawyer to help with his claim. Approximately two months later, in September, Ruttiger's lawyer

---

[3] When TMIC received notice of Ruttiger's claim, it was required to notify the WCD of the claim. TEX. LAB. CODE § 409.005. The WCD was then required to notify Ruttiger of the Act's benefits and procedures:

> **Plain Language Information; Notification of Injured Employee**
> (a) The division shall develop information for public dissemination about the benefit process and the compensation procedures established under this chapter. The information must be written in plain language and must be available in English and Spanish.
>
> (b) On receipt of a report [of injury], the division shall contact the affected employee by mail or by telephone and shall provide the information required under Subsection (a) to that employee, together with any other information that may be prepared by the office of injured employee counsel or the division for public dissemination that relates to the employee's situation, such as information relating to back injuries or occupational diseases.

Id. § 409.013.

contacted TMIC and asked for a copy of the notice of disputed claim. After another month, on October 22, 2004, Ruttiger's lawyer requested the WCD to set a BRC. *See id.* § 410.021 (providing that a benefit review conference is a non-adversarial, informal dispute resolution proceeding designed, among other things, to mediate and resolve disputed issues). The BRC was set for December 2, 2004. *See id.* § 410.025(a); 28 TEX. ADMIN. CODE § 141.1 (providing that a BRC must be set within forty days after the request is received, but providing that in cases warranting expedited processing the BRC must be set within twenty days). The WCD failed to notify TMIC of the setting so the conference was rescheduled for January 6, 2005. At the January conference, Ruttiger and TMIC entered into a benefit dispute agreement. They agreed that (1) Ruttiger suffered a compensable injury on June 21, 2004; (2) he did not have disability from June 22, 2004 through August 22, 2004; and (3) he had disability from August 23, 2004 "to the present." The WCD approved the agreement. Following the BRC, TMIC paid temporary income benefits for the agreed period of past disability and re-initiated weekly benefits. *See* TEX. LAB. CODE § 408.101. TMIC also paid for Ruttiger's surgery and other medical expenses related to his hernias. Ruttiger reached maximum medical improvement on August 1, 2005, and was assigned a 1% impairment rating. *See id.* §§ 408.121–.122.

On June 16, 2005 while his claim was still pending before the WCD and before he had reached maximum medical improvement, Ruttiger sued TMIC and Culbert (generally referred to collectively as TMIC) for violations of article 21.21 of the Insurance Code,[4] the common law duty

[4] Ruttiger's pleadings referenced article 21.21 of the Insurance Code. In 2003 the Legislature recodified the Insurance Code and article 21.21 provisions relevant to this matter were placed in Chapter 541. Further reference to Insurance Code provisions will be to the recodified designations.

of good faith and fair dealing, and violations of the Deceptive Trade Practices Act. TEX. BUS. & COMM. CODE §§ 17.41–.63. Ruttiger did not claim that TMIC failed to fulfill the agreement it entered into at the BRC or that TMIC did not properly pay income and medical benefits after the BRC. Rather, he claimed that TMIC's delay in paying temporary income benefits and agreeing to pay for surgery until January 2005 damaged his credit, worsened his hernias, and caused mental anguish, physical impairment, and pain and suffering over and above what he would have suffered if TMIC had timely accepted liability and provided benefits. His allegations as to Insurance Code violations were that TMIC (1) failed to adopt and implement reasonable standards for promptly investigating claims, (2) refused to pay Ruttiger's claim without having conducted a reasonable investigation, (3) failed to promptly provide a reasonable explanation for denying his claim, (4) failed to attempt to promptly and fairly settle the claim when liability was reasonably clear, and (5) misrepresented the insurance policy to him. He also asserted that TMIC's Insurance Code violations authorized recovery under the DTPA. Ruttiger's common law claim was that TMIC breached its duty to properly investigate his claim and denied necessary medical care and other benefits.

The case was tried to a jury, which found that TMIC (1) breached its duty of good faith and fair dealing; (2) committed unfair and deceptive acts or practices that were a producing cause of damages to Ruttiger; and (3) engaged in the unfair and deceptive acts knowingly. The jury found damages for past physical impairment, past and future pain and suffering, past and future loss of credit, past mental anguish, "additional" damages, and attorneys' fees. The trial court rendered judgment based on the Insurance Code findings, but also provided in its judgment that if the

Insurance Code theory of liability failed on appeal, Ruttiger was entitled to recover for TMIC's breach of the duty of good faith and fair dealing and under the Texas Deceptive Trade Practices Act.

The court of appeals held that there was no evidence of credit reputation damages, but otherwise affirmed the trial court's judgment allowing recovery under the Insurance Code. 265 S.W.3d 651, 672 (Tex. App.—Houston [1st Dist.] 2008). The appeals court did not reach the issues of whether Ruttiger could recover under his DTPA or common law claims. We granted TMIC's petition for review. 53 TEX. SUP. CT. J. 388 (Mar. 15, 2010).

TMIC makes several arguments for reversing the court of appeals' judgment: (1) Ruttiger is not entitled to recover for aggravation of his hernias due to delay in surgery because a worker may only recover for a common law bad faith claim if he suffers an "independent injury" separate from his compensation injury; (2) the trial court lacked jurisdiction to award bad faith damages for wrongful delay of benefits because Ruttiger did not exhaust his administrative remedies by obtaining a determination by the WCD that benefits were due; (3) the Insurance Code causes of action do not apply to Ruttiger's claims as a matter of law, and even if they do, there is no evidence to support the jury findings that TMIC violated the Code's provisions; (4) even if Ruttiger's injuries were independent and the trial court had jurisdiction over his claims, this Court should join the majority of states that have considered the issue and disallow common law bad faith claims in the context of workers' compensation; (5) the court of appeals misapplied insurance claims-handling standards for liability and no-evidence appellate review when it held that jurors may disregard conflicting evidence of coverage such as exists here where the statements made by employees of A&H and

medical records indicated Ruttiger's hernias were preexisting;[5] (6) there is no evidence that TMIC knowingly violated the Insurance Code because there is no evidence it was actually aware it was being unfair to Ruttiger; and (7) there is no evidence to support the award for mental anguish damages.[6]

In response, Ruttiger argues that (1) a claim for aggravation of his hernias is separate from his workers' compensation claim; (2) he exhausted his administrative remedies by requesting and attending a BRC where he entered into a benefit dispute agreement with TMIC; (3) claims under the Insurance Code are allowed in the context of the workers' compensation scheme; and (4) the jury findings are supported by legally sufficient evidence.[7]

We begin by considering TMIC's assertion that the trial court lacked jurisdiction because Ruttiger failed to exhaust his administrative remedies.

II. Exhaustion of Administrative Remedies

Citing *American Motorists Ins. Co. v. Fodge*, 63 S.W.3d 801 (Tex. 2001), TMIC asserts that a trial court lacks jurisdiction over a workers' compensation claims-handling suit unless the WCD has made a determination that the worker is entitled to the specific benefits wrongly denied or delayed. TMIC argues that in this case the WCD has not done so.

---

[5] Medical records obtained during lawsuit discovery revealed that Ruttiger had been diagnosed as having bilateral inguinal hernias on two different occasions before he began working for A&H. He denied knowing of the diagnoses and denied having hernias before he was injured on June 21, 2004.

[6] Amicus briefs were submitted in support of TMIC's position by Liberty Insurance Corporation, the American Insurance Association, and the Property Casualty Insurers Association of America.

[7] Amicus briefs were submitted in support of Ruttiger's position by the Texas Trial Lawyers' Association, attorney Peter N. Rogers, and attorney Joe K. Longley.

Ruttiger and TMIC attended a BRC and entered into a benefit dispute agreement in which the parties agreed that Ruttiger sustained a compensable injury and had disability beginning August 23, 2004. The WCD approved the agreement. TMIC asserts that this agreement was not a WCD determination sufficient to give the trial court jurisdiction. Ruttiger counters that because at the time he filed this suit there were no disputed issues to be resolved by the WCD, he was not required to continue through the administrative process. We agree with Ruttiger.

As the court of appeals pointed out, the Act provides a dispute resolution process consisting of four possible steps. 265 S.W.3d at 657. Those steps are a BRC, a contested case hearing (CCH), review by an administrative appeals panel, and judicial review. TEX. LAB. CODE §§ 410.021, 410.104, 410.201, 410.251. A claimant is not required to continue through every step; the provisions of the Act contemplate that disputes may be resolved at any level. *See id.* § 410.025(b) (providing that the WCD shall schedule a contested case hearing "to be held not later than the 60th day after the date of the benefit review conference if the disputed issues are not resolved at the benefit review conference"); *id.* § 410.029 ("[A] dispute may be resolved either in whole or in part at a benefit review conference."); *id.* § 410.169 (providing that the decision of a contested case hearing officer is final in the absence of an appeal).

Here, the parties entered into a benefit dispute agreement at the first BRC held in January 2005. The agreement stated that it resolved the issues in dispute and it was signed by Ruttiger, his attorney, and a representative of TMIC. The agreement was binding on both parties "through the conclusion of all matters relating to the claim" absent circumstances not involved here. *Id.* § 410.030. The agreement was approved by the WCD and was a sufficient resolution of Ruttiger's

claim by the WCD to constitute exhaustion of his administrative remedies as to whether he suffered an injury in the course of his employment for which medical and income benefits were payable.

TMIC also asserts that under *Fodge* Ruttiger was required to obtain a determination from the division that he was entitled to the specific benefits he claims he was wrongly denied. In *Fodge*, a CCH hearing officer concluded that Anne Fodge had suffered a compensable injury. 63 S.W.3d at 802. She did not claim medical benefits or claim that the carrier, American Motorists Insurance Co., had denied medical benefits. *Id.* Five months later she filed suit against American Motorists for mishandling her claim by, among other things, denying and delaying payment for medical treatment. *Id.* We noted that only the WCD can determine whether a claimant is entitled to particular benefits, and held that just as a trial court could not award medical benefits, neither could it award damages for a denial of payment of benefits without a determination that the benefits were due. *Id.* at 804.

TMIC asserts that in this case the benefit dispute agreement addressed whether Ruttiger sustained a compensable injury and had a disability, but it did not address medical benefits. In *Fodge* we noted that only the WCD can determine entitlement to particular compensation benefits and it has jurisdiction over both income and medical benefit disputes. *Id.* at 803-04. At the time Fodge filed suit, a dispute still existed between Fodge and American Motorists regarding denial of benefits that had not been first presented to the Commission. But in this case, at the time Ruttiger filed suit there was no dispute over either income benefits or medical benefits. TMIC had agreed to pay for and paid for Ruttiger's hernia surgery, agreed to pay and paid income benefits for the

disability the parties agreed Ruttiger suffered from August 2004 through the BRC, and was continuing to pay benefits.

If a dispute exists or arises between the parties, then resolution must first be sought from the WCD. But the Act does not require a claimant to seek review of issues not in dispute. Nor would it make sense for courts to impose such a requirement, even if the claimant could convince the WCD to set a hearing when there was no disputed issue. We conclude that as to the claims underlying his suit, Ruttiger exhausted his administrative remedies and the trial court had jurisdiction over his suit.

We next consider TMIC's contentions relating to the Insurance Code.

III. Insurance Code Claims

A. Section 541.060

Chapter 541 of the Insurance Code is entitled "Unfair Methods of Competition and Unfair or Deceptive Acts or Practices."[8] Ruttiger brought claims for violations of sections 541.060 and 541.061, for which section 541.151 provides a private cause of action. Section 541.060, as relevant to Ruttiger's claims, provides as follows:

> **Unfair Settlement Practices**
> (a) It is an unfair method of competition or an unfair or deceptive act or practice in the business of insurance to engage in the following unfair settlement practices with respect to a claim by an insured or beneficiary:
>
> (1) misrepresenting to a claimant a material fact or policy provision relating to coverage at issue;
>
> (2) failing to attempt in good faith to effectuate a prompt, fair, and equitable settlement of:

[8]Ruttiger asserts that TMIC waived its position that the Insurance Code does not provide a legal basis for him to recover damages. The record reflects that TMIC objected to the jury charge on that basis and challenged the legal sufficiency of the evidence to support a judgment against it in the court of appeals. TMIC did not waive error.

> (A) a claim with respect to which the insurer's liability has become reasonably clear; . . .
> (3) failing to promptly provide to a policyholder a reasonable explanation of the basis in the policy, in relation to the facts or applicable law, for the insurer's denial of a claim or offer of a compromise settlement of a claim;
>
> . . . .
>
> (7) refusing to pay a claim without conducting a reasonable investigation with respect to the claim . . . .

TEX. INS. CODE § 541.060.

TMIC asserts that because the Labor Code and WCD rules set specific deadlines and procedures for both paying and denying workers' compensation claims and impose administrative penalties for failing to comply with them, allowing recovery under the Insurance Code would be inconsistent with what the Legislature has deemed to be adequate protections for workers. TMIC concludes that as between section 541.060 and the Act, the Act is the exclusive remedy. Ruttiger responds that under *Aetna Casualty & Surety Co. v. Marshall*, 724 S.W.2d 770 (Tex. 1987), an employee has a cause of action under the Insurance Code against a workers' compensation carrier.

In *Marshall* we considered whether an injured worker who had settled his compensation claim by agreed judgment could recover damages under former article 21.21[9] of the Insurance Code when the carrier failed to comply with the agreed judgment. *Marshall*, 724 S.W.2d at 770. At that time, article 21.21 provided a cause of action to a person who sustained actual damages as a result of an insurance carrier's deceptive acts or practices. *Id.* at 772. Marshall sued Aetna under article 21.21, claiming that Aetna represented to him that it would provide benefits under the agreed

[9] Act of Apr. 25, 1957, 55th Leg., R.S., ch. 198, § 1, 1957 Tex. Gen. Laws 401.

judgment and then refused to do so. *Id.* Aetna argued, in part, that Marshall was limited to relief provided by the Act: a suit to recover unpaid medical expenses and a 12% penalty. *Id.*

We disagreed with Aetna and held that Marshall could recover under the Insurance Code stating that "[t]he mere fact that Marshall was injured while working should not be used as a shield by Aetna to escape the punitive provisions of article 21.21." *Id.* So, we agree with Ruttiger that at the time it was decided, *Marshall* answered the question of whether an employee could assert a claim under the Insurance Code against a workers' compensation carrier. However, the workers' compensation landscape changed after *Marshall* was decided. As we explain below, a cause of action under section 541.060 is incompatible with the provisions of the current Act.

Various aspects of the Texas workers' compensation system have been criticized from the time the first Employers' Liability Act was enacted in 1913. *See Tex. Workers' Compensation Comm'n v. Garcia*, 893 S.W.2d 504, 512-13 (Tex. 1995). In the early 1980s, unusually heavy criticism of the system, its costs to employers, benefits to injured workers, and dispute resolution procedures began surfacing. *Id.* (citing Joint Select Committee on Workers' Compensation Insurance, A Report to the 71st Texas Legislature 3 (1988) (hereafter "Joint Committee Report")). In response to the increasing criticism, in 1987 the Legislature appointed an interim committee to study the system.[10] Tex. H.R. Con. Res. 27, 70th Leg., 2d C.S., 1987 Tex. Gen. Laws 920. The committee held hearings around the state and in 1988 formulated its report to the Legislature, noting

[10] The Senate representatives on the committee were Senators Bob Glasgow, Kent Caperton, Cyndi Krier, John Montford, and Frank Tejeda. The House representatives were Representatives Richard Smith, David Cain, Robert Early, Alex Moreno, and Rick Perry. Senator Glasgow and Representative Smith were co-chairs. A six member advisory panel assisted the committee.

several major areas of concern about the existing system. Joint Committee Report at 2-4. In 1989, the Legislature undertook to reform the workers' compensation statutes in what has been called "the most divisive legislative endeavor in contemporary Texas politics" up until that time. 1 JOHN T. MONTFORD ET AL., A GUIDE TO TEXAS WORKERS' COMP REFORM 1 (1991) (hereafter MONTFORD). After failing in the regular and first special session to enact reforms, the Legislature finally did so in a second special session. The key, and most controversial, reforms were in the areas of employee benefits and dispute resolution. *See id.*, at ix. As to the dispute resolution process, the reform amendments "culminated in an essentially new set of Texas workers' compensation laws." *Id.* at 6-14.

Differences between the dispute resolution processes under the former law and the amended Act[11] are stark. When a claim was disputed under the former law, the injured employee and the workers' compensation carrier attended an informal pre-hearing conference. *Garcia*, 893 S.W.2d at 512. Testimony was not taken and generally the only discernable result of the conference was a written recommendation by the pre-hearing officer. *Id.* That recommendation was presented to the Industrial Accident Board (IAB) at a "formal" hearing in Austin. *Id.* The formal hearing in most instances was more formality than hearing: attendance by the parties or their representatives was discouraged and for the overwhelming majority of claims no one attended and no testimony was taken or submitted. 1 MONTFORD, at 6-32 n.18 (noting that of more than 17,000 claims scheduled for IAB hearing in 1989, only 70 were actually heard while the remainder were simply passed

[11] For ease of reference the Act as amended will generally be referred to as the Act, or in some cases the amended Act; the law as it was before the 1989 amendments will be referred to as the old law or the former law.

through as a matter of course so they could proceed to the judicial level). After the IAB made its award, either party could appeal for judicial review by trial de novo. *Garcia*, 893 S.W.2d at 512. Once a claim was appealed, the IAB lost jurisdiction over the claim and the IAB proceedings, directives, and award were of no further effect. 1 MONTFORD, at 6-33. Under the old law, the IAB's involvement was many times secondary and frequently the IAB proceedings were no more than a "way station" on the way to the courthouse. *Id.*

The 1989 amendments and the current Act provide significantly more meaningful proceedings at the administrative agency level so as to reduce the number and cost of judicial trials, speed up the time for the entire dispute resolution process, and facilitate interlocutory payment of benefits pending final resolution of disputes. *Id.* at 6-28. To achieve these purposes the amended Act contains detailed procedures and penalties for failures of the various interested parties to comply with statutory and regulatory requirements.

We recently considered the relationship between a general statutory cause of action and one in which the statute had a more detailed, specific claims resolution process in *City of Waco v. Lopez*, 259 S.W.3d 147 (Tex. 2008). In that case, Lopez filed a whistleblower suit based on allegations that he was discharged in retaliation for reporting age and race discrimination that violated the City's EEO policy. *Id.* at 149. The City argued that the Texas Commission on Human Rights Act (CHRA), TEX. LAB. CODE §§ 21.001–.556, provided the exclusive remedy for Lopez's claim. *Lopez*, 259 S.W.3d at 150. Lopez did not file a claim under the CHRA and urged that he could elect to proceed under either the CHRA or the Whistleblower Act. *Id.* at 151-52. The Whistleblower Act generally prohibits governmental entities from suspending or terminating the employment of a

public employee who in good faith reports a violation of law by the employing governmental entity to an appropriate law enforcement authority, and provides a general remedy for retaliation based on the report of any violation of law. *See* TEX. GOV'T CODE §§ 554.001–.010. The CHRA, on the other hand, prohibits retaliation against employees on the basis of employment discrimination. *Lopez*, 259 S.W.3d at 154.

We held that relief under the more general Whistleblower Act with its comparatively simple administrative exhaustion procedures was incompatible with and foreclosed by the more specific and comprehensive anti-retaliation remedy in the CHRA. *Id.*; *see id.* at 153 (noting that in determining legislative intent, we are guided by the principle that a specific statute will prevail over a more general statute). In reaching our conclusion, we compared the policies behind each statute as well as the procedural requirements and remedies provided by each. *Id.* at 154. We noted that the CHRA embodied policies that included administrative procedures involving informal conference, conciliation and persuasion, as well as judicial review of administrative action. *Id.* (quoting *Schroeder v. Tex. Iron Works, Inc.*, 813 S.W.2d 483, 487 (Tex. 1991)). We concluded that

> [i]t is conceptually untenable that the Legislature would have erected two alternative state statutory remedies, one that enacts a structured scheme favoring investigation and conciliation and carefully constructs rights, remedies, and procedures under that scheme (the CHRA) and one that would significantly undermine that scheme (the Whistleblower Act).

Id. at 155-56.

As we did in *Lopez*, we must consider the purposes, policies, procedural requirements, and remedies of the Insurance Code and the Workers' Compensation Act to determine whether the

Legislature intended to effectively provide two different remedies to injured workers. The purpose of Chapter 541 of the Insurance Code is to

> regulate trade practices in the business of insurance by:
>
> > (1) defining or providing for the determination of trade practices in this state that are unfair methods of competition or unfair or deceptive acts or practices; and
> > (2) prohibiting those trade practices.

TEX. INS. CODE § 541.001. The Chapter provides a private action for damages against someone who has engaged in a specified act or practice. *Id.* § 541.151. A plaintiff who prevails on such an action is entitled to actual damages and treble damages if the trier of fact finds that the defendant "knowingly" committed the act. *Id.* § 541.152.

The purpose of the Act is

> to provide employees with certainty that their medical bills and lost wages will be covered if they are injured. An employee benefits from workers' compensation insurance because it saves the time and litigation expense inherent in proving fault in a common law tort claim. But a subscribing employer also receives a benefit because it is then entitled to assert the statutory exclusive remedy defense against the tort claims of its employees for job related injuries.

HCBeck, Ltd. v. Rice, 284 S.W.3d 349, 349 (Tex. 2009); *see In re Poly-Am. L.P.*, 262 S.W.3d 337, 349 (Tex. 2008) ("In order to ensure compensation for injured employees while protecting employers from the costs of litigation, the Legislature provided a mechanism by which workers could recover from subscribing employers without regard to the workers' own negligence, while limiting the employers' exposure to uncertain, possibly high damage awards permitted under the common law." (citations omitted)); *see also* TEX. LAB. CODE § 408.001(a) ("Recovery of workers'

compensation benefits is the exclusive remedy of an employee covered by workers' compensation insurance coverage . . . .").

To accomplish these purposes, the Act provides detailed notice and administrative dispute resolution proceedings that include specific deadlines and incorporate a "conveyor-belt" approach. That is, once the administrative dispute resolution process is initiated, a dispute continues through the process until the dispute is either resolved by the parties or by a binding decision through the resolution procedures. The claims process begins when an employee reports a lost-time injury or occupational disease to the employer. The employer, as required by the Act, then reports the injury claim to the carrier. *Id*. § 409.005(a). Within fifteen days of receiving written notice of an employee's injury claim, the carrier must initiate benefit payments or notify the WCD and the employee of its refusal to pay. *Id.* § 409.021(a). If the carrier refuses to pay or terminates benefits, it is required to advise the employee of his or her right to request a BRC and of the means to obtain further information from the WCD. *Id.* § 409.021(a)(2)(A). The carrier also must specify its grounds for refusal. *Id.* § 409.022. Once the WCD receives notice of an employee's claim, it must mail the employee a description of (1) the services the WCD provides; (2) the WCD's procedures; (3) the services provided by the Office of Injured Employee Counsel, including the ombudsman program which provides free assistance to injured employees in the dispute resolution process; and (4) the employee's rights and responsibilities under the Act. *Id.* § 409.010. Then, if there are disputed issues, the dispute resolution process begins when a party requests a BRC or the WCD sets a BRC on its own motion. *Id.* § 410.023(a). If a BRC is requested, the WCD must schedule it

within forty days after receiving the request, or within twenty days if compensability or liability for essential medical treatment is in dispute. *Id.* § 410.025(a); 28 TEX. ADMIN. CODE § 141.1.

If all disputed issues are not resolved at the BRC, the dispute resolution process is designed to automatically move to the next step: the Act requires the WCD to schedule a contested case hearing (CCH) before a hearing officer within sixty days. TEX. LAB. CODE § 410.025(b). Sworn testimony and other evidence is received at the CCH and a record of the proceeding is made. *Id.* §§ 410.163–.166. The decision of the CCH hearing officer regarding benefits is final unless it is timely appealed. *Id.* § 410.169. A party dissatisfied with the CCH decision may appeal it to an appeals panel, but the hearing officer's decision is binding during pendency of the appeal. *Id.*

If a CCH decision is appealed, the appeals panel's written decision is based on the CCH record, the written request for an appeal, and the response. *Id.* § 410.203. If the appeals panel does not issue a decision within forty-five days after the response to the appeal request is filed, then the decision of the CCH hearing officer is final absent timely appeal for judicial review. *Id.* §§ 410.204, 410.205(a). And just as the decision of the CCH hearing officer is binding during appeal to the appeals panel, the decision of the appeals panel is binding during pendency of an appeal for judicial review. *Id.* § 410.205(b). Judicial review regarding compensability or income benefits is limited to issues decided by the appeals panel and on which judicial review is specifically sought. *Id.* § 410.302. If trial is by jury, the court must instruct the jury as to the decision of the appeals panel on each of the disputed issues submitted. *Id.* § 410.304(a). If trial is without a jury, the court is required to consider the decision of the appeals panel. *Id.* § 410.304(b).

A carrier's failure to comply with the Act's requirements, deadlines, and procedures is not without consequences. First, the Act specifies administrative penalties both in particular sections and in a general, catchall provision. For example, if a carrier fails to initiate compensation or notify the WCD of its refusal to do so within fifteen days of receiving notice of injury, it is subject to monetary penalties ranging from $500 to $5,000, depending on the length of time it takes the carrier to comply. *Id.* § 409.021(e). The Act also provides that a carrier or its representative commits an administrative violation for any of twenty-two specified actions, including failing to process claims promptly and in a reasonable and prudent manner, controverting a claim if the evidence clearly indicates liability, and failing to comply with the Act. *Id.* § 415.002(11), (18), (22). If a carrier refuses or fails to comply with an order of the WCD, either interlocutory or final, or a decision of the commissioner, within twenty days of when the decision or order becomes final, it commits an administrative violation. *Id.* § 410.208(e). Also, both the WCD and claimant are specifically authorized by the Act to file suit to enforce the order and recover attorneys' fees. *Id.* § 410.208(a)–(c). A claimant who brings suit is entitled to recover 12% of the amount of benefits recovered in the judgment as a penalty. *Id.* § 410.208(d).

Further, the WCD is required to monitor the actions of carriers, as well as other parties in the workers' compensation system, for compliance with "commissioner rules, [the Act], and other laws relating to workers' compensation." *Id.* § 414.002(a). In addition to its mandate to monitor carriers and other participants in the system, the WCD has a separate mandate to, at the carriers' expense, "review regularly the workers' compensation records of insurance carriers as required to ensure compliance with [the Act]." *Id.* § 414.004(a), (c). The Act also provides that in addition to

other sanctions or remedies, the WCD commissioner has authority to assess administrative penalties of up to $25,000 per day per occurrence for violations of the Act. *Id.* § 415.021(a).

It is apparent that the Act prescribes detailed, WCD-supervised, time-compressed processes for carriers to handle claims and for dispute resolution. It has multiple, sometimes redundant but sometimes additive, penalty and sanction provisions for enforcing compliance with its requirements. Permitting a workers' compensation claimant to additionally recover by simply suing under general provisions of Insurance Code section 541.060 would be inconsistent with the structure and detailed processes of the Act. Not only would such a recovery be inconsistent with the Act's goals and legislative intent exhibited in the Act, it could also result in rewarding an employee who is dilatory in utilizing the Act's detailed dispute resolution procedures, regardless of whether the delay was intentional or inadvertent, because whether and when the dispute resolution begins is by and large dependent on the employee.

For example, Ruttiger's damages claim was based on TMIC's delay in providing both compensation and medical benefits and the delay's effect on him over and above what the effects of his injury would have been had TMIC not terminated benefits in July 2004. But Ruttiger and his lawyer did not seek immediate resolution of his dispute with TMIC by promptly requesting a BRC. Rather, they waited over three months from the time they knew TMIC was contesting the claim to do so. Ruttiger and TMIC resolved their dispute by agreement at the first BRC they attended—just as is contemplated by the Act's procedures.[12] As we stated in *Lopez*, "[i]t is conceptually untenable

[12] The record does not reflect, and Ruttiger does not argue, that the WCD determined TMIC committed administrative violations by failing to process claims in a reasonable and prudent manner, *see* TEX. LAB. CODE § 415.002(11); by refusing to pay benefits without having reasonable grounds, *see id.* § 409.022(c); or by terminating

that the Legislature would have erected two alternative statutory remedies, one that enacts a structured scheme . . . and carefully constructs rights, remedies and procedures . . . and one that would significantly undermine that scheme." *Lopez*, 259 S.W.3d at 155-56. If allowed to bring Insurance Code claims, workers' compensation claimants will actually have incentive to delay seeking resolution of disputes through the carefully crafted administrative dispute resolution procedures of the Act. As is demonstrated by the facts of this case, an employee's delay in initiating the Act's expedited dispute resolution procedures can generate both recovery of benefits under the Act and a separate, additional lawsuit for damages and delay in derogation of the Act's carefully crafted dispute resolution procedures. Instead of encouraging claimants to immediately seek resolution of their disputes by means of the legislatively mandated aids such as the ombudsman program and WCD-directed administrative procedures, allowing an Insurance Code cause of action would provide an incentive for employees to wait weeks or months to initiate the Act's expedited dispute resolution procedures and then file suit for damages under the Insurance Code, as was done here.

Further, Insurance Code section 541.060 is entitled "Unfair Settlement Practices." Its text provides that specified acts or practices are "unfair settlement practices" and that those settlement practices are unfair methods of competition and unfair or deceptive acts or practices in the business of insurance. TEX. INS. CODE § 541.060(a). In the Act, settlements are defined as "a final resolution of all the issues in a workers' compensation claim that are permitted to be resolved under terms of [the Act]." TEX. LAB. CODE § 401.011(40). A settlement (1) may not resolve an issue of

---

benefits absent substantiating evidence that doing so was reasonable and authorized by law. *See id.* § 415.002(a)(2).

impairment before the employee reaches maximum medical improvement (and settlement agreements even after that point must adopt an impairment rating using guidelines prescribed by the Act); (2) may not provide for payment of benefits in a lump sum except when an employee (a) has returned to work for at least three months earning at least 80% of the employee's average weekly wage and (b) elects to commute impairment income benefits; and (3) may not limit or terminate the employee's right to medical benefits. *Id.* § 408.005(a), (b), (c). At the time Ruttiger filed suit in this matter he had not reached maximum medical improvement, did not have an impairment rating from his doctors, and had not returned to work. Thus, as of the time he filed suit complaining of TMIC's past delays, his workers' compensation claim could not yet have been settled.

In sum, this Court held in 1987 that an injured worker was not limited to recovery under the Act, but could also recover under the Insurance Code. *Marshall*, 724 S.W.2d at 772. But the current Act with its definitions, detailed procedures, and dispute resolution process demonstrating Legislative intent for there to be no alternative remedies was not in effect in 1987. The Legislature's definition of "settlement" under the current Act reflects legislative intent that is at odds with the intent reflected in Insurance Code section 541.060; the limited definition of "settlement" provided in the Act does not fit within the construct of section 541.060.[13] The provisions of the amended Act indicate legislative intent that its provisions for dispute resolution and remedies for failing to comply with those provisions in the workers' compensation context are exclusive of those in section

[13] Ruttiger does not claim that the agreement he reached with TMIC at the BRC was a settlement. *See* TEX. LAB. CODE § 401.011(3) (defining "agreement" as the resolution by the parties of one or more issues regarding an injury, coverage, or compensability, but not a settlement).

541.060. Thus, we agree with TMIC that Ruttiger may not assert a cause of action under section 541.060.

B. Section 542.003

The jury charge also asked whether TMIC, with respect to a claim by an insured or beneficiary, failed "to adopt and implement reasonable standards for prompt investigation of claims arising under its policies." Such action by an insurer is prohibited by Insurance Code section 542.003(a), (b)(3).[14] But as we discussed in the preceding section, the Act contains specific requirements with which a workers' compensation carrier must comply when contesting a claim, and provides that failure to comply with the requirements can constitute waiver of the carrier's rights as well as subject the carrier to significant administrative penalties. The Act's requirements include time limits for payment of benefits, giving notice of a compensability contest and the specific reason for the contest, and necessarily subsume the requirement of proper investigation and claims processing. *See, e.g.*, TEX. LAB. CODE § 409.021(a) (a carrier must initiate benefit payments or notify the WCD and the employee of its refusal to pay within fifteen days of receiving written notice of an employee's injury and if the carrier refuses to pay or terminates benefits, it is required to advise the employee of his or her right to request a BRC and of the means to obtain further information from the WCD); *id.* § 409.022 (when refusing to initiate benefits or when terminating benefits the carrier must specify its grounds and a carrier commits an administrative violation if the carrier does not have reasonable grounds for refusing to pay benefits); *id.* § 409.021(c) (providing

[14] TMIC argues that the Insurance Code does not provide for a private cause of action for a violation of this section. This is the first time TMIC has made this argument. It has not been preserved and we do not address it.

that a carrier waives its right to contest compensability if it does not contest compensability within sixty days of receiving notice of injury); *id.* § 415.002(a) (providing that a carrier commits an administrative violation for, among other actions, failing to process claims promptly and in a reasonable manner, failing to initiate benefits when due if a legitimate dispute does not exist as to the liability of the carrier, terminating or reducing benefits without substantiating evidence that the action is reasonable and authorized by law, or controverting a claim if the evidence clearly indicates liability).

We conclude, as we did with section 541.060, that in light of the specific substantive and procedural requirements built into the Act and the detrimental effects on carriers flowing from and penalties that can be imposed for failing to comply with those requirements, the Legislature did not intend for workers' compensation claimants to have a cause of action against the carrier under the general provision of section 542.003. To the extent *Marshall* is in conflict with any of the foregoing, we overrule it.

C. Section 541.061

The trial court judgment also allowed Ruttiger to recover under section 541.061 of the Insurance Code, which provides:

> **Misrepresentation of Insurance Policy**
> It is an unfair method of competition or an unfair or deceptive act or practice in the business of insurance to misrepresent an insurance policy by:
>
> (1) making an untrue statement of material fact;
> (2) failing to state a material fact necessary to make other statements made not misleading, considering the circumstances under which the statements were made;
> (3) making a statement in a manner that would mislead a reasonably prudent person to a false conclusion of a material fact . . .

TEX. INS. CODE § 541.061. TMIC asserts that section 541.061 is not a legal basis for Ruttiger to recover damages for the same reasons he may not recover damages under Insurance Code section 541.060. We disagree.

Unlike section 541.060, section 541.061 does not specify that it applies in the context of settling claims. *See id.* § 541.060(a) (defining unfair settlement practices "with respect to a claim"). Section 541.061 applies to the misrepresentation of an insurance policy, but because it does not evidence intent that it be applied in regard to settling claims, it is not at odds with the dispute resolution process of the workers' compensation system.

Nevertheless, we agree with TMIC that there is legally insufficient evidence to support a finding that it misrepresented its policy. TMIC denied Ruttiger's claim on the basis that he was not injured on the job. Ruttiger does not point to any untrue statement made by TMIC regarding the policy or any statement about the policy that misled him. The dispute between Ruttiger and TMIC was over whether Ruttiger's claim was factually within the policy's terms—whether he was injured on the job. And the parties' BRC agreement did not resolve any issues regarding TMIC's policy terms; it resolved whether Ruttiger was injured in the course of his employment with A&H. While we disagree with TMIC's assertion that Ruttiger's claim under section 541.061 is precluded by the Act, we agree with its legal sufficiency challenge to the evidence supporting a finding based on section 541.061.

Because the provisions of section 541.060 and 542.003 cannot support a judgment against TMIC for unfair settlement practices and there is no evidence to support a finding pursuant to

section 541.061 that TMIC misrepresented its insurance policy, we reverse the court of appeals' judgment affirming Ruttiger's recovery on his claim under the Insurance Code.

IV. Deceptive Trade Practices Act

Ruttiger agrees that his DTPA claim as pled and submitted to the jury depended on the validity of his Insurance Code claim. Because we have determined that he cannot recover on his Insurance Code claim, we likewise hold that he cannot recover on his DTPA claim.

V. Good Faith and Fair Dealing

A. Discussion

The trial court's judgment provides that if Ruttiger's Insurance Code and DTPA claims failed on appeal, he could elect to recover on his claim that TMIC breached its common law duty of good faith and fair dealing. The court of appeals did not address the issue, but it has been briefed and argued here, so I will. *See* TEX. R. APP. P. 53.4; *Nat'l Union Fire Ins. Co. of Pittsburgh, PA v. CBI Indus., Inc.*, 907 S.W.2d 517, 520-22 (Tex. 1995).

TMIC asserts, in part, that Ruttiger cannot recover for breach of the duty of good faith and fair dealing because the cause of action is no longer warranted given the provisions of the current Act.

In *Arnold v. National County Mutual Fire Insurance* Co,. the Court held that a duty of good faith and fair dealing arises from the relationship between an insurer and a first-party insured. 725 S.W.2d 165, 167 (Tex. 1987). The Court noted that "without such a cause of action insurers can arbitrarily deny coverage and delay payment of a claim with no more penalty than interest on the amount owed. An insurance company has exclusive control over the evaluation, processing and

denial of claims." *Id.* at 167. In *Aranda v. Insurance Co. of North America*, the Court imposed the holding of *Arnold* onto the workers' compensation system and held that an injured employee was entitled to assert a claim against a workers' compensation carrier for breach of the duty of good faith and fair dealing. 748 S.W.2d 210, 212-13 (Tex. 1988) (sometimes hereafter referred to as an *Aranda* cause of action for ease of reference). The Court pointed out three reasons for holding that an employee should be allowed to assert such a claim outside the workers' compensation dispute resolution system: (1) the disparity of bargaining power between compensation insurers and employees, (2) the exclusive control that an insurer exercises over processing of claims, and (3) arbitrary decisions by carriers to refuse to pay or delay payment of valid claims leave the injured employees with no immediate recourse. *Id.*

Aranda was decided in 1988. Even before it was decided, however, the Legislature had begun an intensive study of how to best modify the workers' compensation system that interested parties and experts agreed needed changing. The study identified numerous deficiencies, including those set out in *Aranda*. *See generally* Joint Committee Report. During the regular and a special legislative session following *Aranda*, the Legislature struggled without success to enact major reforms to the Act. It was only in a second special session that overhaul of the system was finally accomplished. As can be seen from our discussion of the 1989 amendments in section III.A. above, and as I explain in more detail below, those reforms and subsequent amendments to the Act addressed the three deficiencies underlying *Aranda*—and much more.[15]

[15] The factual situation underlying *Aranda* is specifically addressed by the Act. In *Aranda* an employee was injured while working for two employers. 148 S.W.2d at 211. The employers had different workers' compensation carriers. *Id.* The carriers did not contest whether the employee's injury was compensable, but each asserted that the

In *Aranda* the Court expressed concern that a carrier could arbitrarily refuse to pay benefits, leaving an injured worker without immediate recourse because "the mechanisms provided by the Workers' Compensation Act do not afford immediate relief to the injured employee who is denied compensation." 748 S.W.2d at 212. The Joint Committee Report emphasized that one major deficiency of the process for delivering benefits was "[t]he system has no means to render fast decisions in disputes which require them." Joint Committee Report, at 4. A brief review of the former dispute resolution system demonstrates the problems.

As outlined above, under the old law the first step in the administrative dispute resolution process was an informal pre-hearing conference where a record was not made and the result generally was a written recommendation of the pre-hearing officer that was sent to the IAB in Austin. *Garcia*, 893 S.W.2d at 512. The IAB hearing in Austin was not designed to be an actual hearing, but was primarily for the purpose of making an award based on the pre-hearing officer's recommendation. *Id.* After the IAB's award completed the administrative process, either the employee or carrier could appeal the award to the district court for a trial de novo. *See Latham v.*

---

other was liable for the employee's benefits and neither provided benefits pending resolution of the dispute by the IAB. *Id.*

Section 410.033 of the current Act is entitled "Multiple Carriers" and provides:

> (a) If there is a dispute as to which of two or more insurance carriers is liable for compensation for one or more compensable injuries, the commissioner may issue an interlocutory order directing each insurance carrier to pay a proportionate share of benefits due pending a final decision on liability. The proportionate share is computed by dividing the compensation due by the number of insurance carriers involved.
>
> (b) On final determination of liability, an insurance carrier determined to be not liable for the payment of benefits is entitled to reimbursement for the share paid by the insurance carrier from any insurance carrier determined to be liable.

TEX. LAB. CODE § 410.033.

Security Ins. Co., 491 S.W.2d 100, 104 (Tex. 1972) (interpreting former TEX. REV. CIV. STAT. art. 8307, § 5). If a party appealed for judicial review, the appeal vacated the award, the IAB lost jurisdiction over the proceedings and the carrier could stop providing benefits; or, if the carrier had been contesting compensability of the claim and had not been paying benefits, it could continue to refuse to provide benefits even if the IAB award was in favor of the employee. *Id.* Plus, there was no effective procedure for resolving disputes over medical care. 1 MONTFORD, at 4-27.

The lack of an immediate, binding dispute resolution process under the old law resulted in carriers, for the most part, having control over claims resolution. That control yielded greatly disparate bargaining positions between insurers and injured workers, and the IAB was considered to have had relatively little power to control the process. *See Garcia*, 893 S.W.2d at 512-13; Joint Committee Report, at 5 (stating that under the old law "[t]he agency lacks either the ability or the resources to effectively control the behavior of participants and to compel appropriate actions when they are required"). As outlined above, the IAB's dispute resolution process was considered a formalistic ritual through which claims had to pass to get to the courthouse. Hearings were rarely meaningful and the procedures did not provide incentive to insurers to make indemnity payments to injured workers nor did they provide a disincentive to insurers to dispute payment for medical benefits. 1 MONTFORD, at 6-32. And because of the delay inherent in and cost of reaching the system's first factfinding process—de novo trials when IAB awards were appealed—disputes were primarily resolved through compromise before an injured worker's medical condition had stabilized. That situation increased the probability that "assessment of disability (and hence, the benefits)

[would] be inaccurate." Joint Committee Report, at 5; *see Garcia*, 893 S.W.2d at 512-13 ("The delay and cost of *de novo* review forced premature and inaccurate settlements.").

The 1989 reforms were intended to reduce the costs to employers and provide greater benefits to injured employees in a more timely fashion. Achieving those goals required, among other changes, reducing the disparity of bargaining power between the employee and insurer, imposing controls over the carriers' processing of claims, and controlling the ability of carriers to make arbitrary decisions about refusing or delaying payment. Those changes were accomplished by providing meaningful, binding administrative dispute resolution procedures, speeding up "the start-to-finish time for the entire comp dispute resolution process, as well as [facilitating] interlocutory payment of comp benefits pending final resolution." 1 MONTFORD, at 6-28.

Some of the amendments relevant to the issue before us have been previously discussed, but nevertheless I review them here because of their importance in giving context and perspective to this discussion. When compared to the old law, the Act provides a reduced amount of time for carriers to file a notice of dispute or start paying benefits. TEX. LAB. CODE § 409.021 (providing that a carrier shall begin paying benefits or file a notice of dispute within fifteen days after receiving written notice of injury). Failure to meet the time limit is an administrative violation subject to penalties of $500 to $5,000 depending on how long it takes a carrier to comply. *Id.* § 409.021(e). The carrier has statutory and regulatory duties to promptly conduct adequate investigations and reasonably evaluate and expeditiously pay workers' legitimate claims or face administrative penalties. *See, e.g., id.* § 409.021. If a carrier on multiple occasions fails to pay benefits promptly as they accrue, except as authorized by the Act, the carrier is subject to an additional administrative

violation and even revocation of its right to do business under the workers' compensation statutes. *Id.* § 409.023(d).

Under the Act's dispute resolution process, the BRC begins a process in which disputes proceed from one part of the process to the next until the dispute is resolved by agreement, final order or decision of the WCD, or judicial order. A BRC must be held within forty days of a request for one, or within twenty days if an expedited setting is needed. 28 TEX. ADMIN. CODE § 141.1(h). Unless the dispute is resolved at the BRC, the WCD must schedule a CCH to take place within sixty days of the BRC, TEX. LAB. CODE § 410.025(b), or within thirty days if an expedited setting is appropriate. 28 TEX. ADMIN. CODE § 142.6(a)(2). At the CCH a record is made and the dispute is heard by a WCD hearing examiner whose decision is final unless an appeal is filed within fifteen days. TEX. LAB. CODE §§ 410.164, 410.169. If the decision is appealed, the decision of the CCH hearing officer is binding during the appeal and an appeals panel must issue a written decision within forty-five days. *Id.* §§ 410.169, 410.204. Appeals for judicial review are circumscribed by the Act to minimize the expense and time for discovery and trial preparation. *See, e.g., id.* § 410.255 (judicial review of issues other than compensability or income or death benefits is by the substantial evidence rule); *id.* § 410.306 (unless an employee's condition has substantially changed, evidence at trial is limited to that presented to the WCD). And during the process the carrier is not in exclusive control. The WCD has the authority to issue interlocutory benefit-payment orders that are binding as to past as well as future benefits. *Id.* §§ 410.032, 410.168(c), 413.055.

The Act addresses the disparity of bargaining power between the employee and the insurer, in part, by providing an Office of Injured Employee Counsel. TEX. LAB. CODE § 404.101. That

office provides assistance to injured employees through an ombudsman program by which employees have trained assistance during the dispute resolution process even if the employee is not represented by counsel. *Id.* The disparity is also addressed by limitations on settling of claims. Lump-sum benefit settlement payments are not permitted except in certain specific, limited circumstances and settlements resolving issues of impairment may not be made before an employee reaches maximum medical improvement. *Id.* § 408.005(c)(1). When settlements regarding impairment issues are permitted, they must be according to the opinion of a treating or designated doctor assessing impairment based on objective, standardized guidelines. *Id.* § 408.005(c)(2). Those provisions limit a carrier's ability to overreach during any dispute resolution proceedings or settlement negotiations with workers.

In sum, the Legislature has substantially remedied the deficiencies that led to this Court's extending a cause of action under *Arnold* for breach of the duty of good faith and fair dealing to the workers' compensation system. The current system (1) reduces the disparity of bargaining power between compensation insurers and employees; (2) removes insurers' exclusive control over the processing of claims; (3) diminishes and in most instances negates the ability of insurers to make arbitrary decisions refusing or unreasonably delaying payment of valid claims; (4) provides employees information about, immediate recourse to, and, through the ombudsman program, free assistance before the WCD with the claims and dispute resolution process; and (5) provides multiple remedies and penalties, including specific provision for revocation of the carrier's right to do business under the workers' compensation laws of Texas if on multiple occasions it fails to pay benefits promptly and as they accrue.

The original creation of, continued existence of, and amendments to update and improve the workers' compensation system are within the Legislative function of establishing public policy. *See Town of Flower Mound v. Stafford Estates Ltd. P'ship*, 135 S.W.3d 620, 628 (Tex. 2004) ("Generally, 'the State's public policy is reflected in its statutes.'" (quoting *Tex. Commerce Bank, N.A. v. Grizzle*, 96 S.W.3d 240, 250 (Tex. 2002)); *Lawrence v. CDB Servs., Inc.*, 44 S.W.3d 544, 553 (Tex. 2001) ("[T]he administration of the workers' compensation system is heavily imbued with public policy concerns."); *James v. Vernon Calhoun Packing Co.*, 498 S.W.2d 160, 162 (Tex. 1973) (noting that the "policy of the state [is] declared in the Workmen's Compensation Law"). The cornerstone provision of the 1913 Employers' Liability Act by which an employee received workers' compensation benefits in exchange for the common law right to sue his employer for negligence in the event of an on-the-job injury was the product of a legislative public policy decision brought about by the nature and needs of a changing and more industrialized society. That concept, as well as the workers' compensation system which is continually amended, updated, and changed by the Legislature to reflect the State's changing societal needs, have reflected policy decisions. Key parts of the system are the amount and types of benefits, the delivery systems for benefits, the dispute resolution processes for inevitable disputes that arise among participants, the penalties imposed for failing to comply with legislatively mandated rules, and the procedures for imposing such penalties. Those were some of the areas of concern both identified by the Legislature in the Joint Committee Report and underlying *Aranda*.

The essential question before us is not, as the dissent maintains, "whether the Legislature intended to abrogate entirely a common law bad faith remedy when it enacted the Workers'

Compensation Act." ___ S.W.3d at ___ (Jefferson, C.J., dissenting). I do not believe it did. Rather, the question is to what extent the judiciary will respect the Legislature's function of addressing the concerns and adjusting the rights of parties in the workers' compensation system as part of its policy-making function. In reaching this conclusion it is important to keep in mind the fact that the workers' compensation system is wholly a legislatively crafted entity. It exists only because it was created by the Legislature. Its continued existence and nature depends on the Legislature renewing, reviewing, and amending it to meet the changing needs of Texas employees and employers.

The *Aranda* cause of action operates outside the administrative processes and other remedies in the Act and is in tension with—and in many instances works in direct opposition to—the Act's goals and processes. In part, that tension arises because the extra-statutory cause of action provides incentive for an injured worker to delay using the avenues for immediate relief that the Legislature painstakingly built into the law—as happened in Ruttiger's case. Even if a carrier complies with the Act's provisions by timely notifying the employee of its refusal to pay benefits and the specific reasons why, then participating in a BRC, CCH, and even an appeal to a WCD appeals panel or for judicial review, the carrier still risks common law liability. That situation distorts the balances struck in the Act and frustrates the Legislature's intent to have disputes resolved quickly and objectively. *See Lopez*, 259 S.W.3d at 154-56. Further, an extra-statutory cause of action builds additional costs into the system by increasing litigation expense to employees, insurers, and employers. *See Garcia*, 893 S.W.2d at 511-16 (discussing how through the 1989 amendments the Legislature sought to reduce delay and costs). It also discourages insurers from contesting suspect

or questionable claims and medical treatments because of the possibility of unpredictable large damage awards if the carrier loses its contest, or even resolves a dispute as TMIC did with Ruttiger.

This case is a classic demonstration of how a cause of action for breach of the duty of good faith and fair dealing can hinder the prompt resolution of disputes through proper use of the Act's dispute resolution provisions and increase costs to participants in the system. TMIC timely notified Ruttiger that it was disputing his claim, why it was doing so, and notified him of his right to a BRC. When Ruttiger finally requested a BRC to resolve the dispute, one was scheduled and held, the dispute was resolved, and TMIC began paying benefits. The way the dispute was resolved after Ruttiger initiated the dispute resolution process is the way the Act is designed to function. The disruptive factor was Ruttiger's waiting three months to request a BRC. Such a delay is not what is contemplated by the statutes, and the time for which Ruttiger delayed in initiating the Act's dispute resolution procedures is the basis for his claim for damages in this suit.

The issues underlying the Court's decision in *Aranda* were serious. The Legislature recognized that those issues, as well as other serious shortcomings in the old law, needed to be addressed and it has addressed them. It was the Court's prerogative to recognize the need for and extend *Arnold*'s extra-contractual common law cause of action when it decided *Aranda*; it is the Court's prerogative and responsibility to recognize if the cause of action is no longer appropriate. *See In re McAllen Med. Ctr., Inc.*, 275 S.W.3d 458, 461 (Tex. 2008) ("[O]ur place in a government of separated powers requires us to consider also the priorities of the other branches of Texas government.").

The Act effectively eliminates the need for a judicially imposed cause of action outside the administrative processes and other remedies in the Act. Recognizing and respecting the Legislature's prime position in enacting, studying, analyzing, and reforming the system, and its efforts in having done that, I conclude that *Aranda* should be overruled.

B. Response to the Dissent

The dissent approaches the *Aranda* issue in two primary ways. In one approach it questions whether by the Act the Legislature intended to abrogate *Aranda*'s holding:

> The question presented in this case is whether the Legislature intended to abrogate entirely a common law bad faith remedy when it enacted the Workers' Compensation Act. . . .
>
> . . . .
>
> We must decide, then, whether there is "clear legislative intent," *Dealers Elec. Supply*, 292 S.W.3d at 660, to extinguish entirely this settled common law remedy.

___ S.W.3d at ___ (Jefferson, C.J., dissenting). The dissent concludes that the Act does not reflect Legislative intent to do so, and I agree. There is no language that TMIC argues shows an intent to abolish the duty of good faith and fair dealing, the dissent sees none, and neither do I. Further, there is simply no question about what the Legislature intended. Its intent is taken from what it enacted—limits on the cause of action. *See Entergy Gulf States, Inc. v. Summers*, 282 S.W.3d 433, 437 (Tex. 2009). Because the Act contains no language intended to extinguish the action, that should end the inquiry because this Court presumes the Legislature deliberately and purposefully selects words and phrases it enacts, as well as deliberately and purposefully omits words and phrases it does not enact. *See Tex. Lottery Comm'n v. First State Bank of DeQueen*, 325 S.W.3d 628, 635

(Tex. 2010). But although I agree the Legislature did not intend to abolish the *Aranda* action, I disagree that whether it did is the question that must be answered. As I have noted previously, the essential question is not whether the Legislature intended to abrogate the common law bad faith remedy. The question is to what extent the judiciary will respect the Legislature's function of addressing the concerns and adjusting the rights of parties in the workers' compensation system.

The dissent's other approach is that sections 416.001 and 416.002 of the Act specifically recognize the common law cause of action for breach of the duty of good faith and fair dealing without abolishing it, thereby implicitly ratifying it or giving its existence the Legislature's stamp of approval. *See* ___ S.W.3d at ___ (Jefferson, C.J., dissenting) ("Even after the 1989 overhaul, the Act's express language makes plain the Legislature's intent that common law bad faith claims remain available to litigants."). In reaching its conclusion, the dissent inappropriately goes beyond the language of the Act.

When reading statutes, our goal is to ascertain and give effect to the Legislature's intent. *See F.F.P. Operating Partners, L.P. v. Duenez*, 237 S.W.3d 680, 683 (Tex. 2007). That intent is drawn from the plain meaning of the words chosen by the Legislature when it is possible to do so, *see Entergy Gulf States, Inc.*, 282 S.W.3d at 437, using any statutory definitions provided. *See* TEX. GOV'T CODE § 311.011(b); *Texas Dept. of Transp. v. Needham*, 82 S.W.3d 314, 318 (Tex. 2002). Where statutory text is clear, that text is determinative of legislative intent unless the plain meaning of the statute's words would produce an absurd result. *Entergy Gulf States, Inc.*, 282 S.W.3d at 437. Only when statutory text is susceptible of more than one reasonable interpretation is it appropriate

to look beyond its language for assistance in determining legislative intent. *See In re Smith*, 333 S.W.3d 582, 586 (Tex. 2011).

The Act addresses the *Aranda* cause of action in two sections of Chapter 416:

> **Certain Causes of Action Precluded**
> An action taken by an insurance carrier under an order of the commissioner or recommendations of a benefit review officer under Section 410.031, 410.032, or 410.033 may not be the basis of a cause of action against the insurance carrier for a breach of the duty of good faith and fair dealing.

TEX. LAB. CODE § 416.001.

> **Exemplary Damages**
> (a) In an action against an insurance carrier for a breach of the duty of good faith and fair dealing, recovery of exemplary damages is limited to the greater of:
> (1) four times the amount of actual damages; or
> (2) $250,000.
> (b) An action against a governmental entity or unit or an employee of a governmental entity or unit for a breach of the duty of good faith and fair dealing is governed by Chapters 101 and 104, Civil Practice and Remedies Code.

Id. § 416.002. The dissent maintains, and I agree, that the language of both sections plainly and clearly demonstrates the Legislature's intent to limit the *Aranda* cause of action. But there is a great deal of difference between the Legislature's acknowledging the existence of and limiting the effects of the *Aranda* action and its implicitly ratifying or approving the action.

The language of section 416.001 is simple and forthright. And its full intent is clear: carriers cannot be assessed damages in an *Aranda* action for conduct pursuant to orders or directives of the WCD. There is no language in the section to indicate the Legislature intended to ratify or approve the *Aranda* action. The statute is completely silent on the issue. Likewise, nowhere in section 416.002's language limiting exemplary damages can intent to ratify or approve the *Aranda* cause

of action be found. Again, the statute is completely silent on the issue. I presume the silence is a careful, purposeful, and deliberate choice. *See Tex. Lottery Comm'n*, 325 S.W.3d at 635.

Even though the dissent does not maintain that the language of either section 416.001 or section 416.002 is ambiguous, it goes beyond the Act's language to support its argument for legislative intent. It notes that the 1989 reform bill as originally introduced contained language making administrative penalties the exclusive consequence for bad faith or maliciously adjusting claims, but a committee substitute bill deleted that language and included language that only limited damages as to such actions. Generally, however, changes to language in bills as they pass through the legislative process are not relevant to legislative intent regarding legislation eventually enacted. *See Entergy Gulf States, Inc.*, 282 S.W.3d at 443 ("[W]e attach no controlling significance to the Legislature's failure to enact legislation . . . for the simple reason that it is always perilous to derive the meaning of an adopted provision from another provision deleted in the drafting process." (citations omitted)). Language enacted as law frequently differs from a bill as originally introduced as well as from versions that pass through committee and floor debate in one chamber of the legislature and then undergo the same process in the other chamber. And in many instances a bill is finally sent to a conference committee to work out even different compromise language. The reasons for changes in a bill's language are not always expressed in hearings or documented in records. But even if they were, the intent of the Legislature as a whole is not derived from language that was in a bill at some point or from the perceived intent of a committee that produced a committee substitute bill. The intent of the Legislature is derived from the language it finally enacted. *Alex Sheshunoff Mgmt. Servs., L.P. v. Johnson,* 209 S.W.3d 644, 651 (Tex. 2006)

("Ordinarily, the truest manifestation of what legislators intended is what lawmakers enacted, the literal text they voted on."). The absence of language in the Act abolishing the *Aranda* cause of action does not mean the Legislature intended to do the opposite, that is, to implicitly ratify or approve it.

Moreover, the fact that language abolishing the *Aranda* action was in the bill as it was originally filed indicates at least some legislative support for the Joint Select Committee's recommendation to abolish the action. On the other hand, the dissent points to no language in any iteration of the Act through three legislative sessions that shows legislative support for ratifying or approving the *Aranda* action. Thus, the dissent's argument that legislative intent to implicitly ratify or approve the *Aranda* action exists because language abolishing it was in the original bill but not the committee substitute is not only speculative as to the reason for the language's being removed, it is also illogical speculation. More logical speculation about the language being in the original bill and removed is that there was legislative support for abolishing the action, while the absence of ratification language in any version of the bill as well as the final enactment indicates there was *no* legislative intent to ratify or approve of the *Aranda* action. But in the final analysis, either argument about legislative intent based on the committee substitute bill can fairly be described as speculative and inappropriate.

Further, legislative intent emanates from the Act as a whole, and not from one isolated portion. *See Harris Cnty. Hosp. Dist. v. Tomball Reg'l Hosp.*, 283 S.W.3d 838, 842 (Tex. 2009). At least two parts of the Act indicate the absence of language abolishing the *Aranda* action does not reflect legislative intent to do the opposite and keep it available to litigants. First, the Act

specifically provides that under certain circumstances both the WCD and the employee may sue the carrier, and it specifies what either party can recover in such an action. TEX. LAB. CODE § 410.208(a)–(d). If the Legislature intended to ratify or approve an *Aranda* action, it could have made its intent clear by simply saying so in Chapter 416 while it was addressing the issue, just as it said in section 410.208 that both the WCD and employee may sue the carrier. But it did not. Second, one of the major goals of reform and changes made in the Act was to adopt an objective-based standard for determining indemnity benefits in order to reduce disputes and subjective decision making about them. One of two changes that was the "heart and soul" of the 1989 reforms was "a different method to compute benefits: the shift from the subjective standard of 'loss of wage earning capacity' for redress of injured workers to the more objective use of an impairment schedule for a determination of the recoverable loss caused by a compensable injury." 1 MONTFORD, at 3; *see* TEX. LAB. CODE § 408.122 (impairment income benefits are not recoverable unless based on an objective clinical or laboratory finding); *id.* § 408.124 (impairment income benefits must be based on an impairment rating determined by use of the "Guides to the Evaluation of Permanent Impairment," published by the American Medical Association); *see also Garcia*, 893 S.W.2d at 523 n.23 (noting the testimony of John Lewis, a workers' compensation expert retained by the Joint Select Committee to evaluate the former system: "What goes on in [the old law] system is inherently subjective . . . . The hope [in fashioning a new system] is to substitute to a greater degree objectivity so there is less reason to argue, the ability to deliver the benefits much more quickly and without the need for litigation." (quoting Meeting of the Legislative Oversight Committee on Workers' Compensation, April 10, 1989, Tape 4 at 2-3)). One of the Legislature's unquestioned goals was

to make decisions about benefits as objective as possible, and thereby reduce disputes and litigation over them. The *Aranda* cause of action with its subjective standards for damages is antithetical to such a system, and it has no dispute resolution process other than litigation with its associated delays and expense. Holding that there was legislative intent to implicitly approve or ratify the *Aranda* action because of an *absence* of language either abolishing or approving it would turn logic on its head when considered in context of the Act as a whole.[16]

In the final analysis, the *Aranda* cause of action is a common law one and it is this Court's prerogative and responsibility to evaluate whether the cause of action continues to be appropriate. That evaluation, in light of the workers' compensation system being wholly a creation of the

---

[16] Because the dissent seeks legislative intent outside the words of the statute, it seems that in fairness to the issue it would consider other factors outside the enacted language, or, the non-enacted language on which it relies. But it does not. Other factors would counsel against the conclusion that by its silence the Legislature implicitly ratified or approved the *Aranda* action. For example, ratifying or approving the *Aranda* action would have been diametrically opposed to the finding of the Legislature's Joint Select Committee that the action was detrimental to the goals and interests that had to be balanced in amending the old law, and its recommendation that the action be abolished in favor of a statutory action. *See* Joint Committee Report, at 16.

