

Year over year we're seeing a massive level of underreporting. Only **7%** of the counties reported a security incident in their court in FY 2024. For FY 25 we're up **22% in incident reports received** (1392 total reported this year up from 1080) from the year prior, averaging about **232 or so reports a month**. The majority not coming from the local law enforcement, but from our contracted friends at Allied Universal in Nueces Municipal. **In the last 30 days we've had 218 incidents reported.**

The most commonly reported incidents are seizures of weapons, EDC, or self-defense tools at security checkpoints followed by threats. **In FY 24 77.5%** of all incidents were weapons seizure or discovery. The major question to ask is—do we think that 236 counties across the state had 0 weapons seized or discovered at their security checkpoints in their courts, much less anything more serious.