Another factor not discussed by the dissent is that the existing cause of action was a common law action and legislatively abolishing or abrogating a common law cause of action is a course not lightly undertaken. Allowing abrogation of an injured worker's common law cause of action against his employer in exchange for the adequate and more certain benefits provided by the Act—a cornerstone of workers' compensation law in Texas—was held constitutional in 1916. *See Garcia*, 893 S.W.2d at 521; *Middleton v. Tex. Power & Light Co.*, 185 S.W. 556, 562 (1916) (upholding constitutionality of the Employers' Liability Act of 1913). But during the years immediately preceding the 71st Legislature, this Court held that various legislative attempts to "cabin-in"—but not completely abolish—certain common law causes of action violated the Texas Constitution. *See Lucas v. U.S.*, 757 S.W.2d 687, 691 (Tex. 1988) (damages caps in art. 4590i §§ 11.02 and 11.03 as applied to catastrophically injured plaintiffs unconstitutional under due course of law provision); *Neagle v. Nelson*, 685 S.W.2d 11, 12 (Tex. 1985) (limitations provision of art. 4590i § 10.01 unconstitutional under open courts provision); *Nelson v. Krusen*, 678 S.W.2d 918, 922-23 (Tex. 1984) (limitations provision of TEX. INS. CODE art. 5.82, § 4 unconstitutional under open courts provision); *Sax v. Votteler*, 648 S.W.2d 661, 665-67 (Tex. 1983) (limitations provision in TEX. INS. CODE art. 5.82 as applied to minors unconstitutional under open courts provision). So as of 1989 when the Legislature was struggling to enact reforms, the long-standing construct whereby employees exchanged their common law negligence claims against employers for workers' compensation benefits had withstood constitutional challenge, but recent attempts by the Legislature to place limits on various common law causes of action had not. And opponents of the 1989 reforms promised, and brought, constitutional challenges to the new law. *See Garcia*, 893 S.W.2d at 534 (holding the new Act was constitutional and reversing the court of appeals that had affirmed the trial court's determination that the entire Act was unconstitutional). Taken in context of the times, then, the Legislature's action in even *limiting* an *Aranda* cause of action evidenced significant concern about and intent to control its disruptive effects—not intent to approve of or implicitly ratify it.

Legislature as part of its policy-making function, the Legislature's significant reformation of the system in 1989, and its continual supervision, monitoring, improving, and managing of the system, leads to the conclusion that Texas should join the majority of states that do not allow *Aranda*-type suits in the workers' compensation setting.[17] If the Texas Legislature determines, in its role of managing the workers' compensation system for the benefit of injured workers and employers that such a cause of action is appropriate as part of the system, I have confidence that legislators will exercise their prerogative to explicitly provide one.

VI. Conclusion

Justices Hecht, Wainwright, Medina, Johnson, Willett and Guzman join parts I, II, III, IV, and VI of the Court's opinion. Justices Hecht, Wainwright, Medina and Johnson join part V of the opinion, but Justices Willett and Guzman would wait to consider the issues involving Ruttiger's claims that TMIC breached its duty of good faith and fair dealing until the court of appeals first considers them. In light of the foregoing, those six justices join the Court's judgment remanding the case to the court of appeals for further proceedings. *See Bentley v. Bunton*, 94 S.W.3d 561, 607-08 (Tex. 2002).

Co. v. Whitworth*, 442 So.2d 1078, 1079 (Fla. Dist. Ct. App. 1983); *Bright v. Nimmo*, 320 S.E.2d 365, 381 (Ga. 1984); *Walters v. Indus. Indem. Co. of Idaho*, 908 P.2d 1240, 1243 (Idaho 1996); *Robertson v. Travelers Ins. Co.*, 448 N.E.2d 866, 870 (Ill. 1983); *Sims v. United States Fid. & Guar. Co.*, 782 N.E.2d 345, 359-60 (Ind. 2003); *Hormann v. New Hampshire Ins. Co.*, 689 P.2d 827 (Kan. 1984); *Zurich Ins. Co. v. Mitchell*, 712 S.W.2d 340, 341 (Ky. 1986); *Kelly v. CNA Ins. Co.*, 729 So.2d 1033, 1034 (La. 1999); *Fleming v. Nat'l Union Fire Ins. Co.*, 837 N.E.2d 1113, 1121 (Mass. 2005); *Gallagher v. Bituminous Fire & Marine Ins. Co.*, 492 A.2d 1280, 1283-84 (Md. 1985); *Denisen v. Milwaukee Mut. Ins. Co.*, 360 N.W.2d 448, 450 (Minn. Ct. App. 1985); *Young v. U.S. Fid. & Guar. Co.*, 588 S.W.2d 46, 48 (Mo. Ct. App. 1979); *Ihm v. Crawford & Co.*, 580 N.W.2d 115, 116 (Neb. 1998); *Burlew v. Am. Mut. Ins. Co.*, 63 N.Y.2d 412, 415 (N.Y. 1984); *see also Whitten v. Am. Mut. Liab. Ins. Co.*, 468 F. Supp. 470, 475 (D.S.C. 1977) (applying South Carolina law).

The judgment of the court of appeals affirming the trial court's judgment as to Ruttiger's Insurance Code and DTPA claims is reversed and judgment is rendered that Ruttiger take nothing on them. The case is remanded to the court of appeals for further proceedings regarding TMIC's contentions as to Ruttiger's claim for breach of the duty of good faith and fair dealing.

Phil Johnson
Justice

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0751

TEXAS MUTUAL INSURANCE, COMPANY, PETITIONER,

v.

TIMOTHY J. RUTTIGER, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIRST DISTRICT OF TEXAS

CHIEF JUSTICE JEFFERSON, joined by JUSTICE GREEN and JUSTICE LEHRMANN, dissenting.

Timothy Ruttiger allegedly sustained a work-related injury. Because of various complaints about how the Texas Mutual Insurance Company (TMIC) processed his workers' compensation claims, Ruttiger sued under the common law and chapters 541 and 542 of the Insurance Code, alleging that TMIC breached its duty of good faith and fair dealing.

TMIC and its amici ask us to hold that the Texas Workers' Compensation Act is the exclusive remedy for all work-related injuries, thus precluding Ruttiger's suit. We have previously concluded that both the Insurance Code and common law claims are viable—indeed, that they complement the workers' compensation system. Even after the 1989 overhaul, the Act's express language makes plain the Legislature's intent that common law bad faith claims remain available to litigants. As for Ruttiger's Insurance Code claims, the Code's language makes clear that they

apply, and the Act's exclusivity provision does not apply to insurance carriers. Far from having precluded such claims, then, the Legislature has continued to recognize actions like Ruttiger's.

Today the Court holds that most of Ruttiger's Insurance Code claims (and, as a result, his dependent DTPA claims) are no longer viable. A majority of the Court then remands Ruttiger's common law good-faith-and-fair-dealing claim to the court of appeals, so that it can decide this purely legal issue in the first instance. Rather than ask the court of appeals to answer whether claims this Court has previously recognized still exist, or whether our precedent still controls, I would hold today that both claims survived the Legislature's 1989 workers' compensation overhaul and would affirm the court of appeals' judgment. Because the Court does otherwise, I respectfully dissent.

I. The Old Workers' Compensation System

In 1987, we first considered whether a workers' compensation claimant could sue a carrier who engaged in a deceptive trade practice. *AETNA Casualty & Surety Co. v. Marshall*, 724 S.W.2d 770 (Tex. 1987). Interpreting former article 21.21 of the Insurance Code, the predecessor to chapter 541, we said that claims under that article were not foreclosed by the existence of the workers' compensation system. *Id.* at 772. We held that the statute's text "provide[d] a cause of action to a person who has been injured by an insurance carrier who engage[d] in" a deceptive trade practice. *Id.* As to the carrier's arguments that the workers' compensation system barred the employee's claim, we held that the "mere fact that Marshall was injured while working should not be used as a shield" to preclude Marhall's recovery for the separate injury he suffered as the result of the carrier's deceptive practices. *Id.*

The next year, in *Aranda v. Insurance Co. of North America*, 748 S.W.2d 210 (Tex. 1988), we considered the more controversial question of whether an employee could sue a workers' compensation carrier for a breach of the common law duty of good faith and fair dealing. We held that such claims were viable. *Id.* at 215. Interpreting the former workers' compensation statute's exclusivity provision, we held that it "was not intended to shield compensation carriers from the entire field of tort law" and that it could not "be read as a bar to a claim that is not based on a job-related injury." *Id.* at 214. Expanding on this point, we emphasized that the workers' compensation statute was exclusive only as to job-related injuries, which are separate from injuries suffered as the result of a carrier's breach of duty:

> Liability as a result of a carrier's breach of the duty of good faith and fair dealing or intentional misconduct in the processing of a compensation claim is distinct from the liability for the injury arising in the course of employment. Injury from the carrier's conduct arises out of the contractual relationship between the carrier and the employee and is *sustained after the job-related injury*.

Id. (emphasis added). "A claimant," we held, "is permitted to recover when he shows that the carrier's breach . . . is separate from the compensation claim and produced an independent injury." *Id.* We also concluded that the possibility of administrative penalties did not suggest that common law claims were precluded because the penalties did not afford relief from the particular injuries the claimant alleged. *Id.* at 215.

II. The New Workers' Compensation Act

The Legislature overhauled our workers' compensation scheme in 1989. The Legislature examined the successes and failings of the previous system, commissioning a number of studies and reports to address what was driving the system's high cost. Several of these studies suggested

legislative displeasure with *Aranda*, which was cited as a source of rising costs. One legislative report noted that "Texas law allows more cases to be adjudicated outside the scope of the workers' compensation law than laws of other states." JOINT SELECT COMMITTEE ON WORKERS' COMPENSATION INSURANCE, A REPORT TO THE 71ST LEGISLATURE 3 (Dec. 9, 1988). As such, the report suggested that the Legislature "[p]rovide that bad faith handling of claims is not grounds for a suit outside the workers' compensation act." *Id.* at 16. Another report addressed the issues raised by *Marshall*, suggesting that the Legislature "[e]liminate extra contractual liability resulting in treble damage suits under the Deceptive Trade Practices-Consumer Protection Act and the Unfair Claim Settlement Practices Act." HOUSE SELECT INTERIM COMMITTEE ON WORKERS' COMPENSATION INSURANCE, INTERIM REPORT TO THE 70TH LEGISLATURE 41 (Jan. 1987).[1]

The first draft of the new Act adopted the Joint Select Committee's recommendation that common law claims be precluded. The bill as introduced permitted an administrative penalty to be assessed against carriers for "malice or bad faith" in claims-processing, and it made clear that this penalty constituted "the employee's exclusive remedy against the employer *or carrier*" for such conduct. Tex. H.B. 1, 71st Leg., R.S., § 11.12 (1989) (emphasis added). However, the committee substitute removed that provision, opting instead for language that simply limited *Aranda*. Tex. C.S.H.B. 1, 71st Leg., R.S., §§ 10.41, 10.42 (1989). It was this limiting language that ultimately

[1] Similarly, a report published after the passage of the new Act by Senator John Montford, the primary author of the overhaul legislation, made clear that the Legislature, in passing the new law, had considered *Aranda*'s impact: "Following *Aranda*, a rational and common response for carriers was less resistance not only to paying questionable claims, but also to paying more to settle comp claims than their reasonable value." 1 JOHN T. MONTFORD, ET AL., A GUIDE TO WORKERS' COMP REFORM § 4.2(a)(7) (1991); *see also id.* § 4.2(b)(7) ("In sum, *Aranda* dramatically shifted the relative negotiating positions between the claimant and carrier.").

passed, with some changes, as part of the new Act. Texas Workers' Compensation Act, 71st Leg., 2d C.S., ch. 1, 1989 Tex. Gen. Laws 1 (codified at TEX. LAB. CODE 401-19)).[2]

III. The Common Law Claims

The plurality's analysis of common law claims can only properly be considered in light of *Aranda* and with deference to the Legislature's express recognition, in chapter 416 of the Labor Code, that this avenue of relief endures. The question presented in this case is whether the Legislature intended to abrogate entirely a common law bad faith remedy when it enacted the Workers' Compensation Act. Given the existence of chapter 416, it is impossible to conclude that the Legislature had such an intent.

We have repeatedly addressed situations in which common law claims and statutory remedies seem to overlap, and we have embraced a framework to guide our analysis in such cases. The touchstone of this analysis, as in all statutory interpretation, is legislative intent. We start with the proposition that statutes abrogating common law causes of action are disfavored. *Cash America Int'l Inc. v. Bennett*, 35 S.W.3d 12, 16 (Tex. 2000). A statute banishing a common law right "'will not be extended beyond its plain meaning or applied to cases not clearly within its purview.'" *Id.* (quoting *Satterfield v. Satterfield*, 448 S.W.2d 456, 459 (Tex. 1969)). Abrogation by implication is disfavored. *Id.* For that reason, courts must examine whether the statute's language "indicate[s] clearly or plainly that the Legislature intended to replace" a common law claim with an exclusive

[2] The language limiting *Aranda* was codified as chapter 416 of the Labor Code.

statutory remedy, and we "decline[] to construe statutes to deprive citizens of common-law rights unless the Legislature clearly expressed that intent."[3] *Id.*

We must decide, then, whether there is "clear legislative intent," *Dealers Elec. Supply*, 292 S.W.3d at 660, to extinguish entirely this settled common law remedy. As amended by the Workers Compensation Act, the Labor Code provides:

> An action taken by an insurance carrier under an order of the commissioner or recommendations of a benefit review officer under Section 410.031, 410.032, or 410.033 may not be the basis of a cause of action against the insurance carrier *for a breach of the duty of good faith and fair dealing*.

TEX. LAB. CODE § 416.001 (emphasis added). The fact that certain bad faith claims are thereby eliminated requires the logical inference that others survive. Likewise, the Code's limits on exemplary damages "[i]n an action against an insurance carrier for a breach of the duty of good faith and fair dealing," *id.* § 416.002, implies that other damages remain available. In the context of our precedent, there is but one conclusion to be drawn from these provisions: the Legislature *did not*

[3] We have applied this framework repeatedly. For example, in *Lopez*, which the Court cites but then seems to forget about, we noted that "[w]hether a regulatory scheme is an exclusive remedy depends on whether 'the Legislature *intended* for the regulatory process to be the exclusive means for remedying the problem to which the regulation is addressed." *City of Waco v. Lopez*, 259 S.W.3d 147, 153 (Tex. 2008) (quoting *In re Sw. Bell Tel. Co.*, 235 S.W.3d 619, 624–25 (Tex. 2007)) (emphasis added). Likewise, in *Waffle House, Inc. v. Williams*, 313 S.W.3d 796, 802 (Tex. 2010), we held that "the legislative creation of a statutory remedy is not presumed to displace common-law remedies. To the contrary, abrogation of common-law claims is disfavored." Acknowledging the centrality of legislative intent, *see id.* at 809 n.66, we looked at the statute's "meticulous legislative design," *id.* at 805. Similarly, we have held that "absent *clear legislative intent* we have declined to construe statutes to deprive citizens of common-law rights." *Dealers Elec. Supply Co. v. Scoggins Constr. Co.*, 292 S.W.3d 650, 660 (Tex. 2009) (emphasis added). We have also written that "statutes can modify common law rules, but before we construe one to do so, *we must look carefully to be sure that was what the Legislature intended*." *Energy Serv. Co. of Bowie v. Superior Snubbing Servs., Inc.*, 236 S.W.3d 190, 194 (Tex. 2007) (emphasis added); *see also, e.g., Employees Ret. Sys. of Tex. v. Duenez*, 288 S.W.3d 905, 919 (Tex. 2009) (the proper inquiry is legislative intent); *Pruett v. Harris Cnty. Bail Bond Bd.*, 249 S.W.3d 447, 454 (Tex. 2008) (same); *Butnaru v. Ford Motor Co.*, 84 S.W.3d 198, 208 (Tex. 2002) (same).

intend to abrogate the common law claims. To the contrary, the Legislature, in the clearest way possible, *limited Aranda*-type claims, rather than abolished them.[4]

The inquiry ends there. If the Legislature limited certain *Aranda*-type claims, it could not logically have also intended to eliminate them. The Act's structure further supports this conclusion.

The exclusivity provision of the new Act provides that "[r]ecovery of workers' compensation benefits is the exclusive remedy of an employee covered by workers' compensation insurance coverage . . . *against the employer* . . . [for] a work-related injury sustained by the employee." TEX. LAB. CODE § 408.001 (emphasis added). This clause thus emphasizes two important aspects of the old law: (1) it provides that workers' compensation is exclusive *only with respect to the employer*, and (2) it retains the distinction, important to our decisions in *Aranda* and *Marshall*, between a "work-related injury" and an injury caused by a carrier's misconduct. *See id.* A logical inference from this provision, which bars claims against employers, is that claims against carriers may proceed. Indeed, *Aranda*, analyzing the old Act's exclusivity provision, recognized exactly this, holding that the injury alleged in a common law suit is wholly separate, both conceptually and temporally, from the job-related injury to which the exclusivity provision, and the workers' compensation system as a whole, applied. *Aranda*, 748 S.W.2d at 214 ("Injury from the carrier's

---

[4] The House Committee that considered the Act referred to the provisions as "provid[ing] *limitations* in actions against a carrier for breach of duty." HOUSE COMM. ON BUS. & COMMERCE, BILL ANALYSIS, S.B. 1, 71st Leg., 2d C.S. (1989) (emphasis added). Senator Montford was even more explicit, noting that the provisions were meant to "temper" *Aranda*:

> In the very important Article 10 of the 1989 Workers' Compensation Act are provisions . . . provid[ing] procedures and implementing provisions assessing . . . administrative penalt[ies] . . . [and] temper[ing] the liability of a comp carrier for breach of good faith/fair dealing under *Aranda* . . . .

2 MONTFORD,§ 10.0 (footnotes omitted).

conduct arises out of the contractual relationship between the carrier and the employee and is sustained after the job-related injury.").

The existence of administrative penalties that can be assessed against workers' compensation carriers does not mandate the contrary. *See* TEX. LAB. CODE ch. 415 (creating administrative penalties for certain acts by employers, carriers, and other parties). The Insurance Code allows for the assessment of substantially similar administrative penalties against insurers operating outside of the workers' compensation system, *see* TEX. INS. CODE § 84.021 (providing for the imposition of administrative penalties for violations of the insurance code and other insurance laws), but we have never held the existence of those penalties precludes the claims at issue here when made against those insurers.[5]

As shown by the presence of chapter 416, not to mention the Act's legislative history and the language of its exclusivity clause, the Legislature pointedly recognized the availability of claims outside of the Act. Therefore, we cannot legitimately conclude that the Legislature intended for the Act to be an exclusive remedy with regard to carriers. If the Act's "comprehensive" administrative scheme had been intended to preclude the common law claims permitted in *Aranda*, there would

---

[5] Indeed, each of the particular penalties that the Court says may be assessed against workers' compensation carriers may also be assessed against other insurers. Insurers may be fined for any violation of the Insurance Code, TEX. INS. CODE § 84.021, and that Code specifically prohibits unfair settlement practices. *Compare* TEX. LAB. CODE §§ 409.021, 415.002 (permitting administrative penalties for unfair claims-settlement practices), *with* TEX. INS. CODE § 541.060 (prohibiting unfair settlement practices).

Moreover, the existence of the penalty regime actually clarifies the Legislature's intent *not* to broadly preclude claims under the common law and Insurance Code against workers' compensation carriers. As the Court notes, ___ S.W.3d at ___, failure to comply with a Division order is grounds for an administrative penalty, and a claimant may bring suit to enforce such an order and may be awarded attorney's fees and a twelve percent penalty. TEX. LAB. CODE § 410.208. It is in this lone context—where judicial enforcement is expressly permitted—that the Legislature by statute prohibited claimants from bringing common law claims. *Id.* § 416.001 (barring claims against a workers' compensation carrier for breach of the duty of good faith and fair dealing if the claims are based on actions taken by the carrier pursuant to Division orders).

have been no need for the Legislature to enact chapter 416. *Cf. Cameron v. Terrell & Garrett, Inc.*, 618 S.W.2d 535, 540 ("[I]f the Act already excluded [the] defendants who do not furnish the goods or services, . . . there would have been no need for the legislature to exempt media defendants from liablity . . . ."). Indeed, it appears that the penalty provisions and the limitations on *Aranda* were seen as complementary. The 1989 Act, then, did not repudiate, but rather acknowledged, the viability of extra-contractual claims against workers' compensation insurance carriers. This is enough to decide the case before us.

IV. The Insurance Code Claims

TMIC's primary argument against the Insurance Code's applicability to its conduct is the same argument it made with regard to the common law: that the workers' compensation system is so comprehensive that all remedies outside of the Act are necessarily excluded.[6] This is

[6] Though the Court credits this argument, I believe that TMIC failed to properly preserve this issue and that it therefore should not be considered in this Court. Texas Rule of Appellate Procedure 53.2(f) provides that the petition for review

> must state concisely all issues or points presented for review. The statement of an issue or point will be treated as covering every subsidiary question that is fairly included. If the matter complained of originated in the trial court, it should have been preserved for appellate review in the trial court and assigned as error in the court of appeals.

See also TEX. R. APP. P. 33.1 (preserving issues for appellate review); *id.* 38.1(f) (requiring appellant to "state concisely all issues or points presented for review" in the court of appeals). TMIC, however, did not raise this argument in the court of appeals, instead challenging the judgment on the Insurance Code violations based only on the sufficiency of the evidence. *Cf. Equistar Chems., L.P. v. Dresser-Rand Co.*, 240 S.W.3d 864, 868 (Tex. 2007) (holding that the defendant's no-evidence objections at the trial court did not preserve error as to its related legal arguments). Indeed, in the court of appeals, TMIC only argued that Ruttiger's common law claims—and not his Insurance Code claims—were not legally cognizable. TMIC's arguments about the unavailability of remedies under the Insurance Code was raised for the first time on appeal in its Reply Brief in Support of the Petition for Review. As such, they do not meet the requirements of Rule 53.2(f). *See* TEX. R. APP. P. 53.2(f). The Court holds that TMIC's legal sufficiency challenge preserved error on this point (although, inexplicably, the Court holds that error was not preserved as to another of TMIC's Insurance Code claims). If that is enough, there is little that a legal sufficiency challenge will *not* preserve. For the sake of argument, I presume the issue is properly before us.

unconvincing. In addition to the fact that the Act is not, by its terms, an exclusive remedy with respect to carriers, *see* TEX. LAB. CODE § 408.001, the Legislature's recognition of extra-contractual common law claims in chapter 416 makes clear that it did not intend to preclude all claims against carriers for proven misconduct. *See Lopez*, 259 S.W.3d at 153 (holding that we look for legislative intent that a claim be precluded). The Legislature was aware of—and concerned with—our decisions in both *Aranda* and *Marshall*, but it did not endeavor to override them. If the Workers' Compensation Act is not exclusive with respect to carriers, there is no basis upon which to hold that Insurance Code claims are now precluded in this context. Moreover, though we were concerned with the issue of exclusivity in *Aranda*, we decided *Marshall* primarily on the basis of the Insurance Code's text. We held, quite plainly, that the Insurance Code "provides that a person who has sustained actual damages as a result of another's deceptive acts or practices may maintain a suit for treble damages." 724 S.W.2d at 772. Nothing in the Workers' Compensation Act overcame the Insurance Code's plain language, and, therefore, we held that a carrier could not use the act "as a shield" from liability. *Id.* Notwithstanding the Court's overruling of *Marshall* today, the Insurance Code's provisions still apply, and, as such, the Court's preemption approach is without merit.[7]

V. Conclusion

[7] TMIC additionally argues that Ruttiger's claims are precluded by *Aranda*'s independent injury requirement and that they are not among a narrow class of injuries recognized by *Aranda*. Neither of these contentions is correct. In *Aranda*, we wrote that an "[i]njury from the carrier's conduct arises out of the contractual relationship between the carrier and the employee and is sustained after the job-related injury." 748 S.W.2d at 214. Thus, a "claimant is permitted to recover when he shows that the carrier's breach of the duty of good faith and fair dealing . . . is separate from the compensation claim and produced an independent injury." *Id.* The jury found that Ruttiger was injured when the carrier breached its duty, and it found that he sustained damages as a direct result of his injuries. Moreover, Ruttiger's damages are not the sort of "lost compensation benefits" we said could not be recovered in *Saenz v. Fidelity & Guaranty Insurance Underwriters*, 925 S.W.2d 607, 612 (Tex. 1996). I agree with the court of appeals on this issue for the reasons stated in its decision. 265 S.W.3d 651. Finally, I agree with this Court that Ruttiger exhausted his administrative remedies, and the trial court had jurisdiction over this suit.

Whether allowing extra-contractual claims makes sense is a different question than whether the laws, as written, permit their pursuit. Because the Legislature has not made the Act exclusive with respect to extra-contractual claims, I would hold that Ruttiger's claims are not barred and would affirm the court of appeals' judgment. Because the Court does otherwise, I respectfully dissent.

Chief Justice

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0751

TEXAS MUTUAL INSURANCE COMPANY, PETITIONER,

v.

TIMOTHY J. RUTTIGER, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FIRST DISTRICT OF TEXAS

JUSTICE WILLETT, joined by JUSTICE GUZMAN, concurring.

I join all but Part V of the Court's opinion, which addresses whether the Texas Workers' Compensation Act precludes Ruttiger's common-law "good faith and fair dealing" claim. On this point, the Court is divided 4-3-2. JUSTICE JOHNSON (joined by three colleagues) contends the TWCA's comprehensive regime removes any basis for allowing *Aranda*-type suits.[1] CHIEF JUSTICE JEFFERSON (joined by two colleagues) responds that such suits are limited but not abrogated, noting the TWCA (1) eliminates certain bad-faith claims, meaning others survive, and (2) limits exemplary damages in "good faith and fair dealing" suits specifically, meaning other damages remain

[1] __ S.W.3d at __.

recoverable.[2] My view (shared by JUSTICE GUZMAN) is decidedly agnostic: As the court of appeals never addressed this issue,[3] I would remand it rather than resolve it.

ANGLO-DUTCH PETROLEUM INTERNATIONAL, INC. AND ANGLO-DUTCH (TENGE) L.L.C., PETITIONERS,

v.

GREENBERG PEDEN, P.C. AND GERARD J. SWONKE, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued September 14, 2010

JUSTICE HECHT delivered the opinion of the Court, in which CHIEF JUSTICE JEFFERSON, JUSTICE JOHNSON, JUSTICE WILLETT, and JUSTICE GUZMAN joined.

JUSTICE WAINWRIGHT filed an opinion concurring in part and dissenting in part.

JUSTICE LEHRMANN filed a dissenting opinion, in which JUSTICE MEDINA and JUSTICE GREEN joined.

The parties dispute whether an attorney fee agreement is ambiguous. The client contends that an agreement on law firm letterhead, signed by a lawyer on behalf of the firm, is with the firm, not with the lawyer personally. The lawyer counters that his use of personal pronouns in the agreement, as well as surrounding circumstances, create an ambiguity that must be resolved by a jury. We agree with the client and therefore reverse the judgment of the court of appeals.[1]

[1] 267 S.W.3d 454 (Tex. App.–Houston [14th Dist.] 2008).

I

Scott V. Van Dyke, president of Anglo-Dutch Petroleum International, Inc., asked Gerard J. Swonke, a lawyer "of counsel" with the firm of Greenberg Peden, P.C., to represent Anglo-Dutch as plaintiff[2] in a suit against Halliburton Energy Services, Inc. and Ramco Oil & Gas, Ltd. for disclosing confidential information concerning the development of oil and gas prospects in the Tenge Field in Kazakhstan. Greenberg Peden had represented Anglo-Dutch on various matters for years and had drafted the confidentiality agreement that would be central to the suit. Swonke had been responsible for Anglo-Dutch's initial engagement as a firm client and had done much of its work. He and Van Dyke were friends.

The Tenge Field case was expected to be protracted and difficult, and Anglo-Dutch could not afford to pay Greenberg Peden's hourly rates, as it had done in the past, so it proposed a 20% contingent fee. The firm declined. Anglo-Dutch had fallen behind in its obligations to the firm, and the firm had decided not to accept further business from Anglo-Dutch until it became current. Plus Greenberg Peden believed that it lacked the resources needed to prosecute the case on a contingent-fee basis. Swonke referred Van Dyke to another firm, McConn & Williams, which took the case.

But Swonke's continued counsel, based on his involvement in the events leading up to the litigation, was still needed, and Van Dyke asked him to assist McConn & Williams, again for a contingent fee. Swonke's arrangement with Greenberg Peden required him to offer new business to the firm; if the firm refused, Swonke could undertake the representation individually. Swonke

[2] An affiliate, Anglo-Dutch (Tenge) L.L.C., was also a plaintiff and is a petitioner here, wholly aligned with Anglo-Dutch Petroleum International, Inc.

used personal stationery — "Law Offices of Gerard J. Swonke Attorney at Law" — and signed individually when representing clients who were not also clients of the firm. Even in those situations, the firm sent the bills and retained ten percent of the fees. Swonke agreed to Van Dyke's proposal and dictated the following agreement ("the Fee Agreement"), which his secretary prepared on firm letterhead and he signed on its behalf:

Re: Cause No. 2000-22588; *Anglo-Dutch (Tenge) et al. vs. Ramco, et al.;* In the 151st Judicial District of Harris County, Texas.

Dear Scott:

This letter memorializes our agreement with respect to me assisting you and/or the companies which you control (Anglo-Dutch) and the law firm of McConn & Williams, LLP regarding the above-referenced matter.

In that regard, you have executed a Fee Agreement with the law firm of McConn & Williams on March 25, 2000, which is incorporated herein by reference. I agree to assist Anglo-Dutch and that firm with this lawsuit for proportionately the same percentage (20%) of any benefit to McConn & Williams reflected in such agreement. However, I will not be responsible for any expenses other than those I may personally incur. Further, the proportions under which my fees shall be calculated

will be the ratio of the hours I have spent or will spend on this matter relative to the hours the attorneys at McConn & Williams have spent or will spend after the date the lawsuit was filed, rounded to the next whole percentage. For example, if McConn & Williams' attorneys spend 1,000 hours on the lawsuit after the date the lawsuit was filed and I spend 90 hours of my time towards the lawsuit, then by rounding up to the nearest whole number, I would be entitled to receive from you 2% (10% of 20%) of the gross revenues and other benefits recovered, if any, from this lawsuit. In addition, should the Fee Agreement be amended, you agree that I shall be entitled to the benefit of such amendment.

If this comports with your understanding of our agreement, please indicate by signing below and returning this letter to me.

If you have any questions, please contact me.

Very truly yours,

GREENBERG PEDEN P.C.

s/ *G. J. Swonke*
GERARD J. SWONKE

Re: McConn & Williams, LLP Attorney's Employment Agreement

Dear Jerry:

Pursuant to our Fee Agreement dated October 16, 2000, please find enclosed a copy of the executed Attorney's Employment Agreement with McConn & Williams, LLP related to Cause No. 2000-2258; *Anglo-Dutch (Tenge) et al. Vs. Ramco, et al.;* in the 151st Judicial District of Harris County Texas.

This fee agreement with McConn & Williams, LLP provides the basis for the Agreement between Greenberg Peden P.C. and Anglo-Dutch.

Very truly yours,

s/ *Scott Van Dyke*
Scott V. Van Dyke
President

Of significance is Van Dyke's reference to the Fee Agreement as "the Agreement between Greenberg Peden P.C. and Anglo-Dutch." Swonke received the letter but did not read it and thus did not respond.

Swonke continued to work on the case, and as provided by the Fee Agreement, Greenberg Peden invoiced Anglo-Dutch for expenses. But a year later, Greenberg Peden dissolved, and Swonke moved to McConn & Williams, again in an "of counsel" relationship. In a letter to Van

Dyke, Swonke wrote that he would not take the Anglo-Dutch files with him if Van Dyke objected.[3] Van Dyke did not. Swonke continued to work on the Tenge Field case at McConn & Williams as did other lawyers, including two who were also "of counsel".

As the litigation wore on, Anglo-Dutch and McConn & Williams decided to retain additional counsel, and they hired John M. O'Quinn & Associates. McConn & Williams reduced its 20% fee to 16-2/3%, and Anglo-Dutch agreed to pay O'Quinn 20%, for a total contingent fee of 36-2/3%. Still later, Anglo-Dutch agreed to pay the fee net of expenses. The case was tried to a plaintiffs' verdict and then settled for $51 million. Anglo-Dutch's legal fees and expenses totaled slightly over $20 million.

A few days before the settlement was funded, Swonke told Van Dyke that he expected to be paid under the Fee Agreement not only for the 277 hours he worked while at Greenberg Peden but also for 1,022 hours he worked at McConn & Williams. All the other lawyers at McConn & Williams were to be paid under the firm's agreement with Anglo-Dutch. Greenberg Peden assigned its interest in the Fee Agreement to Swonke. The assignment, which Swonke prepared and signed, recited that "Swonke executed [the Fee Agreement] on behalf of (and while affiliated with) Greenberg Peden as an Of Counsel". Van Dyke offered to pay $293,338.85 for Swonke's work on the case while at Greenberg Peden but refused to pay for the time spent by Swonke at McConn & Williams.

[3] Swonke wrote to Van Dyke on November 6, 2001: "For many years, I have had the pleasure of representing you and your interests through my association with Greenberg Peden, P.C. However, recently Greenberg Peden, P.C. has decided to dissolve. As a result, I will have the pleasure of continuing to represent your interests as 'Of Counsel' with the law firm of McConn & Williams, L.L.P. . . . I am planning to take your files with me to my new firm. If you do not wish for me to take your files, please contact me as soon as possible so that we can make arrangements for you to take possession of them."

Anglo-Dutch sued for a declaration that the Fee Agreement was with Greenberg Peden, not Swonke personally. It also sued Swonke for breach of fiduciary duty. Swonke counterclaimed for breach of contract, asserting that he personally was party to the agreement. Swonke also alleged that Van Dyke had defrauded him. Based on Swonke's testimony that his use of firm letterhead and the firm signature block, and his characterization of the agreement in the assignment, were mistakes, and extrinsic evidence of the parties' relationship, the trial court concluded that the agreement was ambiguous and submitted the parties' dispute to the jury. The jury found that the Fee Agreement was with Swonke, that Swonke had complied with his fiduciary duty to Anglo-Dutch, and that his damages were $1 million. The jury failed to find that Van Dyke had defrauded Swonke. The trial court rendered judgment on the verdict, and the court of appeals affirmed.[4]

We granted Anglo-Dutch's petition for review.[5]

II

We begin by considering what standards to apply in construing lawyer-client contracts. We then apply those standards to the Fee Agreement, first to its text, and then to the circumstances surrounding its execution.

A

"'Whether a contract is ambiguous is a question of law that must be decided by examining the contract as a whole in light of the circumstances present when the contract was entered.'"[6] One

[4] 267 S.W.3d 454.

[5] 53 Tex. Sup. Ct. J. 758 (May 28, 2010).

such circumstance is the existence of a lawyer–client relationship between the parties.[7] Because a lawyer's fiduciary duty to a client covers contract negotiations between them, such contracts are closely scrutinized.[8] Part of the lawyer's duty is to inform the client of all material facts.[9] And so that this responsibility is not a mere and meaningless formality, the lawyer must be clear.

Clarity in fee agreements is certainly important to clients. In an amicus brief supporting Anglo-Dutch, Professor Linda Eads explains:

> [Clients] need to know they can depend on the firm they thought they hired to represent their interests. When there is uncertainty about a firm's or attorney's responsibility for a matter, there is a real risk that loyalty to that client will become watery. And if disputes arise about fees or other issues, clients need to know who has ultimate authority to negotiate the issue, firm management or just the attorney working on the matter.[10]

Clarity is also important to lawyers. Professor Eads continues:

> Law firms need to know whether they are entitled to fees in order to budget their expenses and organizational strategy; firms need to know how much, and what scope of, malpractice insurance to purchase; they need to know who their clients are in

> order to analyze potential conflicts of interest; and firms need to know what matters are theirs in order to staff them appropriately and ensure their clients' interests are protected.
>
> * * *
>
> [Individual] lawyers will want the certainty that their law firm stands behind them, that the firm's malpractice carrier will defend them if necessary, and that the fee agreements they draft will be interpreted to avoid readings that would involve violations of the rules of discipline. Further, in cases in which the existence of an ambiguity appears to favor the lawyer, allowing a lawyer initially to benefit from the ambiguity might not be a good thing, even for the lawyer. By suing a former client, the lawyer's reputation often suffers. And if the ambiguity was drafted by the lawyer, Texas courts will have to decide how to handle malpractice claims based on poor draftsmanship of the fee agreement.[11]

A number of law firms also appearing as amicus curiae endorse these views.[12]

Only reasonable clarity is required, not perfection; not every dispute over the contract's meaning must be resolved against the lawyer. But the object is that the client be informed, and thus whether the lawyer has been reasonably clear must be determined from the client's perspective. Accordingly, we agree with the *Restatement (Third) of the Law Governing Lawyers* that "[a] tribunal should construe a contract between client and lawyer as a reasonable person in the circumstances of the client would have construed it."[13]

---

[11] *Id*. at 20-21.

[12] Brief of Amici Curiae Abrams Scott & Bickley, L.L.P., Arnold & Itkin LLP, Caddell & Chapman, Cornell, Smith & Mierl, LLP, Dawson, Sodd, Ellis & Hodge LLP, Law Office of James M. McCormack, and Quilling, Selander, Cummiskey & Lownds, P.C., in Support of Petitioner at 11-12. These firms describe themselves as follows: "Some . . . are larger firms with multiple offices and dozens of attorneys practicing before the Texas bar; others are small firms with just a few attorneys. Some represent primarily defendants, some represent primarily plaintiffs, and some represent plaintiffs and defendants on a regular basis. The *amici curiae* are thus in a balanced position to address the interpretation of fee agreements between lawyers and their clients." *Id.* at 1.

[13] RESTATEMENT (THIRD) OF THE LAW GOVERNING LAWYERS § 18(2).

Other circumstances surrounding the execution of a contract may inform its construction, but "[t]here are limits."[14] We have said:

> An unambiguous contract will be enforced as written, and parol evidence will not be received for the purpose of creating an ambiguity or to give the contract a meaning different from that which its language imports. Only where a contract is ambiguous may a court consider the parties' interpretation and "admit extraneous evidence to determine the true meaning of the instrument."[15]

Understanding the context in which an agreement was made is essential in determining the parties' intent *as expressed in the agreement*, but it is the parties' expressed intent that the court must determine. Extrinsic evidence cannot be used to show that the parties probably meant, or could have meant, something other than what their agreement stated.[16]

B

On its face, the Fee Agreement is plainly one with Greenberg Peden, not Swonke personally. The clear indicia of the firm letterhead and signature on the firm's behalf are not contradicted by the personal pronouns in the text. Swonke's uses of "I", "me", and "my" indicate that he would himself be working on the matter, which Anglo-Dutch certainly intended, but none suggests that other attorneys and staff at Greenberg Peden would be excluded from the case any more than they had

---

[14] *Sun Oil Co. (Delaware) v. Madeley*, 626 S.W.2d 726, 731 (Tex. 1981) ("If, in the light of surrounding circumstances, the language of the contract appears to be capable of only a single meaning, the court can then confine itself to the writing. Consideration of the facts and circumstances surrounding the execution of a contract, however, is simply an aid in the construction of the contract's language. There are limits.").

[15] *David J. Sacks, P.C. v. Haden*, 266 S.W.3d 447, 450-451 (Tex. 2008) (per curiam) (citation omitted) (quoting *Nat'l Union Fire Ins. Co. of Pittsburgh, Pa. v. CBI Indus., Inc.*, 907 S.W.2d 517, 520 (Tex. 1995) (per curiam), and citing *Universal C.I.T. Credit Corp. v. Daniel*, 243 S.W.2d 154, 157 (Tex. 1951)).

[16] *See Gannon v. Baker*, 818 S.W.2d 754, 755-756 (Tex. 1991) (per curiam) ("The parol evidence rule applies only to contractual or jural writings evidencing the creation, modification, termination or securing of a particular right or obligation. *Brannon v. Gulf States Energy Corp.*, 562 S.W.2d 219, 222 (Tex. 1977). The rule does not apply to mere statements or recitals of past facts.").

been from other Anglo-Dutch matters. Since the fee was contingent on recovery and therefore not based on any attorney's hourly rate, it would presumably make no difference to Anglo-Dutch who besides Swonke worked on the case as long as the fee was computed on his hours. One use of "I" clearly included the firm: "I will not be responsible for any expenses". The firm, not Swonke, invoiced the clients for expenses, on firm letterhead. Moreover, the second-person pronouns show that the word "you" refers sometimes only to Van Dyke individually ("you and/or the companies which you control"), sometimes only to Anglo-Dutch ("I would be entitled to receive from you"), and sometimes to Van Dyke and his companies ("you have executed" the McConn & Williams fee agreement — Van Dyke signing for his companies). In sum, the pronouns indicate only inexact drafting; none says that despite the firm letterhead and firm signature, the agreement could only have been with Swonke personally.

Nor does the fee calculation, based solely on the hours Swonke spent individually, suggest that others at Greenberg Peden were excluded from the work. Taking Swonke's time into account provided a way of limiting the fee. If anything, the rounding-up feature of the calculation might suggest a means of providing additional compensation for others who did work on the case. Anglo-Dutch was to reimburse expenses, which were billed by Greenberg Peden, not by Swonke individually.

Even if the Fee Agreement had expressly provided that only Swonke would render the legal services required, the representation could still have been a firm matter. Anglo-Dutch was already a Greenberg Peden client and had been for years. Although Swonke had first engaged Anglo-Dutch as a client and had been responsible for most of its work, Anglo-Dutch had never been Swonke's

non-firm client. From Anglo-Dutch's perspective, nothing in the Fee Agreement reasonably suggested that its relationship with its lawyers was changing.

C

The trial court having determined the Fee Agreement to be ambiguous, the parties offered extensive extrinsic evidence of their intent in the ten-day trial. Given our conclusion that the agreement was not ambiguous, this evidence is of limited relevance. It cannot be used to show the parties' motives or intentions apart from the Fee Agreement; it can only provide the context in which the agreement was reached.

Van Dyke was not an unsophisticated client; indeed, it was he, not Swonke, who proposed the terms of the Fee Agreement. But for years Anglo-Dutch had been a client of Greenberg Peden, not Swonke personally. Van Dyke knew Greenberg Peden was concerned that Anglo-Dutch was delinquent in its payments to the firm, but the Tenge Field representation was on a contingent-fee basis. He also knew that the firm had refused to be lead counsel in the case, but the firm certainly had sufficient resources for a consulting role. Nothing about the parties' relationship preceding the Fee Agreement required Van Dyke to recognize that though the agreement purported to be with Greenberg Peden, it was really with Swonke.

Events following the Fee Agreement do not cast the situation in a different light. The day he signed the Fee Agreement for Anglo-Dutch, Van Dyke wrote Swonke that the agreement was with Greenberg Peden. When the firm dissolved a year later and Swonke moved to McConn & Williams, he treated all of Anglo-Dutch's files as having belonged to Greenberg Peden. Even after

the Tenge Field case settled and the present controversy began to emerge, Swonke stated that he had signed the Fee Agreement on behalf of Greenberg Peden and obtained an assignment of its interest.

In sum, the circumstances in which the Fee Agreement was executed do not suggest that the parties must have intended something different from what they plainly stated. We hold that the agreement was between Anglo-Dutch and Greenberg Peden.

III

Construing client–lawyer agreements from the perspective of a reasonable client in the circumstances imposes a responsibility of clarity on the lawyer that should preclude a determination that an agreement is ambiguous in most instances. Lawyers appreciate the importance of words and "are more able than most clients to detect and repair omissions in client-lawyer contracts."[17] A client's best interests, which its lawyer is obliged to pursue, do not include having a jury construe their agreements.

The judgment of the court of appeals is reversed, and the case is remanded to the trial court for further proceedings.

Nathan L. Hecht
Justice

Opinion delivered: August 26, 2011.

[17] RESTATEMENT (THIRD) OF THE LAW GOVERNING LAWYERS § 18 cmt. h.

IN THE SUPREME COURT OF TEXAS

NO. 08-0833

ANGLO-DUTCH PETROLEUM INTERNATIONAL, INC. AND ANGLO-DUTCH (TENGE) L.L.C., PETITIONERS,

v.

GREENBERG PEDEN, P.C. AND GERARD J. SWONKE, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued September 14, 2010

JUSTICE WAINWRIGHT, concurring in part and dissenting in part.

Scott Van Dyke, president of Anglo-Dutch Petroleum International, Inc., and his attorney Gerald Swonke signed an engagement letter, dated October 16, 2000, in which attorney Swonke agreed to represent Van Dyke's company, Anglo-Dutch, in litigation with Halliburton Energy Services, Inc. Swonke was "of counsel" at the law firm of Greenberg Peden P.C. Anglo-Dutch contends that under the terms of the letter, Swonke also bound Greenberg Peden to represent Anglo-Dutch in the Halliburton litigation. The letter contains Swonke's references to expenses he would "personally incur", fees that "I would be entitled to receive", the agreement for "me" to assist you in the so-called Halliburton litigation, but it is drafted on Greenberg Peden letterhead. Swonke contends this was an oversight. Swonke testified that for a couple of years prior to the Halliburton

litigation, he had individually represented Anglo-Dutch under his "of counsel" arrangement at Greenberg Peden. Notwithstanding this evidence, the Court disagrees with the trial court and concludes that the engagement letter is unambiguous and as a matter of law bound the Greenberg Peden firm to represent Anglo-Dutch. I therefore agree with JUSTICE LEHRMANN'S dissent that the engagement letter is ambiguous and with her other departures from the Court's opinion. I write to explain another basis for my disagreement with the Court's position.

The Court holds the two parties to an agreement that neither of them entered in October 2000, as their trial testimony indicates. Van Dyke testified that he knew at the time of the engagement letter that Greenberg Peden would not represent Anglo-Dutch in any new matters, such as the Halliburton litigation. Why? Van Dyke explained. Anglo-Dutch was over $200,000 behind in paying Greenberg Peden, and Greenberg Peden was not interested in further exposure on contingency fee cases. The exchange on this point during Van Dyke's testimony at trial is unequivocal, as Swonke told him in February 2000 that Greenberg Peden was not his law firm.

> Attorney: Mr. Van Dyke, my question was a more limited one, and you can say, "No, he didn't tell me that," if you want.
>
> I'm just asking: Did he [Swonke] not tell you from the beginning that Greenberg Peden wouldn't represent you in any lawsuit here, no matter whether it was contingency or hourly at all until you – because you hadn't paid off that debt.
>
> Van Dyke: Yes.

Furthermore, Van Dyke knew that no Greenberg lawyers would work on his files from that time forward. Harlan Naylor, Greenberg's managing partner, explained to the jury that the firm's lawyers were instructed not to work for Anglo-Dutch – "neither the shareholders nor the associates were

going to do any more work for Mr. Van Dyke on that case." This testimony from Van Dyke and Naylor is undisputed. Swonke explained to the jury that Greenberg had essentially terminated Van Dyke as a client.

> Greenberg Peden had told him in my presence they wouldn't do any more work for him. I had been doing work for him individually in my own capacity for – I don't know – two years, with Greenberg Peden not having involvement at all.

The uncontested testimony at trial establishes that Greenberg Peden's name partner (David Peden) told Van Dyke before he signed the engagement letter that the Greenberg Peden firm would not represent Anglo-Dutch in any new matter, whether contingency or hourly, because it was delinquent in paying the firm over $200,000 in legal fees. Swonke was present at that meeting. Nevertheless, Anglo-Dutch contends that the engagement letter signed after the meeting bound Greenberg Peden to represent it in the Halliburton litigation. This is quite a turnabout for Anglo-Dutch as its litigation position contradicts the knowledge of its president, who signed the engagement letter. Knowing that Greenberg Peden refused to represent Anglo-Dutch in the Halliburton litigation, Van Dyke now asserts that the engagement letter unambiguously did just that.

The jury heard all about the dispute from all four sides – Swonke, Van Dyke, Greenberg Peden and another law firm Anglo-Dutch engaged (McConn & Williams) – and found that the two signers of the engagement letter intended that Swonke, not Greenberg Peden, would represent Anglo-Dutch.

I agree with the Court that attorneys owe fiduciary duties to their clients in this context that include: exercising the utmost good faith and most scrupulous honesty toward clients; ensuring that engagement letters are clear to the clients; fully and fairly disclosing all important information to

clients concerning the transactions; and explaining material changes in the arrangement, such as moving from one law firm to another. Ambiguity in the fee agreement should be construed against the lawyer-drafter of the agreement. The Court and amici set these duties out in some detail.[1] I do not conclude, however, that application of these duties to this case means that an ambiguous contract should be designated clear and then enforced to a result that neither signer intended at the time he signed it. At base, our task here is to enforce the parties' agreement. The duties and presumptions of counsel in such cases should help determine what the contractual obligations are, not override the agreement they entered.

I therefore agree with the arguments in JUSTICE LEHRMANN'S dissent. However, because I agree that the judgment should remand the case to the trial court, I concur in the Court's judgment, while respectfully dissenting from its reasoning. Unlike the Court, I would remand for a new trial and instruct the jury to be guided by the lawyer's fiduciary duties in interpreting the ambiguous engagement letter.

IN THE SUPREME COURT OF TEXAS

NO. 08-0833

ANGLO-DUTCH PETROLEUM INTERNATIONAL, INC. AND ANGLO-DUTCH (TENGE) L.L.C., PETITIONERS,

v.

GREENBERG PEDEN, P.C. AND GERARD J. SWONKE, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

JUSTICE LEHRMANN, joined by JUSTICE MEDINA, and JUSTICE GREEN, dissenting

I agree that a court should review an attorney-client agreement from the perspective of a reasonable person in the client's circumstances when deciding whether it is subject to two or more reasonable interpretations. I disagree, however, with the Court's assumption that an agreement on firm letterhead unambiguously creates an agreement with the firm. The use of letterhead must be viewed in light of clear evidence that the client understood the firm had refused to represent him in the case due to large unpaid legal bills, the lawyer's testimony that his secretary mistakenly used firm stationery, and the fact that the agreement referred solely to the individual lawyer and contemplated a fee structure where only that lawyer's time would be compensated. I therefore am compelled to respectfully express my dissent. I would affirm the court of appeals' judgment

and hold that the trial court correctly determined the agreement was ambiguous and properly submitted the agreement's meaning to the jury.

I. BACKGROUND

Scott Van Dyke, the president of Anglo-Dutch, and Swonke, the attorney, had a long-standing relationship that began when Van Dyke worked at another company. Swonke was "of counsel" at the law firm of Greenberg Peden when the subject agreement was executed in 2000. One of the firm's founders testified at trial that Greenberg Peden understood Swonke sometimes contracted with clients the firm did not want to represent, and it was understood these were Swonke's "side deals". Greenberg Peden had the right of first refusal for all of Swonke's potential clients.

In 1997, when Anglo-Dutch committed to develop an oil field in Kazakhstan with two business partners, Halliburton and Ramco, Van Dyke contacted Swonke to prepare the necessary documents. It is undisputed that the parties understood that Greenberg Peden, not Swonke individually, took on the representation at that time. No formal fee agreement was signed. The joint project ended in early 2000 when Halliburton and Ramco allegedly breached the parties' confidentiality agreement and disclosed Anglo-Dutch's confidential data to third parties. Van Dyke consulted with Swonke, who advised him that Anglo-Dutch had viable claims against Halliburton and Ramco.

Around the same time, Anglo-Dutch ceased paying Greenberg Peden's bills and began accumulating a large account payable to the firm. Anglo-Dutch's unpaid legal bills prompted

Greenberg Peden to stop working for Anglo-Dutch in 1999. By early 2000, Anglo-Dutch owed Greenberg Peden more than $200,000. It is undisputed that Van Dyke asked if Greenberg Peden would represent Anglo-Dutch in the lawsuit against Ramco and Halliburton, but the firm refused to take on any more work for Anglo-Dutch because of Anglo-Dutch's unpaid bills and a history of difficulty in collecting fees from Anglo-Dutch.

Unable to retain Greenberg Peden, Anglo-Dutch, based on Swonke's recommendation, hired the law firm of McConn & Williams under a twenty percent contingency fee arrangement. As the Halliburton lawsuit progressed, Van Dyke asked Swonke to serve as an advisor to McConn & Williams because of his familiarity with the underlying contracts. After initially consulting for free, Swonke requested compensation as his involvement in the case became more substantial. McConn & Williams declined to pay Swonke because the firm's contingency fee interest was not large enough, so Van Dyke called Swonke directly and offered to pay him for the work. It is undisputed that Van Dyke and Swonke negotiated the terms of Swonke's representation and that Swonke finally agreed to accept compensation in the form of a fraction of the total recovery calculated based on the hours he worked, divided by the total hours billed by the McConn & Williams attorneys.

Swonke dictated the body of the one-page agreement and his secretary printed it on Greenberg Peden letterhead, with a Greenberg Peden signature block. Swonke signed his name under the Greenberg Peden signature block and sent the agreement to Van Dyke, who signed and returned it the next day. Swonke testified he did not notice the letterhead or the signature block

and did not think to correct them at any point because he and Van Dyke both knew the agreement was personal to him.

The day he signed the agreement, Van Dyke also drafted and sent Swonke a separate transmittal letter attaching a copy of the McConn & Williams contingency fee agreement. The letter said that the McConn & Williams document "provides the basis for the Agreement between Greenberg Peden P.C. and Anglo-Dutch." At trial, Swonke questioned Van Dyke's motives for sending the letter separately from the main agreement, and for sending it at all as Van Dyke had previously given him the McConn & Williams agreement. Swonke testified that he did not read the letter, and would not normally read a transmittal letter referring to a document he already had in his files.

Swonke worked on the Halliburton lawsuit for 277 hours while at Greenberg Peden. After Greenberg Peden dissolved in 2001, Swonke joined McConn & Williams as "of counsel". McConn & Williams and Swonke agreed that he would not share in the firm's fees from the Halliburton lawsuit, but did not relay that agreement to Anglo-Dutch. Swonke did inform Anglo-Dutch of his move to McConn & Williams, and told Anglo-Dutch he planned to take his client files with him unless Anglo-Dutch objected. Receiving no objection, Swonke worked 1,022 hours on the matter at McConn & Williams.

Anglo-Dutch won a $70.5 million verdict against Halliburton and the parties stipulated to $9.8 million in attorney's fees. The verdict was appealed and Halliburton ultimately settled the case for $51 million in 2004. A few days before Halliburton was going to wire the attorneys' fees

portion of the settlement to individuals and firms involved in the case, Swonke's name was removed from the wiring instructions at Van Dyke's request. Noting the change, Swonke e-mailed Van Dyke asking how he wanted to handle his compensation. Prior to discussing payment, Van Dyke requested that Greenberg Peden assign any interest under the Anglo-Dutch agreement to Swonke, purportedly to avoid any possible problems with multiple claims for attorney's fees. Swonke contacted Greenberg Peden, and the no-longer operating firm's representatives agreed to the assignment in exchange for a ten percent fee from all amounts collected by Swonke from Anglo-Dutch, an amount consistent with their original agreement that he would pay the firm a flat ten percent to cover overhead for matters handled by Swonke individually.

Soon after obtaining the assignment letter, Van Dyke informed Swonke that he'd consulted lawyers and determined that Anglo-Dutch's contract was with Greenberg Peden and not with Swonke individually. Accordingly, Van Dyke refused to include the hours billed after Swonke left Greenberg Peden in the contingency ratio, a position that would reduce Swonke's total compensation due by over a million dollars. Swonke asserted that the agreement was personal to him and that he should be paid for all of the work he performed for Anglo-Dutch. It is undisputed that had the trial court determined that the agreement was with Greenberg Peden, Anglo-Dutch would be able to calculate the compensation ratio based solely on the 277 hours Swonke billed while at Greenberg Peden. Anglo-Dutch argued that the 1,022 hours Swonke billed at McConn & Williams were covered by that firm's contingency percentage.

II. APPLICABLE STANDARDS

I agree with the standards the Court applies in determining whether this attorney-client agreement is ambiguous. Ambiguity is determined by examining the contract as a whole in light of the circumstances present when the contract was entered. *Columbia Gas Transmission Corp. v. New Ulm Gas, Ltd.*, 940 S.W.2d 587, 589 (Tex. 1996). When an agreement's language is ambiguous in light of the circumstances present when the parties entered into it, its meaning becomes an issue for the fact-finder. *J.M. Davidson, Inc. v. Webster*, 128 S.W.3d 223, 229 (Tex. 2003); *see Columbia Gas*, 940 S.W.2d at 589.

I also agree that there are limits. *Sun Oil Co. v. Madeley*, 626 S.W.2d 726, 731 (Tex. 1981). Parol evidence will not be received to create an ambiguity or to give a contract a meaning different from that imparted by its language. *David J. Sacks, P.C. v. Haden*, 266 S.W.3d 447, 450–51 (Tex. 2008) (citations omitted). Courts may not consider the parties' interpretation or "admit extraneous evidence to determine the true meaning of the instrument" if the express language of the agreement may be interpreted in only one way. *Id.* at 450 (quoting *Nat'l Union Fire Ins. Co. v. CBI Indus., Inc.*, 907 S.W.2d 517, 520 (Tex. 1995)). Ambiguity likewise does not arise simply because the parties advance conflicting interpretations of the contract; rather, for an ambiguity to exist, both interpretations must be reasonable. *See Lopez v. Munoz, Hockema & Reed, L.L.P.*, 22 S.W.3d 857, 866 (Tex. 2000); *Nat'l Union Fire Ins.*, 907 S.W.2d at 520.

Further, as the Court observes and Anglo-Dutch and amici[1] contend, clarity is obviously critical, and courts should therefore view the agreement from the perspective of a reasonable client to determine if it is susceptible to more than one reasonable interpretation. Such a rule will protect clients from unscrupulous attorneys, reduce disputes, and create a predictable rule that is in the best interest of the legal system, individual clients, lawyers, and law firms.

And it is beyond dispute that attorney-client agreements are subject to heightened scrutiny by the courts because of the fiduciary nature of the attorney-client relationship. *See Hoover Slovacek LLP v. Walton*, 206 S.W.3d 557, 560 (Tex. 2006). The attorney, unlike a commercial party to an agreement, bears a duty to ensure the client understands the terms of the representation because of the trust the client places in the attorney. *See Levine v. Bayne, Snell & Krause, Ltd.*, 40 S.W.3d 92, 95 (Tex. 2001). To fulfill this duty, the lawyer must be clear.

Like the Court, I believe that the approach set out in the Restatement of the Law Governing Lawyers is workable. *See* RESTATEMENT (THIRD) OF THE LAW GOVERNING LAWYERS § 18, cmt. h. Under this approach, such agreements should be viewed from the perspective of a reasonable client, taking into consideration the parties' relative bargaining power and other circumstances surrounding the agreement. *See id.* A reasonable client to whom this standard is

[1] Two amicus briefs were submitted in support of Anglo-Dutch: one by Linda Eads, Associate Professor of Law at the Dedman School of Law and another by the law firms of Abrams Scott & Bickley, L.L.P.; Arnold & Itkin LLP; Caddell & Chapman; Cornell, Smith & Mierl, LLP; Dawson, Sodd, Ellis & Hodge LLP; Law Office of James M. McCormack; and Quilling, Selander, Cummiskey & Lownds, P.C.

applied is "a reasonable person in the client's circumstances." *Id.* I do not agree, however, that any potential ambiguities should be resolved against the attorney.

III. ASSESSING AMBIGUITY IN ATTORNEY-CLIENT AGREEMENTS

The evaluation of whether an agreement is subject to multiple reasonable interpretations should be made from the perspective of a reasonable person in the client's circumstances. This does not mean, as Anglo-Dutch and the Court presume, that the individual client's interpretation prevails. Instead, the reasonableness of potential interpretations will be viewed from the reasonable client's perspective, taking into consideration the circumstances surrounding the agreement's formation, such as the parties' past dealings, their relative bargaining power, and the client's experience negotiating such agreements to determine whether the agreement was "truly negotiated". *See id.* If the court determines, as a matter of law, that the agreement is subject to more than one reasonable interpretation from a reasonable client's perspective, construction of the agreement becomes a fact issue for the judge or jury to resolve.

The Court claims not to construe the agreement against the attorney. *See Levine*, 40 S.W.3d at 94; *Lopez*, 22 S.W.3d at 860–61. However, in concluding that the circumstances surrounding the agreement do nothing to negate the letterhead on which the agreement was printed, the Court does just that. The Restatement emphasizes that in applying the reasonable client standard, courts should not ignore "the usual resources of contractual interpretation such as the language of the contract, the circumstances in which it was made, and the client's sophistication and experience in retaining and compensating lawyers or lack thereof."

RESTATEMENT (THIRD) OF THE LAW GOVERNING LAWYERS § 18, cmt. h. An agreement should be "construed in light of the circumstances in which it was made, the parties' past practice and contracts, and whether it was truly negotiated." *Id.*

Undoubtedly, Swonke's use of the Greenberg Peden letterhead in this case contributed to the agreement's ambiguity. But in times of increasing fluidity in the legal profession, the solution the Court implements—to construe agreements based on the letterhead regardless of the parties' understanding of their terms—could lead to unnecessarily harsh results: a lawyer who made a mistake in choosing stationery—or even used the only stationery available—would lose. *See* Milton C. Regan, Jr. & Palmer T. Heenan, *Supply Chains and Porous Boundaries: The Disaggregation of Legal Services*, 78 FORDHAM L. REV. 2137, 2191 (2010) (noting that the economic downturn marks a "transition for law firms less because of its immediate financial impact and more because it has highlighted and accelerated the trend toward the disaggregation of legal services that had begun before it"). While the entire Court would hold lawyers to a standard of reasonable clarity, perfection is not required. The Court's analysis of the agreement should focus on the terms as negotiated and agreed to, not on interpretations that the parties (and, at times, their counsel) have subsequently adopted in light of the changed circumstances. While giving due weight to a lawyer's fiduciary obligations, we should do so from a reasonable, not predatory, client's perspective.

1. Reasonableness of alternative interpretations

The Court holds that, even applying the Restatement's approach, a reasonable client would only interpret the agreement to be with Greenberg Peden. I disagree with that mechanical approach: application of the factors outlined in the Restatement leads me to conclude that the agreement is subject to multiple reasonable interpretations under the circumstances and thus ambiguous. The express terms of the Anglo-Dutch agreement cast doubt that it could only be understood to form a contract with Greenberg Peden from a reasonable client's perspective.

The Anglo-Dutch agreement invites more than one reasonable interpretation of the parties' intentions in spite of the fact that it was printed on Greenberg Peden letterhead and signed under a Greenberg Peden signature block. First, the body of the agreement did not reference Greenberg Peden while it referred to McConn & Williams by name five separate times. It defined the client as "you and/or the companies which you control (Anglo-Dutch)" but exclusively used personal pronouns throughout to refer to Swonke. The one-page document repeatedly used language such as "I agree to assist Anglo-Dutch and [McConn & Williams] for proportionately the same percentage (20%) of any benefit to McConn & Williams;" "the proportions under which my fees shall be calculated will be the ratio of the hours I have spent . . . relative to the hours [of McConn & Williams attorneys];" "if . . . I spent 90 hours of my time towards the lawsuit, . . . I would be entitled to receive;" "I shall be entitled to the benefit of any amendment;" "I will not be responsible for any expenses other than those I may personally incur;" and the like.

Second, the fee structure contemplated by Anglo-Dutch and Swonke, which based Swonke's compensation solely on the hours he individually billed, creates an ambiguity, especially when compared to other firm fee agreements. The applicable provision states that:

> the proportions under which my fees shall be calculated will be the ratio of the hours I have spent or will spend on this matter relative to the hours the attorneys at McConn & Williams have spent or will spend after the date the lawsuit was filed, rounded to the next whole percentage.

The four corners of the Anglo-Dutch agreement indicate that Anglo-Dutch and Swonke negotiated a contingency fee based solely on the hours Swonke (and no other Greenberg Peden attorneys or support staff) worked on the lawsuit, divided by the total hours billed by "the attorneys at McConn & Williams."[2] It is helpful to contrast this fee structure with the structure of the law firm agreement in *Sacks*, which likewise contained personal pronouns:

> My . . . rate for this particular matter will be $200.00 per hour. The other lawyers in my firm range from $150.00 to $200.00 per hour, and paralegals range from $50.00 to $100.00 per hour. You are responsible for all costs and expenses in the case as incurred. These expenses include, but are not limited to, copies; binding; fax transmissions; travel; lodging; parking; etc.

Sacks, 266 S.W.3d at 448–49.

While the Anglo-Dutch agreement stated Swonke would not be responsible for expenses, it did not anticipate compensation beyond one attorney's billable hours. *Compare Anglo-Dutch*, 267 S.W.3d at 460–61 *with Sacks*, 266 S.W.3d at 448–49; *In re Inslaw, Inc.*, 97 B.R. 685, 688 (D.D.C. 1989) (discussing an hourly law firm agreement stating that "[m]y partner . . . will be

[2] Anglo-Dutch's agreement with McConn & Williams provided for a flat 20 percent contingency fee, later reduced to 16 and 2/3 percent.

billed at $170 and all other attorney or paralegal time will be billed at this law firm's normal rate for that person"); *In re Enron Corp. Sec., Deriv. & ERISA Litig.*, 586 F. Supp. 2d 732, 767 and n.32 (S.D. Tex. 2008) (recognizing that law firm contingent fees take resources into account by holding that "in light of the complexity and difficulty of the litigation, the fee percentage would have to be sufficient to create adequate incentives for the firm to dedicate the substantial resources, possibly over a long period of time"). The agreement's compensation ratio and the use of personal pronouns throughout, in conjunction with its use of Greenberg Peden letterhead and the Greenberg Peden signature block, make it open to more than one reasonable interpretation. Accordingly, it must be read in light of surrounding circumstances. *See Columbia Gas*, 940 S.W.2d at 589; *Sun Oil*, 626 S.W.2d at 731.

2. Circumstances surrounding the agreement

It is undisputed that Van Dyke knew Greenberg Peden had refused to represent Anglo-Dutch in the Halliburton lawsuit due to the large amount of unpaid legal bills and the history of difficulty in collecting fees from Anglo-Dutch. Van Dyke admitted that he knew that Anglo-Dutch's account payable exceeded $200,000, and that Greenberg Peden therefore wanted to play no part in the lawsuit against Halliburton. Given this admission, it is difficult to see how a reasonable client in Anglo-Dutch's position could have believed that the agreement was with the firm, rather than with Swonke.

Moreover, it is undisputed that the contract in this case arose in the context of genuine negotiations between Swonke and the client, both of whom had previous experience negotiating

such agreements. Van Dyke testified that negotiating agreements was a significant portion of his job. He testified that Anglo-Dutch retained other counsel prior to switching to Greenberg Peden and had another attorney draft a demand letter to Halliburton prior to retaining McConn & Williams. Further, Van Dyke testified that he and Swonke had many discussions about contract drafting over the years, and Swonke had even given Van Dyke advice on best practices when drafting agreements.

Concerns that an attorney could exercise undue influence over an existing client are valid, but they are minimized here because this agreement was truly negotiated. The agreement was not suggested by Swonke to an uninformed and agreeable client—to the contrary, Van Dyke proposed it to ensure that he would continue to receive the benefit of Swonke's experience when McConn & Williams refused to compensate Swonke for his services. Although the Anglo-Dutch agreement is only one page, both Van Dyke and Swonke testified that they negotiated its terms. Significantly, there is undisputed evidence that Van Dyke, not Swonke, suggested the unusual compensation ratio that Swonke initially resisted, requesting a flat percentage fee instead.

Viewing the agreement from a reasonable client's perspective, I disagree that Anglo-Dutch's interpretation is the only reasonable one. Certainly, the use of personal pronouns in an engagement letter does not alone create an ambiguity as to whether the client hired a law firm or an individual lawyer. To be reasonable, an alternative interpretation must be one a client could reasonably understand from the agreement's language and the circumstances of the negotiation between the parties. Yet the negotiations between the parties demonstrate an understanding that

the law firm of Greenberg Peden was uninterested in future work for Anglo-Dutch, and Swonke negotiated the compensation for himself individually. The Court is persuaded by the letterhead on which the agreement was printed after its terms were already negotiated and accepted by both parties, and by the language of a Greenberg Peden assignment of interest letter, signed years after the agreement was reached. Neither one bears on the parties' understanding at the time they reached their agreement.

I would hold that the language of the agreement, as shown by the compensation ratio, the use of personal pronouns, the use of Greenberg Peden letterhead and the Greenberg Peden signature block, together with the circumstances surrounding the agreement's formation, made it open to multiple interpretations. The use of the letterhead could lead a reasonable client to believe the agreement was with the law firm. However, it was every bit as reasonable, given Greenberg Peden's repeated refusal to do more business with Anglo-Dutch, for the client to understand that it was a personal agreement with Swonke. Van Dyke's undisputed testimony that the firm declined all further representation of Anglo-Dutch highlights the ambiguity resulting from the circumstances surrounding the agreement's formation. His one-paragraph letter to Swonke, describing it as the agreement between "Anglo-Dutch and Greenberg Peden," showed only Anglo-Dutch's self-serving interpretation of the agreement, not whether it would unmistakably be understood that way by a reasonable client given the scope of the agreement. Moreover, because the letter is external to the contract's formation, it is not properly considered in determining whether the agreement is ambiguous.

Consideration of the language of the actual contract and the circumstances surrounding its formation lead me to conclude that the fee agreement was ambiguous as a matter of law. Accordingly, I would hold that the trial court properly submitted the agreement's construction to the jury. Because the Court effectively construes the agreement against the lawyer, I am compelled to respectfully express my dissent.

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0890

THE HOUSTON EXPLORATION CO. AND
OFFSHORE SPECIALTY FABRICATORS, INC., PETITIONERS,

v.

WELLINGTON UNDERWRITING AGENCIES, LTD., ET AL.,
RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

Argued September 14, 2010

JUSTICE HECHT delivered the opinion of the Court, in which JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE GREEN, and JUSTICE GUZMAN joined, and in Parts I and III of which JUSTICE JOHNSON joined.

JUSTICE JOHNSON filed a concurring opinion.

CHIEF JUSTICE JEFFERSON filed a dissenting opinion, in which JUSTICE WILLETT and JUSTICE LEHRMANN joined.

The parties dispute whether an "all risk" property damage insurance policy provides indemnity for certain expenses incurred in connection with a covered loss. Coverage was negotiated in the London market, and as is customary there, the parties reached agreement by lining through provisions in a form policy. One such provision would have required reimbursement of the disputed expenses, and the question is whether the strike-through reflects the parties' intention that those

expenses would not be reimbursed. We agree with the court of appeals that the answer is yes.[1] Deletions from a draft agreement do not always indicate the parties' intent, but they do when, as here, they are part of the customary negotiation process.

I

In 2002, Offshore Specialty Fabricators, Inc. agreed to construct a drilling platform in the Gulf of Mexico for The Houston Exploration Company. Their contract required Offshore to obtain builder's risk insurance naming Houston as an additional insured. Offshore contacted a local broker, Greg Lary at Lary Insurance Services, Inc., who turned to Lloyd's of London for the insurance.

"Lloyd's began as a coffee house but has developed into one of the world's leading markets for insurance. This market, however, operates in accordance with age-old customs that are, to say the least, unusual in American business law."[2] Houston cites an opinion by Judge John Rainey as "[a] good description of the Lloyd's operation"[3] at the time the policy in this case issued:

> Lloyd's London ("Lloyd's") is a 300-year-old market in which individual and corporate underwriters, known as Names, underwrite insurance. Lloyd's itself is not an insurance company; it merely provides the physical premises and administrative staff and services to enable the actual underwriters to carry on their business. To increase efficiency and multiply resources, Names have joined together to form syndicates, of which there are now more than four hundred; a particular syndicate may have a few hundred or several thousand Names. Syndicates have no legal existence apart from the Names, and syndicates neither assume liability nor underwrite risks. Within each syndicate, an "active" underwriter is authorized to determine the conditions to which a risk will be subject, the percentage of risk to be assumed by the syndicate on behalf of the Names, and the percentage of risk each

[1] 267 S.W.3d 277 (Tex. App.–Houston [14th Dist.] 2008).

[2] *E.R. Squibb & Sons, Inc. v. Accident & Cas. Ins. Co.*, 160 F.3d 925, 929 (2d Cir. 1998) (citing GODFREY HODGSON, LLOYD'S OF LONDON 49-75 (1984)).

[3] Brief on the Merits of Petitioner The Houston Exploration Company at 43.

> Name in the syndicate will assume. Thus, when the active underwriter accepts a percentage of the risk, he binds every Name in the syndicate. Each Name assumes unlimited liability for his share of the syndicate's losses, but he is liable for no other portion assumed by any other Name.
>
> Only approved brokers are permitted to place risks with Lloyd's underwriters. Typically, a broker will prepare the "slip," a summary of the details of the risk the broker is seeking to insure (or reinsure). The broker and the active underwriter proceed to negotiate the terms and premium, indicating as much on the slip itself. The underwriter who structures the transaction with the broker is known as the "lead" underwriter; the lead underwriter's syndicate is known as the "market lead" or "leader of the market" for that particular risk. When the underwriter signs (or "scratches") the slip, a binding contract between his syndicate and the insured is formed. Having obtained the signature of the lead underwriter, the broker retains the slip and approaches other syndicates or insurance companies to secure coverage for the remaining risk. Once the broker has succeeded in procuring full coverage, he retains the slip and provides subscribing underwriters with copies of the terms and conditions of the coverage. If a claim under the insurance (or reinsurance) agreement is not outstanding, an underwriter may agree to waive issuance of a policy; the slip is then signed "on risk." Otherwise, the broker's policy department prepares the policy and forwards it to the Lloyd's Policy Signing Office ("LPSO"). The LPSO checks the policy against the slip to ensure that the policy contains all the terms and conditions of the slip. If no inconsistencies are discovered, the policy issues, often long after the initial signing of the slip.[4]

As required by Lloyd's, Lary requested an approved London broker, Tysers International Insurance & Reinsurance Brokers, to obtain insurance for Offshore and Houston ("the Assureds"). Tysers negotiated with respondent Wellington Underwriting Agencies Limited as lead for a group of underwriters ("the Underwriters").[5] Tysers and Wellington worked from a 33-page "WELCAR

Corporate Solutions IUA; AXA Corporate Solutions Insurance Company; AXA Corporate Solutions Reinsurance; AXA Corporate Solutions Lloyd's Insurance Company of Texas; Commonwealth Insurance Company; International Insurance Company of Hannover Limited; and American Offshore International Syndicate.

[6] A section captioned "Covered Property" provided as follows:

"This insurance covers works executed anywhere in the world in the performance of all contracts relating to the Project including (provided they are included in the contract values declared to Underwriters and insured herein) materials, components, parts, machinery, fixtures, equipment and any other property destined to become a part of the completed project, or used up or consumed in the completion of the project. This insurance shall also cover (provided they are declared to and agreed by Underwriters) all temporary works, plant, equipment, machinery, materials, outfits and all property associated therewith, whether such items are intended to form a permanent part of the works or not, including site preparatory work and subsequent operational risks.

"It is understood and agreed that any insured equipment and/or property that is not for incorporation into the contract works shall be covered whilst it is being utilised in the Project and whilst in transit from the Project site(s) until the earlier of the date of arrival at its final destination or the 30th day after its removal from the Project site(s)."

(¶ 11). But five provisions calling for reimbursement of other expenses associated with covered losses were struck through:

- ¶ 10, "Additional Work", providing payment for additional work needed to reposition a structure;[7]
- ¶ 12, "Tests, Leak and/or Damage Search Costs", providing payment for tests required to be repeated after a covered occurrence;[8]
- ¶ 13, "Stand-By Charges", providing payment for the cost of keeping equipment engaged in repairing a covered occurrence available through delays for bad weather;[9]
- ¶ 16, "Terrorist 'Buy Back' Clause", providing payment of some losses due to terrorism;[10] and

---

[7] "In the event that the structure or insured property is set down or wrongly positioned, which is the direct result of a peril insured against, Underwriters shall indemnify the Assureds for the cost of additional work that is required in respect of positioning or repositioning, sinking, submerging and stabilising the property insured herein insofar as such cost does not fall within the cover afforded by the sue and labour clause. However Underwriters' liability under this clause shall not exceed the percentage amount that would be recoverable under the sue and labour clause and then only to the extent that the Policy Limit is not exhausted by a claim under the sue and labour clause."

[8] "If it becomes necessary to repeat any test(s) and/or trial(s) or to carry out subsequent test(s) and/or trial(s) as a result of a physical loss or physical damage to the insured property arising from an Occurrence covered under Section I, Underwriters will bear the cost of any such repeated and/or subsequent test(s) and/or trial(s) subject to a sub-limit of (AMOUNT) (100%) any one Occurrence, but never to exceed original expenditure as identified in the latest agreed Schedule B."

[9] "Subject to a sub-limit of US$ (AMOUNT) any one Occurrence aggregated at US$ (AMOUNT) over the Policy Period, Underwriters shall indemnify the Assureds for the cost of stand-by time on vessels and/or craft and/or equipment actively engaged in the course of repair following an Occurrence covered under Section I, where the Assureds are prevented from working in, around or about the damaged property by bad weather, including named hurricanes."

[10] "Subject to the terms and conditions to which reference is made below, Underwriters shall indemnify the Assureds under this clause for physical loss and/or physical damage that would be recoverable under Section 1 of the Policy but for the existence of the following clause in Section I, Exclusion 2:

"'Notwithstanding anything to the contrary contained in this section, there shall be no liability whatsoever for any loss caused by, or resulting from, or incurred as a result of:

"'a. (i) the detonation of an explosive and/or (ii) any weapon of war[;] and is caused by any person acting maliciously or from a political motive.

"'b. Any act for political or terrorist purposes of any persons, and whether or not agents of a sovereign power, and whether the physical loss, damage or expense resulting therefrom is accidental or intentional'."

- ¶ 17, "Forwarding Charges", providing payment for costs due to interruptions in transporting property as part of a covered occurrence.[11]

Following these terms were almost two pages of exclusions. As altered,[12] the form became the policy to which Tysers and the Underwriters agreed, and Tysers notified Lary that coverage had been bound.[13]

A few weeks later, the drilling platform Offshore was constructing for Houston became unstable, requiring immediate repairs. But work was delayed by severe storms in the Gulf, during which Offshore kept repair vessels standing by so that they could resume repairs as soon as the weather improved. The Assureds submitted a claim for $3,256,174, which included about $1 million for weather stand-by charges. The Underwriters paid $2,034,961, acknowledging that the platform damage was a covered occurrence, but refused to pay for the weather stand-by charges. Paragraph 13, which was struck through in the policy, would have required indemnity for those charges.

The Assureds sued the Underwriters on the policy, and the Underwriters counterclaimed, alleging that the Assureds had submitted a false claim. The trial court granted partial summary

---

[11] "In respect of transit(s) insured hereunder, if as a result of an Occurrence covered by the terms of Section I, the insured transit is terminated at a port or place other than that to which the property insured is covered under this insurance, Underwriters will reimburse the Assured for any extra charges properly and reasonably incurred in unloading, storing and forwarding the property insured to the destination to which it is insured hereunder.

"Underwriters will bear the cost of any such extra charges subject to a sub-limit of US$ (AMOUNT) (100%) any one Occurrence."

[12] Tysers and the Underwriters also lined through a paragraph of the general provisions entitled "Escalation Clause", which called for insured values to be adjusted above or below declared values to reflect final completed values, and other provisions deemed unnecessary because they related to the construction period.

[13] The Assureds insist that they knew nothing of the actual terms of the policy to which Tysers and the Underwriters had agreed until after this litigation commenced. Those factual disputes and others before the trial court do not prevent our resolution of the legal questions presented.

judgment for the Assureds, construing the policy to require payment of the weather stand-by charges. In its order, the trial court gave this explanation of its ruling

> The Court, having disregarded the stricken policy language as parol evidence, found the Policy to be unambiguous in favor of coverage. The Policy is only ambiguous if the stricken language is read into the Policy, and then treated as an exclusion. The stricken language is parol evidence that *creates* an ambiguity, necessitating further parol evidence. Whereas parol evidence may be used to interpret an ambiguous contract, it cannot be used to create an ambiguity. By ignoring the stricken language and treating it as never having been in the policy (as is the case when only looking at the four corners of the Policy), the contract is unambiguous.

(Emphasis in original.) Later, the trial court signed an agreed order for an interlocutory appeal on two questions:

> (1) Whether the Welcar 2001 Offshore Construction Project policy of insurance at issue herein provided coverage for the weather standby charges incurred by Houston Exploration which are the subject of suit herein;
>
> (2) If coverage exists for weather standby [charges], whether Underwriters' counterclaims for fraud and breach of contract are without merit.

The trial court found these were "controlling questions of law as to which there is substantial ground for difference of opinion", and that "an immediate interlocutory appeal . . . will materially advance the ultimate termination of this litigation".[14]

[14] *See* TEX. CIV. PRAC. & REM. CODE § 51.014(d) ("A district court, county court at law, or county court may issue a written order for interlocutory appeal in a civil action not otherwise appealable under this section if: (1) the parties agree that the order involves a controlling question of law as to which there is a substantial ground for difference of opinion; (2) an immediate appeal from the order may materially advance the ultimate termination of the litigation; and (3) the parties agree to the order."). Section 51.014(d) has been amended, effective September 1, 2011. Act of May 30, 2011, 82nd Leg., R.S., ch. 203, § 3.01, 2011 Tex. Gen. Laws ___, ___ (amendments to TEX CIV. PRAC. & REM. CODE § 51.014(d)); *id.* § 6.01 (effective only in civil actions filed on or after effective date); *id.* § 6.02 (effective date).

The court of appeals answered the first question no, thereby mooting the second question.[15] The court began by noting that Section I's broad provision of insurance against "all risks" is expressly "subject[] . . . to 'the [policy's] terms'", which require reimbursement of only certain repair costs.[16] Those include "costs 'necessarily incurred . . . in repair'" of damaged property.[17] But according to the evidence, weather stand-by charges are justified only in limited circumstances, when repairs are required to be made immediately, and thus, the court reasoned, are not "necessarily incurred" in making repairs.[18] Nor, the court continued, are charges for equipment and laborers being "'used in or about the repair'" of losses, as required by another policy term, while standing by, doing nothing, waiting for the weather to improve.[19] The court further reasoned that the inclusion of paragraph 13 among the terms in the form policy, specifically requiring reimbursement of weather stand-by charges, indicates that such charges would not be reimbursable under other form policy provisions.[20] Relying on a decision of this Court, the court of appeals held that "deletions remaining within an insurance policy can be considered in construing an unambiguous insurance

policy."[21] By striking out paragraph 13, the court concluded, the parties must have intended that weather stand-by charges not be reimbursable.[22]

We initially denied the Assureds' petitions for review[23] but granted them on rehearing.[24]

II

A written contract must be construed to give effect to the parties' intent expressed in the text as understood in light of the facts and circumstances surrounding the contract's execution, subject to the parol evidence rule.[25] The parol evidence rule applies when parties have a valid, integrated written agreement, and precludes enforcement of prior or contemporaneous agreements.[26] The rule does not prohibit consideration of surrounding circumstances that inform, rather than vary from or

[25] *Sun Oil Co. (Delaware) v. Madeley*, 626 S.W.2d 726, 731 (Tex. 1981) ("'It is the general rule of the law of contracts that where an unambiguous writing has been entered into between the parties, the courts will give effect to the intention of the parties as expressed or as is apparent in the writing. In the usual case, the instrument alone will be deemed to express the intention of the parties for it is objective, not subjective, intent that controls. . . . Where a question relating to the construction of a contract is presented, as here, we are to take the wording of the instrument, considering the same in the light of the surrounding circumstances, and apply the pertinent rules of construction thereto and thus settle the meaning of the contract.' . . . If, in the light of surrounding circumstances, the language of the contract appears to be capable of only a single meaning, the court can then confine itself to the writing. Consideration of the facts and circumstances surrounding the execution of a contract, however, is simply an aid in the construction of the contract's language. There are limits. For example, when interpreting an integrated writing, the parol evidence rule circumscribes the use of extrinsic evidence." (quoting *City of Pinehurst v. Spooner Addition Water Co.*, 432 S.W.2d 515, 518-519 (Tex. 1968)) (emphasis removed)).

[26] *Hubacek v. Ennis State Bank*, 317 S.W.2d 30, 32 (Tex. 1958) ("When parties have concluded a valid integrated agreement with respect to a particular subject matter, the rule precludes the enforcement of inconsistent prior or contemporaneous agreements."); *see generally* RESTATEMENT (SECOND) OF CONTRACTS (1981) § 213 ("(1) A binding integrated agreement discharges prior agreements to the extent that it is inconsistent with them. (2) A binding completely integrated agreement discharges prior agreements to the extent that they are within its scope.").

contradict, the contract text. Those circumstances include, according to Professor Williston's treatise, "the commercial or other setting in which the contract was negotiated and other objectively determinable factors that give a context to the transaction between the parties."[27]

As we have said, "[n]egotiations of the parties may have some relevance in ascertaining the dominant purpose and intent of the parties embodied in the contract interpreted as a whole".[28] The manner in which the insurance policy in this case was negotiated in the London market is crucial to understanding its terms. The parties did not create the policy text; rather, they began with a form policy that covered "all risks" of property damage, subject to a laundry list of terms that provided for reimbursement of different kinds of costs that might be incurred in connection with a covered loss. They did not edit the policy language, but they did strike through several provisions requiring payment of particular costs, including the cost of certain additional work and testing, certain transportation costs, losses due to terrorism, and weather stand-by charges. The remaining provisions required payment of other costs. The parties followed the customary process for negotiating an insurance policy in the London market.

The Assureds argue that by deleting requirements that specific kinds of costs be reimbursed, the parties did not intend that the costs *not* be reimbursed. Rather, they contend, the deletions are completely irrelevant, and the policy must be construed as if the struck-through provisions had not been included in the form in the first place. This not only ignores but distorts the negotiation

[28] *Tanner Dev. Co. v. Ferguson*, 561 S.W.2d 777, 781 (Tex. 1977); *see generally* RESTATEMENT (SECOND) OF CONTRACTS § 214 ("negotiations prior to or contemporaneous with the adoption of a writing are admissible in evidence to establish . . . (c) the meaning of the writing, whether or not integrated").

process. The parties did not try to write a policy from scratch. They took an existing form, deleted some payment requirements and kept others. The purpose of the process was to decide both what costs would be paid by the policy and what costs would not be paid. To see the deletions as irrelevant blinks reality.

We have twice held that deletions in a printed form agreement are indicative of the parties' intent. In *Gibson v. Turner*, lessors leased all the minerals in 922 acres, even though they owned only an undivided 9/40ths.[29] The lessee knew this because he was already lessee of the other 31/40ths.[30] The printed form lease in common use called for a 1/8th royalty on production "from said land".[31] Following the royalty clause was a proportionate reduction clause.[32] This standard provision in mineral leases provided that if the lessor owned less than all of the mineral interest in the property described, the royalty would be reduced proportionately.[33] The clause had been typed over with x's.[34] We held that the lease entitled the lessors to a 1/8th royalty on total production from the 922 acres, not 9/40ths of 1/8th.[35] We expressly rejected the lessee's contention "that the fact that the proportionate reduction clause was stricken from the lease cannot be considered in construing

[34] *Gibson*, 294 S.W.2d at 782.

[35] *Id*. at 785.

the meaning of the royalty reservation".[36] The deletion showed, not merely that the parties had not reached agreement on the subject, but that "the parties to the lease at the time of its execution did not limit the royalty provision to 1/8th of 9/40ths of the production — the interest owned by the lessors in the minerals".[37] This, we said, was consistent with provisions of the lease calling for the lessors to be paid only 9/40ths of the bonus and delay rental.[38] When the parties intended the lessors' entitlements to be based on their partial ownership, they expressed it clearly.[39]

In *Houston Pipe Line Co. v. Dwyer*, landowners claimed that a natural gas pipeline easement had terminated when the defendant removed the existing pipeline and replaced it with a larger one to meet increased demand.[40] The printed form easement granted "a right of way to lay, maintain, operate, repair and remove a Pipe Line for the transportation of gas", but the parties lined through the words, "and remove".[41] They added a provision that authorized removal of the pipeline on termination of the easement.[42] And they lined through a paragraph granting the right to construct additional pipelines.[43] The landowners contended, and we agreed, that "[t]he deletions made by the parties . . . may be considered . . . in order to arrive at the true meaning and intention of the

[42] *Id.*

[43] *Id.*

parties."[44] They argued that by deleting "and remove" while adding authorization for removal at termination, the parties intended to prohibit any removal of the pipeline except at termination.[45] The defendant countered that the deletion could not be construed to prohibit the removal and replacement of the original pipe when the pipe's condition required replacement.[46] We held that the right to "operate" and "maintain" a pipeline was broad enough to authorize its replacement in the existing location with pipeline of the same size, but not broad enough to authorize replacement "with a line of substantially greater size."[47]

Gibson and *Dwyer* establish that deletions in a printed form agreement must be considered in construing the other provisions.[48] The import of a deletion may be clear, as it was in *Gibson*, or less so, as in *Dwyer*, but in neither case can it be ignored. The Assureds contend that the parties' intent in deleting paragraph 13 requiring reimbursement of weather stand-by charges is unclear. It may have been, they argue, because the provision was surplusage, redundant of other, more general provisions, like the "all risks" provision, the "costs necessarily incurred" provision in paragraph 1a, and the "used in or about" provision in paragraph 1d. This argument ignores the structure of the

---

[47] *Id*. at 664-666.

[48] *See generally* 11 RICHARD A. LORD, WILLISTON ON CONTRACTS § 32.13 (4th ed. 1999) ("The rule that added or modified provisions control over printed provisions plainly applies to instances of interlineations or to the striking of a printed portion and the addition of another term. Indeed, deletions made without concomitant additions or substitutions may be considered in order to ascertain the parties' intent, for the deletion alone, even without replacement, clearly manifests an unwillingness to be bound according to the deleted terms, although it may not express to what terms a party would be willing to be bound." (footnote omitted)).

form policy, which was to provide coverage for "all risks" subject to specific terms, followed by a list of terms addressed to specific kinds of costs. There is no reason to think that paragraph 13 was any more surplusage than the other four paragraphs that were struck through, so that provision after provision was redundant, or any less surplusage than the paragraphs that remained, so that only the five struck were unnecessary. The Assureds argue that the parties may have deleted paragraph 13 so that weather stand-by charges would be fully reimbursable, rather than capped as permitted by the provision. But the way to delete the cap was to strike the introductory phrase, "[s]ubject to a sub-limit of US$ (AMOUNT)", not to strike the remainder of the paragraph requiring payment.

The Assureds argue that deletions in a printed form should be treated no differently than deletions in a draft, all evidence of which is omitted from the final agreement. But the law has long recognized that changes in a printed form must be accorded special weight in construing the instrument. The Uniform Commercial Code, for example, provides that handwritten and typewritten terms prevail over contradictory printed terms.[49] Professor Williston's treatise states that this is the rule generally.[50] It may be that deletions in drafts indicate the parties' intent in the final agreement, but we need not decide that issue here.

---

[49] TEX. BUS. & COM. CODE § 3.114 ("If an instrument contains contradictory terms, typewritten terms prevail over printed terms, handwritten terms prevail over both, and words prevail over numbers.").

[50] 11 RICHARD A. LORD, WILLISTON ON CONTRACTS § 32.13 ("Even though the parties will often begin with a preprinted or standard form contract, they will sometimes make additions to or changes in their printed contract, adopting it to their particular transaction. Typically, such changes or additions will be handwritten but they may also be typed or stamped. In accord with the general rule that all parts of a contract are to be given effect, the courts must seek to reconcile inconsistencies between the changed or added terms and the printed matter. Where, however, the printed contract provisions irreconcilably conflict with the provisions added by the parties, the added provisions will contro1." (footnote omitted)).

We conclude that the effect of the deletion of paragraph 13 was to remove weather stand-by charges from the costs for which the policy provided indemnity.

III

The Assureds contend that indemnification for weather stand-by charges is required by policy provisions other than paragraph 13, and that if the deletion of that paragraph is construed as an exclusion, then its effect must be "strictly construed against the insurer and in favor of the insured."[51] We agree that strict construction is required, but the effect of the exclusion is the same.

The Assureds argue that payment of weather stand-by charges is required by the policy's general provision that "insures against all risks of physical loss of and/or physical damage to [covered] property". But that provision is expressly "[s]ubject to the terms" that follow in the policy, one of which would have been paragraph 13. Treating its deletion as an exclusion makes it an express exception to the general "all risks" insurance provision.

The Assureds argue that weather stand-by charges are "costs necessarily incurred and duly justified in repair or replacement" of lost or damaged property, which must be paid under paragraph 1a. But weather stand-by charges are not necessarily incurred in repairing property damage; they are optional. The Assureds could have released vessels and labor until the storms that delayed repairs passed. Their retention may have been prudent and cost-effective, as the Assureds argue, but the charges incurred were no more necessary than those for repositioning a structure, repeating tests, losses from terrorism, and transportation interruptions, all covered by other paragraphs in the same "Terms and Conditions" section that were also deleted.

---

[51] *Nat'l Union Fire Ins. Co. of Pittsburgh, Pa. v. Hudson Energy Co.*, 811 S.W.2d 552, 555 (Tex. 1991).

The Assureds argue that weather stand-by charges are part of the costs of equipment and labor "used" or "utilise[d]" in repairing covered property under paragraph 1d, but the opposite is true: the charges are for equipment and labor that are standing by, awaiting use when the weather clears. If paragraph 1d covered weather stand-by charges, paragraph 13 would be surplusage in a policy in which it was not struck through, as in this policy.

Finally, the Assureds argue that because the policy provided a deductible for weather stand-by charges, the charges must have been payable under the policy. But the deductible provision was another part of the printed form. Having struck paragraph 13, the parties might well have struck the deductible provision, but failing to do so simply left it inoperative.

* * *

For these reasons, we conclude that the judgment of the court of appeals should be

Affirmed.

Nathan L. Hecht
Justice

Opinion delivered: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0890

THE HOUSTON EXPLORATION CO. AND
OFFSHORE SPECIALTY FABRICATORS, INC., PETITIONERS,

v.

WELLINGTON UNDERWRITING AGENCIES, LTD., ET AL.,
RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

CHIEF JUSTICE JEFFERSON, joined by JUSTICE WILLETT and JUSTICE LEHRMANN, dissenting.

The Court holds that language manifestly stricken from a contract, and thereby made inoperative by the parties, nonetheless determines the contract's meaning. The Court believes that industry custom controls and that our precedent demands this outcome. But there is no evidence of such a custom, and old precedent, to the extent that it employs inoperative language to interpret a contract, is overwhelmed by modern views of parol evidence. I respectfully dissent.

I. Deleted Language

Based on what it believes to be the custom of the Lloyd's market,[1] the Court engages in a speculative analysis of what the parties to this insurance contract intended when they deleted certain

[1] *See* ___ S.W.3d at ___ ("Coverage was negotiated in the London market, and as is customary there, the parties reached agreement by lining through provisions in a form policy."). The Court cites no authorities confirming the existence of such a custom. Elsewhere, the Court states a broader rule: that "deletions in a printed form agreement *must* be considered in construing the other provisions." *Id.* at ___ (emphasis added).

contractual language. In doing so, the Court enters a morass of indeterminacy, which could easily be avoided by focusing on the contract language alone. To justify looking to the contract's deleted language, the Court relies on two cases that are, in my opinion, ill-reasoned, and should be disapproved to the extent that they consider deleted text to interpret a facially unambiguous contract.

The content of a deleted provision, like the negotiations preceding the contract's execution, is extrinsic and cannot be considered in interpreting the contract. In *Sun Oil Co. v. Madeley*, 626 S.W.2d 726, 731 (Tex. 1981), we made clear that while a court may consider the circumstances surrounding a contract's execution, it could do so only as an aid to the interpretation of the contract's language. Neither surrounding circumstances nor extrinsic evidence may be consulted if they introduce ambiguity, as consideration of paragraph 13 does here. *Sun Oil Co.*, 626 S.W.2d at 732 ("[P]arol evidence is not admissible to render a contract ambiguous . . . ." (quoting *Lewis v. E. Tex. Fin. Co.*, 146 S.W.2d 977, 980 (Tex. 1941))). Extrinsic evidence, moreover, may be considered only when the contract's meaning cannot be determined from the text. *See Nat'l Union Fire Ins. Co. of Pittsburgh, Pa. v. CBI Indus., Inc.*, 907 S.W.2d 517, 521 (Tex. 1995) (holding that extrinsic evidence may not be introduced where the contract is unambiguous); *Sun Oil Co.*, 626 S.W.2d at 732 (same). The circumstances that a court may consider are limited to the facts constituting the context of the contract's execution, not extrinsic evidence of the negotiations among the parties. Professor Williston explains that the rule permitting consideration of surrounding circumstances should not be read to eviscerate the parol evidence rule by allowing extrinsic evidence; rather, surrounding circumstance "refers to the commercial or other setting in which the contract was negotiated and other objectively determinable factors that give a context to the transaction between

the parties"—factors such as the parties' experience, sophistication, and age.[2] 11 RICHARD A. LORD, WILLISTON ON CONTRACTS § 32.7 (4th ed. 1999). To consider deleted language or other previous drafts or negotiations would destroy the parol evidence rule without easing interpretation. *See id.* § 33.42 (noting that "the law distinguishes [facts regarding prior negotiations] from other facts surrounding the transactions" and that "evidence of [facts regarding prior negotiations] is inadmissible"). Indeed, Texas law prohibits as extrinsic evidence the introduction of prior policies and negotiations, as well as legal memoranda, for the purpose of aiding the interpretation of an unambiguous contract. *See, e.g.*, *Fiess v. State Farm Lloyds*, 202 S.W.3d 744, 747 (Tex. 2006) (prior policies); *Nat'l Union Fire Ins. Co.*, 907 S.W.2d at 521 (prior dealings; prior negotiations); *Sun Oil Co.*, 626 S.W.2d at 732 (legal memoranda); *cf. Sharp v. State Farm Fire & Cas. Ins. Co.*, 115 F.3d 1258, 1262 (5th Cir. 1997) (interpreting Texas law and prohibiting prior policies).

The evidence that Wellington wishes to admit does not provide context for the negotiation and execution of the contract in a way that elaborates on the meaning of the contract's language; rather, Wellington seeks to use language the parties rejected to tell us directly what the contract means. *Cf. Fiess*, 202 S.W.3d at 745 (noting that we construe contracts according to what they say, "not what . . . insurers thought [they] said"). Paragraph 13 is not evidence of a surrounding

[2] We have tended to permit evidence only of such contextual facts under the rubric of "surrounding circumstances." *See, e.g.*, *Progressive Cnty. Mut. Ins. Co. v. Kelley*, 284 S.W.3d 805, 807–08 (Tex. 2009) (considering the *existence* of two contracts—not their content—as part of the "surrounding circumstances"); *Balandran v. Safeco Ins. Co. of Am.*, 972 S.W.2d 738, 741–42 (Tex. 1998) (regulatory climate surrounding promulgation of a form policy); *Grain Dealers Mut. Ins. Co. v. McKee*, 943 S.W.2d 455, 457–58 (Tex. 1997) (the fact that the insurance was provided to a sole shareholder corporation); *Sun Oil Co.*, 626 S.W.2d at 732 (bargaining position, sophistication, and relative value of the minerals at the time of execution).

circumstance; it is parol evidence, and the Court gives no reason, beyond two old cases that conflict with the spirit of our recent precedent, for why it should be considered here.

When contracting parties strike through proposed language, the stricken language is inoperative. Though the deleted text is legible, we must not summon dead words for live contracts. *See* 11 LORD, WILLISTON ON CONTRACTS § 32:13 (noting that deletions "manifest[] an unwillingness to be bound according to the deleted terms"). Deleted language is extrinsic to the contract, valid only where the law otherwise permits its consideration. Most other courts considering this issue have reached this conclusion. *See, e.g.*, *Gateway Frontier Props., Inc. v. Selner, Glaser, Komen, Berger & Galganski, P.C.*, 974 S.W.2d 566, 570 (Mo. Ct. App. 1998) (noting that the majority of "jurisdictions considering the issue have held that stricken language is extrinsic and may not be resorted to in construing an integrated, unambiguous contract"). In one of the earliest opinions to address the effect of deleted language on contract interpretation, the Supreme Court of South Carolina wrote:

> [W]e think the notes must be read as if the words erased had never been inserted, and when so read the contract falls within the general rule as to mortgages. Those words were not at all necessary to create a liability on the part of the defendant . . . , and if he had desired to exempt himself from such liability he should have inserted in the contracts words of exemption, as contracts must be construed by the words which they contain, and not with reference to words omitted or erased.

Straub v. Screven, 19 S.C. 445, 449–50 (1883).[3]

[3] *See also, e.g.*, *Hughes v. Samedan Oil Corp.*, 166 F.2d 871, 873–74 (10th Cir. 1948) (noting that a court may only look to a deleted provision where the contract is ambiguous); *St. Lawrence Explosives Corp. v. Worthy Bros. Pipeline Corp.*, 916 F. Supp. 187, 190–91 (N.D.N.Y. 1996) (same), *aff'd*, 111 F.3d 124 (2d Cir. 1997) (unpublished table decision); *Remillard Brick Co. v. Remillard-Dandini Co.*, 125 P.2d 548, 552 (Cal. Dist. Ct. App. 1942) (refusing to look at an excised provision because the contract, considered without reference to that provision, was unambiguous); *Kennon v. Shepard*, 127 N.E. 426, 427 (Mass. 1920) ("[W]ords eliminated from the contract before its execution cannot be restored; and they cannot be used in its construction."); *Gateway Frontier Props., Inc.*, 974 S.W.2d at 570 ("The

The opposite rule creates havoc. Imagine that an insurance company provided insurance through a form policy with the various types of coverage negotiable before execution. Two parties contract for identical coverage with this insurer, but one is provided a clean copy, containing only the language to which that party agreed. The other, meanwhile, receives a policy with the same operative language but with other language—coverage not contracted for—crossed out. Under the regime proposed by Wellington, were both parties to sue on the contract, the interpretations might come out differently, even though each had negotiated the same coverage, because the court in one case could look to the deleted language while the other could not. Such a rule would invite confusion rather than mitigate it.[4]

Meaning derived from stricken language can never be more than a mere inference—a reading of intent into an action without clear meaning—and thus the Court substitutes guesswork for operative language. The Court believes the words were deleted because the parties rejected their substance. I disagree, as explained below. But even if the Court were right in this case, the intent behind deletions will not always—or even usually—be so clear. Parties delete language because of "an unwillingness to be bound according to the deleted terms." 11 LORD, WILLISTON ON CONTRACTS § 32.13. Why they were unwilling to be bound by those terms—or even whether the

---

rationale underlying the rule is that the writing excised from the agreement . . . is not part of the agreement between the parties.").

[4] Similarly, the Court's rule would give significance to seemingly insignificant factors, such as the thickness of the line striking a provision: Would deleted language be considered where struck with a thin, pen line but not where struck emphatically with marker that rendered the provision illegible? If the same rule would apply to both situations, how would parties prove what the now-illegible text said?

parties wished not to be bound by them for the same reason[5]—is not apparent. *See id.* (noting that deletions "may not express to what terms a party would be willing to be bound"). Deletions may serve some purpose, but we should reject the notion that that purpose is easily ascertainable simply from the contract's face and the fact of deletion. Courts cannot hope to do this consistently and successfully, and they should not try.

II. The Contract's Language

The contract must be interpreted without reference to the deleted paragraph 13, and coverage for standby charges is otherwise established by the contract's language.

When the deletion is honored as a banishment, there is only one reference to standby charges: a clause stating a deductible for standby charges. Surplusage being strongly disfavored in the interpretation of contracts, this alone is strong evidence of coverage. If standby charges were not covered, what would be the rationale for including the deductible? It is "our duty . . . to give effect to all contract provisions, and render none meaningless." *King v. Dall. Fire Ins. Co.*, 85 S.W.3d 185, 193 (Tex. 2002). Yet the Court dismisses the deductible language and holds it "inoperative."[6] ___ S.W.3d at ___. Holding that standby charges are indeed covered would,

[5] And in this case, it is clear that there was no agreement at all.

[6] Although the Court is nonchalant about calling actual provisions surplusage, the Court is deeply concerned about *hypothetical* surplusage. The Court writes that the contract cannot be read to cover standby charges—because of the (non?)existence of paragraph 13: "If paragraph 1d covered weather standby charges, paragraph 13 would be surplusage in a policy in which it was not struck through." ____ S.W.3d at ___. This amounts to the conceptually difficult argument that something cannot be covered because if language not actually in the contract *were* in the contract, that language not in the contract would be surplusage. But paragraph 13 *is not* in the contract, and so the Court rejects the only reading that gives meaning to each of the contract's clauses based on its hypothetical interpretation of a contract that is not before this Court and, indeed, may not exist. And, moreover, this is all based on a belief, implicit in the Court's reasoning, that the form contract from which the Underwriters were working could not have contained surplusage as it was written—but perhaps it did, and perhaps that's why the "surplusage" was removed?

Or perhaps paragraph 13's deletion removed a sublimit, as the brokers argued to the Underwriters. To this the

consistent with our precedent and in contrast with the Court's construction, give meaning to each of the contract's provisions, rendering none meaningless.

Coverage becomes more clear when the deductible provision is considered alongside the contract's other provisions. Paragraph 1.a. of the Basis of Recovery section promises indemnification for "installation and all other costs necessarily incurred and duly justified in repair or replacement." Paragraph 1.d. of the Basis of Recovery section provides that in the event of a loss caused by a covered occurrence, with respect to

> repairs . . . carried out by vessels . . . which the Assured have on charter, . . . the cost or the proportion thereof shall be based on the pre-agreed hire or contract rates for such employment when used in or about the repair . . . and shall be so recoverable as a claim hereon. In the event that the Assured utilises its own vessels . . . for any repair, . . . a reasonable charge in respect of such work shall be recoverable as a claim hereon.

These clauses provide coverage for weather standby charges. Paragraph 1.a. does not, by its terms, restrict coverage to actual repair costs. Rather, the provision covers all costs that are "necessarily incurred and duly justified" in the course of repairs, even if those costs are not for actual repairs. Here, Houston and Offshore incurred the weather standby costs in the course of the repairs. Though the immediate cause of the charges was the weather, it is apparent that they were in fact incurred as a result of the covered occurrence—the vessels put on standby were hired to perform covered repairs, but the weather intervened. These vessels, while on standby, continued

---

Court again says no, writing that "*the* way to delete the [sublimit] was to strike the introductory phrase" rather than the whole paragraph. ___ S.W.3d at ___ (emphasis added). *The* way: in the Court's opinion, there could be no *other* way to remove a sublimit.

to be hired for the purposes of repair. Absent clearer exclusionary language in the contract, the standby charges are necessarily incurred and duly justified.

Paragraph 1.d. supports this conclusion. It has two relevant clauses. The first deals with hired vessels "used in or about the repair." Wellington narrowly defines the term "about" and argues that this provision restricts indemnification to costs associated with the use of the vessels while they are actually engaged in repairs or are physically near the repair site. This misinterprets the contract's use of the term "about." The *Oxford English Dictionary* makes clear that, when used as a preposition, "about" may express proximity, but it may also express "relation or connection." OXFORD ENG. DICTIONARY (online ed. 2011), http://www.oed.com (all Internet material as visited August 23, 2011, and copy available in Clerk of Court's case file). This reading makes sense: it is more reasonable for Wellington to indemnify the Assureds for hiring costs incurred "in or in connection with" a repair than for costs incurred "in or near" a repair.

The second clause of paragraph 1.d. indemnifies the Assureds for hire costs related to boats owned by the Assured and "utilise[d] . . . for" repairs. Because most of the standby charges at issue are related to vessels owned by Offshore, this provision is especially relevant. As with the previous clause, the contract's language here does not limit indemnification to the vessel's expenses while actually engaged in repairs. Crucially, the preposition changes from the previous sentence. There, the parties wrote "used in"—implying actual repairs costs—while here it is "utilized for." Like "about," the use of "for" broadens the coverage, indicating that indemnification should include costs incurred with regard to those vessels while they are generally engaged in repair-related activities, even if they are not actively making repairs. Here, Offshore's vessels were being "utilise[d] . . . for"

repairs to the platform when the storms forced them to quit. While the storms passed, Offshore and Houston kept those vessels on standby, ensuring their continued availability when repairs could recommence. As such, even as they waited out the storms, the vessels continued to be used for the repairs. Indeed, waiting on standby *was* their use, meant to ensure that repairs continued with haste.

Thus, standby charges are covered under the contract.

III. Conclusion

The Lloyd's process is odd and opaque. Even after extensive discovery, it remains unclear how the insurance contract came into being or to what extent its language was accepted by the parties. Taking into account language that was *removed from* a contract, and trying to read the record of the negotiations, only confuses things. Here, there is a deletion and a failure to delete; there are changed stories; there are conflicting explanations. This is not clear evidence of noncoverage because it is clear evidence of *nothing*. Considering this extraneous information inhibits rather than enhances clarity, and it makes our interpretive task more difficult. The Court should not have gone down this road in *Gibson* or *Dwyer*, and the Court should not compound its mistake today.

We interpret language, not its absence. The expressive content of an act of deletion will frequently be indeterminate; here, it could have been intended to remove coverage, remove redundancy, or remove a sublimit. Deleted language is therefore best regarded as extrinsic evidence, inadmissible for the purposes of varying or contradicting the language of an unambiguous contract. Accordingly, I respectfully dissent.

Chief Justice

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0890

THE HOUSTON EXPLORATION CO. AND
OFFSHORE SPECIALTY FABRICATORS, INC., PETITIONERS,

v.

WELLINGTON UNDERWRITING AGENCIES, LTD. ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTEENTH DISTRICT OF TEXAS

JUSTICE JOHNSON, concurring.

I join parts I and III of the Court's opinion and its judgment. I write to explain my view of why the stricken language of paragraph 13 can and should be considered for context.

First, the stricken language of paragraph 13 need not be considered in determining the policy's coverage. As explained in part III of the Court's opinion and by the court of appeals, 267 S.W.3d 277, 283-87, the policy is unambiguous regardless of the presence of the stricken language. The policy provides coverage for repairs and vessels engaged in "or about" repairs; it does not provide coverage for vessels on standby for an extended period of time and not actively preparing for, supporting, or engaged in repairs.

Next, this was not a one-size-fits-all insurance agreement. The insurance contract was negotiated based on Offshore's particular risks. The striking of paragraph 13 and other language

from the form policy is an objective reflection of the setting surrounding the creation of the policy; it assists in giving context to how the policy terms were reached through negotiations. *See* ___ S.W.3d ___ at ___ (Jefferson, C.J., dissenting) (citing 11 RICHARD A. LORD, WILLISTON ON CONTRACTS § 32.7 (4th ed. 1999)). The strikings show that the parties negotiating the contract were experienced with the type of coverage being negotiated and that "standby charges" was a term of art reflecting a particular, recognized category of risk. Moreover, the presence of the clause providing a deductible for standby charges does not indicate that the policy covers standby charges as the dissent posits. To the contrary, it indicates the opposite: standby charges were a separate, recognized category of expense. The insuring portions of the policy did not provide coverage for such charges even though the deductible clause was not stricken.

OPINION DELIVERED: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0989

ITALIAN COWBOY PARTNERS, LTD.,
FRANCESCO SECCHI AND JANE SECCHI, PETITIONERS,

V.

THE PRUDENTIAL INSURANCE COMPANY OF AMERICA AND
FOUR PARTNERS, LLC D/B/A PRIZM PARTNERS AND
D/B/A UNITED COMMERCIAL PROPERTY SERVICES, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE ELEVENTH DISTRICT OF TEXAS

Argued April 14, 2010

JUSTICE GREEN delivered the opinion of the Court in which CHIEF JUSTICE JEFFERSON, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE JOHNSON, and JUSTICE LEHRMANN joined.

JUSTICE HECHT filed a dissenting opinion, in which JUSTICE WILLETT and JUSTICE GUZMAN joined.

We recognized decades ago that agreeing to a merger clause does not waive the right to sue for fraud should a party later discover that the representations it relied upon before signing the contract were fraudulent. *See Dallas Farm Mach. Co. v. Reaves*, 307 S.W.2d 233, 239 (Tex. 1957) (quoting *Bates v. Southgate*, 31 N.E.2d 551, 558 (Mass. 1941)). The principal issue in this case is whether disclaimer-of-representations language within a lease contract amounts to a standard merger

clause, or also disclaims reliance on representations, thus negating an element of the petitioner's claim for fraudulent inducement of that contract. We conclude that the contract language in this case does not disclaim reliance or bar a claim based on fraudulent inducement. Accordingly, we reverse the take-nothing judgment of the court of appeals and remand the case to that court for further proceedings consistent with this opinion. We render judgment in favor of the lessee on its claim for rescission premised on breach of the implied warranty of suitability.

I. Facts

This dispute arose when Jane and Francesco Secchi, owners and operators of a restaurant, Italian Cowboy, terminated the restaurant's lease because of a persistent sewer gas odor.[1] In a suit against the landlord, Prudential Insurance Company of America, and the property manager, Prizm Partners,[2] the Secchis sought to rescind the lease and recover damages for fraud and breach of the implied warranty of suitability. The landlord maintains that rescission is not warranted and seeks to recover for breach of contract.

The Secchis successfully owned and operated restaurants for more than twenty years. The Secchis identified Keystone Park, a Dallas shopping center owned by Prudential and managed by Prizm, as a possible site for a new restaurant, Italian Cowboy. Keystone Park housed three successful restaurants and had a vacant restaurant building available for lease. The Secchis began

[1] The lease was executed by Italian Cowboy Partners, Ltd., but the Secchis also signed a personal guaranty. In their individual capacities, the Secchis later filed suit to rescind the guaranty. We include the Secchis' individual claims in our references to the claims filed by Italian Cowboy Partners, Ltd., as the claims and the facts giving rise to them are, in relevant respects, the same.

[2] We refer to the respondents collectively as Prudential. Prudential does not dispute that Prizm or Prizm's property manager, Fran Powell, acted as its agent during the lease negotiations and in managing the property under the Italian Cowboy lease.

negotiating a potential lease of the vacant restaurant building with Prizm's property management director, Fran Powell.

During the lease negotiations, Powell told the Secchis that the building was practically new and had no problems. In particular, Francesco Secchi testified that Powell told him "the building was in perfect condition, never a problem whatsoever." According to Secchi, Powell also said, "[T]his is my baby and I was here from the first day when they put the first brick until the last one. The size—it's in perfect condition. There is no problem whatsoever. . . . [It is] a perfect building." Similarly, Jane Secchi testified that Powell told her that "this was a very new building and she had been present at the very beginning of this building and watched it all the way through," that "[i]t was somewhat of her baby," and that "there had been nothing wrong with the place at all."

The lease with Italian Cowboy contained the following relevant provisions:

> **14.18 Representations.** Tenant acknowledges that neither Landlord nor Landlord's agents, employees or contractors have made any representations or promises with respect to the Site, the Shopping Center or this Lease except as expressly set forth herein.
>
> **14.21 Entire Agreement.** This lease constitutes the entire agreement between the parties hereto with respect to the subject matter hereof, and no subsequent amendment or agreement shall be binding upon either party unless it is signed by each party. . . .

The Secchis began remodeling the property after signing the lease. During this time, the Secchis first heard that a severe odor had plagued Hudson's Grill, the previous tenant. Francesco Secchi testified that a nearby cinema manager had asked Ron Perry, Italian Cowboy's general contractor, if he knew of the problematic odor existing in the previous restaurant. Secchi stated that a few days later, "[a] guy with a motorcycle" stopped by the restaurant and said to "be very

careful. . . . [There] used to be a place called Hudson's here and they used to serve excellent hamburgers, but there was a very, very bad odor."

Upon hearing these statements, Francesco Secchi contacted Powell and specifically asked whether Hudson's Grill had experienced an odor problem. According to Secchi, Powell answered that she had been working with the building "all the time," and that "[n]ever before" had there been a problem—this was the "first time" she heard something was wrong.

The sewer system subsequently backed up during the remodeling, and Francesco Secchi again contacted Powell. Secchi complained to Powell that there was an odor coming from several parts of the building. According to Secchi, Powell replied that she did not "know anything" about these issues. As renovations proceeded, the odor subsided.

However, a persistent odor—distinct from the earlier odor—materialized a few months later, a week before the planned "soft opening" of the Italian Cowboy restaurant. A cleanup crew removed a layer of hardened grease that had been blocking the inlet pipe to the grease trap, and a constant foul sewer gas odor became evident immediately. Francesco Secchi then contacted Powell again because "the odor started to come inside . . . the restaurant" from the grease trap, which was located outside the restaurant building. Secchi told Powell they had a big problem, and he testified that on that day, Powell acknowledged that she smelled the odor, though she never admitted the same problem had occurred with Hudson's Grill.

Attempts to remedy the persistent sewer gas odor began immediately and continued for months. Perry and Powell inspected the plumbing and seals for leaks. Powell contacted Prizm's plumbers, Twin Cities, who replaced toilet rings in a restroom, and Powell authorized Perry to take out a wall, which Perry did. Perry then capped off a sink arm in the kitchen, Twin Cities installed

new roof vents, and Powell and Perry examined parts along the bathroom wall corridor. The Secchis hired a trusted repair man, who "put [in] some extra pipes [to extend the sewer vents] to maybe get the odor out." Powell also had camera tests of the plumbing lines conducted. Twin Cities attempted to correct the outflow lines running between the grease trap and the city's sewer system. The Secchis hired Lawton Mechanical Contractors, who continued efforts to remedy the odor by focusing on the grease trap, including its seals and covers. All of these attempts were unsuccessful.

In hopes that the foul odor would soon be remedied, the Secchis opened Italian Cowboy. The odor persisted, however, and the restaurant was unable to draw customers. At one point, the City of Dallas briefly shut down the restaurant following a customer's complaint to the health department. Secchi again complained about the odor to Powell, stating that "this is a very big problem. . . . You cannot operate a restaurant with an odor like that."

Secchi contacted Powell again later and told her that "the odor was so terrible" that Italian Cowboy "couldn't carry on." Powell then arranged for a smoke test to help identify the odor's source. After the test, Secchi asked Powell if those conducting the test had found anything and "[s]he said no." Yet, Secchi testified that one of the men who conducted the test said, "I found three [smoke] bombs, but those, they're old bombs. They're not our bombs. Those had been put some time ago."

Throughout this time, Powell continually denied knowledge of previous odor problems. However, the Secchis soon learned from a former manager of Hudson's Grill, Darla Wahl, and her husband, who had also worked at the restaurant, that the sewer gas odor was not only present during Hudson's tenancy and that attempts to remedy it at the time were also unsuccessful, but that Powell was aware of the odor at that time and had visited Hudson's Grill numerous times while the odor was

present. Wahl testified that on the day of her and her husband's visit to Italian Cowboy as patrons, she "came back from the restroom and told [her husband] the smell is still there in the bathrooms," and she confirmed the smell was noticeable "outside the restroom area" as well. Wahl mentioned the odor to one of the servers, at which point "Jane [Secchi] came over to the bar area and introduced herself" to the Wahls. Wahl then told Secchi that "the smell was there while I was at the restaurant when it was Hudson's Grill" and that Powell had been "present in the restaurant when the smell was there." Wahl confirmed she spoke with Secchi regarding "how long the smell had been there," "whether customers had complained about it," "how often customers complained about it," and the things that were done "to try to alleviate the smell."

Upon receiving this information from the Wahls, the Secchis immediately ceased paying rent and closed the restaurant. Italian Cowboy then sued Prudential and Prizm, asserting claims for fraud, including both a theory of fraud in the inducement of the lease, as well as fraud based on later misrepresentations. Italian Cowboy further asserted claims for negligent misrepresentation, breach of the implied warranty of suitability, and constructive eviction, and also sought rescission of the lease.

At trial, Matt Quinn, who had been regional manager of Hudson's Grill, directly refuted Powell's representations, testifying that he recalled incidents of sewer gas odor in Hudson's Grill and that Powell "knew of the smell," that "she talked to myself about it and other people about it as well," and that she described it as "almost unbearable" and "ungodly." When late on a rent payment, Quinn said, "I told her we had a problem with an odor coming from the bathroom and that's what was causing a lot of problems as far as business. . . . Obviously no business, no sales, no sales can't pay the rent." Also, after the initiation of the dispute, Powell contacted Quinn in reference to the

odor, and he informed her that they "never did get it . . . taken care of." Quinn also testified that Prizm's president, Scott Weaver, had experienced the odor while visiting Hudson's Grill, and knew that Hudson's Grill had been unsuccessful in attempting to remedy it. Darla Wahl affirmed at trial what she had told the Secchis just before Italian Cowboy closed. Powell, on the other hand, continued to deny any knowledge of, or experience with, the odor during the Hudson's Grill tenancy.

The trial court found for Italian Cowboy on all claims. The trial court entered findings of fact, including:

- "Through her on-site visits to Hudson's Grill, Powell learned of the sewer gas smell in Hudson's Grill, of measures taken to remedy the odor, and that such measures were unsuccessful." Specifically, Powell was at Hudson's Grill "while the smell was present [and] personally characterized it as 'horrid' and 'ungodly'; a smell that would make one 'gag.'"

- During negotiations, Powell described the building as "her baby" and "purported to have, and did have, knowledge superior to the Secchis of what had transpired in and about the Premises when it served as the Hudson's Grill and what would transpire in the future concerning the Premises and Keystone Park."

- Powell's statements—"[t]he Secchis were lucky to be able to lease the [building] because the building . . . was practically new and was problem-free; [n]o problems had been experienced with the [building] by the prior tenant; [t]he building . . . was a perfect restaurant site"—were statements of fact, known to be false when made, and were relied upon by the Secchis in signing the lease and guaranty.

- "Powell's conduct and attempted cover-up when the Hudson's Grill sewer gas smell recurred in the Italian Cowboy restaurant evidenced consciousness of guilt of her pre-lease and pre-guaranty misrepresentations to the Secchis."

Italian Cowboy elected to rescind the lease, and to recover damages for rescission.[3] The trial court awarded $600,070.40 in actual damages, plus prejudgment interest and attorney's fees. The trial court awarded $50,000 as exemplary damages. The trial court also ordered that Prudential take

[3] As discussed below in Part IV, testimony from the subsequent restaurant tenant indicated that the persistent odor disappeared after that tenant severed wastewater piping to the grease trap, moved the kitchen to a new area of the building, raised vent stacks, and re-routed pipes on the roof.

nothing on its counterclaim for breach of contract. The court of appeals, however, reversed as to each of Italian Cowboy's claims and rendered a take-nothing judgment, while rendering judgment in favor of Prudential on its counterclaim for breach of contract. 270 S.W.3d at 208. We granted Italian Cowboy's petition for review. 53 Tex. Sup. Ct. J. 389 (Mar. 15, 2010).

II. Disclaimer of Reliance and Fraudulent Inducement

We turn first to whether the lease contract effectively disclaims reliance on representations made by Prudential, negating an element of Italian Cowboy's fraud claim. We conclude that it does not. First, a plain reading of the contract language at issue indicates that the parties' intent was merely to include the substance of a standard merger clause, which does not disclaim reliance. Moreover, even if the parties had intended to disclaim reliance, the contract provisions do not do so by clear and unequivocal language. For these reasons, we hold as a matter of law that the language contained in the lease agreement at issue does not negate the reliance element of Italian Cowboy's fraud claim.

A contract is subject to avoidance on the ground of fraudulent inducement. *Williams v. Glash*, 789 S.W.2d 261, 264 (Tex. 1990); RESTATEMENT (SECOND) OF CONTRACTS § 214 cmt. c (1981) ("What appears to be a complete and binding integrated agreement . . . may be voidable for fraud . . . ."). For more than fifty years, it has been "the rule that a written contract [even] containing a merger clause can [nevertheless] be avoided for antecedent fraud or fraud in its inducement and that the parol evidence rule does not stand in the way of proof of such fraud." *Dallas Farm Mach. Co. v. Reaves*, 307 S.W.2d 233, 239 (Tex. 1957) (citing *Bates v. Southgate*, 31 N.E.2d 551, 558 (Mass. 1941)); *accord* RESTATEMENT (SECOND) OF CONTRACTS § 214 cmt. c (1981) ("Such invalidating causes [including fraud] need not and commonly do not appear on the face of the

writing. They are not affected even by a 'merger' clause."). In *Reaves*, we quoted approvingly the "sound public policy" supporting the rule on merger clauses:

> The same public policy that in general sanctions the avoidance of a promise obtained by deceit strikes down all attempts to circumvent that policy by means of contractual devices. In the realm of fact it is entirely possible for a party knowingly to agree that no representations have been made to him, while at the same time believing and relying upon representations which in fact have been made and in fact are false but for which he would not have made the agreement. To deny this possibility is to ignore the frequent instances in everyday experience where parties accept, often without critical examination, and act upon agreements containing somewhere within their four corners exculpatory clauses in one form or another, but where they do so, nevertheless, in reliance upon the honesty of supposed friends, the plausible and disarming statements of salesmen, or the customary course of business. To refuse relief would result in opening the door to a multitude of frauds and in thwarting the general policy of the law.

307 S.W.2d at 239 (quoting *Bates*, 31 N.E.2d at 558).

Decades later, we recognized an exception to this rule in *Schlumberger Technology Corp. v. Swanson*, 959 S.W.2d 171 (Tex. 1997), and held that when sophisticated parties represented by counsel disclaim reliance on representations about a specific matter in dispute, such a disclaimer may be binding, conclusively negating the element of reliance in a suit for fraudulent inducement.[4] *Id.* at 179. In other words, fraudulent inducement is almost always grounds to set aside a contract despite a merger clause, but in certain circumstances, it may be possible for a contract's terms to preclude a claim for fraudulent inducement by a clear and specific disclaimer-of-reliance clause. *See id*. We stated that we had a clear desire to protect parties from unintentionally waiving a claim for fraud, but also identified "a competing concern—the ability of parties to fully and finally resolve

[4] We also held in *Schlumberger* that parties can execute "a release that clearly expresses the parties' intent to waive fraudulent inducement claims." 959 S.W.2d at 181. Here, however, Prudential does not argue this lease expressly disclaims a fraudulent inducement claim, and instead suggests that a disclaimer of representations amounts to a disclaimer of reliance upon such representations.

disputes between them." *Id.* We held that "[p]arties should be able to bargain for and execute a release[5] barring all further dispute," and to that end, "parties may disclaim reliance on representations[, a]nd such a disclaimer, where the parties' intent is clear and specific, should be effective to negate a fraudulent inducement claim." *Id.*; *see also* TEX. CIV. PRAC. & REM. CODE § 154.002 ("It is the policy of this state to encourage the peaceable resolution of disputes . . . and the early settlement of pending litigation through voluntary settlement procedures."). Schlumberger and the Swansons had long been embroiled in a dispute over the feasibility of a mining project, and were "attempting to put an end to their deal." *Schlumberger*, 959 S.W.2d at 180. Given the circumstances surrounding the settlement agreement's formation, we determined that the disclaimer-of-reliance clause had the "requisite clear and unequivocal expression of intent necessary to disclaim reliance . . . on specific representations by Schlumberger," and thus the clause effectively precluded a claim for fraudulent inducement. *Id.* at 179–80.

More recently, in *Forest Oil Corp. v. McAllen*, 268 S.W.3d 51 (Tex. 2008), we applied our *Schlumberger* analysis to a settlement agreement that was intended to resolve both future and past claims. *Id.* at 58 ("Our analysis in *Schlumberger* rested on the paramount principle that Texas courts should uphold contracts negotiated at arm's length by knowledgeable and sophisticated business players represented by highly competent and able legal counsel, a principle that applies with equal force to contracts that reserve future claims as to contracts that settle all claims." (internal quotations omitted)). In *Forest Oil*, we held that "a freely negotiated agreement to settle present disputes and arbitrate future ones" was enforceable. *Id.* We acknowledged that "[a]n all-embracing disclaimer

[5] "Texas law favors and encourages voluntary settlements and orderly dispute resolution. However, a release is a contract, and like any other contract, is subject to avoidance on grounds such as fraud or mistake." *Schlumberger*, 959 S.W.2d at 178.

of any and all representations, as here, shows the parties' clear intent." *Id.* We also reemphasized the strong policy favoring settlement agreements. *Id.* at 60. ("Refusing to honor a settlement agreement—an agreement highly favored by the law—under these facts would invite unfortunate consequences for the everyday business transactions and the efficient settlement of disputes."(footnote omitted)). Despite applying *Schlumberger*'s analysis to a more inclusive settlement agreement, we were careful to clarify that:

> Today's holding should not be construed to mean that mere disclaimer standing alone will forgive intentional lies regardless of context. We decline to adopt a *per se* rule that a disclaimer automatically precludes a fraudulent-inducement claim, but we hold today, as in *Schlumberger*, that "on this record," the disclaimer of reliance refutes the required element of reliance.

Id. at 61.

Here, the parties dispute whether a disclaimer of reliance exists, or whether the lease provisions simply amount to a merger clause, which would not disclaim reliance. The question of whether an adequate disclaimer of reliance exists is a matter of law. *See Schlumberger*, 959 S.W.2d at 181. Our analysis of the parties' intent in this case begins with the typical rules of contract construction.

In construing a contract, a court must ascertain the true intentions of the parties as expressed in the writing itself. *J.M. Davidson, Inc. v. Webster*, 128 S.W.3d 223, 229 (Tex. 2003). In identifying such intent, "we must examine and consider the entire writing in an effort to harmonize and give effect to all the provisions of the contract so that none will be rendered meaningless." *Id.* We begin this analysis with the contract's express language. *Progressive County Mut. Ins. Co. v. Kelley*, 284 S.W.3d 805, 807 (Tex. 2009) (per curiam); *see also Coker v. Coker*, 650 S.W.2d 391, 393 (Tex. 1983) ("If the written instrument is so worded that it can be given a certain or definite

legal meaning or interpretation, then it is not ambiguous and the court will construe the contract as a matter of law."). "[I]f the contract is subject to two or more reasonable interpretations after applying the pertinent rules of construction, the contract is ambiguous, creating a fact issue on the parties' intent." *J.M. Davidson*, 128 S.W.3d at 229. "Only where a contract is ambiguous may a court consider the parties' interpretation and admit extraneous evidence to determine the true meaning of the instrument." *David J. Sacks, P.C. v. Haden*, 266 S.W.3d 447, 450–51 (Tex. 2008) (per curiam) (internal quotation omitted).

Prudential focuses our attention on section 14.18 of the lease contract ("Representations"), suggesting that Italian Cowboy's fraud claim is barred by its agreement that Prudential did not make any representations outside the agreement, i.e., that Italian Cowboy impliedly agreed not to rely on any external representations by agreeing that no external representations were made. Standard merger clauses, however, often contain language indicating that no representations were made other than those contained in the contract, without speaking to reliance at all. *See, e.g.*, RESTATEMENT (SECOND) OF CONTRACTS § 216 cmt. e (1981) (discussing merger clauses and observing that "[w]ritten agreements often contain clauses stating that there are no representations, promises or agreements between the parties except those found in the writing. Such a clause . . . is likely to conclude the issue whether the agreement is completely integrated.").[6] Such language achieves the

[6] *See also* 7 JOSEPH M. PERILLO, CORBIN ON CONTRACTS § 28.21 (rev. ed. 2002) (describing merger clauses as "stating that the writing contains the entire contract and that no representations other than those contained in the writing have been made"); 11 SAMUEL WILLISTON & RICHARD A. LORD, A TREATISE ON THE LAW OF CONTRACTS § 33.21 (4th ed. 1999) ("Recitations to the effect that a written contract is integrated, that all conditions, promises, or representations are contained in the writing . . . are commonly known as merger or integration clauses."); *see also*, *e.g.*, *Tellepsen Builders, L.P. v. Kendall/Heaton Assocs., Inc.*, 325 S.W.3d 692, 699 (Tex. App.—Houston [1st Dist.] 2010, pet. denied) ("The subcontracts at issue included merger clauses, stating that each subcontract represented the entire agreement and superseded all prior negotiations, representations and agreements, either written or oral."); *Va. Power Energy Mktg., Inc. v. Apache Corp.*, 297 S.W.3d 397, 406 (Tex. App.—Houston [14th Dist.] 2009, pet. denied) (quoting a merger clause stating that "any prior contracts, understandings and representations, whether oral or written, relating to such transaction are merged into and superseded by this Contract").

purpose of ensuring that the contract at issue invalidates or supersedes any previous agreements, as well as negating the apparent authority of an agent to later modify the contract's terms. *See* RESTATEMENT (SECOND) OF CONTRACTS § 216 cmt. e (1981) (observing that a merger clause "may negate the apparent authority of an agent to vary orally the written terms"); 11 SAMUEL WILLISTON & RICHARD A. LORD, A TREATISE ON THE LAW OF CONTRACTS § 33.21 (4th ed. 1999) (stating that the existence of a merger clause showing the parties' intent to fully integrate their contract requires application of the parol evidence rule, which renders prior agreements covering the same subject matter unenforceable).

We conclude that the only reasonable interpretation of the contract language at issue here is that the parties to this lease intended nothing more than the provisions of a standard merger clause, and did not intend to include a disclaimer of reliance on representations. Therefore, we need not consider any extraneous evidence of the parties' intent to ascertain the true meaning of the instrument. *See Sacks*, 266 S.W.3d at 450–51.

Pure merger clauses, without an expressed clear and unequivocal intent to disclaim reliance or waive claims for fraudulent inducement, have never had the effect of precluding claims for fraudulent inducement. *See, e.g.*, *Reaves*, 307 S.W.2d at 239; *Edward Thompson Co. v. Sawyers*, 234 S.W. 873, 873–75 (Tex. 1921) (holding that a buyer of legal encyclopedias could sue the seller for fraudulent inducement based on oral representations despite a contract clause stating that no representations or guaranties had been made that were not expressed in the contract); RESTATEMENT (SECOND) OF CONTRACTS § 214 cmt. c. (1981); 11 SAMUEL WILLISTON & RICHARD A. LORD, A TREATISE ON THE LAW OF CONTRACTS § 33.21 (4th ed. 1999) ("The better view is . . . to ask whether a fraudulent misrepresentation (as opposed to, say, a warranty) has been made and whether the party

asserting the fraud would have entered the agreement had he or she known the representation was false; if not, the contract should be voidable to the same extent as if there were no merger clause and, indeed, as if there were no writing . . . ."); *see also Vigortone AG Prods., Inc. v. PM AG Prods., Inc.*, 316 F.3d 641, 644 (7th Cir. 2002) (Posner, J.) ("[A]ll an integration clause does is limit the evidence available to the parties should a dispute arise over the meaning of the contract. It has nothing to do with whether the contract was induced . . . by fraud.").

The language of the contract at issue here differs significantly from the provisions at issue in *Schlumberger* and *Forest Oil*, where we determined there was an intent to disclaim reliance. In *Schlumberger*, the contract provided, "[N]one of us is relying upon any statement or representation of any agent of the parties being released hereby. Each of us is relying on his or her own judgment . . . ." 959 S.W.2d at 180 (emphasis omitted). Similarly, in *Forest Oil*, the contract stated that "in executing the releases contained in this Agreement, [the parties are not] relying upon any statement or representation of any agent of the parties being released hereby. [We are] relying on [our] own judgment . . . ."). 268 S.W.3d at 54 n.4. In each case, the intent to disclaim reliance on others' representations—that is, to rely only on one's own judgment—was evident from the language of the contract itself. No such intent is evident in Italian Cowboy's lease contract, which provided only that "neither Landlord nor Landlord's agents, employees or contractors have made any representations or promises with respect to the Site, the Shopping Center or this Lease except as expressly set forth herein," and that "this lease constitutes the entire agreement between the parties hereto with respect to the subject matter hereof." There is a significant difference between a party disclaiming its *reliance* on certain representations, and therefore potentially relinquishing the right to pursue any claim for which reliance is an element, and disclaiming the *fact* that no other

representations were made. In addition to differences in the contract's language, the facts surrounding this lease agreement differ significantly from those in *Schlumberger* and *Forest Oil*, where we could more easily determine that the parties intended once and for all to resolve specific disputes. *See Forest Oil*, 268 S.W.3d at 60 (concerning a release containing an arbitration requirement for future disputes); *Schlumberger*, 959 S.W.2d at 179–80 (concerning a once-and-for-all settlement agreement over a seafloor mining operation by which parties attempted to put an end to their dispute). A lease agreement, as here, which is the initiation of a business relationship, should be all the more clear and unequivocal in effectively disclaiming reliance and precluding a claim for fraudulent inducement, lest we "forgive intentional lies regardless of context." *Forest Oil*, 268 S.W.3d at 61.

Here, the only plain reading of the contract language in sections 14.18 and 14.21 is that the parties intended to include a well-recognized merger clause. Nothing in that language suggests that the parties intended to disclaim reliance. Prudential and the dissent would have us hold that parties no longer have to disclose known defects if they include a general merger clause in the lease agreement. This is outside a well-settled body of law on the proper legal effect of merger clauses and represents unsound policy.[7] *See* 7 JOSEPH M. PERILLO, CORBIN ON CONTRACTS § 28.21 (rev. ed. 2002) ("Despite the existence of a merger clause, parol evidence is admissible for purposes of demonstrating that the agreement is void or voidable or for proving an action for deceit. *Fraus omnia corrumpit*: fraud vitiates everything it touches." (footnote omitted)); *see also Morris v. House*,

[7] We realize we may have suggested otherwise in certain language in *Schlumberger*. *See* 959 S.W.2d at 181 ("We emphasize that a disclaimer of reliance *or merger clause* will not always bar a fraudulent inducement claim." (emphasis added)). Today, we expressly hold that a merger clause—as distinct from a specific disclaimer-of-reliance clause—may not, by itself, bar an action to set aside a contract based on fraudulent inducement.

32 Tex. 492, 495 (1870) ("[I]t is properly said that fraud vitiates whatever it touches."); *cf. Reaves*, 307 S.W.2d at 239 (discussing the "sound public policy" behind allowing parties an action for fraud despite a contract's efforts to eliminate its availability).

We have repeatedly held that to disclaim reliance, parties must use clear and unequivocal language. *See Forest Oil,* 268 S.W.3d at 62; *Schlumberger*, 959 S.W.2d at 179–80. This elevated requirement of precise language helps ensure that parties to a contract—even sophisticated parties represented by able attorneys—understand that the contract's terms disclaim reliance, such that the contract may be binding even if it was induced by fraud. Here, the contract language was not clear or unequivocal about disclaiming reliance. For instance, the term "rely" does not appear in any form, either in terms of relying on the other party's representations, or in relying solely on one's own judgment. This provision stands in stark contrast to provisions we have previously held were clear and unequivocal:

Schlumberger	*Forest Oil*	*Italian Cowboy*
[E]ach of us . . . expressly warrants and represents . . . that no promise or agreement which is not herein expressed has been made to him or her in executing this release, and that none of us is *relying* upon any statement or representation of any agent of the parties being released hereby. Each of us is *relying* on his or her own judgment	[We] expressly represent and warrant . . . that no promise or agreement which is not herein expressed has been made to them in executing the releases contained in this Agreement, and that they are not *relying* upon any statement or representation of any of the parties being released hereby. [We] are *relying* upon [our] own judgment	Tenant acknowledges that neither Landlord nor Landlord's agents, employees or contractors have made any representations or promises . . . except as expressly set forth herein.

Forest Oil, 268 S.W.3d at 54 (emphasis added); *Schlumberger*, 959 S.W.2d at 180 (emphasis added).

We decline to extend our holdings in *Schlumberger* and *Forest Oil*—each of which included clear and unequivocal language expressly disclaiming reliance on representations, and representing reliance on one's own judgment—to the generic merger language contained in the contract at issue in this case. As a matter of law, the lease agreement at issue does not disclaim reliance, and thus does not defeat Italian Cowboy's claim for fraudulent inducement.[8]

III. Fraud and Negligent Misrepresentation

Because the court of appeals concluded that a binding disclaimer of reliance existed, it did not reach the merits of Italian Cowboy's fraud claims. However, Prudential asserts alternate bases for why Italian Cowboy's fraud claims fail as a matter of law. The elements of fraud are:

> (1) that a material representation was made; (2) the representation was false; (3) when the representation was made, the speaker knew it was false or made it recklessly without any knowledge of the truth and as a positive assertion; (4) the speaker made the representation with the intent that the other party should act upon it; (5) the party acted in reliance on the representation; and (6) the party thereby suffered injury.

Aquaplex, Inc. v. Rancho la Valencia, Inc., 297 S.W.3d 768, 774 (Tex. 2009) (per curiam). We review legal questions that rest on a factual basis de novo, while affording deference to the trial court's findings of fact. *See Reliance Nat'l Indem. Co. v. Advance'd Temps., Inc.*, 227 S.W.3d 46,

[8] Were this a clear and unequivocal disclaimer-of-reliance clause, our analysis would then proceed to "the circumstances surrounding [the contract's] formation," in order to determine whether such a provision is binding on the parties involved. *Schlumberger*, 959 S.W.2d at 179. This would include an analysis of whether "the terms of the contract were negotiated, rather than boilerplate;" during negotiations "the parties specifically discussed the issue which [became] the topic of the subsequent dispute;" "the complaining party was represented by counsel;" "the parties dealt with each other in an arm's length transaction;" and "the parties were knowledgeable in business matters." *Forest Oil*, 268 S.W.3d at 60 (discussing the most important factors from *Schlumberger* to consider in enforcing a disclaimer-of-reliance clause). We also observed that if the situation, like that in *Schlumberger*, indicates a "once and for all" settlement of claims, this "may constitute an additional factor urging rejection of fraud-based claims." *Id.* at 58 (emphasis omitted).

50 (Tex. 2007) ("Appellate courts review legal determinations de novo, whereas factual determinations receive more deferential review based on the sufficiency of the evidence.").

Prudential maintains that Italian Cowboy's fraud claims fail as a matter of law because either Powell's representations were statements of opinion (undercutting the first element), or were not known to be false (undercutting the third element). We disagree. We conclude that her statements were actionable material misrepresentations as a matter of law, and that legally sufficient evidence established that those misrepresentations were known to be false when made.

The trial court listed in its findings of fact three actionable representations made during the lease negotiations:

> a. The Secchis were lucky to be able to lease the Premises because the building on the Premises was practically new and was problem-free;
>
> b. No problems had been experienced with the Premises by the prior tenant; [and]
>
> c. The building on the Premises was a perfect restaurant site and that the Secchis could get into the building as a restaurant site for next to nothing.

"Material means a reasonable person would attach importance to and would be induced to act on the information in determining his choice of actions in the transaction in question." *Smith v. KNC Optical, Inc.*, 296 S.W.3d 807, 812 (Tex. App.—Dallas 2009, no pet.). Pure expressions of opinion are not representations of material fact, and thus cannot provide a basis for a fraud claim. *Prudential Ins. Co. of Am. v. Jefferson Assocs., Ltd.*, 896 S.W.2d 156, 163 (Tex. 1995). "Whether a statement is an actionable statement of 'fact' or merely one of 'opinion' often depends on the circumstances in which a statement is made." *Transport Ins. Co. v. Faircloth*, 898 S.W.2d 269, 276 (Tex. 1995). Special or one-sided knowledge may help lead to the conclusion that a statement is one

of fact, not opinion. *See id.* (including "the comparative levels of the speaker's and the hearer's knowledge" as among the relevant circumstances upon which the classification of a statement as fact or opinion depends). Moreover, even if an expression is an opinion, "[t]here are exceptions to this general rule that an expression of an opinion cannot support an action for fraud." *Trenholm v. Ratcliff*, 646 S.W.2d 927, 930 (Tex. 1983). One such exception is that "when an opinion is based on past or present facts . . . . special knowledge establishes a basis for fraud." *Id.* Thus, most simply, "[s]uperior knowledge by one party may also provide the occasion for fraud."[9] *Faircloth*, 898 S.W.2d at 277; *see also Matis v. Golden*, 228 S.W.3d 301, 307 (Tex. App.—Waco 2007, no pet.) ("When a speaker purports to have special knowledge of the facts, or does have superior knowledge of the facts—for example, when the facts underlying the opinion are not equally available to both parties—a party may maintain a fraud action." (quoting *Paull v. Capital Res. Mgmt., Inc.*, 987 S.W.2d 214, 219 (Tex. App.—Austin 1999, pet. denied))); *Padgett v. Bert Ogden Motor's, Inc.*, 869 S.W.2d 532, 535–36 (Tex. App.—Corpus Christi 1993, writ denied) (concluding statements were actionable representations of fact where body shop employees had "specifically inspected and determined how best to repair [a purchaser's] car" and subsequently represented that the car was "completely repaired" and "completely fixed," even though they only partially repaired the car's frame).

Initially, it defies common sense and any plausible meaning of the word "problem" to infer from the first two representations that in Prudential's "opinion," the sewer gas odor was not a

[9] However one analyzes it, the ultimate question is whether the statement is actionable as fraud. The result may be the same where, as here, special or one-sided knowledge helps one categorize a statement as fact rather than opinion, or instead triggers the exception that even a pure opinion is actionable because of special knowledge.

problem for Hudson's Grill. A foul odor is obviously problematic to a restaurant.[10] Testimony indicated that Powell herself personally experienced the odor and described it as "almost unbearable" and "ungodly." According to its regional manager, Hudson's Grill had even indicated to Powell that it was late in making rent payments because of the odor. In light of the circumstances, we conclude that the statements concealing the odor "problem" are more properly statements of fact, not pure expressions of opinion. *Cf. GJP, Inc. v. Ghosh*, 251 S.W.3d 854, 889–90 (Tex. App.—Austin 2008, no pet.) (determining vehicle seller's statements that he had "no problems [whatsoever]" to be a factual representation where "an inspection revealed structurally unsafe engine frames, corrosion, and serious engine problems"); *Padgett*, 869 S.W.2d at 535–36. Similarly, because of the attempts to remedy the odor by Hudson's Grill, known by Powell, combined with testimony that the odor was not remedied before Hudson's Grill closed, Powell's statement that the restaurant site was "perfect" is better characterized as a false statement of fact. *Cf. GJP, Inc.*, 251 S.W.3d at 889–90 (determining statements that the vehicle was "in fine running order" and that it had "strong mechanicals" to be factual representations).

Even assuming, however, that Powell's statements are properly considered pure expressions of opinion, Prudential's one-sided knowledge of past facts makes these particular representations actionable under the circumstances. *See Faircloth*, 898 S.W.2d at 277; *Trenholm*, 646 S.W.2d at 930. Powell emphasized to Italian Cowboy that she had been working with the restaurant site since its inception, implying that she had personal knowledge of its entire history from her experience—i.e., if there had been something worth mentioning, she would have known about it and

[10] As the trial court wrote in its findings of fact, "[a]s a matter of lay testimony and common sense, recurring unresolved sewer gas odors in a restaurant are a material fact to someone leasing for restaurant use."

mentioned it. Powell's honest representations about her superior knowledge of the site—such as stating that she "was here from the first day when they put the first brick until the last one"—were so intertwined with her other statements that they are actionable. *See Trenholm*, 646 S.W.2d at 931 ("These are direct representations of present facts which are so intertwined with his future prediction that the whole statement amounts to a representation of facts."); *Matis*, 228 S.W.3d at 307. The persistent odor problem did not appear until a layer of solidified grease was removed from the grease trap, meaning that a reasonable inspection of the premises by Italian Cowboy would not have revealed the problem. Thus, Italian Cowboy did not have access to the same information as Powell.

While it is true that Italian Cowboy could have interviewed the former tenant to inquire about prior problems with the property, we are unwilling to require prospective commercial tenants to undertake this burden simply to ensure that they can later bring claims arising from their reliance on representations about the property made by a lessor with superior, personal knowledge. Rather, commercial tenants are entitled to rely on the fact that a landlord will not actively conceal material information. Firsthand knowledge—like Powell's—concerning material information—like an odor problem in a restaurant site—is exactly the sort of scenario that demonstrates the sound policy behind the exception allowing an opinion to be actionable under certain circumstances where material information was withheld.

Prudential also suggests that because the odor played no role in Hudson's Grill's decision to close, Powell had no knowledge of her statements' falsity, i.e., that "Powell had no reason to think that there was any significant 'problem' with the Premises." Even if Powell intended her statement to be limited in this sense, testimony from Hudson's regional manager indicated that he had told Powell that Hudson's Grill was having difficulties paying rent because of the odor problem in the

restaurant. Moreover, Powell's representations went far beyond simply stating that she knew of no problems that caused Hudson's Grill to close. Testimony showed that Powell knew about the odor from personal experience and that the odor problem was never resolved. Thus, even when considering the context of Powell's statements, it follows that her actionable representations implicated Powell in knowing that her statements were false when made.

We conclude that as a matter of law, Powell's representations were actionable, and legally sufficient evidence existed to demonstrate that they were known to be false when made. Because the court of appeals concluded that Italian Cowboy disclaimed reliance, it never reached Prudential's argument as to the factual sufficiency of the evidence supporting Italian Cowboy's fraud claims. Accordingly, having decided that there is no alternative legal basis to render judgment in favor of Prudential on Italian Cowboy's fraud claims, we remand the case to the court of appeals for further consideration.[11]

IV. Breach of the Implied Warranty of Suitability

Prudential next disputes whether the trial court erred in rendering judgment on Italian Cowboy's claim for breach of the implied warranty of suitability, arguing that this claim fails as a matter of law. In a commercial lease, the lessor makes an implied warranty that the premises are suitable for the intended commercial purposes. *Davidow v. Inwood N. Prof'l Group—Phase I*, 747 S.W.2d 373, 377 (Tex. 1988). Specifically, a lessor impliedly warrants that at the inception of the lease, no latent defects exist that are vital to the use of the premises for their intended commercial

[11] Although we affirm the trial court's award of actual damages on an alternative basis—breach of the implied warranty of suitability—as discussed below, only Italian Cowboy's fraud claim gives rise to punitive damages, which the trial court also awarded, and which Prudential continues to dispute. Thus, resolution by the court of appeals of whether factually sufficient evidence supports liability for fraud is a necessary predicate to determining whether punitive damages may be proper. *See* TEX. CIV. PRAC. & REM. CODE § 41.003(c) (allowing recovery of punitive damages for fraud if actual knowledge is further established by clear and convincing evidence).

purpose. *Id.* Moreover, a lessor is responsible for ensuring that "essential facilities will remain in a suitable condition." *Id.* Thus, to establish a breach of this warranty, a lessee must show that a latent defect in the facilities existed at the inception of the lease, that the facilities were vital to the use of the premises for the intended purposes, and that the lessor failed to repair the defect.[12] *See id.* However, if "the parties to a lease expressly agree that the tenant will repair certain defects, then the provisions of the lease will control." *Id.*; *see also Gym-N-I Playgrounds, Inc., v. Snider*, 220 S.W.3d 905, 914 & n.1 (Tex. 2007) (holding that the implied warranty of suitability was disclaimed by an agreement providing that the landlord made no express or implied warranties regarding "fitness or suitability for a particular purpose or otherwise" and that "any implied warranties are expressly disclaimed and excluded"). Thus, by accepting responsibility to repair certain defects, a lessee relieves the lessor from liability for breach of the implied warranty of suitability as to those defects. *See Davidow*, 747 S.W.2d at 377. We must begin, then, by interpreting the lease contract at issue to determine the extent to which it relieved the lessor from liability for the implied warranty of suitability.

Here, Italian Cowboy did not expressly waive the implied warranty of suitability. However, it did accept responsibility to make certain repairs that might otherwise have run to Prudential as a result of the implied warranty of suitability. The parties dispute whether Italian Cowboy's responsibilities under the lease included repairs to the particular defect in the premises—the sewer gas odor, or its cause. Thus, there are two parts to this inquiry: first, what was the defect; and second, whether the lease allocated the responsibility to repair that defect to Italian Cowboy.

---

[12] We offer no opinion as to whether an action may exist for harm resulting from a latent defect during the period of time before a landlord successfully repairs a defect. Here, there is no dispute that the defect was not remedied—and no evidence suggested it would likely be remedied any time soon—when Italian Cowboy closed and sued Prudential.

As to the first part of this inquiry, concerning a latent defect in the premises, we observe that "[t]he existence of a breach of the implied warranty of suitability in commercial leases is usually a fact question to be determined from the particular circumstances of each case." *Id.* While Italian Cowboy characterizes the defect as the presence of the odor itself, we agree with Prudential that the proper analysis of the defect in this particular case must inquire into the cause of the odor because this is the condition of the premises covered by the duty to repair. Thus, we examine first the trial court's findings of fact as to the causes of the odor, and whether such findings are supported by legally sufficient evidence.

Italian Cowboy offered uncontroverted evidence that a grease trap had been improperly installed, causing raw sewage to back up from the sewer lines. Indeed, testimony indicated that the persistent odor problem emerged when the inlet to the grease trap was opened months into Italian Cowboy's renovations. Moreover, testimony indicated that after the subsequent tenant leased the restaurant space, it severed the wastewater piping to the grease trap and moved the kitchen area to a new part of the building, blocking off the old wastewater system entirely and eliminating the odor. This evidence is legally sufficient to support the trial court's finding of fact that "the facilities producing the sewer gas odor . . . included the grease interceptor in the Common Areas adjacent to the Premises, [and] the waste-water and sanitary sewer utility lines in the Common Areas adjacent to the Premises." Prudential also offered uncontroverted evidence that a roof drain line had been misrouted, as well as that a sewer gas line was "hooked up at the wrong line going to the roof," and that after correcting these errors, along with raising vent stacks on the roof, the subsequent tenant experienced no further odor. This evidence is legally sufficient to support the trial court's finding that the sewer gas odor was also produced by "communication of the odors [from the grease trap and

sewer lines] via structural components and via the utility lines or systems serving and within the Premises which ultimately had to be altered (not just repaired) to arrest the sewer gas odor." In other words, the trial court concluded, by legally sufficient evidence, that several items—the grease trap, the plumbing lines and system, and the ventilation lines and system—caused the odor, either independently or in conjunction, because each was defective.

Our analysis turns next to whether under the lease contract, as a matter of law, Italian Cowboy assumed responsibility to repair each defect, relieving Prudential from liability for a breach of the implied warranty of suitability based on each defect. The contract provides in relevant part:

- 1.1 "Common Areas" - [Defined as] [t]hose areas, facilities, utilities, improvements, equipment and installations in the Shopping Center which are provided, or which may be designated by the Landlord, for the nonexclusive use or benefit of Landlord and tenants of the "Shopping Center," their employees, agents, customers, licensees and invitees, including but not limited to the parking areas, driveways, entrance/exitways, sidewalks, landscaped areas, water, gas (if available), electric, storm and sanitary sewer lines and appurtenant equipment.

- 5.1 Alterations by Tenant. Tenant shall not make any exterior or structural alterations to (including but not limited to alterations to the Premises exterior, or signs and/or utility lines or systems within or serving the Premises) without Landlord's prior consent . . . .

- 5.2 Repairs by Landlord and Tenant. Landlord shall make all repairs to the Common Areas adjacent to the Premises (other than the Premises and its perimeter sidewalks) as part of its obligation to maintain the Common Areas. Landlord shall also be responsible for repairs to structural components of the Premises (other than the roof). Tenant shall, at its expense, be responsible for all repairs to the interior and non-structural components of the Premises, including but not limited to the exterior and interior of the Premises and its perimeter sidewalks, whether structural or non-structural, foreseen or unforeseen, including but not limited to the storefront and all interior and exterior doors and plate glass, and all electrical, plumbing, heating, ventilating, air conditioning, sprinkler systems, and any other mechanical installations or equipment serving the Premises or located therein, whether or not in or under the floor slab or on the roof of the Premises. The duty to

> repair shall include the duty to replace, to the extent necessary. . . . Tenant shall also be responsible for regular cleaning of all grease traps and maintaining them in a safe condition. . . .

We observe at the outset that these provisions are in tension with one another, at one point allocating responsibility for repairs to the "water . . . storm and sanitary sewer lines and appurtenant equipment" to Prudential, while at another point allocating responsibility for repairs to the "plumbing . . . and ventilating" systems and "mechanical installations or equipment serving the Premises" to Italian Cowboy. We also observe, however, that while Italian Cowboy may have assumed at least some duty to repair, it was at the same time expressly precluded from making alterations to utility lines or systems without consent. Although the court of appeals did not discuss it, the trial court credited this distinction, finding the fact that "structural components and . . . utility lines or systems serving and within the Premises . . . ultimately had to be altered (not just repaired) to arrest the sewer gas odor." More specifically, the trial court found that the particular work done by the subsequent tenant that finally arrested the sewer gas odor problem qualified as "alterations" to the facilities described in section 5.1 of the lease.

The contract distinguishes between repairs and alterations, without defining the terms, and principles of contract interpretation require us to give effect to these distinctions, harmonizing their use in a meaningful way. *See JM Davidson, Inc.*, 128 S.W.3d at 229 ("[W]e must examine and consider the entire writing in an effort to harmonize and give effect to all the provisions of the contract so that none will be rendered meaningless."). To harmonize the repair and alteration provisions, the terms must refer to different categories of work that vary according to the work's character or extent. The trial court thus impliedly found that the work in question was of a character, or to a significant enough extent, that the work constituted an alteration. Indeed, the trial court was

in the best position to consider the evidence as to the character and extent of the work done by the subsequent tenant.

Because of the character and significant extent of the completed work that ultimately eliminated the odor, we agree that an alteration was needed as the term is used in section 5.1 of this particular contract, going beyond a repair as used in section 5.2. It was not the case that the sewer gas exhaust line on the roof was damaged and needed to be fixed. The problem was that the sewer gas exhaust line was working exactly as it was supposed to, as were components of the ventilation system, which had been placed near the sewer gas exhaust pipe. This suggests that the work was more than a repair to fix a broken system. Had a pipe become broken, it would have been Italian Cowboy's responsibility to patch it or replace it. But since the piping system had to be entirely rerouted, and vent stacks raised, Prudential was responsible for such alterations because Italian Cowboy was precluded from doing such work by section 5.1 without consent.[13] Likewise, the subsequent tenant severed the existing wastewater piping system and moved the kitchen to a new area of the building, abandoning the former grease trap. Again, such work amounts to more than a mere repair of broken equipment.[14]

Moreover, under section 5.2, Prudential had the express obligation to "maintain" the common areas, including the sanitary sewer lines and appurtenant equipment. Evidence showed that certain defects—essentially, a defective design—existed from the moment of the sewer system's installation, as it interacted with the grease trap and ventilation system. Thus, the responsibility for the work

[13] This work was performed by the subsequent tenant. Any questions of who was responsible for such work under that tenant's lease are not before us.

[14] Although we interpret the contract's provisions as a matter of law, we note that a plumber who attempted at various times to remedy Italian Cowboy's odor problem described the work done by the subsequent tenant as "structural alterations" at trial.

done to resolve the defects properly falls under Prudential's duty to maintain a working sewer system, not Italian Cowboy's responsibility to repair a previously working sewer system. The responsibility to maintain a system must contemplate the installation of a functional system in the first place; the responsibility to repair does not properly include the responsibility to completely re-work a system that was structurally defective. Prudential, then, was also responsible under its lease with Italian Cowboy for the work to remedy the defect because the responsibility to maintain sewer lines and equipment fell to Prudential under section 5.2.

Thus, we conclude that Prudential was not relieved by the contract from liability for breach of the implied warranty of suitability as to a latent defect in facilities that were vital to Italian Cowboy's use of the premises as a restaurant. Accordingly, we reverse the judgment of the court of appeals as to this claim. Moreover, because Prudential did not challenge the factual sufficiency of the evidence supporting any of the trial court's findings of fact on this issue in the court of appeals, and because the evidence supporting such findings is legally sufficient, we render judgment in favor of Italian Cowboy as to this claim.

Prudential asserts that even if rescission might have been proper at some point, Italian Cowboy ratified the lease by continuing in the lease for a period of time after having knowledge of the defect. However, even were we to consider ratification as a defense to breach of the implied warranty of suitability,[15] Italian Cowboy's actions in this case could not give rise to ratification. Texas law requires only that one rescind within a reasonable time from discovering the grounds for

[15] Prudential offers this argument as a defense to a claim for rescission based on unilateral or mutual mistake—a claim that we do not reach. However, inasmuch as ratification has been a defense to rescission more generally, we consider it here as it relates to all of Italian Cowboy's claims upon which rescission could be premised, without deciding whether ratification might be available as a defense against one asserting only a claim for breach of the implied warranty of suitability.

rescission. *Reagan & Co. v. Tabor*, 540 S.W.2d 575, 576 (Tex. Civ. App.—Waco 1976, writ ref'd. n.r.e.) ("[A] party is not required to exercise his right to rescind 'as soon as' he discovers grounds therefor, but only within a reasonable time."). Ratification by failure to act with reasonable promptness is an affirmative defense, with the burden upon the party asserting it. *See Crown Eng'g v. Grissom*, 343 S.W.2d 330, 332 (Tex. Civ. App.—Waco 1961, writ dism'd) ("The fact that the party seeking rescission failed to act with reasonable promptness after discovery of the facts, constitutes a waiver of his right to a rescission, and is an affirmative defense which must be pleaded and proven by the party asserting same." (emphasis omitted)) (citing TEX. R. CIV. P. 94, which lists affirmative defenses including "waiver, and any other matter constituting an avoidance"). "Time is material so far only as, when associated with other circumstances, [rescission] may produce injury or unjust consequences to the defendant or third persons." *Vandervoort v. Sansom*, 293 S.W.2d 271, 275 (Tex. Civ. App.—Fort Worth 1956, writ ref'd. n.r.e.) (discussing rescission and ratification in the context of fraudulent inducement).

Here, Prudential has failed to establish ratification. Foremost, it points to no way in which it was injured or suffered unjust consequences by Italian Cowboy's temporary efforts alongside Prudential to remedy the odor. *See id.* Moreover, Prudential has not established that Italian Cowboy waited an unreasonable length of time to terminate the lease. The latent defect was not yet remedied—indeed, the underlying cause(s) of the odor remained unknown—when Italian Cowboy closed and stopped paying rent, only a few weeks after the persistent odor materialized.[16] According to the Secchis' testimony, such a remedy did not seem likely, if even possible, at that time. Were

[16] We observe that Prudential here conflates separate incidents of odor problems during the course of Italian Cowboy's tenancy, despite the testimony that Italian Cowboy's initial odor problems, during the early part of its renovations, were separate from the persistent sewer gas odor problem that materialized upon opening of the grease trap.

we to find the attempts made here to remedy the defect sufficient to foreclose the possibility of rescission because of ratification, similarly-situated commercial tenants would be placed in the difficult position of being pushed to abandon a lease at the first sign of any trouble, so as to avoid potentially being trapped in a lease of property containing a defect rendering it unsuitable for commercial purposes. This is unsound policy; we must allow a balance between making initial attempts to diagnose and remedy a premises defect while preserving the right to rescind a lease if such attempts are unsuccessful. Thus, we conclude that under the facts of this case, Prudential has not established that Italian Cowboy's remaining in occupancy, while both parties made unsuccessful attempts to remedy the odor, gives rise to ratification of the lease contract after Italian Cowboy acquired knowledge of the defect.

The trial court awarded both rescission of the lease and damages to restore Italian Cowboy to the position it would have been in absent Prudential's breach of warranty. Rescission of a commercial lease is indeed a proper remedy for breach of the implied warranty of suitability, as are such damages. *See Davidow*, 747 S.W.2d at 377 (stating that because a landlord breached the implied warranty of suitability, the tenant "was therefore justified in abandoning the premises and discontinuing his rent payments"); *accord Gober v. Wright*, 838 S.W.2d 794, 798–99 (Tex. App.—Houston [1st Dist.] 1992, writ denied) ("[W]e upheld the jury's finding that the premises were unsuitable for their intended commercial purposes after June 2, 1988. This finding relieved lessees from their obligation to pay any rent after that date."), *abrogated on other grounds by State Farm Fire & Cas. Co. v. Morua*, 979 S.W.2d 616 (Tex. 1998). Accordingly, because rescission is proper, we need not consider further Italian Cowboy's remaining claims for negligent misrepresentation, constructive eviction, or rescission based on mistake, inasmuch as they afford no

opportunity for greater recovery. We turn next, however, to the issues that Prudential raises as to the amount of actual damages awarded by the trial court in light of rescission being a proper remedy for Prudential's breach of the implied warranty of suitability.

V. Damages

For its actual damages calculation, the trial court added the amount of capital Italian Cowboy's investors contributed, including interest ("interest carry") that the investors would have earned on that investment, as well as the debt Italian Cowboy incurred, then subtracted the value of the remaining assets that Italian Cowboy acquired, to reach a sum of $600,070.40. Prudential asserts that the actual damages award for loss of capital investment is an award of special damages that is unsupported because such damages were never pled, and because such an amount is unsupported by legally sufficient evidence.[17] We review Prudential's arguments as to the pleading requirement and legal sufficiency in turn.

"Rescission is an equitable remedy and, as a general rule, the measure of damage is the return of the consideration paid, together with such further special damage or expense as may have been reasonably incurred by the party wronged on account of the contract." *Smith v. Nat'l Resort Cmtys., Inc.*, 585 S.W.2d 655, 660 (Tex. 1979). Under Texas Rule of Civil Procedure 56, "[w]hen items of special damage are claimed, they shall be specifically stated." However, Texas Rule of Civil Procedure 90 states:

> Every defect, omission or fault in a pleading either of form or of substance, which is not specifically pointed out by exception in writing and brought to the attention of

[17] We note that most of Prudential's briefing on this point speaks to the factual sufficiency of the evidence, which we may not review, not the legal sufficiency. *See* TEX. CONST. art. V, § 6(a) ("[T]he decision of . . . courts [of appeals] shall be conclusive on all questions of fact brought before them on appeal or error.").

> the judge in the trial court . . . in a non-jury case, before the judgment is signed, shall be deemed to have been waived by the party seeking reversal on such account . . . .

Here, Prudential never filed a special exception in writing, and only filed written objections after the judgment was signed. Indeed, the only oral objection during trial that Prudential directs us to concerned testimony on lost profits, not lost investment, at which point the trial court allowed continued testimony on the damages data from both Jane Secchi and Italian Cowboy's expert. A party is not required to specially except to a pleading defect if it lacks notice of the other party's intent. *See Estate of Stonecipher v. Estate of Butts*, 686 S.W.2d 101, 103 (Tex. 1985) (holding that where "intent to seek other causes of action was clear on the face of his petition," and no special exceptions or other contests were made to the petition as to such a defect, the other party "waived this point of error"); *Roark v. Allen*, 633 S.W.2d 804, 810 (Tex. 1982) ("A petition is sufficient if it gives fair and adequate notice of the facts upon which the pleader bases his claim. The purpose of this rule is to give the opposing party information sufficient to enable him to prepare a defense."). Here, however, the trial court had conducted a hearing more than a year and a half before trial regarding the admissibility of Italian Cowboy's expert's testimony including lost investment damages, and ruled that the expert could testify. Thus, under Rule 90, having notice of the specific damages Italian Cowboy intended to seek, Prudential waived its argument as to the inclusion of lost investment damages in the trial court's award by failing to specially except in writing to any pleading defect. *See* TEX. R. CIV. P. 90; *Roark*, 633 S.W.2d at 810 ("If Dr. Matthews considered the petition obscure, he should have specially excepted to it and he has waived any defect by his failure to do so."). We need not consider whether Italian Cowboy's pleading was defective in this regard.

Prudential next challenges the legal sufficiency of the evidence that its breach of warranty caused the special damages of Italian Cowboy. When rescission of a lease is appropriate for breach of the implied warranty of suitability, a tenant is entitled to be restored to the position it would have been in had it not leased the premises that turned out to contain a latent defect rendering the premises commercially unsuitable. *See Smith*, 585 S.W.2d at 660 (discussing how rescission is an equitable remedy that should accompany "such further special damage or expense as may have been reasonably incurred by the party wronged on account of the contract"). Thus, by electing rescission, Italian Cowboy did not need to prove that its damages were *caused* by the latent defect; it needed only to prove what amount would restore it to its original position. Italian Cowboy offered detailed expert testimony as to the amount required to make it whole. This is legally sufficient evidence as to the amount of damages Italian Cowboy was entitled to recover alongside rescission of the lease.[18]

Prudential also disputes three specific elements constituting a portion of Italian Cowboy's damages. We reject those arguments. First, the trial court concluded that Italian Cowboy was entitled to recover $81,000 based on the time and effort put in by the Secchis because evidence demonstrated that this "investment" was made in lieu of hiring other personnel. *See Tidrow v. Roth*, 189 S.W.3d 408, 411 (Tex. App.—Dallas 2006, no pet.) (observing that trial court had awarded damages for an investor's "time and effort"); *cf. Weaver v. Jock*, 717 S.W.2d 654, 661 (Tex.

[18] Again, we offer no opinion as to whether a tenant might elect instead to ratify the lease upon a breach of the implied warranty of suitability, and if so, whether it might be able to recover any damages; or whether a tenant might recover any damages incurred before a landlord repairs the latent defect. *Cf. Dallas Farm Mach. Co. v. Reaves*, 307 S.W.2d 233, 238–39 (Tex. 1957) ("[I]t is well settled that one who is induced by fraud to enter into a contract has his choice of remedies. 'He may stand to the bargain and recover damages for the fraud, or he may rescind the contract, and return the thing bought, and receive back what he paid.'" (quoting *Blythe v. Speake*, 23 Tex. 429, 436 (1859))). *But cf. Fortune Prod. Co. v. Conoco, Inc.*, 52 S.W.3d 671, 677 (Tex. 2000) (discussing the "intricacies of the remedies for fraud" and observing that "a party may affirm a contract that has been induced by fraud in such a way that damages are foreclosed.").

App.—Waco 1986, writ ref'd. n.r.e.) (affirming damages for services and labor expended in performance of a contract). Prudential offers no authority as to why this award was improper. Certainly a business owner's time and effort have value, and we see no reason why the trial court could not measure that value against the cost of hiring someone else instead. Accordingly, we are unwilling to strike this portion of Italian Cowboy's damages.

Prudential next argues that Italian Cowboy is not entitled to recover damages for accounts payable—$94,512.47 of the total damages calculation—because there is "no evidence that any of the creditors is seeking payment." But in this situation, where damages are proper in order to retire debt that would not have otherwise existed, we conclude that the burden is properly on Prudential to demonstrate that any such debts have been excused. Prudential points to no such evidence.

Finally, Italian Cowboy is entitled to recover the trial court's award of $27,505 for interest carry. The record shows that this figure represents what Italian Cowboy's damages expert called "an investment pay back calculation," which we take to mean the interest that Italian Cowboy's investors—the Secchis—would have earned on their investment had they made it elsewhere. Prudential suggests that this amounts to a double recovery because such "payment of interest would have been made from Italian Cowboy's assets," and therefore such interest was already "included in the difference between Italian Cowboy's initial assets and its assets when the restaurant closed." The logic of this position escapes us. Italian Cowboy could not have both paid interest or dividends from its assets and kept that money as an asset, which was a deduction in the trial court's calculation, not a credit as Prudential seems to suggest. More to the point, Prudential points to nothing indicating that the money invested in Italian Cowboy could not have earned interest elsewhere, or that its investors already received such payments.

We thus conclude that Italian Cowboy established its actual damages for breach of the implied warranty of suitability by legally sufficient evidence. Because Prudential also challenges the factual sufficiency of these damages, on remand, the court of appeals should consider any such remaining issues as to Italian Cowboy's rescission damages.

VI. Conclusion

We reverse the court of appeals' judgment and render judgment in favor of Italian Cowboy on its claim for rescission premised on Prudential's breach of the implied warranty of suitability. We remand the case to the court of appeals for additional consideration consistent with this Court's opinion.

OPINION DELIVERED: April 15, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-0989

ITALIAN COWBOY PARTNERS, LTD.,
FRANCESCO SECCHI AND JANE SECCHI, PETITIONERS,

v.

THE PRUDENTIAL INSURANCE COMPANY OF AMERICA AND
FOUR PARTNERS, LLC D/B/A PRIZM PARTNERS AND
D/B/A UNITED COMMERCIAL PROPERTY SERVICES, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE ELEVENTH DISTRICT OF TEXAS

Argued April 14, 2010

JUSTICE HECHT, joined by JUSTICE WILLETT and JUSTICE GUZMAN, dissenting.

Francesco and Jane Secchi owned and operated two successful Dallas-area restaurants. Italian Cowboy was to be the third. To find just the right location, they secured a broker, conducted demographic studies, examined restaurant reports by the Texas Alcoholic Beverage Commission, and viewed many potential sites. They learned that a restaurant was closing in the Keystone Park Shopping Center, an area they liked. They had eaten at other restaurants in the shopping center, and they found out those restaurants were operating profitably. They met with the landlord's agent, and for five months, assisted by their attorney, they negotiated a lease. In the meantime, they inspected

the property repeatedly, sometimes with the agent present and sometimes by themselves. The lease went through seven drafts. The Secchis had been in the restaurant business twenty-five years. This was not their first rodeo.

On October 18, 2000, Francesco Secchi signed a lease on behalf of the tenant, Italian Cowboy Partners, Ltd. Not quite nine months later, on July 12, 2001, the Secchis sued the landlord, Prudential Insurance Co., and its agent, Prizm Partners.

The lease stated:	The petition stated:
Tenant acknowledges that neither Landlord nor Landlord's agents, employees or contractors have made any representations or promises with respect to the Site, the Shopping Center or this lease except as expressly set forth herein.	Italian Cowboy Partners and the Secchis reasonably and detrimentally relied on the representations of Prudential and Prizm that the Premises were suitable for use as a restaurant and were a prime restaurant site.

Each statement is a statement of *fact*, like "the sun is shining" or "the sky is blue". In the lease, Italian Cowboy stated that Prudential and Prizm *did not make* representations other than those contained in the lease. In the petition, Italian Cowboy stated that Prudential and Prizm *did make* representations, representations that were not contained in the lease. Both statements cannot be true. Either representations not contained in the lease were made, or they were not made.

The Secchis knew full well whether the statement in the lease was true when they made it. They were Italian Cowboy's only representatives. They do not claim to have been mistaken — that representations made by Prudential and Prizm were supposed to have been included in the lease but were inadvertently omitted by mistake. They do not claim to have been tricked — that important provisions were surreptitiously removed from the lease before Francesco signed it. The Secchis do

not contend that after studying seven drafts of the lease with their lawyer, they just forgot to include representations that Prudential and Prizm had made about the suitability of the site for use as a restaurant. They do not plead that they were only rubes duped into stating something that was not true. The lease stated the facts as the Secchis knew them to be: representations not included in the lease were not made.

And that is exactly what Frances Fox Powell, the person who dealt with the Secchis for Prudential and Prizm, testified to at trial. The Secchis testified, contrary to the lease, that Powell had told them the building was "problem-free", that previous tenants had "no problems" with the building, and that it was a "perfect building". Asked at trial whether she had told the Secchis "that the building was in perfect condition", she answered, "No." Had she made "any misrepresentations concerning the condition of the building?" "No." Had "a sewer gas odor ever [been] pointed out . . . or mentioned . . . as being present" by the general manager of the restaurant that had vacated the premises before Italian Cowboy leased them? "No." Powell testified that the Secchis' first mention of an unpleasant odor was in February 2001. She testified:

> Q At any time prior to the closing of the restaurant permanently and the filing of this lawsuit, did either Mr. or Mrs. Secchi ever come to you and say, "Mrs. Powell, you failed to tell us something about this restaurant that was significant", or "there was something about this restaurant that you told us that proved to be contrary". Did that ever take place?
>
> A No.
>
> Q In December, January, February, March, April, May, June up through July, did Mr. and Mrs. Secchi and you have any conversation where it was suggested to you that you had made a statement to them that had proven to be untrue?
>
> A No.

Q Or that you failed to disclose something to them?

A No.

Had she concealed anything she knew about the premises from the Secchis? "No." Had she deceived them in any of her dealings with them? "No." Had she "always [been] truthful with them"? "Yes."

Of course, as the Court notes, Powell's testimony was rejected by the trial court, as reflected in its findings of fact and judgment. But the issue is not whether Powell was truthful or whether there is evidence to support the judgment. Powell's testimony cannot be ignored because it establishes that the parties now dispute *a fact* — what representations were made — about which they unquestionably agreed at the time they inked the lease. The issue is whether the law allows a sophisticated party in a commercial transaction, represented by counsel, with full knowledge of all the circumstances, without mistake or duress of any kind, to include in a contract a statement of fact that is important to the other party, and later disavow it as having been false at the time it was made. Italian Cowboy and the Secchis can prevail on their fraud claim only if they successfully defrauded Prudential and Prizm. Can a party claim fraud based on his own fraud?

The Court ignores this issue and presents instead the question "whether the lease agreement disclaims reliance on representations made by Prudential, negating an element of Italian Cowboy's fraud claim."[1] Since the lease says absolutely nothing about reliance, this is a pretty easy question to answer, and the Court's poor strawman does not put up much of a struggle before being

[1] *Ante* at ___.

demolished. As the Court observes, the law has long been skeptical of a party's agreement, sometimes referred to generally as a merger clause, not to rely on statements made by the other party outside the contract. Experience teaches that people are often not as serious as they should be in agreeing to such provisions. That, the Court concludes, is the situation we have here. Italian Cowboy intended nothing by its statement in the lease other than a merger clause; merger clauses often use similar language; merger clauses do not effectively disclaim reliance; and therefore, Italian Cowboy's statement does not disclaim reliance.

At the risk of appearing a stickler, I think what matters is the statement Italian Cowboy made, not what it may have intended would result. Even if intent were important in this situation, one cannot say the word "none" and intend by it to mean the word "some". In the Court's view, by stating that Prudential and Prizm had not "made any representations", Italian Cowboy either meant the exact opposite — that Prudential and Prizm had made *some* representations — or it meant nothing at all.

The principal authority on which the Court relies is our 1957 decision in *Dallas Farm Machinery Co. v. Reaves*,[2] so its facts are worth recounting. Reaves traded in his two Ford tractors and loaders for a new Oliver tractor and loader on the strength of a salesman's representations that the new equipment would do a better job faster.[3] After trying out the new machinery for 45 minutes,

[2] 307 S.W.2d 233 (Tex. 1957).

[3] *Dallas Farm Mach. Co. v. Reaves*, 300 S.W.2d 180, 181 (Tex. Civ. App.–Fort Worth 1957), *aff'd*, 307 S.W.2d 233 (Tex. 1957).

Reaves concluded it was worthless and the representations were false.[4] He demanded the return of his old equipment. Dallas Farm Machinery refused and sued for the balance due on the contract.[5] The contract was a one-page form with a provision on the back warranting that the goods sold were "well made and of good material", agreeing to replace defective parts for six months, and stating: "This warranty is made in lieu of all other warranties, express or implied, and no warranty is made or authorized to be made other than herein set forth."[6] The Court held that this provision did not preclude Reaves's counterclaim for rescission based on fraudulent inducement.[7] The Court did not suggest that Reaves was familiar with the capabilities of the equipment he bought — on the contrary, it was his lack of familiarity with the Oliver equipment that led to his complaints — or that the contract was negotiated, or that he was represented by counsel.

Reaves recognizes the reality that parties do not always pay attention to contractual provisions or recognize their consequences. But in three cases since — *Prudential Insurance Co. of America v. Jefferson Associates, Ltd.*,[8] *Schlumberger Technology Corp. v. Swanson*,[9] and *Forest Oil Corp. v. McAllen*[10] — we have refused to apply *Reaves* absolutely when sophisticated parties

[10] 268 S.W.3d 51, 58 (Tex. 2008).

represented by legal counsel negotiate commercial agreements. The Court acknowledges that the *Reaves* rule has exceptions, but only if parties choose clear and unequivocal language and disclaim reliance on representations rather than the existence of representations. The contracts in *Schlumberger* and *Forest Oil* both stated that "no promise or agreement which is not herein expressed has been made",[11] provisions substantively indistinguishable to Italian Cowboy's acknowledgment that neither Prudential nor its agents had "made any representations or promises . . . except as expressly set forth" in the lease. But the parties in *Schlumberger* and *Forest Oil* added that they were not "relying upon any statement or representation" of any other party but were instead "relying on [their] own judgment".[12] According to the Court, the contracts in *Schlumberger* and *Forest Oil* precluded fraud claims only because they used the word "relying", which Italian Cowboy's lease did not do.

The requirement that parties use clear and unequivocal language helps ensure that they will understand the import of their contractual statements, so it is surprising that the examples the Court offers are provisions in which the language is internally inconsistent. The parties in *Schlumberger* and *Forest Oil* agreed that no representations had been made and that they were not relying on ones that had been made. For lawyers accustomed to pleading in the alternative, this may make perfect sense, but someone less flexible might have more trouble understanding how representations were both made and not made. A flat-out averment like Italian Cowboy's, that no representations were

[11] *Forest Oil*, 268 S.W.3d at 54 n.4; *Schlumberger*, 959 S.W.2d at 180.

[12] *Forest Oil*, 268 S.W.3d at 54 n.4; *Schlumberger*, 959 S.W.2d at 180.

made, period, is surely clearer and less equivocal than a statement that representations were not made, or if they were, they were not relied on.

The Court's preference for a disclaimer of reliance over a disclaimer of representations is simply a mystery. According to the Court, a party who states (somewhat equivocally) that although representations may have been made, he is not relying on any of them, should be held to his word and his later claim of fraud foreclosed. But a party who unequivocally denies that any representations were made to induce his agreement, other than those in the agreement itself, may later sue for fraud on representations he denied were ever made. For purposes of forestalling litigation, his denial is essentially void. If the Court has any reason for distinguishing between the two disclaimers, it is nowhere explained.

It may not matter. In a footnote, the Court warns that even "a clear and unequivocal disclaimer of reliance" may not be "binding on the parties involved", depending on "the circumstances".[13] When would such a disclaimer not be binding? According to the Court, whenever the parties have not discussed during their negotiations the substance of the later-alleged misrepresentation — in this case, the unpleasant odor on the premises.[14] But Italian Cowboy, Prudential, and Prizm all claim they knew nothing about the odor before the lease was signed. Since Italian Cowboy had had every opportunity to inspect the premises and discuss their suitability with prior restaurant tenants, the purpose of the disclaimer was to avoid disputes over such matters after the contract was signed. The trial court did not believe Prudential and Prizm, but if it had, the

[13] *Ante* at ___ n.8.

[14] This is one of several instances cited by the Court in which a disclaimer would not be binding.

discussion the Court would require to uphold the disclaimer would have been impossible, and the disclaimer would not have precluded the lawsuit. In the Court's view, a clear and equivocal disclaimer of reliance is effective only if no dispute arises after the contract was signed that was not discussed beforehand. Otherwise, the Court gives parties but one choice: litigate.

I would hold Italian Cowboy to the statement it made in the lease when it was completely capable of being accurate, ably counseled, and fully incentivized: "neither Landlord nor Landlord's agents, employees or contractors have made any representations or promises with respect to the Site".[15] Italian Cowboy's recourse should lie solely in its claim for breach of an implied warranty of suitability. But that claim, too, is precluded by Italian Cowboy's agreement. In the lease, it agreed to "be responsible for all repairs to the interior and non-structural components of the Premises, including but not limited to the interior . . . , and all . . . ventilating . . . systems . . . ." I disagree with the Court that work necessary to remedy the odor in the premises fell outside this responsibility. In fact, the odor was later remedied, by the restaurant-tenant who succeeded Italian Cowboy, by repairs to the interior, including the ventilating systems.

The Court's depreciation of the written word in this case is troubling and exacts a high price, not only to the parties here, but to all who are denied the right to negotiate freedom from uncertain, unending litigation. This case was filed in July 2001, over nine years ago. Were Italian Cowboy

[15] Apparently confused about the issues in the case, the Court mischaracterizes the dissent and Prudential as arguing that a merger clause excuses parties from "hav[ing] to disclose known defects". *Ante* at ___. This case does not involve an issue of nondisclosure. Italian Cowboy claims that Prudential made affirmative misrepresentations that were fraudulent, not that it failed to disclose information. "Failing to disclose information is equivalent to a false representation only when particular circumstances impose a duty on a party to speak, and the party deliberately remains silent." *In re Int'l Profit Assocs., Inc.* 274 S.W.3d 672, 678 (Tex. 2009) (citing *Bradford v. Vento*, 48 S.W.3d 749, 755 (Tex. 2001), and *SmithKline Beecham Corp. v. Doe*, 903 S.W.2d 347, 353 (Tex. 1995)). Italian Cowboy does not assert that Prudential was under such a duty in negotiating the lease.

bound by its statements in the lease, its fraud claim could have been quickly dismissed, leaving only the warranty claim and the simpler issue of how the lease allocated responsibility for repairing a problem like the odor. The case has already been to this Court once before, with Italian Cowboy arguing unsuccessfully that its agreement to waive a jury was not binding — other words it used and didn't mean.[16] The trial court's judgment, rendered in 2005, awarded Italian Cowboy $650,700.40 in damages and $705,000 attorney fees. With interest, the judgment is well now over $2 million. The case is remanded for its third hearing in the court of appeals. A new trial is still a possibility. The cost and delay are no one's fault; they are simply the price the system exacts for the denial of freedom of contract. The law should allow willing and able parties to avoid a litigation toll-tax and agree to greater certainty in their dealings. Because today's opinion refuses that opportunity, I respectfully dissent.

Nathan L. Hecht

SUSAN COMBS, SUCCESSOR-IN-INTEREST TO CAROLE KEETON STRAYHORN,
COMPTROLLER OF PUBLIC ACCOUNTS, AND GREG ABBOTT, ATTORNEY GENERAL
OF TEXAS, RESPONDENTS

4444444444444444444444444444444444444444444444444444
ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS
4444444444444444444444444444444444444444444444444444

Argued April 15, 2010

JUSTICE MEDINA delivered the opinion of the Court.

JUSTICE HECHT and JUSTICE GUZMAN did not participate in the decision.

This appeal arises from a franchise tax dispute involving the apportionment of receipts from the licensing of geophysical and seismic data to customers in Texas. The taxpayer complains that the Comptroller has mischaracterized these receipts as Texas business and thereby has erroneously increased its franchise tax burden. At issue is whether these receipts should be categorized as receipts from the use of a license or as receipts from the sale of an intangible asset. If the receipts are from the use of a license, then the Comptroller has correctly assessed the tax. If the receipts are from the sale of an intangible, then the Comptroller has erred in assessing additional taxes because

receipts from the sales of intangibles are Texas receipts only if the legal domicile of the payor is Texas.

The lower courts concluded that the Comptroller had appropriately characterized the revenue as receipts from the use of a license in Texas and therefore correctly assessed the additional taxes. 268 S.W.3d 637 (Tex. App.—Austin 2010). We disagree and reverse and remand to the trial court for further proceedings.

I. Background

The taxpayer is TGS-NOPEC Geophysical Company ("TGS"), a Delaware Corporation with its principal place of business in Houston, Texas. It gathers, interprets, and markets seismic and geophysical data regarding subsurface terrains worldwide with sophisticated seismic equipment and software technology. TGS collects and stores this data in a master library and licenses various parts of the library to customers who use the licensed data to evaluate oil and gas formations for drilling operations. TGS requires its customers to enter into a master license agreement, which governs the parties' rights and obligations. The master license agreement describes TGS's seismic data as proprietary information and as valuable and highly confidential trade secrets. The master license agreement also states that TGS retains title to the seismic data and that it only licenses the limited use of the information to its customers.

When a customer wants to access data for a particular location, TGS and the customer enter into a specific license agreement under the master license agreement. TGS generally charges its customers a flat fee to access data under these specific license agreements and does not receive any additional payments, such as royalties. TGS delivers the data to its customers in tangible media forms such as magnetic tapes, printed materials, or film. Each piece of data provided by TGS includes the following notice:

> These data are owned by and are trade secrets of [TGS]. The use of these data is restricted to companies holding a valid use license from [TGS] and is subject to the strict confidentiality requirements of that license. The data may not be disclosed or transferred except as expressly authorized by the license. Unauthorized disclosure, use, reproduction, reprocessing or transfer of this data by or to a third party is strictly prohibited.

The licensing agreements are nonexclusive, and TGS may license the same data to multiple customers. Its customers receive unlimited access to the data under the specific license purchased, but they cannot disseminate the information to third parties, nor is the license transferrable.

The Comptroller audited TGS in 2004 for the 1997-2000 and 2001-2003 tax years and concluded that TGS owed additional franchise taxes, penalties, and interest. The audit deficiency arose from the Comptroller's determination that, for apportionment purposes, a significant amount of TGS's receipts should have been characterized as Texas receipts rather than non-Texas receipts. This caused a larger percentage of TGS's earned surplus and taxable capital to be subject to the franchise tax. The contested gross receipts are revenue that TGS received from licensing its seismic data to customers in Texas. TGS characterized these receipts as revenue from the sale of intangibles. TGS reported some of these receipts as coming from "other business done in the state," but the bulk of these receipts were reported as falling outside the category of business done in Texas. Receipts from the sale of intangibles are Texas receipts only if the payor is located in Texas. 34 TEX. ADMIN. CODE § 3.549(e)(30)(B). The payor's location is deemed to be its legal domicile.[1] 34 TEX. ADMIN. CODE § 3.549(b)(7).

---

[1] The Texas Administrative Code provides:

> The legal domicile of a corporation is its state of incorporation. The legal domicile of a partnership or trust is the principal place of business of the partnership or trust. The principal place of business of a partnership or trust is the location of its day-to-day operations. If the day-to-day operations of the partnership or trust are conducted equally or fairly evenly in more than one state, then the principal place of business is the commercial domicile.

34 TEX. ADMIN. CODE § 3.549(b)(6).

For many years, the Comptroller characterized TGS's licensing of its geophysical information as the sale of an intangible and allocated the revenue TGS derived therefrom to the customer's legal domicile. *See* TEX. TAX CODE § 171.103(a)(6). The Comptroller's 2004 audit, however, characterized this revenue as receipts from the use of a license. This determination is significant because receipts from the use of a license are allocated to Texas if the license is used in Texas, whereas receipts from the sale of an intangible sold and used in Texas are not allocated to Texas, if the payor's domicile is elsewhere. TEX. TAX CODE § 171.103(a)(4); *see also* 34 TEX. ADMIN. CODE § 3.549(e)(30)(A)(iii) (providing that revenue an owner of a license receives is included in Texas receipts to the extent the license is used in Texas). The Comptroller's audit also concluded that most of TGS's licenses were used in Texas, which increased its Texas receipts and franchise taxes. After the audit, TGS owed $1,394,748.11 in additional franchise taxes and $333,741.60 in penalties and interest.

TGS paid the additional taxes, penalties, and interest under protest and timely filed this suit. *See* TEX. TAX CODE § 112.052(a) (requiring taxpayer to pay contested taxes as a predicate to filing suit). TGS and the Comptroller filed cross motions for summary judgment in the trial court, which granted both motions in part. The trial court granted the Comptroller's motion with regard to the assessment of the additional tax liability and TGS's motion with regard to penalties and interest, ordering the Comptroller to refund the assessed penalties and interest. The court of appeals affirmed the trial court's judgment, 268 S.W.3d 637 (Tex. App.—Austin 2010), and TGS appealed to this Court, complaining that it did not owe the additional franchise taxes assessed by the Comptroller and affirmed by the lower courts.

II. Analysis

The dispute here is over how the receipts TGS generates from licensing its data should be allocated. TGS asserts that the revenue it earns as the owner and licensor of seismic data should be characterized as receipts derived from the sale of an intangible asset and, as such, allocated to the state of the payor's domicile. TEX. TAX CODE § 171.103(a)(6). The Comptroller, on the other hand, argues that this revenue is derived from the use of a license because TGS employs license agreements to complete its sales in Texas. Receipts from the use of a license are allocated to the state in which the license is used. *Id.* § 171.103(a)(4).

The court of appeals agreed with the Comptroller, holding that "[t]he gross receipts earned by TGS are derived from TGS' use of a license within the meaning of the statutes." 268 S.W.3d at 646. The court thus interpreted the statutory phrase "use of a license" to apply to the use of a license as a transfer mechanism. *See id.* at 645 (holding that "the payments received by TGS for licensing its customers to use proprietary seismic data are gross receipts from the use of a license"). The question then is whether the act of licensing an intangible asset is the "use of a license" within the meaning of the franchise tax statute. To answer that question, we begin with the purpose and operation of the Texas franchise tax statute. *See* TEX. TAX CODE ch. 171.

A. The Texas Franchise Tax

The franchise tax is a tax on the privilege of doing business in Texas. *Bullock v. National Bancshares Corp.*, 584 S.W.2d 268, 270 (Tex. 1979), *cert. denied*, 444 U.S. 1016 (1980). It is imposed on each taxable entity that does business in this state or that is chartered or organized here. TEX. TAX CODE § 171.001(a); *see also id.* § 171.002 (defining taxable entity). Before 2008, the franchise tax was imposed on an entity's capital or earned surplus. *See* Act of May 30, 1997, 75th Leg., R.S., ch. 1185, §§ 5–6, 1997 Tex. Gen. Laws 4569, 4569-70. The tax code, however, presently imposes franchise tax on an entity's "taxable margin." TEX. TAX. CODE §§ 171.002, .101; *see* Act

of May 2, 2006, 79th Leg., 3rd C.S., ch.1, § 2, 2006 Tex. Gen. Laws 1, 6 (amending TEX. TAX CODE § 171.002). Because all of a company's capital, earned surplus, or taxable margin may not be attributable to business done in Texas, receipts must be apportioned between Texas and other jurisdictions. The tax code does this by multiplying an entity's capital, earned surplus, or taxable margin (depending on the applicable version of the code) by a fraction, the numerator of which consists of receipts from business done in Texas (Texas-sourced receipts), and the denominator of which consists of all receipts from business anywhere, including Texas. TEX. TAX. CODE § 171.006.

In sourcing receipts to Texas, the tax code identifies business done in this state as the sum of the taxable entity's gross receipts from the following activities:

> (1) each sale of tangible personal property if the property is delivered or shipped to a buyer in this state regardless of the FOB point or another condition of the sale;
>
> (2) each service performed in this state, except that receipts derived from servicing loans secured by real property are in this state if the real property is located in this state;
>
> (3) each rental of property situated in this state;
>
> (4) *the use of a patent, copyright, trademark, franchise, or license in this state;*
>
> (5) each sale of real property located in this state, including royalties from oil, gas, or other mineral interests; and
>
> (6) *other business done in this state.*

TEX. TAX CODE § 171.103(a)[2] (emphasis added) (hereafter referred to as the "sourcing statute"). The issue here is whether the revenue TGS earns licensing its seismic data library is appropriately sourced under subsection (4) as receipts from the "use of a license in this state," *id.* § 171.103(a)(4)[3]

---

[2] Despite recent changes in the franchise tax laws, for convenience we cite to the current tax code sourcing provisions, which have not been affected by these changes. Although we cite to the current code, TGS taxes must, of course, be determined under the code in effect at the time the taxes were incurred.

[3] Formerly TEX. TAX CODE §§ 171.103(4) & 171.1032(a)(4).

or under subsection (6) as "other business done in this state," *id*. § 171.103(a)(6).[4] If subsection (4) applies, the Comptroller has appropriately sourced the receipts. But if subsection (6) applies, as TGS maintains, the receipts must be sourced to the state of the customers' domicile under the "location of the payor" rule, and the Comptroller's assessment must be revised. *See* 34 TEX. ADMIN. CODE § 3.549(e)(30)(B); *id*. § 3.557(e)(25)(B).

B. Standard of Review

The Comptroller is charged with administering the provisions of the franchise tax. *See* TEX. GOV'T CODE § 403.011 (enumerating general powers of the Comptroller's office). The Legislature has given the Comptroller broad discretion to adopt rules for the collection of taxes and other revenues so long as such rules do not conflict with state or federal law. *See* TEX. TAX. CODE § 111.002(a).

If there is vagueness, ambiguity, or room for policy determinations in a statute or regulation, as there is here, we normally defer to the agency's interpretation unless it is plainly erroneous or inconsistent with the language of the statute, regulation, or rule. *See Pub. Util. Comm'n v. Gulf States Utils. Co.*, 809 S.W.2d 201, 207 (Tex. 1991)*; Stanford v. Butler*, 181 S.W.2d 269, 273 (Tex. 1944). Here, the Comptroller is the administrative agency charged with enforcing the tax code, and her construction of the code is therefore entitled to serious consideration. *See Tarrant Appraisal Dist. v. Moore*, 845 S.W.2d 820, 823 (Tex. 1993).

Deference to the agency's interpretation, however, is not conclusive or unlimited. *See Rodriguez v. Serv. Lloyds Ins. Co.*, 997 S.W.2d 248, 254–55 (Tex. 1999). We defer only to the extent that the agency's interpretation is reasonable, and no deference is due where an agency's interpretation fails to follow the clear, unambiguous language of its own regulations. *See Pub. Util.*

[4] Formerly TEX. TAX CODE §§ 171.103(5).

Comm'n, 809 S.W.2d at 207. We further interpret administrative rules, like statutes, under traditional principles of statutory construction. *Rodriguez v. Service Lloyds Ins. Co.*, 997 S.W.2d 248, 254 (Tex. 1999).

When construing a statute, our primary objective is to ascertain and give effect to the Legislature's intent. TEX. GOV'T CODE § 312.005; *see Texas Dept. of Protective and Regulatory Services v. Mega Child Care*, 145 S.W.3d 170, 176 (Tex. 2004). To discern that intent, we begin with the statute's words. TEX. GOV'T CODE § 312.003; *see Texas Dept. of Transp. v. City of Sunset Valley*, 146 S.W.3d 637, 642 (Tex. 2004). If a statute uses a term with a particular meaning or assigns a particular meaning to a term, we are bound by the statutory usage. *Texas Dep't of Transp. v. Needham*, 82 S.W.3d 314, 318 (Tex. 2002). Undefined terms in a statute are typically given their ordinary meaning, but if a different or more precise definition is apparent from the term's use in the context of the statute, we apply that meaning. *In re Hall*, 286 S.W.3d 925, 928–29 (Tex. 2009). And if a statute is unambiguous, we adopt the interpretation supported by its plain language unless such an interpretation would lead to absurd results. *Mega Child Care*, 145 S.W.3d at 177. We further consider statutes as a whole rather than their isolated provisions. *City of Sunset Valley*, 146 S.W.3d at 642. We presume that the Legislature chooses a statute's language with care, including each word chosen for a purpose, while purposefully omitting words not chosen. *In re M.N.*, 262 S.W.3d 799, 802 (Tex. 2008). With these rules in mind, we turn to the sourcing statute, and the Comptroller's regulations which implement it.

C. Sourcing Receipts from Intangible Assets

The history of the franchise tax indicates that the Comptroller has been allocating receipts from intangibles to the state of the payor's domicile since 1917. *Humble Oil & Refining Co. v. Calvert*, 414 S.W.2d 172, 180 (Tex. 1967). This practice ended in 1959, in part, when the

Legislature amended the sourcing statute to require use-based sourcing for two kinds of intangibles, patents and copyrights. *See* Act of August 6, 1959, 56th Leg., 3rd C.S., ch. 1, art. 12.02, 1959 Tex. Gen. Laws 187, 307 (sourcing "royalties from the use of patents or copyrights" to their place of use). Before this, the sourcing statute consisted of a single catch-all provision, for business done in the state, similar to subsection (6) of the current statute.[5] And under the earlier statute, the Comptroller sourced all receipts from intangibles under the "location of the payor" rule. *See Humble Oil & Refining Co.,* 414 S.W.2d at 180.

After the 1959 amendment, receipts from intangible assets, other than patents and copyrights, continued to be taxed as other business under the "location of the payor" rule until 1988, at which time the Comptroller began sourcing revenue from three additional intangible assets based on location of use. The Comptroller made this change by promulgating a new rule. Rule 3.403(e)(11) provided that "[r]eceipts to the owner for the use of trademarks, franchises, and licenses are allocated according to the location where used." 12 Tex. Reg. 2971 (1988) (to be codified at 34 Tex. Admin Code § 3.549). After Rule 3.403(e)(11)'s adoption, the Comptroller began sourcing receipts from licensing trademarks, franchises, and licenses according to their place of use, like patents and copyrights. Receipts from licensing other types of intangible assets, however, continued to be sourced to the location of the payor under the catch-all provision pertaining to "other business."

Comptroller letter rulings from the period confirm this practice. Concerning the licensing of data, the Comptroller issued the following guidance in 1990:

> . . . gross receipts from [licensing seismic data] are from a license to use the geophysical information. For franchise tax purposes, the gross receipts from the licensing of the use of the information would be considered receipts from the sale of an intangible and would be allocated to the legal domicile of the payor.

---

[5] *See* former TEX. REV. CIV. STAT. art. 7084, repealed by Act of August 6, 1959, 56th Leg., 3rd C.S., ch. 1, art. 12.02, 1959 Tex. Gen. Laws 187, 307.

Comptroller Letter Ruling 9005L1019F09 (5/1/1990); *see also* Comptroller Letter Ruling 9103L1087B07 (3/1/1991) (issuing similar ruling to another licensor of seismic data). These rulings recognized that Rule 3.403(e)(1l)[6] did not apply to the receipts because the customers used seismic data rather than the license conveying the data.

The Legislature did not amend the sourcing statute to match the Comptroller's sourcing rule on trademarks, franchises, and licenses until 1997. After this amendment, subsection (4) of the sourcing statute provided that "gross receipts of a corporation from its business done in this state [includes] the corporation's receipts from . . . the use of a patent, copyright, trademark, franchise, or license in this state . . ." Act of May 20, 1997, 75th Leg., R.S., ch. 1185, § 5, 1997 Tex. Gen. Laws 4569, 4570. The amendment equalized the tax treatment among similar intangible assets by adding licenses, trademarks, and franchises to the provision governing patents and copyrights. *Id.* Although other amendments to the franchise tax have followed, the sourcing statute has not materially changed since 1997. Gross receipts derived from a license continue to be sourced to Texas when the license is used in this state. TEX. TAX CODE § 171.103(a)(4).

D. Receipts From the Use of a License

The Comptroller argues that because TGS uses a license agreement to transfer seismic data to its Texas customers, the receipts are from the use of a license in Texas. She further argues that

[6] In November 1992, the Comptroller renumbered and reorganized Rule 3.403(e)(11) as new Rule 3.549(e)(30). 17 Tex. Reg. 7663 (1992) (to be codified at 34 TEX. ADMIN CODE § 3.549(e)(30)). The reorganization did not substantively change the rule, which now provides that "Revenues received by the owner of a trademark, franchise, and license are included in Texas receipts to the extent used in Texas." *Id*. In 1996, however, the Comptroller returned to the "location of the payor" rule for these intangible assets, amending the rule to provide that "revenues received by the owner of a trademark, franchise, and licence are apportioned to the location of the payor." 21 Tex. Reg. 11511 (1996) (to be codified at 34 TEX. ADMIN. CODE § 3.549). TGS submits that an adverse district court ruling, invalidating an unrelated sourcing rule, caused the Comptroller to make the changes returning revenue derived from patents and copyrights to their unique position as the only receipts from intangible assets sourced according to place of use. TGS further submits that the Comptroller persuaded the Legislature to thereafter amend the sourcing statute in 1997 to adopt the Comptroller's prior practice under Rule 3.403(e)(11) so that she could go back to sourcing these additional intangible assets according to place of use.

the phrase "use of a license" encompasses licensing because there is no qualifying language in subsection (4) or in any other part of the sourcing statute to suggest that the licensing of data does not constitute the use of a license. The Comptroller concedes that previously the licensing of seismic data was sourced as a general intangible under the "location of the payor" rule, but she maintains that the Legislature changed that practice in 1997 when it decided to tax licenses like patents and copyrights, according to their place of use.

TGS argues that the Comptroller and the court of appeals have confused "receipts from licensing" with "receipts from the use of a license." TGS submits that there is a critical distinction between receipts from licensing transactions (in which a license is merely the transfer mechanism) and receipts from the use of a license (in which the license itself is a valuable asset). Because TGS's customers do not use a license but instead use seismic data, TGS submits that the receipts at issue are not from the use of a license but are from its customers' acquisition and use of TGS's data. TGS contends that its receipts are therefore essentially a limited sale of an intangible asset, geophysical data. Because this data is not one of the intangible assets listed in subsection (4), TGS concludes that the receipts it derives from this data must instead be sourced as other business under the catch-all provision, subsection (6), and allocated to the state of the payor's domicile. TEX. TAX CODE § 171.103(a)(4), (6).

As the arguments indicate, the term "license" has more than one meaning. It can be used as a verb to convey the act of giving permission or as a noun to represent the permission or right granted. See WEBSTER'S NEW INTERNATIONAL DICTIONARY 1425 (2d ed. 1960). As such, its use in the statute is ambiguous.

Instead of focusing on the word "license," as the Comptroller and court of appeals have done, the word must be read in the context of the whole statute and consideration given to what it means

to "use a license." *See City of Sunset Valley*, 146 S.W.3d at 642; *Mega Child Care*, 145 S.W.3d at 176. Language cannot be interpreted apart from context. The meaning of a word that appears ambiguous when viewed in isolation may become clear when the word is analyzed in light of the terms that surround it.[7] The word "use" poses some interpretational difficulties as well because of the different meanings attributable to it.[8] "Use" and the "use of a license" therefore, draw their meanings from context, so we look not only to the words themselves but to the statute in its entirety to determine the Legislature's intent.[9] It is a fundamental principle of statutory construction and indeed of language itself that words' meanings cannot be determined in isolation but must be drawn from the context in which they are used.[10]

The statute sources to Texas "receipts from the use of a patent, copyright, trademark, franchise, or license" to the extent they are used in Texas. TEX. TAX CODE § 171.103(a)(4). The canon of statutory construction known as *noscitur a sociis*, or "it is known by its associates" directs that similar terms be interpreted in a similar manner. *See Fiess v. State Farm Lloyds*, 202 S.W.3d 744, 750 n. 29 (Tex. 2006) (quoting BLACK'S LAW DICTIONARY 1087 (8th ed. 2004)). Thus, we interpret the similar terms license, patent, copyright, trademark, and franchise in a similar manner.

Considering how the statute applies to patents and copyrights is therefore instructive. When a business wishes to manufacture a patented item, it must purchase the patent or obtain permission

---

[7] The United States Supreme Court has noted the difficulty of defining "use" in two criminal cases involving the use of a firearm. These cases provide helpful notes on linguistics for the present case. *See Bailey v. U.S.*, 516 U.S. 137, 143 (1995); *Smith v. U.S.*, 508 U.S. 223, 228–29 (1993).

[8] *Bailey*, 516 U.S. at 143.

[9] *See id.*

[10] *Smith v. U.S.*, 508 U.S. 223, 241 (1993)(Scalia, J., dissenting) (citing *Deal v. U.S.*, 508 U.S. 129, 132 (1993)) (Justice Scalia notes that this mandate of context is "particularly true of a word as elastic as 'use,' whose meanings range all the way from 'to partake of' (as in 'he uses tobacco') to 'to be wont or accustomed' (as in 'he used to smoke tobacco')).

to use the patent from the owner. Permission is usually granted in the form of a license. When the licensee thereafter produces the patented item, it uses the patent, and its payments to the patent's owner are "receipts from the use of a patent." *See* TEX. TAX CODE § 171.103(a)(4). The revenue or royalties that the patent owner receives is included in Texas receipts to the extent that the patent is used in production, fabrication, manufacturing, or other processing in Texas. 34 TEX. ADMIN. CODE § 3.549(e)(30)(A)(i). Even though a license is part of this transaction, the receipts are from the use of the underlying intellectual property, the patent, not from the use of a license.

Similarly, when a business wishes to publish copyrighted material, the owner of the copyright must grant permission through a license. When the licensee publishes the copyrighted material, it uses the copyright, and its payments to the owner are receipts from the use of a copyright. *See* TEX. TAX CODE § 171.103(a)(4). Revenue the copyright owner receives from the use of its copyright is included in Texas receipts to the extent the copyright is used in Texas. 34 TEX. ADMIN. CODE § 3.549(e)(30)(A)(ii). Even though a license is part of this transaction, the receipts are from the use of the underlying intellectual property, the copyright, not from the use of a license.

In these two situations, the owner of the intangible asset uses a license to convey limited rights to its intellectual property. But the revenue produced is not from the use of a license in Texas; it is from the use of the underlying intellectual property, the copyright or the patent. Similarly, the revenue TGS receives from conveying its geophysical data is not derived from the use of a license but from the use of the underlying intellectual property, the data. The term "license" in subsection (4) of the sourcing statute therefore refers to licenses that are themselves revenue-producing assets. It does not include the mechanism of licensing, which would subsume all intangible assets. Had that been the Legislature's intent, it would not have been necessary to name the intangible assets specifically as the Legislature has done in subsection (4). *See In re M.N.*, 262 S.W.3d at 802

(presuming that the "Legislature included each word in the statute for a purpose . . . and that words not included were purposefully omitted").

E. The Comptroller's Rules

The Comptroller's own administrative interpretation of the sourcing statute further contradicts her argument here. The Comptroller's regulations provide: "revenue that *the owner* of a trademark, franchise, or license receives is included in Texas receipts to the extent the trademark, franchise, or license is used in Texas." 34 TEX. ADMIN CODE § 3.549(e)(30)(A)(iii) (former franchise tax); *id.* § 3.591(e)(21)(A)(iii) (margin tax) (emphasis added). Under this rule, the intangible asset that is "used" must be owned by the revenue recipient and used by someone else. The underlying asset in a licensing transaction meets this standard because it is owned by the licensor, who receives the revenue, not the licensee, who uses the intangible asset. In contrast, the license resulting from a licensing transaction does not meet this standard because the licensee owns the license.

TGS, the revenue recipient, owns seismic data, which is its intellectual property. TGS's customers want to access this valuable intellectual property, and TGS thus grants them a right to access the data through license agreements. TGS grants its customers a license, or a limited right, to use its seismic data. The customers, however, then use the seismic data and not the licenses that vest in them as a result of the licensing transaction. Because TGS is not the owner of the license but the owner of the data, its receipts from customers, who use its seismic data, should not be sourced under subsection (4), and the assessment here conflicts with the Comptroller's own administrative rule. *See* 34 TEX. ADMIN. CODE § 3.549(e)(30)(A)(iii); *see also Rodriguez*, 997 S.W.2d at 254–55; *Mid-Century*, 243 S.W.3d at 623.

Moreover, the Comptroller's construction of the statute conflicts with her rule regarding the licensing of software. By rule, the Comptroller allocates receipts from licensing software to the location of the payor under subsection (6) as sales of intangibles. *See* 34 TEX. ADMIN. CODE §§ 3.549(e)(30)(A)(iii), (e)(7); TEX. TAX CODE § 171.103(a)(6). Because a license is used to transfer the underlying intangible, however, the Comptroller's argument in this case would dictate allocation of the receipts under subsection (4). TEX. TAX CODE § 171.103(a)(4). The Comptroller accordingly is inconsistent when equating the licensing of an intangible asset with the use of a license in this state. *See* TEX. TAX CODE § 111.002 (providing that Comptroller's rules must not conflict with state or federal law); *see also Pub. Util. Comm'n*, 809 S.W.2d at 207*; Stanford*, 181 S.W.2d at 273 (stating that an agency's construction of a statute may be considered only if it is reasonable and not inconsistent with the statute).

III. Conclusion

The Legislature could have allocated receipts from the use of intangible assets in this state to subsection (4) of the sourcing statute, generally, but it did not. *See*, *e.g.*, TEX. TAX CODE § 171.0004(d) (providing that an "entity conducts an active trade or business if assets, including royalties, patents, trademarks, and *other intangible assets*, held by the entity are used in the active trade or business of one or more related entities") (emphasis added). Some states do allocate revenues from intangible assets generally to the place of their use, but our Legislature has chosen to specifically name the intangibles which qualify for such treatment.[11] Because TGS's receipts from

[11] Compare the Texas statute with Wisconsin's. WIS. STAT. ANN. § 71.25(9)(dj) (West 2011) (sourcing gross royalties and "other gross receipts received for the use or license of intangible property, including patents, copyrights, trademarks, trade names, service names, franchises, licenses, plans, specifications, blueprints, processes, techniques, formulas, designs, layouts, patterns, drawings, manuals, technical know-how, contracts, and customers lists are sales in this state if ... [t]he purchaser or licensee uses the intangible property in the operation of a trade or business at a location in this state.") TGS's license of seismic data would certainly fall under this particular statute to the extent that the data was used in Wisconsin, but Texas's statute is not so broad. Several other states have similarly broad sourcing statutes under which TGS's transactions would fall. *See also* LA. REV. STAT. ANN. § 47:243(A)(5) (2011) ("Royalties or similar

licensing its seismic data are not receipts from the use of a license in this state within subsection (4)'s meaning, the court of appeals erred in upholding the Comptroller's franchise tax assessment in this case. Receipts from this intangible asset are not allocated according to its place of use under subsection (4) but rather are included under subsection (6)'s catch-all provision as a limited sale of an intangible and allocated under the "location of the payor" rule. We therefore reverse the court of appeals' judgment and remand the case to the trial court for further proceedings consistent with this opinion.

David M. Medina

revenue from the use of patents, trademarks, copyrights, secret processes *and other similar intangible rights* shall be allocated to the state or states in which such rights are used") (emphasis added); 35 ILL. COMP. STAT. ANN. 5/304(a)(3)(B-l)(I) (West 2011) ("Gross receipts from the licensing, sale, or other disposition of a patent, copyright, trademark, *or similar item of intangible personal property*") (emphasis added); MICH. COMP. LAWS ANN. § 208.1305(l)(e) (West 2011) ("Royalties and other income received for the use of or for the privilege of using *intangible property*, including patents, know-how, formulas, designs, processes, patterns, copyrights, trade names, service names, franchises, licenses, contracts, customer lists, computer software, *or similar items*, are attributed to the state in which the property is used by the purchaser") (emphasis added); OHIO REV. CODE ANN. § 5733.05(B)(2)(c)(ii) (West 2011) ("Receipts from the sale, exchange, disposition, or other grant of the right to use trademarks, trade names, patents, copyrights, *and similar intellectual property* shall be situsedto this state to the extent that the receipts are based on the amount of use of that property in this state") (emphasis added); TENN. CODE ANN. § 67-4-2012(j) (West 2011) ("any person doing business in Tennessee, who licenses the use of patents, trademarks, tradenames, copyrights, or know-how, *or other intellectual property* to another person in Tennessee, and who is paid royalties or other income based on the sale of products or other activity in Tennessee by the licensee, shall source such income to Tennessee") (emphasis added).

Justice

Opinion Delivered: May 27, 2011

IN THE SUPREME COURT OF TEXAS

NO. 08-1066

MICHAEL T. JELINEK, M.D. AND COLUMBIA RIO GRANDE HEALTHCARE, L.P. D/B/A RIO GRANDE REGIONAL HOSPITAL, PETITIONERS,

v.

FRANCISCO CASAS AND ALFREDO DELEON, JR., AS PERSONAL REPRESENTATIVES OF THE ESTATE OF ELOISA CASAS, DECEASED, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRTEENTH DISTRICT OF TEXAS

Argued February 18, 2010

JUSTICE GUZMAN delivered the opinion of the Court, in which JUSTICE HECHT, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE JOHNSON, and JUSTICE WILLETT joined, and in which CHIEF JUSTICE JEFFERSON, JUSTICE GREEN, and JUSTICE LEHRMANN joined as to Parts I and II.A.

CHIEF JUSTICE JEFFERSON filed an opinion, dissenting in part, in which JUSTICE GREEN and JUSTICE LEHRMANN joined.

JUSTICE LEHRMANN filed an opinion, dissenting in part.

When circumstantial evidence is consistent with several possible medical conclusions, only one of which establishes that the defendant's negligence caused the plaintiff's injury, an expert witness must explain why, based on the particular facts of the case, that conclusion is medically superior to the others. If the expert fails to give any reason beyond an unsupported opinion, the

expert's testimony is legally insufficient evidence of causation. In this case, we determine whether legally sufficient evidence supports the jury's verdict in favor of the estate of Eloisa Casas[1] against Rio Grande Regional Hospital (the Hospital).[2] Following her admission to the Hospital with abdominal pain, doctors placed Casas on antibiotics used to treat and prevent certain intra-abdominal infections. Two days later she underwent major abdominal surgery and continued on the antibiotics for another five days, but the Hospital allowed the prescriptions to lapse for four-and-a-half days. The Hospital admits it should have continued the antibiotics but denies that the lapse caused Casas any additional pain. We hold that the Casases failed to present legally sufficient evidence that Casas suffered from an infection the omitted antibiotics would have treated. Accordingly, we reverse the court of appeals' judgment and render judgment that the Casases take nothing.[3]

In a separate petition, Dr. Michael Jelinek, one of Casas's treating physicians sued by the Casases, argues that the trial court should have granted his motion for sanctions and dismissal because the Casases' expert report was deficient. We agree and hold that an award of attorney's fees is proper. Therefore, we reverse and remand to the trial court for an award of attorney's fees and costs.

---

[1] Francisco Casas and Alfredo DeLeon Jr., Casas's husband and son, respectively, serve as personal representatives of her estate. We refer to them collectively as "the Casases."

[2] Columbia Rio Grande Regional Healthcare, L.P., d/b/a/ Rio Grande Regional Hospital.

[3] Because we conclude legally insufficient evidence supports the jury's verdict, we do not reach the Hospital's second issue—whether the Hospital preserved error regarding its proposed unavoidable accident instruction.

I. Background

In 2000, Eloisa Casas was diagnosed with colon cancer and underwent surgery, radiation, and chemotherapy. A year later, doctors told her that the cancer appeared to be in remission, and she thought she was cured. But on July 10, 2001, she was admitted to the Hospital with abdominal pains; she also had a fever and a mildly elevated white-blood-cell count, potentially indicating an infection. To treat this possible infection, her surgeon and primary physician, Dr. Carlos Garcia-Cantu, consulted with an infectious disease specialist at the Hospital, Dr. Michael Jelinek, who on July 11 prescribed two medications, Maxipime (a broad-spectrum antibiotic), and Flagyl (an antibiotic used to treat anaerobic bacteria).

The Hospital performed several diagnostic tests, which revealed abnormal collections of fluid in Casas's abdomen. On July 13, she underwent major abdominal surgery during which Dr. Garcia-Cantu discovered that "fairly extensive" metastatic cancer had perforated Casas's colon and allowed material to leak into her abdominal cavity, causing an intra-abdominal abscess. Dr. Garcia-Cantu drained the abscess, repaired Casas's colon, and inserted a Jackson-Pratt drain to prevent further problems. Following the surgery, Dr. Garcia-Cantu continued the Maxipime and Flagyl prescriptions, and a culture of the removed abscess revealed an E. coli infection, which is effectively treated with Maxipime. Casas received Maxipime and Flagyl for another five days, but hospital staff inadvertently failed to place a prescription renewal form on Casas's chart, resulting in a four-and-a-half-day period between July 18 and 23 during which Casas did not receive either medication. Even so, Casas never tested positive for E. coli again and a culture of the incision site on July 18 instead grew Candida (a fungus) for which Diflucan (an antifungal) was prescribed. Then, on July

21, a second culture from a blood sample grew coagulase-negative staph, for which Vancomycin was prescribed.[4] Neither Maxipime nor Flagyl would have treated the Candida or coagulase-negative staph infection.

On July 23, Dr. Garcia-Cantu noted an abscess in the wound, which he drained by removing the staples and opening the wound. The next day, records indicate that a foul smell was emanating from the wound site, and hospital staff brought fans into the room to dissipate the odor. When Dr. Jelinek learned of the lapsed prescription on July 23, he informed Casas and then prescribed different antibiotics, Levaquin and Vancomycin. On July 25, after a CAT scan showed no abscess, Dr. Garcia-Cantu removed the drain. Casas left the Hospital on August 23, but she returned in early September and died two months later.

In May 2003, several members of Casas's family, including her husband and son, filed suit against the Hospital, Dr. Garcia-Cantu, and Dr. Jelinek. The plaintiffs claimed that the defendants' negligence caused Eloisa Casas to "suffer grievous embarrassment and humiliation, as well as excruciating pain the remainder of her life which she would not have suffered to such degree or extent if properly diagnosed, treated and cared for." The plaintiffs sought to recover damages for Casas's injuries and mental anguish. They twice amended their petition, ultimately leaving the Casases as the sole plaintiffs.

[4] There was a several-day lag between taking the culture and ordering the prescription, presumably to allow the culture to grow and to transmit the results to the treating physicians. Thus, the Diflucan was prescribed on July 21 and the Vancomycin on July 23.

As required by former article 4590i § 13.01 of the Medical Liability and Insurance Improvement Act, *see* TEX. REV. CIV. STAT. art. 4590i § 13.01,[5] the Casases filed an expert report within 180 days of filing the original petition. In the report, Dr. John Daller opined that Dr. Garcia-Cantu and Dr. Jelinek were negligent in failing to discover that the antibiotics were not being given to Casas and that within "reasonable medical probability" this negligence resulted in a prolonged hospital stay and increased pain and suffering. Dr. Jelinek later filed a motion for sanctions and dismissal under article 4590i § 13.01(e), alleging that the expert report was deficient because, among other things, it failed to explain any causal connection between the negligence and the purported injury. The trial court denied the motion. Before trial began, however, the Casases nonsuited Dr. Jelinek and Dr. Garcia-Cantu.

At trial, Dr. Daller testified as the Casases' medical expert. During direct examination, he analyzed the Hospital's daily patient notes regarding Casas and identified the significant events. He noted changes in Casas's vital signs on July 21 and 22, such as increased heart rate and temperature, inflammation, and tenderness of the surgery site. Dr. Daller stated that "in medical probability" there was an infection in the abdomen, but on cross-examination he admitted that "there was no objective evidence present to demonstrate that intra-abdominal infection." When reviewing the patient notes for July 24, which noted the presence of a foul smell, he suggested that the smell was consistent with an anaerobic infection that would be difficult to culture because anaerobic bacteria die when exposed

[5] *See* Act of May 5, 1995, 74th Leg., R.S., ch. 140, § 1, 1995 Tex. Gen. Laws 985, 986, *amending* the Medical Liability and Insurance Improvement Act of Texas, Act of May 30, 1977, 65th Leg., R.S., ch. 817, 1977 Tex. Gen. Laws 2039, 2041, *repealed by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.09, 2003 Tex. Gen. Laws 847, 884. Former article 4590i § 13.01 was replaced by Texas Civil Practice and Remedies Code § 74.351, as amended.

to air. Dr. Carl Berkowitz, the Hospital's expert, offered several other explanations for the smell, such as the Candida infection or dying tissue.

The Casases also called Casas's relatives to testify about her condition. Consistent with Dr. Daller's testimony, Casas's son linked the smell with the opening of the wound to drain the abscess: "The odor that I noticed was after they had taken out the staples on her incision, and one day that I went to see her as soon as they opened the door the whiff of this putrid smell just engulfed me." He also testified that Casas was upset upon learning that she had not received the antibiotics but was even more upset when the incision had to be opened and drained: "Well, after she was told and I was told that she wasn't getting antibiotics, like I said, she was upset. What really upset her more was when they had to—they had to take out the staples out of her incision, and they had to open her incision up again." Casas's husband testified that, while she was upset and did not trust the nurses or doctors after learning of the lapsed prescription, "she was still fighting. She . . . wanted to beat this cancer she had." The son testified that Casas did not lose hope until she witnessed the events of September 11, 2001, following her re-admission to the Hospital: "That's why I remember that day so vividly in my mind because that was the turning point in my mom. She seemed to just give up, not fight, not want to fight anymore like she used to. And that was a very, very sad day."

The jury found that the negligence of the Hospital, Dr. Jelinek, and Dr. Garcia-Cantu proximately caused Casas's injury. The jury apportioned ninety percent of the negligence to the Hospital, five percent to Dr. Jelinek, and five percent to Dr. Garcia-Cantu. It awarded $250,000 in damages to the Casases as compensation for Casas's pain and mental anguish.

The Hospital appealed, arguing that the evidence was legally and factually insufficient to prove causation or damages for mental anguish. Dr. Jelinek also appealed, challenging the trial court's denial of his motion for sanctions and dismissal. The court of appeals affirmed on all issues. __ S.W.3d __.

II. Analysis

We address in turn the two issues raised in this appeal: the legal sufficiency of the causation evidence and the sufficiency of the Casases' expert report.

A. Sufficiency of the Evidence

The facts of this case are unfortunate: a woman with advanced colon cancer underwent surgery to repair her cancer-perforated and infected colon, and in the course of treatment for her many symptoms the Hospital failed to renew her antibiotic prescriptions for a four-and-a-half-day period. The Hospital admits it should have continued the antibiotics. Even so, the plaintiff bears the burden to prove that the negligence caused an injury: "[A]t trial the plaintiff must establish two causal nexuses in order to be entitled to recovery: (a) a causal nexus between the defendant's conduct and the event sued upon; and (b) a causal nexus between the event sued upon and the plaintiff's injuries." *Morgan v. Compugraphic Corp.*, 675 S.W.2d 729, 731 (Tex. 1984). Only the second nexus is at issue here.

In *City of Keller v. Wilson*, we considered at length the parameters of legal sufficiency review, quoting with approval Chief Justice Calvert's seminal article on the topic:

> "No evidence" points must, and may only, be sustained when the record discloses one of the following situations: (a) a complete absence of evidence of a vital fact; (b) the court is barred by rules of law or of evidence from giving weight to the only

> evidence offered to prove a vital fact; (c) the evidence offered to prove a vital fact is no more than a mere scintilla; (d) the evidence establishes conclusively the opposite of the vital fact.

168 S.W.3d 802, 810 (Tex. 2005) (quoting Robert W. Calvert, *"No Evidence" and "Insufficient Evidence" Points of Error*, 38 TEX. L. REV. 361, 362–63 (1960)). "When the evidence offered to prove a vital fact is so weak as to do no more than create a mere surmise or suspicion of its existence, the evidence is no more than a scintilla and, in legal effect, is no evidence." *Kindred v. Con/Chem, Inc.*, 650 S.W.2d 61, 63 (Tex. 1983). The same is true when the evidence equally supports two alternatives: "'When the circumstances are equally consistent with either of two facts, neither fact may be inferred.'" *City of Keller*, 168 S.W.3d at 813 (quoting *Tubelite, a Div. of Indal, Inc. v. Risica & Sons, Inc.*, 819 S.W.2d 801, 805 (Tex. 1991)). When considering such cases, "we must 'view each piece of circumstantial evidence, not in isolation, but in light of all the known circumstances,'" *id.* at 813–14 (quoting *Lozano v. Lozano*, 52 S.W.3d 141, 167 (Tex. 2001) (per curiam)), and we "must consider not just favorable but all the circumstantial evidence, and competing inferences as well." *Id.* at 814.

To meet the legal sufficiency standard in medical malpractice cases "plaintiffs are required to adduce evidence of a 'reasonable medical probability' or 'reasonable probability' that their injuries were caused by the negligence of one or more defendants, meaning simply that it is 'more likely than not' that the ultimate harm or condition resulted from such negligence." *Kramer v. Lewisville Mem'l Hosp.*, 858 S.W.2d 397, 399–400 (Tex. 1993) (citations omitted). Thus, we examine the record to determine if the Casases presented legally sufficient evidence that "in

reasonable medical probability" the Hospital's negligence caused Casas additional pain and suffering.

When distilled to its essence, the Casases' claim is predicated on the presence of an infection—treatable by the lapsed antibiotics—that caused Casas pain and mental anguish above and beyond that caused by the cancer, the surgery, and the other known infections. The absence of an infection treatable by Maxipime and Flagyl would undermine the Casases' claim, for then the prescription lapse would amount to an unfortunate, but harmless, occurrence. The Hospital argues that the Casases presented no evidence that the Hospital's negligence caused such an infection. The Casases' expert admitted there is no direct evidence of an anaerobic infection, leaving the jury to consider the circumstantial evidence and make proper inferences from it. In reviewing the record, we initially decide if jurors can determine causation under these facts unaided by expert testimony—that is, whether lay testimony regarding causation is legally sufficient.

1. Lay Testimony of Causation

Lay testimony may be used as evidence of causation in certain circumstances, but "[w]hen expert testimony is required, lay evidence supporting liability is legally insufficient." *City of Keller*, 168 S.W.3d at 812. In medical malpractice cases, expert testimony regarding causation is the norm: "The general rule has long been that expert testimony is necessary to establish causation as to medical conditions outside the common knowledge and experience of jurors." *Guevara v. Ferrer*, 247 S.W.3d 662, 665 (Tex. 2007); *see also Bowles v. Bourdon*, 219 S.W.2d 779, 782 (Tex. 1949) ("It is definitely settled with us that a patient has no cause of action against his doctor for malpractice, either in diagnosis or recognized treatment, unless he proves by a doctor of the same

school of practice as the defendant: (1) that the diagnosis or treatment complained of was such as to constitute negligence and (2) that it was a proximate cause of the patient's injuries."). We have allowed lay evidence to establish causation "in those cases in which general experience and common sense will enable a layman to determine, with reasonable probability, the causal relationship between the event and the condition." *Morgan*, 675 S.W.2d at 733 (citing *Lenger v. Physician's Gen. Hosp., Inc.*, 455 S.W.2d 703, 706 (Tex. 1970)). Care must be taken to avoid the *post hoc ergo propter hoc* fallacy, that is, finding an earlier event caused a later event merely because it occurred first. Stated simply, correlation does not necessarily imply causation. As we noted in *Guevara*, "[e]vidence of an event followed closely by manifestation of or treatment for conditions which did not appear before the event raises suspicion that the event at issue caused the conditions. But suspicion has not been and is not legally sufficient to support a finding of legal causation." 247 S.W.3d at 668.

When lay testimony is credited as evidence of causation, it usually highlights a connection between two events that is apparent to a casual observer. In *Morgan*, for example, a previously healthy employee, upon exposure to leaking chemicals, suffered watering of the eyes, blurred vision, headaches, and swelling of the breathing passages. 675 S.W.2d at 733. In such a circumstance, lay testimony sufficed to connect the specific injury to the negligence with no evidence of causation beyond the leaking chemicals. *Id.* Likewise in *Guevara*, we stated that determining causation of "certain types of pain, bone fractures, and similar basic conditions" following an automobile accident was within the competence of lay jurors. 247 S.W.3d at 668. But we held that expert testimony was required to prove that a patient's medical expenses resulted from the accident, noting that "[p]atients in hospitals are often treated for more than one condition brought on by causes independent of each

other." *Id.* at 669. These cases illustrate this basic premise: "[N]on-expert evidence alone is sufficient to support a finding of causation in limited circumstances where both the occurrence and conditions complained of are such that the general experience and common sense of laypersons are sufficient to evaluate the conditions and whether they were probably caused by the occurrence." *Id.* at 668.

The present case does not fall within this rule. Unlike in *Morgan*, an otherwise healthy person did not suddenly experience health difficulties following the defendant's negligent conduct when the plaintiff's symptoms were reasonably attributable to the negligence and to nothing else. Rather, a patient with terminal colon cancer did not receive antibiotics for four-and-a-half days following major abdominal surgery and after having received the medications for eight days. There is no direct evidence that she suffered from an infection treatable by the omitted antibiotics, but there is evidence that she had two other infections that accounted for all of her symptoms during that time. Given Casas's medical condition, expert testimony was crucial to link the prescription lapse to an infection causing additional pain and suffering beyond what she would otherwise have experienced. *See Kaster v. Woodson*, 123 S.W.2d 981, 983 (Tex. Civ. App.—Austin 1938, writ ref'd) ("What is an infection and from whence did it come are matters determinable only by medical experts."); *see also Hart v. Van Zandt*, 399 S.W.2d 791, 792 (Tex. 1966) ("In determining negligence in a case such as this, which concerns the highly specialized art of treating disease, the court and jury must be dependent on expert testimony. There can be no other guide, and where want of skill and attention is not thus shown by expert evidence applied to the facts, there is no evidence of it proper to be submitted to the jury.").

The Casases point to testimony by Casas's husband and son to support their argument that she deteriorated rapidly after discovering she did not receive the antibiotics. But this characterization overstates the evidence. While Casas's husband testified she was upset and did not trust her doctors following the discovery, she was still determined to fight her cancer. The son also observed Casas's anger and lack of trust but testified that the opening of her wound, which occurred the same day she learned of the lapse, upset her even more. As Dr. Daller admitted, Candida likely caused the abscess that required Dr. Garcia-Cantu to drain the wound. Further, based on his experience at Casas's bedside, her son pinpointed the tragic events of September 11, 2001, and their effect on his mother as the turning point in her mental state. The latter event was some seven weeks after discovery of the lapsed prescriptions and after Casas's discharge from and re-admission to the Hospital. This evidence does not bear out the Casases' claim of a marked shift in Casas's mental resilience following the omission of the medications.

More importantly, Casas's husband and son were unable to precisely identify the cause of her suffering. While they could accurately describe her discomfort, they were unable to say if it was the cancer, the surgery, the other infections, or the lapse that caused it. Even testimony that Casas suffered after learning of the omission raises no more than a mere suspicion of causation, and that is not enough, *see Guevara*, 247 S.W.3d at 668, particularly in light of the evidence that Casas thought she was cured of cancer before the surgery and then learned that not only was it "back with a vengeance," it was terminal. The testimony of Casas's husband and son is evidence of her suffering, but not of its cause. Thus, we hold that the lay testimony presented by the Casases is

legally insufficient to establish that the Hospital's negligence caused Casas additional pain and suffering.

2. Expert Testimony

The Casases also presented expert testimony regarding causation. The Casases' expert, Dr. Daller, testified that the Hospital's negligence "in medical probability" caused Casas additional pain and suffering. He based this opinion on the presence of an intra-abdominal infection that could have been treated using Maxipime and Flagyl. Admitting that no direct evidence indicated such an infection, Dr. Daller pointed to various circumstantial indicators that suggested an infection. These indicators were primarily Casas's changed vital signs, such as fever and increased heart rate: "Well, given the fact that two to three days after the antibiotics had been mistakingly [sic] stopped her fever curve went up and her heart rate went up, to me that suggests the presence of on going [sic] infection."[6] But on cross-examination, he conceded these data were equally consistent with two other infections cultured from Casas's incision and blood—Candida and coagulase-negative staph—neither of which is treatable by Maxipime or Flagyl:

> Q. Now, Candida, infection of a wound like this, they can cause high temperatures. Correct?

---

[6] When asked if the lapsed prescriptions affected Casas's hospital stay, Dr. Daller equivocated:

> A. I think that it certainly did impact it. However, I cannot quantitate that because there are multiple variables that are present in a clinical condition. Whether it lengthened her stay by one day, two days, three days, I cannot say that. What I would say from a scientific standpoint is that for four and a half days she did not receive appropriate therapy. Had she received the appropriate therapy then *you would expect* her length of stay to be shortened somewhat. To quantitate that, I could not do that.
>
> . . . .
>
> A. Obviously, not receiving antibiotics is not going to shorten your stay. Therefore, *if it impacted the stay* it must have lengthened it. (emphases added).

A. Fungal infections can cause a high temperature, yes.

Q. It can cause increased heart rate?

A. That is correct.

Q. And inflammation?

A. That is correct.

Q. Pain?

A. That is correct.

Q. How about an abscess?

A. It caused or is part of the abscess in that wound that was present, that wound infection that needed to be opened.

Q. So when Doctor Garcia went in on 7/23 . . . and drained that wound at bedside that abscess was within a reasonable degree of medical probability caused by the Candida?

A. That was one of the organisms that was there. It was the organism that was cultured. That is correct.

. . . .

Q. . . . This coagulase negative staph causes fever?

A. Correct.

Q. Increased heart rate?

A. The fever will cause increased heart rate.

. . . .

Q. It can cause pain?

A. Depending upon the site. Correct.

Q. Okay. All of these things can be caused by coagulase negative staph and Candida, which we know were present 7/18 through 7/23, the time period she did not get antibiotics?

A. That's correct.

Q. Neither one would have been killed by Maxipime or Flagyl?

A. That's correct.

It is not enough for an expert simply to opine that the defendant's negligence caused the plaintiff's injury. The expert must also, to a reasonable degree of medical probability, explain how and why the negligence caused the injury. We have rejected expert opinions not grounded in a sound evidentiary basis: "[I]f no basis for the opinion is offered, or the basis offered provides no support, the opinion is merely a conclusory statement and cannot be considered probative evidence, regardless of whether there is no objection. '[A] claim will not stand or fall on the mere *ipse dixit* of a credentialed witness.'" *City of San Antonio v. Pollock*, 284 S.W.3d 809, 818 (Tex. 2009) (quoting *Burrow v. Arce*, 997 S.W.2d 229, 235 (Tex. 1999)); *see also Whirlpool Corp. v. Camacho*, 298 S.W.3d 631, 637 (Tex. 2009) ("Conclusory or speculative opinion testimony is not relevant evidence because it does not tend to make the existence of material facts more probable or less probable."). When the only evidence of a vital fact is circumstantial, the expert cannot merely draw possible inferences from the evidence and state that "in medical probability" the injury was caused by the defendant's negligence. The expert must explain why the inferences drawn are medically preferable to competing inferences that are equally consistent with the known facts. Thus, when the facts support several possible conclusions, only some of which establish that the defendant's negligence

caused the plaintiff's injury, the expert must explain to the fact finder why those conclusions are superior based on verifiable medical evidence, not simply the expert's opinion. *See Lenger*, 455 S.W.2d at 707 ("[E]xpert testimony that the event is a possible cause of the condition cannot ordinarily be treated as evidence of reasonable medical probability except when, in the absence of other reasonable causal explanations, it becomes more likely than not that the condition did result from the event."); *Hart*, 399 S.W.2d at 792 ("The burden of proof is on the plaintiff to show that the injury was negligently caused by the defendant and it is not enough to show the injury together with the expert opinion that it might have occurred from the doctor's negligence and from other causes not the fault of the doctor. Such evidence has no tendency to show that negligence did cause the injury.").

By conceding that Casas's symptoms were consistent with infections not treatable by Maxipime or Flagyl, Dr. Daller undermined his conclusion that an undetected infection was also present. While it is possible that Casas did have such an infection, its presence can only be inferred from facts that are equally consistent with the Candida and coagulase-negative staph infections. "'When the circumstances are equally consistent with either of two facts, neither fact may be inferred.'" *City of Keller*, 168 S.W.3d at 813 (quoting *Tubelite*, 819 S.W.2d at 805). Here, objective data—the cultures—support the Candida and staph infections but not the supposed anaerobic infection.[7]

[7] Admittedly, anaerobic bacteria are hard to culture because they are averse to oxygen.

Based on the record evidence, an anaerobic infection cannot be proved or disproved. It is equally plausible that Casas had such an infection or that she did not. Dr. Daller opined that she did, but he did not explain why that opinion was superior to the opposite view. Such evidence raises no more than a possibility of causation, which is insufficient. As we said in *Bowles v. Bourdon*, "'[t]he proof must establish causal connection beyond the point of conjecture. It must show more than a possibility. Verdicts must rest upon reasonable certainty of proof. Where the proof discloses that a given result may have occurred by reason of more than one proximate cause, and the jury can do no more than guess or speculate as to which was, in fact, the efficient cause, the submission of such choice to the jury has been consistently condemned by this court and by other courts.'" 219 S.W.2d at 785 (quoting *Ramberg v. Morgan*, 218 N.W. 492, 498–99 (Iowa 1928)).

The Casases argue that the foul smell, which is consistent with an anaerobic infection, is strong evidence of such an infection. Looking at the patient notes for July 24, Dr. Daller commented on the smell:

> A. The text says something about drainage to the abdomen with moderate amount of drainage. And it says that it is foul smelling.
>
> . . . .
>
> Q. The [previous notes] that I remember that we have gone over didn't say anything about foul smelling?
>
> A. That's correct. They were just described as I recall as being purulent and looking like puss [sic].
>
> Q. What does that mean when it says "foul smelling"?

> A. When you have foul smelling, it suggests that the organism is an anaerobe. In other words, one of those bacteria that didn't need oxygen in order to grow that, for example, Flagyl would treat.
>
> Q. Okay. Does that give you clinical evidence that had she been continued on Maxipime and Flagyl that they would have had some effect with regards to the condition as we see it on the 24th?
>
> A. Well, like I said, most anaerobes are sensitive or susceptible to Flagyl. And she had previously been on Flagyl and at this time she is not. So I would have expected that that would be an appropriate antibiotic that would have covered the organism that's causing that foul smell.

Dr. Berkowitz, the Hospital's expert, offered several other explanations for the smell, including necrotic tissue, dead cancer tissue, and the Candida infection.[8] As noted, Casas's son noticed the smell after the incision was opened to drain the abscess, which Dr. Daller admitted was likely caused by Candida.

Here again, there are competing explanations for the smell, which amounts to no more than circumstantial evidence of some kind of infection or possibly dying tissue. Because there is no direct evidence of the infection and the circumstantial evidence is meager, we "must consider not just

---

[8] Dr. Berkowitz testified:

> I think that there are a number of things that can cause things smelling bad besides just infection. Tissue that dies doesn't smell good. There's bacteria and products released by the dead tissue that don't smell good.
>
> And we know based on the pathology report of the cancer that they took out of her abdomen, that this had grown enough that it was dying. In other words, it was probably outgrowing it's [sic] blood supply and was starting to die. That in and of itself can smell bad. Then you have a wound that is infected; although Candida itself does not typically smell bad, not like something dead. It smells funky and people don't like the way it smells. The wound itself when it wasn't healing was probably having some necrotic tissue, as well, or dead tissue that is in the wound. I'm sure that smelled bad, as well. And they were never able to completely get rid of all that dead cancer tissue that was in her abdomen.
>
> I think there's a number of reasons why she would have had a bad smell, none of which can be explained by four or five days of not getting Flagyl [or] Maxipime.

favorable but all the circumstantial evidence, and competing inferences as well." *City of Keller*, 168 S.W.3d at 814. Courts should not usurp the jury's role as fact finder, nor should they question the jury's right to believe one witness over another. But when reviewing a verdict for sufficiency of the evidence, courts need not—indeed, must not—defer to the jury's findings when those findings are not supported by credible evidence. When the evidence compels the jury to guess if a vital fact exists, a reviewing court does not undermine the jury's role by sustaining a no-evidence challenge. The evidence in this case—being consistent with an anaerobic infection that was treatable by Flagyl, a fungal infection that was not, or even with dying tissue, cancerous or otherwise—did not provide the jury a reasoned basis from which to infer the presence of a negligence-induced infection. Because the jury could not reasonably infer an infection caused by the Hospital's negligence, we agree with the Hospital that no evidence supports the jury's verdict.

We understand the Casas family's predicament and frustration at the Hospital's conduct, and we recognize the difficulty of proving that the lapsed prescriptions caused a painful infection. But the Casases shouldered that burden and must prove the causal link with reasonable certainty. In that quest, the Casases offered the testimony of Dr. Daller, but he did not explain why an undetected, anaerobic infection is medically more probable than one based on the known infections and the dying tissue, leaving the jury to guess if the lapsed prescriptions caused additional pain and suffering. Without probative medical testimony that the lapse caused—by means of an infection treatable by Maxipime and Flagyl—more pain than the cancer, the surgery, and the other infections already inflicted, there is no legally sufficient evidence of causation. Dr. Daller did not provide that causal link; accordingly, we hold that his testimony is legally insufficient to support the jury's verdict.

Because the Casases failed to prove causation, we reverse the judgment of the court of appeals and render judgment that the Casases take nothing.

B. Adequacy of the Expert Report

In his petition, Dr. Jelinek raises a single issue: whether the trial court abused its discretion by denying his motion for sanctions and dismissal because the Casases' expert report was deficient under former article 4590i § 13.01, the statute in effect at the time. *See* TEX. REV. CIV. STAT. art. 4590i § 13.01. Article 4590i required the report to provide "a fair summary of the expert's opinions as of the date of the report regarding applicable standards of care, the manner in which the care rendered by the physician or health care provider failed to meet the standards, and the causal relationship between that failure and the injury, harm, or damages claimed." *Id.* § 13.01(r)(6). "If a plaintiff timely files an expert report and the defendant moves to dismiss because of the report's inadequacy, the trial court must grant the motion '*only if* it appears to the court, after hearing, that the report does not represent a *good faith effort* to comply with the definition of an expert report in Subsection (r)(6) of this section.'" *Bowie Mem'l Hosp. v. Wright*, 79 S.W.3d 48, 51–52 (Tex. 2002) (per curiam) (quoting § 13.01(l)). Dismissal for failure to serve an adequate expert report also carried mandatory sanctions, requiring an award to the defendant of his costs and attorney's fees against the plaintiff or the plaintiff's attorney. *See Am. Transitional Care Ctrs. of Tex., Inc. v. Palacios*, 46 S.W.3d 873, 877 (Tex. 2001) (citing § 13.01(e)).

We have defined a "good-faith effort" as one that provides information sufficient to (1) "inform the defendant of the specific conduct the plaintiff has called into question," and (2) "provide a basis for the trial court to conclude that the claims have merit." *Wright*, 79 S.W.3d

at 52 (citing *Palacios*, 46 S.W.3d at 879). All information needed for this inquiry is found within the four corners of the expert report, which need not "marshal all the plaintiff's proof" but must include the expert's opinion on each of the three main elements: standard of care, breach, and causation. *Id.* Importantly for this case, the "report cannot merely state the expert's conclusions about these elements," but "'the expert must explain the basis of his statements to link his conclusions to the facts.'" *Id.* (quoting *Earle v. Ratliff*, 998 S.W.2d 882, 890 (Tex. 1999)). "A report that merely states the expert's conclusions about the standard of care, breach, and causation" does not fulfill the two purposes of a good-faith effort. *Palacios*, 46 S.W.3d at 879.

We review the trial court's grant or denial of a motion for sanctions and dismissal under the abuse-of-discretion standard. *Palacios*, 46 S.W.3d at 877–78. A district court "abuses its discretion if it acts in an arbitrary or unreasonable manner without reference to any guiding rules or principles." *Wright*, 79 S.W.3d at 52 (citing *Downer v. Aquamarine Operators, Inc.*, 701 S.W.2d 238, 241–42 (Tex. 1985)).

Dr. Jelinek argues that the Casases' report is deficient in two ways, failing (1) to state the applicable standard of care, and (2) to provide more than conclusory statements of causation. We focus on the latter. Dr. Daller's report concluded that Dr. Jelinek's breach of the appropriate standard of care in "reasonable medical probability, resulted in a prolonged hospital course and increased pain and suffering being experienced by Ms. Casas." Aside from repeating essentially the same phrase twice more, the report says nothing more regarding causation. The Casases argue this statement is sufficient to meet the good-faith requirement. We disagree.

An expert cannot simply opine that the breach caused the injury. Stated so briefly, the report fails the second *Palacios* element—it does not give the trial court any reasonable basis for concluding that the lawsuit has merit. *See* 46 S.W.3d at 879. An expert's conclusion that "in medical probability" one event caused another differs little, without an explanation tying the conclusion to the facts, from an *ipse dixit*, which we have consistently criticized. *See Pollock*, 284 S.W.3d at 818 (citing *Burrow*, 997 S.W.2d at 235); *Earle*, 998 S.W.2d at 890 ("An expert's simple *ipse dixit* is insufficient to establish a matter; rather, the expert must explain the basis of his statements to link his conclusions to the facts."). Instead, the expert must go further and explain, to a reasonable degree, how and why the breach caused the injury based on the facts presented. While we have said that no "magical words" need be used to meet the good-faith requirement, mere invocation of the phrase "medical probability" is likewise no guarantee that the report will be found adequate. *See Wright*, 79 S.W.3d at 53.

Under these standards, the Casases' report is conclusory on causation. It offers no more than a bare assertion that Dr. Jelinek's breach resulted in increased pain and suffering and a prolonged hospital stay. Beyond that statement, the report offers no explanation of how the breach caused the injury. Again, the plaintiff need not marshal all of his proof in the report, but he must include sufficient detail to allow the trial court to determine if the claim has merit. Because the Casases' report lacks any explanation linking the expert's conclusion to the relevant facts, we hold that the trial court abused its discretion by denying Dr. Jelinek's motion and the court of appeals erred by

affirming that ruling.[9] *See id.* at 52. Accordingly, we remand the case to the trial court for an award of attorney's fees and costs[10] under former article 4590i § 13.01(e) against the Casases and their counsel.[11]

---

[9] In his dissent, CHIEF JUSTICE JEFFERSON argues that an expert report need not meet the legal sufficiency requirements necessary to support a judgment and suggests that we hold it must. We agree that an expert report need not "meet the same requirements as the evidence offered in a summary-judgment proceeding or at trial." *Palacios*, 46 S.W.3d at 879. But, as we stated earlier, the report must provide more than conclusory statements concerning applicable standards of care, breach of those standards, and causation. *See id.* An expert report must instead, within its four corners, provide some explanation as to each of these elements. TEX. REV. CIV. STAT. art. 4590i § 13.01(r)(6); *Wright*, 79 S.W.3d at 52. The report here offered only a conclusory statement concerning causation with no explanation as to how the lapse in antibiotic treatment resulted in longer hospitalization, increased pain and suffering, or ultimately Casas's death.

[10] In her dissent, JUSTICE LEHRMANN indicates that (1) she would remand the case to allow the Casases an opportunity to show that their failure to present an adequate report was not intentional or the result of conscious indifference, and (2) Dr. Jelinek should not be entitled to attorney's fees and costs if the Casases can make this showing and submit an adequate report. We note that the Casases did not request a remand of this nature, nor brief the attorney's fees issue. *See State v. Brown*, 262 S.W.3d 365, 370 (Tex. 2008) (observing that "[a] party generally is not entitled to relief it does not seek" and refusing to sua sponte grant relief that was not sought); *Fed. Sign v. Tex. S. Univ.*, 951 S.W.2d 401, 410 (Tex. 1997) (noting that ordinarily, failure to brief an argument waives error on appeal); TEX. R. APP. P. 38.1(h).

[11] We briefly note that under former article 4590i a trial court's order denying a motion to dismiss premised on an inadequate expert report was not immediately appealable, as it now is under Texas Civil Practice and Remedies Code §§ 51.014 and 74.351. Nor did we definitively say that mandamus review was appropriate for such orders until almost four years after the trial court denied Dr. Jelinek's motion for dismissal and sanctions. *See In re McAllen Med. Ctr., Inc.*, 275 S.W.3d 458, 461–62 (Tex. 2008). Thus, we do not fault Dr. Jelinek for waiting until final judgment to seek review of the trial court's order. *See Hernandez v. Ebrom*, 289 S.W.3d 316, 318 (Tex. 2009) ("Generally, appeals may only be taken from final judgments . . . .").

We mention this point because we have since cautioned that a defendant—having foregone the interlocutory appeal now available—risks losing the right to appeal following final judgment if, after a trial on the merits, the jury finds the defendant liable. *See id.* at 321. Even if the present statute applied here, this caution would not bar Dr. Jelinek's appeal because he was not a party at trial, having been nonsuited earlier. We will not bar a nonsuited defendant's appeal after final judgment because the jury finds him liable at a former codefendant's trial. Such a defendant did not call or cross-examine witnesses, present evidence, or otherwise participate at trial and should not be bound by what happens there.

III. Conclusion

For the foregoing reasons, we reverse the court of appeals' judgment, render judgment that the Casases take nothing, and remand to the trial court for an award of Dr. Jelinek's attorney's fees and costs consistent with this opinion.

OPINION DELIVERED: December 3, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-1066

MICHAEL T. JELINEK, M.D. AND COLUMBIA RIO GRANDE HEALTHCARE, L.P. D/B/A RIO GRANDE REGIONAL HOSPITAL, PETITIONERS,

v.

FRANCISCO CASAS AND ALFREDO DELEON, JR., AS PERSONAL REPRESENTATIVES OF THE ESTATE OF ELOISA CASAS, DECEASED, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRTEENTH DISTRICT OF TEXAS

Argued February 18, 2010

CHIEF JUSTICE JEFFERSON, joined by JUSTICE GREEN and JUSTICE LEHRMANN, dissenting in part.

We must decide whether an expert report gave a "fair summary" of the expert's opinions regarding standard of care, failure to meet the standard, and the link between that failure and the patient's damages. We must consider the expert's opinions "as of the date of the report." TEX. REV. CIV. STAT. art. 4590i § 13.01(r)(6) (repealed 2003). To do so, we must disregard today's holding that, at trial, there was no evidence linking the discontinuation of antibiotics to increased suffering by Casas. The expert report submitted in this case gave fair notice of a meritorious claim—that the doctor failed to ensure that his patient received antibiotics, thereby increasing her pain and suffering. I would affirm the court of appeals' judgment with respect to the doctor.

I. Background

Eloisa Casas, a patient recently diagnosed with colon cancer, was admitted to Rio Grande Hospital for abdominal pain. The cancer had perforated her colon, the contents of which leaked into her abdominal cavity, causing an abscess. After the doctor drained and surgically removed the abscess, he discovered that Casas had an E. coli infection, for which the doctor prescribed two antibiotics. Although those prescriptions were supposed to have been renewed five days later, they lapsed. Casas contends this mistake occurred because the doctor failed to ensure that hospital staff complied with his renewal order. During the four days after the prescriptions expired, Casas's surgical incision began to emit a putrid odor. She developed several infections in addition to E. coli, exacerbating her pain and extending her stay in the hospital. Casas died two months after she was discharged.

Casas's estate sued the Hospital and two of the treating doctors, Dr. Garcia-Cantu and Dr. Jelinek, for negligently causing Mrs. Casas "grievous embarrassment and humiliation, as well as excruciating pain the remainder of her life which she would not have suffered to such degree if properly diagnosed, treated and cared for . . . ." The trial court denied Dr. Jelinek's motion to dismiss the case against him. Nevertheless, the estate nonsuited both doctors more than a year before Casas's claim against the Hospital was tried to a jury. At that trial, the jury found the hospital 90% negligent, and each doctor 5% negligent. The trial court rendered judgment against the hospital, and the court's order non-suiting Dr. Jelinek "with prejudice" merged into that final judgment.

Dr. Jelinek and the hospital appealed the trial court's judgment. The hospital complained that the evidence was legally insufficient to support the verdict. Dr. Jelinek complained that the trial

court improperly denied him attorney's fees, as the expert report was not a good faith effort to comply with statutory requirements. The court of appeals affirmed, 2008 Tex. App. LEXIS 5647, *28-*29, and the appellants below are now petitioners here. I fully join the Court's rendition of judgment for the hospital. I disagree with the Court's holding as to the doctor.

II. Good faith effort; fair summary

Former article 4590i provided that "[a] court shall grant a motion challenging the adequacy of an expert report only if it appears to the court, after hearing, that the report does not represent a good faith effort to comply with the definition of an expert report in [the statute]." TEX. REV. CIV. STAT. art. 4590i § 13.01(l). "That definition requires, as to each defendant, a fair summary of the expert's opinions about the applicable standard of care, the manner in which the care failed to meet that standard, and the causal relationship between that failure and the claimed injury." *Am. Transitional Care Ctrs. of Tex., Inc. v. Palacios*, 46 S.W.3d 873, 878 (Tex. 2001) (citing TEX. REV. CIV. STAT. art. 4590i § 13.01(r)(6)). Because an expert report is filed long before discovery is complete, we cannot judge it according to what subsequent discovery reveals or how the evidence develops at trial. The question is whether the report fairly summarizes the malpractice elements before the case is tested in a full adversary process. For that reason, "to avoid dismissal, a plaintiff need not present evidence in the report as if it were actually litigating the merits. The report can be informal in that the information in the report does not have to meet the same requirements as the evidence offered in a summary-judgment proceeding or at trial." *Id*. at 879.

The report must also give the defendant notice of the conduct the plaintiff challenges, and the trial court must have a basis to determine whether the claim has merit. *Id*. The dividing line

between a sufficient and an inadequate report is impossible to draw precisely. We have said, therefore, that the determination must be made in the first instance by the trial court, and review of that decision asks not how an appellate court would have resolved the issue, but instead whether the trial court abused its discretion. *See, e.g.*, *Jernigan v. Langley*, 195 S.W.3d 91, 93 (Tex. 2006); *Walker v. Gutierrez*, 111 S.W.3d 56, 63 (Tex. 2003).

III. Dr. Daller's report

Dr. Daller is a physician and an expert on intra-abdominal abscesses and infection. His report states that a doctor treating a patient like Casas must ensure that the antibiotics he prescribes are actually administered. Despite that standard, Dr. Daller states that antibiotics prescribed for Ms. Casas were not administered from July 17 through July 23, even though "[t]here [wa]s no order to discontinue the antibiotic therapy." He concluded that Dr. Jelinek breached the standard of care by his "failure to recognize that the antibiotics were not being administered as ordered." Dr. Daller concludes that "[t]his breach in the standard of care . . . , within reasonable medical probability, resulted in a prolonged hospital course and increased pain and suffering . . . ."

IV. Dr. Daller gave a "fair summary" of the required standard of care and how the allegedly inadequate care fell below that standard.

The Court concludes that Dr. Daller's report lacks the detail necessary to conclude that the estate's lawsuit has merit. But the cases it cites as support involve situations in which a hindsight view is entirely appropriate. *Earle v. Ratliff*, for example, is a summary judgment case; it presents the higher evidentiary standard that *Palacios* rejected for expert reports. *Earle v. Ratliff*, 998 S.W.2d 882, 890 (Tex. 1999) ("Summary judgment can be granted on the affidavit of an interested expert

witness, . . . but the affidavit must not be conclusory. . . . [R]ather, the expert must explain the basis of his statements to link his conclusions to the facts."). Similarly, the standard employed in *City of San Antonio v. Pollock*, 284 S.W.3d 809, 817-18 (Tex. 2009), also cited by the Court, is inapplicable here, since it examined an expert report under the "no evidence" standard of review. *See* ___S.W.3d at___.

In *Palacios* we held that an expert report that failed to articulate a standard of care or explain how the defendant hospital breached that standard was not a good faith effort to comply with the statutory requirements. *Palacios*, 46 S.W.3d at 880. The expert in that case blamed the hospital for taking no action to prevent a patient from falling out of his bed, even though the patient "had a habit of trying to undo his restraints." *Id*. at 879-880. The report, as such, was not a fair summary of the evidence because it neglected to articulate what actions the hospital *should* have taken that it did not. *Id*. at 880. Thus, the trial court did not abuse its discretion by dismissing the plaintiff's claim for lack of a good faith effort to summarize the expert's opinions.

Subsequently, in *Bowie Memorial Hospital v. Wright,* we held that the trial court did not abuse its discretion in concluding that an expert report failed to comply with the statute, as the report did not "establish how any act or omission of employees of Bowie Memorial Hospital caused or contributed to [the patient's] injuries." *See Bowie Mem'l Hosp. v. Wright*, 79 S.W.3d 48, 51-53 (Tex. 2002) (quoting the expert in that case as speculating, "I do believe that it is reasonable to believe that if the x-rays would have been correctly read and the appropriate medical personnel acted upon those findings then [the plaintiff] would have had the possibility of a better outcome."). We observed that a report must satisfy *Palacios*'s two-part test. *Id*. at 52. Because the report "lack[ed]

information linking the expert's conclusion (that [the plaintiff] might have had a better outcome) to [the defendant's] alleged breach (that it did not correctly read and act upon the x-rays), the trial court could have reasonably determined that the report was conclusory." *Id*. at 53.

In each of those cases, the trial court could not have evaluated the claim's merit without speculating about actions the defendant could have taken to prevent injury. No such speculation is required here. Dr. Daller states that had the antibiotics been administered from July 17 through July 23, Eloisa Casas would have suffered less. Dr. Daller could have stated that conclusion in greater detail, of course, but "[a] report need not marshal all the plaintiff's proof." *Palacios,* 46 S.W.3d at 878. Daller's report includes his opinions on (1) the applicable standard of care (to maintain vigilance over a patient's treatment), (2) the manner in which the care failed to meet that standard (failing to ensure the treatment he ordered was actually administered), and (3) the causal connection between the failure and the claimed injury (without the antibiotics, the patient's pain and suffering increased and she required additional hospitalization).

A "good faith effort" does not require that the report "meet the same requirements as the evidence offered in a summary-judgment proceeding or at trial"; therefore, an expert report does not fail the good faith effort test merely because it may not later prove legally sufficient to support a judgment. *Id*. at 879. So, here, whether the Casas estate ultimately amassed sufficient proof in an adversarial trial is beside the point; the claim itself was far from frivolous. *See id*. at 878 (noting that "one purpose of the expert-report requirement is to deter frivolous claims"). The law imposes a penalty for filing a frivolous suit. Only by today's decree does it also punish a claimant for failing to win an arguably meritorious case. *Cf. TransAmerican Natural Gas Corp. v. Powell*, 811 S.W.2d

913, 918 (1991) (holding that "sanctions cannot be used to adjudicate the merits of a party's claims or defenses unless a party's hindrance of the . . . process justifies a presumption that its claims or defenses lack merit.").

I agree with the Court that the Estate failed to prove causation at trial; I disagree that, as to Dr. Jelinek, the expert report was not a good faith attempt to comply with the statute. I respectfully dissent in part from the Court's judgment.

Wallace B. Jefferson
Chief Justice

OPINION DELIVERED: December 3, 2010

IN THE SUPREME COURT OF TEXAS

NO. 08-1066

MICHAEL T. JELINEK, M.D. AND COLUMBIA RIO GRANDE HEALTHCARE, L.P. D/B/A RIO GRANDE REGIONAL HOSPITAL, PETITIONERS,

v.

FRANCISCO CASAS AND ALFREDO DELEON, JR., AS PERSONAL REPRESENTATIVES OF THE ESTATE OF ELOISA CASAS, DECEASED, RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRTEENTH DISTRICT OF TEXAS

Argued February 18, 2010

JUSTICE LEHRMANN, dissenting in part.

I fully join Chief Justice Jefferson's dissent. I write separately, however, to highlight the incongruity inherent in the Court's decision to remand the case for an award of attorney's fees and costs under former article 4590i § 13.01(e), given this case's circumstances. *See* TEX. REV. CIV. STAT. art. 4590i § 13.01(e) (repealed 2003)[1]. The Court presumes that Dr. Michael Jelinek is entitled to attorney's fees because the expert report filed by Eloisa Casas's estate[2] was, on appeal,

[1] *See* Act of May 5, 1995, 74th Leg., R.S., ch. 140, § 1, 1995 Tex. Gen. Laws 985, 986, *amending* the Medical Liability and Insurance Improvement Act of Texas, Act of May 30, 1977, 65th Leg., R.S., ch. 817, 1977 Tex. Gen. Laws 2039, 2041, *repealed by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.09, 2003 Tex. Gen. Laws 847, 884. For ease of reference, I will refer to the relevant provisions as they were identified in article 4590i.

[2] I refer to the estate, which was represented by Casas's husband and son, as "the Casases."

determined to be insufficient. But, after a pre-trial hearing was held on the defendant's motion to dismiss the lawsuit, the trial court rejected Dr. Jelinek's contention that the report was inadequate; consequently, the Casases had no opportunity to rectify any deficiencies as the statute and our precedent would have allowed.

Section 13.01(e) of article 4590i provided for an order awarding attorney's fees and costs if a health care claimant failed to supply an expert report within the time required under subsection (d)—180 days. But the statute provided several avenues for health care claimants to obtain an extension of the 180-day deadline, including section 13.01(g). That provision required the trial court to grant a thirty-day extension of the statutory deadline if a claimant's failure to provide an expert report was not intentional or the result of conscious indifference. And we have expressly held that "a party who files a timely but inadequate expert report may seek relief under the grace period provisions of section 13.01(g)." *Walker v. Gutierrez*, 111 S.W.3d 56, 62 (Tex. 2003). Thus, health care claimants could receive an opportunity to rectify deficiencies in a report if they could show that they did not intentionally, or with conscious indifference, submit an inadequate report.

Here, the Casases never had the chance to request an opportunity to cure any deficiencies in their report because the trial court determined that the report adequately complied with section 13.01(d). In *Gutierrez*, we were guided by our recognition that it would be "perverse" to allow a claimant who filed no report a second chance to comply with the statute's expert report requirement, while "punishing those who attempt to comply with the statute but fail." *Id.* In this case, perversely, the Casases may have been in a better position than they are now if the trial court had found that the report was inadequate; they might have had an opportunity to eliminate any deficiencies.

I agree fully with Chief Justice Jefferson that the report represents a good-faith effort to comply with section 13.01. Even if it did not, however, I would remand the case to allow the Casases an opportunity to show that their failure to present an adequate report was not intentional or the result of conscious indifference. See City of DeSoto v. White, 288 S.W.3d 389, 401 (Tex. 2009) (remanding in the interest of justice *sua sponte* to allow police officer "to make an appellate election with full knowledge of his appellate rights and with knowledge of" the guidance provided in Court's opinion). In my view, the Casases should not be assessed attorney's fees and costs if they can make the showing section 13.01(g) requires and then submit a report complying with the statute. For these reasons, as well as those expressed by Chief Justice Jefferson, I respectfully dissent in part.

OPINION DELIVERED: December 3, 2010

IN THE SUPREME COURT OF TEXAS

NO. 09-0025

HARRIS METHODIST FORT WORTH, PETITIONER,

v.

JO FAWN OLLIE, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE SECOND DISTRICT OF TEXAS

PER CURIAM

At issue in this appeal is whether a patient's claim against a hospital for injuries suffered when she slipped and fell on a wet bathroom floor during her post-operative confinement constitutes a health care liability claim (HCLC). We hold that it does.

Jo Fawn Ollie underwent total arthroplasty knee replacement surgery at Harris Methodist Hospital. She alleges that during her post-surgery hospitalization she took a bath, slipped on the wet floor while getting out of the bathtub, and injured her right shoulder. She sued the hospital.

In Ollie's original petition she asserted under a "general negligence theory" that the hospital owed her "the duty to provide a safe environment, maintained properly, so as to not cause harm and/or injury." She claimed that the hospital breached that duty by failing to properly maintain the floor and warn her of the dangerous condition. In a separate part of her pleading, Ollie asserted what she labeled as a "medical malpractice" cause of action based on the same facts as her general

negligence claim. In the medical malpractice section of her pleadings, she claimed the hospital breached its duty "by failing to provide a safe environment, maintained properly, so as to not cause harm and/or injury." She alleged that Harris Methodist breached that duty in the same manner as it was generally negligent: by failing to properly maintain the floor and warn her of the dangerous condition. On the day she filed suit Ollie sent the hospital a statutory notice letter. *See* TEX. CIV. PRAC. & REM. CODE § 74.051(a). She subsequently amended her petition and omitted the allegations that had been labeled as a medical malpractice claim.

Ollie did not serve an expert report, so the hospital filed a motion to dismiss. *See* TEX. CIV. PRAC. & REM. CODE § 74.351(a) (requiring an HCLC claimant to serve an expert report within 120 days of filing suit). The trial court denied the hospital's motion. A divided court of appeals affirmed, concluding that Ollie's claim was for a breach of ordinary care and thus was not an HCLC. ___ S.W.3d ___. The dissenting justice was of the opinion that the claim was an HCLC because Ollie claimed that the hospital's actions departed from accepted standards of safety and were directly related to actions Harris Methodist took or failed to take during her confinement. ___ S.W.3d ___ (Walker, J., dissenting).

In this Court, the hospital argues that the court of appeals erred (1) in its construction of the definition of an HCLC, and (2) by concluding that Ollie's claim is not an HCLC. Ollie maintains that the court of appeals was correct: her claim is not an HCLC and she was not required to serve an expert report. We disagree with Ollie.

In 2003, the Texas Legislature repealed the Texas Medical Liability and Insurance Improvement Act and recodified it in the Texas Civil Practice and Remedies Code as the Texas

Medical Liability Act.[1] At that time the definition of "health care liability claim" was amended to add the phrase "or professional or administrative services directly related to health care." As applicable to Ollie's case, an HCLC is

> [a] cause of action against a health care provider or physician for treatment, lack of treatment, or other claimed departure from accepted standards of medical care, or health care, or safety or professional or administrative services directly related to health care, which proximately results in injury to or death of a claimant, whether the claimant's claim or cause of action sounds in tort or contract.

TEX. CIV. PRAC. & REM. CODE § 74.001(a)(13). "Health care" remained defined as

> any act or treatment performed or furnished, or that should have been performed or furnished, by any health care provider for, to, or on behalf of a patient during the patient's medical care, treatment, or confinement.

Id. § 74.001(a)(10); *see Diversicare v. Rubio*, 185 S.W.3d 842, 847 (Tex. 2005) (describing health care as "broadly defined"). The TMLA does not define "safety." *See id.*

In support of its argument that Ollie's claim is an HCLC because it is a claimed departure from accepted standards of safety, Harris Methodist first argues that section 74.001(a)(13) does not require that a safety claim be "directly related to health care." The hospital maintains that the Legislature did not intend to substantively alter the scope of the definition by adding language to section 74.001(a)(13). It proposes we construe the statute to mean that "directly related to health care" modifies only the words "professional or administrative services" and not the word "safety." *See* Act of June 2, 2003, 78th Leg., R.S., ch. 204, §§ 10.01, 10.09, 2003 Tex. Gen. Laws 847, 864, 884 (current version at TEX. CIV. PRAC. & REM. CODE § 74.001(a)(13)). The hospital further asserts

[1] Medical Liability and Insurance Improvement Act, 65th Leg., R.S., ch. 817, 1977 Tex. Gen. Laws 2039, *repealed by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 10.09, 2003 Tex. Gen. Laws 847, 884 (current version at TEX. CIV. PRAC. & REM. CODE §§ 74.001-.507).

that even if the statute requires that safety claims be directly related to health care to be HCLCs, Ollie's claim is so related. We agree that Ollie's claim is directly related to health care and is an HCLC.[2]

In determining whether a claim falls within the scope of section 74.001(a)(13), courts are not bound by the form of the pleading. *See Yamada v. Friend*, ___ S.W.3d ___, ___ (2010); *Diversicare*, 185 S.W.3d at 847; *Garland Cmty. Hosp. v. Rose*, 156 S.W.3d 541, 543-44 (Tex. 2004). Rather, the underlying nature of the claim determines whether it is an HCLC, and the statutory requirements cannot be circumvented by artful pleading. *Yamada*, ___ S.W.3d. at ___. Thus, it is the underlying nature of Ollie's claim that determines whether the claim is for a departure from accepted standards of safety relating to "an act . . . that should have been performed or furnished by [Harris Methodist] for, to, or on behalf of [Ollie] during [Ollie's] medical care, treatment, or confinement." *See* TEX. CIV. PRAC. & REM. CODE § 74.001(a)(10), (13). And services a hospital provides its patients necessarily include those services required to meet patients' fundamental needs such as cleanliness—whether that cleanliness is obtained by means of hospital employees cleaning or bathing the patient, or by providing means for the patient to do so herself—and safety.

The essence of Ollie's claim centers on the failure of Harris Methodist to act with a proper degree of care to furnish a dry floor, warn her of the hazards of a wet bathroom floor, or some similar failure to act. *See Garland*, 156 S.W.3d at 543-44 (explaining that the Court is not bound by the manner in which the plaintiff's pleadings characterize the claim in determining whether the claim

[2] Because we agree with Harris Methodist that Ollie's safety claim is directly related to health care, we need not address here whether safety claims must be so related to fall within the definition of an HCLC. *See* TEX. CIV. PRAC. & REM. CODE § 74.001(a)(10), (13).

is an HCLC). Ollie's pleadings show that her action is a safety claim directly related to services meeting her fundamental needs. The claim falls within the statutory definition of an HCLC and she was required to serve an expert report. *See* TEX. CIV. PRAC. & REM. CODE § 74.001(a)(13).

Because Ollie was required to, but did not, serve an expert report, the trial court should have dismissed her claim. The court of appeals erred in holding otherwise.

Harris Methodist requested its attorney's fees and costs in the trial court pursuant to Texas Civil Practice and Remedies Code section 74.351(b)(1). Accordingly, we reverse the court of appeals' judgment and remand the case to the trial court with instructions to dismiss Ollie's claims against Harris Methodist and consider the hospital's request for attorney's fees and costs.

OPINION DELIVERED: May 13, 2011

IN THE SUPREME COURT OF TEXAS

NO. 09-0026

WIND MOUNTAIN RANCH, LLC, PETITIONER,

v.

CITY OF TEMPLE, TEXAS, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE SEVENTH DISTRICT OF TEXAS

PER CURIAM

In this case, we decide whether Wind Mountain Ranch's foreclosure of its deed-of-trust lien was barred by limitations. Texas registration law allows debtors and creditors to suspend limitations, but requires that extension agreements be recorded. TEX. CIV. PRAC. & REM. CODE § 16.037. Today's question is whether a bankruptcy order enforcing a Chapter 11 restructuring plan is a debtor-creditor extension agreement under the terms of the statute. We answer "no"—a bankruptcy order is not subject to section 16.037's recording requirements. We reverse the court of appeals' judgment and, without hearing oral argument, render judgment in favor of Wind Mountain Ranch.

Robert K. Utley, as trustee, signed a note secured by a deed of trust encumbering 6.16 acres of land in Bell County, Texas. The note was set to mature in 1993. The property was later conveyed

to Centex Investments. Centex agreed to assume all of Utley's obligations under the note and deed of trust. In 1992, Centex commenced voluntary Chapter 11 proceedings in the Central District of California. A *lis pendens* referencing the ongoing Chapter 11 proceeding was recorded in the real-property records of Bell County. The bankruptcy court confirmed Centex's reorganization plan and issued an order in 1994. The reorganization plan extended the note's 1993 maturity date to 1999. Neither Centex's reorganization plan, nor the bankruptcy court's confirmation order were filed in Bell County.

The City of Temple, alleging numerous municipal code violations, filed suit against Centex in 2002. The City obtained a judgment against Centex for $936,250 in December 2002, and recorded an abstract of its judgment on May 22, 2003. On July 3, 2003, the note and deed of trust were assigned to Wind Mountain Ranch. Wind Mountain then acquired the 6.16 acres securing the note at a non-judicial foreclosure sale.

Following Wind Mountain's acquisition, the City brought claims of fraudulent transfer, wrongful foreclosure, and conspiracy. The City also sought a declaration that, because the foreclosure occurred after the four-year statute of limitations lapsed, Wind Mountain's foreclosure was invalid. The City further contends that the extension of the maturity date was never recorded in Bell County, and is therefore void. The City presumes that the bankruptcy order, and its extension of the maturity date, was effectively an extension agreement subject to section 16.037's recording requirements.

Following a bench trial, the trial court rendered judgment for the City. The court of appeals affirmed, holding the order was subject to section 16.037. *Wind Mountain Ranch, LLC v. City of Temple*, ___ S.W.3d ___. The court of appeals noted that Texas registration laws "seek[] to require that the public records disclose all matters affecting land titles." *Id.* (internal citation omitted). The court further held that, although the *lis pendens* was constructive notice of the California bankruptcy proceeding, it was not actual notice. *Id.*

A party who sues to recover real property subject to a lien or who intends to foreclose on a lien encumbering real property must do so within four years of the date on which the cause of action accrues. TEX. CIV. PRAC. & REM. CODE § 16.035(a). "The party or parties primarily liable for a debt or obligation secured by a real property lien" may suspend the statute of limitations on the lien by executing a written extension agreement. *Id.* § 16.036(a). The Code further requires that any such agreements are to be filed in the county clerk's office and "signed and acknowledged as provided by law for a deed conveying real property." *Id.* § 16.036(b). An extension agreement is without effect against "a bona fide purchaser for value, a lienholder, or a lessee" who, "without actual notice of the agreement and before the agreement is acknowledged, filed, and recorded," deals with the real property that is subject to a lien. *Id.* § 16.037.

Guided by the principle that the words the Legislature uses are the clearest guide to its intent, we begin our analysis with the statute's plain language. *Entergy Gulf States, Inc. v. Summers*, 282 S.W.3d 433, 437 (Tex. 2009). When the words of the statute are clear and unambiguous we interpret

them according to their plain and common meaning. *City of Rockwell v. Hughes*, 246 S.W.3d 621, 625–26 (Tex. 2008). That the Civil Practice and Remedies Code requires an extension *agreement* to be recorded is not in dispute; however, its plain language imposes no such requirement on a bankruptcy court order. TEX. CIV. PRAC. & REM. CODE §§ 16.035–.037. Neither can we say that an order issued by the bankruptcy court amounts to an agreement between the parties. *See id.* § 16.036(b). It necessarily follows that a bankruptcy court order need not be recorded to effectively extend a note's maturity date. The Code's requirements for recording an extension agreement are clear and unambiguous; we therefore decline to look beyond the statute's plain language. As such, the maturity date of the note was effectively extended to 1999. Wind Mountain foreclosed on the property before the statute of limitations lapsed, and its interest is superior to the City's.

Accordingly, without hearing oral argument, we reverse the court of appeals' judgment and render judgment for Wind Mountain Ranch. TEX. R. APP. P. 59.1, 60.2(d).

OPINION DELIVERED: December 3, 2010

IN THE SUPREME COURT OF TEXAS

NO. 09-0039

BIC PEN CORPORATION, PETITIONER,

v.

JANACE M. CARTER, AS NEXT FRIEND OF BRITTANY CARTER, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRTEENTH DISTRICT OF TEXAS

Argued March 23, 2010

JUSTICE JOHNSON delivered the opinion of the Court.

JUSTICE GREEN did not participate in the decision.

Six-year-old Brittany Carter was burned when her five-year-old brother accidently set fire to her dress with a BIC lighter. The trial court entered judgment against BIC based on jury findings that the lighter was defectively designed and manufactured and that each of the defects caused Brittany's injuries. The court of appeals affirmed based on the defective design finding and did not reach BIC's other issues. *BIC Pen Corp. v. Carter*, 171 S.W.3d 657, 662 (Tex. App.—Corpus Christi 2005), *rev'd* 251 S.W.3d 500 (Tex. 2008). In a prior appeal we held that the design defect claim was preempted by federal law and remanded the case to the court of appeals. *BIC Pen Corp. v. Carter*, 251 S.W.3d 500, 511 (Tex. 2008). The court of appeals then affirmed the trial court's judgment based on the manufacturing defect finding. ___ S.W.3d ___.

We conclude that no evidence supports the finding that a manufacturing defect caused Brittany's injuries. We reverse and render judgment for BIC.

I. Background

Jonas Carter and his sister Brittany were playing when Jonas accidently set fire to Brittany's dress with a J-26 model BIC lighter (the Subject Lighter). Brittany was badly burned and Janace Carter, Brittany's mother, sued BIC as Brittany's next friend. Janace claimed that Brittany's injuries were the result of manufacturing and design defects in the Subject Lighter. A jury found that both types of defects were producing causes of Brittany's injuries. The trial court rendered judgment against BIC for actual and exemplary damages found by the jury. BIC appealed and the court of appeals affirmed. *BIC Pen*, 171 S.W.3d at 662. The appeals court held, in part, that the design defect claim was not preempted by federal law and the evidence was sufficient to support the finding that a design defect in the lighter was a producing cause of the fire that burned Brittany. *Id.*

We granted BIC's petition for review, held that the design defect claim was preempted by federal law, and remanded the case for the court of appeals to consider the remaining issues. *BIC Pen*, 251 S.W.3d at 511. On remand the court of appeals concluded that Carter's manufacturing defect claim was not preempted by federal law, the jury's finding on that claim was supported by the evidence, the trial court did not err by giving a spoliation instruction, and there was no evidence BIC acted with malice. ___ S.W.3d at ___. The appeals court affirmed the trial court's judgment as to actual damages and reversed and rendered as to exemplary damages. *Id.*

BIC again petitioned for review, asserting that (1) Carter's manufacturing defect claim is preempted by federal law, and (2) Carter did not prove a manufacturing defect caused Brittany's

injuries because there was no evidence (a) that the lighter varied from manufacturing specifications, (b) that the lighter was unreasonably dangerous, or (c) of causation. Carter filed a conditional petition for review, arguing that the court of appeals erred in reversing the award of punitive damages.

We conclude that Carter's manufacturing defect claim is not preempted by federal law. We further conclude, however, that the evidence is legally insufficient to support the finding that a manufacturing defect caused Brittany's injuries.

We first address BIC's assertion that Carter's manufacturing defect claim is preempted.

II. Preemption

A state law that conflicts with federal law is preempted and has no effect. U.S. CONST. art. VI, cl. 2; *Maryland v. Louisiana*, 451 U.S. 725, 747 (1981); *BIC Pen*, 251 S.W.3d at 504. State law may be preempted in three ways: (1) expressly, by a federal law specifically preempting state law; (2) impliedly, by the scope of a federal law or regulation indicating Congress intended the federal law or regulation to exclusively occupy the field; or (3) impliedly, by the state law conflicting with a federal law or regulation to the extent it is impossible to comply with both or by the state law obstructing Congress's objectives as reflected by the federal law. *BIC Pen*, 251 S.W.3d at 504.

A. Federal Standards

In 1972, the Consumer Product Safety Act (CPSA) created the Consumer Product Safety Commission (CPSC). The CPSC is an independent regulatory body charged with (1) protecting the public against unreasonable risks of injury associated with consumer products, (2) developing safety standards for consumer products, and (3) promoting research and investigation into the cause and

prevention of injuries. 15 U.S.C. §§ 2051(b)(1), (b)(2), (b)(4), 2053(a); *BIC Pen*, 251 S.W.3d at 503. As relevant to this matter, the CPSC analyzed costs and benefits to the public of requiring disposable lighters to be child resistant. It then adopted regulations requiring disposable lighters to be child resistant as to children under five years of age and standards for certifying lighters as child resistant. *BIC Pen*, 251 S.W.3d at 503; 16 C.F.R. § 1210.1. The CPSC does not impose design requirements on manufacturers. Rather, the child-resistance requirements are performance based so the burden is on manufacturers to design lighters that comply with the performance standards. *BIC Pen*, 251 S.W.3d at 504 (citing Safety Standard for Cigarette Lighters, 58 Fed. Reg. 37,580-81 (July 12, 1993) (codified at 16 C.F.R. pt. 1210)). Before a lighter may be distributed, the manufacturer must submit a detailed description of the lighter and its child resistant features to the CPSC and the lighter must be certified. 16 C.F.R. § 1210.15.

In order for a lighter such as BIC's J-26 to be certified as child resistant, CPSC requires that tests be performed to determine the extent to which children under five years of age can operate the lighter. At least eighty-five percent of the children who are tested must be unable to operate it. *BIC Pen*, 251 S.W.3d at 504; 16 C.F.R. § 1210.4(h)(1).

The CPSC regulations require a specific testing protocol to be followed for a lighter to be certified as child resistant. Before testing is begun, measurements are taken to ensure that all operating components on which child resistance is dependent are within designed tolerances. 16 C.F.R. § 1210.4(c)(4). The test protocol then begins with a panel of one hundred children ages forty-two to fifty-one months being divided into six groups of fifteen to seventeen children. The children on each panel must consist of three age groups: forty-two to forty-four months, forty-five to forty-

eight months, and forty-nine to fifity-one months, with approximately thirty, forty, and thirty percent of the children to be of the respective age groups. *See id.* § 1210.4. Each group uses one of six surrogate lighters that look like actual lighters, but emit signals rather than flames when operated. *Id.* Each child is given two five-minute attempts to operate the lighter being tested. If no more than ten of the children on the first test panel operate the lighter, the lighter is certified as child resistant and no further testing is necessary. *Id.* § 1210.4 (h)(1). If more than ten children on the first panel operate the lighter, however, another panel of 100 children is tested. *Id.* If no more than thirty of the 200 children on the two panels operate the lighter, it is certified as child resistant and no further testing is required. *Id.* § 1210.4(h)(2).

B. The J-26 Lighter

To operate a J-26 lighter, the user must press a shield over the sparkwheel and rotate the sparkwheel to generate a spark while pressing a fork near the sparkwheel to release fuel. In 1995, BIC reported to the CPSC that testing had been conducted on the J-26 and ninety percent of the children tested could not operate the surrogate lighters. The report set out specifications for the J-26's five components[1] that collectively resulted in the lighter being child-resistant: (1) the distance that the shield over the sparkwheel must be pushed down, (2) the force required to move the shield; (3) the distance the fork must move to release butane; (4) the force required to depress the fork; and (5) the force required to produce a spark by rotating the sparkwheel. Carter's manufacturing defect

[1] The report could be read to list six components. The parties reference five components and we will use their representations.

claim was that two components of the Subject Lighter, the shield force and the fork force, deviated from specifications BIC furnished to the CPSC.

In BIC's previous appeal, we noted that the savings clause in the CPSA allows state-law tort claims so long as they do not conflict with applicable federal regulations. *BIC Pen*, 251 S.W.3d 506. On that basis, we held Carter's design defect claim was preempted because the design of the J-26 was properly certified according to federal protocol, and state law imposing a higher common-law standard for child resistance would conflict with the federal regulations. *Id.* at 509. BIC asserts that Carter's manufacturing defect claim is similarly preempted because the imposition of manufacturing defect liability based on a product that complies with federal manufacturing requirements would impose a more strict standard than federal law.

C. Do Carter's Claims Impose a Higher Requirement

BIC argues that Carter's manufacturing defect claim effectively imposes a higher child-resistant standard than the CPSC standard because (1) the CPSC standard applies only to children under age five while Jonas was over age five and (2) the CPSC standards do not apply to children such as Jonas who are five years old or older, even if they suffer developmental delays. We disagree with the argument.

Carter's manufacturing defect claim is not based on whether the lighter would be child resistant as to older children in general, or even older children with developmental delays. Her claim is that BIC failed to manufacture the lighter to the specifications BIC submitted to the CPSC, the resulting manufacturing defect lessened the force required to operate the Subject Lighter, and the lighter was unreasonably dangerous because the defect reduced the force required to operate the

lighter. Thus, her claim that Jonas would not have been able to light the Subject lighter if BIC had manufactured it according to the specifications submitted to the CPSC does not add to the federal requirements for child resistant status.

BIC also asserts that the jury charge allowed the jury to decide—contrary to federal law—that no child of any age should be able to operate a lighter. BIC points to Carter's counsel's arguments during trial such as "if the cigarette lighter is supposed to be child-resistant, how was he able to use it," and claims that the jury was allowed to impose liability "merely because a 62-month old child was able to operate the Subject Lighter." BIC's argument has traction. However, we believe the argument does not implicate preemption; rather, it is directed toward the evidence and the jury instruction defining "unreasonably dangerous product" to which BIC did not object.

BIC also submits that the court of appeals held that the jury was entitled to assume the lighter deviated from BIC's internal specifications, which were more strict than specifications it submitted to the CPSC and, based on that assumption, the jury could have concluded that deviations from BIC's internal specifications resulted in a manufacturing defect. BIC asserts this conflicts with federal law by holding BIC liable for failing to meet internal goals that exceeded specifications it submitted to the CPSC. We do not agree.

The court of appeals held that "there was sufficient evidence adduced for the jury to have concluded that the 1995 [CPSC-submitted] specifications applied and that the Subject Lighter deviated from those specifications." ___ S.W.3d at ___. Although the court went on to discuss whether BIC failed to comply with its internal manufacturing specifications, the court noted that evidence of BIC's failure to comply with its internal specifications was an alternative basis for the

jury to have found liability. Carter's claim is not preempted simply because the court of appeals found an alternative ground for liability, and we need not determine whether a claim based solely on BIC's failure to comply with its internal specifications would be preempted.

BIC next asserts that in order for Carter's claim not to have been preempted, she was required to prove that the lighter failed to meet BIC's specifications to the extent it would not pass the eighty-five percent CPSC child testing protocol. BIC argues that imposing liability without such a showing would allow recovery for a variance from manufacturing specifications even if the lighter exceeded the performance-based CPSC mandated testing. This argument also fails. Under the court's charge, Carter was required to prove that a manufacturing variance was of such degree that it was a "defect" as defined in the jury charge, not that the lighter was child resistant. "Defect" was defined as "dangerous to an extent beyond that which would be contemplated by the ordinary user of the product with the ordinary knowledge common to the community as to the product's characteristics."

Finally, BIC claims that Carter's use of data regarding one particular surrogate lighter (surrogate 5) that was used by sixteen children in the J-26 testing is inconsistent with federal standards that require testing of 100 children. BIC asserts that to the extent Carter's claim is supported by this data, it obstructs the federal objectives and is preempted. But Carter presented the surrogate 5 data to demonstrate the effect of low force requirements on the ability of children to operate the J-26. A state law claim is preempted under the obstruction of federal objectives aspect of preemption analysis when state law imposes duties that conflict with the federal regulatory scheme. *BIC Pen*, 251 S.W.3d at 509. Carter's use of the surrogate 5 data was not an attempt to

impose a duty inconsistent with the federal regulatory scheme, and her use of the data does not form a basis for holding the manufacturing defect claim was preempted.

We conclude that Carter's manufacturing defect claim was not preempted and next address BIC's challenge to the jury's finding that there was a manufacturing defect in the Subject Lighter.

III. Manufacturing Defect

A manufacturing defect exists "when a product deviates, in its construction or quality, from the specifications or planned output in a manner that renders it unreasonably dangerous." *Id.* (quoting *Cooper Tire & Rubber Co. v. Mendez*, 204 S.W.3d 797, 800 (Tex. 2006)). First, BIC claims that Carter did not present any evidence of a deviation from manufacturing specifications. We disagree.

In 1995, BIC submitted specifications for child resistant features of the J-26 to the CPSC. Two years later it made design modifications to the lighter and submitted new specifications. BIC asserted in the court of appeals that the 1997 specifications, and not the 1995 specifications, applied to the Subject Lighter and the results of the Subject Lighter's tests could not support a finding that it was outside manufacturing specifications. The court of appeals held that there was sufficient evidence for the jury to have concluded that the 1995 specifications applied, and BIC does not challenge that holding here. *See* ___ S.W.3d ___. Rather, BIC asserts that the testing methods to determine compliance with the CPSC specifications in 1997 were different from the testing methods used in 1995, and the specifications BIC submitted to the CPSC did not set out the testing protocol. BIC claims that (1) when it performed the post-accident testing of the Subject Lighter it used 1997 testing methods so those test results were invalid to measure compliance with the 1995

specifications; and (2) the specifications it submitted to the CPSC were expressed as approximate ranges and even the post-accident testing showed that the subject lighter "approximately" complied with specifications. But BIC fails to address Carter's evidence to the contrary.

After Carter filed suit, BIC twice tested and measured the child-resistant features of the Subject Lighter. The specifications submitted to the CPSC in 1995 and the results from BIC's post-accident tests of the Subject Lighter's fork force and sparkwheel force were as follows:

	1995 Specifications	Post-accident Test 1	Post-accident Test 2
Fork Force	.4-.6 kg[2]	.353 kg	.349 kg
Sparkwheel Force	1.0-1.7 kg	.975 kg (Average)	.962 kg (Average)

In regard to the fork force testing, Carter presented evidence that the testing protocol BIC used in the post-accident test was actually used as early as 1994 when the 1995 specifications were developed. As for the sparkwheel force testing, Carter presented expert testimony that the post-accident measurements of the sparkwheel rotation force were consistent with the 1995 testing protocol, and the measurements were not within specifications. And with regard to BIC's assertion that the lighter showed "approximate" compliance with the specifications, Carter presented expert testimony that rounding measurements to meet specifications in the manner BIC described was unreasonable, even if the specifications themselves were designated as approximate. BIC does not challenge Carter's evidence or her expert's conclusions.

[2] One kilogram equals 2.2 pounds, or 35.3 ounces.

We conclude that Carter presented legally sufficient evidence that the subject lighter did not meet manufacturing specifications.

IV. Causation

BIC claims that even if the Subject Lighter deviated from specifications, Carter failed to prove that the deviation was a producing cause of Brittany's injuries. We agree.

The jury charge asked whether there was a manufacturing defect in the Subject Lighter "that was a producing cause of the occurrence in question." "Producing cause" was defined as "an efficient, exciting or contributing cause that, in a natural sequence, produced the occurrence."[3] A producing cause must be a cause-in-fact; that is, it must be a substantial factor in bringing about the injury, and a cause without which the injury would not have happened. *See Union Pump Co. v. Allbritton*, 898 S.W.2d 773, 775 (Tex. 1995) (noting that producing cause must be a cause-in-fact which "means that the defendant's act or omission was a substantial factor in bringing about the injury which would not otherwise have occurred").

The court of appeals noted that "the jury may determine causation based on circumstantial evidence." ___ S.W.3d at ___ (citing *Ford Motor Co. v. Ridgeway*, 135 S.W.3d 598, 601 (Tex. 2004)). Although we do not disagree generally with that statement, we disagree with how the court of appeals applied it in this case. The court of appeals' opinion was to the effect that the evidence at trial showed Jonas was playing with the Subject Lighter when he accidently caught Brittany's dress on fire; the Subject Lighter did not meet BIC's child-resistance specifications; and "[a]

[3] After the case was tried we held that "producing cause" should be defined as "a substantial factor in bringing about an injury, and without which the injury would not have occurred." *Ford Motor Co. v. Ledesma*, 242 S.W.3d 32, 46 (Tex. 2007).

reasonable finder of fact could infer from the circumstances of the case that the Subject Lighter's defect was a substantial cause of Brittany's injuries and that such injuries would not have occurred if the Subject Lighter complied with BIC's specifications." *Id.* However, evidence that components of a product deviated from manufacturing specifications, an accident occurred, and the deficient parts were involved in the accident is insufficient evidence to support a causation finding. *See Ledesma*, 242 S.W.3d at 41-42 (noting that the requirement of causation is separate from the requirement that the product deviated from specifications); *Mack Trucks v. Tamez*, 206 S.W.3d 572, 580-81 (Tex. 2006) (holding plaintiffs failed to present evidence of causation in a products liability case where, even assuming a fuel and battery system were defectively designed, there was no evidence a fire started because of the defects); *Volkswagon of Am., Inc. v. Ramirez*, 159 S.W.3d 897, 911 (Tex. 2004). Rather, there must have been some evidence that the fire that burned Brittany started because of the specific manufacturing defects and that absent those defects Brittany's injuries would not have occurred.

Expert testimony is generally required in manufacturing defect cases to prove that the specific defect caused the accident. *Ledesma*, 242 S.W.3d at 42 & n.23; *see Mack Trucks*, 206 S.W.3d at 583 ("Proof other than expert testimony will constitute some evidence of causation only when a layperson's general experience and common understanding would enable the layperson to determine from the evidence, with reasonable probability, the causal relationship between the event and the condition."). The reason is demonstrated by the facts of this case. The J-26 lighter had five child-resistant design features. The deviations from specifications for the Fork Force and Sparkwheel Force—two of the five features—were measured in small quantities. The 1995 minimum

specification for Fork Force was .4 kg and BIC's two post-accident tests of the Subject Lighter yielded readings of .353 kg and .349 kg. Thus, the test differences between the Subject Lighter and the minimum 1995 specification were .047 kg (1.6 ounces) and .051 kg (1.8 ounces). The 1995 minimum Sparkwheel Force specification was 1.0 kg. BIC's two post-accident tests of the Sparkwheel Force yielded readings of .975 kg and .962 kg. The differences between the two Subject Lighter test results and the minimum specification were .025 kg (.88 ounces) and .038 kg (1.34 ounces). In light of the five features that combined to make the lighter child resistant, the impact of the small deviations in two of those features on how the Subject Lighter would have functioned in the hands of a child such as Jonas is not an issue within a lay juror's general experience and common understanding. Therefore, we look to see if there is expert testimony to support the causation finding.

As previously noted, BIC submitted specifications to the CPSC regarding five characteristics of the J-26 that as a whole established compliance with the CPSC's child-resistance requirements. The characteristics were shield force, shield movement, fork force, fork movement, and sparkwheel force. There is no evidence that a lighter's failure to meet any particular one or more of the characteristics by some factor would negate the lighter's compliance with the CPSC requirements. The relationship between the five characteristics was not quantified and there was no determination of which characteristic was the most or least important with regard to those requirements.

BIC's two post-accident measurements of the Subject Lighter's Sparkwheel Force showed an average of .0315 kg (1.1 ounces) below the minimum specification. The post-accident measurements of the Fork Force showed an average of .049 kg (1.7 ounces) below the minimum.

Carter asserts that because the J-26 relied on force to provide child resistance the jury could have concluded that the deviations posed a significantly increased risk to a user of the lighter. But she does not point to evidence that would have guided the jury in determining what impact the small deviations would have had, either independently or when considered in conjunction with the other features. And as previously noted, the impact of the small deviations in two of the five factors designed to affect the Subject Lighter's operability is beyond a lay juror's general experience and common understanding.

Carter asserts that she circumstantially proved the impact of decreased force measurements through evidence of BIC's certification test of the J-26. BIC tested six surrogate lighters and overall only ten percent of the 100 children tested were able to operate the lighters. However, six of the sixteen children (37.5%) who were tested with surrogate 5 were able to operate it, and surrogate 5 had the lowest sparkwheel rotational force of all six surrogates—1.04 kg. This, Carter argues, illustrates the impact of low force measurements. However, this testing failed to demonstrate a causal link between lower sparkwheel force and an increased ability of children to operate the lighter. *See Merrell Dow Pharms., Inc. v. Havner*, 953 S.W.2d 706, 718 (Tex. 1997) (noting that studies showing an association between two matters or facts do not necessarily show a causal relationship between them). Other evidence showed that the number of children who could successfully operate the other five surrogate lighters did not decrease as the sparkwheel force of the other surrogates increased. For example, no children were able to operate surrogate 6 which had the second lowest sparkwheel rotational force of 1.13 kg while one child was able to operate the surrogate lighter with the highest sparkwheel rotational force of 1.49 kg.

Carter asserts that although the test results of the other surrogates do not show a correlation between sparkwheel rotational force and child resistance, such a correlation is not negated because other differences in the child-resistant characteristics also impacted the number of children who could operate the other surrogates. This argument, however, supports BIC's claim that all five child-resistance characteristics worked together to make its lighters compliant with the CPSC requirements. Additionally, in a 1997 test on the redesigned J-26 lighter, only four out of 100 children under the age of five years could operate the surrogate lighters. Although the lighter had been redesigned, it still used a sparkwheel that required rotation in order to generate sparks and the sparkwheel force (measured in the same manner as the force of surrogate 5) for at least one of the 1997 surrogates was less than the sparkwheel force of surrogate 5. The highest number of children who operated one particular surrogate in testing of the redesigned lighter was two.

Even more important than the statistics referenced above is the fact that even a lighter that meets CPSC child-resistant specifications is not intended to be completely inoperable by children, whether they are under or over five years of age. The specifications contemplate that some children less than five years old will be able to operate a lighter certified as child resistant. *See* 16 C.F.R. § 1210.3(a) (providing that a lighter subject to the CPSC requirements "shall be resistant to successful operation by at least 85 percent of the child-test panel"); Safety Standard for Cigarette Lighters, 58 Fed. Reg. 37,557, 37,578 (July 12, 1993) ("A lighter that no child under 5 could operate would likely be very difficult for adults to operate as well. In order for child-resistant lighters to address the risk of injury most effectively, adults must be willing to use them."). Because the lighter is designed so that when it is manufactured to specifications, it still can be operated by some children

even younger than five years of age, Carter had the burden to prove that Jonas probably would not have operated the lighter but for the manufacturing defects, regardless of his age and physical and mental condition. We next address whether she did so.

The witnesses at trial identified several human factors that impacted whether a child could successfully operate the lighters: dexterity, strength, motivation, hand size, and instruction the child received. Some of the J-26 lighter features that BIC identified as contributing to the lighter being child resistant were cognitive based—meaning a user would have to overcome a series of steps to operate the lighter. The cognitive-based characteristics required a user to depress the guard over the sparkwheel, rotate the sparkwheel in the correct direction, and depress the fork. The characteristics of the Subject Lighter that did not meet specifications—Sparkwheel force and Fork force—were not cognitive based, but were force based.

There was evidence that when Jonas was eight years and nine months old he was evaluated at Baylor College of Medicine. He had a normal physical evaluation and "visual perceptual/fine motor tasks at an 8 y/o level; [and] gross motor skills at appropriate age level." A year after the Baylor evaluation Jonas was evaluated by Dr. Mark Blotkey, a board certified child psychiatrist.

Although the Baylor evaluation rated Jonas's visual perceptual/fine motor tasks at an eight year old level, Dr. Blotkey testified that a child with developmental delay characteristics such as Jonas exhibited would have fine motor skill problems. But there was no evidence regarding, for example, Jonas's physical strength or the size of his hands or whether, once he overcame the cognitive-based features of the lighter he would not have been able to turn the sparkwheel or depress the fork had those forces met specifications. Dr. Blotkey testified that Jonas would have been

functioning below his age level at the time of the accident, but he did not explain what that meant in terms of his physical ability to turn the sparkwheel and depress the fork. That is, he did not explain whether either a .0315 kg increased force required to operate the sparkwheel or a .049 kg increased fork force, or both, probably would have prevented Jonas from operating the lighter.

Carter argues that even though Jonas was over the age of five at the time of the fire, his developmental delays would have made him unable to light the lighter if it had been manufactured to specifications. But she did not present evidence regarding what impact Jonas's developmental delays had on his ability to operate the Subject Lighter in its condition. Evidence regarding the effect of the specific manufacturing deviations discovered in the Subject Lighter was necessary to show that but for those deviations, Jonas probably would not have been able to operate the lighter. The Baylor report, Dr. Blotkey's testimony, and other evidence introduced at trial reflected on Jonas's abilities to overcome the cognitive-based characteristics of the lighter. But there was no evidence to show that Jonas's abilities related to the force-based features of the lighter—turning the sparkwheel and depressing the fork—would probably have prevented him from operating the lighter if it had met manufacturing specifications.

Carter also asserts that there is evidence of causation based on this Court's holding in *Havner*, 953 S.W.2d 706. The issue in *Havner* was whether a woman's use of a drug while she was pregnant caused her baby's birth defects. *Id.* at 708. We concluded that properly designed and executed epidemiological studies may support causation in certain types of toxic tort cases if the studies show that there is more than a "doubling of the risk" of the particular injury after exposure to the particular substance. *Id.* at 716-17. Carter argues that the principle behind *Havner*—increased

relative risk may be evidence of causation—should be applied in this case. She references BIC's CPSC certification tests and maintains they illustrate that low force levels in lighters such as the J-26 can quadruple risk. We disagree with her position.

In toxic tort cases, causation is often discussed in terms of general and specific causation. *Id.* at 714. General causation involves whether the substance at issue is capable of causing the injury at issue while specific causation involves whether the substance at issue in fact caused the particular injury at issue. *Id.* While testing can be done in some toxic tort cases to determine specific causation, direct experimentation cannot be done in many instances. *Id.* at 715. Recognizing that in such a situation there is no precise fit between science and legal burdens of proof, we concluded that epidemiological studies showing a doubling of the risk after exposure to a substance may be evidence of causation. *Id.* at 717. We explained, for example, that if the number of people who take a drug and contract a disease is more than double the number of people who contracted the disease but did not take the drug, then it may be statistically more likely than not that a given individual's disease was caused by the drug. *Id.* at 717.

The nature of the injury-causing activities and testing that would have to be done to show causation in this case are not similar to, nor do they pose the practical difficulties posed by, those we considered in *Havner*. In this case, testing of J-26 lighters posed no unreasonable risk of injury to the test subjects as would have been the case if testing of the drug on humans had been performed under the facts of *Havner*. The difference in the situations is shown by the CPSC certification protocols. In such instances, tests are done with surrogate lighters that do not pose a risk of harm to the participating children. And testing was also performed on the Subject Lighter itself that posed

no risk of injury. Thus we decline to adopt a *Havner*-type analysis as to causation in this case where manufacturing defects are the basis for the liability claim.

Because our determination that there was no evidence of causation is dispositive of the appeal, we do not address BIC's contention that there was no evidence the Subject Lighter was unreasonably dangerous.

V. Conclusion

The facts of this case are unfortunate. Nevertheless, we must apply established legal principles in reviewing the parties' positions. In applying those principles, we conclude there is legally insufficient evidence to support the finding that manufacturing defects in BIC's Subject Lighter were a cause-in-fact of Brittany's injuries. We reverse the court of appeals' judgment and render judgment for BIC.

Phil Johnson
Justice

OPINION DELIVERED: June 17, 2011

IN THE SUPREME COURT OF TEXAS

NO. 09-0048

MCI SALES AND SERVICE, INC., F/K/A HAUSMAN BUS SALES, INC. AND MOTOR COACH INDUSTRIES MEXICO, S.A. DE C.V., F/K/A DINA AUTOBUSES, S.A. DE C.V., PETITIONERS,

v.

JAMES HINTON, INDIVIDUALLY AND AS REPRESENTATIVE OF THE ESTATE OF DOLORES HINTON, DECEASED, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE TENTH DISTRICT OF TEXAS

Argued March 24, 2010

JUSTICE GUZMAN delivered the opinion of the Court, in which JUSTICE HECHT, JUSTICE WAINWRIGHT, JUSTICE MEDINA, JUSTICE JOHNSON, JUSTICE WILLETT, and JUSTICE LEHRMANN joined, and in which CHIEF JUSTICE JEFFERSON joined as to Parts I and II.

CHIEF JUSTICE JEFFERSON filed an opinion, dissenting in part.

JUSTICE GREEN did not participate in the decision.

This appeal arises from a jury's verdict in a suit brought against the manufacturer, importer, and distributor of a motorcoach. In 1995, when the motorcoach at issue here was manufactured, federal safety regulations governing the performance of these motorcoaches neither required nor forbade passenger seatbelts. These same regulations allowed manufacturers to choose between

several types of glazing materials for use in the motorcoaches' windows, and a manufacturer complied by using one of the required types. We must decide whether that regulatory silence and that choice evidence a congressional intent to preempt a McLennan County jury's finding that the manufacturer of a motorcoach should have installed passenger seatbelts and should have used another permitted type of glazing material. Because we conclude that the jury's verdict which is grounded in this state's common law does not present any obstacle to the accomplishment of the federal regulatory scheme's purpose, we hold that the federal safety standards at issue do not preempt state law.

We also apply Chapter 33 of the Texas Civil Practice and Remedies Code to a plan adopted by a bankruptcy court to apportion a debtor's insurance proceeds among a group of creditors who filed claims against the bankruptcy estate. The unique plan allowed the claimants to either accept a mediated percentage of the proceeds or to litigate their claims before a special judge. Even if the claimants chose the latter course, their recovery was capped at 110% of the mediator's award, and the claimants could agree at any time to full or partial distributions to any or all of the claimants. We must decide if this plan renders the debtor—who purchased the insurance policy funding the plan and whose further liability was discharged in bankruptcy—a settling person under Chapter 33 for purposes of determining proportionate liability. We conclude that it does. Accordingly, we affirm the court of appeals' judgment and remand to the trial court for further proceedings consistent with this opinion.

I. Background

On February 14, 2003, a group of friends chartered a bus[1] from Central Texas Trails to take them from Temple to Dallas for a concert. Heavy rain and fog reduced visibility, and as the bus crested a hill on Interstate 35 south of Waco, the driver saw that traffic had stopped due to an accident farther north. He attempted to change lanes to increase his stopping distance, but another car cut him off, so he steered into the earthen median and lost control of the bus. It crossed the median into southbound traffic and collided with a large sport utility vehicle, spun counterclockwise, and tipped over on its right side. The bus slid across the southbound lanes and came to rest in the ditch on the far side of the road. Most of the large, non-laminated glass windows on the right side of the bus shattered when it tipped over. The passengers were tossed from their seats and some were ejected through the broken windows. Five passengers were killed and several others were injured to varying degrees.

The bus owner and operator, Central Texas Trails, Inc., Central Texas Bus Lines, Inc., and Kincannon Enterprises, Inc. (collectively Central Texas), filed for Chapter 11 bankruptcy protection shortly after the accident. The bus crash victims filed creditor claims against Central Texas in the bankruptcy court. Central Texas maintained a $5 million liability insurance policy, and the carrier paid the policy limits into the bankruptcy court's registry, creating a liability fund. The bus crash claimants participated in non-binding mediation, the goal of which was to formulate a plan for apportioning the fund. The mediator assigned a percentage of the fund to each claimant, and these

[1] Motorcoach, intercity bus, and bus are used interchangeably in this opinion, but are distinguished from transit buses. *See* Notice of Public Meeting on Motorcoach Safety Improvements, 67 Fed. Reg. 14,903 (Mar. 28, 2002).

percentages were incorporated into a plan submitted to the bankruptcy court for approval, which was given on October 21, 2003. Under the "Apportionment Plan," a claimant could accept the mediator's percentage and immediately receive that portion of the liability fund. If the claimant chose not to accept the mediator's allocation, the claimant participated in a "Litigation Plan." Under this plan, the claimants tried their claims to a special judge agreed to by the participants, and their recovery under this plan was capped at 110% of the mediator's allocation. Further, the parties could agree at any time to approve a full or partial distribution to any or all participants. Central Texas's tort liability in excess of the liability fund was discharged upon approval of its reorganization plan the following year.

On June 26, 2003, a group of the injured bus occupants (or their estates) and their relatives (the Plaintiffs)[2] filed suit against Motor Coach Industries Mexico, S.A. de C.V., and MCI Sales and Service, Inc., the bus's manufacturer, importer, and distributor (collectively MCI), alleging the motorcoach was defectively designed because it lacked passenger seatbelts and laminated-glass windows. MCI attempted to join Central Texas and the bus driver as responsible third parties, but the trial court denied the motion and also refused to submit a question asking the jury if Central Texas and the driver were liable as responsible third parties or as settling parties to determine proportionate liability. Following a jury trial, the jury found for the Plaintiffs, making separate causative findings as to each claim. The jury found that the lack of seatbelts caused injuries to all

[2] To be clear, the bus crash victims who submitted claims in the bankruptcy proceeding are a larger group than the Plaintiffs here. Some of these claimants opted for compensation under the Apportionment Plan, leaving about half of the insurance proceeds for distribution to those who chose to participate in the Litigation Plan.

of the Plaintiffs, and the lack of laminated-glass windows caused injuries to those ejected from the bus. The jury awarded over $17 million in damages.

After the jury's verdict but before entry of judgment, the Plaintiffs, all of whom opted for resolution of their claims against Central Texas via the Litigation Plan, appeared before the special judge. The judge found that the bus driver's negligence proximately caused the accident that produced the Plaintiffs' injuries and that he was acting within the scope of his employment with Central Texas. Further, the judge determined that the jury's damage awards in this case, with one exception, significantly exceeded the 110% maximum recovery under the Litigation Plan. Limiting the one participant's recovery to what the jury awarded, the judge capped the remaining damage awards at the 110% maximum. Because of the limited funds, however, the awards were prorated so that each participant received a relative percentage of the actual award. In the end, each Litigation Plan participant (again, with the one exception) received a sum that is within two percent of the amount allocated by the mediator.[3] The bankruptcy judge approved the special judge's report, and the payments were made. Thereafter, the trial court in this case entered judgment, adjusting the damage awards to account for the funds received under the Litigation Plan.

MCI appealed, and the court of appeals reversed and remanded. 272 S.W.3d 17, 20. As relevant here, the court rejected MCI's preemption arguments but agreed that the trial court abused its discretion by not submitting a question to the jury regarding Central Texas and the bus driver's proportionate liability as settling persons. MCI then petitioned this Court for review of the

[3] One participant received less than the amount assigned by the mediator in line with the jury findings in the trial court.

preemption issues, and the Plaintiffs cross-petitioned for review of the proportionate responsibility issue. We granted both petitions and consider the issues in order, beginning with federal preemption.

II. Federal Preemption

The Supremacy Clause dictates that the "Constitution, and the Laws of the United States which shall be made in Pursuance thereof . . . shall be the supreme Law of the Land; . . . any Thing in the Constitution or Laws of any State to the Contrary notwithstanding." U.S. CONST. art. VI, cl. 2. Thus, a law passed by Congress—acting within its enumerated powers—and signed by the President preempts any state law to the contrary, rendering it without effect. *Maryland v. Louisiana*, 451 U.S. 725, 746 (1981); *Mills v. Warner Lambert Co.*, 157 S.W.3d 424, 426 (Tex. 2005) (per curiam); *see also Wyeth v. Levine*, 129 S. Ct. 1187, 1206–07 (2009) (Thomas, J., concurring in the judgment) (noting the two structural limitations on the federal government's power to preempt state laws, namely, the enumerated powers of Congress and the procedural requirements to enact a law, including bicameral passage and presentment to the President). Federal regulations properly adopted by an agency acting within its congressionally delegated authority likewise preempt a contrary state law. *E.g.*, *City of New York v. FCC*, 486 U.S. 57, 63–64 (1988) (citing *La. Pub. Serv. Comm'n v. FCC*, 476 U.S. 355, 369 (1986)).

Congress may expressly preempt state law by means of statutory language, *see, e.g.*, *Cipollone v. Liggett Group, Inc.*, 505 U.S. 504, 516 (1992); *Great Dane Trailers, Inc. v. Estate of Wells*, 52 S.W.3d 737, 743 (Tex. 2001), or it may do so impliedly in one of two ways, by "so thoroughly occup[ying] a legislative field 'as to make reasonable the inference that Congress left no room for the States to supplement it,'" *Cipollone*, 505 U.S. at 516 (quoting *Fidelity Fed. Sav. &*

Loan Ass'n v. De la Cuesta, 458 U.S. 141, 153 (1982) (quotation marks omitted)), or by enacting a law that actually conflicts with state law, *see id.* (citing *Pac. Gas & Elec. Co. v. State Energy Res. Conservation & Dev. Comm'n*, 461 U.S. 190, 204 (1983)). A state law actually conflicts with a federal law when compliance with both is impossible or when the state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." *Hines v. Davidowitz*, 312 U.S. 52, 67 (1941); *accord Great Dane Trailers*, 52 S.W.3d at 743. The latter kind of conflict preemption, sometimes called obstacle preemption, is the only theory of preemption advanced by MCI in this case. *See Geier v. Am. Honda Motor Co.*, 529 U.S. 861, 868 (2000) (holding that the National Traffic and Motor Vehicle Safety Act's express preemption clause does not apply to common-law tort actions).

As the Supreme Court has observed, "the purpose of Congress is the ultimate touchstone in every pre-emption case." *Wyeth*, 129 S. Ct. at 1194 (quotation marks omitted). When Congress has explicitly stated that its legislation preempts state law, that intent is plain. *See, e.g.*, *Geier*, 529 U.S. at 867–68 (concluding that the Safety Act's express preemption clause preempts nonidentical standards contained in state legislation and regulations). At other times, Congress does not expressly state its preemptive purpose, but such intent is discoverable through the statutory language and structure, as when Congress occupies a field of regulation and leaves no room for states to operate. *See, e.g.*, *City of Burbank v. Lockheed Air Terminal Inc.*, 411 U.S. 624, 633 (1973) ("It is the pervasive nature of the scheme of federal regulation of aircraft noise that leads us to conclude that there is pre-emption."). But when preemption is premised on the obstacle a state law erects to

accomplishing a federal purpose, divining that intent can be more challenging.[4] To discover the federal purpose with which the state law is in conflict, we examine the text of the relevant federal statute or regulation, the history of federal regulation in that subject area, and the agency's statements construing the regulation. *See Geier*, 529 U.S. at 875–77; *O'Hara v. Gen. Motors Corp.*, 508 F.3d 753, 759 (5th Cir. 2007) ("To determine the federal policy expressed in [the regulation], this Court looks to the text of the regulation, the history of [the agency's] regulation in this area, and [the agency's] statements construing [the regulation]."). A "specific, formal agency statement identifying conflict" is not necessary to conclude that a conflict exists, *Geier*, 529 U.S. at 884, and "[t]he weight we accord the agency's explanation of state law's impact on the federal scheme depends on its thoroughness, consistency, and persuasiveness," *Wyeth*, 129 S. Ct. at 1201. Courts must cautiously approach this interpretive task lest it become a "free wheeling judicial inquiry into whether a state [law] is in tension with federal objectives," which "undercut[s] the principle that it is Congress rather than the courts that pre-empts state law." *Gade v. Nat'l Solid Wastes Mgmt. Ass'n*, 505 U.S. 88, 111 (1992) (Kennedy, J., concurring in part and concurring in the judgment).

With this framework in mind, we turn to the relevant federal law that MCI asserts preempts the jury's verdict.

---

[4] Justice Thomas has gone so far as to question whether implied obstacle preemption can be reconciled with the Supremacy Clause's mandate that only federal law can preempt state law: "Congressional and agency musings, however, do not satisfy the Art. I, § 7 requirements for enactment of federal law and, therefore, do not pre-empt state law under the Supremacy Clause." *Wyeth*, 129 S. Ct. at 1207 (Thomas, J., concurring in the judgment). Instead, Justice Thomas contends, "[p]re-emption must turn on whether state law conflicts with the text of the relevant federal statute or with the federal regulations authorized by that text." *Id.* at 1208. However, the United States Supreme Court continues to uphold and apply obstacle preemption based on federal purpose, and we are bound to follow.

A. The Federal Motor Vehicle Safety Standards

Congress passed the National Traffic and Motor Vehicle Safety Act of 1966 (Safety Act or Act), to reduce traffic accidents and their resulting injuries. *Motor Vehicle Mfrs. Ass'n of U.S., Inc. v. State Farm Mut. Auto. Ins. Co.*, 463 U.S. 29, 33 (1983) (citing 15 U.S.C. § 1381 (1976) (current version at 49 U.S.C. § 30101)). Congress gave the Secretary of Transportation the authority to "prescribe motor vehicle safety standards. Each standard shall be practicable, meet the need for motor vehicle safety, and be stated in objective terms." 49 U.S.C. § 30111(a). A motor vehicle safety standard is "a minimum standard for motor vehicle or motor vehicle equipment performance." *Id.* § 30102(a)(9). The Secretary of Transportation in turn delegated authority to create the safety standards to the Administrator of the National Highway Traffic Safety Administration (NHTSA). 49 C.F.R. § 1.50. Over the years, NHTSA has promulgated and modified the Federal Motor Vehicle Safety Standards (FMVSS), of which FMVSS 205 and 208 are at issue here. *See id.* §§ 571.205, .208.

1. FMVSS 208—Federal Regulation of Seatbelts

In 1971, NHTSA issued FMVSS 208, which governed occupant crash protection and mandated seatbelts in motorcoaches for the driver only. *See id.* § 571.208, S4.4.1.[5] Two years later, NHTSA issued a Notice of Proposed Rule Making addressing passenger seating in buses. Bus

[5] For buses manufactured between January 1, 1972 and September 1, 1990, manufacturers actually had a choice even for the driver position. § 571.208, S4.4.1. They could design a "complete passenger protection system"—applicable only to the driver—that fulfilled certain crash requirements, *id.* S4.4.1.1, or they could install a seatbelt at the driver's position, *id.* S4.4.1.2. For buses weighing more than 10,000 pounds, like the bus here, manufacturers still have that choice, although the seatbelt option is more stringent. *See id.* S4.4.3.1. Since 1991, buses weighing less than 10,000 pounds are required to have seatbelts both for passengers and for the driver. *Id.* S4.4.3.2.

Passenger Seating and Crash Protection, 38 Fed. Reg. 4776 (Feb. 22, 1973) (to be codified at 49 C.F.R. pt. 571). NHTSA designed the proposed rules to protect bus passengers by requiring higher, stronger, and softer seats that contained the passengers during a crash. *Id.* In response to suggestions that seatbelts should be required, NHTSA proposed adding them as an alternate restraint system, replete with a detection system that warned the passenger and the driver of unfastened seatbelts. *Id.* The proposed rules were to affect all buses.

The following year, however, NHTSA withdrew the proposed standard for motorcoaches, determining that seating requirements for intercity and transit buses were not justified from a cost/benefit standpoint, and that seatbelt-usage surveys in intercity buses indicated few passengers would utilize seatbelts if provided. *See* School Bus Passenger Crash Protection, 39 Fed. Reg. 27,585 (July 30, 1974). The NHTSA did indicate that it would "propose standards in the future in this area if they are found desirable." *Id.*[6]

[6] NHTSA did issue a new safety standard applicable only to school buses. *See* 49 C.F.R. § 571.222. The standard required a system of compartmentalization, which uses engineered seating arrangements to protect passengers during a crash. In 1983, NHTSA denied a petition for rulemaking that sought to require seatbelts in school buses. *See* Denial of Petition for Rulemaking, 48 Fed. Reg. 47,032 (Oct. 17, 1983).

MCI draws our attention to several other events of note.[7] In 1992, the chief counsel for NHTSA wrote a letter responding to an inquiry about New York legislation that would require seatbelts in motorcoaches. Letter from Paul Jackson Rice, Chief Counsel, NHTSA to C.N. Littler, Coordinator, Regulatory Affairs, Motor Coach Indus. (Aug. 19, 1992). He concluded that FMVSS 208 would preempt the New York legislation regarding, as relevant here, intercity buses weighing more than 10,000 pounds. He stated that "NHTSA expressly determined that there is not a safety need for safety belts or another type of occupant crash protection at these [passenger] seating positions." In so opining, NHTSA's counsel expressly cited and relied upon the 1974 notice in which NHTSA withdrew its proposed standards for motorcoach seating and seatbelt standards, the latter because of low usage rates.

[7] MCI asks the Court to take judicial notice of a 1977 study performed by the Indiana University at Bloomington Institute for Research in Public Safety. *See* STANSIFER ET AL., INST. FOR RESEARCH IN PUB. SAFETY, ANALYSIS FOR NEED FOR PASSENGER SAFETY BELT REQUIREMENTS IN INTERCITY BUSES (1977). The study was commissioned by the Federal Highway Administration, an agency within the Department of Transportation, and addressed the desirability of seatbelts in intercity buses. The report concluded that, among other things, the usage rate of seatbelts during the study period (1972–1976) was quite low and did not recommend a seatbelt requirement. While the report viewed seatbelts as desirable, it noted that the cost of installation could not be justified unless 80% of passengers properly wore the belts, while current rates of voluntary usage were then less than 20%.

While the report meets the requirements for judicial notice, *see* TEX. R. EVID. 201; *Office of Pub. Util. Counsel v. Pub. Util. Comm'n*, 878 S.W.2d 598, 600 (Tex. 1994) (per curiam) ("To be the proper subject of judicial notice, a fact must be capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned. Judicial notice is mandatory if requested by a party and [the court is] supplied with the necessary information." (quotation marks and citation omitted; alteration in original)), and we therefore take judicial notice of it, we fail to see the relevance of the report to NHTSA's regulatory function. NHTSA did not commission the report, and it did not change any federal safety standard in response to the report. Because only federal *law* can preempt contrary state law—which, in that context, is the domain of NHTSA through its rule-making process—this report does not affect our analysis of the preemption issues. *See Fellner v. Tri-Union Seafoods, L.L.C.*, 539 F.3d 237, 243 (3d Cir. 2008) ("[W]e must reiterate, lest the analysis become unmoored, that it is federal *law* which preempts contrary state law; nothing short of federal law can have that effect."). Even if NHTSA was aware of the report, NHTSA's non-action in response cannot reasonably be interpreted as more than preserving the status quo, which at that time meant no seatbelt requirement in motorcoaches like the one at issue here. NHTSA's inaction regarding this report cannot be interpreted as expressing a policy forbidding seatbelts, or even as a deliberate decision not to require seatbelts.

In 2000, five years after the motorcoach here was built, NHTSA's acting administrator wrote a letter to the chairman of the National Transportation Safety Board (NTSB), which had repeatedly asked NHTSA to study the desirability of seatbelt standards for motorcoaches, noting that motorcoach crashes killed about five people per year. Letter from Rosalyn G. Millman, Acting Adm'r, NHTSA, to Jim Hall, Chairman, NTSB (Mar. 3, 2000). Even so, NHTSA said it would explore ways to study the crashworthiness of motorcoaches, including the feasibility and safety of seatbelts, in association with their manufacturers. Two years later, NHTSA announced a joint public meeting with its Canadian counterpart, Transport Canada, regarding the safety of motorcoaches. *See* Notice of Public Meeting on Motorcoach Safety Improvements, 67 Fed. Reg. 14,903 (Mar. 28, 2002). NHTSA invited comment on several proposed safety improvements, including limiting the size of glazing materials, introducing roof crush safety standards, requiring side curtain airbags, and requiring seatbelts. *Id.* at 14,904–05. Finally, in 2007, NHTSA issued a report recommending passenger seatbelts in motorcoaches following research designed to determine the best performance standards for the seatbelt assembly and seat anchorages. *See* NHTSA, Docket 2007-28793, NHTSA'S APPROACH TO MOTORCOACH SAFETY 12–14. Based on this report, the Department of Transportation issued an action plan for motorcoach safety, in which it proposed to begin rulemaking to require seatbelts in motorcoaches. *See* U.S. DEP'T OF TRANSP., MOTORCOACH SAFETY ACTION PLAN 5 (2009). In August 2010, NHTSA followed up by publishing a Notice of Proposed Rulemaking (NPRM) that calls for three-point seatbelts for passenger seats in new motorcoaches.

See Federal Motor Vehicle Safety Standards; Motorcoach Definition; Occupant Crash Protection, 75 Fed. Reg. 50,958 (Aug. 18, 2010) (to be codified at 49 C.F.R. pt. 571).[8]

2. FMVSS 205—Federal Regulation of Glazing Materials

FMVSS 205 "specifies requirements for glazing materials for use in motor vehicles." 49 C.F.R. § 571.205, S1. It is intended to "reduce injuries resulting from impact to glazing surfaces, to ensure a necessary degree of transparency in motor vehicle windows for driver visibility, and to minimize the possibility of occupants being thrown through the vehicle windows in collisions." *Id.* at S2. FMVSS 205 incorporates by reference the standards of the American National Standards Institute (ANSI), specifically the standard for Safety Glazing Materials Z26.1 [hereinafter ANSI/SAE Z26.1-1996].[9] *Id.* at S3.2(a). The parties do not dispute that the standard permitted several kinds of glazing materials, including, as relevant here, laminated or tempered glass,[10] and that MCI complied with the standard in manufacturing the subject bus. *See* ANSI/SAE Z26.1-1996, T.1

[8] Hinton asks this Court to take judicial notice of both the report and the NPRM. MCI does not oppose either request, and we agree the standards of judicial notice are met. *See supra* note 7. Accordingly, we grant Hinton's request and take judicial notice of both the report and the NPRM.

[9] The ANSI/SAE standard in effect in 1995 was the American National Standard "Safety Code for Safety Glazing Materials for Glazing Motor Vehicles Operating on Land Highways" Z-26.1-1977, January 26, 1977, as supplemented by Z26.1a, July 3, 1980. *See* Glazing Materials Final Rule, 49 Fed. Reg. 6732, 6734 (Feb. 23, 1984) (formerly codified at 49 C.F.R. pt. 571). NHTSA adopted the 1996 version in 2003 to increase safety, to harmonize with foreign glazing standards, and to streamline and clarify the standard. *See* Glazing Materials Final Rule, 68 Fed. Reg. 43,964, 43,965 (July 25, 2003) (to be codified at 49 C.F.R. pt. 571). The difference between the older and newer versions is immaterial to this appeal given that both permitted laminated and tempered glass.

[10] Laminated glass means two or more pieces of sheet, plate, or float glass bonded together by an intervening layer or layers of plastic material. It will crack or breach under sufficient impact, but the pieces of glass tend to adhere to the plastic. If a hole is produced, the edges are likely to be less jagged than would be the case with ordinary annealed glass. ANSI/SAE Z26.1-1996 § 1.6. Tempered glass means a single piece of specially treated sheet, plate, or flat glass possessing mechanical strength substantially higher than annealed glass. When broken an any point, the entire piece breaks into small pieces that have relatively dull edges as compared to those of broken pieces of annealed glass. *Id.* § 1.21.

(Items 1 & 2) (permitting laminated glass throughout a vehicle and tempered glass anywhere other than the windshield). The ANSI standard notes that "[o]ne safety glazing material may be superior for protection against one type of hazard, whereas another may be superior against another type. Since accident conditions are not standardized, no one type of safety glazing material can be shown to possess the maximum degree of safety under all conditions, against all conceivable hazards." *Id.* § 2.2.

In 1988, NHTSA proposed advanced glazing requirements for passenger vehicles and received numerous comments questioning, among other things, "whether this material would actually increase injuries to belted occupants due to head injury, neck loading, and lacerations." Withdrawal of Advance Notices of Proposed Rulemaking, 67 Fed. Reg. 41,365, 41,366 (June 18, 2002). In 1991, Congress mandated that NHTSA initiate rulemaking on rollover protection. *Id.* As part of this study, NHTSA focused on advanced glazing research as a possible method to reduce passenger ejections. *Id.* In 2001, Congress directed NHTSA to complete its study of glazing materials, and NHTSA issued a final report on the use of glazing materials to mitigate ejections. *Id.* at 41,367. Based on this report, NHTSA decided to terminate rulemaking on the issue of advance glazing, citing safety and cost concerns. *Id.* Noting the advent of other ejection mitigation systems (such as side air curtains) and the possibility that advanced side glazing increased the risk of neck injuries in some cases, NHTSA determined that its time and resources were better spent on other projects that focused on developing "more comprehensive, performance-based test procedures." *Id.* In the 2007 report on motorcoaches, NHTSA emphasized the importance of roof strength because deformations following a crash compromise the window's ability to prevent ejections. *See*

NHTSA'S APPROACH TO MOTORCOACH SAFETY, *supra*, at 20. For that reason, NHTSA concluded that "purs[u]ing the seat belt and roof strength approaches has greater potential for providing improved motorcoach occupant protection than continuing only the glazing/window retention strategy." *Id.* In sum, FMVSS 205 reflects NHTSA's conclusion that no one type of glazing material is superior in all situations, and it leaves to the manufacturers the decision of what kind of material—so long as it is one of the required kinds—to use in a particular setting.

B. The Presumption Against Preemption

Before discussing whether preemption applies here, we must first address MCI's argument that the court of appeals improperly applied a presumption against preemption. MCI contends that *Geier* rejected any "special burden" beyond the application of ordinary preemption principles. The Plaintiffs counter that the presumption is rooted in federalism, not in *Geier*'s analysis of the interplay between the Safety Act's preemption and saving clauses. We agree in principle with the Plaintiffs while recognizing that the exact contours of the presumption are far from clear. *See* Robert N. Weiner, *The Height of Presumption: Preemption and the Role of Courts*, 32 HAMLINE L. REV. 727, 727 (2009) ("Few aspects of Supreme Court jurisprudence are as contradictory and convoluted as the so-called 'presumption against preemption.'").

The United State Supreme Court noted a presumption against preemption in *Rice v. Santa Fe Elevator Corp.*, grounding it in the states' police power to regulate for the good of their citizens: "[W]e start with the assumption that the historic police powers of the States were not to be superseded by the Federal Act unless that was the clear and manifest purpose of Congress." 331 U.S. 218, 230 (1947); *see also Medtronic, Inc. v. Lohr*, 518 U.S. 470, 485 (1996) ("[B]ecause the

States are independent sovereigns in our federal system, we have long presumed that Congress does not cavalierly pre-empt state-law causes of action."). The presumption is particularly strong when Congress legislates "in [a] field which the States have traditionally occupied." *Rice*, 331 U.S. at 230; *see also Bates v. Dow Agrosciences LLC*, 544 U.S. 431, 449 (2005) ("In areas of traditional state regulation, we assume that a federal statute has not supplanted state law unless Congress has made such an intention clear and manifest." (quotation marks omitted)). Citizens' health and safety are "'primarily and historically, . . . matter[s] of local concern,'" and thus states have "'great latitude'" to protect "'the lives, limbs, health, comfort, and quiet of all persons.'" *Lohr*, 518 U.S. at 475 (quoting *Hillsborough County v. Automated Med. Labs., Inc.*, 471 U.S. 707, 719 (1985) and *Metro. Life Ins. Co. v. Massachusetts*, 471 U.S. 724, 756 (1985)) (alterations in original).

Against this backdrop, the Supreme Court in *Geier* analyzed whether the Safety Act and FMVSS 208 preempted a common-law tort action in which the plaintiff claimed the automobile manufacturer was liable for failing to install airbags in a 1987 vehicle. 529 U.S. at 865. The Court first addressed the Safety Act's express preemption clause[11] and limited its application to state

[11] The 1987 version of the preemption clause read:

> Whenever a Federal motor vehicle safety standard established under this subchapter is in effect, no State or political subdivision of a State shall have any authority either to establish, or to continue in effect, with respect to any motor vehicle or item of motor vehicle equipment any safety standard applicable to the same aspect of performance of such vehicle or item of equipment which is not identical to the Federal standard.

Former 15 U.S.C. § 1392(d) (1988) (current version at 49 U.S.C. § 30103(b)).

legislative and regulatory enactments, concluding that the Act's saving clause[12] exempted common-law tort actions from the preemption clause's scope. *Id.* at 867–68. The Court then rejected the argument that the saving clause foreclosed the operation of ordinary implied preemption principles, including obstacle preemption. *Id.* at 869. Further, the majority disagreed with the dissent's suggestion that the two clauses together created a "special burden" disfavoring preemption. *Compare id.* at 870–74, *with id.* at 898–99 (Stevens, J., dissenting). Instead, the majority considered the "language, purpose, and administrative workability" of the statutes and concluded that no reading of the two clauses favored jury-imposed safety standards over federal safety standards with which they actually conflict. *Id.* at 872–73. In such a case, the operation of ordinary preemption principles dictates that the state-law standard must give way.

We do not read *Geier*'s special-burden discussion to undermine the presumption against preemption. The former is rooted in two statutory provisions of the Safety Act, the latter in principles of federalism. Merely because the Safety Act's saving clause does not create a special burden disfavoring preemption does not eliminate the respective spheres of state and federal sovereignty, and the presumption simply affords deference to the states' long-standing rights to protect their citizens absent a clear directive from Congress. In the end, what the majority said in *Geier* does not negate the presumption against preemption.

What the majority did not say is another matter. MCI correctly notes the *Geier* majority's silence regarding the presumption. The *Geier* dissent noticed as well and decried the majority's

[12] The 1987 version of the saving clause read: "Compliance with any Federal motor vehicle safety standard issued under this subchapter does not exempt any person from any liability under common law." Former 15 U.S.C. 1397(k) (1988) (current version at 49 U.S.C. § 30103(e)).

refusal to apply what the dissent considered to be an "'ordinary experience-proved principle[] of conflict pre-emption.'" *Id.* at 906–07 (Stevens, J., dissenting) (quoting *id.* at 874); *see also Altria Group, Inc. v. Good*, 129 S. Ct. 538, 558 (2008) (Thomas, J., dissenting) (noting in a discussion of *Riegel v. Medtronic, Inc.*, 552 U.S. 312 (2008), which involved express preemption, the effect of the majority's refusal to invoke the presumption: "Given the dissent's clear call for the use of the presumption against pre-emption, the Court's decision not to invoke it was necessarily a rejection of any role for the presumption in construing the statute."). Commentators likewise concluded that the *Geier* majority upended the normal presumption against preemption.[13] In view of the Supreme Court's recent statements on the issue, however, we cannot agree.

In *Wyeth v. Levine*, the Court considered whether federal law preempted, under the actual conflict theory, a Vermont jury's finding that the manufacturer of the drug Phenergan failed to adequately warn of the risks associated with directly injecting the drug into a patient's vein. 129 S. Ct. at 1190–91. The Court, relying on *Lohr*, stated the classic formulation of the presumption against preemption and rejected the dissent's contention that the presumption should not apply to claims of implied conflict preemption. *Id.* at 1194–95 & n.3 (citing *Lohr*, 518 U.S. at 485 and *Rice*, 331 U.S. at 230). According to the dissent, the Court had never—prior to *Wyeth*—definitively applied the presumption in the actual-conflict context. *Id.* at 1228–29 & n.14 (Alito, J., dissenting).

---

[13] *See, e.g.*, Erwin Chemerinsky, *Empowering States When It Matters: A Different Approach to Preemption*, 69 BROOK. L. REV. 1313, 1319 (2004) ("The only way to make sense of [*Geier*] is to see it as putting a presumption in favor of preemption."); Susan Raeker-Jordan, *A Study in Judicial Sleight of Hand: Did* Geier v. American Honda Motor Co. *Eradicate the Presumption Against Preemption?*, 17 BYU J. PUB. L. 1, 2 (2002) ("The five-member majority [in *Geier*] accomplished its apparent goal of preemption in the case by abandoning the long-standing presumption against preemption and the concomitant requirement that Congress's intent to preempt be clear, and it thereby removed any protections the presumption provided to federalism principles, state tort law, and Congress's own preemptive intentions." (footnotes omitted)).

From the majority's language in *Wyeth*, we fail to see how the presumption does not apply to all preemption cases, including implied conflict cases. *Id.* at 1194–95 & n.3 ("For its part, the dissent argues that the presumption against pre-emption should not apply to claims of implied conflict pre-emption at all, but this Court has long held to the contrary." (citation omitted)); *see also Altria Group*, 129 S. Ct. at 543 ("When addressing questions of express or implied pre-emption, we begin our analysis with the assumption that the historic police powers of the States [are] not to be superseded by the Federal Act unless that was the clear and manifest purpose of Congress." (quotation marks omitted; alteration in original)). That *Geier* addressed the Safety Act and *Wyeth* a different statute is, contrary to MCI's position, irrelevant.[14] Accordingly, we apply the presumption that Congress did not intend to preempt contrary state law absent evidence that such a result was Congress's clear and manifest purpose.

C. Seatbelts and Federal Preemption

Given that no federal safety standard even discusses passenger seatbelts in motorcoaches, MCI's preemption claim is predicated on regulatory silence. That is, MCI argues that NHTSA's failure to regulate was deliberate and has the same preemptive force as a regulation forbidding passenger seatbelts. While we agree that regulatory silence can preempt state law in rare occasions, we do not agree that NHTSA's decision not to require seatbelts in motorcoaches is such an occasion.

[14] We have applied the presumption against preemption since *Geier*, even when considering the preemptive effect of the Safety Act and the safety standards promulgated thereunder. *See Great Dane Trailers*, 52 S.W.3d at 743; *see also Graber v. Fuqua*, 279 S.W.3d 608, 611–12 (Tex. 2009) (applying the presumption when deciding if the federal bankruptcy regime preempted a state malicious prosecution claim).

The Supreme Court has stated that "a federal decision to forgo regulation in a given area may imply an authoritative federal determination that the area is best left *un*regulated, and in that event would have as much pre-emptive force as a decision *to* regulate." *Sprietsma v. Mercury Marine*, 537 U.S. 51, 66 (2002) (quoting *Ark. Elec. Coop. Corp. v. Ark. Pub. Serv. Comm'n*, 461 U.S. 375, 384 (1983) (quotation marks omitted)). In applying this standard, the Court focused on the agency's explanation for its decision not to regulate. *See id.* at 66–67. Two cases in which the Court considered the preemptive effect of an agency's decision not to regulate illustrate the rule's application.

In *Sprietsma*, the Supreme Court considered whether a claim that a motor boat should have been equipped with a propeller guard was preempted by the Federal Boat Safety Act of 1971, 46 U.S.C. §§ 4301–4311 (Boating Act). Like the Safety Act, the Boating Act contains both an express preemption clause and a saving clause, which the Court interpreted the same way—the preemption clause only affected state legislation and regulations, and the saving clause preserved common-law tort actions. 537 U.S. at 63. Finding no express preemption, the Court unanimously rejected the claim that the tort action conflicted with the federal regulatory scheme. *Id.* at 65. Addressing the boat manufacturer's argument that the "Coast Guard's decision not to adopt a regulation requiring propeller guards on motorboats" had preemptive force, the Court responded: "It is quite wrong to view that decision as the functional equivalent of a regulation prohibiting all States and their political subdivisions from adopting such a regulation." *Id.* Rather, that decision "is fully consistent with an intent to preserve state regulatory authority pending the adoption of specific federal standards." *Id.* The Coast Guard decided not require propeller guards because doing so was not technically

feasible, the cost of retrofitting boats was substantial, and accident data did not support such regulation; as such, the high standard for justifying regulations was not met. *Id.* at 66. Given this explanation, the Court found nothing in the Coast Guard's statement "inconsistent with a tort verdict premised on a jury's finding that some type of propeller guard should have been installed." *Id.* at 67.

Similarly, in *Freightliner Corp. v. Myrick*, the Supreme Court refused to give preemptive force to regulatory silence: "We hold that the absence of a federal standard cannot implicitly extinguish state common law." 514 U.S. 280, 282 (1995). The plaintiffs claimed the tractor-trailers that crashed into their vehicles should have been equipped with antilock braking systems (ABS). The Safety Act and NHTSA regulations did not require such braking systems,[15] but the manufacturer argued "that the absence of regulation itself constitutes regulation." *Id.* at 286. The Court distinguished an earlier case in which it had stated that the failure of federal officials "affirmatively to exercise their full authority takes on the character of a ruling that no such regulation is appropriate or approved pursuant to the policy of the statute." *Id.* at 286 (quoting *Ray v. Atl. Richfield Co.*, 435 U.S. 151, 178 (1978) (quotation marks omitted)). In *Ray*, Congress had intended to consolidate all regulatory power in the federal government, whereas in *Myrick*, "NHTSA did not decide that the

[15] NHTSA had promulgated a safety standard requiring trucks using air brakes to stop within certain distances. *See Myrick*, 514 U.S. at 284 (citing Air Brake Systems; Trucks, Buses, and Trailers, 36 Fed. Reg. 3817 (Feb. 27, 1971) (to be codified at 49 C.F.R. pt. 571)). Manufacturers notified NHTSA that the distances could not be achieved without using ABS devices and that these devices were unreliable. *Id.* at 285. When NHTSA disagreed, the manufacturers brought suit and succeeded in having the standard suspended until NHTSA compiled sufficient evidence that ABS devices did not create a greater danger. *Id.* As of the Supreme Court's writing, the standard was still suspended. *Id.* at 285–86.

minimum, objective safety standard required by [the Safety Act] should be the absence of all standards, both federal and state." *Id.* at 286–87.

From these cases, it follows that an agency's mere decision to leave an area unregulated is not enough to preempt state law. Instead, the agency must, consistent with the authority delegated to it by Congress, affirmatively indicate that no regulation is appropriate. That is, the agency must state that not only will it leave the area unregulated, it will not allow any regulation in that area as a matter of policy. Unless the agency takes this "further step" to disallow state regulation, its decision not to regulate has no preemptive force. *Sprietsma*, 537 U.S. at 67.

When looking at NHTSA's comments regarding passenger seatbelts in motorcoaches, we do not find any expression of intent to forbid state regulation. NHTSA proposed a requirement for passenger seatbelts in 1973 along with modified seating standards designed to contain passengers during a crash. *See* 38 Fed. Reg. 4776 (Feb. 22, 1973). The following year NHTSA continued to advance such seating standards in school buses, but decided to withdraw the proposed standards for motorcoaches and transit buses: "The NHTSA has in fact determined that seating requirements for intercity and transit buses are not justified, based on benefit/cost studies of present seating performance in these buses. . . . Seat belt usage surveys in intercity buses also indicate that a very low percentage of passengers would utilize seat belts if they were provided. . . . The NHTSA will, of course, propose standards in the future in this area if they are found desirable." School Bus Passenger Crash Protection, 39 Fed. Reg. 27,585 (July 30, 1974). This explanation indicates that NHTSA simply determined that the cost of installing seatbelts was not justified given the low usage

rates.[16] Nothing in these few sentences evidences an intent to prevent a state jury from concluding that seatbelts in a particular setting were appropriate. The similarity of NHTSA's decision to the Coast Guard's decision in *Sprietsma* not to regulate is compelling. Like NHTSA, the Coast Guard had considered and rejected a proposed standard intended to increase user safety on the grounds that it was not justified. *See* 537 U.S. at 66. Both agencies engaged in cost/benefit analyses and concluded that the costs outweighed the benefits based on the relevant data. In *Sprietsma*, the Supreme Court found no preemption under these circumstances. On these facts, we reach the same conclusion. Because we find no clear and manifest statement in the 1974 withdrawal of the proposed regulations—NHTSA's final, official statement on the subject before the motorcoach here was manufactured—that NHTSA intended as a matter of policy to forbid any state requirement of passenger seatbelts in motorcoaches, we must conclude that the jury's verdict in this case is not preempted by federal law.[17]

---

[16] To the extent it is relevant at all, the 1977 study commissioned by the Federal Highway Administration corroborates this conclusion. *See supra* note 7. The report gives no indication that NHTSA affirmatively opposed any state law requiring seatbelts in motorcoaches. To be sure, seatbelts are not, according to the study, an unmitigated benefit to the passengers. The kind of accident, such as a side collision, could well neutralize the seatbelts' protection.

[17] We recognize that several other courts have reached the opposite conclusion. *See Lake v. Memphis Landsmen, L.L.C.*, No. W2009-00526-COA-R3-CV, 2010 WL 891867, at *9–*11 (Tenn. Ct. App. Mar. 15, 2010); *Doomes v. Best Transit Corp.*, 890 N.Y.S.2d 526, 526 (N.Y. App. Div. Dec. 10, 2009); *Surles v. Greyhound Lines, Inc.*, No. 4:01-CV-00107, 2005 WL 1703153, at *5–*6 (E.D. Tenn. July 20, 2005). We are not persuaded by these opinions, particularly as to their reliance on the 1992 letter from NHTSA's chief counsel. We further note that while Congress may have intended to create uniform standards for the motor vehicle industry, it also allowed—via the saving clause—juries to hold manufacturers liable for inadequate safety measures. *See Wyeth*, 129 S. Ct. at 1200 ("The case for federal pre-emption is particularly weak where Congress has indicated its awareness of the operation of state law in a field of federal interest, and has nonetheless decided to stand by both concepts and to tolerate whatever tension there [is] between them." (quoting *Bonito Boats, Inc. v. Thunder Craft Boats, Inc.*, 489 U.S. 141, 166–67 (1989) (alteration in original)).

Nor does any later evidence change the analysis. The letter of NHTSA's chief counsel in 1992 is unremarkable insofar as it concludes that the Safety Act would preempt nonidentical New York legislation—the Act's express preemption clause compels such a conclusion. *See* 49 U.S.C. § 30103(b)(1). But then NHTSA's counsel opined that the agency had "expressly determined that there is not a safety need for safety belts or another type of occupant crash protection at these seating positions" and cited the 1974 withdrawal of proposed regulation. Letter from Paul Jackson Rice, Chief Counsel, NHTSA to C.N. Littler, Coordinator, Regulatory Affairs, Motor Coach Indus. (Aug. 19, 1992). We refuse to give preemptive force to this sentence for two reasons. First, there is nothing in this statement that indicates opposition to seatbelts and an affirmative desire to forbid their use. Second, to hold that NHTSA's decision not to regulate preempts state law based on a letter written eighteen years after the official decision illustrates the dangers of obstacle preemption grounded in agency musings. A letter, even by NHTSA's chief counsel, is not federal law, nor it is particularly persuasive regarding NHTSA's intent in the 1974 withdrawal. The text of the withdrawal notice is not technical or complex and speaks for itself; a later interpretation of that text is persuasive only to the extent it is correct. *See Skidmore v. Swift & Co.*, 323 U.S. 134, 140 (1944) (giving weight to an agency's "rulings, interpretations and opinions" depending "upon the thoroughness evident in [their] consideration, the validity of [their] reasoning, [their] consistency with earlier and later pronouncements, and all those factors which give [them] power to persuade, if lacking power to control"); *cf. Wyeth*, 129 S. Ct. at 1201 (giving "some weight" to an agency's views on the impact of tort law on federal objectives when the subject matter is technical and the relevant history complex). We will not overturn a jury's verdict on such tenuous grounds.

All of NHTSA's later statements, from letters to notices of public meetings to reports and action plans, demonstrate the agency's increased willingness to reconsider its 1974 decision to leave motorcoaches essentially unregulated. These events culminated in the initiation of rulemaking for the installation of passenger seatbelts on motorcoaches. The jury anticipated NHTSA's future actions, and we find no conflict between its verdict and the federal safety standards.

MCI argues that the history of NHTSA's motorcoach regulation points in a very different direction. It contends that NHTSA chose an alternate method of passenger protection, compartmentalization, *see supra* note 6, and required seatbelts only for the driver. Further, MCI asserts that three different cases are more relevant than *Sprietsma* or *Myrick*: *Geier*, *Carden v. Gen. Motors Corp.*, 509 F.3d 227 (5th Cir. 2007), and *BIC Pen Corp. v. Carter*, 251 S.W.3d 500 (Tex. 2008). In these latter cases, MCI argues, the agencies carefully weighed competing interests and chose not to require safety devices the plaintiffs wanted. So too here, MCI continues, NHTSA evaluated the seating designs and desirability of seatbelts in motorcoaches and purposefully chose a limited scope of regulation.

We disagree with MCI's interpretation of NHTSA's actions. In particular, there is nothing in the regulatory history of motorcoaches to suggest that NHTSA intended to rely on seating design rather than seatbelts and promulgated standards to that effect. As discussed above, the 1973 notice proposed changing seat design to better protect passengers and also to incorporate seatbelts as an alternative restraint system. In 1974, NHTSA withdrew both proposals, finding that the cost of the methods did not justify their benefits. NHTSA did issue seating standards for school buses, *see* 49 C.F.R. § 571.222, but not for motorcoaches. Thus, it is inaccurate to suggest that NHTSA chose

an alternate method to protect passengers; instead, NHTSA chose not to regulate seating design or seatbelts in motorcoaches, a decision that does not have preemptive force for the reasons explained above.

Nor do we find *Geier*, *Carden*, or *BIC Pen* more analogous to the present situation. In *Geier*, the Supreme Court considered whether FMVSS 208 preempted a claim that a 1987 vehicle should have had airbags. 529 U.S. at 865. FMVSS 208, as in effect at the time, "deliberately sought variety—a mix of several different passive restraint systems." *Id.* at 878. NHTSA also chose to gradually phase in the requirements for passive restraints and made them conditional; because seatbelts provided the same or greater benefit at a lower cost, the passive-restraint standard would be rescinded if two-thirds of the states mandated seatbelt use within a certain period of time. *Id.* at 879–80. The reasons for this mix of restraints and gradual phase-in over time reflected NHTSA's experience and considerations of cost and public acceptance. Even though seatbelts provided the best protection in the event of a crash, most of the public did not wear them at the time. *Id.* at 877. While passive restraints such as airbags could provide some of that lost protection, they created problems of their own (e.g., harm to children), cost more than seatbelts, and were viewed with suspicion by the public. *Id.* at 877–78. Thus, rather than simply mandate airbags—a tactic that had failed when NHTSA required seatbelt buzzers and ignition interlocks[18]—NHTSA decided that public "safety would best be promoted if manufacturers installed *alternative* protection systems in their fleets rather than one particular system in every car." *Id.* at 881 (quotation marks omitted). Because

[18] An ignition interlock "force[s] occupants to buckle up by preventing the ignition otherwise from turning on." *Id*. at 876. Public displeasure at these methods resulted in Congress passing a law disallowing DOT from requiring them. *Id.*

the plaintiffs' suit required a single standard mandating the installation of airbags, it "presented an obstacle to the variety and mix of devices that the federal regulation sought." *Id.* Because the suit required all of the manufacturer's cars sold in the District of Columbia to be equipped with airbags, when FMVSS 208 only required ten percent of the manufacturer's nationwide fleet to be so equipped, it "stood as an obstacle to the gradual passive restraint phase-in that the federal regulation deliberately imposed." *Id.* Accordingly, the rule of law advocated by the plaintiffs was preempted by federal law. *Id.*

In *Carden*, the Fifth Circuit considered whether FMVSS 208 preempted the plaintiffs' claim that a car manufacturer should have installed a lap/shoulder seatbelt rather than a lap belt alone in the rear center seat of a 1999 Pontiac Grand Am. 509 F.3d at 229. Finding *Geier* directly on point, the court reviewed the history of FMVSS 208 and concluded that NHTSA deliberately gave manufacturers the choice of which kind of seatbelt to install based on specific policy reasons. *Id.* at 230–31. These reasons included the technical difficulties associated with installing a shoulder belt in the rear center position, and the greater cost of doing so even when the expected safety benefit was minimal given the low occupancy rate in that seat. *Id.* at 231. The Fifth Circuit then distinguished *Sprietsma* and its analysis of non-regulation by noting the presence of explicit regulation and the choice given therein. *Id.* at 232.

Finally, in *BIC Pen*, this Court considered whether federal law preempted a design defect claim regarding a BIC lighter. 251 S.W.3d at 503. We reviewed the certification process lighters must undergo at the direction of the Consumer Product Safety Commission, the regulatory agency charged with developing safety standards for consumer products. *Id.* The Commission adopted

regulations that require lighters to successfully resist operation by eighty-five percent of a child-test panel. *Id.* This number was chosen based on numerous factors, "including child resistence, overall safety, the realities of manufacturing, the variability and randomness of child testing, the product's utility, and the importance of customer acceptance." *Id.* at 507 (citing 16 C.F.R. § 1210.5(c)). The Commission was particularly concerned that lighters not be too difficult to operate or adults would forgo their use and resort to non-child-resistant lighters or matches, which posed even greater dangers to children. *Id.* Because the Commission weighed these factors and struck a delicate balance between them, we concluded that "imposing a common law rule that would impose liability above the federal standard is contrary to the Commission's plan and conflicts with federal law." *Id.* Accordingly, we held that the design defect claim was preempted. *Id.* at 509.

MCI argues these cases illustrate the preemptive effect of an agency's regulatory action following a careful analysis of various, and often competing, considerations of safety and cost. But MCI misses a telling distinction between these cases and the present one. In *Geier*, *Carden*, and *BIC Pen*, the agencies actually *issued* regulations. These regulations balanced competing considerations, as MCI notes, but in each case the courts considered the preemptive effect of a *regulation*. When an agency issues regulations, a federal law exists with which a state law can conflict. But when the agency chooses not to regulate, there is no preemptive federal law absent a clear and manifest indication of the agency's intent to forbid all regulation. NHTSA has not taken that further step regarding passenger seatbelts in motorcoaches. In this respect, the present case is more akin to *Sprietsma* and *Myrick*, in which the Supreme Court found no preemptive intent in the agencies' non-action.

Regulatory silence will not preempt a state law absent a clear and manifest statement of intent to forbid all regulation in that area. Applying this standard to NHTSA's decision not to require passenger seatbelts in motorcoaches, we find nothing in the regulatory history or agency statements indicative of such intent. In this lacuna of regulation, the jury's finding that MCI should have installed seatbelts on its motorcoach does not conflict with any federal law and is not preempted.

D. Glazing Materials and Federal Preemption[19]

We next consider the effect of FMVSS 205 on the Plaintiffs' claim that the motorcoach should have had laminated-glass windows. Unlike the seatbelt claim, here NHTSA issued an actual federal safety standard giving manufacturers a choice of glazing materials, including laminated and tempered glass. The jury determined that MCI should have used laminated glass rather than tempered glass and that this defect caused some of the Plaintiffs' injuries. The parties agree that FMVSS 205 gives a choice but disagree on its significance. Thus, we must decide if an agency's deliberate decision to give manufacturers a choice between several different materials, none of which is superior to the others in all circumstances, preempts a jury's conclusion that another of the required types should have been used. We conclude that it does not.

The Safety Act defines the federal motor vehicle safety standards as "minimum standard[s]." 49 U.S.C. § 30102(a)(9). And state regulation of vehicle safety through common-law tort actions

[19] The jury found that the lack of seatbelts caused the injuries of all the Plaintiffs. Thus, our conclusion that the seatbelt claim is not preempted is sufficient to uphold the jury's verdict. Even so, we discuss the preemptive effect of FMVSS 205 because, in light of the remand for a new trial, the issue of glazing materials will feature prominently on retrial. Accordingly, we address it to provide guidance to the trial court. *See Edinburg Hosp. Auth. v. Trevino*, 941 S.W.2d 76, 81 (Tex. 1997) ("Although resolution of this issue is not essential to our disposition of this case, we address it to provide the trial court with guidance in the retrial . . . .").

is expressly allowed: "[The Safety Act's saving clause] preserves those actions that seek to establish greater safety than the minimum safety achieved by a federal regulation intended to provide a floor." *Geier*, 529 U.S. at 870; *see also* 49 U.S.C. § 30103(e). Of course, a tort action that seeks to impose a requirement forbidden by a federal standard, or that forbids what the standard requires, is preempted due to the actual conflict. Likewise, a tort action that presents an obstacle to the federal purpose is preempted—*Geier* is clear that ordinary preemption principles apply. 529 U.S. at 874. But we must be mindful that Congress generally intended the federal safety standards to set a minimum standard for performance and allowed juries to determine in particular cases if the vehicle manufacturer should have done more.

The text of FMVSS 205 states its three-fold purpose—to reduce injuries resulting from impact to glazing surfaces, to provide driver visibility, and to minimize ejections—and incorporates by reference the standards of ANSI/SAE Z26.1-1996. 49 C.F.R. § 571.205, S2, S3.2(a). The ANSI standard delineates the testing requirements for the various glazing materials and allows the use of either laminated glass or tempered glass in vehicle windows other than the windshield, which must have laminated glass. *See* ANSI/SAE Z26.1-1996, T.1 (Items 1 & 2). Nothing in the text of FMVSS 205 indicates that it is anything other than a minimum materials standard. In the absence of the standard, manufacturers could use any material allowed by state law; the standard simply limits the range of available choices.

MCI argues that the choice of glazing materials is enough to preempt a jury's finding that a different material should have been used. To be clear, the jury did not find that MCI should have used a glazing material not permitted by FMVSS 205, only that MCI should have used a different

glazing material allowed by the standard. Even such a finding, MCI contends, violates the purpose of FMVSS 205 and the policy-motivated decisions NHTSA made in adopting it. Central to MCI's argument is its interpretation of *Geier* and that opinion's analysis of FMVSS 208. MCI claims that *Geier* and lower courts following it have applied FMVSS 208 to preempt tort actions that sought to hold manufacturers liable for not choosing a different safety measure allowed by the standard.

Lower courts have, in fact, interpreted *Geier* in this fashion,[20] but we believe these courts have read *Geier* too broadly. The Supreme Court in *Geier* did not condemn a common-law rule merely because it foreclosed a choice under the relevant safety standard. Rather, the Court emphasized the purpose of the choice: "FMVSS 208 embodies the Secretary's policy judgment that

---

[20] *See, e.g.*, *Carden*, 509 F.3d at 230–31 ("*Geier*, thus, compels the conclusion that a state tort suit that would foreclose a safety option intentionally left to vehicle manufacturers by Federal Motor Vehicle Safety Standards is preempted."); *Griffith v. Gen. Motors Corp.*, 303 F.3d 1276, 1282 (11th Cir. 2002) ("[U]nder *Geier*, when a Federal Motor Vehicle Safety Standard leaves a manufacturer with a choice of safety device options, a state suit that depends on foreclosing one or more of those options is preempted."); *Hurley v. Motor Coach Indus., Inc.*, 222 F.3d 377, 383 (7th Cir. 2000) ("[W]hen a Federal Motor Vehicle Safety Standard leaves a manufacturer with a choice of safety device options, a state suit that depends on foreclosing one or more of those options is preempted."); *Carrasquilla v. Mazda Motor Corp.*, 166 F. Supp. 2d 169, 176 (M.D. Pa. 2001) (concluding that plaintiffs' claim was "attacking one of the specifically permitted passive restraint options [under FMVSS 208]" (alteration in original)); *Hernandez-Gomez v. Volkswagen of Am., Inc.*, 32 P.3d 424, 428–29 (Ariz. Ct. App. 2001) (concluding that plaintiff's state tort claim is preempted by FMVSS 208); *Williamson v. Mazda Motor Co. of Am., Inc.*, 84 Cal. Rptr. 3d 545, 556 (Cal. Ct. App. 2008) (concluding that plaintiffs' claim related to lap-only seatbelt is barred by FMVSS 208), *cert. granted*, 77 U.S.L.W. 3611 (U.S. May 24, 2010) (No. 08-1314); *Roland v. Gen. Motors Corp.*, 881 N.E.2d 722, 728–29 (Ind. Ct. App. 2008) (holding that plaintiffs' common-law tort action is preempted "on the narrow grounds" that it conflicts with FMVSS 208, but refusing to join other courts that find preemption on "broader grounds" when any regulation affords a choice to manufacturers); *Osman v. Ford Motor Co.*, 833 N.E.2d 1011, 1021 (Ind. Ct. App. 2005) (holding that claims asserted in connection with automobile's passive-restraint system were preempted by FMVSS 208); *Heinricher v. Volvo Car Corp.*, 809 N.E.2d 1094, 1097–98 (Mass. App. Ct. 2004) (concluding that plaintiffs' state common law claims are preempted by FMVSS 208); *Morgan v. Ford Motor Co.*, 680 S.E.2d 77, 94–95 (W. Va. 2009) ("We therefore find that because the NHTSA gave manufacturers the option to choose to install either tempered glass or laminated glass in side windows of vehicles in FMVSS 205, permitting the plaintiff to proceed with a state tort action would foreclose that choice and would interfere with federal policy."). *But see O'Hara v. Gen. Motors Corp.*, 508 F.3d 753, 759 (5th Cir. 2007) ("When a federal safety standard deliberately leaves manufacturers with a choice among designated design options *in order to further a federal policy*, a common law rule which would force manufacturers to adopt a particular design option is preempted." (emphasis added)).

safety would best be promoted if manufacturers installed *alternative* protection systems in their fleets rather than one particular system in every car." 529 U.S. at 881 (quotation marks omitted). That is, the *choice itself* furthered the overall goal of safety, allowing manufacturers to experiment with different options and to build the public's confidence in the new technologies. The specific reasons for this mix of safety options phased-in over time is discussed above, and there is no doubt that *Geier*'s choice-with-a-purpose reasoning is securely grounded in FMVSS 208 and its particular history. To the extent that other courts have interpreted *Geier* in the context of FMVSS 208 and NHTSA's decision to phase-in a mix of passive restraint systems, we agree they are correct. But when *Geier*'s reasoning is oversimplified to find preemption based on a choice between two safety options and then exported to other safety standards where the unique text and history of FMVSS 208's passive restraint requirements are not relevant, we must respectfully disagree.[21]

Given our interpretation of *Geier*, we turn to MCI's argument that FMVSS 205 represents NHTSA's deliberate decision to give manufacturers a choice of safety options. That is, MCI seems to contend that NHTSA made a *Geier*-like policy decision to encourage a range of glazing choices. We do not agree. As noted, FMVSS 205 then and now gives manufacturers a choice of materials

---

[21] Hinton asks this Court to take judicial notice of the Solicitor General's amicus brief filed in *Williamson v. Mazda Motor of America, Inc.*, No. 08-1314, pending before the United States Supreme Court. We grant Hinton's request. *See supra* note 7. In *Williamson*, the Court granted certiorari to consider whether FMVSS 208 preempts a claim that a 1993 Mazda MPV van should have been equipped with a lap/shoulder belt in the rear middle seat rather than a lap-only belt. *See* 130 S. Ct. 3348 (May 24, 2010) (order granting certiorari); s*ee also* Brief for the United States as Amicus Curiae at 5, 21, *Williamson v. Mazda Motor of Am., Inc.*, No. 08-1314 (U.S. Apr. 23, 2010). The Solicitor General, joined by DOT and NHTSA, rejected the broad reading of *Geier*: "The government's briefs to this Court have consistently explained that NHTSA's decision to allow options, standing alone, does not compel a finding of preemption." Brief for the United States as Amicus Curiae at 18, *Williamson v. Mazda Motor of Am., Inc.*, No. 08-1314. Instead, more is needed: "But without more (such as the emphasis on diversity of solutions discussed in *Geier*), the States are not foreclosed from concluding, through a duty of care applied in common-law tort actions, that one option is superior to the others." *Id.* at 19.

and recognizes that no one type is superior in all circumstances. *See* 49 C.F.R. § 571.205, S3.2(a); ANSI/SAE Z26.1-1996 § 2.2. In the final rule adopting the new ANSI/SAE standards, NHTSA did not state a positive desire to preserve the use of tempered glass in windows by forbidding contrary state regulation. *See* 68 Fed. Reg. 43,964. Rather, NHTSA declined to continue rulemaking regarding advanced glazing materials after completing a ten-year study of the subject because other safety measures, such as side air curtains, also helped to mitigate ejections and NHTSA needed to devote its resources to developing standards for them. *See* 67 Fed. Reg. at 41,366. NHTSA also cited the costs associated with redesigning vehicles to accept advanced glazing materials and noted that use of these materials may increase the risk of neck injuries. *Id.*

In short, NHTSA extensively studied the issue and did not change the safety standard, which still allows manufacturers to choose among several types of glazing materials. FMVSS 205 is unlike FMVSS 208 and its carefully constructed timetable and mix of safety options. *Compare* 49 Fed. Reg. 6732, *and* 68 Fed. Reg. 43,964, *with* Occupant Crash Protection Final Rule, 49 Fed. Reg. 28,962 (July 17, 1984) (to be codified at 49 C.F.R. pt. 571). Neither set of standards is, as MCI argues, a "choice among the best available alternatives." Rather, the former merely narrows the range of manufacturers' choice of glazing materials from potentially unlimited to a short list. The latter emphasizes the choice among options as an important and integral part of the overall safety scheme. We find nothing in the standard's text, history, or NHTSA's comments to indicate that FMVSS 205 is anything other than a minimum standard. As a minimum standard, FMVSS 205 does

not preempt the jury's finding that MCI should have used laminated glass in the motorcoach's windows.[22]

We are not the first court to examine the preemptive effect of FMVSS 205. In *O'Hara v. General Motors Corp.*, the Fifth Circuit addressed the same issue in the context of a sport utility vehicle. 508 F.3d 753, 755 (5th Cir. 2007). The plaintiffs claimed that General Motors should have used advanced glazing materials in the side windows of a 2004 Chevrolet Tahoe instead of tempered glass. *Id.* The Fifth Circuit considered the text and history of FMVSS 205 as well as NHTSA interpretations of the standard and general comments on the subject matter of advanced glazing materials. *See id.* at 759–63. It concluded that FMVSS 205 differs from FMVSS 208 both in text and purpose—specifically that the relevant "factors" of the latter, "detailed implementation timelines, full vehicle testing procedures and 'options' language," that supported preemption—were "conspicuously absent from FMVSS 205." *Id.* at 760. The court found that NHTSA commentary on FMVSS 205 supported "the conclusion that it is a minimum safety standard." *Id.* at 761. Interestingly, the court also considered NHTSA's decision to terminate rulemaking on advanced glazing materials and analogized that choice to the Coast Guard's non-action in *Sprietsma*:

> We find the parallels between NHTSA's Withdrawal of Rulemaking and the Coast Guard's statements in *Sprietsma* to be compelling. NHTSA's 2002 Notice of Withdrawal focused on the need to develop experimental standards for new rollover accident technologies. It did not reject advanced glazing as unsafe (indeed, FMVSS 205 continued to require advanced glazing in vehicle windshields). Like the Coast Guard, the NHTSA Notice of Withdrawal cited cost concerns and minor safety issues to justify the agency's change in course. And also like the Coast Guard, NHTSA has

[22] On this issue, we agree with the Fifth Circuit in *O'Hara*, discussed below, that the presumption against preemption is unnecessary for resolution of the glazing materials claim because the jury's verdict does not actually conflict with FMVSS 205. *See* 508 F.3d at 759 n.4.

> continued to study advanced glazing as part of its rollover protection program. NHTSA's Notice of Withdrawal "does not convey an authoritative message of a federal policy against" advanced glazing in side windows.

Id. at 762–63.[23] Finding FMVSS 205 to be a minimum safety standard, the court held that the plaintiffs' negligence and strict liability claims were not preempted. *Id.* at 763.

The Supreme Court of West Virginia also considered whether FMVSS 205 preempted a claim that a vehicle manufacturer should have used advanced glazing materials rather than tempered glass in the side window of a sport utility vehicle. *Morgan v. Ford Motor Co.*, 680 S.E.2d 77, 81 (W. Va. 2009). The court examined *Geier*, *O'Hara*, and *Wyeth* at some length, *see id.* at 88–93, and specifically rejected the interpretation of *Geier* that we adopt, instead holding that a regulation giving a choice between different materials preempts a tort action premised on the superiority of one option, *id.* at 94–95. The court reasoned that "because the NHTSA made a public policy decision to not mandate advanced glazing in side windows because of safety concerns that advanced glazing has a slightly increased risk of neck injuries," it was compelled to find *Geier* directly applicable. *Id.* at 94.[24]

As our analysis makes plain, we agree with *O'Hara*. The *Morgan* court errs by concluding that merely because NHTSA chose not to require something for policy reasons, states may not do so as well. As discussed above, the rule in *Sprietsma* regarding the preemptive force of regulatory

---

[23] We do not understand MCI to argue that because NHTSA chose not to change the glazing options in FMVSS 205 after ten years of study, we should interpret this non-action as an affirmative policy decision against advanced glazing materials in side windows. Even if it had, we find persuasive *O'Hara's* comparison to *Sprietsma*.

[24] The Tennessee Court of Appeals followed *Morgan*'s analysis when confronted with the issue. *See Lake*, 2010 WL 891867, at *6–*9. The *Lake* court identified the split between *O'Hara* and *Morgan* and agreed with the latter. The South Carolina Supreme Court also followed *Morgan*'s and *Lake*'s analysis on this issue. *Priester v. Cromer*, 697 S.E.2d 567, 571 (S.C. 2010).

non-action is not so broad, particularly when NHTSA still permits manufacturers to choose what it would not require. There is no evidence that NHTSA intended to disallow states from requiring the use of advanced glazing materials in side windows. Nor do we agree with the *Morgan* court's broad interpretation of *Geier*, that preemption is mandated whenever an agency makes a considered decision to preserve the status quo and its range of choices. As the Solicitor General has said: "Manufacturers always have the 'option' of exceeding a minimum safety standard when NHTSA has decided not to mandate a more stringent alternative because of considerations of cost or feasibility—as NHTSA did in this case and, indeed, often does in considering regulatory alternatives. But if such an 'option' alone were enough to trigger federal preemption under *Geier*, the Safety Act's savings clause would be greatly undermined." Brief for the United States as Amicus Curiae at 15, *Williamson v. Mazda Motor of Am., Inc.*, No. 08-1314. We agree. Attributing preemptive intent to every deliberate agency decision runs afoul of Congress's choice to define the safety standards as minimum standards and its clear decision to allow juries a place in developing common-law rules that exceed the federally defined floor.

We hold that FMVSS 205 is a minimum standard that merely limits the possible glazing materials a manufacturer may choose for incorporation in its vehicles. As such, the jury's finding that MCI should have used a different glazing material in the motorcoach here presents no obstacle to the accomplishment and execution of a federal policy. Thus, we hold that the jury's verdict in favor of the Plaintiffs is not preempted by federal law.

III. Settling Persons

We finally consider whether Central Texas and the bus driver[25] are settling persons under Chapter 33 of the Texas Civil Practice and Remedies Code. The 1995 version of Chapter 33 provided a proportionate responsibility framework for apportioning percentages of responsibility in the calculation of damages.[26] At that time, section 33.003 required a trier of fact to determine the percentage of responsibility for each claimant, each defendant, each settling person, and each responsible third party who had been properly joined. TEX. CIV. PRAC. & REM. CODE § 33.003.[27] Section 33.013 provided, with some exceptions, that a defendant was only liable for the percentage of responsibility found by the trier of fact, unless the percentage exceeded fifty percent. *Id.* § 33.013(a);[28] *F.F.P. Operating Partners, L.P. v. Duenez*, 237 S.W.3d 680, 687 (Tex. 2007). If a defendant's percentage of liability exceeded fifty percent, the defendant was jointly and severally liable for the entirety of the damages recoverable by the claimant. TEX. CIV. PRAC. & REM. CODE § 33.013(b); *Duenez*, 237 S.W.3d at 687.

---

[25] Unless otherwise specified, we will refer to Central Texas and the bus driver collectively as "Central Texas" in this section of the opinion.

[26] The 1995 version of Chapter 33 applies to this case because the Plaintiffs filed suit on June 26, 2003. Chapter 33 was amended on June 2, 2003, but those amendments apply only to a cause of action filed on or after July 1, 2003. *See* Act of June 2, 2003, 78th Leg., R.S., ch. 204, §§ 4.05, 23.02(c), 2003 Tex. Gen. Laws 847, 856–57, 899.

[27] Act of June 3, 1987, 70th Leg., 1st C.S., ch. 2, § 2.06, 1987 Tex. Gen. Laws 37, 41, *amended by* Act of May 8, 1995, 74th Leg., R.S., ch. 136, § 1, 1995 Tex. Gen. Laws 971, 972, *amended by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 4.02, 2003 Tex. Gen. Laws 847, 855 (current version at TEX. CIV. PRAC. & REM. CODE § 33.003).

[28] Act of May 17, 1985, 69th Leg., R.S., ch. 959, § 1, 1985 Tex. Gen. Laws 3242, 3271, *amended by* Act of June 3, 1987, 70th Leg., 1st C.S., ch. 2, § 2.09, 1987 Tex. Gen. Laws 37, 42, *amended by* Act of May 8, 1995, 74th Leg., R.S., ch. 136, § 1, 1995 Tex. Gen. Laws 971, 974, *amended by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, §§ 4.07, 4.10(5), 2003 Tex. Gen. Laws 847, 858–59 (current version at TEX. CIV. PRAC. & REM. CODE § 33.013).

Relevant to our determination of this issue is the definition of a "settling person." While "settle" and "settlement" were not defined in Chapter 33, *see C & H Nationwide, Inc. v. Thompson*, 903 S.W.2d 315, 319 (Tex. 1994), "settling person" was. A "settling person" was "a person who at the time of submission has paid or promised to pay money or anything of monetary value to a claimant at any time in consideration of potential liability . . . with respect to the personal injury, property damage, death, or other harm for which recovery of damages is sought." TEX. CIV. PRAC. & REM. CODE § 33.011(5).[29] Here, the trial court refused MCI's request to include Central Texas as a "settling person" in a proportionate responsibility question in the jury charge. Whether the trial court erred in this ruling is crucial: a finding by the jury that Central Texas had a percentage of responsibility as a settling person could potentially have reduced MCI's percentage of liability to fifty percent or less, thus limiting the amount of damages MCI would have had to pay.

Our analysis of whether Central Texas is a settling person under Chapter 33 turns on a question of statutory construction. A question of statutory construction is a legal one which we review de novo, "ascertaining and giving effect to the Legislature's intent as expressed by the plain and common meaning of the statute's words." *Duenez*, 237 S.W.3d at 683 (citing *Tex. Dep't of Transp. v. City of Sunset Valley*, 146 S.W.3d 637, 642 (Tex. 2004)); *see also Leland v. Brandal*, 257 S.W.3d 204, 206 (Tex. 2008) (citing *Nat'l Liab. & Fire Ins. Co. v. Allen*, 15 S.W.3d 525, 527 (Tex. 2000)) (observing the necessity of a court determining and giving effect to the Legislature's intent

[29] Act of June 3, 1987, 70th Leg., 1st C.S., ch. 2, § 2.07, 1987 Tex. Gen. Laws 37, 41, *amended by* Act of May 8, 1995, 74th Leg., R.S., ch. 136, § 1, 1995 Tex. Gen. Laws 971, 973, *amended by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 4.05, 2003 Tex. Gen. Laws 847, 856–57 (current version at TEX. CIV. PRAC. & REM. CODE § 33.011(5)).

in construing a statute).[30] We first look at "the statute's language to determine that intent, as we consider it 'a fair assumption that the Legislature tries to say what it means, and therefore the words it chooses should be the surest guide to legislative intent.'" *Brandal*, 257 S.W.3d at 207 (quoting *Fitzgerald v. Advanced Spine Fixation Sys., Inc.*, 996 S.W.2d 864, 866 (Tex. 1999)). Thus, we consider the statute's plain and common meaning, and do not "look to extraneous matters for an intent the statute does not state." *Allen*, 15 S.W.3d at 527.

As noted, the applicable version of Chapter 33 defined "settling person" as a person who, at the time of submission, has paid or promised to pay *anything* of value to a claimant in consideration of liability. *C & H Nationwide*, 903 S.W.2d at 320. We apply the plain meaning of these words to the facts before us. Here, Central Texas had filed for bankruptcy, but its insurer deposited, on the bankruptcy court's order, the limits of its policy into the court's registry for payment to the Plaintiffs. Central Texas also agreed to pay the claimants $7,000 a year for five years. There is no question that the claimants who chose to obtain funds from the Apportionment Plan "settled" with Central Texas—they received money in exchange for a release of Central Texas's liability. But the Plaintiffs chose to participate in the Litigation Plan, which they claim could not constitute a settlement due to its uncertain and adversarial nature at the time of submission in the trial court.

As the court of appeals observed, all the parties in the bankruptcy court engaged in extensive negotiations over the division of the funds among the litigants, and Central Texas and its insurer did

[30] The court of appeals stated that the appropriate standard of review for the "settling person" inquiry is abuse of discretion. While it is true that we generally review a trial court's refusal to submit a particular instruction under an abuse of discretion standard, *see In re V.L.K.*, 24 S.W.3d 338, 341 (Tex. 2000), an issue of statutory construction is a legal question which we review de novo. *See Duenez*, 237 S.W.3d at 638; *see also Galle v. Pool*, 262 S.W.3d 564, 571 n.3 (Tex. App.—Austin 2008, pet. denied).

not oppose tendering the funds into the court's registry or participating in mediation. Thus, Central Texas definitely paid something of monetary value to the claimants, including the Plaintiffs—$5 million in insurance proceeds, plus $7,000 annually—in respect to its potential liability, and the Plaintiffs negotiated for, and were the ultimate recipients of, some of these proceeds. Central Texas was further discharged from tort liability in the bankruptcy court on approval of its reorganization plan, which the Plaintiffs approved. Although the Litigation Plan was arguably not styled a settlement by the claimants or bankruptcy court, it had all semblances of a settlement. *See Ratcliff v. Fibreboard Corp.*, 819 F. Supp. 584, 588–89 (W.D. Tex. 1992) (concluding that agreement was a final settlement under Chapter 33, despite language in the agreement to the contrary). We hold, under these facts, that Central Texas is a settling person, and the trial court should have submitted a question to the jury concerning Central Texas's proportionate responsibility as such.

The Plaintiffs advance several arguments supporting their position that Central Texas cannot be considered a settling person under the applicable version of Chapter 33. We address each in turn. First, the Plaintiffs contend that the uncertain and adversarial nature of the Litigation Plan renders the Plan a form of litigation. One group of claimants—those who elected to participate in the Apportionment Plan—did immediately collect their proportion of the insurance funds, while those who elected to participate in the Litigation Plan deferred their receipt of the funds. Our inquiry, then, is whether electing to defer the collection of funds permits the Plaintiffs to deny Central Texas's status as a settling person. We conclude it does not. The definition of settling person requires only a promise to pay, not an actual payment, in consideration for a release from liability. *See C & H Nationwide*, 903 S.W.2d at 320. Here, there was, in essence, a promise to pay in consideration for

Central Texas's release from liability. While the Plaintiffs chose to present arguments in a hearing before a special judge, the Litigation Plan also allowed the Plaintiffs to "agree at any time to approve full or partial distribution of the Litigation Funds to any or all participants," even without going before the special judge. There was never a real possibility that the Plaintiffs would not recover some amount of proceeds from the Litigation Fund: the Plaintiffs not only had the option of receiving the proceeds in the Litigation Fund at any time, but the Litigation Plan contained no provision for the return of any nonawarded proceeds to Central Texas or its insurer.

Further, even though the Plaintiffs chose not to approve distribution from the Litigation Fund before the hearing in front of the special judge, the hearing was not adversarial in nature and the end result of the hearing was certain before it began. Central Texas was not present at the hearing and, of course, had no reason to be present since it had irrevocably paid money into the court's registry in exchange for a release from liability. Thus, the hearing lacked the adversarial nature the Plaintiffs contend existed. The Plaintiffs argue that the amount each claimant might have received following the hearing was uncertain. But the Litigation Plan capped the amount of each claimant's recovery at 110% of that determined by the mediator, and each participant in the Litigation Plan received within two percent of the amount determined by the mediator, with one exception. Even if the exact amount each claimant might have received was uncertain, there was little uncertainty that each Plaintiff was going to receive *some* amount. The statute does not require certainty in the actual amount of the money or thing of monetary value—just the promise that the person will receive

something of value. TEX. CIV. PRAC. & REM. CODE § 33.011(5);[31] s*ee also Gilcrease v. Garlock, Inc.*, 211 S.W.3d 448, 455 (Tex. App.—El Paso 2006, no pet.) (holding settlement agreement was not contingent because the defendants made an unconditional promise to pay).

Second, the Plaintiffs contend that Central Texas's release from liability in the bankruptcy court was involuntary under federal bankruptcy law, and thus cannot constitute a settlement. *See In re Arrowmill Dev. Corp.*, 211 B.R. 497, 503 (Bankr. D.N.J. 1997). But to hold that the definition of "settling person" requires a voluntary release of claims would compel us to insert language into the statute that is not there. *See Fortis Benefits v. Cantu*, 234 S.W.3d 642, 649 n.41 (Tex. 2007) (noting that courts "should not by judicial fiat insert non-existent language into statutes"). In any event, it is inaccurate to describe Central Texas's release from liability as involuntary. Central Texas and its insurer engaged in negotiations concerning not only the money to be placed in the bankruptcy court's registry and the manner in which funds were to be allocated, but also whether or not Central Texas was to be released from liability. When the Plaintiffs voted in favor of approving Central Texas's reorganization plan, they consented to release Central Texas from liability.

Third, the Plaintiffs contend that there was uncertainty "*at the time of submission*." TEX. CIV. PRAC. & REM. CODE § 33.011(5) (requiring the payment or promise to pay something of monetary value to have occurred "at the time of submission" in order for a person to be considered a "settling

[31] Act of June 3, 1987, 70th Leg., 1st C.S., ch. 2, § 2.07, 1987 Tex. Gen. Laws 37, 41, *amended by* Act of May 8, 1995, 74th Leg., R.S., ch. 136, § 1, 1995 Tex. Gen. Laws 971, 973, *amended by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 4.05, 2003 Tex. Gen. Laws 847, 856–57 (current version at TEX. CIV. PRAC. & REM. CODE § 33.011(5)).

person") (emphasis added).[32] But the fact that the Plaintiffs had not actually presented their cases to the special judge at the time of submission does not change whether or not the settlement was certain. At the time of submission in the trial court, Central Texas and its insurer had already deposited funds in the bankruptcy court's registry, the Litigation Plan had been in place for over two years, and the Plaintiffs had the option of requesting disbursement of their proportionate shares of the Fund.

Fourth, the Plaintiffs argue that the proper vehicle for proportioning some share of Central Texas's potential liability would have been through its joinder as a responsible third party. Under the applicable version of Chapter 33, a responsible third party was defined as a person (1) over whom the court can exercise jurisdiction, (2) who was not sued by the claimant, and (3) who is or may be liable for all or part of the damages claimed against the named defendant. TEX. CIV. PRAC. & REM. CODE § 33.011(6).[33] The term specifically excluded "a person or entity that is a debtor in bankruptcy proceedings or a person or entity against whom this claimant's claim has been discharged in bankruptcy, except to the extent that liability insurance or other source of third party funding may be available to pay claims asserted against the debtor." *Id.* The Plaintiffs contend that since a debtor in bankruptcy *without* the availability of liability insurance was excluded from the definition of

---

[32] Act of June 3, 1987, 70th Leg., 1st C.S., ch. 2, § 2.07, 1987 Tex. Gen. Laws 37, 41, *amended by* Act of May 8, 1995, 74th Leg., R.S., ch. 136, § 1, 1995 Tex. Gen. Laws 971, 973, *amended by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 4.05, 2003 Tex. Gen. Laws 847, 856–57 (current version at TEX. CIV. PRAC. & REM. CODE § 33.011(5)). The current version of section 33.011(5) allows for the settlement to occur "at any time." TEX. CIV. PRAC. & REM. CODE § 33.011(5). The applicable version of the statute, however, was limited to settlements made "at the time of submission."

[33] Act of May 8, 1995, 74th Leg, R.S., ch. 136, § 1, 1995 Tex. Gen. Laws 971, 973, *amended by* Act of June 2, 2003, 78th Leg., R.S., ch. 204, § 4.05, 2003 Tex. Gen. Laws 847, 856–57 (current version at TEX. CIV. PRAC. & REM. CODE § 33.011(6)).

responsible third party, it follows that a debtor in bankruptcy *with* the availability of liability insurance—like Central Texas—is a responsible third party.[34] Assuming that Central Texas could properly be characterized as a responsible third party, nothing in Chapter 33 suggested that a party's identification as a responsible third party or settling person is an either-or proposition. A person could potentially fall within the definitions of both settling person and responsible third party, and the Legislature included no language in Chapter 33 indicating otherwise. *See Brandal*, 257 S.W.3d at 206 (noting that the Legislature "tries to say what it means, and therefore the words it chooses should be the surest guide to legislative intent" (citing *Fitzgerald*, 996 S.W.2d at 866)); *Lee v. City of Houston*, 807 S.W.2d 290, 295 (Tex. 1991) (observing that a court may not "judicially amend a statute and add words that are not implicitly contained in the language of the statute"). The Legislature did not limit the designations of settling person and responsible third party as exclusive, and we will not read such a limitation into the statute. *See C & H Nationwide*, 903 S.W.2d at 320 (concluding that the definition of "settling person" is not limited to those who fully resolve all claims against them and includes those who settle only partially); *City of Rockwall v. Hughes*, 246 S.W.3d 621, 629 (Tex. 2008) (noting that a statute is to be interpreted as written, unless the context requires otherwise or the construction would lead to an absurd result).

Fifth, the Plaintiffs contend that to find Central Texas a settling person will confuse settlement jurisprudence and overbroadly designate a person as settling any time the person deposits

---

[34] MCI did attempt to join Central Texas as a responsible third party, but the trial court refused this request. MCI appealed this decision to the court of appeals, which held that the trial court did not abuse its discretion in denying MCI's motion for leave to join Central Texas as a responsible third party. MCI did not brief this issue to this Court; accordingly, we express no opinion on the propriety of the trial court's refusal to submit a responsible third party question to the jury.

funds in a court's registry. We disagree with this assertion. We do not hold that a deposit of funds in a court's registry is always akin to a settlement. Rather, it is so when, as here, the negotiations and terms of an agreement in every way resemble a settlement. When this is the case, we must define it as what it is—a settlement. As discussed before, Central Texas and its insurer did not simply deposit funds in the bankruptcy court's registry. They negotiated the terms of the deposits with the claimants and entered into a mediated agreement where the claimants could either accept the funds immediately or defer acceptance to a later date, and Central Texas was released from liability. Our holding will also have no adverse effect on parties in bankruptcy proceedings or in settlement negotiations. To the contrary, parties in bankruptcy and related litigation will know that if they enter into an agreement that in all respects resembles a settlement, they will be deemed settling persons in related state litigation for purposes of Chapter 33.

Finally, the Plaintiffs point to statements made both in documents in the bankruptcy court[35] and by the bankruptcy court judge suggesting that the Litigation Plan was not a settlement under Chapter 33. In his dissent, CHIEF JUSTICE JEFFERSON also relies on these statements as indication that the Litigation Plan was not a settlement. But these statements were not part of the bankruptcy court's holdings. As the court of appeals observed, these were merely *ipse dixit* statements that, in any event, have no bearing on our interpretation of Texas law. *See Allen*, 15 S.W.3d at 527 (observing that we consider the statute's plain and common meaning and do not "look to extraneous matters for an intent the statute does not state"); *cf. In re W.E.R.*, 669 S.W.2d 716, 716 (Tex. 1984)

[35] For example, the bankruptcy court order approving and describing the Apportionment Plan states that participation of a bus crash claimant in the Litigation Plan "shall not constitute a settlement." As the Plaintiffs note in their brief, the claimants prepared and agreed to the Apportionment Plan.

(per curiam) (holding that appellate court may not accept a trial judge's oral comments as findings of fact or conclusions of law).

CHIEF JUSTICE JEFFERSON asserts that we improperly construe the circumstances under which the Plaintiffs pursued their claims in the bankruptcy court. We respectfully disagree. As discussed above, the portion of the Apportionment Plan concerning the Litigation Plan specifically provided that the Litigation Plan participants could agree *at any time* to distribution of Litigation Funds to any or all participants, provided that it was done in writing by all participants in the Litigation Plan. Although the Plaintiffs did not ultimately exercise this option, it was available to them at the time of submission in the trial court. Thus, at the time of submission, not only had Central Texas unilaterally deposited funds in the bankruptcy court registry for future distribution to the claimants, but the Plaintiffs—and other Litigation Plan participants—had the option of receiving those funds at any time. Moreover, even though the Plaintiffs ultimately decided to pursue the "litigation" option, the record belies a description of the hearing before the special judge as adversarial or contingent. The claimants crafted the Litigation Plan after extensive negotiations and, as previously mentioned, could not individually recover more than 110% of the mediator's allocation. While it is true that the Litigation Plan did not set a floor on each claimant's possible individual recovery, there was never a real possibility that any of the Plaintiffs—all victims of the bus accident and their families—would receive none of the bankruptcy court funds, given that the hearing was uncontested and the Litigation Plan contained no provision for the return of undisbursed funds to Central Texas. This is not a retroactive view of the proceedings: because Central Texas's reorganization plan had previously been approved, Central Texas had no reason to appear at the hearing. Of course, the

dissent correctly notes that the actual results of the hearing before the special judge are not relevant since we must determine settlement "at the time of submission." But the results—with all but one participant receiving within two percent of the amount assigned by the mediator—do highlight the fact that this was not actual, adversarial litigation with an uncertain outcome. There is further no indication in the record that other "potential parties" were entitled to the Litigation Funds in lieu of the Litigation Plan participants. Rather, the bankruptcy judge stated that other parties might be entitled to those funds if the Litigation Plan participants were not for whatever reason. At the time of submission, Central Texas had deposited the limits of its insurance policy in the bankruptcy registry and had been released from liability, and the Litigation Plan participants had the option of either receiving their proportionate shares of the funds or bringing their cases before a special judge in a nonadversarial hearing. Despite how the bankruptcy court or the Plaintiffs might describe these events, we conclude they constitute a settlement under Chapter 33.

Chapter 33 expresses the Legislature's intent to hold defendants responsible for only their own conduct. Its purpose is to hold each person "responsible for [the person's] own conduct causing injury." *Duenez*, 237 S.W.3d at 690. "This is consistent with a fundamental tenet of tort law that an entity's liability arises from its own injury-causing conduct." *Id.* We therefore hold that the trial court erred in refusing to submit a question to the jury concerning Central Texas's proportionate responsibility as a settling person.

IV. Conclusion

For the foregoing reasons, we affirm the court of appeals' judgment and remand the case to the trial court for further proceedings consistent with this opinion.

OPINION DELIVERED: December 17, 2010

IN THE SUPREME COURT OF TEXAS

NO. 09-0048

MCI SALES AND SERVICE, INC., F/K/A HAUSMAN BUS SALES, INC. AND MOTOR COACH INDUSTRIES MEXICO, S.A. DE C.V., F/K/A DINA AUTOBUSES, S.A. DE C.V., PETITIONERS,

v.

JAMES HINTON, INDIVIDUALLY AND AS REPRESENTATIVE OF THE ESTATE OF DOLORES HINTON, DECEASED, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE TENTH DISTRICT OF TEXAS

Argued March 24, 2010

CHIEF JUSTICE JEFFERSON, dissenting in part.

At the time this case was submitted to the jury, James Hinton[1] had neither received nor been promised any payments to settle his claims. Because the Court nevertheless concludes that Central Texas' payments to the bankruptcy court's registry rendered it a "settling person," I respectfully dissent in part.

1. The statute requires courts to evaluate settling persons "at the time of submission."

Former section 33.011—the statutory provision applicable here—defined "settling person" as:

[1] James Hinton is one of a number of plaintiffs whose claims are now before us. For ease of reference, I refer to them as "Hinton."

> a person who *at the time of submission* has paid or promised to pay money or anything of monetary value to a claimant at any time in consideration of potential liability . . . with respect to the personal injury, property damage, death, or other harm for which recovery of damages is sought.

Act of June 3, 1987, 70th Leg., 1st C.S., ch. 2, § 2.07, 1987 Tex. Gen. Laws 37, 41 (amended in 1995 and 2003) (current version at TEX. CIV. PRAC. & REM. CODE § 33.011) (emphasis added). Because the statute stipulated that a settling person was one who, "at the time of submission" of the jury question, had paid or promised to pay, reviewing courts cannot consider a post-submission monetary exchange when determining whether a party was a settling person. *See Knowlton v. U.S. Brass Corp*., 864 S.W.2d 585, 598 (Tex. App.–Houston [1st Dist.] 1993) ("[A] party who settles after objections are made to the charge, after the charge is read to the jury, and after closing arguments, although before the jury begins deliberating, is not a settling person because the settlement had not been effected *at the time of submission*."), *aff'd in part and rev'd in part on other grounds, sub nom. Amstadt v. U.S. Brass Corp.*, 919 S.W.2d 644 (Tex. 1996); *Gilcrease v. Garlock, Inc*., 211 S.W.3d 448, 454-55 (Tex. App.–El Paso 2006, no pet.) (holding that settlement agreements cannot be contingent on any other outcome, at the time of submission, in order to satisfy chapter 33).

At the time the proportionate responsibility question was submitted to the jury, and throughout the course of the trial, Hinton had not settled any claims with Central Texas, and the funds that Central Texas placed in an interest-bearing account were never promised to any particular claimant. The bankruptcy court rejected the notion that the funds had a guaranteed trajectory, pointing to various contingencies, including the possibility that "some [of the claims] could be adjusted to zero." As a historical fact, of course, "each participant in the Litigation Plan received

within two percent of the amount determined by the mediator, with one exception," ___S.W.3d at___, and "the Plaintiffs negotiated for and were the ultimate recipients of some of these proceeds," *id*. at___. But those facts chronicle Hinton's status *after* submission, which is irrelevant under the statute. The trial court appropriately viewed Hinton's status at the time of submission, as no one could have known at that point whether Hinton would recover any of the remaining funds.

2. Under Central Texas' bankruptcy reorganization, claimants had two choices: guaranteed payment under the Apportionment Plan or contingent recovery under the Litigation Plan.

The Apportionment and Litigation Plans do, in some ways, bear the marks of a settlement. Central Texas tendered money to the bankruptcy court to satisfy claims against it, and it was released from liability. At the time of submission, however, money had not been paid or promised "to a claimant," as required under the statute, TEX. CIV. PRAC. & REM CODE § 33.011, but rather deposited into a court registry—the ultimate distribution of which remained uncertain.

Central Texas' insurers deposited the $5 million policy limits into the bankruptcy court's registry to set aside costs for the multiple bus crash claimants. Central Texas pledged to pay an additional $7,000 per year for five years, making the total amount available to such claimants around $5,035,000. Claimants were given two options regarding disbursement: (1) they could join the "Apportionment Plan," in which a mediator would delegate a percentage of liability to each defendant, after which participating claimants could either immediately collect funds, or receive an apportionment in future litigation; or (2) claimants could join the "Litigation Plan," in which participants chose a special judge, decided on the form of a proceeding, and ultimately reasserted their claims. As the bankruptcy judge noted, recovery under the Litigation Plan was contingent on

proof that the defendants' negligence "was a proximate cause of [the claimants'] injuries and/or damages. And then they had to prove, if they met that burden, the extent of the damages." Based on the evidence presented, the special judge would make new liability determinations, assign amounts owed, and, if enough funds remained, allot those funds accordingly. Hinton chose the Litigation Plan.

The bankruptcy judge summarized the plans as follows:

> One, it allowed the people that wanted their money now to take it. Those people who disagreed with their claim agreed that other people could take money, which diminished the pool. That's a huge agreement. And number two, it provided that, among themselves, they could re-challenge their numbers, and when it was all done, re-look at their percentage, and they'd only get a percentage of what was left. . . .
>
> They did agree among themselves that, no matter—that they would start with the number they originally had been given in the apportionment plan. . . . And they agreed that, no matter what the new evidence showed, they wouldn't increase their claim by more than ten percent. . . .
>
> . . . So, among themselves, they could go up or down some, but it wouldn't be more than ten percent up; *there was no limit on down*.

(Emphasis added.)

To further complicate matters, the bankruptcy judge recognized that other potential parties later appeared to be "entitled to recover some of the [remaining] two and half million," and that it may "turn[] out, for a number of reasons, that the litigation plan claimants are not entitled to it." As to this potential outcome, the judge noted that Litigation Plan claimants could be left in the cold:

> [T]he initial apportionment agreement, and the information available to whoever would look at that, has grown greatly. And, so, it's certainly possible that the information provided to the special judge could result in one or more or all of the parties here, the litigation fund claimants, having their claims adjusted. It's possible some could be adjusted to zero, just factually, just based on that information.

Consequently, Hinton, as a "litigation fund claimant," could not count on recovering any of the money set aside by Central Texas.

The Court's observation that "Plaintiffs had the option of requesting disbursement of their proportionate shares of the Fund," ___S.W.3d at___, mistakenly lumps members of the Apportionment Plan with members of the Litigation Plan. Hinton, a member of the latter group, elected to try his claims in lieu of immediate receipt of his share of the insurance funds. It is true that the order approving the Apportionment Plan stipulated that

> [t]he parties may agree at any time to approve full or partial distribution of the Litigation Funds to any or all participants. Any agreement to distribute funds, however, must be agreed to in writing by all participants remaining in the Litigation Plan at the time the agreement is entered.

At the time the jury question was submitted, however, no party had attempted to enter into any such agreement, and even if any of them had, there was no guarantee that every other participant in the Litigation Plan would have agreed to such a distribution in writing. The parties rejected this option by refusing to enter into the Apportionment Plan in the first instance.

In fact, the above provision more likely referred to those parties who had not yet decided whether to join the Litigation Plan, and therefore had an option to join the Apportionment Plan before re-litigating their claims under the Litigation Plan. The preceding provision in the order approving the Apportionment Plan supports this interpretation, since it mandates that

> [e]ach participant in the Litigation Plan agrees that *any recovery from the Litigation Fund will necessitate that the claimant prove by a preponderance of the evidence* . . . that the negligence of [the defendants] was a proximate cause of the participant's injuries and/or damages; and . . . the amount of damages suffered by the claimant as a result of that negligence.

(Emphasis added.) The Apportionment Plan gave parties an opportunity to collect full or partial distribution of the funds. By rejecting this option, Hinton and others explicitly chose to re-litigate their claims. As the Court concedes, "the Litigation Plan did not set a floor on each claimant's possible individual recovery." ___S.W.3d at___.

3. Central Texas was not a "settling person" under the plain language of the statute.

While the Court correctly notes that "[t]he statute does not require certainty in the actual *amount* of the money or thing of monetary value," ___S.W.3d at___ (emphasis added), the statute does require certainty as to the *eventual receipt* of money or thing of monetary value. *See* TEX. CIV. PRAC. & REM. CODE § 33.003; *Hall v. White, Getgey, Meyer & Co., LPA*, 347 F.3d 576, 582-83 (5th Cir. 2003) (applying Texas law), *rev'd in part on other grounds*, 465 F.3d 587 (5th Cir. 2006); *Gilcrease*, 211 S.W.3d at 454-55.

The Court cites *Gilcrease v. Garlock* for the proposition that unconditional promises to pay are valid settlements for purposes of chapter 33. *See Gilcrease*, 211 S.W.3d at 455. *Gilcrease* holds that unconditional promises to pay are valid settlements, however, only so long as the promises are not contingent on any outside factors, such as related litigation proceedings. In *Gilcrease*, settling defendants had yet to pay the full amount they had promised claimants, but they *had* made unconditional promises to pay. *Id.* Payment was not contingent on bankruptcy proceedings, or on any other future arrangements between the parties. *Id*. The *Gilcrease* court distinguished the case before it from two other cases that themselves more closely bore a resemblance to the facts before us now, *McNair v. Owens-Corning Fiberglas Corp*., 890 F.2d 753 (5th Cir. 1989), and *Cimino v.*

Raymark Indus., Inc., 751 F. Supp. 649 (E.D. Tex. 1990), *rev'd, in part, on other grounds*, 151 F.3d 297 (5th Cir. 1998).

In *McNair*, the Fifth Circuit held that notes promising payment did not constitute a settlement if their ultimate payment depended on the outcome of insurance litigation. *McNair*, 890 F.2d at 755-56. In that case, asbestos plaintiffs received notes from two defendants who were in the process of litigating claims with their insurers. *Id*. Despite the fact that the notes constituted promises to pay, the court held that because payment was contingent on some future litigation—no matter how likely it was to end in their favor—the promise of payment could not be considered a settlement within the terms of the statute. *Id*.

The *Gilcrease* court next looked to a federal district court case, *Cimino v. Raymark Industries, Inc.*, 751 F. Supp. at 656. In that case, plaintiffs reached a non-cash settlement agreement with an insolvent defendant who promised to pay a specified sum of money over a period of years. *Id*. The court held that, due to the defendant's insolvency, the settlement agreement was more like a promissory note, since "[p]ayment [was] contingent on the outcome of the unstable . . . bankruptcy proceedings and on the continued financial viability of the [defendant]." *Id*.

Like the defendant in *Cimino*, Central Texas (and its insurer) agreed to deposit money in the bankruptcy court. Hinton's receipt of these funds, however, remained contingent on the outcome of the Litigation Plan proceedings, and on the existence of additional claims from outside parties. Despite Central Texas' deposit of insurance funds, and its promise to pay a specified amount over a period of years, Hinton remained at risk of not recovering, and therefore, the agreement was at best akin to the "promissory note" in *Cimino*.

Bankruptcy courts often provide a "settle or litigate" option like the one used here. *See* Georgene Vairo, *Mass Torts Bankruptcies: The Who, The Why and The How*, 78 AM. BANKR. L.J. 93, 102 (2004) ("If a settlement was not reached, the claimant could elect mediation, binding arbitration, or traditional tort litigation."). Courts can distinguish between parties who choose to settle (like those under the Apportionment Plan), and those who choose to litigate (like those under the Litigation Plan). This ready distinction is evidenced by the terms of the bankruptcy court's order approving and describing the two plans:

> All Bus Crash Claimants participating in the Litigation Plan agree to be bound by the terms and conditions of the Litigation Plan. A failure to elect payment . . . constitutes an agreement to be bound by the terms of the Litigation Plan. *The participation of any Bus Crash Claimant in the Litigation Plan . . . shall not constitute a settlement* or compromise of the claimant's claims against the debtors.

(Emphasis added.)

I would hold that the court of appeals erred in reversing the trial court's refusal to submit Central Texas as a "settling person." Because the Court's holding regarding Chapter 33 neither complies with the statute ("at the time of submission"), nor properly construes the circumstances under which Hinton pursued his claims within the bankruptcy proceedings, I respectfully dissent from that part of the Court's judgment.

Wallace Jefferson
Chief Justice

Opinion Delivered: December 17, 2010

IN THE SUPREME COURT OF TEXAS

NO. 09-0073

MERCK & CO., INC., PETITIONER,

v.

FELICIA GARZA, ET AL., RESPONDENTS

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE FOURTH DISTRICT OF TEXAS

Argued January 20, 2010

JUSTICE HECHT delivered the opinion of the Court.

JUSTICE WILLETT and JUSTICE GUZMAN did not participate in the decision.

Respondents contend that Vioxx, a prescription drug, caused their decedent's death. In *Merrell Dow Pharmaceuticals, Inc. v. Havner*,[1] we set requirements for determining whether epidemiological evidence is scientifically reliable to prove causation. The parties here dispute what those requirements are, whether they apply in this case, and whether they were satisfied. We hold that *Havner*'s requirements apply and were not met, and that the evidence was therefore legally

[1] 953 S.W.2d 706 (Tex. 1997).

insufficient to prove causation. Accordingly, we reverse the judgment of the court of appeals[2] and render judgment that respondents take nothing.

I

A

Leonel Garza had a long history of heart disease. Twenty years before his death at age 71, he suffered a heart attack and four years later underwent quadruple bypass surgery to alleviate blockages in four of his coronary arteries. In the years that followed, he had one cardiac catheterization procedure that revealed additional blockages in three arteries, followed by a second such procedure that revealed severe recurrent coronary artery disease. He had a stent placed in his left main artery to increase the blood flow into his heart, but two years later was diagnosed with atherosclerotic obstructive disease and chronic venous insufficiency in his legs. He was also diagnosed with an abdominal aortic aneurysm.

Twenty-five days before his death, Garza complained to his cardiologist, Dr. Michael Evans, of intermittent numbness, pain, and weakness in his left arm. After determining that Garza was not having a heart attack, Evans ordered an ultrasound of Garza's neck to check the circulation to his brain and a stress test to check the circulation to his heart. Evans also gave him a week's supply of 25 mg Vioxx for pain relief and scheduled a follow-up visit eight days later.

When Garza returned for his appointment, Evans was out of town, and one of his partners, Dr. Juan Posada, reviewed Garza's test results with him and his wife. The stress test revealed that

[2] 277 S.W.3d 430 (Tex. App.–San Antonio 2008).

Garza had a stable cardiac status, and Posada noted in Garza's record that he thought Garza was on optimal medical management. However, the test did reveal some small areas of apical ischemia, meaning that a part of the tip of Garza's heart was not getting enough blood when stressed. Posada offered the possibility of a cardiac catherization to more fully investigate the cause of the apical ischemia, but Garza declined, opting to discuss the results with Evans a month later. According to Mrs. Garza, Posada gave her husband thirty additional 25 mg Vioxx pills. Seventeen days later, on April 21, 2001, Garza died while alone at his ranch near Rio Grande City, Texas. The autopsy found that the immediate cause of death was a "probable myocardial infarction" initiated at least in part by the underlying cause of "severe coronary artery disease".

Garza's statutory beneficiaries ("the Garzas") sued Merck & Co., Inc., the manufacturer of Vioxx, for products liability, alleging that the drug was defective as designed and as marketed with inadequate warnings. Merck repeatedly challenged the scientific reliability of the Garzas' evidence offered to prove that Vioxx caused Garza's death. The trial court overruled Merck's objections. The jury returned a verdict for the Garzas, awarding $7 million actual damages, plus $25 million in punitive damages, which the trial court reduced to the applicable statutory maximum of $750,000.[3] Merck appealed.

The court of appeals held that the Garzas could not recover on their design-defect claim because they did not present sufficient evidence of a safer alternative design, but that they could recover on their inadequate-warning claim.[4] The court rejected Merck's argument that the Garzas

[4] 277 S.W.3d at 440 .

had failed to meet *Havner*'s requirements for proving causation because they had not produced two statistically significant epidemiological studies showing that Vioxx at the dose and for the duration taken by Garza more than doubles the risk of heart attack.[5] The court believed that *Havner* did not "establish[] such a bright-line test for causation" but mandated that the sufficiency of the evidence be determined from its totality.[6] An expert witness called by the Garzas testified that clinical trials had "indicated a more than two-fold risk of serious cardiovascular 'adverse experiences' suffered by the people who participated in the studies . . . within twelve weeks or less of taking Vioxx."[7] The expert had opined that there was "a pretty strong case that the risk of Vioxx for heart attacks can occur at any time after the initiation of the medicine."[8] The court concluded that this was sufficient evidence to support general causation.[9] However, the court reversed the Garzas's judgment for juror misconduct and remanded the case for a new trial.[10]

We granted Merck's petition for review complaining that judgment should be rendered against the Garzas.[11]

Vioxx, or rofecoxib, is a non-steroidal anti-inflammatory drug (NSAID). NSAIDs block

> the production of prostaglandins, which are hormone-like chemicals that are released in the body in response to injury. The prostaglandins cause inflammation, redness, swelling, pain, and fever. Reducing the amount of protaglandins reduces inflammation and its symptoms. In order to inhibit production of prostaglandins, the NSAIDs act by blocking the enzyme cyclooxygenase (COX). After further study scientists discovered that the COX enzyme has two isoforms, one associated with inflammation (COX-II) and another thought to protect the lining of the stomach (COX-1).[12]

Early NSAIDS were non-selective, meaning that they restricted both forms of the COX enzyme, but Vioxx and the other selective NSAIDs only restrict COX-2.[13] Scientists theorized that, by restricting only COX-2, a selective NSAID could provide the pain relief afforded by non-selective NSAIDs while avoiding their gastrointestinal complications, such as perforations, ulcers, and bleeding.[14]

After following Food and Drug Administration procedure for seeking approval of a new drug, Merck submitted its application in late 1998. A few months later, the FDA approved Vioxx as "safe and effective" for the treatment of osteoarthritis, acute pain, and menstrual pain. Merck then applied to the FDA for approval to use Vioxx to treat rheumatoid arthritis. As part of its application, Merck commissioned the VIGOR clinical trial, which was "designed to compare the occurrence of [gastrointestinal] toxicity with twenty-five and fifty milligrams per day of Vioxx or one thousand milligrams per day of Naproxen," a non-selective NSAID.[15] In addition to finding a gastrointestinal

benefit, VIGOR also revealed a secondary finding that patients taking Vioxx had five times the relative risk of adverse cardiovascular events as patients who took Naproxen.[16] But despite the fact that Merck employees had expressed concern since at least 1997 that Vioxx could present cardiovascular risks, Merck argued that the VIGOR results could be explained by a combination of chance and the cardio-protective effects of Naproxen.

Eventually, the FDA approved the use of Vioxx to treat rheumatoid arthritis, and after some negotiation, Merck placed the cardiovascular data from the VIGOR trial on the label for Vioxx, though not in the warnings section. In 2000, Merck again sought approval from the FDA for treatment of yet another condition, colon polyps. To test the efficacy of Vioxx in treating colon polyps Merck commissioned the APPROVe trial. But after APPROVe found that patients taking Vioxx had a statistically significant increased relative risk of adverse cardiovascular events compared to placebo after eighteen months of exposure, Merck announced that it would voluntarily remove Vioxx from the market on September 30, 2004. In 2005, the FDA commissioned an advisory panel to examine the cardiovascular concerns relating to Vioxx and other selective NSAIDs. The panel eventually concluded that the drugs did present cardiovascular risks after prolonged exposure, but it did not find that they presented a risk after only short-term use.

Thousands of lawsuits were filed across the country, alleging that Vioxx caused heart attacks or other adverse cardiovascular events. After a few cases were tried with mixed results, Merck

[16] *Id.*

agreed to pay $4.85 billion into a settlement fund for qualifying claims. The Garzas' claim did not qualify.

II

To prevail on their inadequate-warnings claim, the Garzas were required to prove that Garza's ingestion of Vioxx 25 mg pills over a period of 25 days was the producing cause of his heart attack. As we explained in *Merrell Dow Pharmaceuticals, Inc. v. Havner*,[17] causation, in this context, has two components: general and specific. "General causation is whether a substance is capable of causing a particular injury or condition in the general population, while specific causation is whether a substance caused a particular individual's injury."[18] The Garzas relied on testimony from two cardiologists who based their opinions on data compiled in Merck-sponsored clinical trials of Vioxx, meta-analyses of those trials, and other observational, epidemiological studies regarding the possible cardiovascular risks presented by Vioxx. Merck contends that the Garzas' evidence did not meet *Havner*'s requirements for scientific reliability. Specifically, Merck argues that *Havner* requires a plaintiff who claims injury from taking a drug to produce two independent epidemiological studies showing a statistically significant doubling of the relative risk of the injury for patients taking the drug under conditions substantially similar to the plaintiff's (dose and duration, for example) as compared to patients taking a placebo. The Garzas argue that *Havner*'s requirements for epidemiological evidence apply only to uncontrolled, observational studies, not to studies from clinical trials, like the ones on which they rely. Or if the requirements do apply to

[17] 953 S.W.2d 706 (Tex. 1997).

[18] *Id*. at 714.

clinical trials, then the Garzas argue that *Havner* does not establish bright-line requirements as argued by Merck, but charges courts with surveying the totality of the evidence regarding causation. In any event, the Garzas contend that evidence failing *Havner*'s requirements may nevertheless be sufficient if accompanied by other reliable evidence of causation.

A

In *Havner*, the plaintiff claimed that taking Bendectin for morning sickness during her pregnancy caused birth defects in her baby.[19] In analyzing whether there was evidence of causation, we started with the general proposition that "a determination of scientific reliability is appropriate in reviewing the legal sufficiency of evidence."[20] We reiterated that courts must look beyond the bare opinions of qualified experts and independently evaluate the foundational data underlying an expert's opinion in order to determine whether the expert's opinion is reliable.[21]

> If the foundational data underlying opinion testimony are unreliable, an expert will not be permitted to base an opinion on that data because any opinion drawn from that data is likewise unreliable. Further, an expert's testimony is unreliable even when the underlying data are sound if the expert draws conclusions from that data based on flawed methodology. A flaw in the expert's reasoning from the data may render reliance on a study unreasonable and render the inferences drawn therefrom dubious.

---

[19] *Id*. at 708.

[20] *Id*. at 713.

[21] *Id*. at 711-712. *See also E.I. du Pont de Nemours & Co. v. Robinson*, 923 S.W.2d 549, 557 (Tex. 1995) (providing that, in a determination of the admissibility of expert testimony, the court should look to: (1) the extent to which the theory has been or can be tested; (2) the extent to which the technique relies upon the subjective interpretation of the expert; (3) whether the theory has been subjected to peer review and publication; (4) the technique's potential rate of error; (5) whether the underlying theory or technique has been generally accepted as valid by the relevant scientific community; and (6) the non-judicial uses that have been made of the theory or technique).

> Under that circumstance, the expert's scientific testimony is unreliable and, legally, no evidence.[22]

Causation can sometimes be proved directly.

> In some cases, controlled scientific experiments can be carried out to determine if a substance is capable of causing a particular injury or condition, and there will be objective criteria by which it can be determined with reasonable certainty that a particular individual's injury was caused by exposure to a given substance.[23]

Often, however, it can be proved only indirectly, with epidemiological studies.

> In the absence of direct, scientifically reliable proof of causation, claimants may attempt to demonstrate that exposure to the substance at issue increases the risk of their particular injury. The finder of fact is asked to infer that because the risk is demonstrably greater in the general population due to exposure to the substance, the claimant's injury was more likely than not caused by that substance.[24]

Allowing such proof

> concedes that science cannot tell us what caused a particular plaintiff's injury. It is based on a policy determination that when the incidence of a disease or injury is sufficiently elevated due to exposure to a substance, someone who was exposed to that substance and exhibits the disease or injury can raise a fact question on causation.[25]

The epidemiological evidence on which the experts in *Havner* relied consisted largely of unpublished, retroactive, observational studies. The Garzas argue that their evidence of clinical trials involving Vioxx is more reliable. The difference between the two types of epidemiological evidence is this:

---

[22] *Havner*, 953 S.W.2d at 714.

[23] *Id*. at 714-715.

[24] *Id*.

[25] *Id*. (internal citation omitted).

> Epidemiological studies may be characterized as **experimental** or **observational**. The major difference between the two is that in an experimental setting, the epidemiologist *controls the conditions* under which the study is to be conducted; in an observational setting, the epidemiologist is *not able* to control these conditions. In experiments, the epidemiologist controls the method of assigning subjects to either the treatment or the comparison groups. A commonly used means of assignment is to randomly allocate similar persons to the treatment or the comparison group; such an experiment is called a randomized clinical trial . . . .[26]

But while the controlled, experimental, and prospective nature of clinical trials undoubtedly make them more reliable than retroactive, observational studies, both must show a statistically significant doubling of the risk in order to be some evidence that a drug more likely than not caused a particular injury. The superior way in which a study is conducted does not justify taking its conclusion to be anything other than what it is. The purpose of the structure of epidemiological studies and the statistical evaluation of their results is to provide "objective criteria by which it can be determined with reasonable certainty that a particular individual's injury was caused by exposure to a given substance."[27] *Havner*'s requirements necessarily apply to all epidemiological evidence, including the causation evidence the Garzas presented at trial.

B

In *Havner*, we surveyed the opinions of other courts and scholarly commentary and concluded:

> Although we recognize that there is not a precise fit between science and legal burdens of proof, we are persuaded that properly designed and executed epidemiological studies may be part of the evidence supporting causation in a toxic

---

[26] DAVID E. LILIENFELD & PAUL D, STOLLEY, FOUNDATIONS OF EPIDEMIOLOGY 151 (3rd ed. 1994) (internal citation omitted).

[27] *Havner*, 953 S.W.2d at 715.

> tort case and that there is a rational basis for relating the requirement that there be more than a "doubling of the risk" to our no evidence standard of review and to the more likely than not burden of proof.[28]

To demonstrate the thinking behind the doubling of the risk requirement we then used the following admittedly oversimplified example:

> Assume that a condition naturally occurs in six out of 1,000 people even when they are not exposed to a certain drug. If studies of people who did take the drug show that nine out of 1,000 contracted the disease, it is still more likely than not that causes other than the drug were responsible for any given occurrence of the disease since it occurs in six out of 1,000 individuals anyway. Six of the nine incidences would be statistically attributable to causes other than the drug, and therefore, it is not more probable that the drug caused any one incidence of disease. This would only amount to evidence that the drug could have caused the disease. However, if more than twelve out of 1,000 who take the drug contract the disease, then it may be statistically more likely than not that a given individual's disease was caused by the drug.[29]

In essence, we acknowledged that "frequency data, such as the incidence of adverse effects in the general population when exposed, cannot indicate the actual cause of a given individual's disease or condition."[30] However, we found that "[t]he use of scientifically reliable epidemiological studies and the requirement of more than a doubling of the risk strikes a balance between the needs of our legal system and the limits of science."[31]

The Garzas argue that *Havner* did not ultimately hold that a study had to show a doubling of the risk in order to be found reliable evidence of causation. They point out that *Havner* states:

---

[28] *Id*. at 717.

[29] *Id*. (emphasis omitted).

[30] *Id*. at 718.

[31] *Id*.

> We do not hold, however, that a relative risk of more than 2.0 is a litmus test or that a single epidemiological test is legally sufficient evidence of causation. Other factors must be considered. As already noted, epidemiological studies only show an association. There may in fact be no causal relationship even if the relative risk is high. . . . Likewise, even if a particular study reports a low relative risk, there may in fact be a causal relationship. The strong consensus among epidemiologists is that conclusions about causation should not be drawn, if at all, until a number of criteria have been considered.[32]

The opinion further noted that epidemiological studies "are subject to many biases and therefore present formidable problems in design and execution and even greater problems in interpretation."[33] Accordingly, we stated that

> there are a number of reasons why reliance on a relative risk of 2.0 as a bright-line boundary would not be in accordance with sound scientific methodology in some cases. Careful exploration and explication of what is reliable scientific methodology in a given context is necessary.[34]

But these statements must be read in context. Our concern was that statistically reliable studies showing a doubling of the risk might nevertheless be insufficient to prove causation, not that they would ever be unnecessary. We noted that "[a] few courts that have embraced the more-than-double-the-risk standard have indicated in dicta that in some instances, epidemiological studies with relative risks of less than 2.0 might suffice if there were other evidence of causation."[35] We declined to join those courts, leaving undecided "whether epidemiological evidence with a

---

[32] *Id*.

[33] *Id.* at 719 (quoting Marcia Angell, *The Interpretation of Epidemiologic Studies*, 323 NEW ENG. L. REV. 823, 824 (1996)).

[34] *Id*.

[35] *Id*.

relative risk less than 2.0, coupled with other credible and reliable evidence, may be legally sufficient to support causation."[36]

We concluded that the studies in *Havner* were unreliable when they did not show a doubling of the risk that was statistically significant at the 95% confidence level. After analyzing and adopting the "methodology that is at present generally accepted among epidemiologists"[37] — namely, that studies finding a doubling of the risk are statistically significant at the 95% confidence level — we considered each of the studies that served as the foundation for the opinions of the Havners' experts. We concluded that any study that did not find a doubling of the risk that was statistically significant at the 95% confidence level was unreliable.[38] Also, we indicated that an expert's opinion that relied on a combined analysis of several studies was unreliable because the studies did not show a doubling of the risk.[39]

Havner holds, and we reiterate, that when parties attempt to prove general causation using epidemiological evidence, a threshold requirement of reliability is that the evidence demonstrate a statistically significant doubling of the risk. In addition, *Havner* requires that a plaintiff show "that he or she is similar to [the subjects] in the studies" and that "other plausible causes of the injury or

---

[36] *Id*.

[37] *Id*. at 712.

[38] Id. at 724-726.

[39] *Id*. at 725 ("[The expert] also said that these studies were consistent with a relative risk that was between 0.7 and 1.8. That is not a doubling of the risk. It may support her opinion that it is more probable than not that there is an *association* between Bendectin and limb reduction defects, but the *magnitude* of the association she gleaned from these studies is not more than 2.0, based on her own testimony.").

condition that could be negated [are excluded] with reasonable certainty."[40] *Havner* also requires that even if studies meet the threshold requirements of reliability, sound methodology still necessitates that courts examine the design and execution of epidemiological studies using factors like the Bradford Hill criteria[41] to reveal any biases that might have skewed the results of a study,[42] and to ensure that the standards of reliability are met in at least two properly designed studies.[43] Thus, a plaintiff must first pass the primary reliability inquiry by meeting *Havner*'s threshold requirements of general causation. Then, courts must conduct the secondary reliability inquiry that examines the soundness of a study's findings using the totality of the evidence test. As we concluded in *Havner*:

> In sum, we emphasize that courts must make a determination of reliability from all the evidence. Courts should allow a party, plaintiff or defendant, to present the best available evidence, assuming it passes muster under *Robinson*, and only then should a court determine from a totality of the evidence, considering all factors affecting the reliability of particular studies, whether there is legally sufficient evidence to support a judgment.[44]

C

The Garzas contend that they presented more than two studies showing a statistically significant doubling of the risk of heart attack from taking Vioxx, thereby satisfying *Havner*'s

---

[40] *Id*. at 720.

[41] *Havner*, 953 S.W.2d 706, 718 n.2. Those criteria, published by Sir Austin Bradford Hill in 1965 and widely used by epidemiologists, are more fully described in *Havner*. The criteria are grouped in nine categories: strength of association, consistency, specificity, temporality, biological gradient, plausibility, coherence, experiment, and analogy.

[42] *Id*. at 718-719.

[43] *Id*. at 727.

[44] *Id*. at 720.

requirements. First, they point to the VIGOR study. Although the results of VIGOR indicate statistically significant results showing five times as many heart attacks for the patients on Vioxx compared to the patients on Naproxyn, that study involved a dosage of 50 mg and a median duration of 9 months—double the dosage Mr. Garza took (25 mg) and a much longer duration than Mr. Garza's 25 days. The Garzas argue, and we agree, that this finding of an increased risk does not necessarily mean that there is no increased risk at a lower dose and smaller duration. But the point is not that the VIGOR study suggests that a lesser exposure to Vioxx is less risky, but that the study suggests nothing at all about significantly lesser exposure. The usage involved in a study need not match the claimant's usage exactly, but the conditions of the the study should be substantially similar to the claimant's circumstances. The Garzas simply cannot argue that the VIGOR study showed a statistically significant doubling of the relative risk for a person like Garza, who took a much smaller dosage of Vioxx for much less time.[45]

Another study presented, the Shapiro meta-analysis, also falls short. The Shapiro meta-analysis, performed in 2000 by Merck employee Deborah Shapiro, combined and analyzed much of the cardiovascular data that the company had gathered up to that point. In one arm of the analysis, Shapiro compared the relative risks of heart attack of people who had taken Vioxx to the risks of people who had taken other NSAIDs. This analysis found that patients who had taken Vioxx had a relative risk of 2.02 compared to the users of other NSAIDs. The results were significant at the 95% confidence level with a confidence interval from 1.14 to 3.55. However, as meta-analysis, it

[45] The Graham study is similarly unreliable because the statistically significant finding applied only to 50 mg dosages.

combines the results of a number of different studies, with differing dosages, durations, and comparison drugs. This is especially problematic given the influence of the VIGOR results on the analysis. VIGOR, as we have said, used double Garza's dose of Vioxx with patients for a median period of nine months. When the VIGOR results were removed from the meta-analysis, Shapiro found the relative risk of heart attack of Vioxx patients to other NSAID recipients dropped to 1.19 at the 95% level with an interval from 0.60 to 2.35. And even those remaining results are skewed by differences in dose and duration compared to Garza's exposure.

The Garzas also rely on the APPROVe study. That study found an overall relative risk greater than 2 for APTC (Antiplatelet Trialists' Collaboration criteria) events, a category of events which includes "the combined incidence of death from cardiovascular, hemorrhagic, and unknown causes; of nonfatal myocardial infarction; and of nonfatal ischemic and hemorrhagic stroke." However, the other category studied, Cardiovascular Thrombotic Events, a narrower category still containing Mr. Garza's injury, found an overall risk of 1.92. Moreover, the study took place over a three-year period and did not show statistically significant differences until after eighteen months, a much longer duration than Mr. Garza's use.

Finally,[46] the Garzas presented the VICTOR study, a clinical trial designed to measure the efficacy of Vioxx in treating patients with colorectal cancer. At trial, the only evidence of VICTOR was an e-mail containing two charts of preliminary results and cursory testimony regarding

[46] The Garzas presented a total of six other studies throughout the course of litigation. Two of the studies (ADVANTAGE and Protocol 090) contain a relative risk factor greater than 2.0, but neither of these studies contain sufficient data to achieve statistical significance. The Garzas do not contend that any one of the remaining four studies (the Juni paper, the Solomon study, the Ingenix study, and the Protocol 010 study) sufficiently indicate a statistically significant doubling of the risk of heart attack.

VICTOR's protocol and findings. However, although the VICTOR study was discontinued after two years, it does appear that these preliminary findings achieve statistically significant results for confirmed "thrombotic events" with a relative risk of over 3.0. But even if VICTOR qualifies under *Havner*'s test, it cannot do so alone. Another study is still necessary, but lacking here.

Thus, the two cited by the Garzas do not meet *Havner*'s standards of reliability.

D

While we have held that epidemiological evidence used to prove general causation must meet *Havner*'s requirements for scientific reliability, we return briefly to the Garzas' argument that the totality of the evidence in this case shows general causation. They point to evidence that Merck largely excluded patients with a history of cardiovascular disease from its studies. They argue that the trials suffer from selection bias in that they excluded a subset of people who were at an elevated risk of suffering a Vioxx-induced heart attack. But several of the studies did include patients who had some history of cardiovascular disease, and in any event, the absence of evidence cannot substitute for evidence. The Garzas argue that the risk doubling for Garza required by *Havner* can be extrapolated from studies finding a doubling of the risk at much higher doses and longer durations. But the Garzas cannot point to any scientific basis for such an extrapolation.

The totality of the evidence cannot prove general causation if it does not meet the standards for scientific reliability established by *Havner*. A plaintiff cannot prove causation by presenting different types of unreliable evidence. Thus, we are constrained to hold that the Garzas did not present reliable evidence of general causation and are therefore not entitled to recover against Merck.

* * *

Accordingly, the judgment of the court of appeals is reversed and judgment rendered that the Garzas take nothing.

Nathan L. Hecht
Justice

Opinion delivered: August 26, 2011

IN THE SUPREME COURT OF TEXAS

NO. 09-0100

TRAVIS CENTRAL APPRAISAL DISTRICT, PETITIONER,

v.

DIANE LEE NORMAN, RESPONDENT

ON PETITION FOR REVIEW FROM THE
COURT OF APPEALS FOR THE THIRD DISTRICT OF TEXAS

Argued December 16, 2009

JUSTICE MEDINA delivered the opinion of the Court.

The Texas Anti-Retaliation Law, found in Chapter 451 of the Texas Labor Code, prohibits a person from discharging or discriminating against an employee, who in good faith files a workers' compensation claim. *See* TEX. LAB. CODE § 451.001(1). This law applies to private employers. We have also held it to apply to the state's political subdivisions through Chapter 504 of the Labor Code. *See City of LaPorte v. Barfield,* 898 S.W.2d 288, 298–99 (Tex. 1995) (holding that Chapter 504 waives the governmental immunity of political subdivisions for retaliatory discharge claims under Chapter 451).

In this interlocutory appeal, a political subdivision of the state argues that Chapter 504 has been amended since our decision in *Barfield* and no longer waives a political subdivision's immunity

for retaliatory discharge claims under Chapter 451. We agree and conclude that our analysis of an earlier version of the Anti-Retaliation Law in *Barfield* is therefore not controlling. Because the court of appeals permitted the plaintiff's claim to proceed, as *Barfield* would have, we must under the current law reverse the court of appeals' judgment and dismiss the case.

I

Diane Lee Norman went to work for the Travis Central Appraisal District ("TCAD") as a probationary employee in January of 2006. She was terminated about six months later, shortly after filing a workers' compensation claim. Norman claimed that she was terminated for seeking workers' compensation benefits and sued TCAD for retaliatory discharge under Chapter 451 of the Labor Code. *See* TEX. LAB. CODE § 451.001(1).

TCAD generally denied Norman's allegations and subsequently filed a plea to the jurisdiction, urging that Norman was required to exhaust her administrative remedies under TCAD's grievance procedures before filing suit. In support of its plea, TCAD attached part of its personnel policy handbook outlining its internal grievance procedures and an affidavit from Norman's supervisor, Mark Price, who also testified at the hearing on the plea.

Norman contended at this hearing that TCAD's grievance policy did not apply to her retaliatory discharge claim. She argued that Chapter 451 does not mention exhaustion of remedies as a jurisdictional prerequisite and that exhaustion is not required unless the Legislature has vested an administrative agency with exclusive jurisdiction over a controversy. She further cross-examined Price concerning his statements that the personnel manual did not apply to probationary employees
